

Project 2-5 Beale Street Bicycle Lane, Bryant Street to Folsom Street

This project would add a new route to the City's existing bicycle route network.

This project would involve the installation of a Class II bicycle lane in the southbound direction on Beale Street between Folsom Street and Bryant Street.

The reopening of Beale Street as a through street in 2006, after it was closed as a post-9/11 security measure for the Bay Bridge, involved converting the street from one-way southbound operation to two-way operation, with one travel lane in each direction. This conversion resulted in parking layout changes on both sides of the street with a net loss of 42 parking spaces. This project would add a southbound Class II bicycle lane between Folsom Street and Bryant Street and would not involve any travel lane or parking removal.
