

You must always lock your bicycle.

Lock the whole bike. Make sure your chain, cable, or U lock is locked through the frame and both wheels-taking the front wheel off if you have a quick-release hub. Never lock your wheel without locking the frame, because thieves can remove your wheel and steal the rest of the bike.

bike racks

where you want to go

Dear Cyclist,

I am pleased to present this handy map of San Francisco bicycle parking facilities. Since 2002, the Department of Parking and Traffic has installed 700 new bicycle racks on City sidewalks. We also have brought many parking garages into compliance with the ordinance requiring bicycle parking. To find bicycle parking near your destination, or for more information on cycling in San Francisco in general, please check out our website, www.bicycle.sfgov.org. You may also call our hotline at 415-585-BIKE for answers to your questions or to report a parking garage that is out of compliance with the bicycle parking requirements.

Every time one rides a bicycle rather than drive a car, it means less congestion, cleaner air, and a more livable environment for all. That's why DPT is a key stakeholder in the City's Transit First policy, and why our Bicycle Program staff continue to work towards improving bicycling safety and convenience.

Sincerely,
Gerald R. Norman, Executive Director

The Department of Parking and Traffic Bicycle Program has installed 1,100 bicycle racks within the past few years, on sidewalks and in City-owned parking garages. They also helped many private parking garages install bicycle racks, so there should be a place to lock your bicycle safely, **where you want to go.**

Log on to www.bicycle.sfgov.org for a map of locations of bicycle racks on the sidewalks. If there is no bicycle rack in front of a **business that you want to patronize, please call 415-585-BIKE** to request a bicycle rack. See the reverse side of this brochure for a map of garages that provide bicycle parking.
