Central Subway Project Contact Information......E5

<u>Cover photo:</u> At the southwest corner of the Union Square Garage, a small portion of the garage structure is being removed to facilitate construction of the northern entrance to Union Square/Market Street Station. Crews have removed a portion of the roof plaza covering the work site, and have begun installing tiebacks to reinforce the exterior garage walls. **More photos of this can be found starting on page 34.**

<u>Above photos</u>: With work to excavate the lower portion of the Yerba Buena/Moscone Station now underway, crews coordinate removing soil and transporting it to a holding area inside the station headhouse. There, material is lifted to the surface using an excavator fitted with a long arm, and loaded directly into dump trucks waiting on Folsom Street.

See the Appendix E final page for CS websites hyperlinks and public outreach on line resources. The Project main web site is at: <u>http://www.centralsubwaysf.com/</u>

Steel beams jut from structural piles installed just south of Geary Street on Stockton, where site excavation is underway.

Executive Summary

Continue excavation at YBM, UMS and CTS Stations for the future stations.

Chinatown Station - Connections for brick sewer. Pump CDF in tunnels. Install rebar and form and pour Composite wall Pour 2. Find and clean composite wall inbeds, West wall Pour 2. Chinatown Moratorium.

Union Square/Market Street Station - Traffic Handling -Stockton Street closure between Post and Ellis. South Concourse and Platform Station: continued mobilizing jet grout operations. Platform Station: Resumed jet grouting installation. Excavated and chipped piles for roof deck sections 1A and 4A-9, installed temporary bridge at 1A. North Concourse: set up compensation grout plant; perform utility work on Geary Street and Stockton Streets. UMS Garage: Continued demolition on the plaza level. UMS Garage: Completed installation of tiebacks. UMS Garage: Continue work on shear walls between new ramp and Stockton Street.

Yerba Buena/Moscone Station - Traffic flowing on east side of 4th Street with west side work area closed for construction. Station box level 4 temporary bracing installation is in progress beneath Mezzanine level. Temporary bracing is being installed within tunnel to provide support during installation of Concourse level beams and slab. Headhouse level 4 temporary bracing installation has begun. Archaeological monitoring by spot checking is in progress.

Surface, Track and Systems– Continue Muni ductbank installation. Continue 78" sewer rehabilitation. Continue 36" sewer force main. Continue Auxiliary Water Supply System (AWSS) installation. Continue water line work. Continue AT&T cutover. Continue tunnel prep work. Continue OCS pole foundation installation.

Tunnel - Contract administrative closeout is ongoing.

Total project costs to date are \$893.70 million, an increase of \$10.57 million over last month. The total cost to date equals 56.62% of the total project budget of \$1.578 billion. The Master Project Schedule forecast the Revenue Service Date of May 2019.

The Stations Contractors' Safety Reports show no recordable accidents took place this month and the rates of work site accident incidents by the man hours worked continue to be below industry standards - see tables on page 30.

Key Milestones

Resuming work at UMS following the holiday moratorium

1 Workers roll up the green carpet of the Winter Walk and install safety barriers

MILESTONE	DATE EXPECTED
General	
Revenue Service	May 2019
Contract 1252 Tunnels	
Substantial Completion	April 15, 2015 (A)
Contract 1300 Stations, St	urface, Track, Systems
Notice to Proceed (NTP 1)	June 17, 2013 (A)
Notice to Proceed (NTP 2)	January 12, 2014 (A)
Substantial Completion	February 10, 2018

2 Heavy earth moving equipment is mobilized and support systems installed

3 Excavation begins at the remaining work sites to finish the station roof

Costs and Schedule

Costs (See Appendix A for Details)

The Current Cost Estimate (CCE) for the Central Subway Project is **\$1.578 billion** in year of expenditure dollars (\$YOE). This total project cost is shown at the top of Report 7.1, Program Project Budget. This capital cost projection incorporates allocated and unallocated contingencies to cover the risks associated with the project completion.

Total net incurred costs for the project are \$893.70 million, a \$10.57 million increase over last month. The cost to date figure reflects expenditures through FAMIS 786 Report (\$859.73 million) plus the utilities joint trench Form B Reimbursement payment (\$10.52 million), invoices currently being processed (\$20.19 million) and estimates of outstanding pay requests (\$3.26 million). This incurred amount equals 56.62% of the total project budget of \$1.578 billion.

The current funding level to date is \$1,179.79 million. This represents 75% of the total project budget.

Earned Value Analysis

In January 2016 Report, Central Subway Project Master Schedule has used Contract 1300 Station contractor baseline schedule and rejected January monthly update schedule. Contractor has not addressed the cost issues in cost loaded schedule. Preliminary January Earned Value Analysis reports the Planned Value, Earned Value, Percent Complete and resulting indexes as follows:

Overall Budgeted Cost:	\$1,578,300,000
Planned Value:	\$1,162,255,366
Earned Value:	\$924,964,020
Actual Cost:	\$893,698,520
Schedule Performance Index (SPI):	0.80
Cost Performance Index (CPI):	1.03
Percent Complete:	59%

Earned Value Cost shows \$38M higher than Actual Cost is mainly due to Contract 1300 Tutor Perini Corporation Schedule has remaining cost in the completed activities.

Schedule Highlights - Continued

The Master Project Schedule (MPS) below includes progress through December 2015. The January 2016 Schedule Update submittal from Contract 1300 Contractor is rejected based on erroneous logic changes. The Contract 1300 schedule represented in this report is based on the December 2015 Update. The Program is working on providing a properly updated Contract 1300 schedule in February 2016 Update. The MPS shows a forecast Revenue Service Date of May 24, 2019.

The controlling critical (longest) path of the MPS runs through CTS Excavation succeeded by STS Startup & Testing, Commissioning and Pre-Revenue Activities to the Baseline Finish and Revenue Service Date. See Appendix B – Longest Path. The latest schedule shows the longest path running through the Chinatown Station (CTS). The CN-1300 Contractor continues to fall behind schedule by not following their current plan and by not working on critical activities to meet schedule goals and Contract Milestones. Contractor is required to implement a Recovery Schedule to put the Project back on schedule.

Schedule Contingency is fully utilized on the critical path of the MPS, which is below the Minimum Schedule Contingency level of 6 months. A schedule re-evaluation will be performed, utilizing the updated Contract 1300 Schedule. Recovery options are being implemented in key areas as work proceeds. SFMTA met with Contractor in December to discuss all schedule concerns and comments. The Contractor, Tutor Perini Corporation's (TPC) schedule continues to show schedule slippage due to lack of schedule progress on Critical Path activities.

The 1300 Contractor submitted fourteen (14) Schedule Updates from December 2014 to January 2016. SFMTA rejected September to January schedule updates. Contractor has been directed to develop a Recovery Schedule as required by Contract and correct out-of-sequence and Retained Logic driving many of the forecast dates. The 1300 Contractor continues to address key critical activities to recover lost time and improve schedule performance. Review of schedule updates as well as identifying recovery options is ongoing.

Contract 1300 Stations, Surface, Track and Systems

The Contractor, Tutor Perini Corporation's (TPC) baseline schedule is incorporated into the master program. The preliminary Tutor Perini Corporation's (TPC) December schedule is used in January

With work restarting after the holidays on Stockton between Ellis and Maiden Lane, drill rigs have been set up to conduct soil improvement work.

Schedule Highlights - Continued

Report.

Work Package P-1254R CTS performed the following work this month:

- Connections for the brick sewer
- Pump CDF into tunnels
- Install rebar and form and pour Composite wall Pour 2
- Find and clean composite wall embeds, West wall Pour 2
- Chinatown Moratorium

Work Package P-1253 UMS performed the following work this month:

- Traffic Handling Stockton Street closure between Post and Ellis
- South Concourse and Platform Station: continued mobilizing jet grout operations
- Platform Station: Resumed jet grouting installation. Excavated and chipped piles for roof deck sections 1A and 4A-9, installed temporary bridge at 1A
- North Concourse: set up compensation grout plant; perform utility work on Geary Street and Stockton Streets
- UMS Garage: Continued demolition on the plaza level
- UMS Garage: Completed installation of tiebacks
- UMS Garage: Continue work on shear walls between new ramp and Stockton Street

Work Package P-1255 YBM performed the following work this month:

- Traffic flowing on east side of 4th Street with west side work area closed for construction
- Station box level 4 temporary bracing installation is in progress beneath Mezzanine level
- Temporary bracing is being installed within tunnel to provide support during installation of Concourse level beams and slab.
- Headhouse level 4 temporary bracing installation has begun
- Archaeological monitoring by spot checking is in progress

Work Package P-1256 STS performed the following work this month:

- Continue Muni ductbank installation
- Continue 78" sewer rehabilitation
- Continue 36" sewer force main
- Continue Auxiliary Water Supply System (AWSS) installation
- Continue water line work
- Continue AT&T cutover
- Continue tunnel prep work
- Continue OCS pole foundation installation
- Continue 4th/King sewer structure modification
- Continue OCS pole foundation installation

Rebar extends past sections of concrete being carefully demolished at the southeast corner of the Union Square Garage, where work to construct the future north station entrance has been underway.

Contracts & Construction

Construction Contracts In Progress

Contract 1300: Combined Work Packages 1253, 1254, 1255, 1256

- Contractor:
- Tutor Perini Corporation
- Amount: \$838.65 million
- Contract Status: 43.88% complete construction

Contracts Completed

Contract 1250: Moscone Station and Portal Utilities Relocation

Contract 1251: Union Square/Market Street Station Utility Relocation

Contract 1277: Pagoda Theater Site Demolition (Funded separately from the CS Project budget)

Contract 1252: Central Subway Tunneling

Contract SBE Participation (Updated Quarterly) See Appendix E

See Appendix D

Stations, Surface, Track and Systems

Contract 1300 Contractor: Tutor-Perini Corporation

Description of Work

The Contract 1300 scope is to construct the Central Subway's three subway stations, one surface station, construct the 2,000 feet of surface track, and install track and operating systems throughout the new alignment. The separate station and systems work packages are presented in the following pages.

Work includes station finishes, AC and DC substations, elevators, escalators, lighting, emergency ventilation fans, HVAC fire alarm/ suppression/ protection, Cutter Soil Mixing, secant pile bottom up and Sequential Excavation Method construction, settlement monitoring, building protection, connecting to and modifying the BART Powell Street Station, PA, CCTV, signage, installation of fare collection equipment and station start-up and commissioning.

Contract 1300 - Work Package 1254R

Current Work Status

- Connections for the brick sewer
- Pump CDF into tunnels
- Install rebar and form and pour Composite
 wall Pour 2
- Find and clean composite wall embeds, West wall Pour 2
- Chinatown Moratorium

Work Expected Next Month

- Chinatown Moratorium
- Finish pumping CDF into tunnels
- Form and pour 2nd pour of composite wall
- Start barrel vault installation
- Install weep hole through slurry walls
- Excavate for North Access Shaft
- Finish slip line brick sewer on Stockton
 Street

Description of Work

This Work Package is to construct one subway station. Includes station finishes, AC and DC Traction Power substations elevators, escalators, lighting, emergency ventilation fans, HVAC fire alarm/ suppression/ protection, slurry wall top-down construction, settlement monitoring, building protection, PA, CCTV, signage, installation of fare collection equipment and station start-up and commissioning.

Three Month Look Ahead

- Finish installing barrel vaults pipe
- North Access Shaft and tunnel excavation
- Excavate to level 4 bracing, install bracing
- Start SEM crosscut excavation

Schedule: Contract 1300 December 2015 Update

Contract 1300 Work Package1253

Description of Work

This Work Package is to construct one subway station. Includes station finishes, AC and DC Traction Power substations elevators, escalators, lighting, emergency ventilation fans, HVAC fire alarm/ suppression/ protection, slurry wall top-down construction, settlement monitoring, building protection, PA, CCTV, signage, installation of fare collection equipment and station start-up and commissioning.

Current Status This Month

- Traffic Handling Stockton Street closure between Post and Ellis
- South Concourse and Platform Station: continued mobilizing jet grout operations
- Platform Station: Resumed jet grouting installation. Excavated and chipped piles for roof deck sections 1A and 4A-9, installed temporary bridge at 1A
- North Concourse: set up compensation grout plant; perform utility work on Geary Street and Stockton Streets
- UMS Garage: Continued demolition on the plaza level
- UMS Garage: Completed installation of tiebacks
- UMS Garage: Continue work on shear walls between new ramp and Stockton Street

Work Expected Next Month

- North Concourse: Install compensation grout pipes and pretreatment.
- UMS Garage: Install plaza level deck and continue plaza level demolition
- Platform Station: Continue jet grout installation. Set/weld deck beams, install steel decking and studs for roof deck sections 4A -9 and 5B-10 and -11.
- Traffic Handling: Restore one lane on Stockton Street between Post and Geary Streets and reopen southeast Union Square stairway. Narrow O'Farrell Street to one lane to accommodate station roof deck

construction and jet grout installation.

- South Concourse: Excavate\grade for concourse invert slab, chip/prep piles for stub mud slab. Install waterproofing. Complete Ellis seismic joint installation and waterproofing.
- Union Square Garage demolition and abatement. Concrete installation

Three Month Look Ahead

- Begin dewatering to 10 Ft below bottom of excavation
- Install and pre-load permanent struts at concourse level to north headwall
- Install and pre-load permanent struts at concourse level to south headwall
- Install permanent wales at concourse level to south headwall
- UMS Garage Commence micropile installation
- UMS Garage Continue Demolition of Garage lower levels

Schedule: Contract 1300 December 2015 Update

Yerba Buena/Moscone Station

Contract 1300 - Work Package 1255

Current Status

- Traffic flowing on east side of 4th Street with west side work area closed for construction
- Station box level 4 temporary bracing installation is in progress beneath Mezzanine level
- Temporary bracing is being installed within tunnel to provide support during installation of Concourse level beams and slab.
- Headhouse level 4 temporary bracing installation has begun
- Archaeological monitoring by spot checking is in progress

Work Expected Next Month

- Continue excavation and temporary bracing installation in headhouse and station box, including beginning excavation to allow Concourse level slab installation
- Continue utility installation on 4th Street north of the north headwall and on Folsom Street

Description of Work

This Work Package is to construct one subway station. Includes station finishes, AC and DC Traction Power substations elevators, escalators, lighting, emergency ventilation fans, HVAC fire alarm/ suppression/ protection, slurry wall top-down construction, settlement monitoring, building protection, PA, CCTV, signage, installation of fare collection equipment and station start-up and commissioning.

Three Month Look Ahead

- Continuation of headhouse and station box excavation, install excavation temporary bracing
- Utility installation at intersection of 4th Street with Howard Street and Folsom Streets
- Restore roadway on 4th Street

Schedule: Contract 1300 December 2015 Update

Systems, Trackwork, & Surface Station

Contract 1300 - Work Package 1256

Description of Work

This Work Package is to construct one Surface Station. Includes light rail track and systems, track invert, track safety walkways; light rail track and systems constructed on the 2,000 foot surface for the alignment from the tunnel portal, south to the tie-in to the existing Muni T-Line at Fourth and King Streets; and the surface Fourth and Brannan Street (FBS) Station.

Current Status

- Continue Muni ductbank installation
- Continue 78" sewer rehabilitation
- Continue 36" sewer force main
- Continue Auxiliary Water Supply System (AWSS) installation
- Continue water line work
- Started AT&T cutover
- Continue tunnel prep work
- Continue 4th/King sewer structure modification
- Continue OCS pole foundation installation

Work Expected Next Month

- Continue 78" sewer rehabilitation
- Continue MRY ductbank and vault installation
- Continue 36" sewer force main
- Continue AWSS installation
- Continue waterline installation
- Continue 4th/King sewer structure modification
- Continue tunnel prep work
- Continue OCS pole foundation installation
- Continue AT&T cutover
- Start tunnel drainage system installation
- Start tunnel invert slab work

Three Month Look Ahead

- Waterline installation
- AWSS installation
- Muni ductbank installation and vault installation
- 36" sewer force main installation
- 78" sewer rehabilitation
- OCS pole foundation installation
- Tunnel drainage system installation
- Tunnel invert slab construction
- Tunnel walkway construction
- AT&T cutover

Systems, Trackwork, & Surface Station Construction - Continued

Schedule: Contract 1300 December 2015 Update

Program Components

Community Outreach

Outreach public information, events and presentations for November 2015 include:

Mayor's Budget Staff and Sup. Breed's Staff Tour

Planning Dept. Tour

Building Owner Management Government and Industry Affairs Tour

Town and Country Presentation

Outreach to stakeholders on night work activity for 4th and King work

Drafted and finalized FTA quarterly Presentation and Town and Country Presentation

Outreach in Support of Mitigation and Monitoring

Team members participated in weekly progress and traffic meetings to address neighborhood concerns

Outreach and communication efforts continue in Chinatown, Union Square, and SOMA

Weekly photo documentation of project work and editing

Weekly construction update emails sent to list of approximately 700 residents and stakeholders Distributed monthly construction update to STS and CTS neighborhood; CTS flier are bi-lingual

Media Coverage

Central Subway Media Coverage										
Date	Title (with link to story)	Source	Reporter/Writer							
1/13/16	Central Subway Future unites unlikely allies	SF Examiner	Joe Fitzgerald Rodriguez							
1/20/16	SF Mayor Wants Construction Project Slowdown to Ease Superbowl Traffic	CBS Bay Area	Mark Kelly							

Quality Assurance

Quality Assurance monthly activity of oversight, surveillance, audits, proactive feedback and QA records actively involves the Project construction management staff, the resident engineers, the prime construction contractor and their subcontractors.

Stations and Systems Contract CN1300 Quality Assurance Monitoring – On Going

- UMS roof beam to pile WF installation Installation of steel continues.
- UMS and YBM Water Proofing Subcontractor Waterproofing Experts and substrate and application inspection/acceptance by RDH in lieu of Kingfield Construction Products (water proofing manufacturer) continue.
- TPC QC Daily Inspection Reports (which includes TPC's Specialty Subcontractor's QC checklists and associated documentation and Smith Emery Inspection Reports)
- Smith Emery TPC's laboratory and Inspection Services including Special Inspections that are also provided via email to the City of San Francisco's Department of Building Inspection (DBI) for all permitted Work.
- Preparatory, Initial and Additional Initial Phase Meetings as required by Specification Section 01 45 00, continue. Attendance/participation of these vital meetings (Contractor is not allowed to start work until such time that all perquisite requirements have been met which continues to greatly facilitates all work being done to the strict requirements of the Contract Documents, the "first time"). Additional initial phase meetings are conducted, at the request of SFMTA for all concrete placements to ensure that all prerequisite requirements have been met.
- Bi-Weekly and ad hoc (mostly at the request of the UMS SFMTA Resident Engineer with Additional Initial Phase Meetings, per 01 45 00 Section 1.09, continue for pre-concrete placement which includes CDF) bi-weekly Quality Task Force (QTF) Meetings are attended primarily to assist and support the Contractor's QC effort and to discuss issues related to the identification of in-process items which left un-mitigated manifest into SFMTA not releasing SFMTA Hold Points.
- Instrumentation/Monitoring and Construction Management Task Force (CMTF) Meetings continue which now include preparation for the resumption of compaction and jet grouting, monitoring of dewatering at CTS and the ongoing CDF filling for removal of the precast liners at CTS and start of removal of precast liners at YBM.
- Bi-Weekly Quality Task Force Meetings ongoing dialog regarding identification and mitigation of in-process potentially unsatisfactory work, generation of CNCR and other items related to TPC's QC efforts in implementing TPC's approved Quality Control Program (QCP).
- Weekly Work Package Progress Meetings for STS, YBM, UMS and CTS and RE/PE Progress Meetings for STS, YBM, UMS and CTS when conducted and as time constraints allow.

Document comment and review:

• Contractor's submittals, e.g., review of welding, concrete and other Quality related submittals/

comments as requested to support the RE's and CM, and RFIs related to quality and welding.

- QA Staff continues random/spot checks of the 1300 Contractor's Field Testing lab results; items requiring further action/investigation (missing or inconsistent data, compressive strength results that appear to have a very broad range of values and such) are brought to the attention of the Contractor.
- Review of updated CNCR logs and CNCRs that provide information to REs regarding content, accuracy of the disposition and confirmation close-out is correct TPC QC has focused much attention to the accuracy and timeliness of the issuance and logging of CNCRs. The CNCR Log now has more accurate descriptions and status of each CNCR. The CNCR Log entries are now more accurate and timely. TPC QC continues to fulfill the 24 hour initial generation of a CNCR once cognizant (often as a result of RE and RE Staff identifying/requesting the issuance of a CNCR) of a non-conforming condition, through the issuance of the "Initial Issue" of each CNCR. The Initial Issue of each CNCR provides the "what" and "where" but not the "why" or how to prevent repeating CNCRs. TPC QC is now posting CNCRs to CM13, using the Noncompliance module of CM13. CNCRs are posted as attachments as are the SFMTA RE's responses to Use-As-Is and Repair dispositioned CNCRs. The overall quality and accuracy of the CNCR Log is currently acceptable.

QA Issues:

 Assurance that all RFIs, submittals and USE-AS-IS and REPAIR dispositioned CNCRs related to a particular concrete placement, have been approved by the SFMTA REs. Practically, SFMTA REs have imposed a concrete placement hold point for all concrete placements to collectively ensure that the Contractor has performed all work to the requirements of the Contract Documents, i.e., all RFIs, CNCRs and submittals have been approved and acceptably executed.

QA Concerns:

- SFMTA's provision of advance notification to TPC/TPC QC, of in-process work that appears to be deficient or of questionable nature.
- Necessity of using both Reinforcing Steel Design Drawings and approved Reinforcing Steel Shop Drawings to inspect/accept rebar placement.
- Approved submittals for UMS structural steel are awkward, at best, for TPC Production, TPC QC and RE's QA Inspectors to ensure that all work is performed as required by AWS D1.1 and our Contract Documents. TPC QC Engineers review TPC QC CWI's (Smith Emery provides the TPC QC Inspections) welding inspection documentation to verify that all welds are accounted for and accepted prior to concrete placement (see next item). One, complete and comprehensive submittal is overdue.
- Welding inspection and associated documentation of CWI acceptance of all welded joints, including tack welding, at UMS.
- The number of SFMTA CSP Field Notifications at UMS provided to TPC that TPC QC appear to be non-response to, continues as a topic of discussion at the bi-weekly Quality Task Force Meetings.

- De-certification of waterproofing installer, Water Proofing Experts, by Kingfield, waterproofing system manufacturer and documentation (potential lack of) issues associated with the required warranty from the waterproofing manufacturer(s).
- Systems Special Trackwork manufacturing and circuit grounding issues.

Other Program QA Practices Implemented

- Close-out of Corrective Action Requests: Close outs continued from Quality Assurance staff's Audits, Surveillances and PMOC Quarterly Reviews. The status is tracked in the Corrective Action Log that is provided to the project team and the FTA PMOC.
- Quality Assurance Surveillance QAS 072, Project Record Documentation (AS-Builts) was conducted, posted to CM13 and findings provided via letter to TPC for their action regarding discrepancies with the Contract Document requirements. A follow-up Surveillance is currently planned mid-February 2016.
- Satisfactory completion of the reconciliation/verification of CWI acceptance Inspection for UMS Structural Steel, that welding performed prior to mid-June 2015 was performed to approved shop and design drawings and the requirements of the Welding Code (AWS D1.1).

Risk Management

Risk Mitigation Management Meeting No. 78 was held on January 7, 2016. The Risk Assessment Committee reviewed and discussed Risks that include Construction Risks with ratings above 6; Remaining Requirement and Design Risks; and, any New Risk Assessment and Mitigations identified to date.

Program Safety & Security

The San Francisco Municipal Transportation Agency is committed to the highest practical level of safety and security standards and practices in the public transit industry. The Safety and Security Management Plan (SSMP) components are reported on below as appropriate including, Safety and Security Committee, the Fire Life Safety and Security Committee the Construction Conformance Verification and Documentation and Contractor Safety and Security.

Project Management/Construction Management (PMCM) Team

Safety bulletin boards have subjects covering the complacency and daily job briefings.

Safety Summary for the 1300 Stations Systems Track Construction Package

During the month of January, safety work on the 1300 contract progressed as follows:

STS had no recordable or first aid incidents. The STS workers did a great job preparing for the Super Bowl Week. They made sure that steel cover plates were painted with a non-slip coating. They also made sure that the excavations on Brannan were back filled and covered with cut back to eliminated potential trip and fall hazards.

At YBM, no injuries or incidents occurred. YBM has gotten very close to the tunnels and probably will break through in either March or April. They are starting to prepare for that task. YBM continues to off haul their spoils and had a very good arrangement on Folsom Street for that task.

UMS did not have any incidents during the last month. UMS cleared all of the moratorium items and remobed Layne's jet grouting operation. Fences have been reinstalled. Traffic controls are watched closely.

CTS continue to excavate the head house area. Frontier Kemper installed bulkheads in the tunnels and has filled them. They are starting to install the ventilation system in preparation for excavation to commence.

Program Safety & Security - continued

Table 1300 Stations Construction Safety Record

Table 1300 below summarizes the Month to Date and Project to Date for the Stations, Systems and Track Construction contractor and subcontractors. Table 1300 shows that no recordable accidents took place in July for the work underway at the station sites and surface line.

Next Month Look Ahead

1300 Contract

- 1. AT CTS, a second level of excavation is taking place. WE are waiting for information on the ventilation system that will be installed prior to the start of the SEM excavation.
- 2. At UMS, between the weather and removing the moratorium items, most of the work revolved around mobbing equipment into place.
- 3. AT YBM, the next level of excavation has started. We continue to closely watch mucking operations especially since they are getting close to the tunnels.
- 4. Frontier-Kemper is filling the bulkheads in the tunnel with CDF. They will then start to excavate the lower levels of the station. This should occur during late February or early March.

Program Safety & Security - continued

Project Safety Record - Contract 1300

SAFETY GOALS

Through Month End - Jan 2016

OSHA Recordable Accidents, <3.4

Lost Time Cases, <1.6

JOB TO DATE	Tutor	Subs	Total Project	Rate*
OSHA Recordable Accidents	3	0	3	<mark>0.6</mark> 5
Job Transfer or Restricted Duty Cases	0	0	0	0.00
Lost Time Cases	0	0	0	0.00
Total Project Incidents	3	0	3	<mark>0.6</mark> 5
Man Hours Worked Through M/E Jan 2016	428,681	491,269	919,950	

YEAR TO DATE (Month ,Day, Year to Month, Day, Year)	Tutor	Subs	Total Project	Rate*
OSHA Recordable Accidents	0	0	0	0.00
Job Transfer or Restricted Duty Cases	0	0	0	0.00
Lost Time Cases	0	0	0	0.00
Total Project Incidents	0	0	0	0.00
Man Hours Worked Through M/E Jan 2016	26,966	14,424	41,390	

* Rate is calculated based on number of incidents divided by total number of man hours worked multiplied by 200,000 man hours. OSHA Recordable Accidents - 2008 Construction Industry Rate for Highway, Street, and Bridge Construction = 3.9

Technical Capacity

No Project positions are currently open or unfilled.

Two workers reinstall safety fencing at the north end of the work site between O'Farrell and Ellis on Stockton, following the end of the holiday work moratorium.

Staffing

The Central Subway Staffing Table shows Planned and Actual full-time equivalent staff (FTEs) working on the Program by organizational function and responsibility.

Third-Party Agreements

No activity in this reporting month.

LRV Procurement

SFMTA has initiated a new light rail vehicle procurement to acquire up to 260 vehicles over the next 15 years. The scope includes the design, manufacture, delivery and testing of up to 260 light rail vehicles together with associated services, spare parts, special tools, training and documentation. This includes an initial delivery of 24 cars, scheduled for delivery in 2018 to supplement the fleet when the SFMTA's Third Street Phase 2 - Central Subway Project extension opens.

Four out of five Final Design Reviews completed and Prototype testing for selected systems underway.

LRV Procurement contract working through integration challenges with parallel projects such as radio replacement project and fare box replacement project.

Workers fill in part of a trench used to locate existing utilities below ground on Freelon Alley.

CTS

A bucket of excavated material is lifted from the station headhouse interior, at the surface of the structure on Stockton Street.

A worker uses a pneumatic spade to loosen hard soil while another removes it from near the shoring wall inside Chinatown Station's north access shaft.

CTS-continued

Holes drilled in the slurry wall for rebar fitting are inspected at the north wall of the headhouse.

Temporary steel supports loom overhead at the bottom of the current level of excavation inside the headhouse.
UMS

Rebar collected from demolished sections of the Union Square Garage roof lay piled while work to finish demolition goes on in the background.

A partially-excavated site just south of Geary, where a section of station roof deck will be installed.

UMS-continued

Workers break through the south headwall of the station, exposing the interior of the south concourse just south of O'Farrell.

Light pours in the south concourse for the Union Square/Market Street Station, following the removal of part of the south headwall.

A bobcat with a bucket full of soil removed from the station box interior emerges from the access portal on the east side of the headhouse site.

A welder works on steel panels at the Yerba Buena/Moscone Station site.

YBM - continued

An excavator operator extends the arm out to drop soil precisely under where the surface excavator operator lowers his bucket.

An excavator fitted with a long arm loads a dump truck with earth excavated from the station box, on the north side of Folsom west of 4th.

At the corner of 4th and Bryant, work to upgrade and relocate existing utilities is ongoing.

A worker compacts asphalt around a steel panel, while a backhoe operator moves materials around the work zone.

STS—Continued

Workers measure an opening being covered by steel plates at the end of the work day.

Arrow signs, barriers, and cones help drivers navigate the ever-changing landscape of 4th Street, where utility work is ongoing.

Appendix A

DETAIL COST REPORTS

1. PROJECT COST

The Current Cost Estimate (CCE) for the Central Subway Project is **\$1.578 billion** in year of expenditure dollars (\$YOE). This total project cost is shown at the top of Report 7.1, Program Project Budget. This capital cost projection incorporates allocated and unallocated contingencies to cover the risks associated with the project completion.

Total net incurred costs for the project are \$893.70 million, a \$10.57 million increase over last month. The cost to date figure reflects expenditures through FAMIS 786 Report (\$859.73 million) plus the utilities joint trench Form B Reimbursement payment (\$10.52 million), invoices currently being processed (\$20.19 million) and estimates of outstanding pay requests (\$3.26 million). This incurred amount equals 56.62% of the total project budget of \$1.578 billion.

The current funding level to date is \$1,179.79 million. This represents 75% of the total project budget.

2. CONTINGENCY ALLOCATIONS AND USAGE

The current Total Project Contingency is **\$83.03 million**, which is a \$23.03 million favorable balance against the current Minimum Contingency level of \$60 million. The Contingency Drawdown Curve is shown in Report 7.3. Follows by Report 7.4 Contingency Management Trend Report with the Remaining Contingency after Approved Changes Deducted contingency items in column "i".

In this reporting period, Contract 1252 Tunnel had not processed any contract modifications. Contract 1300 Station had processed four contract modifications for the amount of \$126,009. Refer to Report 7.5 for approved contract modifications and potential changes.

3. BUDGET TRANSFERS

No budget transfers in this reporting period.

4. <u>FORM B</u>

The Utilities Joint Trench Form B Details is listed in the Table A2 below. Total utilities joint trench Form B Reimbursement payment to three construction contracts is \$10.52 million.

TABLE A2: UTILITIES JOINT TRENCH FORM B DETAILS	[A] Mar 2015 BUDGET	[B] EXPENDED TO DATE	Associated Cost Account

5. EARNED VALUE (EV) ANALYSIS

In January 2016 Report, Central Subway Project Master Schedule has used Contract 1300 Station contractor baseline schedule and rejected January monthly update schedule. Contractor has not addressed the cost issues in cost loaded schedule. Preliminary January Earned Value Analysis reports the Planned Value, Earned Value, Percent Complete and resulting indexes as follows:

Overall Budgeted Cost: \$1,578,300,000 Planned Value: \$1,162,255,366 Earned Value: \$924,964,020 Actual Cost: \$893,698,520 Schedule Performance Index (SPI): 0.80 Cost Performance Index (CPI): 1.03 Percent Complete: 59%

Contract 1300 shows Earned Value Cost \$38M higher than Actual Cost is due to Tutor Perini Corporation Schedule has remaining cost in completed activities.

MUNI Metro Third Street Light Rail Project, Phase 2 central subway

Earned Value Analysis and Definitions

SPI is a measure of schedule efficiency on a project. It is the ratio of earned value (EV) to planned value (PV). A SPI equal to or greater than one indicates more work was completed than planned and a value of less than one indicates less work was completed than planned. A value of less than 0.9 is unfavorable.

CPI is a measure of cost efficiency on a project. It is the ratio of earned value (EV) to actual cost value (AC). A CPI equal to or greater than one indicates a cost under run and a value of less than one indicates a cost overrun. A value of less than 0.9 is unfavorable.

Cost Element Group	Planned Value (Primavera)	Earned Value (Primavera)	Actual Cost (SFMTA Cost Accounting (SAP)
Prelim. Engineering	Expenditure Plan Level of Effort (LOE)	Equals to Planned Value (LOE)	Time Keeping; Vendor Accruals and Invoices
Final Design	Expenditure Plan Level of Effort (LOE)	Equals to Planned Value (LOE)	Time Keeping; Vendor Accruals and Invoices
Procurement	Planned Delivery Date	Actual Delivery Date	Time Keeping; Vendor Accruals and Invoices
Real Estate	Expenditure Plan Level of Effort (LOE)	Equals to Planned Value (LOE)	Time Keeping; Vendor/ Material Accruals and Invoices
Construction	Schedule of Work	% Complete* x Budget at Completion (BAC)	Vendor Accruals and Invoices
Sub-Total	Performance Measurement Baseline (PMB)	Total Earned Value	Total Actual Cost
Below the Line	+ Contingency		
Total	Approved Budget		

The following earning rules are established for each of the phase:

6. FUNDING SUMMARY

The Funding Available Table below shows the total awarded funds to date vs. the total committed funds from the Project's seven funding sources.

central
 subway

Connecting people. Connecting communities.

7.1 F	Program Project Budget
1	The Central Subway Project (CSP) (SFMTA Capital Program CPT 544) is defined in the FTA-SFMTA October 2012 Full Funding Grant Agreement with a budget of \$1.578 billion.
2	The TBM Retrieval Shaft Relocation (SFMTA Capital Program CPT 690) is one of four capital projects that is related to CSP. These projects are reported for background information as needed outside of the main body of the Project Monthly Progress Report.
3	The Chinatown Plaza (CPT 718) is for Chinatown Station enhancement capital project. The project has funding outside of the Central Subway Project. The construction is carried out in Contract 1300 Contract Modifications.
4	CPT 665 is a Real Estate project to relocation in compliance with California regulations for business relocations but outside of the Central Subway Project as defined by the FTA FFGA.
5	CPT 705 is an SFMTA capital improvement between the Agency and community stakeholders outside of the Central Subway Project.
6	Utility company reimbursements (Form B) result in funds received for work carried out on behalf of utilities concurrent to CSP work to achieve efficiencies.
7	PG&E Power Feed reimbursement funds are the refunds from PG&E when completion of Stations construction and switch to permanent power.
8	BART Elevator funds are reimbursements for work carried out on behalf of BART to install BART Powell Street Station elevator.
9	The Tutor Perini - CAD Files funds are the result of payments by the contractor for project documentation not included in the contract.
10	SFPUC Sewer Main funds are reimbursements for work carried out on behalf of San Francisco PUC (includes 10% construction contingency).
11	SFPUC 24" Water Main funds are reimbursements for work carried out in Contract 1252 Contract Modification #41 on behalf of San Francisco PUC (includes construction management cost).
12	Traffic Effectiveness Project funded Contract Modification #40 for Culvert, Street & Sidewalk Restoration in North Beach are reimbursements for work carried out in Contract 1252 on behalf of SFMTA SSD.
13	SFPUC North Beach 24" Water Main Additional Work funds are reimbursements for work carried out in Contract 1252 Contract Modification #48 on behalf of San Francisco PUC (includes construction management cost).

7.4 Contingency Management Trend Report						
	In Oct 2014 Report, updated Contract 1250 contract cost to segregate contract amount and contract modification amount. Note that September 2013 Supplemental Authorized Contingency "column f" did not include completed contract.					
	In Oct 2014 Report, updated Contract 1251 contract cost to segregate contract amount and contract modification amount. Note that September 2013 Supplemental Authorized Contingency "column f" did not include completed contract.					

16	Contract 1252 Original Contract Value "column a" and Original Congency "column f" did not match September 2013 Supplemental due to Supplemental were used the revised value to reflet Contract Modifications #3-#18. Reduced Contract 1252 contingency to reflect CMod #20 for retrieval shaft relocation cost \$5.15M funded by CPT690, CMod #40 for Culvert, Street & Sidewalk Restoration cost \$694,651 funded by Traffic Effectiveness Project, and CMod #41 for install 24" Water Main in North Beach cost \$328,860 funded by SFPUC. In August 2015 report, release \$15M CN1252 Tunnel assigned contingency to program unallocated contigency.
17	BART Elevator scope and SFPUC Sewer Main scope is in Contract 1300; effort will be funded by BART. In January 2015 Report, corrected Station Contract value to match awarded amount.
18	In April 2015 report, real estate budget stated in RAMP Rev5 is \$36.7M, including \$1M contingency. The cost workbook ROW & contingency budget reflects this with \$36,511,799 and \$1,000,000 respectively. Revised costbook ROW budget & contingency to be \$37,511,799. The \$4,265,478 Caltrans lease savings is allocated to ROW allocated contingency.
19	In Dec 2014 Report, redistributed LRV budget to reflect recent firm bid cost per vehicle (\$3,327,250/unit) from vehicle procurement contract award. (SFMTA Board meeting 15JUL14, calendar item #11). Vehicle line item total budget remains unchanged, redistributed fund by reducing base amount to \$13,309,000, column "c" and increased allocated contingency column "h", by same amount.
20	In Oct 2014 Report, made two corrections: i) revised Professional Services, Original Contract Value "column a" from \$310,518,041 to \$310,618,041, ii) revised Original Congency. "column f" unallocated contingency from \$3,883,481 to \$3,845,945. In April 2015 report, used \$500K program contingency for CS-175 Bayland Soil Process contract. In August 2015 report, added \$15M from Contract 1252.
21	The total Central Subway Project budget of \$1.578 billion, based on the October 2012 FFGA with the FTA, is the primary MPR report reference.
22	Estimate at Completion is shown at Column "e".
23	Estimate at Completion vs. Budget variance is shown at Column "k".

7.5 Contract Modification/Trend Log - Contract 1300 Stations

Reported all trend cost for Contractor Change Order Requests and Proposed Contract Change and applied probability to forecasted trends.

7.6 Budget Revisions: Report Sorted by Construction Packages

In Dec 2014 Report, reduced CN1252 allocated contingency by \$28K to excute Contract Modification #46, see Report 7.5 Detail Contingency Usage Report. In August 2015 report, release \$15M CN1252 Tunnel assigned contingency to program unallocated contigency.

26	Program contingency increased by \$500,000. Refer to Report Notes #20.
27	Program contingency increased by \$5,265,478. Refer to Report Notes #18.

28	In Dec 2014 Report, redistributed LRV budget to reflect recent firm bid cost per vehicle (\$3,327,250/unit) from vehicle procurement contract award. (SFMTA Board meeting 15JUL14, calendar item #11). Vehicle line item total budget remains unchanged, redistributed fund by reducing base amount to \$13,309,000 and increased allocated contingency by same amount.
29	In April 2015 report, program contingency decreased by \$500,000. Refer to Reports #20. In August 2015 report, release \$15M CN1252 Tunnel assigned contingency to program unallocated contigency.

7.9 [7.9 Detail Monthly Expenditure Report				
Phas	Phase 1 Preliminary Engineering				
30	Famis cost for Preliminary Engineering (PE) is \$48,210,903.71. Cost Report for Preliminary Engineering (PE) is \$46,542,060. Some				
30	Design cost reported in Famis were moved to Design Phase, refer to Notes #19 and #20.

	Contract 1251 Final cost is \$20,794,582.
	In July 2015 Report, used Contract 1300 Contractor schedule to report budget and actual cost. The Standard Cost Categories
	(SCC) allocation changed from previous reports. In August 2015 Report, adjusted some of Contract 1300 Contractor SCC
	assignment to match most of previous SCC assignment.
47	Revised Contract 1252 allocated contingency SCC code from 040.08 to 010.07.

48	Revised Contract 1300/UMS allocated contingency SCC code from 040.08 to 020.03.
49	Revised Contract 1300/CTS allocated contingency SCC code from 040.08 to 020.03.
50	Revised Contract 1300/YBM allocated contingency SCC code from 040.08 to 020.03.
51	Revised Contract 1300/STS allocated contingency SCC code from 040.08 to 020.01.
52	Revised Form B Reimbursements SCC code from 900.01 to 040.02
53	Revised Form B Reimbursements SCC code from 900.01 to 040.02
54	Revised Form B Reimbursements SCC code from 900.01 to 040.02
55	Revised Form B Reimbursements SCC code from 900.01 to 040.02
56	Revised Form B Reimbursements SCC code from 900.01 to 040.02
57	Revised Form B Reimbursements SCC code from 900.01 to 040.02
58	Revised Form B Reimbursements SCC code from 900.01 to 040.02
59	Revised Form B Reimbursements SCC code from 900.01 to 040.02
	Increase Program contingency \$1,023,508. Refer to Report Notes #11 and #12. In April 2015 report, program contingency
60	decreased by \$500,000. Refer to Report Notes #20. In August 2015 report, release \$15M CN1252 Tunnel assigned contingency to
	program unallocated contigency.

Appendix B

DETAIL SCHEDULE REPORTS

SCHEDULE HIGHLIGHTS

The Master Project Schedule (MPS) below includes progress through December 2015. The January 2016 Schedule Update submittal from Contract 1300 Contractor is rejected based on erroneous logic changes. The Contract 1300 schedule represented in this report is based on the December 2015 Update. The Program is working on providing a properly updated Contract 1300 schedule in February 2016 Update.

The MPS shows a forecast Revenue Service Date of May 24, 2019.

The controlling critical (longest) path of the MPS runs through CTS Excavation succeeded by STS Startup & Testing, Commissioning and Pre-Revenue Activities to the Baseline Finish and Revenue Service Date. See Appendix B – Longest Path. The latest schedule shows the longest path running through the Chinatown Station (CTS). The CN-1300 Contractor continues to fall behind schedule by not following their current plan and by not working on critical activities to meet schedule goals and Contract Milestones. Contractor is required to implement a Recovery Schedule to put the Project back on schedule.

Schedule Contingency is fully utilized on the critical path of the MPS, which is below the Minimum Schedule Contingency level of 6 months. A schedule re-evaluation will be performed, utilizing the updated Contract 1300 Schedule. Recovery options are being implemented in key areas as work proceeds. SFMTA met with Contractor in December to discuss all schedule concerns and comments. The Contractor, Tutor Perini Corporation's (TPC) schedule continues to show schedule slippage due to lack of schedule progress on Critical Path activities.

The 1300 Contractor submitted fourteen (14) Schedule Updates from December 2014 to January 2016. SFMTA rejected September to January schedule updates. Contractor has been directed to develop a Recovery Schedule as required by Contract and correct out-of-sequence and Retained Logic driving many of the forecast dates. The 1300 Contractor continues to address key critical activities to recover lost time and improve schedule performance. Review of schedule updates as well as identifying recovery options is ongoing.

Contract 1300 - WP1253 UMS / WP1254R CTS / WP1255 YBM / WP1256 STS:

The Contractor, Tutor Perini Corporation's (TPC) baseline schedule is incorporated into the master program. The preliminary Tutor Perini Corporation's (TPC) December schedule is used in January Report.

Work Package P-1254R (CTS) has performed the following work this month:

- Connections for the brick sewer
- Pump CDF into tunnels
- Install rebar and form and pour Composite wall Pour 2
- Find and clean composite wall embeds, West wall Pour 2
- Chinatown Moratorium

Work Package P-1254R (CTS) will perform the following work next month

- Chinatown Moratorium
- Finish pumping CDF into tunnels
- Form and pour 2nd pour of composite wall
- Start barrel vault installation
- Install weep hole through slurry walls
- Excavate for North Access Shaft
- Finish slip line brick sewer on Stockton Street

Schedule: Contract 1300 December 2015 Update

Work Package P-1253 (UMS) has performed the following work this month:

- Traffic Handling Stockton Street closure between Post and Ellis
- South Concourse and Platform Station: continued mobilizing jet grout operations
- Platform Station: Resumed jet grouting installation. Excavated and chipped piles for roof deck sections 1A and 4A-9, installed temporary bridge at 1A
- North Concourse: set up compensation grout plant; perform utility work on Geary Street and Stockton Streets
- UMS Garage: Continued demolition on the plaza level
- UMS Garage: Completed installation of tiebacks
- UMS Garage: Continue work on shear walls between new ramp and Stockton Street

Work Package P-1253 (UMS) will perform the following work next month:

- North Concourse: Install compensation grout pipes and pretreatment.
- UMS Garage: Install plaza level deck and continue plaza level demolition
- Platform Station: Continue jet grout installation. Set/weld deck beams, install steel decking and studs for roof deck sections 4A-9 and 5B-10 and -11.
- Traffic Handling: Restore one lane on Stockton Street between Post and Geary Streets and reopen southeast Union Square stairway. Narrow O'Farrell Street to one lane to accommodate station roof deck construction and jet grout installation.
- South Concourse: Excavate\grade for concourse invert slab, chip/prep piles for stub mud slab. Install waterproofing. Complete Ellis seismic joint installation and waterproofing.

Schedule: Contract 1300 December 2015 Update

Work Package P-1255 (YBM) has performed the following work this month:

- Traffic flowing on east side of 4th Street with west side work area closed for construction
- Station box level 4 temporary bracing installation is in progress beneath Mezzanine level
- Temporary bracing is being installed within tunnel to provide support during installation of Concourse level beams and slab.
- Headhouse level 4 temporary bracing installation has begun
- Archaeological monitoring by spot checking is in progress

Work Package P-1255 (YBM) will perform the following work next month:

- Continue excavation and temporary bracing installation in headhouse and station box, including beginning excavation to allow Concourse level slab installation
- Continue utility installation on 4th Street north of the north headwall and on Folsom Street

Schedule: Contract 1300 December 2015 Update

Work Package P-1256 (STS) has performed the following work this month:

- Continue Muni ductbank installation
- Continue 78" sewer rehabilitation
- Continue 36" sewer force main
- Continue Auxiliary Water Supply System (AWSS) installation
- Continue water line work
- Continue AT&T cutover
- Continue tunnel prep work
- Continue OCS pole foundation installation

Work Package P-1256 (STS) will perform the following work next month:

- Continue 78" sewer rehabilitation
- Continue MRY ductbank and vault installation
- Continue 36" sewer force main
- Continue AWSS installation
- Continue waterline installation
- Continue tunnel prep work
- Continue OCS pole foundation installation
- Continue AT&T cutover
- Start tunnel drainage system installation
- Start tunnel invert slab work

Schedule: Contract 1300 December 2015 Update

SCHEDULE REVISIONS

No Contract 1300 schedule update was added this period to the Central Subway Project Master Schedule.

LIST OF SCHEDULE REPORTS

No detail reports provided in this monthly period update.

Appendix C

PROJECT SCOPE AND FUNDING OVERVIEW

Project Overview

The Central Subway Project will construct a modern, efficient light-rail line that will improve public transit in San Francisco. This new 1.7-mile extension of Muni's T Third Line will provide direct connections to major retail, sporting and cultural venues while efficiently transporting people to jobs, educational opportunities and other amenities throughout the city.

The Central Subway Project is Phase 2 of the San Francisco Municipal Transportation Agency's (SFMTA) Third Street Light Rail Transit Project. Phase 1 of the project constructed a 5.1-mile light -rail line along the densely populated 3rd Street corridor. It began revenue service in April 2007, restoring light-rail service to a high transit-ridership area of San Francisco for the first time in 50 years.

The Central Subway Project will extend the T Third Line from the 4th Street Caltrain Station to Chinatown, providing a direct, rapid transit link from the Bayshore and Mission Bay areas to So-Ma, Union Square and downtown.

Four new stations will be built along the 1.7-mile project alignment—an above-ground station at 4th and Brannan streets and three underground stations at Moscone Center, Union Square and Chinatown.

The Central Subway will run through the burgeoning technology and digital-media hub in SoMa, where dozens of companies have taken up residence along the 4th Street corridor. Increased

Project Overview - continued

transit options will attract new employers – the Central Subway makes travel more convenient throughout the corridor and improves connections to downtown, local and regional rail and the Muni bus system.

The Central Subway Project will contribute to San Francisco's economic competitiveness and help secure the city's status of a regional, national and global hub. It will provide a pollution-free transit option that will reduce the environmental impact of transportation in the city, save natural resources, reduce traffic congestion and improve public transit for thousands of San Franciscans.

Funding Overview

The Central Subway Project is funded by the federal government, the State of California, the Metropolitan Transportation Commission, the San Francisco County Transportation Authority (SFCTA) and the City and County of San Francisco.

The majority of funding for the Central Subway Project is expected to be provided by the Federal Transit Administration's (FTA) New Starts program, with a total commitment over the life of the project of \$942.2 million. To date, \$41 million in Department of Transportation Congestion Mitigation and Air Quality Improvement Program funds have been committed and expended.

With the addition in the December 2013 MPR of work to relocate the retrieval site for two tunnel boring machines (TBMs), the SFMTA's baseline budget for the Central Subway Project is \$1.588 billion. In total, about half of the Third Street Light Rail Transit Project's funding is from federal sources, with the remaining half from state and local sources. This is in line with the expectations of the FTA for New Starts-financed programs.

The table below summarizes the local, state and federal fund sources for both phases of the T Third Line including with the addition of the retrieval shaft to the Phase 2 totals.

	T Third (Phase 1)	Central Subway (Phase 2 + Retrieval Shaft Relocation)	Total (Phase 1 + Phase 2 + Retrieval Shaft Relocation)	Percentage of Total
Federal	\$123.380	\$983.225	\$1,106.605	49.5%
State	\$160.700	\$471.100	\$631.800	28.2%
Local	\$364.380	\$133.675	\$498.055	22.3%
Total	\$648.460	\$1,588.000	\$2,236.460	100.0%

All amounts in millions of dollars

The six charts that follow summarize use of fund sources by phase and with the addition of the retrieval shaft relocation additional budget and funding:

• Phase 1 + Phase 2 of the T Third Line federal, state and local funding percentages previous to the addition of the retrieval shaft relocation budget and funding in December 2013.

Funding Overview - continued

- Phase 2 Central Subway Project only total funding source percentages previous to the addition of the retrieval shaft relocation budget and funding.
- Phase 2 Central Subway Project only detail of the six State and Local funding sources previous to the addition of the retrieval shaft relocation.
- The next three charts that follow are the above three data sets above with the retrieval shaft relocation budget and funding added to the overall presentation.

State and Local Funding Phase 2 (\$ in millions)

COMPLETED CONTRACTS

Moscone Station and Portal Utility Relocation

Contract 1250

Contractor: Synergy Project Management, Inc.

Budget/Expenditures			
Category	Amount		
Original Budget	\$11,227,316		
Expenditures Final	\$11,968,150		
Utility Reimbursements	(\$2,275,419)		
Final Program Cost	\$9,692,731		
Budget Impact (Underrun)	(\$1,534,585)		

Contract Details			
Contract Awarded: No	ovember 17, 2009		
Notice to Proceed:	January 4, 2010		
Substantial Completion:	June 23, 2011		
Contract Award Value:	\$ 9,273,939		
Modifications Final :	\$ 2,694,211		
Final Contract Value:	\$11,968,150		

Status

- Work complete
- Project closeout administration and documentation
- Final Completion Date: June 23, 2011

Description

This project relocates utilities within the footprint of the proposed Yerba Buena/Moscone Station and the 4th Street Portal where the tunnel boring machines will descend underground. Also included is installation of building protections and monitoring of buildings adjacent to utility trenches.

Union Square/Market Street Station Utility Relocation

Contract 1251

Contractor: Synergy Project Management, Inc.

Budget/Expenditures		
Category	Amount	
Original Budget	\$22,199,847	
Expenditures Final	\$20,794,581	
Utility Reimbursements	(7,413,510)	
Final Program Costs	\$13,176,169	
Budget Impact (Underrun)	(\$9,023,678)	

Contract Details	
Contract Awarded:	December 7, 2010
Notice to Proceed:	January 12, 2011
Substantial Completion:	August 16, 2012
Contract Award Value:	\$16,832,550
Modifications Final:	\$3,962,031
Final Contract Value:	\$20,794,581

Status

- Final completion date October 15, 2012.
- Completed punch list work
- Project Final Acceptance by the SFMTA Board of Directors

Description

This project relocates utilities for the Union Square/Market Street Station and temporarily reroutes existing trolley coach lines around the construction.

Contract 1277 Contractor: MH Construction

Work Description

Demolish and clear the former Pagoda Theater for use the site to recover the tunnel boring machines when tunnels are completed in 2015. Locate and supply contractor facilities and installations. Obtain permits and approvals and coordinate work with City agencies and utility companies. Furnish and install signs and distribute notices to the local community prior to commencing with construction, cleanup and remove of debris from the site.

- Work was substantially completed Sept. 24, 2013.
- Administrative closeout in progress.

Budget/Expenditures			
Category	Amount		
Current Budget	\$722,592		
Expenditures to Date	\$638,278		

Contract Details				
Contract Awarded:	June 12, 2013			
Notice to Proceed:	July 15, 2013			
Substantial Completion:	Sept. 24, 2013			
Contract Award Value:	\$498,995			
Modifications to Date:	\$108,228			
Current Contract Value:	\$678,134			

Contract 1252 Contractor: Barnard Impregilo Healy Joint Venture

Description of Work

1.5-mile twin bore tunnels from Hwy I-80 to North Beach using two tunnel boring machines (TBMs). Contractor procurement and installation of the TBMs; construction of the TBM launch box and retrieval shaft excavation support; Yerba Buena/Moscone Station and Union Square/Market Street Station end walls; tunnel excavation and installation of precast segmental lining, the 4th Street portal transition to the surface and cross passages. Throughout, settlement monitoring and protection of existing utilities, buildings and BART tunnels.

Status

- Final Completion Date: May 15, 2015
- Administrative closeout in progress

Budget/Expenditures		
Category	Amount	
Current Budget	\$251,068,968

				Α	B	С	D	E	F	G

SBE Summary Table Notes and Sources:

a) Column A is the base contract amount awarded. Column B is the Agency SBE goal percent for each contract awarded.

The SFMTA SBE Contract Goals are also on the Central Subway web site under the listing of on-going contracts – see "**Closed and Awarded Contracts**" at this link: <u>http://centralsubwaysf.com/content/closed-and-awarded-contracts</u>

b) Column C shows each contract's current amount expended to date (estimated) including accruals. Column D is the actual SBE percent level of each contract based on payments to date. Column E is the expected SBE dollar amount when the contract amount is completed and the SFMTA SBE goal achieved using this calculation: Columns A * B = Column E, the SBE Expected \$ Amount.

Column F is the actual SBE dollar amount out of the total contract expenditure to date:

Columns C * D = Column F, the SBE Expended \$ Amount.

The source of the SBE Actual percent to date and dollar amounts are Progress Payment Applications and Contractor's monthly submittals that may include the current estimated accruals. The BIH SBE percent is from the contractor's progress payment #40, Form 6.

¹ An SBE is a for-profit, small business concern with a three (3) year average gross revenue not exceeding \$14 million or \$12 million, depending on the scope of work to be performed, that is certified under any of the following programs: the State of California's Small Business Program with the Department of General Services ("State Program"), the City and County of San Francisco's LBE Program ("City Program"), or the California Unified Certification Program ("Federal DBE program").

central cosubway

Connecting people. Connecting communities.

- c) Column G, the Contractor's SBE Goal in the submitted bid, is background information that is not calculated in the table. The table source of the Contractor's SBE Goals is from the SFMTA Contract Compliance Office. A Contractor's SBE goal in the bid is one source used by SFMTA Contract Compliance to assess and propose the Agency's SBE goal for a contract.
- d) The three constructions contracts shown in **bold type**, **1250**, **1251** and **1277**, with gray background, are completed contracts. Little to no changes will be shown in future reports.
- e) The SBE Hill International Actual to Date SBE participation is 28.9% for the overall SFMTA contract. The Hill International data is for the Central Subway Task 1 portion of the Hill International contract to provide SFMTA Project Controls services and systems.
- f) The SBE SFMTA goal for Contract 1300 Tutor-Perini is 20% SBE with a provision of 50% for trucking.

The 1300 Tutor-Perini SBE percent Actual is based on the SBE data provided in Progress Payment #24, December 2015, SFMTA SBE FORM No. 6.

g) The SBE SFMTA goal for Contract 1277 MH Construction was based on an SBE set-aside.

SBE Participation Details

The two tables that follow present the Central Subway's professional services and construction contract amounts, expenditures and SBE levels with additional details.

Photos on the next page:

Following the tremendous success of Winter Walk 2014, the green turf, vintage-inspired lamp posts, and nightly light show were set up once more for the 2015 holiday season. Off the Grid food trucks were present for four days a week, offering a wide variety of culinary delights. Winter Walk's pedestrian plaza was set up on Stockton between Geary and Ellis.

Notes:

* Contract 1252 and Contract 1300 Dec cost are accrual.
