

Project 2-9 Howard Street Bicycle Lane, The Embarcadero to Fremont Street

This project would involve the installation of a Class II bicycle lane in the westbound direction on Howard Street between The Embarcadero and Fremont Street.

This project would add a westbound Class II bicycle lane between The Embarcadero and Fremont Street by narrowing travel lanes in both directions on Howard Street from The Embarcadero to Steuart Street, removing one eastbound travel lane between Spear Street and Steuart Street, converting one of the two eastbound travel lanes between Main Street and Spear Street to a right-turn only lane (excepting Muni), and removing one westbound travel lane between Main Street and Fremont Street during the AM and PM peak hours. This project would result in a gain of 17 parking spaces on the north side of Howard Street during the afternoon peak hours and a gain of 10 parking spaces during the morning peak hours. This project also would establish a part-time bus zone on the southeast corner of Howard Street and Spear Street, which would result in a loss of four parking spaces from 6AM to 10 AM.
