

# POTRERO YARD MODERNIZATION PROJECT

**INFRASTRUCTURE FACILITY  
DESIGN-BUILD-FINANCE-OPERATE-MAINTAIN AGREEMENT<sup>1</sup>**

**BETWEEN**

**THE CITY AND COUNTY OF SAN FRANCISCO  
ACTING BY AND THROUGH THE  
SAN FRANCISCO MUNICIPAL TRANSPORTATION AGENCY**

**AND**

**[PRINCIPAL PROJECT COMPANY]<sup>2</sup>**

**DATED AS OF [\_\_\_\_\_, 2025]**

---

**TABLE OF CONTENTS**

	<b><u>Page</u></b>
ARTICLE 1. DEFINITIONS; CONTRACT DOCUMENTS; ORDER OF PRECEDENCE; OTHER DOCUMENTS .....	3
1.1 Definitions and Interpretation .....	3
1.2 Contract Documents; Rules to Reconcile Conflicting Provisions .....	5
1.3 Conflicts, Ambiguities or Inconsistency in Principal Project Company’s Management Plans .....	7
1.4 Reference Documents .....	7
ARTICLE 2. NATURE OF AGREEMENT; TERM .....	9
2.1 Nature of Agreement; PDA Status Under This Agreement .....	9
2.2 Right of Entry; Condition of Site .....	9
2.3 Term .....	10
2.4 Title .....	10
2.4.1 General .....	10
2.4.2 Possessory Interest Tax .....	10
2.4.3 Passage of Title .....	12
2.4.4 Intellectual Property .....	12
2.4.5 Documents of Title .....	12
2.4.6 Care, Custody and Control Responsibilities .....	12
2.5 Limitation on Principal Project Company’s Rights .....	12
ARTICLE 3. FINANCIAL CLOSE .....	13
3.1 Requirements for Financial Close .....	13
3.1.1 Obligation to Achieve Financial Close .....	13
3.1.2 Date of Financial Close .....	13
3.2 Financial Close Requirements and Deliverables .....	13
3.2.1 Delivery of Financing Agreements and Other Documents .....	13
3.2.2 City Deliverables .....	14
3.2.3 Base Interest Rate Fluctuation and Credit Spread Risk Mitigation .....	15
3.2.4 Conditions Precedent to Financial Close .....	16
3.2.6 Mandatory Terms of Project Debt, Financing Agreements and Other Documents .....	18
3.3 Post-Financial Close Requirements and Deliverables .....	18
3.4 Potential Adverse Events and Mitigation .....	19
3.5 Permitted Excuses from Achieving Financial Close .....	21
3.6 No-Fault Termination .....	22
3.7 Principal Project Company’s Failure to Achieve Financial Close .....	23

---

ARTICLE 4.	PRINCIPAL PROJECT COMPANY FINANCING; LENDERS’ RIGHTS; REFINANCING; PRIVATE CAPITAL INVESTMENTS; FINANCIAL MODEL .....	24
4.1	Principal Project Company Right and Responsibility to Finance .....	24
4.2	No City or City Responsibility for Project Debt .....	24
4.3	Lenders’ Rights.....	25
4.4	Refinancing.....	25
4.4.1	Right of Refinancing .....	25
4.4.2	Notice of Refinancing .....	25
4.4.3	Refinancing Limitations, Requirements and Conditions.....	27
4.5	Refinancing Gain .....	27
4.6	Equity Requirements .....	27
4.7	Financial Model and Financial Model Updates.....	28
4.7.1	Model Update Event.....	28
4.7.2	Updates to the Financial Model .....	28
4.7.3	Replacement of Financial Model .....	30
4.7.4	Financial Model Audits .....	31
4.8	Escrow of Financial Model and Cost and Pricing Data.....	31
ARTICLE 5.	SUBMITTALS; MANAGEMENT SYSTEMS AND OVERSIGHT.....	33
5.1	Submittal Review Terms and Procedures .....	33
5.1.1	Terms and Procedures.....	33
5.1.2	Conflicting Provisions .....	33
5.1.3	Limitations on Principal Project Company’s Right to Rely.....	33
5.2	Project Management Plan.....	34
5.3	Quality Assurance, Quality Control, Generally .....	35
5.4	Oversight, Inspection and Testing.....	35
5.5	Testing and Test Results .....	37
5.6	Meetings.....	38
5.7	Reporting.....	38
5.7.1	Relating to the Work.....	38
5.7.2	Financial Reporting .....	38
ARTICLE 6.	GENERAL PRINCIPAL PROJECT COMPANY OBLIGATIONS .....	40
6.1	Planning and Engineering Activities.....	40
6.2	Project Site Conditions .....	40
6.3	Regulatory Approvals .....	40
6.3.1	CEQA Approval and NEPA Approval .....	40
6.3.2	Regulatory Approvals other than the CEQA Approval and the NEPA Approval.....	42
6.3.3	Copies to City.....	42
6.3.4	Certain Risks Relating to Regulatory Approvals .....	42
6.3.5	Changes to Regulatory Approvals .....	43
6.3.6	City Assistance with Regulatory Approvals.....	43
6.3.7	Regulatory Approvals in City’s Name .....	44
6.3.8	Major Approval Delay .....	44

6.4	Compliance with Laws .....	47
6.4.1	Applicable Laws .....	47
6.4.2	Environmental Compliance.....	47
6.5	Compliance with Regulatory Approvals.....	47
6.6	Communication and Public Outreach.....	47
6.7	Coordination, Cooperation and Access.....	47
6.8	Intentionally Deleted .....	48
6.9	Safety Compliance.....	48
6.10	Law Enforcement and Security .....	49
6.10.1	Law Enforcement Services.....	49
6.10.2	Security .....	49
6.11	Warranties .....	49
6.11.1	Warranties for SFMTA O&M Facilities .....	49
6.11.2	Contractor Warranties and Guaranties .....	51
6.11.3	Warranties for Utility Owners and Authorities Having Jurisdiction.....	51
6.12	Maintain Good Standing .....	52
<b>ARTICLE 7.    DESIGN AND CONSTRUCTION .....</b>		<b>53</b>
7.1	General Obligations of Principal Project Company Concerning D&C Work.....	53
7.2	Performance, Design and Construction Standards .....	54
7.3	Design Implementation .....	54
7.4	Schedule, Deadlines, Notices to Proceed and Commencement of Work .....	54
7.4.1	Project Schedule .....	54
7.4.2	Float.....	55
7.4.3	Commencement of Non-Construction Work .....	55
7.4.4	Commencement of Construction Work .....	55
7.4.6	Work Before NTP 1 .....	56
7.5	Acquisition of Real Property.....	56
7.5.1	Additional Acquisitions .....	56
7.5.2	Temporary Interests in Property .....	58
7.5.3	Property Acquisitions and Scheduling Work .....	58
7.6	Utilities, Utility Adjustments and Utility Delay .....	59
7.6.1	Utilities to Serve Facility .....	59
7.6.2	Principal Project Company’s General Responsibilities.....	59
7.6.3	Avoiding Utility Adjustments and Minimizing Costs.....	60
7.6.4	Allocation of Work Responsibility.....	60
7.6.5	Utility Adjustment Costs .....	60
7.6.6	Incidental Utility Work.....	61
7.6.7	Bonds and Insurance; Security for Utility Adjustment Costs .....	62
7.6.8	Utility Investigation by Principal Project Company .....	62
7.6.9	Claims for Inaccuracies in Utility Information .....	62
7.6.10	Changes in Design.....	63
7.6.11	Utility Betterments.....	64
7.6.12	Failure of Utility Owners to Cooperate .....	64
7.6.13	Utility Delays .....	66
7.6.14	Utility-Related Claims; Additional Restrictions on Change Orders Relating to Utility Adjustments.....	67
7.6.15	FTA Requirements .....	68
7.7	Hazardous Materials Management; Risk Allocation .....	68

7.7.1	Hazardous Materials Management.....	68
7.7.2	Additional Hazardous Materials Obligations of Principal Project Company.....	70
7.7.3	Hazardous Materials Generator Responsibilities .....	70
7.8	Substantial Completion.....	71
7.9	Final Acceptance .....	73
7.10	Responsibility for Loss or Damage .....	74
7.11	Nonconforming Work.....	74
7.11.1	Obligation to Replace Nonconforming Work.....	74
7.11.2	Remedial Plan for Nonconforming Work.....	74
7.11.3	City’s Remedies .....	75
7.12	Design and Construction of Joint Development Alternatives .....	75
7.13	FF&E During D&C Period .....	75
7.13.1	Selection and Procurement of PPC-Furnished FF&E .....	75
7.13.2	Selection of City-Furnished Equipment and Existing FF&E .....	76
7.13.3	Installation of PPC-Furnished FF&E.....	76
7.13.4	Installation of City-Furnished IT/Comms FF&E.....	77
7.13.5	Commissioning of FF&E for Substantial Completion .....	77
7.14	Move-In .....	77
7.14.1	General .....	77
7.14.2	Move-In Subcommittee .....	78
7.14.3	Move-In Resource.....	78
<b>ARTICLE 8. INFRASTRUCTURE FACILITY MAINTENANCE.....</b>		<b>79</b>
8.1	General.....	79
8.1.1	General Obligations.....	79
8.1.2	Changes in Standards and Specifications .....	80
8.1.3	Hazardous Materials Management.....	80
8.1.4	Utility Accommodation.....	80
8.2	Principal Project Company Inspection, Testing and Reporting.....	80
8.3	Responsibility for Loss or Damage .....	81
8.4	Renewal Work; IFM Management Plan.....	81
8.4.1	Performance of Renewal Work.....	81
8.4.2	IFM Management Plan .....	82
8.5	Handback .....	82
8.5.1	Handback Condition .....	82
8.5.2	Independent Engineer .....	83
8.5.3	Handback Reserve Amount.....	83
8.5.4	Joint Technical Review and Handback Inspections and Report.....	84
8.5.5	Handback Assessment.....	85
8.5.6	City Right to Self-Perform and Recover Costs.....	86
8.5.7	Spare Parts .....	86
8.6	Handback Requirements Reserve Account .....	86
8.6.1	Establishment.....	86
8.6.2	Funding .....	87
8.6.3	Use of Handback Requirements Reserve Account.....	88
8.6.4	Disbursement of Handback Requirements Reserve Account on Completion of Handback Renewal Work or Earlier Termination .....	88
8.6.5	Handback Requirements Letters of Credit.....	88

---

8.6.6	Coordination with JDA Project Companies and Joint Development Alternatives .....	89
8.7	IFM Operations Committee .....	90
8.8	FF&E During IFM Period.....	90
8.8.1	Title and Responsibility for Risk.....	90
8.8.2	Maintenance and Replacement of FF&E During IFM Period .....	90
8.9	Energy Management .....	92
8.9.1	Independent Energy Auditor.....	92
8.9.2	External Energy Auditor .....	93
8.9.3	Failure to meet LEED Requirements .....	94
<b>ARTICLE 9. CONTRACTING AND LABOR PRACTICES .....</b>		<b>95</b>
9.1	Disclosure of Contracts and Contractors.....	95
9.2	Responsibility for Work, Contractors and Employees.....	95
9.3	Key Contracts; Contractor Qualifications .....	96
9.3.1	Key Contract Approvals, Amendments and Termination; Use of and Change in Key Contractors .....	96
9.3.2	Key Contract Provisions .....	96
9.4	Prompt Payment to Contractors.....	96
9.5	Key Personnel .....	97
9.5.1	Key Personnel Deductions .....	98
9.5.2	Limitations on Deductions for Unavailability of Key Personnel.....	99
9.5.3	Skilled Personnel; Removal at City Direction.....	99
9.6	DBE Participation.....	100

**INFRASTRUCTURE FACILITY DESIGN-BUILD-FINANCE-OPERATE-MAINTAIN  
AGREEMENT**

**POTRERO YARD MODERNIZATION PROJECT**

This Design-Build-Finance-Operate-Maintain Agreement (this “**Agreement**”) is made and entered into this [\_\_] day of [\_\_\_\_\_], 2025 (the “**Effective Date**”), by and between the City and County of San Francisco (“**City**”), a municipal corporation acting in its proprietary capacity by and through the San Francisco Municipal Transportation Agency (“**SFMTA**”), and [\_\_\_\_\_] (“**Principal Project Company**” or “**PPC**”), a [\_\_\_\_\_], with reference to the following facts:

A. City, under the jurisdiction of the SFMTA, owns the real property commonly known as 2500 Mariposa Street in San Francisco, California, which is a 4.4-acre site comprised of Assessor’s Block No. 3971-001, bounded by Bryant Streets, 17<sup>th</sup> Street, Hampshire Street, and Mariposa Street (“**Project Site**”).

B. The Facility to be constructed at the Project Site is comprised of (i) a transit operations component (“**Bus Yard Component**”), (ii) a Joint Development Alternative; and (iii), and the common infrastructure shared by the two components (“**Common Infrastructure**”).

C. This Agreement addresses the design, construction, financing, operations and maintenance of the Bus Yard Component and Common Infrastructure (collectively, the “**Infrastructure Facility**”), and the integration of the Infrastructure Facility, and its interface with, a future Joint Development Alternative (together, the “**Project**”). If implemented, (i) one or more Housing and Commercial Components will be delivered by a JDA Project Company, under one or more separate agreements; and (ii) the Paratransit Facility will be delivered by Principal Project Company pursuant to a Change Order or by Principal Project Company or another entity under a separate agreement. The Infrastructure Facility and the Joint Development Alternative are, collectively, the “**facility**”.

D. On March 16, 2021, the Board of Supervisors of the City and County of San Francisco (“**Board of Supervisors**”) adopted Ordinance No. 38-21 (“**Ordinance**”), which codifies SFMTA’s authority to procure the Facility under a joint development approach.

E. On April 9, 2021, City issued a request for proposals to design, build, finance, and maintain the Infrastructure Facility and design, build, finance, operate and maintain the Housing and Commercial Component at the Project Site (“**RFP**”), and on September 12, 2022, City determined that the proposal submitted by Potrero Neighborhood Collective LLC (“**PNC**”) offered the best value to City for the development of the Facility.

F. On November 2, 2022, City and PNC, a limited liability company organized under the laws of the State of Delaware, entered into a Predevelopment Agreement for the Potrero Yard Modernization Project (as amended, the “**Predevelopment Agreement**”).

G. City and PNC agreed upon the terms provided in this Agreement for the development of the Infrastructure Facility pursuant to the processes described in the Predevelopment Agreement. On [\_\_\_\_\_], 2025, PNC formed the Principal Project

Company as a special purpose entity to enter into this Agreement. Principal Project Company is ***[insert ownership structure – wholly owned by Equity Members of PNC?]***.

H. The SFMTA Board of Directors and the Board of Supervisors of the City have authorized the Work for the Project, as specified in the Contract Documents.

NOW, THEREFORE, for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, the Parties agree as follows:

**ARTICLE 1. DEFINITIONS; CONTRACT DOCUMENTS;  
ORDER OF PRECEDENCE; OTHER DOCUMENTS**

**1.1 Definitions and Interpretation**

**1.1.1** Definitions for certain acronyms, abbreviations and terms used in this Agreement and the other Contract Documents are contained in Exhibit 1 (Abbreviations and Definitions).

**1.1.2** Unless the context otherwise requires, in this Agreement:

- (a) The words “including”, “includes” and “include” will be read as if followed by the words “without limitation”;
- (b) The meaning of “or” will be that of the inclusive “or”, that is meaning one, some or all of a number of possibilities;
- (c) A reference to any Party or Person includes each of their legal representatives, trustees, executors, administrators, successors, and permitted substitutes and assigns, including any Person taking part by way of novation;
- (d) References to days are references to calendar days, provided that if the date to perform any act or provide any Notice falls on a non-Business Day, such act or Notice may be timely performed on the next Business Day. Notwithstanding the foregoing, requirements contained in this Agreement relating to actions to be taken in the event of an emergency and other requirements for which it is clear that performance is intended to occur on a non-Business Day, shall be required to be performed as specified, even though the date in question may fall on a non-Business Day;
- (e) A reference to any Governmental Entity, institute, association or body is:
  - (i) if that Governmental Entity, institute, association or body is reconstituted, renamed or replaced or if the powers or functions of that Governmental Entity, institute, association or body are transferred to another organization, a reference to the reconstituted, renamed or replaced organization or the organization to which the powers or functions are transferred, as applicable; and
  - (ii) if that Governmental Entity, institute, association or body ceases to exist, a reference to the organization which serves substantially the same purposes or objectives as that Governmental Entity, institute, association or body;
- (f) A reference to this Agreement or to any other deed, agreement, document, or instrument includes a reference to this Agreement or such other deed, agreement, document or instrument as amended, revised, supplemented or otherwise modified from time to time;

- (g) A reference to any legislation or to any section or provision of it includes any amendment to or re-enactment of, or any statutory provision substituted for that legislation, section or provision;
- (h) Words in the singular include the plural (and vice versa) and words denoting any gender include all genders;
- (i) Headings are for convenience only and do not affect the interpretation of this Agreement;
- (j) The captions of the articles, sections and subsections in the Contract Documents are for convenience only and are not to be treated or construed as part of this Agreement;
- (k) Where any word or phrase is given a defined meaning, any other part of speech or other grammatical form of that word or phrase has a corresponding meaning;
- (l) All monetary amounts and obligations in the Contract Documents are expressed and payable in U.S. dollars;
- (m) Each party must perform its obligations in accordance with this Agreement at its own cost, unless expressly provided otherwise;
- (n) If this Agreement requires calculation of an amount payable to a party there must be no double counting in calculating that amount;
- (o) A reference to time is a reference to Pacific Time Zone in the United States;
- (p) In the event of an ambiguity in or dispute regarding the interpretation of this Agreement, this Agreement shall not be interpreted or construed against the Person who prepared this Agreement, and, instead, other rules of interpretation and construction shall be used;
- (q) The Parties acknowledge and agree that: (a) the Contract Documents are the product of an extensive and thorough, arm's-length exchange of ideas, questions, answers, information and drafts during the PDA Term; (b) each Party has been given the opportunity to independently review the Contract Documents with legal counsel; and (c) each Party has the requisite experience and sophistication to negotiate, understand, interpret and agree to the particular language of the provisions of the Contract Documents. Accordingly, in the event of a conflict, ambiguity or inconsistency in or Contract Dispute regarding the interpretation of the Contract Documents, the Contract Documents shall not be interpreted or construed against the Party preparing it, and instead the Contract Dispute resolver shall consult other customary rules of interpretation and construction;
- (r) Unless otherwise expressly stated in the Contract Documents, words that have well-known technical or construction industry meanings are used in the Contract Documents in accordance with such recognized meaning;

- (s) A reference to a Section or Article is a reference to the section or article in the document or Exhibit where that Section or Article appears.

## **1.2 Contract Documents; Rules to Reconcile Conflicting Provisions**

**1.2.1** The term “Contract Documents” shall mean this Agreement and all its exhibits, including the Technical Requirements, as listed in Section 1.2.2. Each of the Contract Documents is an essential part of the agreement between the Parties. The Contract Documents are intended to be complementary and to be read together as a complete agreement.

**1.2.2** Unless the context otherwise requires and except as provided otherwise in Sections 1.2.3 and 1.2.4, in the event of any conflict, ambiguity or inconsistency between any terms or provisions within the Contract Documents, the order of precedence, from highest to lowest, shall be as follows:

- (a) For Design Work and other non-Construction Work:
  - (i) Change Orders and Unilateral Change Orders directing Principal Project Company to implement a City Change in accordance with this Agreement and amendments to this Agreement;
  - (ii) Article 1 (Definitions; Contract Documents; Order of Precedence; Other Documents) through Article 23 (Miscellaneous) and Exhibit 1 (Abbreviations and Definitions);
  - (iii) the Exhibits to this Agreement (excluding Exhibit 1 (Abbreviations and Definitions and Exhibit 18 (Technical Requirements));
  - (iv) Exhibit 18 (Technical Requirements);
  - (v) Principal Project Company’s Implementation Proposal identified in Exhibit 3 (Implementation Proposal); provided that if City determines, in its sole discretion, that the Implementation Proposal contains a provision that is more beneficial to City than is specified elsewhere in the Contract Documents, then that provision shall take precedence; and
  - (vi) Project Management Plan.
- (b) Without limiting Section 1.2.2(a), for Construction Work, the same order of precedence shall apply as for non-Construction Work in subsection (a), except that the Final Design Documents shall also be considered part of this Agreement and shall be included as Section 1.2.2(a)(vii) in the order of precedence subject to the following:
  - (i) Specifications have precedence over plans; and
  - (ii) Any other Deviations contained in the Final Design Documents take priority over conflicting requirements of other parts of this Agreement

but only to the extent that Principal Project Company specifically identifies the conflicts to City and City approves such Deviations by Notice to Principal Project Company.

**1.2.3** In the event of any conflict, ambiguity or inconsistency within the Contract Documents, the following rules of interpretation shall apply:

**1.2.3.1** If the Contract Documents contain differing provisions on the same subject matter and within the same order of precedence pursuant to Section 1.2.2, the provisions that provide greater detail or establish a higher quality, manner or method of performing the Work or use more stringent standards shall prevail.

**1.2.3.2** Additional details in a lower priority Contract Document shall be given effect except to the extent they irreconcilably conflict with requirements, provisions and practices contained in the higher priority Contract Document.

**1.2.3.3** If the Contract Documents contain differing provisions on the same subject matter that cannot be reconciled by applying the rules in Section 1.2.3.1 or 1.2.3.2, then the provisions contained in the document of higher order of precedence shall prevail over the provisions contained in the document of lower order of precedence, unless City, in its good faith discretion, approves or directs otherwise in writing.

**1.2.3.4** In the event of an irreconcilable conflict between specific provisions of the Contract Documents and any standards, criteria, requirements, conditions, procedures, specifications or other provisions applicable to the Project established by reference to a manual or publication within a lower priority Contract Document, the specific provision of the higher priority Contract Document shall prevail over said standards or other provisions established by reference, to the extent of the irreconcilable conflict, unless City, in its good faith discretion, approves or directs otherwise in writing.

**1.2.3.5** In the event of a conflict among any standards, criteria, requirements, conditions, procedures, specifications or other provisions applicable to the Project, established by reference to a manual or publication within a Contract Document or set of Contract Documents with the same order of priority, the standard, criterion, requirement, condition, procedure, specification or other provision offering the higher quality, manner or method or performing will apply unless City, in its good faith discretion, approves or directs otherwise in writing.

**1.2.3.6** In the event of a conflict among the standards, criteria, requirements, conditions, procedures, specifications or other provisions of the Technical Requirements and those established by reference to a manual or publication, the Technical Requirements shall prevail.

**1.2.3.7** In all other respects, in the event of a conflict, ambiguity or inconsistency within the Contract Documents, general rules concerning construction of contracts in the State shall be applicable.

**1.2.4** This Section 1.2 (Contract Documents; Rules to Reconcile Conflicting Provisions) shall not apply to provisions in the Technical Requirements that are erroneous, create a potentially Unsafe Condition, or may be inconsistent with Good Industry Practice or applicable Law. Instead, such provisions shall be reconciled under Section 7.2.3.

**1.2.5** Principal Project Company acknowledges and agrees that it had the opportunity and obligation to review the terms and conditions of this Agreement and to bring to the attention of City any conflicts, ambiguities or inconsistencies of which it is aware contained within this Agreement.

**1.2.6** Incorporation into this Agreement of any part of the Implementation Proposal shall not (a) limit, modify, or alter City's right to review and approve any Submittal included in the Implementation Proposal, or submitted to City after the Implementation Proposal (including any Project Schedule), or (b) be deemed as acceptance or approval of any part of the Implementation Proposal by City that conflicts with this Agreement or the Technical Requirements.

**1.2.7** If Principal Project Company becomes aware of any error or any conflict, ambiguity or inconsistency between or among the documents forming this Agreement, Principal Project Company shall promptly provide Notice to City, including the item Principal Project Company considers should apply based on the applicable rules in Section 1.1.2(p). Except as expressly stated in this Agreement, if (a) the conflict, ambiguity, inconsistency or error cannot be reconciled by applying the applicable rules or (b) the Parties disagree about (i) which rule applies and/or (ii) the results of the application of such applicable rule(s), then City will determine, in its reasonable discretion, which of the conflicting items is to apply and provide Notice to Principal Project Company before Principal Project Company proceeds with the applicable aspect of the Work.

### **1.3 Conflicts, Ambiguities or Inconsistency in Principal Project Company's Management Plans**

In the event of any conflict between or among the Principal Project Company's Project Management Plan and any of the Contract Documents, or if any provisions in Principal Project Company's Project Management Plan are in conflict, ambiguous or inconsistent, Principal Project Company shall modify the Project Management Plan, as applicable, to be consistent with the Contract Documents or cure the ambiguity or inconsistency in a manner satisfactory to City.

### **1.4 Reference Documents**

**1.4.1** City has provided the Reference Documents to Principal Project Company for the purposes of disclosure and, in the case of general industry and general governmental manuals and publications, for guidance regarding Good Industry Practice. Reference Documents are for information only, and are not mandatory or binding on Principal Project Company, except to the extent that the Contract Documents incorporate specific provisions of the Reference Documents by reference.

**1.4.2** Principal Project Company acknowledges and agrees that City does not give any warranty, representation or undertaking in respect of the Reference Documents including that the Reference Documents:

- (a) Are complete, accurate or fit for purpose;

- (b) Are in conformity with the requirements of the Contract Documents, Regulatory Approvals or Laws; or
- (c) Represent all of the information in City's possession or power relevant or material in connection with the Project; provided, however, that City represents and warrants that it has not affirmatively and intentionally provided a Reference Document that is knowingly (based solely on City's Actual Knowledge) and materially false with the intent to mislead Principal Project Company.

**1.4.3** Principal Project Company acknowledges and agrees that, except as provided in this Agreement:

- (a) It has, before Commercial Close, conducted its own analysis and review of the Reference Documents upon which it places reliance;
- (b) Any use or reliance on such Reference Documents by Principal Project Company shall be solely at its own risk;
- (c) Except to the extent that the Contract Documents incorporate specific provisions of the Reference Documents by reference, no PPC-Related Entity is entitled to make any Claim, cause of action or Loss against City in connection with the Reference Documents, including on the grounds:
  - (i) of any misunderstanding or misapprehension in respect of the Reference Documents;
  - (ii) of any conclusions any PPC-Related Entity may draw from or any action or forbearance in reliance on the Reference Documents;
  - (iii) of any failure to disclose or make available to any PPC-Related Entity any information, documents or data or to review or update the Reference Documents; or
  - (iv) that the Reference Documents were inaccurate, incomplete, or not fit for purpose; and
- (d) The Reference Documents may include interpretations, extrapolations, analyses, and recommendations about data, design solutions, technical issues and solutions, construction and installation means and methods, and maintenance means and methods. Such interpretations, extrapolations, analyses, and recommendations are (i) preliminary in nature and, in many cases, obsolete, (ii) not intended to express the views or preferences of City, or represent any statement of approval or acceptance thereof by City, and (iii) not intended to form the basis of Principal Project Company's design solutions, technical solutions, construction or maintenance means and methods.

---

## ARTICLE 2. NATURE OF AGREEMENT; TERM

### 2.1 Nature of Agreement; PDA Status Under This Agreement

2.1.1 City hereby grants to Principal Project Company the exclusive right, and Principal Project Company accepts the obligation and agrees, during the Term, to:

- (a) design, build, and finance the Infrastructure Facility, and operate and maintain certain elements of it; perform Renewal Work, and perform and undertake handback of the Infrastructure Facility at the end of the IFM Period; and
- (b) perform all other activities relating to the Infrastructure Facility not specifically retained by City for the Infrastructure Facility as specified in this Agreement.

2.1.2 Principal Project Company acknowledges and agrees that the Predevelopment Agreement does not apply to this Agreement or the Parties' obligations hereunder, and that any deliverables provided by Lead Developer to City pursuant to the Predevelopment Agreement, or approvals obtained from City pursuant to the Predevelopment Agreement, do not apply to this Agreement unless any such deliverable, or approved plan or submittal, is expressly incorporated into this Agreement. The foregoing shall not apply to any obligations of the Parties under the Predevelopment Agreement that survive the completion or termination thereof, as more particularly set forth in the Predevelopment Agreement.

### 2.2 Right of Entry; Condition of Site

2.2.1 Subject to Section 7.5 (Acquisition of Real Property), PPC-Related Entities shall have the right to enter onto the Project Site from and after the Financial Close Date (the "**Access Date**") and throughout the remainder of the Term to carry out Principal Project Company's obligations under this Agreement; provided, however, that construction Work may not be mobilized or undertaken until the later of (i) 90 days after the Access Date; or (ii) the date on which Principal Project Company has completed the City Relocation Scope. After the Termination Date, PPC-Related Entities may enter onto the Project Site to perform post-termination obligations either based on the right of entry granted in Section 17.6.3 (Relinquishment and Possession of Project) or under a separate right of entry provided by City in writing. Without otherwise limiting the rights of the Principal Project Company to relief under this Agreement, Principal Project Company shall comply with, and shall ensure that PPC-Related Entities comply with, all agreements, easements, rights of entry, covenants, conditions, restrictions and other instruments applicable to the Project Site.

2.2.2 Within 90 days after the Financial Close Date, City shall ensure that the Project Site is in the City Ready for Move Condition. The Principal Project Company is responsible for notifying all Utility Owners and City in advance to turn off the Utilities and to obtain all required approvals prior to demolition. Additionally, if any power, water, and or other Utilities need to be maintained during demolition, such lines should be temporarily relocated as necessary and or protected by Principal Project Company. Should any furniture or portable equipment remain at the Project Site after City vacates the Project Site and after Principal Project Company fully performs the City Relocation Scope, those items shall be removed and/or disposed of by Principal Project Company. Removal of any Hazardous Materials, Utility infrastructure, walls, fixtures, flooring, paint, tanks, and or any other building features that currently exist and, upon

vacation by the City of the Project Site, will not be removed by City, are deemed released to Principal Project Company and are the responsibility for Principal Project Company in connection with demolition.

## **2.3 Term**

This Agreement shall take effect on the Effective Date and shall remain in effect until 30 years after the Substantial Completion Deadline, subject to the right of the Parties to terminate this Agreement earlier in accordance with the terms of this Agreement.

## **2.4 Title**

### **2.4.1 General**

The Parties acknowledge and agree that:

- (a) Principal Project Company is not the legal or equitable owner or lessee of the Project Site or the Infrastructure Facility improvements for any purpose;
- (b) Principal Project Company's rights under this Agreement are derived solely from its status as an independent contractor under this Agreement, and not as tenant, lessee, easement holder, optionee, lienor, mortgagee, purchaser or owner of any other interest in real property; and
- (c) The payments to be received by Principal Project Company under this Agreement are for services to be performed by Principal Project Company, and are not payments in the nature of rent, fees with respect to real property, or purchase price of real property.

### **2.4.2 Possessory Interest Tax**

**2.4.2.1** City hereby informs Principal Project Company, in accordance with California Revenue and Taxation Code section 107.6, that, notwithstanding Section 2.4.1 (General), (i) this Agreement may create one or more possessory interests, (ii) any possessory interest created by this Agreement may be subject to property taxation, and (iii) Principal Project Company may be subject to payment of property taxes levied on such possessory interest. Accordingly, Principal Project Company shall comply with the reporting requirements of San Francisco Administrative Code sections 23.38 and 23.39, and report (on behalf of the City) to the County Assessor the information required by California Revenue and Taxation Code section 480.5, and timely provide any information that City may request to ensure compliance with such requirements.

**2.4.2.2** If it is determined that a possessory interest is created by this Agreement and the County Assessor seeks to levy an assessment or tax on such possessory interest, then:

- (a) Principal Project Company shall (i) provide Notice to City not later than 3 Business Days after it becomes aware of the assessment or tax bill, and (ii) deliver copies of all documentation relating thereto no later than 3 Business Days following receipt;

- (b) Principal Project Company shall cooperate and consult regularly with City, and follow City's reasonable directions, concerning tax protest, litigation strategy, refund claims and appeals process in any such circumstance. At City's request or in absence of a direction from the City sent to Principal Project Company no later than 10 days prior to any filing deadline, Principal Project Company shall timely (i) contest the assessment, and (ii) file refund claims.;
- (c) If the Board of Supervisor has specifically authorized and approved, by resolution, the City's assumption of the payment, in whole, of such possessory interest taxes under this Agreement, the City will make a payment of the tax liability on behalf of the Principal Project Company (including any penalties for late payment or nonpayment and interest imposed, to the extent such penalties or interest resulted from Principal Project Company's failure to comply or timely comply with Section 2.4.2.2(a) or (b)). To the extent that penalties and interest have been imposed as a result of Principal Project Company's failure to comply or timely comply with Section 2.4.2.2(a) or (b), Principal Project Company will reimburse City for any such payment of penalties and interest, including Recoverable Costs. If Principal Project Company receives any refund of the tax (including a refund of any penalties and interest) pursuant to a claim for refund or other appeal, Principal Project Company shall pay to City an amount equal to such refund within 15 days of receipt (but only to the extent of payments previously made by City pursuant to this Section 2.4.2.2(c));
- (d) Principal Project Company shall submit to City an invoice (in a format acceptable to City) on a monthly basis in arrears for all actual and reasonable costs and expenses incurred by Principal Project Company in opposing the imposition of any such possessory interest tax, together with detailed, supporting documentation evidencing same. If Principal Project Company is awarded attorneys' fees in connection with any related appeal or litigation, such costs will not also be reimbursed by the City to Principal Project Company. Within 30 Business Days of receipt of such invoice and supporting documentation, subject to Section 11.5 (Disputed Amounts), City will reimburse Principal Project Company for such invoiced amount; and
- (e) City reserves the right to direct Principal Project Company to assign to the City any appeals rights available under applicable Law in order for City to directly assume the property tax appeal or litigation. Any such assignment shall be effected through an agent's authorization or similar document acceptable to both Principal Project Company and the City.

Nothing in the foregoing constitutes a notification to Principal Project Company of whether a potential possessory interest could be created under any HCC Agreement, the Housing and Commercial Component, any Housing and Commercial Component share of the Common Infrastructure, or any interest that Principal Project Company may acquire under Section 7.5.2 (Temporary Interests in Property).

### **2.4.3 Passage of Title**

Title to all materials, equipment, tools and supplies furnished under the Contract Documents for incorporation into the Project or that are required for operation or maintenance of the Project shall pass to City, free and clear of all liens or other charges of any kind or nature, upon incorporation into the Project or, for items that will not be incorporated into the Project, upon delivery to the Project Site.

### **2.4.4 Intellectual Property**

Except for PPC Intellectual Property and Third Party IP, title to any Intellectual Property to the extent made, conceived, prepared or reduced to practice as part of the Work, incorporated into the Project, including any improvements, modifications, enhancements or derivative works to or of the City IP shall vest in City at the earliest of creation, conception, preparation or reduction to practice.

### **2.4.5 Documents of Title**

Principal Project Company shall furnish or execute all necessary documents of title within 90 days of receiving a written request from City.

### **2.4.6 Care, Custody and Control Responsibilities**

Passage of title to City shall not affect Principal Project Company's care, custody and control responsibilities. Principal Project Company shall be responsible for care, custody and control of all components of the Project, including all materials, equipment, tools and supplies described in Section 2.4.3 (Passage of Title), until the Termination Date, except Principal Project Company shall be responsible for care, custody and control of (i) all elements of the Project that will be owned by Utility Owners or Authorities Having Jurisdiction until acceptance of such elements by the relevant Third Party; and (ii) the SFMTA O&M Facilities until the Substantial Completion Date.

## **2.5 Limitation on Principal Project Company's Rights**

Notwithstanding anything to the contrary in the Contract Documents, Principal Project Company has no power or authority to make any commitments on City's behalf or to execute agreements in the name of or on behalf of City. Principal Project Company shall not enter into any agreement with any Governmental Entity, Utility Owner, property owner or other Third Party having regulatory jurisdiction over any aspect of the Project or Work or having any property interest affected by the Project or the Work that in any way purports to obligate City, or states or implies that City has an obligation to carry out any installation, design, construction, maintenance, repair, operation, control, supervision, regulation or other activity during or after the end of the Term, unless City otherwise approves.

---

## ARTICLE 3. FINANCIAL CLOSE

### 3.1 Requirements for Financial Close

#### 3.1.1 Obligation to Achieve Financial Close

Subject to the Parties' respective rights to terminate this Agreement before Financial Close pursuant to Sections 3.6 (No-Fault Termination) and 3.7 (Principal Project Company's Failure to Achieve Financial Close), Principal Project Company shall achieve Financial Close by no later than the Financial Close Deadline.

#### 3.1.2 Date of Financial Close

Subject to Section 3.4.2(a), Principal Project Company shall determine the date of Financial Close (the "**Scheduled Financial Close Date**"), which shall be subject to a minimum 60 calendar days' prior Notice to City and no later than the Financial Close Deadline. After such determination, Principal Project Company shall have the right to modify the Scheduled Financial Close Date, provided that (i) Principal Project Company must provide City with prompt Notice of any such change; (ii) Principal Project Company shall not modify the Scheduled Financial Close Date within 14 days of such date without City's approval, in its reasonable discretion; (iii) the new date for the Scheduled Financial Close Date shall not be sooner than 10 days after delivery of Notice to City; and (iv) the modified Scheduled Financial Close Date shall be no later than the Financial Close Deadline.

### 3.2 Financial Close Requirements and Deliverables

#### 3.2.1 Delivery of Financing Agreements and Other Documents

**3.2.1.1** Not later than 30 days before the Scheduled Financial Close Date (or Delayed Financial Close Date, as applicable), Principal Project Company shall deliver to City, for City's review and comment, near final drafts of the Initial Financing Documents, Direct Agreement, Equity Members Funding Agreements, D&C Contract and IFM Contract. Such drafts shall be sufficiently advanced such that all material terms are incorporated into the applicable Principal Project Document or Financing Document. Principal Project Company shall also deliver to City, for City's review and comment, a list of other Key Contracts, and a draft of the model audit report related to the proposed Financial Model Update in accordance with Section 4.7.4 (Financial Model Audits). City will review the list of other Key Contracts and may request, and Principal Project Company shall promptly provide to City, substantially final drafts of the Key Contracts. In the event any material term included in the drafts of the Principal Project Documents or Financing Documents provided to City under this Section 3.2.1.1 is amended prior to Financial Close, Principal Project Company shall deliver to City, for City's review, comment and approval, a copy of such proposed amendment(s), such submittal to be no later than 10 days before the Scheduled Financial Close Date. For purposes of this Section 3.2.1.1, a material amendment shall include the following: (i) a change that differs materially from any commitments or provisions set forth in the Finance Plan; (ii) a change which would alter the risk allocations in this Agreement or any Key Contract; (iii) a change which could increase the liability of City for termination compensation in the event of a termination; (iv) a change that would modify the gearing of the financing; (v) a change that would result in an Affordability Event; (vi) a change that would cause a Delayed Financial Close Date; (vii) a change in any of

---

the Security Documents; (viii) a change in the funding sources of Common Infrastructure; and/or (ix) a change under any of the conditions precedent to Financial Close under the Financing Documents.

**3.2.1.2** City will provide its comments on any initial submission of these documents no later than 10 Business Days after their submission and on any amendments to such documents no later than 5 Business Days after their submission, with such comments, in each case, being limited to addressing (i) changes in these documents from those approved by City during the PDA Term; (ii) changes in this Agreement or the commercial or legal structure of the Project; (iii) changes arising out of changed circumstances, new events or occurrences or additional information after the date of approval by City during the PDA Term; (iv) clarifications, errors, ambiguities or conflicts in such documents; (v) the relationship and interface of the Infrastructure Facility and the Joint Development Alternative; (vi) the impacts and implications of any decision by Principal Project Company to bifurcate the Financial Close for the Infrastructure Facility and the Joint Development Alternative; (vii) changes in applicable Law or Standards and Specifications; (viii) any change to a material term, as set forth in Section 3.2.1.1); and (ix) inconsistencies between such documents and the terms of this Agreement (including the risk allocations).

### **3.2.2 City Deliverables**

To support the Principal Project Company's achievement of Financial Close, City shall:

- (a) on or before 30 days before the Scheduled Financial Close Date and in connection with the issuance of any bonds:
  - (i) provide and authorize Principal Project Company to include, in the preliminary and final official statement for such bonds or any other capital markets issuance with respect to the Project, SFMTA's most recent audited financial statements together with economic information with respect to SFMTA, and provide such documents and information as required to comply with disclosure requirements under applicable Laws, provided that Principal Project Company has provided City with a list of required documents and information at least 15 Business Days before such documents and information are required;
  - (ii) agree to customary continuing disclosure as reasonably acceptable to City and the underwriter of any Project Debt; and
  - (iii) provide customary certificates as reasonably requested by Principal Project Company and as reasonably acceptable to City;
- (b) on or before three Business Days prior to the Scheduled Financial Close Date, deliver each of the following items to Principal Project Company subject to customary escrow terms and to City's approval to release from escrow:
  - (i) an executed legal opinion of the City's Attorney's Office substantially in the form attached hereto as Exhibit 5D (Form of Opinion from City's Legal Counsel);

- (ii) an executed certificate updating, as of the date of Financial Close, City's representations and warranties set forth in Section 19.2 (City Representations and Warranties); and
- (iii) a counterpart signature page for the Direct Agreement executed on behalf of City;
- (c) take any reasonably required authorizing actions in a reasonably timely manner; and
- (d) provide customary documents, certificates or undertakings (or, as applicable, a copy of the same certified by City as true, complete and accurate) that Principal Project Company may reasonably request from City as necessary to comply with (i) disclosure requirements under applicable Laws, or (ii) customary underwriter requirements, in each case in connection with issuance of bonds or any other capital markets issuance; provided, however, that none of the documents supplied in accordance with this Section 3.2.2(d) shall be construed as providing a legal opinion binding on City.

### **3.2.3 Base Interest Rate Fluctuation and Credit Spread Risk Mitigation**

**3.2.3.1** If Principal Project Company has complied with the submittal requirements under Section ● (Selection of Base Interest Rate(s)) of the Finance Plan], City will adjust the Base Capital MaxAP to offset 100% of the impact of fluctuations (increases and decreases) in the Base Interest Rates used in the Finance Plan that have occurred during the Bank Debt Rate Protection Period and/or the Bond Rate Protection Period, as applicable.

**3.2.3.2** If Principal Project Company has complied with the submittal requirements under Section ● (Credit Spread Risk Mitigation) of the Finance Plan], City will adjust the Base Capital MaxAP to offset a portion of the impact of fluctuations (increases and decreases) in the credit spreads for any Bond Financing proposed in the Finance Plan that have occurred during the Bond Rate Protection Period. Subject to the limitations described in Section ● of the Finance Plan and set forth in Exhibit 5F (Base Capital MaxAP Adjustment for Base Interest Rate Fluctuation and Credit Spread Risk Mitigation)], the credit spread risk sharing between City and Principal Project Company will be implemented on an 50:50 basis, with City assuming 50% of the credit spread fluctuation risk (relative to the Baseline Credit Spreads) and Principal Project Company assuming 50% (the "**Credit Spread Risk Mitigation**"). City will not provide Credit Spread Risk Mitigation with respect to Private Placements (except offerings under Rule 144A and Regulation S of the Securities Act of 1933), Bank Debt or any other debt facilities for which committed credit spreads or margins are available. City shall not accept increases in credit spreads in respect of bonds which are part of Principal Project Company's financing resulting from the final credit rating of such bonds being lower than the indicative investment grade rating(s) of such bonds provided in the Finance Plan.

**3.2.3.3** Adjustments to the Base Capital MaxAP and Original Equity IRR related to Base Interest Rates fluctuations and Credit Spread Risk Mitigation, as applicable, shall be implemented in accordance with Exhibit 5F (Base Capital MaxAP Adjustment for Base Interest Rate Fluctuation and Credit Spread Risk Mitigation).

---

### 3.2.4 Conditions Precedent to Financial Close

**3.2.4.1** Financial Close will occur upon Principal Project Company's satisfaction of each of the following conditions:

- (a) Principal Project Company has delivered to City, in form and substance similar to the drafts submitted to City pursuant to Section 3.2.1.1 and including any changes made pursuant to City's comments under Section 3.2.1.2, fully executed versions of:
  - (i) Initial Financing Documents;
  - (ii) Direct Agreement(s);
  - (iii) Equity Members Funding Agreements; and
  - (iv) Key Contracts, together with an updated list of Key Contracts;
- (b) Principal Project Company has delivered a certification signed by its chief financial officer or equivalent officer, certifying to the following:
  - (i) Principal Project Company has satisfied (or upon Financial Close, will satisfy) all conditions precedent to the effectiveness of commitments of the Lenders under the Initial Financing Documents or such conditions have been waived if not satisfied, as applicable;
  - (ii) each of the documents delivered by Principal Project Company to City pursuant to Section 3.2.4.1(a) is a true, complete and accurate copy of the original;
  - (iii) all representations and warranties of Principal Project Company under the Contract Documents remain true as of the Financial Close Date, except for any representation or warranty made as of a specified date, in which case such representation or warranty shall be true as of the specified date and Principal Project Company shall provide Notice to City if any such representation is not true and correct as of the Financial Close Date; and
  - (iv) Principal Project Company has performed and complied with all covenants and obligations of Principal Project Company under the Contract Documents to have been performed or complied with as of the Financial Close Date;
- (c) Principal Project Company has delivered to City, on or before one Business Day prior to the date of Financial Close, an interim Financial Model Update consistent with Section 4.7 (Financial Model and Financial Model Updates) that incorporates any proposed amendments to the Base Case Financial Model agreed to by the Parties on or before such date, including those agreed to pursuant to any preliminary calculations under Section 3.2.3 (Base Interest

Rate Fluctuation and Credit Spread Risk Mitigation), together with the related Financial Modeling Data;

- (d) Principal Project Company has delivered to City (i) one or more legal opinion(s) of Principal Project Company's in-house or external counsel substantially in the form attached hereto as Exhibit 5E (Form of Opinion from Principal Project Company's Legal Counsel) and with customary qualifications and assumptions reasonably acceptable to City;
- (e) A Financial Model in accordance with Section 4.7 (Financial Model and Financial Model Updates) which reflects, to City's reasonable satisfaction, evidence of a Construction Equity Ratio greater than or equal to 5%;
- (f) Certificate from an insurer that meets the requirements in Section 10.1.2.1 (Insurers), certifying that all Insurance Policies required to be effected and maintained in accordance with this Agreement in connection with the Work to be performed during the D&C Period (whether City is required to be an insured or not) are in force and effect (or will be in full force and effect following receipt of the insurance premium payable from the proceeds of Financial Close), and such evidence as is necessary to demonstrate the compliance of each such policy with the requirements of this Agreement;
- (g) Evidence that all Deferred Equity Amounts are secured by an Equity Letter of Credit (which may be annually renewable) in accordance with the approved equity contribution agreement guaranteeing the provision of the committed amount by a date which is not later than the Final Acceptance Date, and that Equity Letter of Credit has been issued and is in full force and effect; and
- (h) Each Payment Bond and Performance Bond required under Section 10.2 (Performance Security) has been obtained, meets the requirements of Section 10.2 (Performance Security) and is in full force and effect, and Principal Project Company has delivered to City originals or copies, as required, of each Payment Bond and Performance Bond.

### **3.2.5 Waiver of Conditions Precedent to Financial Close**

**3.2.5.1** A condition precedent is only waived if the Party for whom the benefit of the condition precedent is provided gives Notice to the other Party of the waiver prior to the Financial Close Deadline.

**3.2.5.2** When all of the Principal Project Company conditions precedent to Financial Close have been satisfied by Principal Project Company or waived by City, City shall provide Notice to Principal Project Company confirming that all of the Principal Project Company conditions precedent have been satisfied or waived and the date upon which the last of the conditions precedent was satisfied or waived.

**3.2.5.3** When all of the City conditions precedent to Financial Close have been satisfied by City or waived by Principal Project Company, Principal Project Company shall provide Notice to

City confirming that all of the City conditions precedent have been satisfied or waived and the date upon which the last of the City conditions precedent was satisfied or waived.

**3.2.5.4** Upon satisfaction of all conditions precedent to Financial Close, City will provide Notice to Principal Project Company confirming the date upon which Financial Close was achieved.

### **3.2.6 Mandatory Terms of Project Debt, Financing Agreements and Other Documents**

The Project Debt and Financing Documents (including the Initial Financing Documents) shall comply with the Financing Document Terms.

### **3.3 Post-Financial Close Requirements and Deliverables**

**3.3.1** Principal Project Company shall deliver to City, on or before two Business Days following Financial Close, each of the items required under Section 4.7.3 (Replacement of Financial Model) replacing the Base Case Financial Model with a Financial Model Update that reflects all changes agreed by the Parties as of the date of Financial Close, as well as:

- (a) a Financial Model Update that includes any final revisions to the interim Financial Model Update delivered under Section 3.2.4.1(c) to incorporate the Base Interest Rates and credit spreads applicable on the date of Financial Close under the Initial Financing Agreements and any other agreed upon revisions;
- (b) a model audit report related to the proposed Financial Model Update in accordance with Section 4.7.4 (Financial Model Audits); and
- (c) a form of written amendment that (i) effects the replacement of the Financial Model in effect with the proposed Financial Model Update, and (ii) addresses all other related amendments to this Agreement required as a result of the amended Financial Model, including any amendments to the definitions of Base Capital MaxAP, Base IFM MaxAP, Equity IRR and Key Ratios, as applicable.

**3.3.2** Upon the satisfaction of each of the conditions precedent to Financial Close set forth in Section 3.2.4 (Conditions Precedent to Financial Close), and the delivery and mutual approval of the Financial Model Update and documents required by Section 3.3.1, City and Principal Project Company shall enter into the amendment.

**3.3.3** At Financial Close, Principal Project Company shall pay to City the amount of **[\$●]** to reimburse City for PDA-Related Costs, including all amounts paid by City to Principal Project Company or Lead Developer pursuant to any Early Works Agreement. ***[Note: City to confirm prior to Commercial Close whether any such reimbursement will be required and, if so, the amount.]***

**3.3.4** City shall return to Principal Project Company the Financial Close Security within five Business Days after reaching Financial Close, provided that Principal Project Company has delivered the items required under this Section 3.3 (Post-Financial Close Requirements and Deliverables).

---

### 3.4 Potential Adverse Events and Mitigation

**3.4.1** The Parties acknowledge that any one or more Adverse Events may occur during the period between the Effective Date and the Scheduled Financial Close Date. If any such Adverse Event is the sole cause for Principal Project Company's failure or inability to satisfy any of its obligations under Section 3.2.4 (Conditions Precedent to Financial Close) by the Financial Close Deadline or Delayed Financial Close Date, as applicable, then Section 3.4.2 shall apply.

**3.4.2** Each Party will promptly provide Notice to the other Party if an Adverse Event has occurred ("**Adverse Event Notice**"). The Party provide an Adverse Event Notice may indicate in the notice the potential impact of the event on the schedule for Financial Close. City may elect, in its sole discretion, to consult and work with Principal Project Company to mitigate the actual or anticipated impacts of the occurrence of such event(s). City will provide Notice to Principal Project Company of City's decision to either take mitigation actions, or to not take mitigation actions, within 15 days of the Adverse Event Notice. If City elects mitigation, the Parties will negotiate in good faith to mutually agree on the actual mitigation actions to be undertaken by each Party. City anticipates that the Parties may take one or more of the following actions to mitigate the impacts and for Principal Project Company to be able to achieve Financial Close:

- (a) City may agree to delay Financial Close to a date not later than 120 days after the Scheduled Financial Close Date (the "**Delayed Financial Close Date**"), in which case, if the Delayed Financial Close Date is after the last day of the original Finance Plan Validity Period, then:
  - (i) Principal Project Company shall extend the validity of its Financial Close Security to a date no earlier than 15 days later than the Delayed Financial Close Date;
  - (ii) If the Adverse Event was an Adverse Event set forth in clauses (a)-(h) of the definition of "Adverse Event", City shall compensate Principal Project Company for the actual cost of extending the validity of its Financial Close Security to the Delayed Financial Close Date within 45 days after receiving Principal Project Company's request and supporting documentation for such payment;
  - (iii) If the Adverse Event was an Adverse Event set forth in clauses (a)-(h) of the definition of "Adverse Event", Principal Project Company shall be entitled to escalate its D&C Contract Amount to adjust for escalation of labor, materials and equipment costs, if any, based on the change in:
    - (1) the average of the BCI published each calendar month during the 12 calendar months preceding the Scheduled Financial Close Date;
    - and (2) the average of the BCI published each calendar month during the 12 calendar month period preceding the Financial Close Date; and
  - (iv) Principal Project Company shall prepare a Financial Model Update in accordance with Section 4.7.2 (Updates to the Financial Model);

- (b) City may change the amount or timing of the Milestone Payment, provided that Principal Project Company shall be entitled to recover from City the reasonably incurred costs associated with such process;
- (c) City may increase the Base Capital MaxAP and/or Base IFM MaxAP by an amount required to mitigate the relevant Adverse Event, including by an amount greater than 10% of the aggregate of the Base Capital MaxAP and Base IFM MaxAP;
- (d) Principal Project Company may:
  - (i) conduct negotiations for at least 30 days with any or all of Principal Project Company's existing Lenders to increase, renew or extend their commitments, as applicable, provided that, any material deviations from the terms and conditions of the original commitments in Principal Project Company's Financial Proposal may be accepted by Principal Project Company only with City's approval; or
  - (ii) conduct a timely, competitive process to obtain new financing commitments (a "**Project Debt Competition**") to supplement or replace any of the original financing commitments in Principal Project Company's Financial Proposal; in which case, any such negotiations or Project Debt Competition (A) shall be transparent and open to City and its advisors, and (B) shall have the key objective of obtaining debt financing for the Project at the lowest-cost commercially available (given the terms and conditions of the Contract Document) and on terms and conditions otherwise reasonably acceptable to Principal Project Company and City;
- (e) upon the occurrence of an Affordability Event, Principal Project Company may elect to assume the cost and expense of that portion of the increase in the aggregate of the Base Capital MaxAP and Base IFM MaxAP that exceeds 10%; and/or
- (f) either Party may take any other action mutually agreed upon by City and Principal Project Company.

**3.4.3** The Parties acknowledge that the objective of the mitigation actions described in Section 3.4.2, and any others mutually agreed upon by the Parties, is to create circumstances allowing Financial Close to be achieved on terms that at a minimum will allow Principal Project Company to satisfy its obligation to obtain all financing required for the Project on terms and conditions substantially similar to those in its Financial Proposal. The Parties further acknowledge that if an Adverse Event set forth in clauses (i)-(j) of the definition of "Adverse Event" occurs, the objective of the time extension and mitigation actions described in Section 3.4.2 and any others mutually agreed upon by the Parties is for Principal Project Company to have an opportunity to address the impacts of such Adverse Event with its Lenders in order for Principal Project Company to comply with its obligations to achieve Financial Close by the Delayed Financial Close Date.

### **3.5 Permitted Excuses from Achieving Financial Close**

**3.5.1** With respect to an Adverse Event set forth in clauses (a)-(h) of the definition of “Adverse Event”, Principal Project Company’s obligation to achieve Financial Close by the Financial Close Deadline shall be excused if one or more events described in Section 3.4.1 has occurred, provided that:

- (a) City notifies Principal Project Company that it will not take any action described under Section 3.4.2;
- (b) City fails to provide Notice to Principal Project Company within 15 days of receipt of the Adverse Event Notice from Principal Project Company of City’s decision to either take mitigation actions, or to not take mitigation actions;
- (c) the Parties undertake one or more actions under Section 3.4.2, but the effect of such actions does not allow Principal Project Company to satisfy its obligation to obtain all financing required for the Project on terms and conditions substantially similar to those in its Financial Proposal;
- (d) Principal Project Company has made good faith efforts to take the action described under Section 3.4.2(d) and Principal Project Company has diligently and timely conducted negotiations with existing Lenders and/or the Project Debt Competition but was unable to obtain sufficient financing to satisfy its obligations under this Agreement on terms and with conditions reasonably acceptable to the Parties; or
- (e) Principal Project Company has negotiated in good faith with City to mutually agree on mitigation actions, but the Parties fail to agree on any action under Section 3.4.2.

**3.5.2** With respect to an Adverse Event set forth in clauses (i)-(j) of the definition of “Adverse Event”, Principal Project Company’s obligation to achieve Financial Close by the Financial Close Deadline shall be excused if, following the occurrence of such Adverse Event until the Delayed Financial Close Date, a new Adverse Event set forth in clauses (a)-(h) occurs (in which case, the provisions of Section 3.5.1 shall apply to such new Adverse Event (but not with respect to the original Adverse Event set forth in clauses (i)-(j) of the definition of “Adverse Event”).

**3.5.3** With respect to an Adverse Event set forth in clauses (a)-(h) of the definition of “Adverse Event”, Principal Project Company has no obligation to reach Financial Close during the period between delivery of an Adverse Event Notice and agreement of the Parties on the mitigation actions to be undertaken by each Party to achieve Financial Close. With respect to an Adverse Event set forth in clauses (i)-(j), Principal Project Company has no obligation to reach Financial Close during the period between delivery of an Adverse Event Notice and up to 120 days after such delivery, but otherwise shall remain obligated to reach Financial Close unless excused pursuant to Section 3.5.2.

### **3.6 No-Fault Termination**

**3.6.1** City may, by delivering to Principal Project Company a Notice specifying City's election to terminate and its effective date, terminate this Agreement prior to Financial Close if City determines, in its sole discretion, that termination is in City's best interest.

**3.6.2** Either Party may terminate this Agreement, without fault or penalty, upon 15 days prior Notice to the other Party, if Financial Close is not achieved by the Financial Close Deadline or Delayed Financial Close Date, as applicable, and such failure is excused pursuant to Section 3.5 (Permitted Excuses from Achieving Financial Close).

**3.6.3** With respect to a termination under Section 3.6.1 or Section 3.6.2:

- (a) City shall return the Financial Close Security within five Business Days after termination; and
- (b) Principal Project Company shall be entitled to Termination Compensation in an amount not to exceed \$9,990,000 based on commercially reasonable evidence of Principal Project Company's costs incurred during (i) the PDA Term, and (ii) from the period commencing on the Effective Date and ending on the Early Termination Date, as indicated in City's Notice delivered pursuant to Section 3.6.1. Such payment shall be the exclusive compensation payable by City to Principal Project Company under this Agreement for a termination under Section 3.6.1 or Section 3.6.2.

**3.6.4** Payment of Termination Compensation in accordance with Section 3.6.3(b) is conditioned upon City's receipt from Principal Project Company, within 30 days of termination of this Agreement under Section 3.6.1 or Section 3.6.2, of (i) a complete and compliant invoice requesting payment in the form set forth in Exhibit 17 (Section 3.6 Invoice); and (ii) all work product set forth in Section 3.6.5. Such Termination Compensation shall be due and payable no later than 30 Business Days following City's receipt of such invoice.

**3.6.5** Payment of Termination Compensation in accordance with Section 3.6.3(b) is in consideration for ownership and title to all work product (including, subject to the terms of Section 21.4 (Intellectual Property), any Developed IP) produced by Principal Project Company related to the Project along with all IP Materials generated as of the date of Notice provided pursuant to Section 3.6.1 or Section 3.6.2, including (a) all written and electronic correspondence, exhibits, photographs, reports, printed material, tapes, disks, designs, concepts, ideas, technology, techniques, methods, processes, drawings, plans, specifications and other graphic and visual aids generated or developed by or on behalf of Principal Project Company during the Project procurement process and during the PDA Term, including aesthetic design concepts, interim design submittals, and other items delivered or submitted in any medium, media or format by or on behalf of Principal Project Company to City during the Project procurement process, during the PDA Term, or in connection with the Technical Proposal, and (b) all design, planning, materials, equipment, tools, supplies and other Work developed in connection with the Contract Documents.

### **3.7 Principal Project Company's Failure to Achieve Financial Close**

**3.7.1** If Financial Close is not achieved by the Financial Close Deadline or Delayed Financial Close Date, as applicable, then, unless such failure is excused under Section 3.5 (Permitted Excuses from Achieving Financial Close), City shall have the right to:

- (a) terminate this Agreement in its entirety by written Notice to Principal Project Company with immediate effect; and/or
- (b) draw and retain the full amount of the Financial Close Security, as City's sole remedy against Principal Project Company under this Agreement for Principal Project Company's failure to achieve Financial Close; provided, however, that, nothing herein shall prejudice any rights or remedies City may have for actions or breaches, other than failure to achieve Financial Close, caused by Principal Project Company under this Agreement or the Early Works Agreement, if any.

**3.7.1.2** Exercising either remedy under this Section 3.7.1 will not prejudice any rights or remedies the City may have for other actions or breaches Principal Project Company causes under this Agreement or, if applicable, any Early Works Agreement.

**3.7.2** City's right to draw upon the Financial Close Security is not intended to constitute a penalty, but is intended to be, and shall constitute, liquidated damages to compensate City for the cost of foregoing alternative opportunities and for other costs incurred by City in reliance upon Principal Project Company's agreement to enter into the transactions contemplated hereby.

**ARTICLE 4. PRINCIPAL PROJECT COMPANY FINANCING; LENDERS' RIGHTS;  
REFINANCING; PRIVATE CAPITAL INVESTMENTS; FINANCIAL MODEL**

**4.1 Principal Project Company Right and Responsibility to Finance**

**4.1.1** Principal Project Company is solely responsible for obtaining and repaying, at its own cost and risk and without recourse to the City or SFMTA, all financing necessary for the Work that is the Principal Project Company's responsibility under the Contract Documents. Principal Project Company shall take all appropriate action to obtain the Project Debt and Committed Investment as described in the Financial Proposal on or before the Financial Close Deadline. If the Finance Plan includes any other tax-exempt financing, Principal Project Company bears all risks relating to securing a Conduit Issuer, receiving the necessary approvals and compliance with applicable federal requirements.

**4.1.2** Principal Project Company may grant security interests in or assign the entire PPC's Interest (but not a portion of such interest) to Lenders for purposes of securing the Project Debt, subject to the terms of the Contract Documents. Principal Project Company shall not pledge or encumber the PPC's Interest, or any portion of such interest, to secure any indebtedness of any Person other than (a) Principal Project Company, (b) any special purpose entity that owns Principal Project Company but no other assets and has purposes and powers limited to the Project and Work, (c) a special purpose entity subsidiary owned by either Principal Project Company or an entity described in clause (b) of this Section 4.1.2, or (d) a Conduit Issuer.

**4.1.3** Except as otherwise provided in Section 3.2.3 (Base Interest Rate Fluctuation and Credit Spread Risk Mitigation), Principal Project Company bears all risk of any changes in the interest rate, payment provisions, collateral requirements, financing charges, make whole amounts, hedge agreements, prepayment premiums, breakage charges or the other terms of Project Debt and Committed Investment.

**4.1.4** Notwithstanding the foreclosure or other enforcement of any security interest created by a Security Document, Principal Project Company shall remain liable to City for the payment of all sums owing to City under this Agreement and the performance and observance of all of Principal Project Company's covenants and obligations under the Contract Documents.

**4.2 No City or City Responsibility for Project Debt**

**4.2.1** All Project Debt or other obligations issued or incurred by a PPC-Related Entity in connection with this Agreement or the Project shall be issued or incurred only in the name of a PPC-Related Entity or a Conduit Issuer or other entity acting on behalf of a PPC-Related Entity as the ultimate obligor. Except as otherwise expressly provided in this Agreement, the City shall have no obligation to pay debt service on any Project Debt or any other debt issued or incurred by a PPC-Related Entity. The City shall have no obligation to join in, execute or guarantee any note or other evidence of indebtedness of a PPC-Related Entity, any other Financing Agreement or any Security Document (other than the Direct Agreement). Project Debt does not constitute indebtedness, or a pledge of the faith and credit, of City or any department of the City. The Lenders, individually or collectively, have no right to have taxes levied or compel appropriations by City, including the Board of Supervisors, for the payment of any or all of the amount of such principal of, premium, if any, and interest on Project Debt.

**4.2.2** Except for a violation by City of its express obligations to Lenders in any Direct Agreement, no Lender is entitled to pursue any remedy against City, including any right to seek any damages or other amounts from the City, whether for Project Debt or any other amount.

**4.2.3** Section 4.2.2 does not affect City's liability to Principal Project Company under Article 17 (Termination) for Termination Compensation that is measured in whole or in part by reference to outstanding Project Debt.

**4.2.4** City shall have no obligation to any Lender under the Contract Documents, except to the extent of any express obligations of City to Lenders under any Direct Agreement or in any other instrument or agreement signed by City in favor of such Lender or Collateral Agent. This Section 4.2.4 does not preclude Lender enforcement of this Agreement against City where the Lender has succeeded to the PPC's Interest, whether by way of assignment or subrogation.

### **4.3 Lenders' Rights**

**4.3.1** This Agreement is exclusively for the benefit of City and Principal Project Company, and shall not provide any Lender with any remedy, claim, liability, reimbursement, cause of action or other right, except for the rights of any Lender as provided in any Direct Agreement.

**4.3.2** The rights of City under Article 16 (Default; Remedies) and Article 17 (Termination) are subject to the terms of any Direct Agreement.

### **4.4 Refinancing**

#### **4.4.1 Right of Refinancing**

City's prior written approval is required for all Refinancings other than Exempt Refinancings and Rescue Refinancings. City shall have no obligations or liabilities in connection with any Refinancing other than its obligations relating to Lender's rights in any Direct Agreement. If the Refinancing is with a new Lender, the new Lender may be added to an existing Direct Agreement or City shall enter into a new Direct Agreement with the new Lender, if such Lender so elects.

#### **4.4.2 Notice of Refinancing**

**4.4.2.1** At least 60 days before the proposed date for closing any proposed Refinancing (except an Exempt Refinancing under clause (b), (c) or (d) of the definition of Exempt Refinancing), Principal Project Company shall submit to City a summary of the proposed Refinancing, together with a schedule setting forth the various activities, each with schedule durations, to be accomplished from commencement through the close of the proposed Refinancing.

**4.4.2.2** Principal Project Company shall provide at least 30 days' advance Notice to City of any intended Exempt Refinancing under clause (b), (c) or (d) of the definition thereof, including facts and documents of such Exempt Refinancing which shall include, at a minimum, the documents described in Section 4.4.2.4 and the reason Principal Project Company considers it to be an Exempt Refinancing.

**4.4.2.3** Within 20 days after receipt of the materials required under Section 4.4.2.2, City will review and provide Notice to Principal Project Company as to whether, in its opinion, the proposed Refinancing is an Exempt Refinancing.

**4.4.2.4** At least 45 days before the proposed date for closing any Refinancing (except an Exempt Refinancing under clause (b), (c) or (d) of the definition of Exempt Refinancing), Principal Project Company shall:

- (a) provide draft proposed Financing Agreements and Security Documents (or term sheets therefor, if drafts are not then available), available Refinancing Data, and any other submittals required by Exhibit 5C (Calculation of Refinancing Gain); and
- (b) if applicable, provide Notice to City setting out the facts to support the basis for characterization of the transaction as an Exempt Refinancing or Rescue Refinancing.

**4.4.2.5** Within 15 days after receipt of the materials required under Section 4.4.2.4, City will provide Notice to Principal Project Company of City's determinations regarding the following:

- (a) whether the proposed Refinancing is an Exempt Refinancing or Rescue Refinancing;
- (b) if the proposed Refinancing is neither an Exempt Refinancing or Rescue Refinancing, whether to approve or disapprove the proposed Refinancing; and
- (c) if City will approve the proposed Refinancing, whether the Refinancing Gain requirements apply.

**4.4.2.6** City's failure to deliver to Principal Project Company Notice of the determinations and selection within the time period set forth in Section 4.4.2.5 shall not prejudice City's right to disapprove the proposed Refinancing, to receive any portion of Refinancing Gain, or its selection of the means for payment of such portion.

**4.4.2.7** At least 10 days before the proposed date for closing the Refinancing, Principal Project Company shall deliver to City substantially final drafts of the proposed Financing Agreements and Security Documents, together with updated versions of the Refinancing Data.

**4.4.2.8** Within five Business Days after close of the Refinancing, Principal Project Company shall deliver to City copies of all signed Financing Agreements and Security Documents in connection with the Refinancing, and the final Refinancing Data.

**4.4.2.9** Within 10 Business Days after close of the Refinancing, City and Principal Project Company shall meet and confer to agree upon the final calculation of the Refinancing Gain in accordance with Section 4.5 (Refinancing Gain). Once the final calculation is made, Principal Project Company shall pay City its portion of the Refinancing Gain in accordance with City's selected method of payment. If there is any dispute regarding the amount owing, Principal Project Company shall pay the undisputed amount to City and the amount in dispute shall be subject to resolution under the Contract Dispute Procedures.

---

### 4.4.3 Refinancing Limitations, Requirements and Conditions

**4.4.3.1** If City renders any assistance or performs any requested activity in connection with a Refinancing apart from delivering a consent and estoppel certificate under any Direct Agreement, then concurrently with close of the Refinancing, and as a condition precedent to Principal Project Company's right to close the Refinancing, Principal Project Company shall reimburse City for Recoverable Costs incurred in connection with the Refinancing. City will deliver to Principal Project Company a written invoice and demand before the scheduled date of closing. If for any reason the Refinancing does not close, Principal Project Company shall reimburse City for Recoverable Costs incurred in connection with the proposed Refinancing within 10 days after City delivers to Principal Project Company a written invoice and demand for such costs.

**4.4.3.2** Principal Project Company shall bear all risks for any Refinancing that negatively affects its Equity IRR, Key Ratios or financial performance.

### 4.5 Refinancing Gain

**4.5.1** City shall be entitled to receive 50% of any Refinancing Gain attributable to any Refinancing other than an Exempt Refinancing. The Refinancing Gain amount shall be, calculated in accordance with Exhibit 5C (Calculation of Refinancing Gain).

**4.5.2** Commencing at least 40 days before the proposed date for closing any Refinancing (except an Exempt Refinancing under clause (b), (c) or (d) of the definition of Exempt Refinancing), the Parties will negotiate in good faith to determine the method by which City will receive its portion of the Refinancing Gain, if applicable, which includes one or a combination of the following methods:

- (a) a single payment on or about the date of the Refinancing in an amount less than or equal to any Distribution made on or about the date of Refinancing;
- (b) a credit or payment by Principal Project Company to City that effectively reduces the Availability Payments over the remainder of the Term; or
- (c) a combination of clauses (a)-(b).

### 4.6 Equity Requirements

Principal Project Company shall have and maintain a Construction Equity Ratio totaling not less than 5% throughout the period between the Financial Close Date and the Substantial Completion Date, except to the extent:

- (a) City otherwise approves in writing, in its sole discretion;
- (b) Principal Project Company shall reduce the amount of the Construction Equity Ratio below 5% as part of a workout of a breach or default under the Initial Financing Agreements or Initial Security Documents; or

- 
- (c) the amount of Construction Equity Ratio is reduced below 5% because Principal Project Company incurs additional Project Debt pursuant to a Refinancing.

#### **4.7 Financial Model and Financial Model Updates**

##### **4.7.1 Model Update Event**

###### **4.7.1.1 Model Update Event means any of the following events:**

- (a) the implementation at Financial Close of the Base Interest Rate fluctuation and Credit Spread Risk Mitigation process pursuant to Section 3.2.3 (Base Interest Rate Fluctuation and Credit Spread Risk Mitigation);
- (b) the implementation of any mitigation actions set forth in Section 3.4.2;
- (c) a Compensable Delay Event or a Compensable Relief Event for which City owes Principal Project Company compensation pursuant to Sections 14.1.4 (Costs Payable for Compensable Delay Events), Section 14.1.6 (Costs Payable for Force Majeure Events During the D&C Term), Section 14.1.7 (Costs Payable for Unavoidable Delay Events During the D&C Term), or Section 14.2.4 (Costs Payable for Force Majeure During IFM Period), respectively, which City has elected to pay as an adjustment to the Availability Payments over the Term;
- (d) an event for which City is entitled to compensation from Principal Project Company pursuant to Section 16.2 (City Remedies for PPC Default);
- (e) a Refinancing resulting in a Refinancing Gain to which City is entitled to a share pursuant to Section 4.5 (Refinancing Gain); and
- (f) any amendments to the Contract Documents that the Parties agree has a material effect on the Financial Model, including any amendments agreed to by the Parties between the Finance Plan Due Date and Financial Close.

**4.7.1.2** Whenever a Model Update Event occurs (except as otherwise provided in this Agreement or where the Parties mutually agree otherwise), the financial consequence shall be determined in accordance with this Section 4.7 (Financial Model and Financial Model Updates).

##### **4.7.2 Updates to the Financial Model**

**4.7.2.1** In connection with any Model Update Event that entitles either Party to the payment of any amount, Principal Project Company may, in consultation with City, prepare an updated Financial Model in accordance with this Section 4.7.2 (Updates to the Financial Model) (each, a “**Financial Model Update**”) to reflect the financial impacts of such Model Update Event and calculate the amount due to either Party as a result of the Model Update Event. Principal Project Company may address more than one Model Update Event within a single Financial Model Update, provided that City may request interim versions of a Financial Model Update that address the impact of only a single Model Update Event. No Financial Model Update shall have any effect on the rights and obligations of the Parties under this Agreement until both Parties

have agreed in writing to accept it as an amendment to this Agreement pursuant to Section 4.7.3 (Replacement of Financial Model).

**4.7.2.2** Principal Project Company shall propose the Financial Model Update by Notice to City giving the proposed revised Financial Model together with full and complete details and explanation of the assumptions and calculations used to reflect the financial impacts of the Model Update Event which may only include changes to Principal Project Company's cash revenues and expenses that arise directly from the Model Update Event and consequential changes to the Project Debt draw down schedule, funding and release of reserves, financing costs, debt service schedule and amounts, Committed Investment draw down schedule and Principal Project Company's Distributions schedule and amounts or any other impacts or consequential changes mutually agreed by the Parties.

**4.7.2.3** A Financial Model Update:

- (a) may incorporate only the following revisions:
  - (i) changes to Principal Project Company's cash revenues and expenses that arise directly from the Model Update Event; and
  - (ii) consequential changes to the Project Debt draw down schedule, funding and release of reserves, financing costs, debt service schedule and amounts, Committed Investment draw down schedule and Principal Project Company's Distributions schedule and amounts; and
- (b) may not:
  - (i) incorporate other information or assumptions based on Principal Project Company's actual Project Financial Performance, except as permitted by Exhibit 5C (Calculation of Refinancing Gain) for a Financial Model Update related to a Refinancing; or
  - (ii) generally update projections through the end of the Term based on current market conditions.

**4.7.2.4** Principal Project Company may amend the logic or formulae incorporated in a Financial Model Update to the extent necessary to permit adjustments to the Financial Model in accordance with this Section 4.7 (Financial Model and Financial Model Updates). However, if any amendment is to be made to the logic or formulae in a Financial Model Update, the Key Ratios in the Financial Model Update must be maintained at levels that are neither lower nor higher than the Key Ratios existing in the Financial Model then in effect, and the difference in the Equity IRR after and immediately before making such amendment may not be greater than one basis point (being 0.01%) or as may be agreed upon by the Parties.

**4.7.2.5** Principal Project Company shall provide City with access, on an Open Book Basis, to the set of updated and revised assumptions and other data that comprise or are included in any Financial Model Update. Principal Project Company shall also provide a reconciliation and explanation of all the adjustments applied in the Financial Model Update. City may challenge the validity, accuracy or reasonableness of any Financial Model Update or any portion thereof

and may require Principal Project Company to correct any detected errors in the Financial Model Update or Financial Model, as applicable.

#### **4.7.3 Replacement of Financial Model**

**4.7.3.1** Following mutual agreement by Principal Project Company and City on interim versions of a Financial Model Update, Principal Project Company shall deliver to City, in form and substance reasonably acceptable to City:

- (a) the final version of the Financial Model Update and the related amended Financial Modeling Data, in the same form as the versions delivered pursuant to Section 3.3 (Post-Financial Close Requirements and Deliverables) or in such other form as may be agreed upon by the Parties;
- (b) an updated model audit report related to such Financial Model Update in accordance with Section 4.7.4 (Financial Model Audits); and
- (c) a form of written amendment that (i) effects the replacement of the then current Financial Model then in effect with the proposed Financial Model Update, and (ii) addresses all other amendments to this Agreement that may be required as a result of the Model Update Event and the amended Financial Model, including any required amendments to the definitions of Base Capital MaxAP, Base IFM MaxAP, Equity IRR and Key Ratios.

**4.7.3.2** Upon approval by City of the materials provided under Section 4.7.4.1 and execution of the written amendment by the Parties, the Financial Model Update shall become the Financial Model for the purposes of this Agreement until further amended, as applicable. Each Financial Model in effect under this Agreement shall be assigned an exclusive identification number, using chronological sequencing, and shall be clearly marked with Principal Project Company's name, date of submittal, contract number and the words, "Financial Model for Escrow".

**4.7.3.3** City reserves the right to approve any material changes in the debt structure (e.g., fixed or variable rate, bank financing or bond financing, call provisions) before Financial Close that constitute a deviation from the assumptions in Exhibit 3A (Financial Proposal). Material changes, as used in this Section 4.7.3.3, include (i) a change that differs materially from any commitments or provisions set forth in the Finance Plan; (ii) a change which would alter the risk allocations in this Agreement or any Key Contract; (iii) a change which could increase the liability of City for termination compensation in the event of a termination; (iv) a change that would modify the gearing of the financing; (v) a change that would result in an Affordability Event; (vi) a change that would cause a Delayed Financial Close Date; (vii) a change in any of the Security Documents; (viii) a change in the funding sources of Common Infrastructure; and/or (ix) a change under any of the conditions precedent to Financial Close under the Financing Documents.

**4.7.3.4** In the event of a Contract Dispute about the Financial Model, the Financial Model or the immediately preceding Financial Model Update (as applicable) that is not being disputed (or, if there has been no undisputed Financial Model Update, the Financial Model) will remain in effect until such Contract Dispute is resolved or a new Financial Model Update is issued and not disputed. If a proposed Financial Model or Financial Model Update (as applicable) has not been disputed, or if any such Contract Dispute has been so resolved, the proposed Financial Model

or Financial Model Update (as applicable) will serve as the Financial Model or the current Financial Model Update (as applicable).

#### **4.7.4 Financial Model Audits**

**4.7.4.1** Any model audit report delivered to City pursuant to Sections 3.3 (Post-Financial Close Requirements and Deliverables) and 4.7 (Financial Model and Financial Model Updates) shall be prepared by an independent audit firm with a nationally recognized reputation. The cost of a model audit report shall be paid solely by City if it is prepared in connection with a Financial Model Update related to a Model Update Event described in Section 4.7.1.1(c) or 4.7.1.1(f) when an amendment is proposed only by City. The cost of any other model audit report required hereunder shall be paid solely by Principal Project Company.

**4.7.4.2** Principal Project Company shall bear the entire risk of any errors or omissions contained in the Financial Model and shall not be entitled to any compensation or other relief from City in relation to any loss or damage that it suffers as a result of such error or omission.

#### **4.8 Escrow of Financial Model and Cost and Pricing Data**

**4.8.1** City and Principal Project Company shall, within 10 days after the Effective Date, jointly deposit the Base Case Financial Model in a locked cabinet at SFMTA or another location approved by City, with both Parties having a key to the cabinet. Replacement Financial Models shall be deposited within 10 days after the Parties have executed and delivered the amendment in accordance with Section 4.7.3 (Replacement of Financial Model).

**4.8.2** The Parties acknowledge that the Cost and Pricing Data has been placed into escrow as provided in Section 4.8.1. Concurrently with approval of each Change Order or other amendment to the Contract Documents, Principal Project Company shall deposit in the Cost and Pricing Data escrow one copy of all documentary information used by Principal Project Company in connection with pricing for the Change Order or other amendment, including quotations from Contractors.

**4.8.3** Principal Project Company represents and warrants that:

- (a) the material initially delivered into escrow constitutes the Base Case Financial Model and Cost and Pricing Data provided in connection with the Financial Proposal and an authorized officer of Principal Project Company has personally examined the contents of the electronic file and/or electronic storage media, as applicable, and they are complete; and
- (b) the Cost and Pricing Data constitutes all of the information used by Principal Project Company in determining the cost of the D&C Work, IFM Services and Renewal Work in preparation of the Implementation Proposal and, unless City agrees or directs otherwise, Principal Project Company shall not use any other Implementation Proposal preparation information in the negotiation of Change Orders or in connection with the potential resolution or settlement of Claims or Contract Disputes.

**4.8.4** Whenever Principal Project Company makes an additional deposit of any replacement Financial Models or Cost and Pricing Data into escrow, Principal Project Company

shall certify to City in writing at the time of deposit that: (a) the material deposited into escrow constitutes the true replacement Financial Models or Cost and Pricing Data, as applicable; (b) an authorized officer of Principal Project Company has personally examined the contents of the deposit; and (c) the deposit is complete.

**4.8.5** City may conduct a review of the Cost and Pricing Data in accordance with the procedure set forth in Section 4.8.6 to determine whether it is complete. In the event City determines that any Cost and Pricing Data is missing, City may request that Principal Project Company submit the missing data and Principal Project Company shall provide such Cost and Pricing Data within three Business Days of the request, and at that time it will be date stamped, labeled to identify it as supplementary information, and added to the escrowed Cost and Pricing Data. Principal Project Company shall have no right to add documents to the Cost and Pricing Data except as otherwise provided in this Section 4.8 (Escrow of Financial Model and Cost and Pricing Data).

**4.8.6** Each of City and Principal Project Company shall have the right to examine, through one or more designated representatives, any and all components of the Financial Model and Cost and Pricing Data during the SFMTA's normal business hours. The Party undertaking an examination need not have or state a specific reason to examine such material. Without limiting the foregoing, the Parties recognize that examination of the escrowed material may assist in the negotiation of Change Orders, or may assist in the potential resolution or settlement of Claims or Contract Disputes.

**4.8.7** City will provide Notice to Principal Project Company in writing at least two Business Days in advance of City's examination of escrowed material, and shall allow Principal Project Company to be present at the examination. City may make or retain copies of escrowed material, subject to terms reasonably necessary to protect the confidentiality and proprietary nature of the contents, as may be agreed upon by the Parties and subject to applicable Laws.

**4.8.8** Subject to applicable Laws, the escrowed material is, and shall remain, the property of Principal Project Company or its Contractors.

**4.8.9** Principal Project Company agrees that the Cost and Pricing Data is not part of the Contract Documents and that nothing in the Cost and Pricing Data shall change or modify the Contract Documents.

**4.8.10** Either Party may introduce escrowed material into evidence in accordance with the Contract Dispute Procedures. The Parties shall promptly abide by any request from the court or other dispute resolver to receive, review and utilize the Financial Model and Cost and Pricing Data to assist the dispute resolver in its deliberations.

**4.8.11** The escrow shall remain in effect throughout the Term and thereafter until final resolution of all Contract Disputes, subject to any mutual agreement of the Parties to retrieve and/or discard materials therein from time to time.

**4.8.12** Principal Project Company shall not be entitled to any additional payment for compilation of materials to be deposited into escrow or any other Principal Project Company expenses for complying with this Section 4.8 (Escrow of Financial Model and Cost and Pricing Data).

---

## ARTICLE 5. SUBMITTALS; MANAGEMENT SYSTEMS AND OVERSIGHT

### 5.1 Submittal Review Terms and Procedures

#### 5.1.1 Terms and Procedures

Principal Project Company shall comply with the terms and procedures for Submittals review set forth in Exhibit 11 (Submittals Review Process). Except as set forth in this Agreement, including Exhibit 11 (Submittals Review Process), the standard for review and approval of design and construction Submittals that comply with the Technical Requirements shall be reasonable discretion; provided, however, that decisions regarding waivers, releases, consents, acceptance of Nonconforming Work, Deviations, PPC Change Requests and other matters that are not consistent with or comply with the Contract Documents shall be within City's sole discretion.

#### 5.1.2 Conflicting Provisions

Exhibit 11 (Submittals Review Process) sets forth uniform terms and procedures for Submittals. In the event of any conflict between the provisions of Exhibit 11 (Submittals Review Process) and any other provisions of the Contract Documents or with the Project Management Plan concerning procedures with respect to submission, review, comment, approval, consent, determination, decision or other actions with respect to Submittals, Exhibit 11 (Submittals Review Process) shall exclusively govern and control the procedures, except to the extent that the conflicting provision expressly states that it supersedes Exhibit 11 (Submittals Review Process).

#### 5.1.3 Limitations on Principal Project Company's Right to Rely

**5.1.3.1** No action or failure to take action by or on behalf of City relating to Oversight (including review and approval of the Project Management Plan) or other act or omission of City shall:

- (a) constitute an approval or acceptance by City of Principal Project Company's performance of its obligations in accordance with the Contract Documents;
- (b) alter, waive, diminish, release or otherwise prejudice any rights, remedies or powers that City has under the Contract Documents or otherwise;
- (c) limit Principal Project Company's obligation to perform the Work in accordance with the Contract Documents; or
- (d) affect Principal Project Company's liabilities and obligations to fulfill the requirements of the Contract Documents (including its indemnity obligations).

**5.1.3.2** Principal Project Company acknowledges and agrees that Oversight, including review, comment, exception, objection, rejection, approval, disapproval, acceptance, concurrence, certification or failure to conduct any such activity by City:

- (a) is solely for the benefit and protection of City;

- (b) does not relieve Principal Project Company of its responsibility for the selection and the competent performance of all PPC-Related Entities;
- (c) does not relieve Principal Project Company from compliance with the requirements of the Contract Documents or create or impose upon City any liability, duty or obligation toward Principal Project Company to cause it to fulfill the requirements of the Contract Documents;
- (d) shall not be deemed or construed as any kind of warranty, express or implied, by City;
- (e) may not be relied upon by Principal Project Company or used as evidence in determining whether Principal Project Company has fulfilled the requirements of the Contract Documents;
- (f) shall not relieve Principal Project Company from liability for, and responsibility to replace, Nonconforming Work (including Work based on Design Documents to the extent that they include a change, deviation, modification, alteration or exception from the Technical Requirements not approved as a Deviation) and to cure PPC Defaults;
- (g) shall not be deemed or construed as any assumption of risk by City as to design, construction, equipping, supply, operations, maintenance, performance or quality of the Project or performance of the Work; and
- (h) may not be asserted by Principal Project Company against City as a legal or equitable defense to, or as a waiver of or relief from, Principal Project Company's obligation to fulfill the requirements of the Contract Documents.

**5.1.3.3** Notwithstanding the provisions of Sections 5.1.3.1 and 5.1.3.2, Principal Project Company may rely on Notices that City gives under this Agreement for purposes of confirming City's approval or consent to an event or matter, but without prejudice to any of City's other rights and remedies under this Agreement, including regarding compliance by Principal Project Company with the requirements of the Contract Documents.

**5.1.3.4** Notwithstanding the provisions of Sections 5.1.3.1 and 5.1.3.2, Principal Project Company shall be entitled to rely on City's written approval of specific Deviations.

**5.1.3.5** City's approval of Release for Construction Documents shall constitute approval of the design by City for purposes of Government Code section 830.6, but shall not be deemed to relieve Principal Project Company of liability for the design.

## **5.2 Project Management Plan**

**5.2.1** Principal Project Company shall comply with the Project Management Plan and its component parts, plans and other included at Exhibit 2 (Project Management Plan) and Good Industry Practice, including those requirements applicable to Quality Assurance and Quality Control.

**5.2.2** Principal Project Company shall submit to City, in accordance with the procedures and timeline described in the Technical Requirements, any proposed changes or additions to or revisions of the Project Management Plan and its component parts.

**5.2.3** Principal Project Company shall not commence any aspect of Construction Work before approval of the D&C Management Plan applicable to such Construction Work. Principal Project Company shall not commence any aspect of the IFM Services before approval of the relevant component parts, plans and other documentation of the IFM Management Plan applicable to the IFM Services.

**5.2.4** If any part, plan or other documentation of the Project Management Plan refers to, relies on or incorporates any manual, plan, procedure or like document, then all such referenced or incorporated materials shall be submitted to City for review, marked to identify relevant provisions.

**5.2.5** Principal Project Company shall monitor the Work and prescribe times for internal audits of the Project Management Plan, and shall carry out such internal audits at the times prescribed and shall promptly remedy all findings to City's satisfaction.

**5.2.6** Principal Project Company shall comply with and cause all Contractors to comply with applicable requirements of the Project Management Plan.

**5.2.7** Principal Project Company shall update the Project Management Plan in accordance with the Technical Requirements.

### **5.3 Quality Assurance, Quality Control, Generally**

Principal Project Company is primarily responsible for all Quality Assurance and Quality Control activities (including self-monitoring activities) necessary to manage the Project. Principal Project Company shall undertake the primary aspects of Quality Assurance and Quality Control for the Project and the Work in accordance with the Project Management Plan, the Technical Requirements (including Section 1.4 of Division 1 of the Technical Requirements), other applicable provisions of the Contract Documents, Good Industry Practice and applicable Law. The foregoing shall not limit City's Oversight rights and quality assurance/quality control verification, all as set forth in this Agreement.

### **5.4 Oversight, Inspection and Testing**

**5.4.1** City shall have the right at all times to conduct Oversight as provided in this Section 5.4 (Oversight, Inspection, and Testing) and Division 6 of the Technical Requirements. Such Oversight may include assessments regarding compliance with the Contract Documents, Project Management Plan, and requirements of applicable Governmental Entities and applicable Law. City may designate any Person or Persons to carry out any Oversight on City's behalf.

**5.4.2** City's Oversight rights include, at City's sole option, the following:

- (a) monitoring and auditing Principal Project Company and its Books and Records to determine compliance with requirements of the Contract Documents and the Project Management Plan, including (i) audit review of compliance with

- quality procedures and processes under PPC's Design Quality Plan, PPC's Construction Quality Plan and IFM Quality Management Plan, and (ii) audit review of Design Documents, Construction Documents, field work plans, land surveys, mapping, other data collection tasks, other Submittals and other Books and Records;
- (b) conducting audits of all design and pre-design activities for the Project as needed to ascertain and evaluate Principal Project Company's design quality and safety control processes, including (i) review of engineering calculations, engineering reports, and findings, (ii) review of the work of Principal Project Company's environmental compliance personnel with the Environmental Compliance Plan, and (iii) review of certifications that Principal Project Company's Quality Control checks of final Construction Documents have been performed and documented, and that the Construction Documents conform to the requirements of the Contract Documents;
  - (c) conducting audits of all construction-related activities for the Project as needed to audit Principal Project Company's construction quality and safety control processes, including (i) auditing the services of Principal Project Company's accredited laboratories and associated testing devices and equipment, (ii) reviewing Principal Project Company's construction quality procedures, including conducting field monitoring and inspections as needed for audit purposes of construction activities, materials, and system components, as indicated in the Contract Documents, (iii) auditing Principal Project Company's records of materials, materials tests, materials certifications, and performance tests for Project systems, (iv) reviewing and investigating Project progress, Project quality, Deviations, Defects, and repair and replacement of Nonconforming Work, and (v) conducting field monitoring and inspections;
  - (d) conducting inspection and testing of materials or software, including witnessing factory tests, off-site lab tests, and first article inspection of manufactured items to verify Principal Project Company's compliance with testing frequencies and requirements, including (i) performance and acceptance testing, in the Contract Documents, and the Project Management Plan, (ii) the accuracy of the tests, inspections and audits performed in accordance with PPC's Design Quality Plan and PPC's Construction Quality Plan, and (iii) compliance of materials incorporated into the Project with the applicable requirements, conditions and standards of the Contract Documents, Regulatory Approvals, the Project Management Plan, IFM Quality Management Plan and applicable Law;
  - (e) accompanying Principal Project Company on physical inspections associated with Principal Project Company's Performance Monitoring, conducting its own performance inspections, assessing and scoring Principal Project Company's IFM Records, and assessing and rating the condition of elements;
  - (f) attending and witnessing Principal Project Company's other on-site and off-site tests and inspections, including system start-up and acceptance tests and

- inspections, subject to the obligation to observe all applicable Safety Standards and requirements;
- (g) reviewing Principal Project Company's certification of Record Documents and surveys;
  - (h) investigating, analyzing and reporting on Safety Compliance and performance of Safety Compliance Orders; and
  - (i) monitoring and auditing Principal Project Company's detection, reporting, response times and time to respond to and rectify breaches and failures for which Noncompliance Points may be assessed in accordance with Article 15 (Deductions and Noncompliance Points) and Exhibit 4 (Payment Mechanism).

**5.4.3** City also has the right, but not the obligation, to conduct "over-the-shoulder" reviews of Design Documents and other Submittals. All such "over-the-shoulder" reviews conducted are for City's sole benefit.

**5.4.4** Nothing in the Contract Documents shall preclude, and Principal Project Company shall not interfere with, any review, inspection or oversight of Submittals or of Work that any Authority Having Jurisdiction may desire to conduct in accordance with its agreements with City or applicable Law.

## **5.5 Testing and Test Results**

**5.5.1** All tests shall be carried out in accordance with Division 6 of the Technical Requirements, this Section 5.5 (Testing and Test Results) and all other applicable provisions of and the Contract Documents.

**5.5.2** Principal Project Company shall develop a test recording system that permits ready retrieval of all test readings and shall provide information relating to tests proposed, test methodology and Test Reports to City on request.

**5.5.3** City may attend and witness any tests and verifications to be conducted with respect to the Project. Principal Project Company shall provide to City all test results and reports (which shall be provided in electronic format in accordance with the Technical Requirements) within 10 Business Days after Principal Project Company or its Contractor receives them. With respect to continuous testing operations (such as concrete quality, structural concrete strengths, aggregate quality, compaction tests and material quality), Principal Project Company shall provide to City at regular intervals (at least weekly unless otherwise agreed) test summary sheets and statistical analyses indicating strength and quality trends.

**5.5.4** Principal Project Company shall give City timely advance Notice (not less than 5 Business Days) of the date and specific location of such tests.

**5.5.5** City's Authorized Representative and any other designee may attend any test and will give advance Notice (not less than one Business Day) of their intent to attend the test. Any materials or plant that fail(s) such tests shall be rejected.

**5.5.6** Principal Project Company acknowledges that, where Principal Project Company's Work impacts a Utility or an element subject to the jurisdiction of an Authority Having Jurisdiction, then the affected Utility Owner or Authority Having Jurisdiction, as applicable, will have the same rights as City under this Section 5.5 (Testing and Test Results), subject to the same obligations that apply to City under Section 6.7.3.

## **5.6 Meetings**

**5.6.1** Principal Project Company shall conduct coordination and progress meetings with City, in accordance with Section 1.1.3 of Division 1 of the Technical Requirements during the course of design and construction, including any design and construction occurring during the IFM Period, and in accordance with the IFM Specifications during the performance of the IFM Services. At City's request, Principal Project Company shall require the Engineer of Record and Contractors responsible for or affected by such Work to attend the progress meetings. City and its designated representatives are authorized to attend all such meetings and are permitted to raise any questions, concerns or opinions without restriction.

**5.6.2** The Parties shall hold any other meetings, at such times, frequency and locations, as applicable, as stated in the Technical Requirements.

**5.6.3** City and Principal Project Company, through their respective Authorized Representatives, shall meet from time to time at the other Party's request to discuss and resolve issues relating to the Work.

**5.6.4** Principal Project Company shall schedule all meetings with City at a date, time and place reasonably convenient to both Parties.

## **5.7 Reporting**

### **5.7.1 Relating to the Work**

**5.7.1.1** Principal Project Company shall submit all reports relating to the Work in the form, with the content and within the time required under the Contract Documents.

**5.7.1.2** Principal Project Company shall make available to City information relating to the status of the Work, including non-proprietary information relating to the design, engineering and construction, estoppel certificates, and such other matters as City may reasonably request in accordance with the Technical Requirements.

### **5.7.2 Financial Reporting**

**5.7.2.1** On the first anniversary of the Effective Date and on every subsequent anniversary thereof during the Term, Principal Project Company shall deliver to City certified copies of (a) Principal Project Company's most recent annual audited financial statements and (b) any other reporting and notifications provided to Lenders regarding material events (including any draws on Principal Project Company's debt service reserve account) under the Financing Documents.

**5.7.2.2** From the Effective Date until the Final Acceptance Date, Principal Project Company shall deliver to City, on a monthly basis, certified copies of (a) Principal Project Company's draw requests to Lenders (including corresponding payment applications by Key Contractors to

Principal Project Company), and (b) the LTA's reports, which shall clearly state the D&C Percentage as of the date of the report, and the invoices approved by the LTA in connection with the foregoing, in each case, within two Business Days following delivery or receipt, as applicable, by Principal Project Company of the relevant documentation.

**5.7.2.3** During the IFM Period, Principal Project Company shall, concurrently with delivery to any Lender and at least annually, deliver to City a budget for IFM Services for the upcoming year, actual costs incurred in performance of the IFM Services during the preceding year, together with any updates required by or delivered to any Lender.

---

## ARTICLE 6. GENERAL PRINCIPAL PROJECT COMPANY OBLIGATIONS

### 6.1 Planning and Engineering Activities

Principal Project Company, through appropriately qualified and licensed design professionals, as identified in the Project Management Plan, shall furnish or cause to be furnished all planning and engineering activities appropriate for design and development of the Project in accordance with the Contract Documents and Good Industry Practice.

### 6.2 Project Site Conditions

6.2.1 Principal Project Company acknowledges and agrees that:

- (a) it has investigated and satisfied itself as to the conditions affecting the D&C Work, including those bearing upon transportation, disposal, handling and storage of materials, availability of labor, supplies, materials, equipment, water, electric power, roads and uncertainties of weather or similar physical conditions at the Project Site, the conformation and conditions of the ground, and the character of equipment and facilities needed in connection with the D&C Work;
- (b) it has satisfied itself as to the character, quality and quantity of surface and subsurface materials or obstacles to be encountered insofar as this information is reasonably ascertainable from an inspection of the Project Site, including the results of exploratory work (including investigations undertaken pursuant to the PDA) and other information publicly available or provided to Principal Project Company by City; and
- (c) any failure by Principal Project Company to acquaint itself with the available information relating to the conditions affecting the D&C Work will not relieve Principal Project Company from responsibility for estimating properly the difficulty or cost of successfully performing the D&C Work and shall not be the basis of a Relief Event claim.

6.2.2 During the progress of the Work, if Principal Project Company encounters any Hazardous Materials or other Project Site conditions that may entitle Principal Project Company to claim that a Relief Event has occurred, then Principal Project Company shall provide Notice to City of the specific condition promptly before it is disturbed, or as soon as practicable afterwards, and before the affected Work continues. City shall promptly investigate such conditions.

### 6.3 Regulatory Approvals

#### 6.3.1 CEQA Approval and NEPA Approval

6.3.1.1 The Parties acknowledge that City has obtained the CEQA Approval and Principal Project Company acknowledges receipt of a copy of the CEQA Approval. City is responsible for maintaining the CEQA Approval. City is responsible for costs of litigation relating to the CEQA Approval, subject to the exception provided in Section 6.3.4.2(d).

**6.3.1.2** Principal Project Company shall provide support to City and undertake additional efforts as specified in Section 6.3.6.1 with respect to any modifications, renewals and extensions of the CEQA Approval, including those required as the result of Principal Project Company's design and Relief Events.

***[Note: Assuming the NEPA Approval is obtained prior to Commercial Close, the below provisions will be deleted. If not, (i) these provisions shall remain; (ii) the Agreement or the TRs will include an assumed set of conditions, mitigations, etc.; and (iii) material changes in such assumed conditions, mitigations, etc. will be added as a Compensable Delay Event. PNC must include this type of language in its DB RFP and DB Contract as well]***

**6.3.1.3** The Parties acknowledge that City has not yet obtained the NEPA Approval. City is responsible for maintaining the NEPA Approval. City is responsible for costs of litigation relating to the NEPA Approval, subject to the exception provided in Section 6.3.4.2(d).

**6.3.1.4** Given that the City has not yet obtained the NEPA Approval, performance by either Party of its obligations under this Agreement shall not limit:

- (a) City's independent evaluation and sole discretion when conducting the environmental review process required for the NEPA Approval and preparing the NEPA environmental documents; or
- (b) City's sole discretion to withhold issuance of NTP 2.

**6.3.1.5** Principal Project Company acknowledges and agrees that City retains:

- (a) sole discretion, exclusive control and decision-making authority over the description of the Project and any identification or evaluation of alternatives or mitigation measures for the purposes of NEPA; and
- (b) sole discretion over whether to accept the Work, the Infrastructure Facility and Principal Project Company Submittals for purposes of the NEPA environmental review process.

**6.3.1.6** Nothing contained in this Agreement commits, or shall be construed to commit, City to any proposed project or any Project alternative, modification, or mitigation regarding the Project (including a no-build alternative) until, unless and before the NEPA Approval is obtained and City approves the Project, alternative, modification or mitigation.

**6.3.1.7** Principal Project Company shall have no right or obligation to perform, and shall not perform, any services or Work that would violate conflict of interest rules under NEPA regarding the preparation, review, revision and decisions on scope and content of the NEPA environmental documents. All references in this Agreement to Principal Project Company's involvement with the NEPA environmental review process or development of the NEPA environmental documents shall be subject to the limitation in the preceding sentence.

**6.3.1.8** Unless and before the NEPA Approval is obtained, Principal Project Company may not undertake final design or construction Work.

---

## **6.3.2 Regulatory Approvals other than the CEQA Approval and the NEPA Approval**

**6.3.2.1** Principal Project Company shall obtain and maintain all Regulatory Approvals required for the Project and the Work, other than the CEQA Approval and the NEPA Approval, and shall bear the risk of obtaining such approvals and any delay in obtaining such approvals, except as provided in Section 6.3.4.1, as well as the risk of conditions imposed on performance of the Work by such approvals. Principal Project Company shall conduct all necessary environmental studies and prepare all necessary environmental documents in compliance with applicable Environmental Laws as needed to obtain Regulatory Approvals other than the CEQA Approval and the NEPA Approval, and shall obtain all necessary modifications, renewals and extensions thereof.

**6.3.2.2** Principal Project Company shall pay all costs associated with obtaining Regulatory Approvals, other than the CEQA Approval and the NEPA Approval.

## **6.3.3 Copies to City**

Within 10 days of submitting any application for a Regulatory Approval to a Governmental Entity (or any proposed modification, renewal, extension or waiver of a Regulatory Approval or provision thereof), Principal Project Company shall submit an electronic copy of same, together with any supporting studies, analyses and data, to City. Principal Project Company shall deliver to City true and complete copies of all new or amended Regulatory Approvals, other than the CEQA Approval and the NEPA Approval.

## **6.3.4 Certain Risks Relating to Regulatory Approvals**

**6.3.4.1** Except to the extent required as a direct result of (a) a City Change, (b) a City Fault, or (c) Major Approval Delay, Principal Project Company shall not be entitled to any Extra Work Costs, Financing Delay Costs, Delay Costs, time extensions or any other relief associated with securing Regulatory Approvals.

**6.3.4.2** As between City and Principal Project Company, Principal Project Company shall bear all risk arising out of, relating to or resulting from:

- (a) any differences between Principal Project Company's design for any portion of the Project and the design that served as the basis for the application for a Regulatory Approval, except to the extent required as a direct result of a City Change;
- (b) any differences between the means and methods (including temporary works) Principal Project Company chooses for performance of the Work and those stated in, referred to or contemplated in the CEQA Approval and/or the NEPA Approval;
- (c) any change in the Project due to Principal Project Company's design, except to the extent that the change was directly attributable to a Relief Event; and
- (d) cost of litigation associated with Regulatory Approvals, including the CEQA Approval and the NEPA Approval, to the extent that the litigation arises, in

---

whole or in part, due to Principal Project Company's failure to comply with the requirements of the Regulatory Approval.

### **6.3.5 Changes to Regulatory Approvals**

If Principal Project Company wishes to obtain, modify, renew or extend any Regulatory Approvals, Principal Project Company shall first comply with, and obtain any consent or waiver required in accordance with, then-existing agreements between City and other Governmental Entities.

### **6.3.6 City Assistance with Regulatory Approvals.**

**6.3.6.1** Principal Project Company may, by Notice to City, request City's reasonable assistance and cooperation in obtaining modifying, renewing or extending any Regulatory Approvals (including any modification, renewal or extension of an existing Regulatory Approval required as the result of Principal Project Company's design or construction methods). Upon receipt of such a Notice and agreement of the Parties regarding the scope of, and budget for, assistance to be provided as described in Section 6.3.6.2, City will reasonably assist and cooperate with Principal Project Company in seeking to obtain the Regulatory Approvals, including joining in conferences and meetings with the Governmental Entities with jurisdiction, and providing Principal Project Company data, information and documents available to City and relevant to the application for the Regulatory Approvals

**6.3.6.2** City and Principal Project Company shall work jointly to establish a scope of work and budget for City's Recoverable Costs (which shall be limited to reasonable out-of-pocket costs) incurred in connection with the assistance and cooperation that City agrees to provide in connection with modifications to Regulatory Approvals under Section 6.3.6.1. Subject to an agreed upon scope of work and budget and to any rights of Principal Project Company in the case of a Relief Event, Principal Project Company shall fully reimburse City for such Recoverable Costs incurred in providing such assistance and cooperation, including those incurred to conduct further or supplemental environmental studies.

**6.3.6.3** Assistance provided by City under Section 6.3.6.1 shall not include any obligation to:

- (a) coordinate and work with elected and other public officials as necessary and appropriate;
- (b) act as the lead agency and directly coordinate with such Governmental Entities;
- (c) take a position which City believes to be inconsistent with the Contract Documents, the Project Management Plan, applicable Law, Regulatory Approval(s), the requirements of Good Industry Practice, or City policy;
- (d) take a position that is not usual and customary for City to take in addressing similar circumstances affecting its own projects (except for usual and customary arrangements that are incompatible with the Project's public-private contracting methodology);
- (e) take a position that increases the risk, obligations or liabilities of City; or

- (f) refrain from concurring with a position taken by a Governmental Entity if City believes that position to be proper.

**6.3.6.4** Notwithstanding any assistance provided by City in accordance with Section 6.3.6.1, Principal Project Company shall remain responsible for, and bear all risks and costs associated with, obtaining all Regulatory Approvals, except as otherwise expressly provided in the Contract Documents.

### **6.3.7 Regulatory Approvals in City's Name**

**6.3.7.1** Certain Regulatory Approvals are required to be applied for or issued in City's name and/or require City to directly coordinate with such Governmental Entities in connection with obtaining Regulatory Approvals. With respect to such approvals, City will assist and cooperate with Principal Project Company following receipt of a request under Section 6.3.6.1, and the Parties shall proceed in accordance with Section 6.3.6.2. Principal Project Company shall lead all actions and efforts to apply for and obtain the Regulatory Approval including: (a) conducting necessary field investigations, (b) preparing mitigation analyses and studies and plans, (c) preparing surveys and required reports, applications and other documents in form approved by City, and (d) joint coordination and joint discussions and attendance at meetings with the applicable Governmental Entity.

**6.3.7.2** Principal Project Company shall be solely responsible for obtaining all Regulatory Approvals required in connection with, and for compliance with applicable Laws with respect to, Temporary Areas.

### **6.3.8 Major Approval Delay**

**6.3.8.1** Principal Project Company shall make diligent efforts to obtain the cooperation of each Governmental Entity as necessary for the issuance of any Major Approval. Principal Project Company is responsible for verifying the progress of each Governmental Entity's review and progress towards granting such Major Approval. Principal Project Company shall provide Notice to City within five days after the occurrence of any of the following: (a) Principal Project Company reasonably believes for any reason that any Governmental Entity will not issue the Major Approval in a manner consistent with the timely completion of the Project or in accordance with Law, the Regulatory Approvals or the Contract Documents, (b) Principal Project Company becomes aware that any Governmental Entity is not cooperating in a timely manner to issue the Major Approval in accordance with the Contract Documents, or (c) any other dispute arises between Principal Project Company and such Governmental Entity with respect to the Major Approval, despite Principal Project Company's diligent efforts to obtain such Governmental Entity's cooperation or otherwise resolve such dispute. Such Notice may include a request that City assist in resolving the dispute or in otherwise obtaining the Governmental Entity's timely cooperation. Principal Project Company shall provide City with such information as City reasonably requests regarding the Governmental Entity's failure to cooperate and the effect of any resulting delay on the Project Schedule. After delivering Notice to City, Principal Project Company shall continue to use diligent efforts to pursue the Governmental Entity's cooperation.

**6.3.8.2** If Principal Project Company requests assistance of City pursuant to Section 6.3.8.1, the following provisions apply:

- (a) Principal Project Company shall provide evidence satisfactory to City, in its good faith determination, that (i) the time for obtaining the Major Approval in the Project Schedule (including any Major Approval Deadline) was, in its inception, a reasonable amount of time for completion of such work, (iii) Principal Project Company has made, and continues to make, diligent efforts to obtain the Governmental Entity's cooperation and commenced coordination at the earliest time, including during the PDA Term (including submitting and actively pursuing applications for the Major Approval, taking into account the Project Schedule), (iv) Principal Project Company has submitted a fully compliant and complete request and application to the applicable Governmental Entity in accordance with applicable Law and the policies and procedures of such Governmental Entity; (v) Principal Project Company has paid in full all fees and charges required for the review, consultation and issuance of the Major Approval by the applicable Governmental Entity; (vi) Principal Project Company has satisfied all other conditions to the commencement of review by the applicable Governmental Entity in accordance with applicable Law and the policies and procedures of such Governmental Entity; and (vii) the Governmental Entity is not cooperating (clauses (a)(i) through (v) above are referred to herein as the "Major Approval Conditions to Assistance").
- (b) Following receipt by City of satisfactory evidence, City shall take such reasonable steps as City may reasonably determine to obtain the cooperation of the Governmental Entity with respect to the Major Approval or resolve the dispute; provided, however, City shall have no obligation to prosecute any legal proceedings, or to exercise any other legal remedy available to it under Law or existing contract, unless City elects to do so in its sole discretion. City may, at its sole discretion, participate in the resolution of any dispute between Principal Project Company and such Governmental Entity, whether or not requested to do so by Principal Project Company.
- (c) Without limiting City's obligations under clause (b) above, if City holds contractual rights that might be used to enforce the Governmental Entity's obligation to cooperate, City shall have the right not to exercise those rights. The decision not to exercise those rights shall be in the sole discretion of City.

**6.3.8.3** Any assistance provided by City shall not relieve Principal Project Company of its sole and primary responsibility for the satisfactory compliance with its obligations under the Contract Documents and its obligations with respect to obtaining any Major Approval.

**6.3.8.4** Major Approval Delay shall only apply to an unreasonable and unjustified delay by a Governmental Entity in connection with a Major Approval beyond the Major Approval Deadline following receipt by City of proper Notice pursuant to Section 6.3.8.1, provided that all of the "Major Approval Conditions to Assistance" described in Section 6.3.8.2 have been satisfied.

**6.3.8.5** Notwithstanding the foregoing, the term "Major Approval Delay" does not include and is not intended to address (i) City Changes relating to a Major Approval, the impact of which will be addressed in a Change Order, (ii) any Governmental Approvals other than a Major Approval; (iii) additional work associated with a Project design change unless such design change is as a direct and sole result of a City Change, Compensable Delay Event or Unavoidable Delay Event

(excluding Major Approval Delay); (iv) any event which results from or arises out of the actions or omissions of any PPC-Related Entity or any PPC Fault; or (v) any delay or impact relating to or arising out of the failure by any PPC-Related Entity to undertake the coordination activities with the Governmental Entity contemplated by the Predevelopment Agreement or based on the results of a Reasonable Investigation (even if such delay otherwise would have been considered a Major Approval Delay but for such failure). Principal Project Company shall not rely upon any proposed schedules, durations or deadlines, if any, included in the Reference Documents with respect to a Major Approval, and Principal Project Company may not base any Claims for a time extension or additional compensation upon such proposed schedules, durations, and deadlines.

**6.3.8.6** Subject to the limitations and restrictions in this Section 6.3.8 (Major Approval Delay) and Articles 13 (General Provisions Applying to Delay Events and Relief Events) and 14 (Compensation and Other Relief for Delay Events and Relief Events), any Contract Deadline(s) affected by a Major Approval Delay shall be extended in accordance with, and subject to, Section 14.1.3.

**6.3.8.7** Principal Project Company shall not be entitled to extension of any Contract Deadline or other relief for a Major Approval Delay pursuant to Section 6.3.8 (Major Approval Delay) or otherwise unless all of the following conditions are satisfied (in addition to satisfaction of any conditions specified in Section 6.3.8 ((Major Approval Delay)):

- (a) Principal Project Company has timely satisfied the “Major Approval Conditions to Assistance” requirements described in Section 6.3.8.2;
- (b) Principal Project Company has provided evidence satisfactory to City that (i) Principal Project Company took advantage of Float available early in the Project Schedule for coordination activities with respect to the Governmental Entity to which the Major Approval relates, (ii) Principal Project Company has fulfilled its obligation to coordinate with the Governmental Entity to prevent or reduce such delays, and (iii) Principal Project Company has otherwise made diligent efforts to obtain timely performance by the Governmental Entity but has been unable to obtain such timely performance;
- (c) There exist no circumstances which have delayed or are delaying the Major Approval, other than those that fit within the definition of a Major Approval Delay; and
- (d) The delay is otherwise allowable under Articles 13 (General Provisions Applying to Delay Events and Relief Events) and 14 (Compensation and Other Relief for Delay Events and Relief Events).

**6.3.8.8** Principal Project Company shall not be entitled to any Extra Work Costs, Delay Costs or for any other increased costs or Claims attributable to delays described in this Section 6.3.8 (Major Approval Delay).

## **6.4 Compliance with Laws**

### **6.4.1 Applicable Laws**

**6.4.1.1** Principal Project Company shall comply with, and require that all Contractors comply with, all applicable Laws, including those set forth or described in Exhibit 16 (Federal, State and City Requirements).

**6.4.1.2** All provisions required by applicable Laws to be included in this Agreement are incorporated by reference in this Agreement.

### **6.4.2 Environmental Compliance**

**6.4.2.1** Without limiting the generality of Section 6.4.1.1, Principal Project Company shall comply with, and require that all Contractors comply with, all Environmental Laws.

## **6.5 Compliance with Regulatory Approvals**

Throughout the Term and the course of the Work, Principal Project Company shall:

- (a) comply with all commitments, obligations, responsibilities, conditions and requirements imposed by all Regulatory Approvals, except, with respect to Environmental Approvals only, those obligations, commitments and responsibilities of City that are expressly allocated to City or a Third Party and are expressly excluded from Principal Project Company's scope of Work;
- (b) undertake all actions required by, or necessary to maintain in full force and effect all Regulatory Approvals to be obtained by Principal Project Company; and
- (c) comply with and implement, and cause Contractors to comply with and implement, all mitigation, monitoring, and reporting measures listed in the CEQA MMRP and the NEPA document or associated decision document, as applicable.

## **6.6 Communication and Public Outreach**

**6.6.1** Principal Project Company shall prepare and implement City's Public Outreach Plan developed pursuant to Section 1.15 of Division 1 of the Technical Requirements and Division 9 of the Technical Requirements.

**6.6.2** Principal Project Company is prohibited from making any public announcement or disclosure with respect to the Project, whether for publication in the press, radio, television or any other medium, unless Principal Project Company has obtained City's prior written approval.

## **6.7 Coordination, Cooperation and Access**

**6.7.1** Principal Project Company shall coordinate and cooperate with City, Third Parties, Utility Owners, Other Contractors and Governmental Entities with jurisdiction in matters relating to the Work, including facilitating their Oversight of the Work, as applicable, including pursuant

to Sections 1.12 and 1.13 of Division 1 of the Technical Requirements. Principal Project Company shall coordinate and cooperate with Other Contractors that may be carrying out work within the Project Site or in the land adjoining or near the Project Site.

**6.7.2** Principal Project Company shall provide City and City's representatives with:

- (a) safe and unrestricted access to the Project Site and the Project at all times; and
- (b) safe access during normal business hours to Principal Project Company's Project offices, operations buildings, and Temporary Areas.

**6.7.3** Notwithstanding anything to the contrary in this Agreement, whenever City or its representatives are present on the Project Site and production facilities, including while conducting Oversight, they will abide by the applicable Contractor's reasonable, non-discriminatory safety policies and practices and will take appropriate measures to avoid unreasonable interference with normal construction activity or normal operation and maintenance activity.

**6.7.4** Principal Project Company shall not interfere with the work of or cause any delay to any Other Contractors that may be carrying out work within the Project Site or in the land adjoining or near the Project Site and will allow them reasonable access to the Project Site, provided that Principal Project Company shall not be in breach of this Section 6.7.4 for any temporary interruption to the work of any Other Contractors that (a) has been agreed to in advance in accordance with procedures agreed to by Principal Project Company, such contractor and any relevant Third Party; or (b) is reasonably necessary in accordance with Law and Good Industry Practice to respond to emergencies creating an immediate and serious threat to public health, safety, security or the Environment.

## **6.8 Intentionally Deleted**

## **6.9 Safety Compliance**

**6.9.1** City may from time to time issue Safety Compliance Orders to Principal Project Company with respect to the Project to implement Safety Compliance.

**6.9.2** Promptly upon City obtaining Actual Knowledge of any circumstance or information relating to the Project that, in City's reasonable judgment, is likely to result in a Safety Compliance Order, City will provide Notice to Principal Project Company regarding the issue. Except in the case of an Emergency, City will consult with Principal Project Company before issuing a Safety Compliance Order concerning the risk to public or worker safety, alternative compliance measures, cost impacts, and the availability of Principal Project Company resources to fund the Safety Compliance work.

**6.9.3** Where a Governmental Entity or other regulatory authority other than City directs a Safety Compliance Order, in order for Principal Project Company to comply with the Safety Compliance Order, City shall issue a corresponding Safety Compliance Order to Principal Project Company.

**6.9.4** Principal Project Company shall implement each Safety Compliance Order as expeditiously as reasonably possible following its issuance. Principal Project Company shall diligently prosecute the work necessary to achieve such Safety Compliance until completion.

## **6.10 Law Enforcement and Security**

### **6.10.1 Law Enforcement Services**

**6.10.1.1** Principal Project Company acknowledges and agrees that law enforcement agencies, including City in its regulatory capacity, are empowered to enforce all applicable Laws and to enter the Project, and that any person engaged by City to provide law enforcement services has the authority to enter the Project, at any and all times to carry out their duties. Principal Project Company shall ensure that law enforcement agencies have necessary access to the Project to carry out their duties, power and jurisdiction.

**6.10.1.2** City shall not have any liability or obligation to Principal Project Company arising out of, relating to or resulting from the failure of law enforcement agencies to provide services, or any of their, or their respective agents' or employees', acts, omissions, negligence or misconduct in providing services, except to the extent such failure, act, omission, negligence or misconduct otherwise qualifies as a Compensable Delay Event Relief under clause (i) of the definition thereof or a Compensable Relief Event under clause (d) of the definition thereof. The general indemnity in Section 10.6.1 (General Indemnity) shall not apply to the extent that a claim, cause of action, suit, legal or administrative proceeding or any other occurrence, loss or damage of the type listed in Section 10.6.1 (General Indemnity) is directly attributable to actions of a law enforcement agency designated by City to provide services for the Project, and is not due to any PPC Fault.

### **6.10.2 Security**

**6.10.2.1** Principal Project Company is responsible for the security of the Project and safety of the workers and public within the Project Site and the Infrastructure Facility during the performance of the D&C Work. During the IFM Period, Principal Project Company is responsible for protecting the Infrastructure Facility from damage and providing safe operation of the Infrastructure Facility.

**6.10.2.2** Principal Project Company shall comply with all rules, directives and guidance of the U.S. Department of Homeland Security and other comparable agencies, and shall coordinate and cooperate with all Governmental Entities providing security, first responder and other public emergency response services.

## **6.11 Warranties**

### **6.11.1 Warranties for SFMTA O&M Facilities**

**6.11.1.1** Principal Project Company warrants each SFMTA O&M Facility against Defects during the period commencing on Substantial Completion of the Project and ending two years thereafter. The general warranty contained in this Section 6.11.1.1 is in addition to any express warranties provided for elsewhere in the Contract Documents. Principal Project Company warrants with respect to the SFMTA O&M Facilities that:

- (a) the Construction Work shall be free of Defects, except to the extent that such Defects are inherent in prescriptive specifications included in the Contract Documents;
- (b) materials and equipment furnished by or on behalf of any PPC-Related Entity under the Contract Documents shall be of good quality and when installed, shall be new;
- (c) equipment furnished by or on behalf of any PPC-Related Entity shall be in good working condition;
- (d) the Work shall meet all of the requirements of the Contract Documents and Good Industry Practice;
- (e) the Work shall be free of Deviations that have not been approved by City; and
- (f) the Project shall be fit for use for the intended function as contemplated by the Contract Documents.

**6.11.1.2** Principal Project Company shall perform, at Principal Project Company's sole cost and expense, warranty Work for any SFMTA O&M Facilities Defect:

- (a) with respect to which City delivers written Notice to Principal Project Company within the applicable warranty period; or
- (b) of which Principal Project Company otherwise has Actual Knowledge before the expiry of the applicable warranty period.

**6.11.1.3** Principal Project Company shall commence the applicable SFMTA O&M Facility warranty Work within 14 days of written Notice of the relevant SFMTA O&M Facilities Defect from City or Principal Project Company's Actual Knowledge thereof, whichever is earlier; or such shorter period as may be designated by City for emergency repairs. Principal Project Company shall thereafter diligently complete the SFMTA O&M Facility warranty Work as soon as reasonably practicable and promptly provide Notice to City in writing of completion of same.

**6.11.1.4** If Principal Project Company fails to commence or pursue with diligence and complete the SFMTA O&M Facility warranty Work as required, City may provide written Notice of such failure to the Principal Project Company. If the Principal Project Company's failure continues for three Business Days after the City delivers this Notice, the City may, in its sole discretion, perform the SFMTA O&M Facility warranty Work, and Principal Project Company shall reimburse City within seven days after any written demand from City for Recoverable Costs incurred by City in connection with the performance of the SFMTA O&M Facility warranty Work, including any related reasonable attorneys' and consultants' fees and expenses.

**6.11.1.5** In the event of an emergency constituting an immediate hazard to health or safety of Building Occupants or City property due to an SFMTA O&M Facilities Defect, City may undertake, at Principal Project Company's sole cost and expense and without prior Notice, all work necessary to correct such hazardous condition(s).

**6.11.1.6** Before expiry of the applicable warranty period, Principal Project Company shall execute and deliver to City a written assignment, in form and substance reasonably acceptable to City, of all Principal Project Company's and Contractors' right, title and interest in and to all warranties, and to the extent assignable, claims and causes of action held by Principal Project Company or its Contractors against Third Parties, concerning the SFMTA O&M Facilities.

### **6.11.2 Contractor Warranties and Guaranties**

**6.11.2.1** Principal Project Company shall obtain from all Contractors representations, warranties, guarantees and obligations in accordance with Good Industry Practice for work of similar scope and scale, with respect to design, materials, workmanship, equipment, tools and supplies furnished by all such Contractors and Suppliers, which shall extend not only to Principal Project Company but also to City and any Utility Owner or Authority Having Jurisdiction for whom Work is being performed. The warranties from Key Contractors shall be for such periods as specified in the Technical Requirements or, if not specified, a period of not less than two years from the date of the Certificate of Substantial Completion. All representations, warranties, guarantees and obligations of Key Contractors: (a) shall be written so as to survive all City and any Third Party inspections, tests and approvals; and (b) shall provide that upon expiration or any earlier termination of this Agreement before the expiration of such representations, warranties, guarantees and obligations they shall automatically be for the benefit of and enforceable by City and its successors and assigns, and any Utility Owner or Authority Having Jurisdiction for whom Work is being performed, subject to the rights of the Lenders as provided in any Direct Agreement.

**6.11.2.2** To the extent that any Contractor warranty or guaranty is voided after termination of this Agreement by reason of Principal Project Company's negligence or failure to comply with the requirements of the Contract Documents in incorporating material or equipment into the Project, Principal Project Company shall correct any Defects which would otherwise have been covered by such warranty.

**6.11.2.3** Contractor warranties are in addition to all rights and remedies available under the Contract Documents or applicable Law, and shall not limit Principal Project Company's liability or responsibility imposed by the Contract Documents or applicable Law with respect to the Work, including liability for design Defects, construction Defects, strict liability, breach, negligence, willful misconduct or fraud.

**6.11.2.4** Principal Project Company hereby assigns to City all warranties and guaranties under each Contract, as well as Principal Project Company's rights under the Contracts, effective as of the end of the Term.

### **6.11.3 Warranties for Utility Owners and Authorities Having Jurisdiction**

If required by the Utility Owner or Authority Having Jurisdiction, as applicable, Principal Project Company shall provide, or obtain and ensure performance under as if Principal Project Company provided, warranties and guaranties, for all Work performed for Utility Owners and Authorities Having Jurisdiction, for two years after the date of acceptance of such work by the Utility Owner or Authority Having Jurisdiction, as applicable or such longer term as provided in any agreement with the Utility Owner or Authority Having Jurisdiction, for the benefit (with rights of enforcement) of such Utility Owner or Authority Having Jurisdiction. City shall have, and shall

be identified as a third party beneficiary of the right to enforce, all such warranties and guaranties of such work. Upon acceptance of such work by the Utility Owner or Authority Having Jurisdiction, as applicable, and delivery of an assignment of the relevant warranty and guaranty rights to the Principal Project Company shall be relieved of responsibility for maintenance of such work.

## **6.12 Maintain Good Standing**

**6.12.1** Principal Project Company shall remain qualified to do business in the State and remain in and maintain good standing and shall undertake all actions to do so, including continued timely submission of all required information and payments when due to the California Secretary of State, Franchise Tax Board, Internal Revenue Service, or any other applicable agency or entity. Principal Project Company shall immediately provide Notice to City if it is no longer duly qualified and in good standing.

**6.12.2** Principal Project Company shall ensure that each Key Contractor shall remain duly qualified to do business in the State and in good standing throughout the term of the Key Contract and immediately provide Notice to City if a Key Contractor is no longer duly qualified or in good standing.

---

## ARTICLE 7. DESIGN AND CONSTRUCTION

### 7.1 General Obligations of Principal Project Company Concerning D&C Work

#### 7.1.1 Principal Project Company shall:

- (a) expeditiously and diligently progress performance of the D&C Work to achieve Substantial Completion by the Substantial Completion Deadline;
- (b) carry out or do all things necessary to perform the D&C Work and design and construct the Infrastructure Facility in accordance with the Contract Documents and Good Industry Practice;
- (c) ensure the Infrastructure Facility meets the requirements of the Contract Documents, including that the Infrastructure Facility be constructed in compliance with the San Francisco Green Build Code (Chapter 7 (Green Building Requirements for City Buildings) of the San Francisco Environment Code) and achieve LEED Gold certification;
- (d) provide maintenance and other services as described in the Contract Documents;
- (e) ensure adequate materials, equipment and resources are available to ensure compliance with the requirements of the Contract Documents under normal conditions and reasonably anticipated abnormal conditions;
- (f) ensure all materials and equipment are of good quality and new unless otherwise expressly stated;
- (g) ensure, as of the Substantial Completion Date, the Construction Work shall be free of Defects, errors and omissions, except as may be set out in the Punch List (which shall be fully resolved as of Final Acceptance of the Infrastructure Facility);
- (h) ensure, as of the Substantial Completion Date, the Design Work meets each of the requirements set out in this Agreement;
- (i) ensure the Project Site is kept in a safe, secure, neat and clean condition at all times;
- (j) cooperate with City and Authorities Having Jurisdiction in all matters relating to the D&C Work, including their Oversight of D&C Work;
- (k) remove and replace Nonconforming Work and/or materials, whether discovered or rejected by City or Principal Project Company, or otherwise remedy such Nonconforming Work and/or materials in an acceptable manner and in accordance with the requirements of the Contract Documents; and

- (l) pay all direct and indirect costs for all Utility services required to perform and complete the D&C Work in accordance with the requirements of the Contract Documents.

## **7.2 Performance, Design and Construction Standards**

**7.2.1** Principal Project Company shall construct and equip the Infrastructure Facility in accordance with the Project's Release for Construction Documents, taking into account the Project Site limits and other constraints affecting the Project.

**7.2.2** The Project design and construction shall be subject to certification in accordance with the procedures contained in the approved PPC's Design Quality Plan and PPC's Construction Quality Plan.

**7.2.3** Principal Project Company shall use reasonable efforts to identify and provide Notice to City of any specifications or other provisions in the Technical Requirements that are erroneous, create a potentially Unsafe Condition, or may be inconsistent with Good Industry Practice or applicable Law. Such Notice must include a request for City approval of a Deviation or changes to the provision that Principal Project Company believes are necessary to render it correct, safe and consistent with Good Industry Practice and applicable Law. If Principal Project Company commences or continues any D&C Work affected by the change after the need for the change was known, or should have been known through the exercise of reasonable care, Principal Project Company shall bear any additional costs and time associated with redoing the D&C Work already performed.

**7.2.4** After Commercial Close, City may modify relevant provisions of the Technical Requirements to incorporate any changed, added or replaced Standards and Specifications applicable to the D&C Work by delivering a City Change to Principal Project Company.

## **7.3 Design Implementation**

Principal Project Company, through appropriately qualified professional engineers and architects registered and licensed in the State and identified in Principal Project Company's Project Management Plan, shall furnish designs, plans and specifications in accordance with the Contract Documents. Principal Project Company shall cause the architect(s) of record and/or Engineer(s) of Record for the Project to sign and seal all Final Design Documents.

## **7.4 Schedule, Deadlines, Notices to Proceed and Commencement of Work**

### **7.4.1 Project Schedule**

**7.4.1.1** Subject to occurrence of a Delay Event resulting in an extension of time in accordance with this Agreement, if any, Principal Project Company represents and warrants that, as of the Effective Date, its Project Schedule represents a practical schedule to complete performance of the Work through Final Acceptance and is consistent with applicable deadlines.

**7.4.1.2** Between the Effective Date and the earlier of NTP2 and approval of Principal Project Company's Project Schedule in accordance with Section 7.4.1.3, Principal Project Company shall perform the Work in accordance with the Initial Schedule.

**7.4.1.3** Principal Project Company shall submit to City, for City review and approval, a proposed detailed Project Schedule in accordance with Section 1.2 of Division 1 of the Technical Requirements and Exhibit 11 (Submittal Review Process).

**7.4.1.4** Upon City's approval, the detailed Project Schedule becomes the Project Schedule and Principal Project Company shall perform the remaining Work in accordance with such Project Schedule.

**7.4.1.5** The Parties shall use the Project Schedule for planning and monitoring the progress of the D&C Work. The Project Schedule shall include the deadlines for Substantial Completion and Final Acceptance of the Infrastructure Facility.

**7.4.1.6** Principal Project Company shall not be limited in the sequencing or staging of the D&C Work, except to the extent that the Contract Documents or applicable Law imposes limitations.

**7.4.1.7** Principal Project Company acknowledges and agrees that the Contract Deadlines provide reasonable and adequate time to perform the Work required within the Contract Deadlines, subject only to Principal Project Company's rights to obtain time extensions under Article 14 (Compensation and Other Relief for Delay Events and Relief Events).

## **7.4.2 Float**

**7.4.2.1** All Float contained in the Project Schedule, or as generated during the course of the Work, shall be a project resource and available to both City and Principal Project Company, and shall not be considered as time for exclusive use or benefit of either City or Principal Project Company. Principal Project Company shall cause each Prime Contractor to acknowledge Float to be available to City as well as Principal Project Company as needed to absorb delay caused by Delay Events or other events, achieve interim completion dates and achieve Contract Deadlines.

**7.4.2.2** All Float shall be identified as such in the Project Schedule on each affected schedule path. City shall have the right to examine the identification of (or failure to identify) Float on the Project Schedule in determining whether to approve the Project Schedule. Once identified, Principal Project Company shall monitor, account for and maintain Float in accordance with critical path methodology.

## **7.4.3 Commencement of Non-Construction Work**

Except as provided in Section 7.4.6 (Work Before NTP 1), Principal Project Company shall not commence any Work until City has issued NTP 1 authorizing commencement of non-Construction Work. City shall promptly issue NTP 1 when all of the conditions set forth in Exhibit 15A (Conditions to NTP 1 - Commencement of Non-Construction Work) have been satisfied.

## **7.4.4 Commencement of Construction Work**

Principal Project Company shall not commence any portion of the Construction Work until City has issued NTP 2 authorizing commencement of the applicable portion of Construction Work.

City shall promptly issue NTP 2 when all of the conditions set forth in Exhibit 15B (Conditions to NTP 2 - Commencement of Construction Work) have been satisfied.

**7.4.5** References in the Technical Requirements to Standards and Specifications relating to the D&C Work shall mean the most recent editions in effect as of the Setting Date, unless expressly provided otherwise.

#### **7.4.6 Work Before NTP 1**

**7.4.6.1** Except as provided in Section 7.4.6.2 and as may be provided pursuant to any Early Works Agreement between Principal Project Company and City, Principal Project Company shall not perform any Work prior to NTP 1.

**7.4.6.2** Before NTP 1, Principal Project Company shall perform all Work required to achieve Financial Close, and otherwise undertake all efforts to satisfy the conditions set forth in Exhibit 15A (Conditions to NTP 1 - Commencement of Non-Construction Work). If Financial Close fails to occur, City shall have no obligation to reimburse Principal Project Company for any of its costs incurred relating to this Agreement, other than payments allowed under Section 3.6 (No-Fault Termination).

### **7.5 Acquisition of Real Property**

#### **7.5.1 Additional Acquisitions**

**7.5.1.1** If Principal Project Company identifies any property that is not subject to Section 7.5.1.2 but that Principal Project Company seeks to add to the Project Site to accommodate Principal Project Company's particular design or for Principal Project Company's convenience in performing the Work, then Principal Project Company may submit to City a request for acquisition of additional property interests and related documentation as reasonably requested by City. In such event, Principal Project Company shall prepare and submit to City for review and approval new or revised surveys, legal descriptions, a preliminary title report and a copy of all encumbrances of record, draft site plats, design and other appropriate documentation of basis of acquisition and justification of acquisition. Principal Project Company's request shall include an analysis identifying alternative approaches that could be adopted to avoid the need for the acquisition, including use of retaining walls and other design modifications. Following delivery of a request under this Section 7.5.1.1:

- (a) City will review the request and supporting documentation and will determine whether the proposed acquisition appears to be appropriate for the Project, whether any additional information or documentation is necessary for the acquisition, and the anticipated schedule for the acquisition;
- (b) upon agreement between City and Principal Project Company regarding the acquisition of any additional property, Principal Project Company shall support the acquisition as requested by City; and
- (c) prior to acquisition of any additional property interests under this Section 7.5 (Acquisition of Real Property), Principal Project Company shall provide to City any additional documentation required by City for the acquisition.

**7.5.1.2** If City chooses to acquire property proposed for acquisition by Principal Project Company pursuant to Section 7.5.2.1 (“**Additional Properties**”), City will proceed with the acquisition, subject to this Section 7.5 (Acquisition of Real Property). In all situations, City has no obligation to acquire any Additional Property.

**7.5.1.3** Principal Project Company shall be responsible for the cost to acquire Additional Properties, together with all costs and expenses incurred by City in connection with acquiring Additional Properties. In paying all such costs and expenses, Principal Project Company is not acquiring, and shall not be deemed to be acquiring, any interest in real property for Principal Project Company. Such costs and expenses shall include:

- (a) the cost of acquisition services, relocation services and associated document preparation costs;
- (b) the cost of relocation assistance in accordance with applicable Law;
- (c) the cost of condemnation proceedings, including attorneys’ and expert witness fees, and all fees and expenses for production of exhibits, transcripts, photos and other documents and materials;
- (d) the acquisition price of the Additional Properties and associated appraisals, costs, settlements, offers of judgment, court awards or judgments, including pre-judgment and post-judgment interest, costs, attorney’s fees, claims for loss of business goodwill and any other consideration for the Additional Properties;
- (e) the cost of permanent or temporary acquisition of leases, easements, rights of entry, licenses and other interests in real property, including for drainage, temporary work space, Temporary Areas, and any other convenience of Principal Project Company;
- (f) the cost of permitting; and
- (g) closing costs in accordance with City policies.

**7.5.1.4** City will submit statements to Principal Project Company regarding Recoverable Costs relating to acquisition of Additional Properties, not more often than monthly. Principal Project Company shall reimburse City for Recoverable Costs within 30 days of receipt of an invoice. In addition to any other remedy, City shall have the right to curtail or suspend acquisition activities if Principal Project Company for any reason fails to pay any such invoice in full when due. City will resume acquisition activities promptly after delinquent amounts are paid in full with interest.

**7.5.1.5** Principal Project Company shall bear all risk of delays related to acquisition of Additional Properties and the risk that an Additional Property is not able to be acquired. Each Additional Property shall become part of the Project Site only upon City’s written Notice to Principal Project Company indicating that the Additional Property has been acquired and that City grants Principal Project Company access to the Additional Property.

**7.5.1.6** Principal Project Company shall not be entitled to any compensation or any extension of any Contract Deadline under the Contract Documents or otherwise entitled to make a Claim as a result of (i) site conditions associated with any Additional Properties (including those relating to Hazardous Materials, differing site conditions, or Utilities)

## **7.5.2 Temporary Interests in Property**

**7.5.2.1** Principal Project Company shall be solely responsible for acquisition of any temporary interests in property that Principal Project Company determines is necessary, desirable or advisable to obtain in connection with the Project or the Work. Principal Project Company shall pay directly the cost to acquire, maintain, operate, and/or dispose of all such property interests. If the property is within the limits of any real property scheduled for acquisition by City or is intended to be used for permanent improvements, or if Principal Project Company intends to request City to acquire such real property, Principal Project Company shall coordinate with City and shall not negotiate with the owner(s) of such interests except with express permission of City and in compliance with applicable Law.

**7.5.2.2** City shall have no obligation to acquire temporary interests in property. Principal Project Company shall solely bear the risk of any delays and cost impacts related to acquisition of temporary interests, regardless of whether City agrees to undertake any such acquisition.

**7.5.2.3** Principal Project Company shall promptly provide Notice to City regarding all temporary interests in property that it or any of its Contractors acquires in the vicinity of the Project.

## **7.5.3 Property Acquisitions and Scheduling Work**

**7.5.3.1** Principal Project Company's Project Schedule shall not provide for any Work to be done on any Additional Properties acquired or to be acquired in accordance with Section 7.5.1 (Additional Acquisitions) until after City has granted Principal Project Company access to the Additional Property in writing.

**7.5.3.2** Concurrently with the initial review of the Project Schedule, Principal Project Company and City shall meet to discuss:

- (a) Principal Project Company's access requirements associated with planned activities and the extent to which delay in access to property identified for acquisition under Section 7.5.1 (Additional Acquisitions) is likely to affect a Critical Path;
- (b) what efforts (if any) could reasonably be undertaken by the Parties to accelerate acquisition of any critical real property interests;
- (c) whether schedule delays may be avoided by providing access to property subject to conditions or restrictions;
- (d) whether any changes should be made to the Project Schedule; and

- (e) whether anticipated covenants, conditions and restrictions affecting access will affect Principal Project Company's ability to perform Work as scheduled, and how to mitigate any such problems.

**7.5.3.3** Principal Project Company shall coordinate with City regarding:

- (a) completion of Project design and identification of final site requirements and construction impacts;
- (b) any adjustments to the Project Schedule necessary to reflect City's expected timeline to acquire any property identified for acquisition under Section 7.5.1 (Additional Acquisitions); and
- (c) any design features that may impact properties for which no property acquisition is contemplated, with the goal of avoiding damages to properties not previously identified and addressed.

**7.6 Utilities, Utility Adjustments and Utility Delay**

**7.6.1 Utilities to Serve Facility**

**7.6.1.1** Principal Project Company shall be solely responsible for obtaining and implementing all new Utility services needed for the Infrastructure Facility, and must timely submit the appropriate applications to obtain electricity, water, sewer, cable, etc. This work expressly includes obtaining electricity and power from PG&E for the Project, including all applications and coordination required to obtain such Utility services.

**7.6.1.2** City shall, from time to time as required, enter into contracts with Energy suppliers for the supply of Energy to the Infrastructure Facility and shall be responsible for all payments due pursuant to such supply contracts. For avoidance of doubt, the Infrastructure Facility's electricity, natural gas, water, and other such Utility bills will be sent to City and City will be responsible for paying such utility bills. Principal Project Company will be provided with copies of the invoices.

**7.6.2 Principal Project Company's General Responsibilities**

**7.6.2.1** Principal Project Company shall be responsible for all Utility Adjustments required by the Project.

**7.6.2.2** City agrees to cooperate as reasonably requested by Principal Project Company in advancing Utility Adjustments, including attendance at negotiation sessions and review with Utility Owners. Principal Project Company shall timely keep City informed of the status of any such negotiations.

**7.6.2.3** Principal Project Company shall bear the sole risk, cost and schedule impact of Utility Adjustments other than, subject to Articles 13 (General Provisions Applying to Delay Events and Relief Events) and 14 (Compensation and Other Relief for Delay Events and Relief Events), as a direct result of a City Change or Relief Event.

### **7.6.3 Avoiding Utility Adjustments and Minimizing Costs**

**7.6.3.1** Principal Project Company shall minimize Utility Adjustments in the design and construction of the Infrastructure Facility and costs for which Principal Project Company may be entitled to additional compensation pursuant to the Contract Documents, including by taking into account existing Utilities (and their location) in its design and working around existing Utilities (including existing PG&E poles at or adjacent to the Project Site), including through its construction sequencing, means and methods. If a Utility Adjustment could have been avoided through Principal Project Company undertaking a Reasonable Investigation prior to the Setting Date, Principal Project Company shall bear the full risk and liability associated with such Utility Adjustment, irrespective of any other provisions in this Agreement that might provide compensation, time or other relief in connection with such Utility Adjustment.

**7.6.3.2** Principal Project Company shall reimburse City for any costs City incurs as a result of Principal Project Company's failure to comply with the requirements of this Section 7.6.3 (Avoiding Utility Adjustments and Minimizing Costs).

### **7.6.4 Allocation of Work Responsibility**

**7.6.4.1** The allocation of responsibility for performing Utility Adjustment design, construction, and/or materials procurement for each Utility Adjustment as between Principal Project Company and the Utility Owner shall be determined in accordance with Section 1.13 of Division 1 of the Technical Requirements (including pursuant to the Utility Coordination Work Plan and Utility Project Execution Plan). For purposes of this Section 7.6 (Utilities, Utility Adjustments and Utility Delay) and Section 1.13 of Division 1 of the Technical Requirements, references to responsibility for performing Utility Adjustment design and construction include all tasks customarily associated therewith; provided, however, that Principal Project Company shall be responsible for all coordination with Utility Owners that is necessary in order to accomplish the Utility Adjustments in compliance with the requirements of the Contract Documents.

**7.6.4.2** Principal Project Company is responsible for scheduling all Utility Adjustments so as allow for the issuance of NTP 2 as soon as practicable and to meet all applicable Contract Deadlines, without regard to whether a Utility Adjustment is performed by Principal Project Company or by the affected Utility Owner (or its contractors). Accordingly, under no circumstances shall any reallocation of responsibility for Utility Work between Principal Project Company and a Utility Owner be considered grounds for a time extension hereunder.

**7.6.4.3** No increase or decrease in compensation payable to Principal Project Company shall be made pursuant to this Section 7.6.4 (Allocation of Work Responsibility) on account of any change in the allocation of responsibility for Incidental Utility Work, or any other matter for which the Contract Documents specify how liability, cost or risk is to be allocated between City and Principal Project Company.

### **7.6.5 Utility Adjustment Costs**

**7.6.5.1** Principal Project Company is responsible for all costs of the Utility Work, including costs of acquiring Utility easements and costs with respect to relinquishment or acquisition of Utility Owner property interests, but excluding (a) costs attributable to Utility Betterments, for which the Utility Owner is responsible and which are not paid to Utility Owner by City; and (b)

any other costs for which the Utility Owner is responsible under Law which are not paid to Utility Owner by City. Principal Project Company shall fulfill this responsibility either by performing the Utility Work at its own cost, if permitted by the Utility Owner, or by reimbursing the Utility Owner for the Utility Owner's performance of the Utility Work, in accordance with Section 7.6.5.4. Principal Project Company shall bear the costs due to the Utility Owner and all costs and expenses associated therewith, including the costs of Utility Owner inspections and any overtime charges incurred by the Utility Owner. Principal Project Company is solely responsible for collecting directly from the Utility Owner any amount due to Principal Project Company for Utility Betterment costs or other costs incurred by Principal Project Company for which the Utility Owner is responsible, whether under Law or otherwise.

**7.6.5.2** If for any reason Principal Project Company is unable to collect any amounts due to Principal Project Company from any Utility Owner, then as between City and Principal Project Company, (a) City shall have no liability for such amounts, (b) Principal Project Company shall have no right to collect such amounts from City or to offset such amounts against amounts otherwise owing from Principal Project Company to City, and (c) Principal Project Company shall have no right to stop Work, sue for *mandamus*, demand or plead in any court for City's participation in resolution of any dispute with the Utility Owner, or seek to exercise any other remedies against City on account of the Utility Owner's failure to pay.

**7.6.5.3** Principal Project Company shall maintain a complete set of records for the costs of Utility Work performed (whether incurred by Principal Project Company or by the Utility Owner), in a format reasonably satisfactory to City and in sufficient detail for analysis. For both Utility Owner costs and Principal Project Company costs, the totals for each cost category shall be shown in such manner as to permit comparison with the categories stated on the estimate. Principal Project Company. All records with respect to Utility Work shall comply with the record keeping and audit requirements of the Contract Documents.

**7.6.5.4** To the extent that City is required to initially pay a Utility Owner for any costs related to Utility Owner's performance of Utility Work under this Section 7.6.5 (Utility Adjustment Costs), Principal Project Company, on a monthly basis, shall reimburse City for any costs incurred in connection with such Utility Work. The amounts reimbursed shall be due and payable within 10 days after receipt of City's invoice for such Utility Work. City, in its sole discretion, may also deduct the amount to be reimbursed from any payment due and payable to Principal Project Company should Principal Project Company fail to reimburse City for such Utility Work.

## **7.6.6 Incidental Utility Work**

Notwithstanding any contrary provision of the Contract Documents, Principal Project Company shall be responsible for all Incidental Utility Work without regard to the allocation of Work responsibility otherwise established pursuant to this Section 7.6 (Utilities, Utility Adjustments and Utility Delay). Without limiting the provision of Section 7.6.2.3, Principal Project Company also shall be responsible for furnishing all designs for Incidental Utility Work that Principal Project Company performs, unless such designs are included among that portion of the Utility Work to be performed by the Utility Owner. Principal Project Company shall not be entitled to any adjustment in its compensation or Contract Deadlines on account of costs incurred, cost savings or delays associated with the performance of Incidental Utility Work by Principal Project Company or by any Utility Owner.

## **7.6.7 Bonds and Insurance; Security for Utility Adjustment Costs**

**7.6.7.1** All Utility Work shall automatically be covered by the Payment Bonds and Performance Bonds described in Section 10.2 (Performance Security) and by the insurance described in Section 10.1 (Insurance).

**7.6.7.2** Principal Project Company shall satisfy all requirements of Utility Owners to provide security for reimbursement of Utility Adjustment costs to which the Utility Owner is entitled and that are the responsibility of Principal Project Company hereunder.

## **7.6.8 Utility Investigation by Principal Project Company**

**7.6.8.1** During the PDA Term, Principal Project Company has undertaken an investigation of Utilities affecting the Project Site, including Utilities located on, in, under, around or impacting the Project Site and the Project. Principal Project Company represents and warrants that it has analyzed Reference Documents, diligently commenced coordination concerning Utility Adjustments (including submitting and actively pursuing relocation applications to Utility Owners with respect to impacted Utilities, taking into account the Project Schedule), contacted and made inquiries of Utility Owners, performed substantial surface inspections of the Project Site and undertaken such additional inspections, including substantial subsurface utility investigations, as it deems appropriate and as are required by the Contract Documents and in keeping with Good Industry Practice to verify, fully and accurately identify all Utilities (including contacting and accessing Non-Dig Alert Utilities), addressing all field conditions, and validating the Utility Information. Principal Project Company acknowledges that its rights to any compensation, time or other relief in connection with Utilities, Unidentified Utilities, Utility Adjustments and Utility Delay is conditioned on the accuracy of the foregoing representations and warranties.

**7.6.8.2** Except as otherwise provided in Sections 7.6.9 (Claims for Inaccuracies in Utility Information) and 7.6.13 (Utility Delays), the Parties specifically intend by Section 7.6 (Utilities, Utility Adjustments and Utility Delay) to delegate to Principal Project Company the obligation to perform all responsibilities with respect to identification of all Utilities and to allocate to Principal Project Company all risk of increased costs and time of the Utility Work resulting from inaccuracies in the reputed locations of such facilities (and in any other relevant information with respect to such facilities).

## **7.6.9 Claims for Inaccuracies in Utility Information**

**7.6.9.1** If during performance of Construction Work, Principal Project Company encounters any Non-Dig Alert Utilities located at the Project Site that requires a Utility Adjustment, and such Utility is (i) an Unidentified Utility; (ii) not a Service Line; and (iii) not identified or reflected in whole or in part in the Utility Information, then, subject to the provisions of Articles 13 (General Provisions Applying to Delay Events and Relief Events) and 14 (Compensation and Other Relief for Delay Events and Relief Events), Principal Project Company shall be entitled to a Change Order to compensate Principal Project Company for any material increase in Principal Project Company's actual direct costs of performing the Utility Work that is directly attributable to undertaking the Utility Adjustment of the Non-Dig Alert Utility. The amount of such Change Order shall be determined in accordance with Article 14 (Compensation and Other Relief for Delay Events and Relief Events).

---

**7.6.9.2** Principal Project Company shall not be entitled to any compensation pursuant to this Section 7.6.9 (Claims for Inaccuracies in Utility Information) or otherwise for any of the following:

- (a) Increased costs of the Work attributable to Unidentified Utilities and Non-Dig Alert Utilities, to the extent that the existence of the facility was known to Principal Project Company as of the Setting Date or could have been inferred from a Reasonable Investigation or otherwise from the presence of other facilities, such as buildings, meters, junction boxes, manholes or identifying markers, visible during a surface inspection of the area conducted prior to the Effective Date;
- (b) Increased costs of the Work attributable to Unidentified Utilities and Non-Dig Alert Utilities where Principal Project Company failed to provide timely Notice in accordance with Articles 13 (General Provisions Applying to Delay Events and Relief Events) and 14 (Compensation and Other Relief for Delay Events and Relief Events);
- (c) Increased costs of the Work attributable to Unidentified Utilities and Non-Dig Alert Utilities that can be Protected in Place or removed rather than physically relocated;
- (d) Any additional costs incurred by Utility Owners (that are not reimbursable or payable to the Utility Owner) as a result of the Unidentified Utility;
- (e) Increased costs of the Utility Work attributable to all other Utilities that are not Unidentified Utilities or Non-Dig Alert Utilities; and
- (f) Delay and disruption damages, except as specifically set forth in the Contract Documents.

### **7.6.10 Changes in Design**

**7.6.10.1** For purposes of this Section 7.6.10 (Changes in Design), a Project design change impacting Utility Adjustments is a change that (a) requires a Utility Adjustment that was not listed in the Utility Information; or (b) necessitates acquisition of a Utility Easement not included in the real property rights comprising the Project Site.

**7.6.10.2** Inasmuch as Principal Project Company is both furnishing the design of and constructing the Project, Principal Project Company may have opportunities to reduce the costs of certain portions of the Work, which may increase the costs of certain other portions of the Work or of Utility Work to be performed by Utility Owners. In considering such opportunities, Principal Project Company shall consider the impact of Project design changes on Utility Adjustments with the overall goal of minimizing the necessity for Utility Adjustments to the extent practical, in compliance with Section 7.6.3 (Avoiding Utility Adjustments and Minimizing Costs). Accordingly, except for cost increases or decreases resulting from City Changes in Project design affecting Utility Work, and notwithstanding any other contrary provision of the Contract Documents, the following rules shall apply with respect to Project design changes during the course of the Project which either reduce the nature or extent of or eliminate any Utility Adjustment, or result in unanticipated Utility Adjustments or an increase in the nature, extent, or costs of anticipated Utility Adjustments:

- (a) Principal Project Company shall not be entitled to extension of any Contract Deadline on account of delays resulting from any such design changes (including delays in acquisition of Utility Easements by City or Utility Owners);
- (b) Principal Project Company shall not be entitled to any increase in compensation for any additional costs which Principal Project Company incurs as a result of such design changes (including additional costs of Utility Work, the costs of any additional Work on other aspects of the Project undertaken in order to facilitate the avoidance or minimization of Utility Adjustments, and/or increased costs resulting from any Project Site conditions associated with Utility Easements made necessary by such design changes); and
- (c) If City incurs any additional costs as a result of such design changes (including any increases in amounts owed by City to Utility Owners, e.g., for work which is unusable or which must be redone), then Principal Project Company shall reimburse City for such costs within 10 days after receipt of City's invoice therefor, or in the sole discretion of City, City may deduct the amount of reimbursement due from any payment due and payable to Principal Project Company under the Contract Documents should Principal Project Company fail to reimburse City for such costs.

This Section 7.6.10 (Changes in Design) shall not apply to any changes in design made to accommodate any Change in Law.

#### **7.6.11 Utility Betterments**

Principal Project Company shall be responsible for addressing any requests by Utility Owners that Principal Project Company design and/or construct a Utility Betterment. Notwithstanding any other provision of this Section 7.6 (Utilities, Utility Adjustments and Utility Delay), no Work, Utility Adjustments or other Utility-related items initially included in the Work shall be considered a Utility Betterment. Any Utility Betterment performed as part of a Utility Adjustment, whether by Principal Project Company or by the Utility Owner, shall be subject to the same standards and requirements as if it were a necessary Utility Adjustment. Under no circumstances shall Principal Project Company proceed with any Utility Betterment that is incompatible with the Project or is not in compliance with applicable Law, the Regulatory Approvals or the Contract Documents, including the Contract Deadlines. Under no circumstances will Principal Project Company be entitled to any additional compensation or time extension under the Contract Documents as the result of any Utility Betterment, whether performed by Principal Project Company or by the Utility Owner. Principal Project Company shall provide City with such information, analyses, and certificates as City may request in order to determine compliance with this Section 7.6.11 (Utility Betterments).

#### **7.6.12 Failure of Utility Owners to Cooperate**

**7.6.12.1** Principal Project Company shall make diligent efforts to obtain the cooperation of each Utility Owner as necessary for the Project. Principal Project Company is responsible for verifying the progress of each Utility Owner's work. Principal Project Company shall provide Notice to City within five days after the occurrence of any of the following: (a) Principal Project Company reasonably believes for any reason that any Utility Owner would not undertake or

permit Utility Work in a manner consistent with the timely completion of the Project or in accordance with Law, the Regulatory Approvals or the Contract Documents, (b) Principal Project Company becomes aware that any Utility Owner is not cooperating in a timely manner to provide agreed-upon work or approvals in accordance with the Contract Documents, or (c) any other dispute arises between Principal Project Company and a Utility Owner with respect to the Project, despite Principal Project Company's diligent efforts to obtain such Utility Owner's cooperation or otherwise resolve such dispute. Such Notice may include a request that City assist in resolving the dispute or in otherwise obtaining the Utility Owner's timely cooperation. Principal Project Company shall provide City with such information as City reasonably requests regarding the Utility Owner's failure to cooperate and the effect of any resulting delay on the Project Schedule. After delivering Notice to City, Principal Project Company shall continue to use diligent efforts to pursue the Utility Owner's cooperation.

**7.6.12.2** If Principal Project Company requests assistance of City pursuant to Section 7.6.12.1, the following provisions apply:

- (a) Principal Project Company shall provide evidence satisfactory to City, in its good faith determination, that (i) the subject Utility Work is necessary, (ii) the time for completion of the Utility Adjustment in the Project Schedule (including any Major Utility Adjustment Deadline) was, in its inception, a reasonable amount of time for completion of such work, (iii) Principal Project Company has made, and continues to make, diligent efforts to obtain the Utility Owner's cooperation and commenced coordination at the earliest time, including during the PDA Term (including submitting and actively pursuing Utility Adjustment applications to Utility Owners with respect to impacted Utilities, taking into account the Project Schedule), (iv) the representation and warranty set forth in Section 7.6.8.1 was true and accurate as of the Effective Date; and (v) the Utility Owner is not cooperating (clauses (a)(i) through (v) above are referred to herein as the "Conditions to Assistance").
- (b) Following receipt by City of satisfactory evidence, City shall take such reasonable steps as City may reasonably determine to obtain the cooperation of the Utility Owner or resolve the dispute; provided, however, City shall have no obligation to prosecute eminent domain or other legal proceedings, or to exercise any other legal remedy available to it under Law or existing contract, unless City elects to do so in its sole discretion. City may, at its sole discretion, participate in the resolution of any dispute between Principal Project Company and a Utility Owner, whether or not requested to do so by Principal Project Company.
- (c) Without limiting City's obligations under clause (b) above, if City holds contractual rights that might be used to enforce the Utility Owner's obligation to cooperate, City shall have the right not to exercise those rights. The decision not to exercise those rights shall be in the sole discretion of City.

**7.6.12.3** Any assistance provided by City shall not relieve Principal Project Company of its sole and primary responsibility for the satisfactory compliance with its obligations under the Contract Documents and its obligations with respect to timely completion of all necessary Utility Adjustments.

---

### 7.6.13 Utility Delays

7.6.13.1 Except as set forth in clause (b), below, the term “Utility Delay” shall mean:

- (a) Any unreasonable and unjustified delay by a Utility Owner in connection with a Utility Adjustment relating to an Unidentified Utility beyond the date set forth in the approved Project Schedule (including any update to the Project Schedule submitted and approved following identification of the Unidentified Utility) following receipt by City of proper Notice pursuant to Section 7.6.12.1, provided that all of the “Conditions to Assistance” described in Section 7.6.12.2 have been satisfied.
- (b) Any Major Utility Adjustment Delay following receipt by City of proper Notice pursuant to Section 7.6.12.1, provided that all of the “Conditions to Assistance” described in Section 7.6.12.2 have been satisfied.
- (c) Notwithstanding the foregoing, the term "Utility Delay" does not include and is not intended to address (i) City Changes relating to Utilities, the impact of which will be addressed in the Change Order, (ii) any Utility Adjustments other than (x) Major Utility Adjustments beyond the Major Utility Adjustment Deadline or (y) as a direct result of a City Change, Unidentified Utility or Unavoidable Delay Event (excluding Utility Delay); (iii) additional work associated with a Project design change as described in Section 7.6.10 (Changes in Design); (iv) any event described in this Section 7.6.13.1 which results from or arises out of the actions or omissions of any PPC-Related Entity or any PPC Fault; or (v) any delay or impact relating to or arising out of the failure by any PPC-Related Entity to undertake the coordination activities with Utilities contemplated by the Predevelopment Agreement or based on the results of a Reasonable Investigation (even if such delay otherwise would have been considered Utility Delay but for such failure). Principal Project Company shall not rely upon any proposed schedules, durations or deadlines, if any, included in the Reference Documents with respect to Utility Adjustments, and Principal Project Company may not base any Claims for a time extension or additional compensation upon such proposed schedules, durations, and deadlines. ***[As noted in the definitions of Major Utility Adjustment/Major Utility Adjustment Deadline/Major Utility Adjustment Delay, City will consider deletion of (v) if and when PNC has engaged with utilities and developed a list of Major Utility Adjustments and durations which City has approved]***

7.6.13.2 Subject to the limitations and restrictions in this Section 7.6.13 (Utility Delays) and Articles 13 (General Provisions Applying to Delay Events and Relief Events) and 14 (Compensation and Other Relief for Delay Events and Relief Events), any Contract Deadline(s) affected by a Utility Delay shall be extended in accordance with, and subject to, Section 14.1.3. Furthermore, if two Utility Delays occur that are concurrent with each other but are not concurrent with any other delay, then the period of concurrent delay shall be considered a Utility Delay but shall only be counted once for purposes of any time extension.

7.6.13.3 Principal Project Company shall not be entitled to extension of any Contract Deadline or other relief for a Utility Delay pursuant to Section 7.6.13.2 or otherwise unless all of the following conditions are satisfied (in addition to satisfaction of any conditions specified in Section 7.16.13.1):

- 
- (a) The Utility Adjustment is solely associated with an Unidentified Utility or a Major Utility Adjustment Delay;
  - (b) Principal Project Company has timely satisfied the “Conditions to Assistance” requirements described in Section 7.6.12.2;
  - (c) If applicable, Principal Project Company has provided a reasonable Utility Adjustment plan to the Utility Owner that has been approved by City;
  - (d) Principal Project Company has provided evidence satisfactory to City that (i) Principal Project Company took advantage of Float available early in the Project Schedule for coordination activities with respect to the Utility(ies) to which such Utility Delay relates, (ii) Principal Project Company has fulfilled its obligation to coordinate with the Utility Owner to prevent or reduce such delays, and (iii) Principal Project Company has otherwise made diligent efforts to obtain timely performance by the Utility Owner but has been unable to obtain such timely performance;
  - (e) There exist no circumstances which have delayed or are delaying the affected Utility Adjustment(s), other than those that fit within the definition of a Utility Delay; and
  - (f) The delay is otherwise allowable under Articles 13 (General Provisions Applying to Delay Events and Relief Events) and 14 (Compensation and Other Relief for Delay Events and Relief Events).

**7.6.13.4** Principal Project Company shall not be entitled to any Extra Work Costs, Delay Costs or for any other increased costs or Claims attributable to delays described in this Section 7.6.13 (Utility Delays).

#### **7.6.14 Utility-Related Claims; Additional Restrictions on Change Orders Relating to Utility Adjustments**

In addition to all of the other requirements and limitations contained in this Section 7.6 (Utilities, Utility Adjustments and Utility Delay), and Articles 13 (General Provisions Applying to Delay Events and Relief Events) and 14 (Compensation and Other Relief for Delay Events and Relief Events), Principal Project Company’s entitlement to any relief relating to Utility Adjustments shall be subject to the restrictions and limitations set forth in this Section 7.6.14 (Utility-Related Claims; Additional Restrictions on Change Orders Relating to Utility Adjustments).

**7.6.14.1** Principal Project Company shall provide documentation satisfactory to City showing that the required analysis was performed and an appropriate determination made regarding the need for the Utility Adjustment, and shall also bear the burden of proving that the amount of any additional costs and/or time incurred by Principal Project Company are both necessary and reasonable.

**7.6.14.2** To the extent compensation is permitted under this Section 7.6 (Utilities, Utility Adjustments and Utility Delay), any relief increasing compensation to Principal Project Company pursuant to this Section 7.6 (Utilities, Utility Adjustments and Utility Delay) shall include only the incremental costs arising from the circumstances giving rise to such relief, i.e., the amount

payable shall take into account the costs that would have been incurred absent such circumstances and a credit shall be allowed for any avoided costs.

**7.6.14.3** Principal Project Company shall not be entitled to any increase in compensation for any costs of coordinating with Utility Owners.

### **7.6.15 FTA Requirements**

The Project is funded in part with funds made available by the Federal Transit Administration. In carrying out the Utility Adjustments, Principal project Company shall comply with all Laws as necessary for Utility Adjustments to be eligible for reimbursement from such funding.

## **7.7 Hazardous Materials Management; Risk Allocation**

### **7.7.1 Hazardous Materials Management**

**7.7.1.1** Except as otherwise provided in this Section 7.7.1 (Hazardous Materials Management), Principal Project Company shall, as part of the Work, perform, or cause to be performed, all Hazardous Materials Management required in connection with the Project in accordance with applicable Law, Regulatory Approvals, the approved Environmental Protection Program, and all applicable provisions of the Contract Documents.

**7.7.1.2** Principal Project Company shall have the following duties to identify, avoid, minimize and mitigate adverse monetary and non-monetary impacts to the Project and to City relating to Hazardous Materials:

- (a) Principal Project Company shall adopt design and construction techniques for the Project, using Good Industry Practice, that avoid, to the extent reasonably practicable, the need for Hazardous Materials Management;
- (b) when performing Hazardous Materials Management, Principal Project Company shall use Good Industry Practice, including design modifications and construction techniques, to minimize costs (including long-term costs) of Hazardous Materials Management; and
- (c) Principal Project Company shall use appropriately trained personnel to conduct Hazardous Materials Management activities.

**7.7.1.3** Principal Project Company shall promptly provide Notice to City of any Hazardous Materials encountered in connection with the Project, the Project Site or the Work that require (a) reporting or Notice to any Governmental Entity and/or (b) taking any response action (e.g., evaluating and addressing the circumstances and location of the Hazardous Materials) under applicable Law, Regulatory Approvals, the approved Environmental Protection Program and the Contract Documents, as applicable. A Notice provided under this Section 7.7.1.3 shall advise City of any obligation to provide Notice to Governmental Entities under applicable Law. Principal Project Company shall make all such reports, or deliver all such Notices, to any Governmental Entity with respect to Hazardous Materials encountered in connection with the Project, the Project Site or the Work, providing concurrent Notice and copies of such reports and Notices to City.

---

#### 7.7.1.4 Procedures and Compensation for Hazardous Materials Management

- (a) Principal Project Company shall manage, treat, handle, store, remediate, remove, transport (where applicable), document and dispose of all Hazardous Materials and perform all other aspects of Hazardous Materials Management as appropriate, in accordance with applicable Law, Regulatory Approvals, the approved plans required to be provided under Section 01 35 44 of Division 10 of the Technical Requirements, and this Agreement.
- (b) Principal Project Company is prohibited from starting Hazardous Material removal Work without a City-approved Hazardous Materials Submittal as described in Section 02 80 13 of Division 10 of the Technical Requirements. Principal Project Company shall not conduct any sampling or analysis of suspected building materials without prior permission from the City. The time utilized and costs incurred by Principal Project Company to undertake and obtain City approval of such Hazardous Materials Submittals shall not be eligible for relief, time extension or compensation under this Agreement.
- (c) Except where Principal Project Company is required to take immediate action under the Contract Documents or applicable Law, Principal Project Company shall afford City the opportunity to inspect sites containing Hazardous Materials and to consult with Principal Project Company about the recommended approach before any Hazardous Materials Management or other action is taken which would inhibit City's ability to ascertain the nature and extent of the contamination.
- (d) Where management, treatment, handling, storage, remediation, transport, documentation or disposing of Hazardous Materials constitutes a Hazardous Materials Event, Section 14.1.5 (Additional Limits Relating to Hazardous Materials Event During D&C Period) and Section 14.2.5 (Additional Limits Relating to Hazardous Materials Event During IFM Period) shall apply regarding Principal Project Company's rights to potential compensation and extension of any Contract Deadline.

**7.7.1.5** If Principal Project Company fails to undertake the Hazardous Materials Management required under this Section 7.7.1 (Hazardous Materials Management) within a reasonable time after discovery of Hazardous Materials, taking into consideration the nature and extent of the contamination and action required and the potential impact upon Principal Project Company's schedule for use of and operations on the Project Site, City may provide Notice to Principal Project Company that City will undertake the Hazardous Materials Management. If Principal Project Company fails to remedy the failure within 3 Business Days following provision of a Notice under this Section 7.7.1.5:

- (a) City may itself undertake Hazardous Materials Management actions or procure a contractor to perform such work, in which case City will do so in accordance with all applicable Environmental Laws;
- (b) Principal Project Company shall reimburse City on a current basis, within 10 days of request, for Recoverable Costs from fines, penalties or other

assessments against City or the Project by Governmental Entities due to Principal Project Company's delay or failure to undertake the Hazardous Materials Management), so long as City has performed in accordance with Section 7.7.1.5(a); and

- (c) City shall have no liability or responsibility to Principal Project Company arising out of, relating to or resulting from City's Hazardous Materials Management actions and such actions shall not constitute a Relief Event or other basis for a Claim.

**7.7.1.6** In the event of an emergency constituting an immediate hazard to health or safety of Building Occupants or City property due to Principal Project Company's failure to undertake the Hazardous Materials Management required under this Section 7.7.1 (Hazardous Materials Management), City may undertake, at Principal Project Company's sole cost and expense and without prior Notice, all work necessary to correct such hazardous condition(s).

## **7.7.2 Additional Hazardous Materials Obligations of Principal Project Company**

**7.7.2.1** Principal Project Company shall avoid exacerbating Hazardous Materials (including Pre-Existing Hazardous Materials as well as new Releases) in, on, under or migrating from the Project Site. For purposes of determining liability, as between City and Principal Project Company, under Sections 7.7.1.4(a) and 7.7.1.4(c), Principal Project Company shall only be liable for exacerbation of Hazardous Materials arising out of or relating to PPC Fault.

**7.7.2.2** Principal Project Company shall take all reasonable efforts to ensure that no act or omission of any PPC-Related Entity will result in an unlawful Release of Hazardous Materials to or into wastewater, storm or sanitary sewer systems, surface water, air, soils or groundwater in, on, under or migrating from the Project Site.

## **7.7.3 Hazardous Materials Generator Responsibilities**

**7.7.3.1** As between Principal Project Company and City, City shall be considered the generator and assume generator responsibility for Hazardous Materials, other than any PPC Release, and City shall not assert that Principal Project Company has legal responsibility for such Hazardous Materials (other than a PPC Release) as a generator. City has approval rights of Principal Project Company's selection of the destination facility to which Hazardous Materials, other than any PPC Release, will be transported.

**7.7.3.2** With regard to Hazardous Materials other than any PPC Release, City shall comply with the applicable standards for generators including those found at 40 CFR Part 262, including the responsibility to sign manifests and other waste tracking records for the transport of Hazardous Materials.

**7.7.3.3** Sections 7.7.3.1 and 7.7.3.2 shall not preclude or limit any rights, remedies or defenses that City or Principal Project Company may have against any Governmental Entity or other third parties, including prior owners, lessees, and licensees nor shall Sections 7.7.3.1 and 7.7.3.2 be interpreted as an admission of City's liability as to any Governmental Entity or other third parties, or otherwise preclude City from asserting to any Governmental Entity or other third parties that another entity, other than Principal Project Company or City, is the generator of any

Hazardous Materials. Notwithstanding the foregoing, Principal Project Company (and not City) shall be considered the generator with respect to any PPC Release.

## **7.8 Substantial Completion**

**7.8.1.1** The City and Principal Project Company mutually agree that time is of the essence with respect to the dates and times specified in this Agreement.

**7.8.1.2** Principal Project Company shall achieve Substantial Completion on or before the Substantial Completion Deadline. Failure to achieve Substantial Completion by the Long Stop Date is a PPC Default under Section 16.1.1(c).

**7.8.1.3** The conditions to Substantial Completion are set forth in Exhibit 15C (Conditions to Substantial Completion).

**7.8.1.4** Approximately six calendar months before the date on which Principal Project Company expects to achieve Substantial Completion, Principal Project Company shall provide to City its anticipated schedule to achieve Substantial Completion. Principal Project Company shall promptly advise City if at any time Principal Project Company determines that its anticipated schedule to achieve Substantial Completion will change. Principal Project Company shall provide an updated schedule to City 21 days before the date Principal Project Company expects to achieve Substantial Completion. Principal Project Company's schedule shall include, at a minimum, dates when Principal Project Company will submit all remaining documentation and evidence required by Exhibit 15C (Conditions to Substantial Completion) and the Technical Requirements with respect to Substantial Completion.

**7.8.1.5** When Principal Project Company determines that it has satisfied all conditions to Substantial Completion, it shall deliver to City a request for Certificate of Substantial Completion, in a form reasonably acceptable to City, stating the date that Principal Project Company determined it satisfied all conditions in Exhibit 15C (Conditions to Substantial Completion). Together with the request for Certificate of Substantial Completion, Principal Project Company shall submit a Punch List of items to be completed as a condition precedent to achievement Final Acceptance, obtain approval from Utility Owners and Authorities Having Jurisdiction of any Punch List items affecting Utilities and elements subject to the jurisdiction of an Authority Having Jurisdiction and obtain City's acceptance of the Punch List. The Punch List shall not include any items that adversely affect the safety, use or operability of the Project.

**7.8.1.6** During the 14-day period following the receipt of such request for Certificate of Substantial Completion:

- (a) Principal Project Company and City shall meet and confer to facilitate City's determination of whether Principal Project Company has met the conditions for Substantial Completion; and
- (b) City will conduct an inspection of the Project, review the applicable Final Design Documents, Construction Documents and other Submittals and conduct such other investigations as may be necessary to evaluate whether Substantial Completion has been achieved.

**7.8.1.7** As soon as reasonably practicable and, in any event, no later than 21 days after receipt of Principal Project Company's Notice under Section 7.8.1.5, City's Authorized Representative shall inspect, in conjunction with Principal Project Company, the D&C Work and City's Authorized Representative shall either:

- (a) if City's Authorized Representative agrees that Substantial Completion has been achieved, issue the Certificate of Substantial Completion to Principal Project Company within 10 days after the inspection:
  - (i) certifying that Substantial Completion has taken place;
  - (ii) stating the Substantial Completion Date;
  - (iii) listing any Punch List items which, in its opinion, remains to be performed; and
  - (iv) setting out reasonable details of the work remaining to be performed to achieve Final Acceptance; or
- (b) if Substantial Completion has, in City's opinion, not been achieved, issue a Notice to Principal Project Company within 10 days after the inspection:
  - (i) listing the work which, in its opinion, remains to be performed to achieve Substantial Completion; or
  - (ii) stating in its opinion, that Substantial Completion is so far from being achieved that it is not practicable to provide a list of the type referred to in Section 7.8.1.7(b)(i).

**7.8.1.8** Principal Project Company shall give Notice to City's Authorized Representative when Principal Project Company considers that the work listed in a Notice issued by City's Authorized Representative under Section 7.8.1.7(b)(i) has been completed.

**7.8.1.9** Sections 7.8.1.4 through 7.8.1.8 will apply in respect of any new Principal Project Company Notice under Section 7.8.1.8 in the same way as if it were the original Notice given under Section 7.8.1.4.

**7.8.1.10** City's Authorized Representative's opinion as to whether Substantial Completion has been achieved will not be restricted by any Notice, list or opinion which City previously provided to Principal Project Company under Section 7.8.1.7(b)(i).

**7.8.1.11** In the event that the Principal Project Company and City disagree as to whether or not Substantial Completion has been achieved, the Substantial Completion Date, the list of work remaining to be performed or the list of or estimated cost to perform Punch List items, City and Principal Project Company will meet to resolve such dispute, failing which such dispute shall be resolved in accordance with **Error! Reference source not found.** (Contract Dispute Procedures).

**7.8.1.12** Notwithstanding any other provision of this Agreement, City is under no obligation to certify Substantial Completion or commence the payment of Availability Payments prior to the

original Substantial Completion Deadline, regardless of whether Substantial Completion has been achieved prior to the original Substantial Completion Deadline.

## **7.9 Final Acceptance**

**7.9.1.1** Promptly after achieving Substantial Completion, Principal Project Company shall perform all remaining D&C Work, including expeditiously and diligently correcting all of the Punch List items specified pursuant to Section 7.8.1.7(a)(iii), to achieve Final Acceptance by the Final Acceptance Deadline.

**7.9.1.2** The conditions to Final Acceptance are set forth in Exhibit 15D (Conditions to Final Acceptance).

**7.9.1.3** When Principal Project Company determines that it has satisfied all conditions to Final Acceptance, it shall provide a certification to City, in a form reasonably acceptable to City, stating the date that Principal Project Company determined that it satisfied all the conditions in Exhibit 15D (Conditions to Final Acceptance).

**7.9.1.4** Within 21 days after receipt of Principal Project Company's Notice under Section 7.9.1.3, City's Authorized Representative shall inspect, in conjunction with Principal Project Company, the D&C Work and shall either:

- (a) if City's Authorized Representative agrees that Final Acceptance has been achieved, issue a Certificate of Final Acceptance to Principal Project Company within 15 days after the inspection certifying that Final Acceptance has taken place and the Final Acceptance Date; or
- (b) if in City's Authorized Representative's opinion, Final Acceptance has not been achieved, issue a Notice to Principal Project Company within 15 days after the inspection listing the work it believes remains to be performed to achieve Final Acceptance.

**7.9.1.5** Without limiting Principal Project Company's other obligations under this Agreement, immediately upon receipt of a Notice under Section 7.9.1.4(b), Principal Project Company shall expeditiously and diligently progress performance of the work specified in the Notice.

**7.9.1.6** Principal Project Company shall give Notice to City's Authorized Representative when Principal Project Company considers that the work listed in City's Authorized Representative's Notice under Section 7.9.1.4(b) has been completed.

**7.9.1.7** Sections 7.9.1.4 through 7.9.1.6 will apply in respect of any new Principal Project Company Notice under Section 7.9.1.6 in the same way as if it were the original Notice under Section 7.9.1.4

**7.9.1.8** City's Authorized Representative's opinion as to whether Final Acceptance has been achieved will not be restricted by any:

- (a) Certificate of Substantial Completion, Notice, list or opinion already provided under this Agreement; or

(b) warranty provided by any PPC-Related Entity.

**7.9.1.9** In the event that City and Principal Project Company disagree as to whether or not Final Acceptance has been achieved or the Final Acceptance Date, City and Principal Project Company will meet to resolve such dispute, failing which such dispute shall be resolved in accordance with **Error! Reference source not found.** (Contract Dispute Procedures).

## **7.10 Responsibility for Loss or Damage**

**7.10.1** The D&C Work includes having full charge and care of the Project Site and the D&C Work (including bearing risk of loss and damage to the D&C Work and Project Site) through Substantial Completion (or in the case of any Punch List Items, Final Acceptance), except to the extent that City or Third Parties have accepted elements of the D&C Work and expressly assumed responsibility for maintenance of such elements.

**7.10.2** Principal Project Company shall take every reasonable precaution against Loss or damage to any part of the Project from any cause, whether arising from the performance or nonperformance of the D&C Work.

**7.10.3** For so long as Principal Project Company bears the risk of loss and damage to D&C Work under Section 7.10.1, Principal Project Company shall repair, restore and replace Losses or damages to such D&C Work occasioned by any cause, subject to potential relief in accordance with, and subject to, clause (r) of the definition of "Compensable Delay Event". Principal Project Company shall ensure that such work is performed in accordance with the Contract Documents and applicable Law.

**7.10.4** Principal Project Company shall repair, restore and replace any Losses or damages to City property other than the D&C Work caused by any PPC-Related Entity.

## **7.11 Nonconforming Work**

### **7.11.1 Obligation to Replace Nonconforming Work**

Principal Project Company shall perform all Work in conformity with the Contract Documents. If Principal Project Company has not performed the Work in conformity with the Contract Documents, then, in addition to any other remedies available to City, City may direct Principal Project Company to, and Principal Project Company shall, remove and replace or otherwise remedy the Nonconforming Work. Principal Project Company shall not be entitled to make a Claim in connection with such D&C Work except as it relates to a dispute regarding whether Principal Project Company had performed the D&C Work in conformity with the Contract Documents.

### **7.11.2 Remedial Plan for Nonconforming Work**

**7.11.2.1** Promptly after Nonconforming Work is identified but no later than 10 Business Days after the earlier of (i) Notice from City to Principal Project Company; and (ii) Principal Project Company first obtains Actual Knowledge of such Nonconforming Work, Principal Project Company shall submit a remedial plan to City, for review and approval, describing the error or Defect giving rise to the Nonconforming Work and describing Principal Project Company's planned remedial action. Such proposal shall address Infrastructure Facility integrity,

aesthetics, operational impact on City including MOT, impact on the public, Building Occupants and any applicable Governmental Entities, maintainability, the effect on the Project Schedule and other relevant issues.

**7.11.2.2** If City determines that a proposed plan of correction may infringe upon Infrastructure Facility integrity, operations or maintainability, then City may elect to perform a technical assessment of Principal Project Company's proposal. City shall provide Notice to Principal Project Company promptly upon determining that an assessment is required, and shall take reasonable efforts to expedite the assessment. Should City elect to perform any such technical assessment, (a) if so requested by City, Principal Project Company shall not proceed with the remedial plan until City has conducted its technical assessment and provided prior approval of the remedial plan and (b) Principal Project Company shall not be entitled to make any Claim in connection with the technical assessment or reasonable delay in the remedial plan pending City's approval.

### **7.11.3 City's Remedies**

**7.11.3.1** City shall have the right and authority to cause Nonconforming Work to be removed, replaced or otherwise remedied and to withhold or deduct the costs from any monies due or that become due to Principal Project Company under the Contract Documents upon (a) any failure of Principal Project Company to provide a proposed remedial plan as described in Section 7.11.2.1 and obtain City's approval thereof, or (b) any failure of Principal Project Company to comply with City's direction under this Agreement relating to any safety issue, including Safety Compliance Orders.

**7.11.3.2** In addition to the right to cause the removal, replacement or remedy of the Nonconforming Work, at the request of Principal Project Company or upon its failure to remove, replace or otherwise remedy the Nonconforming Work within the timelines set forth in this Agreement, City may, in its sole discretion, accept such Nonconforming Work and receive reimbursement in an amount equal to the greater of: (a) the amount deemed appropriate by City (acting in good faith) to provide compensation for future impacts, maintenance and/or other costs relating to the Nonconforming Work, or (b) 100% of Principal Project Company's cost savings associated with its failure to perform the Work in accordance with the requirements of the Contract Documents.

## **7.12 Design and Construction of Joint Development Alternatives**

Nothing contained in this Agreement shall obligate City to design and construct any Joint Development Alternative or utilize Principal Project Company or any PPC-Related Entity in connection with the design and construction of any Joint Development Alternative.

### **7.13 FF&E During D&C Period**

#### **7.13.1 Selection and Procurement of PPC-Furnished FF&E**

**7.13.1.1** Principal Project Company shall:

- (a) update the Equipment List from time to time as appropriate to:
  - (i) reflect decisions made during the design development process;

- (ii) ensure that like PPC-Furnished FF&E are grouped together;
  - (iii) address any comments provided by the City's Authorized Representative with respect to PPC-Furnished FF&E in accordance with Exhibit 11 (Submittals Review Process); and
  - (iv) ensure that Principal Project Company provides PPC-Furnished FF&E as necessary to satisfy the requirements of this Agreement;
- (b) defer final selection of those items of PPC-Furnished FF&E which have high technical obsolescence risk to a time as close as reasonably possible to Substantial Completion, to better ensure that Principal Project Company will provide the most technically up to date items of such PPC-Furnished FF&E as of Substantial Completion; and
- (c) procure and provide the PPC-Furnished FF&E, as it may be amended in accordance with this Section 7.13.1 (Selection and Procurement of PPC-Furnished FF&E) or as a result of a Change Order.

**7.13.1.2** Unless necessary to meet its obligations under Section 7.13.1(a)(iv) or to carry out a Change Order, Principal Project Company shall not decrease the quantity or provide PPC-Furnished FF&E of a lesser quality (which may be determined based on attributes such as specification, brand, and place of manufacture) than an item identified in the Equipment List as of the Effective Date.

### **7.13.2 Selection of City-Furnished Equipment and Existing FF&E**

**7.13.2.1** City will select City-Furnished Equipment and identify Existing FF&E to be included in the Infrastructure Facility and update the Equipment List when reasonably required by Principal Project Company prior to Substantial Completion.

**7.13.2.2** Principal Project Company shall defer as long as reasonably possible the time for City to select the City-Furnished Equipment and identify the Existing FF&E.

**7.13.2.3** City will procure the City-Furnished Equipment identified in the Equipment List, as it may be amended as a result of a Change Order.

### **7.13.3 Installation of PPC-Furnished FF&E**

Principal Project Company shall install or locate (as applicable depending on whether the FF&E is loose or fixed) all items of PPC-Furnished FF&E within the Project Site in accordance with the Release for Construction Documents and so that the Infrastructure Facility meets the requirements of the Principal Project Documents. If the Release for Construction Documents do not identify locations for the placement of loose items of PPC-Furnished FF&E, Principal Project Company shall locate such items in accordance with direction from City's Authorized Representative.

#### **7.13.4 Installation of City-Furnished IT/Comms FF&E**

**7.13.4.1** Principal Project Company must provide City or its authorized representative continued and uninterrupted access to the IT/Comms Site for no less than 14 consecutive days prior to the commencement of commissioning and testing of the Infrastructure Facility (“**City Access Period**”) for the City to install the City-Furnished IT/Comms FF&E. The access provided shall be sufficient for City to complete such installation and transition and shall comply with the conditions in Section 1.11.7 of Division 1 of the Technical Requirements.

**7.13.4.2** Provided City complies with Project Site safety standards, Principal Project Company shall have no entitlement to make any claim against City for any delay to the Work caused by any access to or work undertaken by City under Section 7.13.5.1. Principal Project Company shall be entitled to relief in accordance with, and subject to, clause (n) of the definition of “Compensable Delay Event” in connection with City’s access or work undertaken by City under Section 7.13.5.1.

**7.13.4.3** Subject to Section 7.13.4.4, City shall install City-IT/Comms FF&E to the IT/Comms Site during the City Access Period.

**7.13.4.4** City will release Principal Project Company from all claims and liability in connection with the transfer of and installation of the City-IT/Comms FF&, except to the extent that Principal Project Company or a PPC-Related Entity (i) damages such FF&E or (ii) fails to comply with its obligations under this Agreement concerning such FF&E.

#### **7.13.5 Commissioning of FF&E for Substantial Completion**

**7.13.5.1** Following installation of the PPC-Furnished FF&E and the City-Furnished IT/Comms FF&E, Principal Project Company shall commission and undertake all tests of the Infrastructure Facility, in accordance with the requirements of this Agreement and Division 6 of the Technical Requirements to achieve the requirements of Substantial Completion.

**7.13.5.2** City will release Principal Project Company from all claims and liability in connection with the City-Furnished IT/Comms FF&E, to the extent that Principal Project Company is unable to successfully commission or undertake tests of such FF&E in accordance with the requirements of this Agreement and Division 06 of the Technical Requirements, except to the extent that the failure of such FF&E is caused by an act or omission of Principal Project Company or a PPC-Related Entity.

#### **7.14 Move-In**

##### **7.14.1 General**

As provided in Section B.25 (Move-In Services) of the IFM Specifications, Principal Project Company shall plan, coordinate, manage and execute the physical Move-In of the Infrastructure Facility, including Existing FF&E and City Furnished Equipment (excluding City-Furnished IT/Comms FF&E), following Substantial Completion in accordance with the Move-In Plan and in coordination with the Move-In Subcommittee (“**Move-In**”).

**7.13.4.4** City will release Principal Project Company from all claims and liability in connection with the transfer of and installation of the City Furnished Equipment and Existing

FF&E, except to the extent that Principal Project Company or a PPC-Related Entity (i) damages such FF&E or (ii) fails to comply with its obligations under this Agreement concerning such FF&E.

#### **7.14.2 Move-In Subcommittee**

**7.14.2.1** The move-in subcommittee (the “Move-In Subcommittee”) shall consist of three representatives of each Party. Members of the Move-In Subcommittee may invite, on prior notice to all members, such other advisors and consultants as they require from time to time to attend meetings and provide briefings to the Move-In Subcommittee.

**7.14.2.2** The Move-In Subcommittee shall assist the Parties by promoting cooperative and effective communication with respect to matters related to the Move-In, including issues related to the move-in into the Infrastructure Facility, the City Access Periods and the transfer and installation of all Existing FF&E.

**7.14.2.3** The primary role of the Move-In Subcommittee shall be to oversee and coordinate the Move-In in a timely and efficient manner and in accordance with the Project Schedule.

**7.14.2.4** The Move-In Subcommittee shall be responsible for receiving and reviewing all matters related to the Move-In.

**7.14.2.5** The members of the Move-In Subcommittee may adopt such procedures and practices for the conduct of the activities of the Move-In Subcommittee as they consider appropriate from time to time.

**7.14.2.6** Unless otherwise agreed, the Move-In Subcommittee shall operate only until the Final Acceptance Date.

#### **7.14.3 Move-In Resource**

**7.14.3.1** Principal Project Company shall, at least 24 months prior to Substantial Completion, prepare and submit to City a list of prospective candidates, including from existing resources, (each a “Move-In Resource Candidate”) for appointment as Move-In Resource, each of which must have experience planning and executing staff and logistical transitions in projects of similar size, scope and complexity in the United States.

**7.14.3.2** Subject to Section 24.17(c), Principal Project Company shall conduct a competitive bid process for the selection of the Move-In Resource from among the Move-In Resource Candidates, which bid process shall be completed by no later than 18 months prior to the Scheduled Substantial Completion Date. Principal Project Company shall consult with City in the design and implementation of such competitive bid process, including the development of the evaluation criteria, and shall accommodate any reasonable request of City with respect thereto. City may participate in the evaluation and selection of the successful Move-In Resource Candidate for appointment as Move-In Resource. City may, but is not required to, retain the Move-In Resource at City’s cost to plan, coordinate, manage and execute the transition from the Existing Facilities to the Infrastructure Facility.

---

## ARTICLE 8. INFRASTRUCTURE FACILITY MAINTENANCE

### 8.1 General

#### 8.1.1 General Obligations

**8.1.1.1** Principal Project Company is responsible for performance of IFM Services in accordance with requirements specified in the Contract Documents, including the IFM Management Plan approved by City during the PDA Term.

**8.1.1.2** Principal Project Company shall ensure that:

- (a) all IFM Services is performed in accordance with all applicable Laws, Regulatory Approvals and Good Industry Practice, as it may evolve over time;
- (b) the Infrastructure Facility remains safe, fit for use for the intended functions, meets the requirements of the Contract Documents, remains free of Defects and meets the minimum performance standards for operations as specified in the Contract Documents, including the Technical Requirements, throughout the IFM Period;
- (c) (i) all materials and equipment furnished during the IFM Period are of good quality and new and (ii) all Infrastructure Facility components and related consumables obtained as part of the IFM Services and supplied during the IFM Period are of good quality and new and fit for their intended purpose in accordance with the Contract Documents; and
- (d) all IFM Services is performed in accordance with the IFM Plan and City-approved plans required in the IFM Specifications.

**8.1.1.3** Principal Project Company shall monitor compliance of the IFM Services with the requirements of Contract Documents and provide Notice to City if any noncompliance occurs.

**8.1.1.4** Principal Project Company shall cooperate with City (and Authorities Having Jurisdiction as applicable) in all matters relating to the IFM Services and required availability of the Infrastructure Facility, including any Oversight with respect to operation and maintenance of the Project.

**8.1.1.5** Principal Project Company shall obtain, maintain, repair and replace elements of the Infrastructure Facility, except SFMTA O&M Facilities, as appropriate throughout the duration of the IFM Period, including maintenance, repair and replacement of consumable and life-expired items and rehabilitation of the Infrastructure Facility, except SFMTA O&M Facilities.

**8.1.1.6** Principal Project Company shall, in keeping with Good Industry Practice, implement or incorporate Technology Enhancements for the Infrastructure Facility throughout the duration of the IFM Period, at no cost to City, to the extent such enhancements are (a) scheduled in the IFM Management Plan, or (b) needed to correct Defects in the Work. To the extent that the City directs the Principal Project Company to implement or incorporate Technology Enhancements in circumstances other than those set forth above, such direction shall be considered a City Change.

**8.1.1.7** City shall pay all direct and indirect costs for all Utility services relating to the operation and maintenance, throughout the Term, of the Infrastructure Facility in accordance with the Contract Documents.

## **8.1.2 Changes in Standards and Specifications**

**8.1.2.1** The Parties anticipate that, from time to time, the Standards and Specifications will be changed, added or replaced, which may be implemented through revisions to existing standards and specifications or through new standards and specifications.

**8.1.2.2** Any Renewal Work required to be performed by Principal Project Company shall be performed in compliance with the then current Standards and Specifications. City may, through a City Change, require Principal Project Company to comply with updated Standards and Specifications prior to the date set forth in Principal Project Company's Renewal Work Schedule for Renewal Work affected by the updated Standards and Specifications.

## **8.1.3 Hazardous Materials Management**

Principal Project Company shall comply with Section 7.7 (Hazardous Materials Management; Risk Allocation) throughout the IFM Period.

## **8.1.4 Utility Accommodation**

**8.1.4.1** Principal Project Company acknowledges that from time to time during the course of the IFM Period, Utility Owners will apply for additional utility permits to install new Utilities that may affect the Project Site, or to modify, repair, upgrade, relocate or expand existing Utilities within the Project Site.

**8.1.4.2** Throughout the IFM Period, Principal Project Company shall monitor Utilities and Utility Owners within the Project Site for compliance with applicable Utility permits, easements, and applicable Law, and shall use diligent efforts to obtain the cooperation of each Utility Owner having Utilities within the Project Site. Principal Project Company shall promptly provide Notice to City if (a) Principal Project Company believes that any Utility Owner is not complying with the terms of a Utility permit, easement, or applicable Law affecting a Utility within the Project Site, or (b) any other dispute arises between Principal Project Company and a Utility Owner with respect to a Utility within the Project Site, despite Principal Project Company having exercised its diligent efforts to obtain the Utility Owner's cooperation. If Principal Project Company, despite diligent efforts, is unable to resolve any dispute with a Utility Owner, Principal Project Company may request City to provide reasonable assistance. Following delivery of such a request the Parties shall consult regarding measures to be undertaken.

## **8.2 Principal Project Company Inspection, Testing and Reporting**

**8.2.1** Principal Project Company shall carry out inspections and tests in accordance with the Technical Requirements and IFM Management Plan. Principal Project Company shall use the results of such inspections and tests to develop and update the IFM Management Plan, to maintain asset condition and service levels, and to develop programs of maintenance and Renewal Work to minimize the effect of IFM Services on City employees, residents, and other members of the public.

**8.2.2** Principal Project Company shall submit all reports relating to the IFM Services, including the IFM annual reports, in the form, with the content and within the time required under the Contract Documents.

**8.2.3** The inspections and reports described above are in addition to maintenance of the Failure Event and Noncompliance Event database and related reports under Section 15.3.1 (Noncompliance Database).

### **8.3 Responsibility for Loss or Damage**

**8.3.1** The IFM Services includes having full charge and care of the Infrastructure Facility, except for the SFTMA O&M Facilities, from the date of Substantial Completion of the Infrastructure Facility through the end of the IFM Period.

**8.3.2** Principal Project Company shall take reasonable precautions against Loss or damage to the Infrastructure Facility and other improvements and assets within the Project Site due to any cause.

**8.3.3** Principal Project Company shall repair, restore and replace all Losses or damages to the Infrastructure Facility, excluding the SFMTA O&M Facilities. Principal Project Company shall ensure that such work is performed in accordance with the Contract Documents and applicable Law.

**8.3.4** If any repair, restoration or replacement of the Infrastructure Facility building envelope or exterior grounds is required due to Vandalism, Principal Project Company shall be responsible for the first \$150,000 of costs incurred in the aggregate per calendar year (the “**Annual Vandalism Deductible**”) to perform such repair, restoration or replacement. The Annual Vandalism Deductible shall be index-linked and increased by the Escalation Factor calculated in accordance with Section 2 of Exhibit 4B (Availability Payment Mechanism).

**8.3.5** For each calendar year of the Term, City will compensate Principal Project Company through a Change Order for costs incurred by Principal Project Company in performing repairs, restoration or replacements due to Vandalism that exceed the Annual Vandalism Deductible, if there are any such costs. If any repair, restoration or replacement of the Infrastructure Facility building interior, excluding any SFMTA O&M Facilities, is required due to Vandalism, such repair, restoration or replacement will be treated as a City Change.

**8.3.6** Principal Project Company shall repair, restore and replace any Losses or damages to City property other than the Infrastructure Facility caused by any PPC-Related Entity.

### **8.4 Renewal Work; IFM Management Plan**

#### **8.4.1 Performance of Renewal Work**

**8.4.1.1** Principal Project Company shall diligently perform Renewal Work as and when necessary to comply with the Contract Documents, including the Handback Requirements. Principal Project Company shall use the IFM Management Plan developed in accordance with the Technical Requirements as the principal guide for scheduling and performing Renewal Work; except that Principal Project Company may perform Renewal Work not identified in IFM Management Plan as necessary to maintain compliance with the Contract Documents, subject

to scheduling the performance of such Renewal Work at times agreed to by City, in its reasonable discretion.

**8.4.1.2** If, at any time, Principal Project Company has failed to perform the Renewal Work in accordance with the then current IFM Management Plan and applicable requirements of the Contract Documents (including the Technical Requirements, including Section E of the IFM Specifications), and performance of such Renewal Work is required to ensure continued performance of the Project in accordance with the Contract Documents, City may give written Notice thereof to Principal Project Company. If Principal Project Company has failed to complete the Renewal Work within 30 days after City delivers such Notice, then City shall have the right to perform and complete such Renewal Work at the expense and for the account of Principal Project Company, and to deduct from payments otherwise payable to Principal Project Company by City under this Agreement to pay the costs of such action. The foregoing remedy is in addition to any other remedies available to City under the Contract Documents on account of such failure, including the assessment of Noncompliance Points, and City's right to intervene immediately and without Notice to address Safety Compliance.

## **8.4.2 IFM Management Plan**

As a condition to Substantial Completion pursuant to Exhibit 15C (Conditions to Substantial Completion), Principal Project Company shall prepare and submit to City for review and approval an IFM Management Plan updated in accordance with the IFM Specifications. Coordination of Operations and Maintenance Responsibilities

At Principal Project Company's request from time to time, City will, at no cost to City, reasonably assist Principal Project Company in seeking the cooperation and coordination of any Authority Having Jurisdiction with respect to Principal Project Company's IFM Services. The objectives of such assistance will be to minimize disruptions to transit operations, City employees, residents, and traffic and ensure that all IFM activities are carried out in accordance with then-current maintenance standards and then-current traffic management standards, practices and procedures of such Authorities Having Jurisdiction.

## **8.5 Handback**

### **8.5.1 Handback Condition**

**8.5.1.1** Principal Project Company shall diligently perform and complete all Renewal Work required to be performed and completed before the Termination Date, based on the required adjustments and changes to the IFM Management Plan resulting from the inspections and analysis under this Section 8.5.

**8.5.1.2** Upon the Termination Date, Principal Project Company shall surrender the Project, including any Upgrades, to City, in the condition and meeting all of the requirements of the Handback Requirements.

**8.5.1.3** In the event of early termination of this Agreement, Principal Project Company shall only be required to comply with the requirements of this Section 8.5 (Handback) to the extent that any Renewal Work was scheduled to have been performed before the Early Termination Date.

---

## **8.5.2 Independent Engineer**

**8.5.2.1** The Parties must select an Independent Engineer to:

- (a) perform joint technical reviews and handback inspections in accordance with Section 8.5.4;
- (b) make a determination regarding the estimated Handback Work costs in accordance with Section 8.5.4.2(h); and
- (c) verify in accordance with Section 8.5.5 (Handback Assessment) whether the Handback Requirements have been met.

**8.5.2.2** Prior to each Review Date, Principal Project Company must, in consultation with City, establish the schedule and process for the selection of an Independent Engineer for purposes of the Independent Engineer roles contemplated in Section 8.5.2.1. Principal Project Company must develop the solicitation package and draft contract terms, subject to approval by City, and Principal Project Company must set the solicitation schedule with the goal of selecting the Independent Engineer 6 months prior to each Review Date.

**8.5.2.3** The solicitations required under Section 8.6.2 (Independent Engineer) must include issuance of a request for competitive proposals from a list of firms approved by City, review of proposals by the Parties, a joint determination regarding which firm is the best qualified to provide Independent Engineer services, and negotiation of a fair and reasonable price for performance of such services. If negotiations fail with the highest ranked firm, the Parties may elect to terminate negotiations and proceed with the next highest ranked firm. This process must be followed until a firm is selected to serve as the Independent Engineer. If the Parties fail to reach agreement regarding selection of the Independent Engineer, or regarding acceptable terms of the agreement with the Independent Engineer, the Claim must be subject to resolution under Article 18 (Contract Dispute Procedures).

**8.5.2.4** The Independent Engineer will be appointed jointly by the Parties and will act independently from and not as an agent of either Party. Any advisor of City, a PPC-Related Entity, or a Lender is deemed to have an organizational conflict of interest and not eligible to respond to the solicitation.

**8.5.2.5** Each Party is responsible for its own costs related to the Independent Engineer solicitation processes. The Parties will be equally responsible for all amounts payable under the terms of the agreement with the Independent Engineer.

## **8.5.3 Handback Reserve Amount**

**8.5.3.1** Within 30 days of the commencement of the 26<sup>th</sup> Contract Year, and annually thereafter to the end of the IFM Period, Principal Project Company shall calculate the Handback Reserve Amount and prepare and deliver to City a report that:

- (a) specifies Principal Project Company's estimate of the Handback Reserve Amount based on the inspections and the updated Handback Renewal Work Plan provided for under Section 8.5.4.2(h)~~8.5.4.2(h)~~; and

- (b) details how Principal Project Company's estimated Handback Reserve Amount was calculated.

**8.5.3.2** Within 15 Business Days of receipt of each report described in Section 8.5.3.1, City will review the report and provide a Notice to Principal Project Company setting forth its determination of the Handback Reserve Amount, including supporting materials.

**8.5.3.3** Following delivery of each update and report, the Parties shall meet to discuss whether any changes should be made to the scope or schedule for performance of the Handback Renewal Work or to the Handback Reserve Amount.

#### **8.5.4 Joint Technical Review and Handback Inspections and Report**

**8.5.4.1** The Parties and the Independent Engineer shall schedule and conduct joint technical inspections of the Infrastructure Facility:

- (a) within 90 days following the Substantial Completion Date;
- (b) each 5 year anniversary after the Substantial Completion Date; and
- (c) the 25th anniversary of the Effective Date of this Agreement ("**Handback Inspection**"),

each of the above constitutes a "**Review Date**".

**8.5.4.2** Within 30 days following each Review Date, the Independent Engineer must produce and deliver to City a report (the "**Condition Report**") for review and approval in accordance with Exhibit 11 (Submittal Review Process). The Condition Report shall:

- (a) identify the condition of the Infrastructure Facility and the Project Site and each element for which Principal Project Company is responsible under the Agreement;
- (b) compare the condition of each element with the current Infrastructure Facility standard requirements in the IFM Specifications;
- (c) compare the actual Renewal Work replacement with the approved Handback Renewal Work Plan;
- (d) identify and documents deficiencies in the current condition or Renewal Work replacement activities and makes recommendations on actions required to bring the condition and Renewal Work replacement activities to the current required standard;
- (e) provides the FCI index as of the time of the Joint Technical Review;
- (f) determines and verifies the condition of all elements and their Residual Lives;
- (g) adjusts, to the extent necessary based on inspection and analysis, element Useful Lives, ages, Residual Lives; and

- (h) in the case of the Handback Inspection, (a) determines the Handback Renewal Work required to be performed and completed before the Termination Date, based on the Handback Requirements for Residual Life at the conclusion of the Term, the foregoing adjustments and the foregoing changes to the IFM Management Plan; and (b) includes an estimate and details of the costs to perform the Handback Work and the Renewal Work (“**Handback Reserve Amount**”).

**8.5.4.3** Principal Project Company must update the IFM Management Plan following each inspection of the Infrastructure Facility in accordance with Section 8.5.4.2 and deliver the updated plan to City for City’s review and approval in accordance with Exhibit 11 (Submittal Review Process). Such update shall include a plan to rectify identified deficiencies, schedule of activities and any process or administrative changes and maintenance and Renewal Work activities. All planned activities related to updated IFM Management Plan must be completed within a maximum of 12 months from receipt of the applicable Condition Report.

**8.5.4.4** The Parties shall undertake a subsequent inspection of the remediation work completed by Principal Project Company in connection with the updated IFM Management Plan and, if required, issue a revised Condition Report.

## **8.5.5 Handback Assessment**

**8.5.5.1** In the case of the Handback Inspection, when Principal Project Company determines that it has satisfied the Handback Requirements, it shall provide a certification to City and Independent Engineer, in a form reasonably acceptable to City, stating the date that Principal Project Company determined that it satisfied the Handback Requirements.

**8.5.5.2** During the 30-day period following receipt of such certification:

- (a) Principal Project Company, Independent Engineer, and City shall meet and confer to facilitate City’s determination of whether Principal Project Company has met the Handback Requirements;
- (b) Independent Engineer will conduct a final inspection of the Project, review the Handback Renewal Work Plan and any other relevant Submittals and conduct such other investigations as may be necessary to evaluate whether the Handback Requirements have been met; and
- (c) Independent Engineer shall (i) deliver a report of findings and determination to Principal Project Company and City stating in Independent Engineer’s opinion whether Principal Project Company has met the Handback Requirements; or (ii) provide Notice to Principal Project Company stating the reasons why the Handback Requirements have not been met.

**8.5.5.3** Within 10 days after City’s receipt of a report given by Independent Engineer under Section 8.6.5.2(c) stating that the Handback Requirements have been met, City will either:

- (a) provide Notice to Principal Project Company that it concurs with the Independent Engineer’s determination that the Handback Requirements have been met; or

- 
- (b) provide Notice to Principal Project Company regarding the reasons why City believes the Handback Requirements have not been met.

**8.5.5.4** If Independent Engineer provides Notice under Section 8.5.5.2(c)(ii), then Principal Project Company shall take appropriate steps to satisfy the remaining conditions and provide a certification under Section 8.5.5 once the conditions have been satisfied and otherwise repeat the process described in this Section 8.5.5 until City provides Principal Project Company the notice described in Section 8.5.5.3(a).

**8.5.5.5** The findings of the Independent Engineer shall be inadmissible and given no weight during the Article 18 (Contract Dispute Procedures) process.

## **8.5.6 City Right to Self-Perform and Recover Costs**

If City determines that the Project does not comply with any Handback Requirement, or Handback Renewal Work is not timely or properly performed, City may provide Principal Project Company Notice of such failure(s). Principal Project Company shall have 15 days from the date the City delivers this Notice to rectify such failure(s) to City's satisfaction; provided, however, that if (i) the nature of such rectification is such that the rectification cannot with diligence be completed within such 15 day period; (ii) such failure does not relate to a matter of public or facility safety or an Emergency; and (iii) Principal Project Company has commenced and is diligently pursuing meaningful steps to rectify immediately after receiving the Notice of such failure(s), Principal Project Company shall have such additional period of time, up to a maximum period of 60 days from the date City delivers the Notice, as is reasonably necessary to diligently effect such rectification. If Principal Project Company fails to rectify such failure(s) within this period, then, in addition to City's rights under the Contract Documents, City may bring the Project into compliance with such Handback Requirement(s) and Principal Project Company shall be liable for City's Recoverable Costs incurred in performing that Work. In recovering such amounts, City may (a) reduce any Availability Payment then due and owing from City to Principal Project Company, (b) invoice Principal Project Company for such amount, as a lump sum payment, (c) set off such amount against any other amount then due and owing from City to Principal Project Company, (d) draw against funds withheld under this Section 8.5 (Handback) or against the letter of credit described in Section 8.6.5 (Handback Requirements Letters of Credit), (e) require funds in the reserve account described in Section 8.5.7 (Handback Requirements Reserve Account) to be used to pay for required Renewal Work, or (f) any combination of clauses (a) through (e).

## **8.5.7 Spare Parts**

Principal Project Company must comply with the requirements with respect to Spare Parts as set out in Section F.1.2(2) of the IFM Specifications.

## **8.6 Handback Requirements Reserve Account**

### **8.6.1 Establishment**

**8.6.1.1** Within 30 days of the commencement of the 26<sup>th</sup> Contract Year, Principal Project Company shall establish a reserve account (the "**Handback Requirements Reserve Account**") exclusively available for the uses set forth in Section 8.6.3 (Use of Handback Requirements Reserve Account). Principal Project Company shall provide to City the details regarding the

account, including the name, address and contact information for the depository institution and the account number, and shall provide Notice to City regarding any change made from time to time to any such details and the effective date of such change immediately upon or prior to such change taking effect. City shall have a first priority perfected security interest in the Handback Requirements Reserve Account, and the right to receive monthly account statements directly from the depository institution. Principal Project Company shall deliver such Notices to the depository institution and execute such documents as may be required to establish and perfect City's interest in the Handback Requirements Reserve Account under the Uniform Commercial Code as adopted in the State.

**8.6.1.2** In lieu of Principal Project Company establishing the Handback Requirements Reserve Account, Principal Project Company may deliver to City one or more Handback Requirements Letters of Credit on the terms and conditions set forth in Section 8.6.5 (Handback Requirements Letters of Credit) and Section 10.4 (Letters of Credit).

## **8.6.2 Funding**

**8.6.2.1** Within 30 days after the date of City's first Notice delivered to Principal Project Company pursuant to Section 8.5.3.2, Principal Project Company shall deposit to the Handback Requirements Reserve Account an amount equal to the Handback Reserve Amount specified in such Notice. If, at any time after the initial deposit of funds into the Handback Requirements Reserve Account, City determines, in its good faith discretion, that the balance of funds held in the Handback Requirements Reserve Account may be insufficient to pay for the Handback Renewal Work (as amended) yet to be performed or paid for, then City may give Notice to Principal Project Company setting forth the insufficient amount and requiring Principal Project Company to replenish the Handback Requirements Reserve Account with additional funds necessary to make up the insufficiency. Principal Project Company shall deposit such additional funds into the Handback Requirements Reserve Account not later than ten Business Days after such Notice from City. If after recalculation of the Handback Reserve Amount following any of the annual inspections provided for in Section 8.5.4 (Joint Technical Review and Report), the amount on deposit in the Handback Requirements Reserve Account exceeds the percentage of the Handback Reserve Amount required to be on deposit in the Handback Requirements Reserve Account in accordance with Section 8.6.2.1 on such calculation date, Principal Project Company shall be entitled to draw any surplus amount and no further deposits shall be made until the next inspection and determination of the Handback Reserve Amount.

**8.6.2.2** If Principal Project Company disputes, in good faith, any Handback Reserve Amount specified by City in City's Notices delivered to Principal Project Company pursuant to Section 8.5.3.2, Principal Project Company shall fund the full portion (including the disputed amount) of the Handback Reserve Amount pending resolution of the Contract Dispute in accordance with **Error! Reference source not found.** (Contract Dispute Procedures).

**8.6.2.3** Funds held in the Handback Requirements Reserve Account may be invested and reinvested only in securities, obligations, bonds, funds, instruments or other investments listed under California Government Code section 16430 ("**Eligible Investments**"). Eligible Investments in the Handback Requirements Reserve Account must mature during the Term, and the principal of such Eligible Investments must be available for withdrawal at any time during the Term without penalty. Any interest earned on funds held in the Handback Requirements Reserve Account shall be earned on behalf of the Principal Project Company.

**8.6.2.4** If Principal Project Company fails to make the deposits required pursuant to this Section 8.6.2 (Funding), when due, City shall be entitled to deduct the amount required to be deposited from the Quarterly Availability Payments due to Principal Project Company and shall deposit such amount to the Handback Requirements Reserve Account on behalf of Principal Project Company.

**8.6.2.5** If the amount on deposit in the Handback Requirements Reserve Account at any time exceeds the current calculation of the Handback Reserve Amount, Principal Project Company may withdraw any surplus amount in excess of the current calculation.

### **8.6.3 Use of Handback Requirements Reserve Account**

**8.6.3.1** Principal Project Company shall be entitled to draw funds from the Handback Requirements Reserve Account in such amounts and at such times as needed only to pay for the Handback Renewal Work as required by the Handback Renewal Work Plan. Amounts in the Handback Requirements Reserve Account can only be used for the purposes described in this Section 8.6.3.1 and are not available as security for repayment of Project Debt or making Distributions, except as permitted by Section 8.7.4.1. The use of amounts in the Handback Requirements Reserve Account by Principal Project Company for any purpose other than as permitted in this Section 8.6.3.1 shall be a PPC Default.

**8.6.3.2** Before drawing funds from the Handback Requirements Reserve Account, Principal Project Company shall give written Notice to City of the amount to be drawn and the purpose for which funds will be used. City shall have 10 Business Days from the date of the receipt of such Notice to disapprove the draw from the Handback Requirements Reserve Account. City may disapprove the draw only if the requested amount and/or purposes for which the funds will be used do not comply with the Handback Renewal Work Plan. If City fails to disapprove the draw within the 10 Business Day period following receipt of Notice, Principal Project Company shall be entitled to draw funds in the manner described in the Notice to City.

### **8.6.4 Disbursement of Handback Requirements Reserve Account on Completion of Handback Renewal Work or Earlier Termination**

**8.6.4.1** Following completion of the Handback Renewal Work and after the expiration of the Term, any remaining Handback Requirements Reserve Balance shall be drawn and retained by Principal Project Company.

**8.6.4.2** If this Agreement is terminated for any reason before the completion of the Handback Renewal Work, any remaining Handback Requirements Reserve Balance shall be drawn and retained by City. ***[PNC TO PROVIDE SUGGESTED SPECIFIC DRAFTING TO ADDRESS ISSUE REGARDING THAT IT IS NOT IN A WORSE POSITION IF IT USES LOC VS. CASH]***

### **8.6.5 Handback Requirements Letters of Credit**

**8.6.5.1** In lieu of establishing the Handback Requirements Reserve Account, Principal Project Company may deliver to City one or more letters of credit (each, a "**Handback Requirements Letter of Credit**"), on the terms and conditions set forth in this Section 8.6.5 (Handback Requirements Letter of Credit) and Section 10.4 (Letters of Credit). The Handback Requirements Letter of Credit shall name City as the sole beneficiary and shall not provide for any other dual or multiple beneficiaries. Principal Project Company shall execute, and shall

cause the financial institution issuing the Handback Requirements Letter of Credit to execute, such documents as may be required to establish and perfect City's interest in the Handback Requirements Letter of Credit under the Uniform Commercial Code as adopted in the State, which interest shall be a first priority security interest as provided in Section 8.6.1.1. If the Handback Requirements Reserve Account has been previously established, Principal Project Company at any time thereafter may substitute one or more Handback Requirements Letters of Credit for all or any portion of the amounts required to be on deposit in the Handback Requirements Reserve Account, on the terms and conditions set forth in this Section 8.6.5 (Handback Requirements Letters of Credit).

**8.6.5.2** Upon receipt of the required substitute Handback Requirements Letter of Credit, City shall authorize the release to Principal Project Company of amounts in the Handback Requirements Reserve Account equal to the face amount of the substitute Handback Requirements Letter of Credit. If the face amount of all Handback Requirements Letters of Credit is less than the total amount required to be funded to the Handback Requirements Reserve Account before expiration of the Handback Requirements Letter of Credit, Principal Project Company shall be obligated to pay, when due, the shortfall into the Handback Requirements Reserve Account. Alternatively, Principal Project Company may deliver a Handback Requirements Letter of Credit with a face amount equal to at least the total amount required to be funded to the Handback Requirements Reserve Account during the period up to the expiration of the Handback Requirements Letter of Credit, or may deliver additional Handback Requirements Letters of Credit or cause the existing Handback Requirements Letter of Credit to be amended to cover the shortfall before deposits of the shortfall to the Handback Requirements Reserve Account are due.

**8.6.5.3** City shall have the right to draw on the Handback Requirements Letter of Credit, without prior Notice to Principal Project Company, for the reasons set forth in Sections 10.4.1.3(a), (b) and (c) and Section 8.6.4.2.

**8.6.5.4** Except when drawing upon the Handback Requirements Letter of Credit in accordance with Section 8.6.4.2, City shall deposit the proceeds from drawing on the Handback Requirements Letter of Credit into the Handback Requirements Reserve Account.

## **8.6.6 Coordination with JDA Project Companies and Joint Development Alternatives**

Principal Project Company acknowledges and agrees that one or more Joint Development Alternatives may be constructed prior to or following Substantial Completion. Principal Project Company shall not interfere with the work of or cause any delay to any JDA Project Company that may be carrying out work within the Project Site or in the land adjoining or near the Project Site, including with respect to the Joint Development Alternatives, and will allow them reasonable access to the Project Site, provided that Principal Project Company shall not be in breach of this Section 8.7.6 (Coordination with JDA Project Companies and Joint Development Alternatives) for any temporary interruption to the work of any JDA Project Company that (a) has been agreed to in advance in accordance with procedures agreed to by Principal Project Company, such contractor for the Joint Development Alternative and any relevant Third Party; or (b) is reasonably necessary in accordance with Law and Good Industry Practice to respond to emergencies creating an immediate and serious threat to public health, safety, security or the Environment.

## **8.7 IFM Operations Committee**

**8.7.1** As provided in Section B.9.1.2 (IFM Operations Committee) of the IFM Specifications, the IFM Operations Committee shall be responsible for receiving and reviewing matters related to operational interface and communications for IFM Services, including Maintenance Services and Renewal Work, and SFMTA O&M Services; and

**8.7.2** Any unanimous decision of the IFM Operations Committee shall be final and binding on the Parties. If the IFM Operations Committee is unable to reach a unanimous decision, either Party may refer the matter for resolution in accordance with Article 18 (Contract Dispute Procedures). The findings of the IFM Operations Committee shall be inadmissible and given no weight during the Article 18 (Contract Dispute Procedures) process.

## **8.8 FF&E During IFM Period**

### **8.8.1 Title and Responsibility for Risk**

**8.8.1.1** Subject to Section 2.4.3 (Passage of Title), City will own all FF&E during the IFM Period.

### **8.8.2 Maintenance and Replacement of FF&E During IFM Period**

**8.8.2.1** Until the end of the IFM Period, Principal Project Company shall maintain, replace and repair all PPC-Maintained FF&E.

**8.8.2.2** Where Principal Project Company is required to replace PPC-Maintained FF&E, the replacement FF&E must:

- (a) meet standards relative to the current market commensurate with standards relative to the market for the FF&E being replaced as of the original purchase date;
- (b) be consistent with Good Industry Practices for quality, durability, materials and technology;
- (c) have a design life equal to or greater than the terms of the PPC-Maintained FF&E being replaced; and
- (d) not increase costs payable by City (as compared with PPC-Maintained FF&E where alternative FF&E is readily available on comparable terms and would not have such an effect).

**8.8.2.3** Subject to Section 8.9.2.4 and Section 6.11, City will, during the Term:

- (a) replace and repair Existing FF&E and maintain, replace and repair City-Furnished Equipment and Office/Admin and Training Spaces FF&E if an item:
  - (i) is exhibiting continuous faults; or

- (ii) is leading to faults which are causing continual disruptions to IFM Services as a result of being worn or tired
- (b) notify Principal Project Company of Existing FF&E, or City-Furnished Equipment (as applicable) being replaced; and
- (c) in connection with replacements and repairs under Section 8.9.2.3(a), ensure that the replacement Existing FF&E, Office/Admin and Training Spaces FF&E or City-Furnished Equipment (as applicable) do not increase the cost to Principal Project Company or any PPC-Related Entity of performing the IFM Services.

**8.8.2.4** The replacement and repair of the Existing FF&E, Office/Admin and Training Spaces FF&E or City-Furnished Equipment in accordance with Section 8.9.2.3 will be at City's cost unless the need to replace the Existing FF&E or City-Furnished Equipment is due to any PPC Fault or the failure of Principal Project Company or any PPC-Related Entity to comply with Principal Project Company's obligations under this Agreement with respect to that Existing FF&E or City-Furnished Equipment, including Section 6.11. In such case, the replacement costs will be an obligation due and payable by Principal Project Company to City.

**8.8.2.5** Principal Project Company shall:

- (a) provide all equipment for IFM Services;
- (b) ensure all items of FF&E and equipment for IFM Services are securely stored to prevent unauthorized access and to ensure that the health and safety of the public or City are not adversely affected;
- (c) ensure all items of FF&E are accounted for and present on the completion of each activity or use;
- (d) ensure all fuel to be used in the performance of the IFM Services is dispensed and accounted for via the use of a log book;
- (e) ensure machinery and dispensing mechanisms have lockable fuel caps; and
- (f) advise City promptly and no later than three days after Principal Project Company becomes aware of any item of FF&E or equipment for IFM Services which has not been accounted for, and cooperate with City in conducting all necessary procedures to establish and take steps to ensure that items will be accounted for properly in the future;
- (g) develop a tools management and safety policy and submit said policy for review in accordance with Exhibit 11 (Submittals Review Process); and
- (h) maintain records of FF&E and FM Services Equipment audits and make such records available to City on request.

## **8.9 Energy Management**

### **8.9.1 Independent Energy Auditor**

**8.9.1.1** After the second anniversary, but no later than the third anniversary, of the Final Acceptance Date, the Parties shall appoint an Independent Energy Auditor to:

- (a) provide an initial report inclusive of operating assumptions, current Weather Data and energy model simulation files regarding the IFM Facility's energy performance for the purposes of establishing the Annual Energy Target in accordance with Section 3 (Calculation of Annual Energy Target) of Exhibit 12 (Energy Management); and
- (b) provide an updated report, as a result of agreed operating changes to the Infrastructure Facility, to determine the adjusted Annual Energy Target in accordance with Section 3 (Calculation of Annual Energy Target) of Exhibit 12 (Energy Management)

**8.9.1.2** Principal Project Company shall, in consultation with, and subject to the approval of, City, establish the schedule and process for the selection of an Independent Energy Auditor for purposes of the Independent Energy Auditor roles contemplated in Section 3 (Calculation of Annual Energy Target) of Exhibit 12 (Energy Management). Principal Project Company shall develop the solicitation package and draft contract terms, subject to approval by City, and Principal Project Company shall set the solicitation schedule with the goal of selecting the Independent Energy Auditor at least one month prior to the second anniversary of the Final Acceptance Date, and as agreed between the Parties in accordance with Section 3.2.2 of Exhibit 12 (Energy Management).

**8.9.1.3** The solicitations required under this Section 8.9.1 (Independent Energy Auditor) shall include issuance of a request for competitive proposals from a list of firms approved by City, review of proposals by the Parties, a joint determination regarding which firm is the best qualified to provide Independent Energy Auditor services, and negotiation of a fair and reasonable price for performance of such services. If negotiations fail with the highest ranked firm, the Parties may elect to terminate negotiations and proceed with the next highest ranked firm. This process shall be followed until a firm is selected to serve as the Independent Energy Auditor. If the Parties fail to reach agreement regarding selection of the Independent Energy Auditor, or regarding acceptable terms of the agreement with the Independent Energy Auditor, the Claim shall be subject to resolution under Article 18 (Contract Dispute Procedures).

**8.9.1.4** The Independent Energy Auditor will be appointed jointly by the Parties and will act independently from and not as an agent of either Party. Any member or advisor of City, a PPC-Related Entity, or a Lender is deemed to have an organizational conflict of interest and not eligible to respond to the solicitation.

**8.9.1.5** Each Party is responsible for its own costs related to the Independent Energy Auditor solicitation processes. The Parties will be equally responsible for all amounts payable under the terms of the agreement with the Independent Energy Auditor.

## **8.9.2 External Energy Auditor**

**8.9.2.1** On an as needed basis during the IFM Period, the City, in its sole discretion, may select an External Energy Auditor to:

- (a) undertake an energy audit of the Bus Yard inclusive of both SFMTA O&M Services and IFM Services; and
- (b) provide operational recommendations related to energy savings and maintenance considerations for Bus Yard inclusive of both SFMTA O&M Services and IFM Services

**8.9.2.2** If the City asks PPC to undertake the solicitation of the External Energy Auditor:

- (a) Principal Project Company shall, in agreement with City, establish the schedule and process for the selection of an External Energy Auditor. Principal Project Company shall develop the solicitation package and draft contract terms, subject to approval by City, and Principal Project Company shall set the solicitation schedule with the goal of selecting the External Energy Auditor, and as agreed between the Parties in accordance with Section 3.2.2 of Exhibit 12 (Energy Management).
- (b) The solicitations required under this Section 8.9.2.2 (External Energy Auditor) shall include issuance of a request for competitive proposals from a list of firms approved by City, review of proposals by the Parties, a joint determination regarding which firm is the best qualified to provide External Energy Auditor services, and negotiation of a fair and reasonable price for performance of such services. If negotiations fail with the highest ranked firm, the Parties may elect to terminate negotiations and proceed with the next highest ranked firm. This process shall be followed until a firm is selected to serve as the External Energy Auditor. If the Parties fail to reach agreement regarding selection of the Independent Energy Auditor, or regarding acceptable terms of the agreement with the Independent Energy Auditor, the Claim shall be subject to resolution under Article 18 (Contract Dispute Procedures).

**8.9.2.3** If the City undertakes the solicitation of the External Energy Auditor by itself, the City will determine its procurement process in its sole discretion.

**8.9.2.4** The External Energy Auditor will be appointed by the City and will act independently from and not as an agent of City. Any advisor or member of City, a PPC-Related Entity, or a Lender is deemed to have an organizational conflict of interest and not eligible to respond to the solicitation.

**8.9.2.5** City will be responsible for all costs related to the External Energy Auditor solicitation processes and all amounts under the terms of the agreement with the External Energy Auditor.

**8.9.2.6** Principal Project Company shall, promptly and reasonably, provide any information necessary for the External Energy Auditor to reasonably undertake its obligations in providing the services in accordance with Section 8.9.2.1

**8.9.2.7** Principal Project Company shall comply with the operational recommendations of the External Energy Auditor at its own cost in accordance with Section 6 (External Energy Auditor) of Exhibit 12 (Energy Management).

**8.9.3 Failure to meet LEED Requirements**

**8.9.3.1** In the event that LEED BD+C Gold Rating, including the mandatory 12x EAc2 Optimize Energy Performance credits, is not obtained within 12 months after the Substantial Completion Date, other than as a sole and direct result of any affirmative act or omission of City or unless unreasonably withheld by USGBC or an equivalent body, Principal Project Company shall pay to City liquidated damages in the amount of \$100,000. In the event that LEED BD+C Gold Rating, including the mandatory 12x EAc2 Optimize Energy Performance credits, is not obtained within 24 months after the Final Acceptance Date, other than as a sole and direct result of any affirmative act or omission of City or unless unreasonably withheld by USGBC or an equivalent body, such event shall be a PPC Default pursuant to Section 16.

**8.9.3.2** Principal Project Company shall submit all necessary documentation to achieve LEED BD+C Gold within 6 months after the Substantial Completion Date.

**8.9.3.3** The Parties agree that such liquidated damages are not a penalty but represent a genuine and reasonable pre-estimate of the damages that the City will suffer as a result of the happening of the specified event and would be difficult or impossible to quantify upon the happening of the specified event. Such payment shall constitute full and final settlement of all damages that may be claimed by the City as a result of a failure by Project Company to achieve LEED BD+C Gold Rating and the minimum credit requirements and, for greater certainty, a failure by Project Co to achieve LEED BD+C Gold Rating shall not result in a PPC Default Event provided that such liquidated damages are promptly paid. The Parties agree that such liquidated damages shall be payable whether or not City incurs or mitigates its damages, and that City shall not have any obligation to mitigate any such damages.

## ARTICLE 9. CONTRACTING AND LABOR PRACTICES

### 9.1 Disclosure of Contracts and Contractors

**9.1.1** The provisions of this Section 9.1 (Disclosure of Contracts and Contractors) apply with respect to (a) Prime Contracts and lower tier Contracts entered into by Prime Contractors, excluding personal services contracts and contracts with Suppliers other than Key Contractors, and (b) Contracts with Affiliates, regardless of the nature or tier of the Contract.

**9.1.2** With each Monthly Report required during the D&C Period and each Infrastructure Facility monthly report required during the IFM Period, Principal Project Company shall provide City with a list of all Contracts, including, for each Contract, (a) the name of the Contractor (indicating the Contractor is an Affiliate, if applicable), (b) a summary of the scope of work, and (c) the dollar value. If the Contract includes Construction Work or Renewal Work, include assurance that the prevailing wage for labor, as specified in the Contract Documents, is paid for all labor performed under such Contract.

**9.1.3** Principal Project Company shall allow City full access to all Contracts and records regarding Contracts and shall deliver to City, (a) within 10 days after execution, copies of all Key Contracts, guarantees thereof and amendments and supplements to Key Contracts and guarantees thereof, and (b) within 10 days after receipt of a request from City, copies of all other Contracts (including amendments and supplements) as may be requested.

### 9.2 Responsibility for Work, Contractors and Employees

**9.2.1** Principal Project Company may enter into one or more Contracts with Contractors to perform portions of the Work.

**9.2.2** The retention of Contractors by Principal Project Company does not relieve Principal Project Company of its responsibilities under this Agreement or for the quality of the Work or materials or services provided by it.

**9.2.3** Each Contract shall include (a) terms sufficient to ensure both the acknowledgement of and compliance by the Contractor with the applicable requirements of the Contract Documents and to ensure that City has the ability to exercise its rights specified in the Contract Documents, (b) those terms that are specifically required by the Contract Documents to be included in such Contract, and (c) all applicable Laws.

**9.2.4** Principal Project Company shall require each Contractor to familiarize itself with the requirements of any and all applicable Laws and the conditions of any required Regulatory Approvals.

**9.2.5** Nothing in this Agreement will create any contractual relationship between City and any Contractor. No Contract entered into by or under Principal Project Company shall impose any obligation or liability upon any Indemnitee to any Contractor or any of its employees. Principal Project Company shall include, or cause to be included, a provision in all Contracts acknowledging the same.

**9.2.6** Principal Project Company shall supervise and be fully responsible for any PPC Fault while performing Work under this Agreement or while on the Project Site, as though Principal Project Company directly employed all such individuals.

**9.2.7** If City has reasonable cause to disapprove of an employee of any PPC-Related Entity, Principal Project Company shall remove such employee within 10 Business Days after receipt of written Notice from City of such disapproval.

### **9.3 Key Contracts; Contractor Qualifications**

#### **9.3.1 Key Contract Approvals, Amendments and Termination; Use of and Change in Key Contractors**

**9.3.1.1** Principal Project Company shall provide City, for City's review and comment, draft copies of (a) any Key Contracts not executed before the Effective Date and (b) proposed material amendments to Key Contracts (regardless of whether the Key Contract to be amended was executed before the Effective Date). Such drafts shall be provided at least 30 days before execution of a Key Contract or an amendment to a Key Contract, as applicable. Any proposed amendment to required terms described in Section 9.3.2 (Key Contract Provisions) shall be considered a material amendment.

**9.3.1.2** Except as otherwise approved by City, Principal Project Company shall retain, employ and utilize the firms and organizations identified in the Implementation Proposal to fill the roles designated therein.

**9.3.1.3** Principal Project Company shall not terminate or permit termination of any Key Contract or permit any substitution, replacement or assignment of any Key Contractor, except with City's prior approval; provided, however, that City's prior approval is not required in the event of (a) any termination of this Agreement where City elects not to assume Principal Project Company's future obligations under such Key Contract, (b) any suspension, debarment, disqualification or removal (distinguished from ineligibility due to lack of financial qualifications) of the Key Contractor, or (c) any agreement for voluntary exclusion of the Key Contractor, from bidding, proposing or contracting with any federal, State or local department or agency. City agrees to act reasonably with respect to approval of a replacement in the case of material uncured default by the Key Contractor under the Key Contract.

#### **9.3.2 Key Contract Provisions**

**9.3.2.1** Each Key Contract shall comply with the requirements set forth in Exhibit 14 (Key Contract Provisions).

### **9.4 Prompt Payment to Contractors**

Principal Project Company shall comply, and shall cause each Contractor to comply, with the provisions of Business and Professions Code section 7108.5, California Civil Code sections 8122-8138, and any other applicable Law relating to prompt payment of contractors and/or subcontractors and waivers and releases by them of stop payment notices and payment bond rights.

---

## 9.5 Key Personnel

Principal Project Company shall:

- (a) retain, employ and utilize the individuals specifically listed in the Implementation Proposal, and retain, employ and utilize individuals qualified for the positions described in Section 1.1.4 of Division 1 of the Technical Requirements to fill Key Personnel positions for the relevant period identified in the Technical Requirements; Principal Project Company acknowledges that if City reasonably determines that an individual is not qualified for a Key Personnel position, Principal Project Company shall at City's request replace that individual with one that meets the required qualifications;
- (b) not change or substitute any such individuals except due to retirement, death, disability, incapacity, or voluntary or involuntary termination of employment, or as otherwise approved by City under Section 9.5(c);
- (c) promptly provide Notice to City of any proposed replacement for any Key Personnel position. City shall have the right to review the qualifications and character of each individual to be appointed to a Key Personnel position and shall act reasonably in approving or disapproving use of such individual in such position before the commencement of any Work by such individual;
- (d) cause each Key Person to dedicate the full amount of time necessary for the proper prosecution and performance of the Work, as more specifically described in Section 1.1.4 of Division 1 of the Technical Requirements;
- (e) commit each Key Person to the Project in accordance with Section 1.1.4 of Division 1 of the Technical Requirements;
- (f) provide City with office and cell phone numbers and email addresses for each Key Person. City may contact Key Personnel 24 hours per day, seven days per week;
- (g) ensure that the Project Manager identified in the Implementation Proposal or otherwise approved by City (i) will have full responsibility for the prosecution of the D&C Work, (ii) will act as agent and be a single point of contact in all matters relating to the D&C Work on behalf of Principal Project Company at least until Final Acceptance, (iii) will be present (or ensure that his or her approved designee is present) at the construction site at all times that Construction Work is performed, and (iv) will be available to respond promptly to City; and
- (h) ensure that the Quality Program Manager identified in the Implementation Proposal or otherwise approved by City (i) will have full responsibility for quality assurance and quality control with respect to D&C Work until Final Acceptance, (ii) is present (or his or her approved designee is present) at the construction site at all times that Construction Work is performed, and (iii) will be available to respond promptly to City.

---

### 9.5.1 Key Personnel Deductions

**9.5.1.1** If an individual filling a Key Personnel role is not available for, or actively involved in, the performance of the Work per their position requirement as required in Section 1.1.4 of Division 1 of the Technical Requirements, as determined by City in its good faith discretion, then:

- (a) Principal Project Company acknowledges and agrees that City and the Project will suffer significant and substantial damages and that it is impracticable and extremely difficult to ascertain and determine the actual damages which would accrue to City in such event;
- (b) Subject to Section 9.5.2 (Limitations on Deductions for Unavailability of Key Personnel), Principal Project Company shall pay City a Key Personnel deduction as follows, for each position held by such individual, as deemed compensation to City for such damages:

Category	KEY PERSONNEL DEDUCTION
Project Manager	\$150,000
Deputy Project Manager	\$75,000
Design Manager	\$75,000
Construction Manager	\$75,000
IFM Manager	\$75,000
Quality Program Manager	\$75,000
Project Safety Representative	\$75,000
Construction Superintendent	\$75,000
Third Party and Utility Coordinator Manager	\$75,000

and

- (c) Principal Project Company agrees to pay a further Key Personnel deduction for all Key Personnel in the amount of 50% of the applicable amounts listed under Section 9.5.1.1(b) for each 6 calendar month period where any Key Personnel position is vacant or not being fulfilled in accordance with this Agreement as determined by City.

**9.5.1.2** Principal Project Company agrees that the Key Personnel deductions payable in accordance with Section 9.5.1.1 are liquidated damages, not a penalty and are reasonable under the circumstances existing as of the Effective Date. The Parties have agreed to liquidated damages under this Section 9.5.1 (Key Personnel Deductions) in order to fix and limit Principal Project Company's costs and to avoid later Contract Disputes over what amounts of damages are properly chargeable to Principal Project Company.

**9.5.1.3** City may deduct amounts owing from Principal Project Company to City under Section 9.5.1.2 from amounts owing from City to Principal Project Company under this

Agreement (including the Milestone Payment), or to collect such liquidated damages from the Performance Bond.

## **9.5.2 Limitations on Deductions for Unavailability of Key Personnel**

**9.5.2.1** Principal Project Company is not liable for liquidated damages under Section 9.5.1.1 if:

- (a) Principal Project Company removes or replaces such personnel at the direction of City; or
- (b) An individual filling a Key Personnel position is unavailable because of the application of applicable Law, or due to death, disability, family leave, retirement, injury or no longer being employed by the applicable PPC-Related Entity (provided that moving to an affiliated company or a Subcontractor is not considered grounds for avoiding liquidated damages),

provided Principal Project Company promptly proposes to City a replacement for such personnel for review and approval within 30 days of unavailability, in the case of Sections 9.5.2.1(a) or 9.5.2.1(b).

**9.5.2.2** Principal Project Company may replace the Principal Project Company's Project Manager not more frequently than every three years during the IFM Period without incurring liquidated damages under Section 9.5.1 (Key Personnel Deductions), but only if Principal Project Company replaces the outgoing Principal Project Company's Project Manager with a City-approved replacement before the outgoing individual vacates the position.

**9.5.2.3** Upon approval of any Key Personnel replacement, the new individual shall be considered a Key Personnel for all purposes under this Agreement, including this Section 9.5.2 (Limitations on Deductions for Unavailability of Key Personnel).

## **9.5.3 Skilled Personnel; Removal at City Direction**

All individuals performing the Work shall have the skill and experience and any licenses or certifications required to perform the Work assigned to them. If City determines, in its good faith discretion, that any individual employed by Principal Project Company or by any Subcontractor is not performing the Work in a proper, safe and skillful manner, then at the written request of City, Principal Project Company or such Subcontractor shall promptly remove such individual and such individual shall not be re-employed on the Project without the prior written approval of City, in its good faith discretion. If Principal Project Company or the Subcontractor fails to remove such individual or individuals or fails to furnish skilled and experienced personnel for the proper performance of the Work, then City may, in its good faith discretion, suspend the affected portion of the Work for cause by delivery of Notice of such suspension to Principal Project Company. Such suspension shall in no way relieve Principal Project Company of any obligation contained in the Contract Documents or entitle Principal Project Company to a time extension, compensation or other Change Order. Once compliance is achieved, as determined by City, City will deliver Notice to Principal Project Company and Principal Project Company shall be entitled to and shall promptly resume the Work. If City's determination is later found to not have

been exercised in good faith, such suspension shall be considered a suspension for convenience.

## **9.6 DBE Participation**

### ***[NOTE TO PNC: DBE PROVISIONS/PROGRAM UNDER DEVELOPMENT]***

**9.6.1** Principal Project Company shall either achieve or demonstrate it has exercised good faith efforts to achieve the following Disadvantaged Business Enterprise (“DBE”) participation goals:

- (a) % of Principal Project Company’s costs for the Design Work;
- (b) % of Principal Project Company’s costs for the Construction Work;

**9.6.2** Achievement of the DBE participation goal for each type of Work identified in Sections 9.6.2(a) and (b) will be measured as a percentage of Principal Project Company’s costs for each such type of Work, where the total amount paid to DBE firms for each such type of Work will be measured against Principal Project Company’s costs for each such type of Work, without reduction for Deductions or other offsets.

**9.6.3** Principal Project Company shall comply with the terms and conditions set forth in Exhibit [ ] (DBE Compliance Manual) and in the approved DBE Utilization Plan.

**9.6.4** If Principal Project Company fails to achieve any DBE participation goal, then Principal Project Company must demonstrate that it met all good faith efforts requirements for achieving the goal in accordance with 49 C.F.R. Appendix A to Part 26 - Guidance Concerning Good Faith Efforts and the DBE Compliance Manual. The efforts employed must at a minimum include those that one could reasonably expect a contractor to take if the contractor were actively and aggressively trying to obtain DBE participation sufficient to meet the DBE goals (See 49 C.F.R. Part 26, Appendix A).

**9.6.5** To obtain an accurate record of Principal Project Company’s performance towards meeting its DBE participation commitments and DBE goals, Principal Project Company shall utilize City’s reporting system to report DBE and non-DBE payments and all other reporting activities throughout the performance of Work. Principal Project Company shall maintain an accurate listing of all DBE and non-DBE firms in City’s reporting system. Principal Project Company shall ensure that all relevant Contractors, Suppliers and/or brokers (at all tiers) participate in trainings in the use and operation of City’s reporting system and comply with the verification of payments and other related reporting requirements through the reporting system. City may require additional reports to ensure adequate reporting of DBE participation for the Project.

**9.6.6** Principal Project Company shall complete all DBE and non-DBE reporting requirements on City’s reporting system in accordance with the DBE Compliance Manual. If City provides a notice to Principal Project Company indicating that Principal Project Company has not achieved a DBE participation goal, Principal Project Company shall, within ten days of such notice, submit for City’s consideration Principal Project Company’s Good Faith Efforts documentation for the applicable time period.

---

**9.6.7** Failure by Principal Project Company to carry out the DBE requirements set forth in this Section 9.6 (DBE Participation) is a material breach of this Agreement, which may result in:

- (a) the termination of this Agreement;
- (b) Noncompliance Points and Deductions as set forth in Exhibit 4 (Payment Mechanism); and/or
- (c) other administrative remedies, including monetary liability, as set forth in Sections 801 and 802 of Exhibit [ ] (DBE Compliance Manual) or in this Agreement.

**9.6.8** Principal Project Company acknowledges the importance of Principal Project Company and Contractors timely tracking and entering DBE compliance data into City's reporting system. City's comments, approvals, acceptances, NTPs, payments, including the Milestone Payment, Availability Payments, periodic payments, progress payments, and other actions shall not waive or limit any remedies City has under the Contract Documents should City determine that Principal Project Company has failed to carry out the DBE requirements pursuant to this Section 9.6 (DBE Participation).

**9.6.9 DBE Utilization Plan**

**9.6.9.1** Within [ ] days after issuance of NTP 1, Principal Project Company shall submit to City for approval in its sole discretion, a DBE Utilization Plan that describes Principal Project Company's robust plan outreach, marketing, recruitment, and other good faith efforts for achieving the DBE participation goals set forth in this Section 9.6 (DBE Participation). The DBE Utilization Plan shall, at a minimum, include the following components:

- (a) provisions for submission of DBE forms and affidavits through City's DBE reporting system;
- (b) expanded descriptions of the types of proactive DBE and small business bid-specific marketing, recruitment, outreach and community engagement efforts that Principal Project Company will implement while preparing for and undertaking the D&C Work in order to include DBEs and on the Project, including:
  - (i) processes for timely communications and outreach methods that Principal Project Company will use;
  - (ii) processes to keep track of potential DBEs, small businesses and other Contractors on the Work;
  - (iii) proposed innovative methods for (A) involving new and emerging DBEs, and (B) identifying firms that might potentially be certified as DBEs, and for assisting them to become DBE-certified and involved in the Project; and
  - (iv) a discussion of how these efforts will flow through tiers of Subcontractors on the Project;

- (c) description of efforts Principal Project Company has made and will make to recruit and utilize DBE firms such as graphic design and printing, marketing, outreach, training, employment services, catering companies, maintenance companies, janitorial services, security companies and other trades to help meet the DBE business goals;
- (d) description of proposed DBE and small business capacity-building efforts to be implemented throughout the Work, including methods to assist DBEs with record-keeping and compliance, bonding, financing, access to supplies and other capabilities;
- (e) description of the estimated DBE participation level for Design Work for each month of the Design Work and cumulatively, including a table or diagram of an estimated schedule that illustrates projected work sequencing of DBE utilization for the Design Work;
- (f) description of the estimated DBE participation level for Construction Work for each month of the Construction Work and cumulatively, including a table or diagram of an estimated schedule that illustrates projected work sequencing of DBE utilization for the Construction Work;
- (g) description of processes and procedures that Principal Project Company will use to monitor, track, document and report recruitment, progress and utilization of DBEs, and to maintain and adjust the DBE participation schedule to help ensure achievement of the DBE goals, including time intervals at which Principal Project Company will employ these processes and procedures;
- (h) description of specific measures that Principal Project Company will undertake throughout the duration of the D&C Work to achieve and manage the DBE goals, including training workshops, technical and financial assistance, support services, mentor/protégé relationships, recruiting and encouraging potential DBEs to obtain certification, etc. Include a proposed schedule of events/activities;
- (i) description of how Principal Project Company will manage DBEs on the Project, including processes for project management, technical performance reviews, feedback and dispute resolution to resolve issues that may arise;
- (j) description of other procedures and processes for meeting DBE requirements, such as documenting and submitting affidavits for additional DBEs committed to the Project to meet or exceed the DBE goals, prompt pay requirements and substitution/replacement of DBEs; and
- (k) description of any other innovative or additional good faith efforts activities already undertaken or ones Principal Project Company plans to undertake that are not listed above or listed in 49 C.F.R. Part 26.

**9.6.10** Principal Project Company shall engage the DBE Contractors identified in the table set forth in Exhibit [ ] (List of Approved DBE Subcontractors and Suppliers) as part of Principal

Project Company's efforts to meet Principal Project Company's DBE participation commitments and DBE goals during the Term, subject to the DBE Contractor substitution procedures set forth in Exhibit [ ] (DBE Compliance Manual).

**9.6.11** Not later than [150] days following NTP 1, in accordance with the requirements set forth in Exhibit [ ] (DBE Compliance Manual), Principal Project Company shall provide to City for approval a list of all the DBE and small business firms that Principal Project Company proposes to engage to meet Principal Project Company's DBE participation commitments for the Construction Work.

**9.6.12** Unless City's prior written consent is provided for termination or substitution of a DBE Contractor, Principal Project Company shall not be entitled to any payment for work or materials identified for a DBE Contractor unless it is performed or supplied by such DBE Contractor.

**9.6.13 DBE Compliance Contractor**

Principal Project Company shall retain or cause to be retained a Contractor to provide DBE liaison and compliance services that:

- (a) is not corporately affiliated with Principal Project Company or a Key Contractor; and
- (b) has primary responsibility on behalf of Principal Project Company to coordinate Principal Project Company's DBE compliance efforts and interface with City regarding DBE and SBE matters.

**9.6.14 DBE Compliance Assessment**

**9.6.14.1** Annually until Substantial Completion, following the anniversary of the Effective Date each year, City will assess Principal Project Company's utilization during the preceding 12-month period of DBE firms in performance of Design Work and Construction Work. If after the end of any such 12-month period Principal Project Company is behind in meeting a DBE participation goal under Section 9.6.1(a) or (b), City may require Principal Project Company to update its plan and efforts to achieve the goal, at no additional cost to City.

**9.7 Contracts with Affiliates**

**9.7.1** Affiliates may perform Work only if:

- (a) Principal Project Company or a Contractor executes a written Contract with the Affiliate which:
  - (i) complies with all applicable provisions of the Contract Documents, including this Article 9 (Contracting and Labor Practices), is consistent with Good Industry Practice, and is in form and substance substantially similar to Contracts then being used by Principal Project Company or Affiliates for similar Work or services with unaffiliated contractors;
  - (ii) sets forth the scope of Work and all the pricing, terms respecting the scope of Work;

- (iii) contains pricing, scheduling and other terms no less favorable to Principal Project Company than those that Principal Project Company could reasonably obtain in an arms'-length, competitive transaction with an unaffiliated Contractor. Principal Project Company shall bear the burden of proving that the same are no less favorable to Principal Project Company; and
- (b) The Work to be performed by the Affiliate is not Work that any Contract Document, the Project Management Plan indicates is to be performed by an independent or unaffiliated party.

**9.7.2** Before Principal Project Company or a Contractor enters into a written Contract (including supplements and amendments) with an Affiliate, Principal Project Company shall submit a true and complete copy of the proposed Contract to City for comment. City shall have 20 days after receipt to deliver its comments to Principal Project Company. If the Contract with the Affiliate is a Key Contract, it shall be subject to City's approval as provided in Section 9.3.1 (Key Contract Approvals, Amendments and Termination; Use of and Change in Key Contractors).

**9.7.3** Principal Project Company shall make no payments to Affiliates for work or services in advance of provision of such work or services, except for reasonable mobilization payments or other payments consistent with arm's length, competitive transactions of similar scope. Advance payments in violation of this provision shall be excluded from the calculation of Termination Compensation.

## **9.8 Labor Standards**

**9.8.1** In performing the Work, Principal Project Company shall comply, and require all Contractors to comply, with all applicable federal and State labor, occupational safety and health Laws and orders, including payment of Prevailing Rate of Wages.

**9.8.2** By the 15<sup>th</sup> day of each calendar month during the Term, Principal Project Company shall submit to City certified payroll records for all employees of Principal Project Company and Contractors at all tiers for the preceding calendar month.

**9.8.3** In the event a prevailing wage law violation is discovered, City may withhold from payments owing (including the Milestone Payment and any Availability Payments) Principal Project Company's underpaid back wages plus penalties as required under Section 6.22(e)(8) (Non-Compliance with Wage Provisions – Penalties) of the San Francisco Administrative Code until the violation is resolved.

**9.8.4** All individuals performing the Work shall be qualified, experienced, competent and skilled in the performance of the portion of the Work assigned and related obligations of Principal Project Company in accordance with the Contract Documents and any applicable minimum levels in the Technical Requirements.

**9.8.5** If any individual employed by Principal Project Company or any Contractor lacks required qualifications, skill, competence, experience, licensing, certification, registration, permit, approval, bond or insurance or is not performing the Work in a proper, safe and skillful

manner, then Principal Project Company shall, or shall cause such Contractor to, remove such individual, and such individual shall not be re-employed on the Work.

**9.8.6** If, after Notice and reasonable opportunity to cure, Principal Project Company fails to take action as required by Section 9.8.5, or if Principal Project Company fails to ensure that qualified, skilled, experienced, competent, licensed, certified, registered, permitted and approved personnel are furnished for the proper performance of the Work, then City may suspend the affected portion of the Work by delivering to Principal Project Company Notice of such suspension. Such suspension shall in no way relieve Principal Project Company of any obligation contained in the Contract Documents.

## **9.9 Local Hiring Requirements for Construction Work and Renewal Work**

Principal Project Company shall comply with local hiring requirements for Construction Work and Renewal Work, as mandated by the San Francisco Local Hiring Policy for Construction set forth in Chapter 82 of the Administrative Code and related implementing regulations.

### **9.10 First Source Hiring Program**

Principal Project Company shall comply with all applicable provisions of the First Source Hiring Program as set forth in Chapter 83 of the San Francisco Administrative Code, including all enforcement and penalty provisions.

### **9.11 SFMTA Employment Training Program**

**9.11.1** As part of the SFMTA Employment Training Program, Principal Project Company shall cause at least 4 professional services trainees to be hired during the period of the D&C Work for professional services performed for the Infrastructure Facility. If a person hired through the First Source Hiring Program also meets the trainee requirements described below, that person may be counted toward these trainee hiring requirements. Trainees may be obtained through the City's One Stop Employment Center, which works with various employment and job training agencies/organizations or other employment referral source.

**9.11.2** Principal Project Company shall ensure that:

- (a) Each trainee is hired by either the Principal Project Company or a Contractor providing professional services for the Infrastructure Facility.
- (b) No trainee is counted towards meeting more than one contract requirement. For example, if City and Principal Project Company enter into this Agreement and another contract, any trainee hired for services under this Agreement would not count toward the trainee hiring requirement for the other contract.
- (c) Each trainee meets enrollment qualifications established under the City's First Source Hiring Program as follows:
  - (i) "Qualified" with reference to an economically disadvantaged individual shall mean an individual who meets the minimum bona fide occupational qualifications provided by the prospective employer to the

San Francisco Workforce Development System in the job availability notices required by the First Source Hiring Program.

- (ii) “Economically disadvantaged individual” shall mean an individual who is either (i) eligible for services under the Workforce Investment Act of 1988 (29 U.S.C. 2801 et seq.), as determined by the San Francisco Private Industry Council; or (ii) designated “economically disadvantaged” by the FS First Source Hiring Program HP administration, which means an individual who is at risk of relying upon, or returning to, public assistance.
- (iii) “On-the-job training” means the hiring party hire the trainee on a full-time basis for at least 12 months or on a part-time basis for 24 months (using the full-time or part-time definition of the employer hiring that trainee), with prior approval offering him/her on-the-job training that allows the trainee to progress on a career path.
- (d) Before a trainee is hired by a Contractor or by Principal Project Company, Principal Project Company submits for City’s approval a description and summary of training proposed for that trainee, along with the rate of pay for the position.
- (e) A trainee’s commitment does not require that he/she is used only on this Project; the trainee may also be used on other Principal Project Company or Contractor projects that may be appropriate for the trainee’s skill development.

Principal Project Company acknowledges its obligation to hire or cause to be hired trainees pursuant to the Trainee Plan and shall comply with the Trainee Plan during the Term.

#### **9.12 Deductions and Noncompliance Points Relating to Local Hire and SFMTA Training Program Requirements Development**

If Principal Project Company fails to meet certain requirements set forth in this [Article 9](#) (Contracting and Labor Practices), City may, without limiting City’s other rights and remedies under this Agreement, assess Deductions and Noncompliance Points as provided in [Exhibit 4](#) (Payment Mechanism).

#### **9.13 Ethical Standards**

**9.13.1** Principal Project Company or its representatives shall not make, nor cause to be made, any cash payments, commissions, employment, gifts, entertainment, free travel, loans, free work, substantially discounted work, or any other considerations to (a) City representatives, employees, or their relatives, or (b) representatives of subcontractors, or material suppliers or any other individuals, organizations, or businesses receiving funds in connection with this Project.

**9.13.2** Principal Project Company employees (or their relatives), agents, or subcontractors shall not receive any cash payments, commissions, employment, gifts, entertainment, free travel, loans, free work, or substantially discounted work or any other considerations from any other contractors or from any City employee, agent, representative.

**9.13.3** Principal Project Company agrees to provide Notice to a designated City representative within 48 hours of any instance where Principal Project Company becomes aware of a failure to comply with the provisions of this Section 9.13 (Ethical Standards).

**ARTICLE 10. INSURANCE; PAYMENT AND  
PERFORMANCE SECURITY; INDEMNITY**

**10.1 Insurance**

**10.1.1 Insurance Policies and Coverage**

Principal Project Company shall procure and maintain, or cause to be procured or maintained, the Insurance Policies identified in this Section 10.1 (Insurance) and in Exhibit 7 (Insurance Requirements) strictly in accordance with the minimum coverage requirements and terms of coverage as set forth in Exhibit 7 (Insurance Requirements) and in this Section 10.1 (Insurance). Principal Project Company shall timely pay, or cause to be paid, the premiums for all Insurance Policies and insurance coverages required by this Agreement. There shall be no recourse against City or any of the other City Additional Insureds for payment of premiums or other amounts with respect to the Insurance Policies, except to the extent (a) included within the Availability Payments or (b) an increase in premiums is a compensable Extra Work Cost as part of a Compensable Delay Event or Compensable Relief Event.

**10.1.2 General Insurance Requirements**

**10.1.2.1 Insurers**

All insurance required hereunder shall be procured from insurers that at the time coverage commences are authorized to do business in the State and have a rating of not less than A-:VIII according to A.M. Best's Financial Strength Rating and Financial Size Category, except as otherwise provided in Exhibit 7 (Insurance Requirements) or approved in writing by City in its reasonable discretion.

**10.1.2.2 Deductibles; Self-Insured Retentions; Claims Exceeding Policy Limits**

Except to the extent expressly provided otherwise in the Contract Documents, Principal Project Company shall be responsible for paying all insurance deductibles and self-insured retentions, and City shall have no liability for deductibles, self-insured retentions or claim amounts exceeding the required policy limits. If City is the sole cause of an insured Loss (including Losses caused by the SFMTA's operations) City shall pay the applicable insurance deductibles and self-insured retentions, notwithstanding any subrogation waivers. In the event that any required insurance coverage involves a self-insured retention: (a) the entity responsible for the self-insured retention shall have an authorized representative issue a letter to City, at the same time the Insurance Policy is to be procured, stating that it shall protect and defend City to the same extent as if an insurer provided coverage for City; and (b) Principal Project Company shall ensure that the relevant Insurance Policy expressly permits (but does not obligate) City, or a designee of City, to pay the self-insured retention to satisfy any policy condition requiring payment of the self-insured retention for coverage to apply. If the entity responsible for the self-insured retention does not pay the self-insured retention amount when due, then City may, but is not obligated to, pay the self-insured retention amount on behalf of such entity, and Principal Project Company shall indemnify City for such amount and any other Losses incurred by City in connection with the entity's failure to pay the self-insured retention amount when due.

### 10.1.2.3 Primary Coverage

Without any limitation, each policy shall provide that the coverage afforded under the policy is primary and noncontributory with respect to any other insurance available to all named and City Additional Insureds.

### 10.1.2.4 Verification of Coverage

- (a) When Principal Project Company is required by the Contract Documents to initially obtain or cause to be obtained an Insurance Policy, Principal Project Company shall deliver to City a certificate of insurance before policy inception followed by a binder of insurance in a form reasonably acceptable to City no later than 30 days following policy inception. Principal Project Company shall make submit all certificates of insurance including relevant endorsements attached to the certificates of insurance prior to each policy effective date and binders of insurance as soon as they are issued by the insurers but not later than 30 days following policy inception. Each required binder must state the identity of all insurers, list all named and additional insureds, state the type of coverage and limits including any applicable sublimits, list all deductibles and self-insured retentions, provide the policy effective and expiration date, and list all applicable endorsements once available.
- (b) In addition, as soon as they become available, Principal Project Company shall deliver to City (i) a true and complete copy of each such Insurance Policy or modification, or renewal or replacement Insurance Policy obtained by Principal Project Company or a Prime Contractor and all endorsements thereto and (ii) satisfactory evidence of payment of the premium therefor.
- (c) If Principal Project Company has not provided City with the certificates of insurance, including applicable endorsements, prior to policy inception and evidence of premium payment within 30 days after each payment is due, City may, upon written Notice to Principal Project Company, in addition to any other available remedy, without obligation and without further inquiry as to whether such insurance is actually in force, elect to obtain such an Insurance Policy; and Principal Project Company shall reimburse City for any Recoverable Costs thereof upon demand. In addition, City shall have the right, without obligation or liability, to suspend all or any portion of Work, during any time that such proofs of coverage, in compliance with this Section 10.1 (Insurance), have not been provided.

### 10.1.2.5 Waivers of Subrogation

City and Principal Project Company waive all rights against each other, against each of their respective agents, employees and Project consultants, and against Contractors and their respective members, directors, officers, employees, subcontractors and agents for any claims to the extent covered and paid by insurance obtained pursuant to this Section 10.1 (Insurance), with the exception of professional liability insurance and except such rights as they may have to the proceeds of such insurance. Principal Project Company shall require all Contractors to provide similar waivers in writing, each in favor of all other parties specified above. Each policy

for which Principal Project Company or any Contractor is required to provide coverage for the City Additional Insureds shall include a waiver of any right of subrogation against the City Additional Insureds.

#### **10.1.2.6 No Recourse**

Except as may be inclusive within the MaxAP or as expressly provided otherwise in this Agreement, there shall be no recourse against City for payment of premiums or other amounts with respect to the insurance Principal Project Company is required to provide hereunder.

#### **10.1.2.7 Support of Indemnifications**

The insurance coverage Principal Project Company is required to provide hereunder shall support but is not intended to limit Principal Project Company's indemnification obligations under the Contract Documents.

#### **10.1.2.8 Additional Terms and Conditions**

- (a) Each Insurance Policy shall state or be endorsed to state that coverage cannot be canceled except after 30 days' prior Notice (or ten days in the case of cancellation for non-payment of premium) has been given to City. No policy language or endorsement shall include any limitation of liability of the insurer for failure to provide such Notice.
- (b) No Insurance Policy shall provide coverage on a "claims made" basis, with the exception of any professional liability Insurance Policies, unless specifically approved in writing by City.

#### **10.1.2.9 Requirements Not Limiting**

The Parties acknowledge and agree that:

- (a) requirements for specific coverage features or limits contained in this Section 10.1 (Insurance) and in Exhibit 7 (Insurance Requirements) are not intended as a limitation on coverage, limits or other requirements, or a waiver of any coverage normally provided by any Insurance Policy;
- (b) specific reference to a given coverage feature is not intended to be all inclusive, or to the exclusion of other coverage, or a waiver of any type; and
- (c) all insurance coverage and limits provided by Principal Project Company, or by third parties pursuant to obligations of Principal Project Company under this Agreement, and, in each case, available or applicable to this Agreement are intended to apply to the full extent of the Insurance Policies, and nothing contained in this Agreement limits, or shall be deemed to limit, the application of such insurance coverage.

Except as otherwise specifically set forth in the Contract Documents, Principal Project Company may meet its insurance obligations in any manner Principal Project Company deems reasonably

appropriate, so long as, in each case, and with respect to the coverages prescribed for each Insurance Policy, Principal Project Company meets all the requirements therefor.

#### **10.1.2.10 Deemed Self-Insurance by Principal Project Company**

If, in any instance, Principal Project Company (i) has not performed its obligations respecting insurance coverage set forth in this Agreement or (ii) is unable to enforce and collect any such insurance for failure (x) to assert claims in accordance with the terms of the Insurance Policies or (y) to prosecute claims diligently, then, for purposes of determining Principal Project Company's liability and the limits thereon or determining reductions in compensation due from City to Principal Project Company on account of available insurance, Principal Project Company shall be treated as if it has elected to self-insure up to the full amount of insurance coverage which would have been available had Principal Project Company performed such obligations and not committed such failure.

#### **10.1.2.11 Umbrella and Excess Policies**

Principal Project Company shall have the right to satisfy the requisite insurance coverage amounts for liability insurance through a combination of primary policies and umbrella or excess policies. Umbrella and excess policies shall comply with all insurance requirements for the applicable type of coverage ("follow form").

#### **10.1.2.12 Inadequacy of Required Coverage**

City makes no representation that the scope of coverage and limits of liability specified for any Insurance Policy to be carried pursuant to this Agreement or approved variances therefrom are adequate to protect Principal Project Company against its undertakings under this Agreement to City, or its liabilities to any third party. It is the responsibility of Principal Project Company and each Subcontractor to determine if any changes or additional coverages are required to adequately protect their interests. No such limits of liability or approved variances therefrom shall preclude City from taking any actions as are available to it under this Agreement, or otherwise under applicable Law.

#### **10.1.2.13 No Relief from Liabilities and Obligations**

Neither compliance nor failure to comply with the insurance provisions of this Agreement will relieve Principal Project Company or City of their respective liabilities and obligations under this Agreement.

#### **10.1.2.14 Adjustments in Coverage Amounts**

- (a) At least once every two years during the Term (commencing initially on the Substantial Completion Date), City and Principal Project Company shall review and may, upon mutual agreement, adjust, as appropriate, the per occurrence and aggregate limits for the Insurance Policies that have stated dollar amounts set forth in Exhibit 7 (Insurance Requirements).
- (b) In determining adjustments, Principal Project Company and City shall take into account (i) claims and loss experience for the Project, (ii) the physical condition of the Project, (iii) the Safety Compliance and Noncompliance Points

record for the Project, (iv) best practices in the insurance industry and (v) the terms of the Financing Documents.

- (c) If a City Change to increase required limits of Insurance Policies results in a net increase in applicable insurance premiums, Principal Project Company shall be entitled to the actual amount of such net increase (without profit or mark-up), provided that to the extent such adjustments are made to reflect Principal Project Company's performance on the Project (including for reasons described in Section 10.1.2.14(b)(i), (ii), or (iii)), Principal Project Company shall not be entitled to any compensation.

### 10.1.3 Insurance Premium Benchmarking

During the IFM Period, City will allocate the risk or benefit of increases and decreases in insurance premiums through an insurance benchmarking process as set forth in this Section 10.1.3 (Insurance Premium Benchmarking). In no event shall City participate in any insurance premium risk associated with additional or extended coverages beyond those required under Exhibit 7 (Insurance Requirements), or changes in premiums that are not the result of market-wide factors. The benchmarking process will occur as follows:

- (a) For the purposes of the benchmarking process, the “**Starting Insurance Benchmarking Premiums**” shall equal the following:

Coverage	Agreement Reference	Amount
Worker’s Compensation and Employer’s Liability	<u>Exhibit 7, Section 2.1</u>	<i>[\$•] [Note: To be included based on Implementation Phase Proposal]</i>
Commercial General Liability	<u>Exhibit 7, Section 2.2</u>	<i>[\$•] [Note: To be included based on Implementation Phase Proposal]</i>
Commercial Automobile Liability	<u>Exhibit 7, Section 2.3</u>	<i>[\$•] [Note: To be included based on Implementation Phase Proposal]</i>
Pollution Legal Liability	<u>Exhibit 7, Section 2.4</u>	<i>[\$•] [Note: To be included based on Implementation Phase Proposal]</i>
Property Insurance	<u>Exhibit 7, Section 2.5</u>	<i>[\$•] [Note: To be included based on Implementation Phase Proposal]</i>

- (b) 60 days after the commencement date for the initial policies for the Required Minimum Insurance Policies and every two years thereafter during the IFM Period (each, a “**Benchmarking Date**”), Principal Project Company shall submit a report (“**Insurance Review Report**”) to City that includes the following elements:
- (i) Firm current quotes from three established and recognized insurance providers for the Required Minimum Insurance Policies; provided, however, that if three quotes are not available, Principal Project Company may, prior to the due date of Insurance Review Report, request a modification of this requirement, which shall be considered by City, in its good faith discretion. The quotes shall represent the current and fair market cost of providing the Required Minimum Insurance Policies.
  - (ii) With the exception of the first Benchmarking Date, copies of the premium invoices for the actual insurance policies obtained by Principal Project Company for the IFM Services for the prior two years (“**Actual Insurance Policies**”).
  - (iii) With the exception of the first Benchmarking Date, a comprehensive written explanation of any effect that a PPC-Related Entity’s loss experience has had on the premiums for the Required Minimum Insurance Policies and the Actual Insurance Policies. The explanation shall include: (A) an assessment by Principal Project Company’s independent insurance broker addressing industry trends in premiums for the Required Minimum Insurance Policies and analysis (if applicable) of any Project-specific reasons for the increase in premiums; and (B) detailed analysis of any claims (paid or reserved) since the last report period, with claim date(s), description of incident(s), claims amount(s), and the level of deductibles provided.
- (c) City may independently assess the accuracy of the information in the Insurance Review Report and retains the right to perform its own independent insurance review, which may include retaining advisors, obtaining independent quotes for the Required Minimum Insurance Policies or performing its own assessment as to the impact of claims history on renewal costs.
- (d) The Starting Insurance Benchmarking Premiums shall be used in the benchmarking process for the remainder of the Term in accordance with the following procedures:
- (i) 60 days after each Benchmarking Date, Principal Project Company shall provide the Insurance Review Report, with the information specified in Section 10.1.3(b). City shall determine the change in premium costs on a coverage-by-coverage basis for the Required Minimum Insurance Policies calculated based on the information obtained from the initial Insurance Review Report or, if City deems

appropriate in its reasonable discretion, from information obtained pursuant to Section 10.1.3(c).

- (ii) City will use the Starting Insurance Benchmarking Premiums to measure changes in premium costs at each Benchmarking Date for each of the Required Minimum Insurance Policies. The Starting Insurance Benchmarking Premiums shall be adjusted based on the percentage change in CPI (“**Escalated Benchmark Insurance Premiums**”) from the Effective Date. Broker’s/agent’s fees and/or commissions will not be considered as part of the benchmarking exercise described in this Section 10.1.3 (Insurance Premium Benchmarking), shall be identified and excluded from premiums, and are the exclusive responsibility of Principal Project Company.
- (iii) The subsequent Insurance Review Reports shall be used to establish the renewal premiums for the Required Minimum Insurance Policies for purposes of the benchmarking process described in this Section 10.1.3 (Insurance Premium Benchmarking). In no event shall premium increases that are caused by Project-specific losses, changes in deductibles or matters within the control of Principal Project Company or any PPC-Related Entity be subject to the benchmarking exercise or risk sharing described in this Section 10.1.3 (Insurance Premium Benchmarking). Principal Project Company may voluntarily choose to procure an insurance package which exceeds the Required Minimum Insurance Policies (with, for example, higher deductibles or coverage amounts, less exclusions, etc.), in which case Principal Project Company and City recognize that: (A) the actual variations in Principal Project Company’s insurance premiums may not necessarily reflect the variations in the minimum insurance requirements and (B) City will disregard the actual insurance package and will rely upon the analysis from the Insurance Review Report and its own independent analysis of the effect on the minimum insurance requirements. However, any insurance beyond the Required Minimum Insurance Policies shall not be subject to the insurance benchmarking process and the MaxAP adjustment described in Section 10.1.3(e).
- (iv) If City elects to retain its own insurance advisor to analyze the extent of eligible premium increases, Principal Project Company shall cooperate in good faith with any reasonable requests for additional information from City’s insurance advisor. No later than 30 days after Principal Project Company’s submission of the Insurance Review Report, City shall make its determination of the eligible premium increases subject to the risk-allocation described in Section 10.1.3(e).
- (e) As of a Benchmarking Date:
  - (i) if the aggregate annual insurance premiums for the Actual Insurance Policies, after adjustment for any changes in coverage and deductibles and as such premiums may be adjusted pursuant to

Section 10.1.3(d)(iii) (the “**Actual Insurance Premiums**”) exceed 120% of the aggregate Escalated Benchmark Insurance Premiums, then City shall, within 30 days of the Benchmarking Date and on each 12 calendar month anniversary thereof until the next benchmarking period, make a lump sum payment to Principal Project Company in an amount equal to 85% of the Actual Insurance Premiums that are in excess of 120% of the aggregate Escalated Benchmark Insurance Premiums; and

- (ii) if the Actual Insurance Premiums are less than 80% of the aggregate Escalated Benchmark Insurance Premiums, then City shall, during each 12 calendar month period commencing on the Benchmarking Date until the next benchmarking period, reduce the payments owed to Principal Project Company in an amount equal to 85% of the amount by which Actual Insurance Premiums are lower than 80% of the aggregate Escalated Benchmark Insurance Premiums.
- (f) Any payments or reductions in payments to Principal Project Company pursuant to Section 10.1.3(e)(i) and (ii) shall be subject to a pro-rata adjustment for any period of less than 12 calendar months.
- (g) Principal Project Company shall maintain copies of the Actual Insurance Policies and the Insurance Review Reports and make these documents available upon City’s request for the Term plus 10 years.

#### **10.1.4 Insurance Unavailability**

##### **10.1.4.1** If an Insurance Unavailability risk occurs, then:

- (a) Principal Project Company shall notify City within 10 days of becoming aware that the risk has become an Insurance Unavailability; and
- (b) City will meet with Principal Project Company within 10 days after receipt of Principal Project Company’s Notice to discuss the risk, including whether the risk is in fact Insurance Unavailability.

**10.1.4.2** If Principal Project Company demonstrates to City’s reasonable satisfaction that it has used diligent efforts in the global insurance and reinsurance markets to procure the required Insurance Policy coverages for the Insurance Unavailability, and if, despite such diligent efforts and, through no fault of Principal Project Company or any other PPC-Related Entity, any Insurance Unavailability exists or occurs, the Parties shall meet further to discuss how the risk should be managed.

**10.1.4.3** If the Parties cannot agree on how to manage the Insurance Unavailability, then City, in its sole discretion, shall elect one of the following, and City’s election shall be final and not subject to **Error! Reference source not found.** (Contract Dispute Procedures):

- (a) compensate Principal Project Company for the costs of any Claim or liability incurred in connection with the Insurance Unavailability, up to an amount equal to the Insurance Proceeds that would have been payable had the

relevant Insurance Policy continued to be available on the previous terms of that Insurance Policy and deduct from the Availability Payment or Milestone Payments owing to Principal Project Company 100% of the greater of (i) the amount of insurance premiums Principal Project Company would have been obligated to pay under this Agreement (up to the Commercially Reasonable Insurance Rates) and (ii) the premiums assumed in the Financial Model;

- (b) if the Insurance Policies are available from insurers meeting the requirements in Section 10.1.2.1 (Insurers), but not at Commercially Reasonable Insurance Rates, provide Notice to Principal Project Company to obtain the Insurance Policy and that City will be responsible for 100% of the premiums that exceed the Commercially Reasonable Insurance Rates;
- (c) provide Notice to Principal Project Company approving one or more variances from Exhibit 7 (Insurance Requirements) such that the risk ceases to be Insurance Unavailability, in which case City will be entitled to a reduction in the Availability Payments equal to 100% of the insurance premiums that Principal Project Company avoids as a result of the variance from Exhibit 7 (Insurance Requirements). In determining Principal Project Company's avoided insurance premiums, the Parties shall compare the actual premiums up to the greater of (i) the amount of insurance premiums Principal Project Company would have been obligated to pay for the relevant Insurance Policy had it been available under normal market conditions without variance from Exhibit 7 (Insurance Requirements) or (ii) the premiums for the relevant Insurance Policy assumed in the Financial Model; or
- (d) terminate this Agreement by Notice to Principal Project Company, as further set out in Section 17.2.6 (Termination for Insurance Unavailability).

### **10.1.5 Review of Insurance Unavailability Risks**

**10.1.5.1** Whenever Principal Project Company has received information from its insurance adviser or other credible insurance industry source that Insurance Unavailability will likely exist during the next insurance renewal period, and annually during any period that Insurance Unavailability exists, Principal Project Company shall deliver Notice thereof to City and submit a report to City that includes the following elements:

- (a) evidence of Principal Project Company's efforts to obtain from at least three insurers meeting the requirements in Section 10.1.2.1 (Insurers) the relevant Insurance Policy required to be maintained during the Term and an explanation of the reasons such efforts were unavailing;
- (b) a comprehensive assessment by Principal Project Company's independent insurance broker identifying the Insurance Unavailability risk, the reasons for unobtainability of insurance, and trends in insurance market conditions respecting the Insurance Unavailability risk;
- (c) a comprehensive written explanation and analysis of:

- (i) any claims and loss experience (paid or reserved) with respect to any PPC-Related Entity or Affiliate, whether in connection with the Project or Work or in connection with any unrelated work or activity of a PPC-Related Entity or Affiliate, since the last review period, with claim date(s), description of incident(s), claims amount(s), and the level of deductibles or self-insured retentions provided; and
- (ii) the effect thereof on obtainability or unobtainability of the relevant Insurance Policies and coverage.

**10.1.5.2** City retains the right to independently assess the accuracy of the information on insurance markets, Insurance Unavailability and impacts of claims and loss experience, and retains the right to perform its own independent insurance review, which may include retaining advisors and seeking independent quotes for the Insurance Policies, all of which shall be undertaken and performed by City and any of its retained experts in good faith and a commercially reasonable manner.

**10.1.5.3** If City's review conducted in accordance with Section 10.1.5.2 determines that the relevant Insurance Unavailability is insurable at Commercially Reasonable Insurance Rates, then Principal Project Company will promptly procure the insurance in connection with that risk in accordance with Exhibit 7 (Insurance Requirements).

**10.1.5.4** Principal Project Company shall use commercially reasonable efforts to ensure that the process set forth in this Section 10.1.5 (Review of Insurance Unavailability Risks) concludes sufficiently in advance of expiration of such Insurance Policies to ensure continuation of insurance coverage under renewed or replacement Insurance Policies. City will cooperate with Principal Project Company in its discharge of this obligation.

#### **10.1.5.5 Defense Costs**

Unless otherwise agreed to in writing by City, defense costs shall not erode the limits of coverage of any of the Insurance Policies, except that defense costs may be included within the limits of coverage of professional liability, contractor's pollution liability and pollution legal liability policies.

#### **10.1.5.6 Contesting Denial of Coverage**

If any Insurer under an Insurance Policy described in Sections 10.1.1 (Insurance Policies and Coverage) and 10.1.3 (Insurance Premium Benchmarking) denies coverage with respect to any claims reported to such Insurer, Principal Project Company and City shall cooperate in good faith to establish whether and to what extent to contest, and how to fund the cost of contesting, the denial of coverage; provided that if the reported claim is a matter covered by an indemnity in favor of City or the denial is the result of Principal Project Company's failure to comply with an insurance requirement, then Principal Project Company shall bear all costs of contesting the denial of coverage.

#### **10.1.6 Lender Insurance Requirements**

If, under the terms of any Financing Agreement or Security Document, Principal Project Company is obligated to, and does, carry insurance coverage with higher limits, lower

deductibles or self-insured retentions, or broader coverage than required under this Agreement, Principal Project Company's provision of such insurance shall satisfy the applicable requirements of this Agreement provided such policy meets all the other applicable requirements of this Section 10.1 (Insurance) and Exhibit 7 (Insurance Requirements). If Principal Project Company carries insurance coverage in addition to that required under this Agreement, then, except for any directors and officers liability insurance carried by Principal Project Company, Principal Project Company shall include the City Additional Insureds as additional insureds thereunder and shall provide to City the proofs of coverage and certificates, binders and copies of the policy as described in Section 10.1.2.4 (Verification of Coverage). If, however, Principal Project Company demonstrates to City that inclusion of such City Additional Insureds as additional insureds will increase the premium, City shall elect either to pay the increase in premium or forego additional insured status.

### **10.1.7 Prosecution of Claims**

**10.1.7.1** Unless otherwise directed by City in writing with respect to City's insurance claims, Principal Project Company shall be responsible for reporting and processing all potential claims by City or Principal Project Company against the Insurance Policies required to be provided by Principal Project Company under the Contract Documents. City will make reasonable efforts to report to Principal Project Company incidents that City's Authorized Representative has Actual Knowledge of and that may give rise to an insurance claim against the Insurance Policies required to be provided by Principal Project Company under the Contract Documents. City will report such incidents to Principal Project Company within a reasonable period of time after City's Authorized Representative actually becomes aware of such incidents. Principal Project Company agrees to report timely to the insurer(s) under such policies any and all matters which may give rise to an insurance claim by Principal Project Company or City and to promptly and diligently pursue such insurance claims in accordance with the claims procedures specified in such policies, whether for defense or indemnity or both. Principal Project Company shall enforce all legal rights against the insurer under the applicable Insurance Policies and applicable Laws in order to collect thereon, including pursuing necessary litigation and enforcement of judgments, provided that Principal Project Company shall be deemed to have satisfied this obligation if a judgment is not collectible through the exercise of lawful and diligent means.

**10.1.7.2** Principal Project Company shall immediately provide Notice to City, and thereafter keep City fully informed, of any incident, potential claim, claim or other matter of which Principal Project Company becomes aware that involves or could conceivably involve either City or City Additional Insureds as a defendant. City agrees to promptly provide Notice to Principal Project Company of City's incidents, potential claims, and matters which may give rise to a City insurance claim, to tender to the insurer City's defense of the claim (if applicable) under such Insurance Policies, and to cooperate with Principal Project Company as necessary for Principal Project Company to fulfill its duties hereunder.

**10.1.7.3** If, in any instance, Principal Project Company (i) has not performed its obligations respecting insurance coverage set forth in this Agreement, or (ii) is unable to enforce and collect any such insurance for failure (x) to assert claims in accordance with the terms of the Insurance Policies or (y) to prosecute claims diligently, then for purposes of determining Principal Project Company's liability and the limits thereon or determining reductions in compensation due from City to Principal Project Company on account of available insurance, Principal Project Company

shall be treated as if it has elected to self-insure up to the full amount of insurance coverage which would have been available had Principal Project Company performed such obligations. Nothing in this Section 10.1.7 (Prosecution of Claims) or elsewhere in this Section 10.1 (Insurance) shall be construed to treat Principal Project Company as electing to self-insure where Principal Project Company is unable to collect due to the bankruptcy or insolvency of any insurer which at the time the Insurance Policy is written meets the rating qualifications set forth in this Section 10.1 (Insurance).

**10.1.7.4** In the event that an Insurer providing any of the Insurance Policies required by this Agreement becomes the subject of bankruptcy proceedings, becomes insolvent, or is the subject of an order or directive limiting its business activities given by any Governmental Entity, including the State Department of Insurance, Principal Project Company shall exercise best efforts to promptly and at its own cost and expense secure alternative coverage in compliance with the insurance requirements contained in this Section 10.1 (Insurance) so as to avoid any lapse in insurance coverage.

**10.1.7.5** If, in any instance, Principal Project Company has not promptly performed its obligation to report to applicable insurers and process any potential insurance claim tendered by City, then City may report the claim directly to the insurer and thereafter seek coverage under the relevant policy.

#### **10.1.8 Application of Insurance Proceeds**

All insurance proceeds received for physical property damage to the Project under any Insurance Policies required under Exhibit 7 (Insurance Requirements) shall be first applied to repair, reconstruct, rehabilitate, restore, renew, reinstate and replace each part or parts of the Project with respect to which such proceeds were received.

### **10.2 Performance Security**

#### **10.2.1 Equity Letter of Credit**

Principal Project Company represents to City that if there is unfunded equity outstanding as of Financial Close, the Financing Documents will require each Equity Member to provide an Equity Letter of Credit to Principal Project Company or the Collateral Agent, the aggregate amount of which shall be at least equal to the unfunded equity outstanding as of Financial Close that is committed to the Project during the D&C Period.

#### **10.2.2 D&C Performance Security**

**10.2.2.1** On or before the Financial Close Date, Principal Project Company shall deliver the D&C Performance Security to City. The D&C Performance Security shall be comprised of the following (“**D&C Performance Security**”):

- (a) the D&C Performance Bond; and
- (b) the D&C Payment Bond.

**10.2.2.2** The D&C Performance Bond shall remain in full force and effect until:

- (a) The Final Acceptance Date;
- (b) There exists no PPC Default with respect to the D&C Work; and
- (c) No event has occurred that, with the giving of Notice or passage of time, or both, would constitute a PPC Default with respect to the D&C Work.

**10.2.2.3** The D&C Payment Bond shall remain in full force and effect until:

- (a) Receipt of evidence satisfactory to City that all Persons eligible to file a Claim under applicable Law against the D&C Payment Bond have been fully paid;
- (b) Receipt of unconditional releases of Claims and stop Notices from all Subcontractors who have filed preliminary Notices of Claims against the D&C Payment Bond; and
- (c) Expiration of the statutory period for Contractors to file a Claim against the D&C Payment Bond, if no claims have been filed.

### **10.3 General Requirements for D&C Performance Security**

**10.3.1.1** Each D&C Performance Security shall be issued by an Eligible Surety or panel of Eligible Sureties.

**10.3.1.2** The D&C Performance Security will be subject to the rights of Lenders under the Direct Agreement.

**10.3.1.3** If the D&C Contract Amount is increased in connection with a Change Order, City may, in its sole discretion, require a corresponding and proportionate increase in the amount of each D&C Performance Security, or alternative security, as applicable.

**10.3.1.4** Principal Project Company agrees that it may not seek an injunction to restrain City from calling upon any D&C Performance Security.

**10.3.1.5** Unless otherwise specified in this Agreement, a draw on the D&C Performance Security or exercise of any rights under such D&C Performance Security will not be conditioned on prior resort to any other security of, or provided for the benefit of, Principal Project Company.

**10.3.1.6** Principal Project Company will pay all Recoverable Costs imposed in connection with City's exercise of its remedies against any D&C Performance Security or replacements thereof.

**10.3.1.7** Principal Project Company may:

- (a) procure the D&C Performance Security, so that they are security, as applicable, for (i) Principal Project Company's performance obligations under the Contract Documents respecting the D&C Work and (ii) Principal Project Company's payment obligations to the designated Persons supplying labor or materials respecting the D&C Work; or

- (b) subject to this Section 10.3 (General Requirements for D&C Performance Security), deliver D&C Performance Security from the Key Contractors for performance of any portion of the Work, so that each security is security for, as applicable, (i) performance of the Key Contractor's obligations under its Contract for D&C Work or (ii) payment to the designated Persons supplying labor or materials respecting the D&C Work.

**10.3.1.8** If Principal Project Company makes the election under Section 10.3.1.7(b), then:

- (a) the language of the bond forms in Exhibit 6B (Form of D&C Payment Bond), Exhibit 6C (Form of D&C Performance Bond), Exhibit 6D (Form of Multiple Obligee Rider for D&C Payment Bond) and Exhibit 6E (Form of Multiple Obligee Rider for D&C Performance Bond) shall be adjusted to reflect this election, but only as necessary to (i) identify the Key Contract for D&C Work as the bonded contract, and (ii) identify the Key Contractor as the principal; and
- (b) if there are two or more parties providing the D&C Performance Security, then the aggregate sum of the D&C Performance Security shall equal the required bond amounts under this Agreement and the size of each bond shall be in proportion to the scope and cost of the Work to be provided under each bonded Key Contract. Subject to the terms of this Agreement, City may proceed against any or both of such bonds in the order that City, in its sole discretion, determines.

## **10.4 Letters of Credit**

### **10.4.1 General Provisions**

Wherever in the Contract Documents Principal Project Company has the option or obligation to deliver to City a letter of credit, in addition to any specific requirements relating to a particular letter of credit, the following provisions shall apply.

**10.4.1.1** Except to the extent expressly provided otherwise in the Contract Documents, the letter of credit shall:

- (a) be a direct pay, irrevocable standby letter of credit;
- (b) be issued by a financial institution that is not an Affiliate, has a credit rating for long-term, unsecured debt of at least "A-" (or its equivalent) from one of the Rating Agencies, and has an office in Los Angeles, California, San Francisco, California, Chicago, Illinois, or New York, New York (or within reasonable proximity to these metropolitan areas) at which the letter of credit can be presented for payment. If the issuer's long-term, unsecured debt rating is downgraded such that the issuer no longer meets the ratings standard set forth above, Principal Project Company shall provide a replacement letter of credit issued by a financial institution meeting such standard within 30 days after the downgrade;

- (c) be payable on demand, conditioned only on written presentment from a beneficiary thereof to the issuer of a sight draft drawn on the letter of credit and a certificate stating that the beneficiary has the right to draw under the letter of credit in the amount of the sight draft, up to the amount due to such beneficiary, without requirement to present the original letter of credit;
- (d) be in place for the entire period of time for which the letter of credit is providing security;
- (e) allow for multiple draws;
- (f) name City as sole beneficiary; and
- (g) be consistent with the requirements of this Section 10.4 (Letters of Credit).

**10.4.1.2** Except to the extent expressly provided otherwise in the Contract Documents, if Principal Project Company has failed to pay or perform when due the duty, obligation or liability under the Contract Documents for which the letter of credit is held, City has the right, subject to any rights of Lenders under the Direct Agreement, to draw on the letter of credit as and when provided in Section 16.2.7 (Performance Bond). If City makes such a draw on the letter of credit, City shall use and apply the proceeds as provided in this Agreement for such letter of credit.

**10.4.1.3** Except to the extent expressly provided otherwise in the Contract Documents and the Direct Agreement, City has the right to draw on the letter of credit, without prior Notice to Principal Project Company, if (a) Principal Project Company has failed to pay or perform when due the duty, obligation, or liability under this Agreement for which the letter of credit is held, (b) for any reason Principal Project Company fails to deliver to City a new or replacement letter of credit, on the same terms, at least 30 days before the expiry of the letter of credit, unless the applicable terms of the Contract Documents expressly provide that no further letter of credit is required with respect to such duty, obligation or liability, or (c) the financial institution issuing the letter of credit fails to meet the requirements in Section 10.4.1.1(b) and Principal Project Company fails to provide a substitute letter of credit issued by a qualified financial institution within 30 days after the downgrade. If City makes such a draw on the letter of credit, City shall be entitled to draw on the full face amount of the letter of credit and shall retain such amount as cash security to secure the obligations under the letter of credit, without payment of interest to Principal Project Company.

**10.4.1.4** Except to the extent expressly provided otherwise in the Contract Documents and the Direct Agreement, a draw on letters of credit shall not be conditioned on prior resort to Principal Project Company or any other security of Principal Project Company. For all draws conditioned on prior Notice from City to Principal Project Company, no such Notice shall be required if it would preclude draw before the expiration date of the letter of credit. City will use and apply draws on letters of credit (or cash security held from draws on letters of credit) toward satisfying the relevant obligation of Principal Project Company (or, if applicable, any other Person for which the letter of credit is performance security). Subject to City's rights under Sections 10.4.1.2 and 10.4.1.3, if City receives proceeds of a draw in excess of the relevant obligation, City will promptly refund the excess to Principal Project Company (or such other Person) after all relevant obligations are satisfied in full.

**10.4.1.5** Except to the extent expressly provided otherwise in the Contract Documents, Principal Project Company's sole remedy in connection with the improper presentment or payment of sight drafts drawn under letters of credit shall be to obtain from City a refund of the proceeds which are misapplied, reimbursement of the reasonable costs Principal Project Company incurs as a result of such misapplication; provided that at the time of such refund Principal Project Company increases the amount of the letter of credit to the amount (if any) then required under applicable provisions of this Agreement. Principal Project Company acknowledges that the presentment of sight drafts drawn upon a letter of credit could not under any circumstances cause Principal Project Company injury that could not be remedied by an award of money damages, and that the recovery of money damages would be an adequate remedy. Accordingly, Principal Project Company covenants (a) not to request or instruct the issuer of any letter of credit to refrain from paying any sight draft drawn under the letter of credit and (b) not to commence or pursue any legal proceeding seeking, and Principal Project Company irrevocably waives and relinquishes any right, to enjoin, restrain, prevent, stop or delay any draw on any letter of credit.

**10.4.1.6** Principal Project Company shall obtain and furnish all letters of credit and replacements thereof at its sole cost and expense, and shall pay all charges imposed in connection with City's presentment of sight drafts and drawing against letters of credit or replacements thereof.

**10.4.1.7** If City makes a permitted assignment of its rights and interests under this Agreement, then Principal Project Company shall cooperate so that concurrently with the effectiveness of such assignment, either replacement letters of credit for, or appropriate amendments to, the outstanding letters of credit shall be delivered to the assignee naming the assignee as beneficiary, at no cost to Principal Project Company.

**10.4.1.8** City acknowledges that if the letter of credit is performance security for a Person other than Principal Project Company (e.g., a Key Contractor), City's draw may only be based on the underlying obligations of such Person.

## **10.5 Guarantees**

**10.5.1** If Principal Project Company, any Key Contractor, any Affiliate or any Lender receives from any Person a guaranty of payment or performance of any obligation(s) of a Key Contractor, then either Principal Project Company shall cause such Person to expressly include City as a guaranteed party under such guaranty, with the same protections and rights of Notice, enforcement and collection as are available to any other guaranteed party, and deliver to City a duplicate original of such guaranty, which guaranty shall provide that the rights and protections of City shall not be reduced, waived, released or adversely affected by the acts or omissions of any other guaranteed party, other than through the rendering of payment and performance to another guaranteed party; and upon receipt of written Notice from City of the occurrence of the circumstances described in Section 10.5.2, such other documents reasonably satisfactory to City permitting City, subject to the rights of the Collateral Agent under any Direct Agreement, to become the transferee beneficiary under such guaranty and to enforce it, including enforcing the guaranty in favor of City or the Project, or both, which transfer documents shall include a certified copy of the guaranty and an executed transfer and assignment of the beneficiary rights from Principal Project Company or Collateral Agent, as applicable, to City; and the guaranty

shall expressly authorize such transfer without condition and permit draw without presentation of the original guaranty.

**10.5.2** City's rights as a transfer beneficiary are exercisable if, subject to Section 10.5.3 and the Direct Agreement, City determines that (a) a Key Contractor has breached or failed to perform any obligations under its Contract and any Notice thereof required under such Contract has been provided and the applicable cure period has expired without full and complete cure, (b) such breach has caused a PPC Default and the applicable cure period has expired without full and complete cure and (c) Principal Project Company or the Collateral Agent has failed to call upon or otherwise enforce such guaranty for the purpose of causing the performance of such obligations by or on behalf of the Contractor within 10 days after City delivers Notice of such breach or expected breach to Principal Project Company and the Collateral Agent and the Cure Period (as defined in the Direct Agreement) has expired.

**10.5.3** So long as Principal Project Company or a Lender is diligently pursuing remedies under a guaranty, City agrees to forbear from (a) exercising remedies under any such guaranty that names City as a direct beneficiary, and (b) exercising its right to become a beneficiary under Section 10.5.1; provided, however, that if the PPC Default giving rise to exercise remedies under any such guaranty remains uncured at the end of the applicable cure period in Section 16.1.2 (Default Notice and Cure Periods), City's obligation to forbear from exercising remedies as a guaranteed party shall cease. The foregoing shall not obviate any agreement by City to forbear from exercising its rights and remedies contained in a Direct Agreement.

## **10.6 Indemnities**

### **10.6.1 General Indemnity**

**10.6.1.1** Subject to Section 10.6.3 (Limitations on Indemnification Obligations), Principal Project Company shall defend, indemnify, protect and hold harmless the Indemnitees from and against any and all claims, causes of action, suits, investigations, legal or administrative proceedings, demands and Losses arising out of or in connection with:

- (a) any alleged or actual PPC Fault, if asserted or incurred by or awarded to any Third Party or any PPC-Related Entity;
- (b) Losses to the Infrastructure Facility, and any interference, disruption, or delay to the Project, caused by or related to the work of any JDA-Related Entity; provided, however, that the indemnity set forth in this clause (b) shall not apply to the D&C Work performed by the D&C Contractor to the extent that the City commences construction of a Joint Development Alternative prior to the earlier of (i) Substantial Completion; or (ii) the Substantial Completion Deadline, unless, in either case, the prime contractor undertaking such construction is the D&C Contractor or an affiliate thereof (in which case, the indemnity shall apply);
- (c) damage to public or private property owned by Third Parties (or any PPC-Related Entity), and for injuries to any person or entity, arising out of performance of the Project or Work by any PPC-Related Entity;

- (d) any alleged intellectual property infringement or other allegedly improper appropriation or use of intellectual property by any PPC-Related Entity in performance of the Project or the Work, or in connection with the Infrastructure Facility;
- (e) any and all claims by any governmental or taxing authority claiming taxes based on gross receipts, purchases or sales, or the use of any property or income of any PPC-Related Entity with respect to any payment for the Project or Work made to or earned by any PPC-Related Entity;
- (f) the failure or alleged failure by any PPC-Related Entity to pay sums due for the Work or services of Contractors, laborers, or suppliers;
- (g) any actual or threatened PPC Release;
- (h) the claim or assertion by any Other Contractor or a Utility that any PPC-Related Entity (i) failed to cooperate reasonably with such party, so as to cause interference, disruption, delay or loss; or (ii) interfered with or hindered the progress or completion of work being performed by such Other Contractor or Utility, so as to cause interference, disruption, delay or loss, to the extent such claim arises out of any PPC Fault;
- (i) any PPC-Related Entity's breach of or failure to perform an obligation that City owes to a Third Party, including any Governmental Entity and any Utility, under applicable Law or under any agreement between City and a Third Party, where City has delegated performance of the obligation to Principal Project Company under this Agreement or the acts or omissions of any PPC-Related Entity which render City unable to perform or abide by an obligation that City owes to a Third Party, including any Governmental Entity and any Utility, under any agreement between City and a Third Party, where, in each case, the agreement was expressly disclosed or known to Principal Project Company;
- (j) inverse condemnation, trespass, nuisance or similar taking of or harm to real property by reason of (i) the failure of any PPC-Related Entity to comply with Good Industry Practice, requirements of this Agreement, the Project Management Plan or Regulatory Approvals respecting control and mitigation of construction activities and construction impacts, (ii) the intentional misconduct or negligence of any PPC-Related Entity in connection with the performance of the Project or the Work, or (iii) the actual physical entry onto or encroachment upon another's property by any PPC-Related Entity in connection with the performance of the Project or the Work;
- (k) errors or other Defects in the supply, construction (including installation), operation or maintenance of the Project (except, subject to Section 6.11.1, with respect to operation and maintenance, of the SFMTA O&M Facilities after Substantial Completion or of Utility Adjustments included in the Project or the Work;

- (l) Design Work that fails, in whole or in part, to meet the requirements of this Contract; and
- (m) Any Principal Project Company failure to implement environmental mitigation measures to control environmental impacts, as required by the Governmental Approvals, the CEQA MMRP and the NEPA document.

**10.6.1.2** Principal Project Company's responsibilities pursuant to this Section 10.6.1 (General Indemnity) include both the obligation to (a) defend the Indemnitees from and against any and all claims, causes of action, suits, investigations, legal or administrative proceedings, demands and Losses, and (b) indemnify the Indemnitees when liability is sustained pursuant to the Contract Dispute Procedures or through judicial proceedings or is mutually agreed upon by the Parties.

**10.6.1.3** Principal Project Company's indemnification shall include reasonable fees of attorneys, consultants, and experts and related costs and City's costs of investigating any claims against City. In addition to Principal Project Company's obligation to indemnify City, Principal Project Company specifically acknowledges and agrees that it has an immediate and independent obligation to defend City from any claim which actually or potentially falls within this indemnification provision, even if the allegations are or may be groundless, false or fraudulent, which obligation arises at the time such claim is tendered to Principal Project Company by City and continues at all times thereafter.

**10.6.1.4** Principal Project Company's responsibilities pursuant to this Section 10.6.1 (General Indemnity) are in addition to any right that City may have under the terms of this Agreement to assess Noncompliance Points and/or Deductions with respect to the same event or circumstance giving rise to a Third Party claim, cause of action, suit, legal or administrative proceeding.

**10.6.1.5** Principal Project Company's defense, indemnity, and hold harmless obligations shall extend to City's consultants (e.g., design professionals and construction managers) providing services covering any portion of the Project under a separate written agreement with City and designated in the Contract Documents as persons or entities to be listed on Principal Project Company's insurance policies as "Additional Insureds." Principal Project Company's defense, indemnity, and hold harmless obligations shall not extend to the liability of a City consultant (including architects and engineers) designated as an Indemnitee or its agents, employees, or subconsultants arising out of, connected with or resulting from such Indemnitee's own active negligence, willful misconduct, bad faith, fraud, errors or omissions or from such Indemnitee's preparation or approval of maps, plans, opinions, reports, surveys, change orders, designs or specifications, or such Indemnitee's issuance of or failure to issue directions or instructions provided that such issuance or failure to issue is the primary cause of the damage or injury.

## **10.6.2 Design Defects**

**10.6.2.1** Principal Project Company agrees that, because the Reference Documents are subject to review and modification by Principal Project Company, (a) it is appropriate for Principal Project Company to assume liability for errors, omissions, inconsistencies and other Defects in the completed Project even though they may be related to errors, omissions, inconsistencies and other Defects in the Reference Documents, and (b) such documents shall

not be deemed “design furnished” by City or any of the other Indemnitees, as the term “design furnished” is used in Civil Code section 2782. Principal Project Company hereby waives the benefit (if any) of Civil Code section 2782 and agrees that this Section 10.6.2 (Design Defects) constitutes an agreement governed by Civil Code section 2782.5.

**10.6.2.2** Subject to Section 10.6.3 (Limitations on Indemnification Obligations), Principal Project Company shall indemnify, defend and hold harmless the Indemnitees from and against any and all claims and Losses arising out of, relating to or resulting from errors, omissions, inconsistencies or other defects in the Design Documents, regardless of whether such errors, omissions, inconsistencies or other defects were also included in the Reference Documents.

### **10.6.3 Limitations on Indemnification Obligations**

**10.6.3.1** Subject to Section 23.8 (Limitation on Third Party Beneficiaries) and the releases and disclaimers herein, including all the provisions set forth in Section 5.1.3 (Limitations on Principal Project Company’s Right to Rely), Principal Project Company’s indemnity obligations shall not extend to any claims, suits, actions or Losses to the extent directly caused by:

- (a) the active negligence, gross negligence, reckless or willful misconduct, bad faith or fraud of an Indemnitee;
- (b) a City-Caused Delay Event or a City-Caused Relief Event; or
- (c) City’s breach of any of its obligations under the Contract Documents.

**10.6.3.2** With respect to Work performed by a design professional as defined in California Civil Code section 2782.8, such indemnities shall apply only to the extent permitted by section 2782.8 as of the Effective Date.

#### **10.6.3.3 Claims by Employees**

In claims by an employee of a PPC-Related Entity, the indemnification obligation under this Section 10.6 (Indemnities) shall not be limited by any limitation on the amount or type of damages, compensation or benefits payable by or for a PPC-Related Entity under workmen’s compensation, disability benefit or other employee benefits laws; provided that this provision shall not be construed as a waiver in favor of any employee by Principal Project Company or any Contractor of any limitation of liability afforded by such laws.

#### **10.6.3.4 Indemnity as Alternative Cause of Action**

The requirement to provide an indemnity as specified in this Section 10.6 (Indemnities) is not intended to provide City with an alternative cause of action against Principal Project Company for damages for breach of contract incurred directly by Indemnitees in connection with the event giving rise to the indemnification obligation.

### **10.6.4 Principal Project Company’s Defense**

In Principal Project Company’s defense of Indemnitees under this Section 10.6 (Indemnities), negotiation, compromise, and settlement of any action, City shall, without prejudice to the rights of any Indemnitees to be indemnified by Principal Project Company, retain reasonable

discretion in and control of the litigation, negotiation, compromise, settlement, and appeals therefrom.

## **10.7 Indemnities by Contractors**

Principal Project Company shall ensure that each Contract includes indemnity provisions appropriate to the scope of the Work to be performed by the Contractor, naming the Indemnitees as indemnitees.

## **10.8 Notice of Claims by Third Parties**

**10.8.1** If the City receives Notice of a claim, cause of action, suit, legal or administrative proceeding covered by the indemnities in Section 10.6 (Indemnities), or otherwise has Actual Knowledge of such a claim, cause of action, suit, legal or administrative proceeding that it believes is within the scope of the indemnities under Section 10.6 (Indemnities), as soon as practicable after receipt of the claim, cause of action, suit, legal or administrative proceeding, City shall:

- (a) inform Principal Project Company in writing of the claim, cause of action, suit, legal or administrative proceeding, and
- (b) send to Principal Project Company a copy of all relevant written materials City has received asserting such claim, cause of action suit, legal or administrative proceeding.

**10.8.2** As soon as is practicable after Principal Project Company receives Notice of a claim, cause of action, suit, legal or administrative proceeding covered by the indemnities in Section 10.6 (Indemnities), Principal Project Company shall promptly provide Notice to City in writing and, unless subject to evidentiary privilege, promptly furnish to City copies of all factual reports and factual portions of any other reports given to Principal Project Company's insurance carrier or carriers.

## **10.9 SFMTA O&M Facilities Warranty Bond**

**10.9.1** Upon achieving Final Acceptance, Principal Project Company shall provide a warranty bond to City in an amount equal to 20% of the value of the SFMTA O&M Facilities in the form attached hereto as Exhibit 6F (Form of SFMTA O&M Facilities Warranty Bond), with such nonmaterial modifications, if any, as City may approve in its sole discretion (the "**SFMTA O&M Facilities Warranty Bond**").

**10.9.2** The SFMTA O&M Facilities Warranty Bond shall guarantee performance of Work on the SFMTA O&M Facilities required to be performed during the period following Final Acceptance, including warranty Work, which shall also constitute a payment bond guaranteeing payment to Persons performing such Work.

**10.9.3** City will release the SFMTA O&M Facilities Warranty Bond upon the expiration of the warranty period set forth in Section 6.11.1.1; provided, however, that all of the following conditions have been met: (a) Principal Project Company is not in default under the Contract Documents and no event has occurred which, with the passage of time or the giving of Notice, would constitute a default under the Contract Documents, (b) receipt by City of (i) evidence

satisfactory to City that all Persons eligible to file a Third Party claim against the SFMTA O&M Facilities Warranty Bond have been fully paid and (ii) unconditional releases of liens and Notices from all Contractors who filed preliminary notices of a Third Party claim against the SFMTA O&M Facilities Warranty Bond, using applicable California statutory forms, (c) the statutory period for Subcontractors to file a Third Party claim against the SFMTA O&M Facilities Warranty Bond has expired and no Third Party claims have been filed, and (d) Principal Project Company assigns to City any Contractor and Supplier warranties that may still be in effect as of the effective date of the expiration of the warranty period set forth in Section 6.11.1.1.

---

## ARTICLE 11. PAYMENTS TO PRINCIPAL PROJECT COMPANY

### 11.1 Milestone Payment

11.1.1 Subject to any limitations and exceptions expressly provided in this Agreement, City will pay the Milestone Payment to Principal Project Company upon achievement of Substantial Completion, calculated and otherwise in accordance with the process in Exhibit 4A (Milestone Payment Mechanism).

### 11.2 Availability Payments

11.2.1 Commencing from the Substantial Completion Date and subject to any limitations and exceptions expressly provided in this Agreement, City will make Availability Payments to Principal Project Company as provided in this Section 11.2 (Availability Payments) and Exhibit 4B (Availability Payment Mechanism). Principal Project Company is not entitled to earn any Availability Payments before the Substantial Completion Date.

11.2.2 City will make Availability Payments to Principal Project Company through Quarterly Availability Payments calculated and otherwise in accordance with Exhibit 4B (Availability Payment Mechanism).

11.2.3 Principal Project Company acknowledges and agrees that any Availability Payment or portion thereof not received by Principal Project Company as a result of a delay in achieving Substantial Completion for which Principal Project Company is not entitled to compensation under this Agreement represents the liquidated amount of delay damages suffered by City due to such delay.

### 11.3 Pass-Through Costs

11.3.1 City shall reimburse PPC for Pass-Through Costs during the IFM Period as set out in this Section 11.3.

11.3.2 PPC shall deliver to the City Authorized Representative copies of each invoice, which must be in a format reasonably approved by City, and receipt of payment of Pass-Through Costs issued to PPC.

11.3.3 PPC's invoices for Pass-Through Costs may not include any mark-up, profit or overhead on costs paid or payable by PPC to Contractors or utility owners. Such mark-up, profit and overhead together with PPC's reasonable expenses for general administration, insurance premiums, overhead and other business expenses that relate to the provision of services rendered by PPC in connection with Pass-Through Costs shall not be considered as Pass-Through Costs and are to be compensated as part of the Availability Payment.

### 11.4 Invoice, Other Amounts and Payments

11.4.1 Prior to issuing any invoice required by this Agreement, Principal Project Company must submit to City a form invoice to be approved by City, and any invoice issued in accordance with this Agreement must be substantially in the form agreed by the City.

**11.4.2** Principal Project Company shall submit an invoice (i) for the Availability Payment with the Quarterly Report delivered to City in accordance with the IFM Specifications no later than the 10th day of the month immediately following the relevant Contract Quarter; (ii) for any other proposed payment adjustments in accordance with this Agreement, including Milestone Payments Compensable Delay Events, Compensable Relief Events or Termination Compensation (collectively, "**Other Amounts**") no later than the 10th day of the month immediately following the applicable event triggering such invoice, unless a different time period is set out in the Agreement for such event. All invoices shall include any supporting mathematical corrections or reconciliations to enhance the accuracy of payments due to Principal Project Company under this Agreement, to the satisfaction of City.

**11.4.3** City shall review each properly submitted invoice within 7 days of receipt. If City, in its sole discretion, determines that the invoice is improper, the invoice will be returned to Developer not later than 7 days after receipt, along with a document setting forth the reasons why the invoice is not proper.

**11.4.4** Unless otherwise specified in this Agreement, City will pay PPC any amount owing under this Agreement within 45 days after receipt of a properly submitted invoice for such payment.

## **11.5 Disputed Amounts**

**11.5.1** City may dispute, in good faith, any amount specified in an invoice submitted under Section 11.4 (Invoice, Other Amounts and Payments), or any other invoice submitted by Principal Project Company under this Agreement. City shall pay all undisputed amounts for which payment is requested and that are not subject to withholding in accordance with Section 11.4 (Invoice, Other Amounts and Payments).

**11.5.2** Principal Project Company and City shall use reasonable efforts to resolve any invoice dispute within 30 days after the dispute arises.

## **11.6 Withholding from Payments**

**11.6.1** City may deduct from any payment owing to Principal Project Company under this Agreement or make a demand of Principal Project Company for:

- (a) any amount due and payable by Principal Project Company to City (whether in connection with this Agreement or any other Contract Document);
- (b) any sums expended by City in performing any of Principal Project Company's obligations under this Agreement which Principal Project Company has failed to perform; and
- (c) amounts in respect of any other Claim or Losses by City against Principal Project Company in connection with the Work, the IFM Services or the Project.

**11.6.2** The failure by City to deduct any of the sums under this Section 11.6 (Withholding from Payments) from a payment must not constitute a waiver of City's right to such sums.

## **11.7 Interest on Late Payments and Overpayments**

**11.7.1** If Principal Project Company fails to pay any undisputed amount due and owing from Principal Project Company to the City under this Agreement, Principal Project Company shall pay to City interest on such amount at the Late Payment Rate commencing 90 days after the due date thereof until the date of payment.

**11.7.2** If any properly submitted invoice is disputed and an amount is determined to be due under the Contract Dispute Procedures, payment of the disputed amount shall be made within 30 Business Days following resolution of the dispute, together with interest at the Late Payment Rate on the amount owing from the date that the payment was originally due (based on the agreement of the parties or the decision of the dispute resolver) until the date of payment.

**11.7.3** If as a result of any inaccuracy in an invoice any overpayment is made by City to Principal Project Company then, in addition to the adjustments provided in Section 11.2 (Availability Payments), City shall be entitled to deduct or receive as a payment from Principal Project Company interest on such amount at the Late Payment Rate, starting on the date of City's payment of the invoice to the date the overpayment is deducted or paid. City's right to deduct or receive payment of interest is without prejudice to any other rights City may have under this Agreement.

## **11.8 Taxes**

Except as provided in Section 2.4.2 (Possessory Interest Tax), Principal Project Company shall pay all applicable Taxes on or before the due date (or delinquency date if applicable). Principal Project Company is solely responsible for and has no right to make any Claim due to its misinterpretation of laws respecting Taxes or incorrect assumptions regarding applicability of Taxes. In the event that an exemption from applicable sales or use taxes becomes available for the Project, City shall have no obligation to reimburse Principal Project Company for any such taxes, and City shall be entitled to an upfront payment from Principal Project Company or a reduction in payments made by City, as agreed upon by the Parties, equal to the amount actually saved following the date such exemption becomes available.

## **11.9 Payment Not Evidence of Approval**

No payment by City is or must be construed as:

- (a) evidence of the value of Work or that Work has been satisfactorily carried out in accordance with this Agreement;
- (b) an admission of liability by City;
- (c) approval by City of Principal Project Company's performance or compliance with this Agreement;
- (d) acknowledgement that City has inspected or accepted the Work; or
- (e) waiver of any Claim or right that City may then or thereafter have, including among others, warranty and indemnity rights.

---

## 11.10 Other Adjustments; Full Compensation

Principal Project Company acknowledges and agrees:

- (a) the Milestone Payment and Availability Payments calculated in accordance with this Article 11 (Payments to Principal Project Company) and Exhibit 4 (Payment Mechanism) are subject to adjustment to reflect previous over-payments and/or under-payments, any interest payable in respect of any amounts owed, and any other amount due and payable from Principal Project Company to City or from City to Principal Project Company under this Agreement, including credits, deductions or offsets for failure to meet Performance Requirements or pursuant to the Noncompliance and Deduction regime; and
- (b) that the payments provided for in this Article 11 (Payments to Principal Project Company) constitute full compensation for performance of all the Work, subject only to Principal Project Company's rights under Articles 12 (City Change Process; Unilateral Change Orders; Deviations), 13 (General Provisions Applying to Delay Events and Relief Events), 14 (Compensation and Other Relief for Delay Events and Relief Events) and 17 (Termination).

## 11.11 Appropriation; Certification of Funds

**11.11.1** All payments due from City to Principal Project Company under this Agreement, including any Termination Compensation, shall be paid solely from monies made available to City from an appropriation of funds for the purpose of making all such payments coming due in such fiscal year. SFMTA, or the San Francisco Board of Supervisors, as applicable, shall have the absolute and unconditional right, to be exercised in their discretion, for any reason, not to appropriate such funds.

**11.11.2** This Agreement is subject to the fiscal provisions of the City's Charter and the budget decisions of its Mayor and Board of Supervisors, each acting in its sole discretion. No funds will be available hereunder until prior written authorization certified by the City's Controller. The City's Controller cannot authorize payments unless funds have been certified as available in the budget or in a supplemental appropriation. City shall use commercially reasonable efforts to obtain the certification from the City's Controller if the funds have been appropriated for such purpose. Without prejudice to Principal Project Company's rights and remedies as set forth in this Agreement for unexcused and undisputed non-payment by City of any payment due Principal Project Company when due, City's obligations hereunder shall never exceed the amount certified by the City's Controller for the purpose and period stated in such certification. City, its employees and officers are not authorized to offer or promise any additional funding without City's Controller certification of such additional funding. Without such lawful approval and certification, City shall not be required to provide such additional funding.

**11.11.3** City shall:

- (a) make a timely submission for the fiscal year in which Substantial Completion of the Infrastructure Facility will occur of a budget proposal to the SFMTA

Board of Directors requesting a budget that includes the Milestone Payment and initial Availability Payment;

- (b) for each fiscal year beyond the fiscal year in which the initial Availability Payment is made, make a timely submission of a budget proposal to the SFMTA Board of Directors requesting a budget for each and every Availability Payment, including any subsequent change to the Maximum Availability Payment; and
- (c) request an appropriation of funds for the purpose of paying any Termination Payment payable by City or any other amount due from City under this Agreement other than the Availability Payments.

**11.11.4** City shall respond promptly in writing to any reasonable written request submitted by Principal Project Company for information regarding the status of any request City is obligated to make under Section 11.11.3.

**11.11.5** If City fails to appropriate money to make a Termination Payment, there shall be no contractual obligation of the City to make such payment that may be enforced; such contractual payment obligation shall arise only if and when any such amounts have been appropriated by City.

**11.11.6** City shall provide written Notice to Principal Project Company no later than ten Business Days following the enactment of any City budget with respect to a particular Fiscal Year that does not make an appropriation of funds for the purpose of paying the scheduled Availability Payments or Milestone Payment due for such Fiscal Year. City shall consult with Principal Project Company to discuss the situation and the possible solutions, it being understood that such discussions shall be without prejudice to Principal Project Company's right to termination for unexcused and undisputed non-payment by City of any payment due Principal Project Company when due, as set forth in Section 17.4.1 (Termination for City Default).

**11.11.7** The obligation of City to make any payments under this Agreement does not constitute a debt of the City under applicable Law and does not constitute a liability of or a lien or charge upon the funds or property of the City beyond the fiscal year for which there has been an appropriation of funds to make such payments. The obligation of City to make payments hereunder does not constitute an obligation of City for which City is obligated to levy or pledge any form of taxation or for which City has levied or pledged any form of taxation.

## **11.12 Allowances**

***[NOTE TO PNC: ALLOWANCE AMOUNTS UNDER DEVELOPMENT; CITY-FURNISHED IT/COMMS ALLOWANCE MAY BE JUST DISBURSED AND HELD FOR CITY IT/COMMS]***

### **11.12.1 Allowances, Generally**

- (a) Each of the Allowances is available to pay for certain portions of the D&C Work, with payments from the Allowance to be made on the basis identified with respect to each such Allowance under this Section 11.12 (Allowances).

- (b) Principal Project Company shall be entitled to use Office/Admin and Training Spaces FF&E Allowance as set forth in this Section 11.12 (Allowances).
- (c) City shall be entitled to be reimbursed from the City-Furnished IT/Comms Allowance for amounts incurred with respect to procurement, purchase and installation of the IT/Comms Equipment. To the extent that City directs Principal Project Company to procure, purchase or install any City-Furnished IT/Comms FF&E, the provisions in Section 11.11.1(b), (e) and (g) shall apply to the City-Furnished IT/Comms FF&E Allowance.
- (d) The initial amount of each Allowance is identified in Section 11.12 (Allowances). Principal Project Company acknowledges and agrees that the Milestone Payment and the Availability Payment include the Allowances and represent full compensation to Principal Project Company on account of the Allowances.
- (e) Principal Project Company shall keep detailed records of the quantities, units, or other agreed metrics with respect to the Office/Admin and Training Spaces FF&E Allowance and shall submit to City supporting documentation of such quantities with its invoices, and such other information as City may require, in its sole discretion.
- (f) Notwithstanding that the Allowances have been developed for specific elements of the D&C Work, City, in its sole discretion, may elect to use some or all of any Allowance as a source of payment for D&C Work for which Principal Project Company may be entitled under another Allowance or in connection with a Compensable Delay Event.
- (g) No Change Order is required for invoicing amounts remaining (with respect to relevant portions of the D&C Work) within any Allowance. Principal Project Company shall promptly provide Notice to City if it becomes apparent that the amount with respect to Office/Admin and Training Spaces FF&E Allowance will be exceeded, in which event the Parties shall negotiate a Change Order increasing the Office/Admin and Training Spaces FF&E Allowance and/or modifying the scope of the D&C Work to avoid the need to increase the Office/Admin and Training Spaces FF&E Allowance; provided, however, that in lieu of modification to the Office/Admin and Training Spaces FF&E Allowance amount and/or scope of D&C Work, City may, in its sole discretion, issue a Change Order, and such D&C Work otherwise eligible for invoicing against the Office/Admin and Training Spaces FF&E Allowance will not be invoiced against the Office/Admin and Training Spaces FF&E Allowance, but, instead, be invoiced under such Change Order, and such Change Order shall be on the same unit and other pricing terms as if the D&C Work were invoiced against the Office/Admin and Training Spaces FF&E Allowance.
- (h) If the amount with respect to Office/Admin and Training Spaces FF&E Allowance will be exceeded, City will bear the cost of such items.

- 
- (i) As part of Final Acceptance, all remaining amounts of any Allowance shall be refunded and paid to City.

### **11.12.2 Office/Admin and Training Spaces FF&E Allowance**

Principal Project Company shall be eligible to invoice against the Office/Admin and Training Spaces FF&E Allowance to address City-approved Office/Admin and Training Spaces FF&E, as set forth herein.

- (a) The Office/Admin and Training Spaces FF&E Allowance shall be in an initial amount of \$6,220,000.
- (b) The Office/Admin and Training Spaces FF&E Allowance shall be used for Office/Admin and Training Spaces FF&E.
- (c) For all Office/Admin and Training Spaces FF&E, Principal Project Company shall obtain at least three arms-length competitive price quotes (or, if Principal Project Company believes it is impractical to obtain such number of competitive price quotes, Principal Project Company may submit a request for waiver or modification of the competitive price quote requirement to City, which shall consider such request in its good faith discretion).
- (d) Invoicing for completed Office/Admin and Training Spaces FF&E Work shall be included in the monthly invoice described in Section 11.3 (Invoice, Other Amounts and Payments).
- (e) This Section 11.11.2 (Office/Admin and Training Spaces FF&E Allowance) shall not apply to, and the Office/Admin and Training Spaces FF&E Allowance shall not be useable for, repair and replacement of Office/Admin and Training Spaces FF&E that is damaged, defective or missing prior to Substantial Completion.

### **11.12.3 City-Furnished IT/Comms Allowance**

City shall be eligible to (i) invoice against the City-Furnished IT/Comms Allowance for City-Furnished IT/Comms FF&E; or (ii) direct Principal Project Company to procure and install such FF&E in which case Principal Project Company shall be eligible to invoice against the Office/Admin and Training Spaces FF&E Allowance to address City-approved Office/Admin and Training Spaces FF&E, each as set forth herein.

- (a) The City-Furnished IT/Comms Allowance shall be in an initial amount of \$2,850,000.
- (b) The City-Furnished IT/Comms Allowance is to be used for City-Furnished IT/Comms FF&E.
- (c) City shall provide Principal-Project-Company a monthly invoice for the procurement, purchase and installation of City-Furnished IT/Comms FF&E.

- (d) Invoicing for completed City-Furnished IT/Comms FF&E Work shall be included in the monthly invoice described in Section 11.3 (Invoice, Other Amounts and Payments).

#### **11.12.4 Partnering Allowance**

Principal Project Company shall be eligible to invoice against the Partnering Allowance for Partnering, as set forth herein.

- (a) The Partnering Allowance shall be in an initial amount of \$200,000.
- (b) The Partnering Allowance is to be used for Partnering costs and expenses.
- (c) City shall provide Principal Project Company a monthly invoice for Partnering.
- (d) Invoicing for completed Partnering shall be included in the monthly invoice described in Section 11.3 (Invoice, Other Amounts and Payments).

---

**ARTICLE 12. CITY CHANGE PROCESS; UNILATERAL CHANGE ORDERS;  
DEVIATIONS**

**12.1 General**

Exhibit 9 (Change Procedures) sets out the process with respect to (a) Change Orders issued by City following a Proposed Change Order request by City; (b) Unilateral Change Orders unilaterally issued by City; and (c) Change Orders issued by City following a PPC Change Request.

**12.2 City Changes**

**12.2.1** Subject to Section 12.2.2 and in accordance with the procedure set forth in Exhibit 9 (Change Procedures), City may at any time make changes to the Work, including additions or reductions in the scope of the D&C Work or IFM Services, or changes to the requirements applicable to the Work, as it may direct in its sole discretion (each, a “**City Change**”).

**12.2.2** Principal Project Company shall not be required to implement any City Change to the extent the City Change would:

- (a) result in a breach of Law, a breach of Good Industry Practice or a breach of any conditions of a Regulatory Approval or revocation of any Regulatory Approval;
- (b) require a new Regulatory Approval which would not be reasonably obtainable;
- (c) render any Insurance Policy void or voidable;
- (d) materially and adversely affect the health and safety of any person; or
- (e) materially and adversely affect the nature of the Project as a whole, such that the City Change would constitute a cardinal change under California law.

Principal Project Company acknowledges that a City Change relating to a Joint Development Alternative would not fall under clause (e).

---

**ARTICLE 13. GENERAL PROVISIONS APPLYING TO DELAY EVENTS AND RELIEF EVENTS**

**13.1 Interface with Other Portions of the Facility**

**13.1.1** Principal Project Company acknowledges and agrees that if any PPC-Related Entity, any JDA-Related-Entity, or any entity that is not a PPC-Related Entity or a JDA-Related-Entity but that executes an interface agreement substantially in the form of Exhibit 8 (Form of Interface Agreement), is involved in any aspect of the development, design, construction, operations or maintenance of a Joint Development Alternative, then:

- (a) any interference or delay in the performance of the D&C Work or the IFM Services or damage affecting the Infrastructure Facility, in each case, caused in whole or in part by or in any way related to a Joint Development Alternative, shall be entirely Principal Project Company's responsibility and liability;
- (b) Principal Project Company shall not make any Claim for, and shall not receive or be entitled to, any additional compensation, time extensions, or relief from its obligations under this Agreement for any delay, additional costs, or failure to perform due to Losses, interference, delay, or damage caused in whole or in part by or in any way related to a Joint Development Alternative;
- (c) City shall have no liability or responsibility to Principal Project Company for any Losses, interference, delay, or damage incurred or suffered by Principal Project Company or any PPC-Related Entity with respect to the Infrastructure Facility, including the D&C Work and IFM Services, that is caused, in whole or in part, by a JDA-Related Entity or in any way related to or arising out of a Joint Development Alternative; and
- (d) City shall continue to enforce all of City's rights and remedies under this Agreement in circumstances where Principal Project Company cannot perform its obligations hereunder due to any Losses, interference, delay, or damage caused in whole or in part by or in any way related to a Joint Development Alternative or a JDA Related-Entity, including City's rights to assess and collect Deductions, declare a PPC Default, declare a Persistent PPC Default and terminate this Agreement.

**13.1.2** With respect to the D&C Work performed by the D&C Contractor, the provisions of Section 13.1.1 shall not apply to the extent that the City commences construction of a Joint Development Alternative prior to the earlier of (i) Substantial Completion; or (ii) the Substantial Completion Deadline, unless, in either case, the prime contractor undertaking such construction is the D&C Contractor or an affiliate thereof (in which case, the provisions of Section 13.1.1 shall apply);

**13.2 Delay Event and Relief Event Process**

**13.2.1** If a Delay Event or Relief Event occurs, subject to the limitations and exclusions provided in this Agreement, Principal Project Company may seek additional compensation, time

extension, and/or other relief, if applicable, in accordance with the entitlements specified in Article 14 (Compensation and Other Relief for Delay Events and Relief Events).

**13.2.2** The agreement of the Parties as to the specific compensation, time extension, or other relief to be given Principal Project Company on account of a Delay Event or Relief Event, as applicable, shall be evidenced by a written amendment or change order to this Agreement.

**13.2.3** Either Party may initiate the Contract Dispute Procedures if:

- (a) the Parties are unable to agree as to the specific compensation, time extension, or other relief to be given Principal Project Company on account of an alleged Delay Event or Relief Event; or
- (b) City rejects the Delay Event or Relief Event claim, as applicable.

### **13.3 Mitigation**

**13.3.1** If a Delay Event, Relief Event or any other event occurs as a result of which Principal Project Company considers that it is entitled to claim an extension of time, compensation or relief from performance of its obligations under this Agreement (together “**Relevant Events**”), then Principal Project Company shall, and shall require all PPC-Related Entities to, use and continue to use commercially reasonable efforts to:

- (a) Eliminate or mitigate the liability, Losses, schedule impact and other consequences of such event upon the performance of its obligations under this Agreement, including by re-sequencing, rescheduling, reallocating or redeploying Principal Project Company forces to other work, as appropriate;
- (b) Continue to perform and remain liable and responsible for its obligations under this Agreement notwithstanding the Relevant Event; and
- (c) Resume performance of its obligations under this Agreement affected by the Relevant Event as soon as practicable and in no event later than promptly after the cessation of the Relevant Event.

**13.3.2** To the extent that Principal Project Company does not comply with its obligations under this Section 13.3 (Mitigation), then Principal Project Company’s entitlement to claim an extension of time, compensation or relief from performance of its obligations under this Agreement with respect to the Relevant Event will be reduced to the extent of such failure.

### **13.4 Deductions for Relevant Events**

The compensation payable to Principal Project Company with respect to any Relevant Event will be reduced by:

- (a) any amount which a PPC-Related Entity recovers under any Insurance Policy, or would have recovered if it had complied with the requirements of this Agreement in respect of any Insurance Policy in respect of the Relevant Event, which amount, for greater certainty, will not include any excess or

deductibles or any amount over the maximum amount insured under any such Insurance Policy; and

- (b) the amount of any Extra Work Costs, other direct costs and margins calculated in accordance with Exhibit 13 (Costs Schedule) avoided or otherwise reduced as a result of the Relevant Event.

### **13.5 Acts of a PPC-Related Entity**

Principal Project Company's entitlement to claim an extension of time, compensation or relief from performance of its obligations under this Agreement with respect to any Relevant Event will be reduced to the extent the Relevant Event arises out of, relates to or was caused or contributed to by the acts or omissions of any PPC-Related Entity or any PPC Fault.

### **13.6 Notification; Delay in Notification**

**13.6.1** Principal Project Company shall provide Notice regarding Relevant Events:

- (a) as provided in Section 14.1.1 (Claim for Delay Event) with respect to Delay Events;
- (b) as provided in Section 14.2.2 (Claim for a Relief Event) with respect to Relief Events; and

**13.6.2** as provided in accordance with this Agreement with respect to all other Relevant Events.

### **13.7 Multiple and Overlapping Claims**

Principal Project Company may make multiple but not duplicative Claims with respect to a Relevant Event.

### **13.8 Burden of Proof and Mitigation**

Principal Project Company bears the burden of proof in establishing (a) the occurrence of a Relevant Event and (b) the entitlement to, and amount of, relief for such Relevant Event, including demonstrating that Principal Project Company complied with its mitigation obligations under Section 13.3 (Mitigation).

### **13.9 Sole Entitlement**

Principal Project Company acknowledges and agrees that:

- (a) Subject to the express terms of this Agreement, the Milestone Payment and Availability Payments constitute full compensation for performance of all of the Work; and
- (b) Principal Project Company's sole right to claim an extension of time, compensation or relief from performance of its obligations under this Agreement or otherwise make any Claim for any liability in connection with a

Delay Event or Relief Event is as set out in Article 13 (General Provisions Applying to Delay Events and Relief Events) and Article 14 (Compensation and Other Relief for Delay Events and Relief Events).

### **13.10 Compensation**

City will pay the compensation due to Principal Project Company under Article 13 (General Provisions Applying to Delay Events and Relief Events) and Article 14 (Compensation and Other Relief for Delay Events and Relief Events) in accordance with Exhibit 13 (Costs Schedule).

### **13.11 Waiver**

As a condition precedent to City's obligation to pay any compensation, grant an extension of time or provide any other relief to fully resolve or address a Delay Event or a Relief Event, Principal Project Company shall execute a full, unconditional, irrevocable waiver and release, in favor of and in a form reasonably acceptable to City, of any other Claims, Losses or rights to relief arising out of such Delay Event or a Relief Event, as applicable, that is not the subject of a Contract Dispute.

---

## ARTICLE 14. COMPENSATION AND OTHER RELIEF FOR DELAY EVENTS AND RELIEF EVENTS

### 14.1 Relief During the D&C Period

This Section 14.1 (Relief During the D&C Period) sets out Principal Project Company's entitlement to an extension of time, Extra Work Costs, Financing Delay Costs and Delay Costs (as applicable) as a result of Delay Events. Principal Project Company's entitlement to relief and compensation under this Section 14.1 (Relief During the D&C Period) is subject to the limitations on compensation in Article 13 (General Provisions Applying to Delay Events and Relief Events), Exhibit 13 (Costs Schedule), and this Agreement.

#### 14.1.1 Claim for Delay Event

**14.1.1.1** Principal Project Company shall provide Notice to City's Authorized Representative within 30 days of obtaining Actual Knowledge of the occurrence of Delay Event (or, if earlier, on such date that Principal Project Company should have discovered such Relief Event if Principal Project Company was in full compliance with the terms of the Contract Documents). Failure to do so shall result in a waiver of and forfeiture of any relief, compensation or time extension related to the event or occurrence.

**14.1.1.2** Principal Project Company shall, within 10 Business Days after such initial Notice, provide further details to City's Authorized Representative, which shall, to the extent Principal Project Company has obtained Actual Knowledge, include:

- (a) A summary of the provisions of this Agreement that entitle Principal Project Company to relief. If Principal Project Company seeks relief for City's alleged breach of this Agreement, then Principal Project Company shall identify the provisions of this Agreement which allegedly have been breached and the actions or failures to act constituting such breach;
- (b) Details of the Delay Event, the circumstances from which the Delay Event arises including its nature, the date of its occurrence, its duration (to the extent that the Delay Event and the effects thereof have ceased or estimated duration to the extent that the Delay Event and the effects thereof have not ceased), the portions of the Infrastructure Facility affected;
- (c) Details of the contemporary records which Principal Project Company shall maintain to substantiate its claim for extra time and the substance of any oral communications, if any, relating to the Delay Event and the name of the person or persons making such material oral communications;
- (d) Analysis of consequences (whether direct or indirect, financial or non-financial) the Delay Event may have upon achieving the Substantial Completion Date or the Final Acceptance Date, as applicable, including a TIA indicating all activities represented or affected by the change, with activity numbers, durations, predecessor and successor activities, resources and cost, and with a narrative report, in form satisfactory to City, which compares the proposed new schedule to the Project Schedule, as appropriate. Principal

Project Company shall reschedule activities not otherwise affected by the event, in order to take advantage of additional Float available as the result of the time extension. Any such rescheduling shall be reflected in the Project Schedule;

- (e) Where the Delay Event is also a Compensable Delay Event, an itemized estimate of all amounts claimed under Section 14.1.1 (Claim for Delay Event). Extra Work Costs and Delay Costs (as applicable) and Financing Delay Costs shall be broken down in accordance with Exhibit 13 (Costs Schedule);
- (f) Where the Delay Event is also an Unavoidable Delay Event, an itemized estimate of any Financing Delay Costs claimed under Sections 14.1.6 or 14.1.7 (Additional Limits Relating to Force Majeure Events or Unavoidable Delay Events During D&C Period) broken down in accordance with Exhibit 13 (Costs Schedule);
- (g) The type and amount of insurance that may be applicable and amounts that have been or are anticipated to be collected under such insurance; and
- (h) Details of any measures that Principal Project Company has taken to date and proposes to adopt to mitigate the consequences of such Delay Event in accordance with Section 13.3 (Mitigation).

**14.1.1.3** Within 7 days of Principal Project Company receiving, or becoming aware of, any supplemental information which may further substantiate or support Principal Project Company's Claim, Principal Project Company shall submit further particulars based on such information to City's Authorized Representative.

**14.1.1.4** City's Authorized Representative shall, after receipt of details under Section 14.1.1.2, or of further particulars under Section 14.1.1.3, be entitled by Notice to Principal Project Company to require that Principal Project Company provide such further supporting particulars as City's Authorized Representative may reasonably consider necessary. Principal Project Company shall provide City's Authorized Representative full access and facilities for investigating and assessing the validity of Principal Project Company's Claim, including, on-site inspection.

**14.1.1.5** Principal Project Company shall provide City with monthly updates, together with further details and supporting documentation, as it receives or develops additional information pertaining to the Delay Event and the matters described in Section 14.1.1.2. Without limiting the foregoing, Principal Project Company shall notify City as soon as the Delay Event has ceased and when performance of its affected obligations can be resumed.

## **14.1.2 Extension of Deadlines for Delay Events**

**14.1.2.1** Except as provided in Section Error! Reference source not found., upon the occurrence of a Delay Event, Principal Project Company shall be entitled to an extension of the Contract Deadlines equal to the delay to the Critical Path directly caused by the Delay Event.

**14.1.2.2** City's Authorized Representative shall determine revised Contract Deadlines arising out of a Delay Event, as soon as reasonably practicable and in any event within 30 days of the later of:

- (a) The date of receipt by City's Authorized Representative of Principal Project Company's Notice given in accordance with Section 14.1.1.1 and the date of receipt of any further particulars (if such are required under Section 14.1.1.2 or Section 14.1.1.3), whichever is later; and
- (b) The date of receipt by City's Authorized Representative of any supplemental information supplied by Principal Project Company in accordance with Section 14.1.1.3 (if such are required under Section 14.1.1.4), whichever is later.

### **14.1.3 Concurrent Delays**

If Principal Project Company has made a Claim for an extension of time in accordance with Section 14.1.2 (Extension of Deadlines for General Delay Events) which is caused by City Fault and there is another unrelated delay to a Critical Path for which a PPC-Related Entity is responsible under this Agreement, Principal Project Company shall remain entitled to an extension of time to the Substantial Completion Deadline or Final Acceptance Deadline, as applicable, in accordance with, and subject to, Section 14.1.2 (Extension of Deadlines for General Delay Events), but shall not be entitled to any compensation or monetary relief associated with such extension of time or Claim. If Principal Project Company has made a Claim for an extension of time in accordance with Section 14.1.2 (Extension of Deadlines for General Delay Events) which is not caused by City Fault and there is another unrelated delay to a Critical Path for which a PPC-Related Entity is responsible under this Agreement, Principal Project Company shall not be entitled to an extension of time to the Substantial Completion Deadline or Final Acceptance Deadline, as applicable, to the extent and for so long as the Delay Event is concurrent with any other unrelated delay to a Critical Path for which any PPC-Related Entity is responsible under this Agreement.

### **14.1.4 Costs Payable for Compensable Delay Events**

Subject to the limitations on compensation in Article 13 (General Provisions Applying to Delay Events and Relief Events), this Section 14.1 (Relief During the D&C Period) and Exhibit 4 (Payment Mechanism), if a Compensable Delay Event occurs, City shall reimburse Principal Project Company for:

- (a) Extra Work Costs calculated in accordance with Exhibit 13 (Costs Schedule) directly attributable to the Compensable Delay Event;
- (b) Delay Costs calculated in accordance with Exhibit 13 (Costs Schedule) attributable to the Compensable Delay Event, but only where an extension of time is granted under Section 14.1.2 (Extension of Deadlines for General Delay Events) for a City-Caused Delay Event; and
- (c) Financing Delay Costs calculated in accordance with Exhibit 13 (Costs Schedule) but only where an extension of time is granted under Section 14.1.2 (Extension of Deadlines for General Delay Events) for the Compensable

---

Delay Event and Principal Project Company is unable to achieve Substantial Completion by the original Substantial Completion Deadline.

#### **14.1.5 Additional Limits Relating to Hazardous Materials Event During D&C Period**

If a Delay Event is a Hazardous Materials Event, no compensation or time relief shall be provided for ((i) once Principal Project Company obtains Actual Knowledge of the Hazardous Materials (or should have discovered such Hazardous Materials if Principal Project Company was in full compliance with the terms of the Contract Documents), any Hazardous Materials that could have been reasonably avoided by use of available construction techniques or incorporation of anticipated or minor design changes which are consistent with Good Industry Practice; (ii) once Principal Project Company obtains Actual Knowledge of the Hazardous Materials (or should have discovered such Hazardous Materials if Principal Project Company was in full compliance with the terms of the Contract Documents, including by performing a Reasonable Investigation), any Hazardous Materials encountered, to the extent Principal Project Company is required and failed to manage or mitigate against the risk of such Hazardous Materials in accordance with this Agreement; and (iii) once Principal Project Company obtains Actual Knowledge of the Hazardous Materials (or should have discovered such Hazardous Materials if Principal Project Company was in full compliance with the terms of the Contract Documents, including by performing a Reasonable Investigation), any Hazardous Materials encountered, to the extent a contractor, acting in accordance with Good Industry Practice, would have taken preventative measures to prevent or minimize such Hazards Materials, and Principal Project Company has failed to take such preventative measures. With respect to Extra Work Costs, Principal Project Company's entitlement to compensation for a Hazardous Materials Event shall be limited to Extra Work performed under the City-approved plans required to be provided under Section 01 35 44 of Division 10 of the Technical Requirements, and as otherwise limited in accordance with Section 7.7 (Hazardous Materials Management; Risk Allocation).

#### **14.1.6 Costs Payable for Force Majeure Events During the D&C Term**

**14.1.6.1** If a Delay Event for which an extension of time was granted under Section 14.1.2 (Extension of Deadlines for General Delay Events) is:

- (a) a Force Majeure Event; and
- (b) the Force Majeure Event is not insured against and is not required to be insured against in accordance with this Agreement,

City will reimburse Principal Project Company for Financing Delay Costs (if any) and any Extra Work Costs, if any, authorized pursuant to a Change Order under Section 14.6 (Loss or Damage Due to Force Majeure Termination Event).

**14.1.6.2** In addition, if (i) Principal Project Company is unable to perform all or substantially all of its obligations under the Contract Documents for a period of 180 consecutive days or more; and (ii) such inability to perform its obligations is not attributable to a concurrent non-Force Majeure Termination Event, City will reimburse Principal Project Company for Delay Costs incurred after such 180 day period until 255 days after the occurrence of such Force Majeure

Termination Event, after which Section 17.2 (Termination for Force Majeure Termination Events or Insurance Unavailability) applies.

#### **14.1.7 Costs Payable for Unavoidable Delay Events During the D&C Term**

If a Delay Event for which an extension of time was granted under Section 14.1.2 (Extension of Deadlines for General Delay Events) is an Unavoidable Delay Event, City will reimburse Principal Project Company for Financing Delay Costs (if any), such reimbursement to be Principal Project Company's sole entitlement to compensation for such Unavoidable Delay Event.

#### **14.1.8 Impact of Delay Event on Performance of D&C Work**

**14.1.8.1** Any failure by Principal Project Company to perform the D&C Work during the D&C Term, to the extent directly arising out of any Delay Event, will:

- (a) not constitute a breach of this Agreement by Principal Project Company;
- (b) not result in accrual of Noncompliance Points or Deductions with respect to any Delay Event ;
- (c) relieve Principal Project Company of its obligations to perform such directly affected D&C Work for the duration and to the extent directly prevented by such Delay Event as described in Section 13 of Exhibit 4 (Payment Mechanism); and
- (d) not result in a Principal Project Company Default or right of termination or other claim by City, other than either Party's right to terminate this Agreement under Section 17.2 (Termination for Force Majeure Events or Insurance Unavailability).

**14.1.8.2** Notwithstanding Section 14.1.7 (Impact of Delay Event on Performance of D&C Work), Principal Project Company shall remain fully responsible for performance of all elements of the D&C Work not directly impacted or affected by any Delay Event.

#### **14.1.9 Relief for Adverse Weather Event**

**14.1.9.1** The occurrence of Adverse Weather alone shall not be a prima facie reason for an Adverse Weather Event, and Principal Project Company shall make every effort to continue to work under prevailing conditions. Such efforts by Principal Project Company shall include: providing temporary gravel roads; installing a rain dewatering system; protecting interior and exterior areas exposed to rain, wind, and extreme temperatures; and providing temporary heat where required for Work to proceed without delay.

**14.1.9.2** Principal Project Company shall plan the D&C Work to allow for 17 days of Adverse Weather per year during normal working hours. The Project Schedule shall incorporate 17 days per year for the anticipated number of days of Adverse Weather. As used in this Section 14.1.8.2, "year" shall mean the period measured between May 1-April 30 of each calendar year

during the D&C Period. If the D&C Period commences or ends during a partial year, the foregoing 17-day period shall be prorated and rounded up to the nearest day.

**14.1.9.3** Principal Project Company shall not be entitled to a time extension or relief from its obligations under this Agreement for Adverse Weather until the 18<sup>th</sup> day of occurrence of Adverse Weather in a year, or such lesser applicable amount for any prorated year, as determined pursuant to Section 14.1.8.2.

**14.1.9.4** If there are years with less days of Adverse Weather than 17 days, or such lesser applicable amount for any prorated year, as determined pursuant to Section 14.1.8.2, the unused days shall be rolled into Float.

## **14.2 Relief During the IFM Period**

### **14.2.1 Overview**

This Section 14.1.7 (Relief During the IFM Period) sets out Principal Project Company's entitlement to Extra Work Costs and relief from performance as a result of Relief Events occurring during the IFM Period. Principal Project Company's right to relief and compensation under this Section 14.1.7 (Relief During the IFM Period) is subject to the limitations on compensation in Article 13 (General Provisions Applying to Delay Events and Relief Events), Exhibit 13 (Costs Schedule), and this Agreement.

### **14.2.2 Claim for a Relief Event**

**14.2.2.1** Principal Project Company shall provide Notice to City's Authorized Representative within 30 days of obtaining Actual Knowledge of the occurrence of Relief Event (or, if earlier, on such date that Principal Project Company should have discovered such Relief Event if Principal Project Company was in full compliance with the terms of the Contract Documents). Failure to do so shall result in a waiver and forfeiture of any relief, compensation or time extension related to the event or occurrence.

**14.2.2.2** Principal Project Company shall, within 10 Business Days after its Notice under Section 14.2.2.1, provide a further Notice to City's Authorized Representative, which shall, to the extent Principal Project Company has obtained Actual Knowledge, include:

- (a) A summary of the provisions of this Agreement that entitle Principal Project Company to relief. If Principal Project Company seeks relief for City's alleged breach of this Agreement, then Principal Project Company shall identify the provisions of this Agreement which allegedly have been breached and the actions constituting such breach;
- (b) Details of the Relief Event, circumstances from which the Relief Event arises including its nature, the date of its occurrence, its duration (to the extent that the Relief Event and the effects thereof have ceased or estimated duration to the extent that the Relief Event and the effects thereof have not ceased) and any portions of the Infrastructure Facility affected. Impacts to the IFM Services, if any, shall be stated by Term year;

- 
- (c) Details of the contemporary records which Principal Project Company shall maintain to substantiate its claim for relief or compensation and the substance of any oral communications, if any, relating to the Relief Event and the name of the person or persons making such material oral communications;
  - (d) Where the Relief Event is also a Compensable Relief Event, an itemized estimate of all amounts claimed under Section 14.2.3 (Costs Payable for Compensable Relief Events) broken down into Extra Work Costs identified in Exhibit 13 (Costs Schedule). The estimate shall include, to the extent applicable, Extra Work Costs for additional work for future IFM Services, and a proposal for how to reasonably net present value such amount to current dollars should the City wish to pay such amount in a lump sum payment;
  - (e) The type and amount of insurance that may be applicable and amounts that have been or are anticipated to be collected under such insurance; and
  - (f) Details of any measures that Principal Project Company has taken to date and proposes to adopt to mitigate the consequences of such Relief Event in accordance with Section 13.3 (Mitigation).

**14.2.2.3** As soon as possible but in any event within 7 days of Principal Project Company receiving, or becoming aware of, any supplemental information which may further substantiate or support Principal Project Company's Claim, Principal Project Company shall submit further particulars based on such information to City's Authorized Representative.

**14.2.2.4** City's Authorized Representative shall, after receipt of details under Section 14.2.2.2, or of further particulars under Section 14.2.2.3, be entitled by Notice to require Principal Project Company to provide such further supporting particulars as City's Authorized Representative may reasonably consider necessary. Principal Project Company shall afford City's Authorized Representative full access and facilities for investigating and assessing the validity of Principal Project Company's Claim, including, on-site inspection.

**14.2.2.5** Principal Project Company shall provide City with monthly updates, together with further details and supporting documentation, as it receives or develops additional information pertaining to the Relief Event and the matters described in Section 14.2.2.2. Without limiting the foregoing, Principal Project Company shall notify City as soon as the Relief Event has ceased and when performance of its affected obligations can be resumed.

### **14.2.3 Costs Payable for Compensable Relief Events**

Subject to the limitations on compensation in Article 13 (General Provisions Applying to Delay Events and Relief Events), this Section 14.1.7 (Relief During the IFM Period) and Exhibit 4 (Payment Mechanism), upon the occurrence of a Compensable Relief Event, City will reimburse Principal Project Company for all Extra Work Costs incurred by Principal Project Company as a direct result of the Compensable Relief Event calculated in accordance with Exhibit 13 (Costs Schedule). City will not be entitled to make Deductions/assess Noncompliance Points for non-performance that is caused directly as a result of a Compensable Relief Event; provided; however, that the Availability Payment shall be reduced for any avoided costs resulting from the Compensable Relief Event.

---

#### 14.2.4 Costs Payable for Force Majeure During IFM Period

##### 14.2.4.1 If a Force Majeure Event:

- (a) is not insured and is not required to be insured in accordance with this Agreement; and
- (b) directly and adversely impacts the IFM Services after Substantial Completion, then,
- (c) City will reimburse Principal Project Company for Extra Work Costs, if any, authorized pursuant to a Change Order under Section 14.6 (Loss or Damage Due to Force Majeure Termination Event); and
- (d) City is entitled to deduct from the Availability Payments the amount of avoided and/or reduced costs which are not in fact incurred by Principal Project Company during the period where IFM Services is not required to be performed by Principal Project Company pursuant to the Contract Documents. The deduction shall be in the amount of any costs (including applicable Extra Work Costs, Delay Costs, Financing Delay Costs, profit, overhead and margins calculated in accordance with Exhibit 13 (Costs Schedule) that are avoided or otherwise reduced. .

#### 14.2.5 Additional Limits Relating to Hazardous Materials Event During IFM Period

If a Relief Event is a Hazardous Materials Event, no compensation, performance or time relief shall be provided for (i) once Principal Project Company obtains Actual Knowledge of the Hazardous Materials (or should have discovered such Hazardous Materials if Principal Project Company was in full compliance with the terms of the Contract Documents), any Hazardous Materials that could have been reasonably avoided by use of available construction techniques or incorporation of anticipated or minor design changes which are consistent with Good Industry Practice; (ii) once Principal Project Company obtains Actual Knowledge of the Hazardous Materials (or should have discovered such Hazardous Materials if Principal Project Company was in full compliance with the terms of the Contract Documents), any Hazardous Materials encountered, to the extent Principal Project Company is required and failed to manage or mitigate against the risk of such Hazardous Materials in accordance with this Agreement; and (iii) once Principal Project Company obtains Actual Knowledge of the Hazardous Materials (or should have discovered such Hazardous Materials if Principal Project Company was in full compliance with the terms of the Contract Documents), any Hazardous Materials encountered, to the extent a contractor, acting in accordance with Good Industry Practice, would have taken preventative measures to prevent or minimize such Hazards Materials, and Principal Project Company has failed to take such preventative measures. Principal Project Company's entitlement to compensation for a Compensable Relief Event that is a Hazardous Materials Event shall be limited to the Extra Work Costs associated with the Hazardous Materials Event for Extra Work performed under the approved plans required to be provided under Section 01 35 44 of Division 10 of the Technical Requirements, and as otherwise limited in accordance with Section 7.7 (Hazardous Materials Management; Risk Allocation).

## **14.2.6 Impact of Relief Event on Performance of IFM Services**

**14.2.6.1** Any failure by Principal Project Company to perform the IFM Services from the Substantial Completion Date until the expiration of the IFM Period, to the extent directly arising out of any Relief Event, will:

- (a) not constitute a breach of this Agreement by Principal Project Company;
- (b) not result in accrual of Noncompliance Points or Deductions with respect to any Relief Event;
- (c) relieve Principal Project Company of its obligations to perform such directly affected IFM Services for the duration and to the extent directly prevented by such Relief Event as described in Section 13 of Exhibit 4 (Payment Mechanism); and
- (d) not result in a Principal Project Company Default or right of termination or other claim by City, other than either Party's right to terminate this Agreement under Section 17.2 (Termination for Force Majeure Termination Events or Insurance Unavailability).

**14.2.6.2** Notwithstanding Section 14.2.6.1, Principal Project Company shall remain fully responsible for performance of all elements of the IFM Services not directly impacted or affected by any Relief Event.

## **14.3 Method of Payment of Compensation for Compensable Delay Events and Compensable Relief Events**

**14.3.1** Additional compensation due for a Compensable Delay Event or a Compensable Relief Event shall be paid in accordance with Section 7.0 (Form and Timing of Compensation) of Exhibit 13 (Costs Schedule).

**14.3.2** City shall provide Principal Project Company with prompt written Notice of the method chosen for paying Principal Project Company for the amounts owed under this Article 14 (Compensation and Other Relief for Delay Events and Relief Events).

**14.3.3** If City elects to pay for such amounts by periodic payments, progress payments, milestone payments or a lump sum payment, Principal Project Company shall submit an invoice, in a format acceptable to City, for the amount of each such payment, and City will make payment of all undisputed amounts to Principal Project Company within 30 Business Days of receipt of a complete and proper invoice.

## **14.4 Open Book Basis**

Principal Project Company shall share with City all data, documents and information, and shall conduct all discussions and negotiations, pertaining to any claimed Delay Event or Relief Event, as applicable, on an Open Book Basis.

## **14.5 Excavations; Public Contract Code 7104**

Information regarding site conditions included in the Technical Requirements and Reference Documents (including any information, reports, or studies about site conditions, geotechnical conditions, Utilities or structure and bridge design, and any interpretations, extrapolations, analyses and recommendations contained therein) shall not be considered “indicated” therein as such term is used in Public Contract Code section 7104. Principal Project Company is responsible for investigating and satisfying itself as to the site conditions affecting the Project Site and the Work. To the maximum extent permitted by Law, Principal Project Company knowingly, unconditionally, irrevocably and specifically waives each and every right and benefit of Public Contract Code section 7104 to the extent that it may be inconsistent with any provision of the Contract Documents. Principal Project Company acknowledges and agrees that this waiver and the risk allocations set forth in the Contract Documents are a material consideration for City to award and enter into this Agreement with Principal Project Company.

## **14.6 Loss or Damage Due to Force Majeure Event**

**14.6.1** If the D&C Work or the Infrastructure Facility are wholly or substantially destroyed or damaged by:

- (a) a Force Majeure Event which is not insured against and is not required to be insured against in accordance with this Agreement or Insurance Unavailability; and
- (b) City requires Principal Project Company to repair, replace or rebuild the D&C Work or the Infrastructure Facility,

the Parties will use reasonable efforts to negotiate and agree on how the D&C Work or the Infrastructure Facility will be repaired, replaced or rebuilt in accordance with Exhibit 9 (Change Procedure) and the Extra Work Costs of doing so in accordance with Exhibit 13 (Costs Schedule).

**14.6.2** The Parties’ attempts to negotiate must not limit City’s right to issue a Change Order or Unilateral Change Order in accordance with this Agreement or the Parties’ right to terminate under Section 17.2 (Termination for Force Majeure Termination of Insurance Unavailability).

---

## ARTICLE 15. DEDUCTIONS AND NONCOMPLIANCE POINTS

### 15.1 Failure Events

**15.1.1** Appendix A of Exhibit 4 (Payment Mechanism) identifies certain D&C Failure Events applicable from the Effective Date until the Final Acceptance Date.

**15.1.2** The Performance Measurements Table identifies certain IFM Failure Events which may become an Availability Failure or Service Failure during the IFM Period as described in Exhibit 4 (Payment Mechanism).

**15.1.3** Each Noncompliance Event will result in either or both:

- (a) the assessment of Noncompliance Points;
- (b) the assessment of Deductions,

in each case in accordance with Exhibit 4 (Payment Mechanism).

### 15.2 Deductions

**15.2.1** In accordance with Exhibit 4 (Payment Mechanism) and Section 15.4, City may:

- (a) assess D&C Period Deductions (i) immediately for any D&C Failure Event for which no Rectification Time is specified in the Performance Measurements Table; (ii) at the end of each Rectification Time or any additional Rectification Time for any D&C Failure Event if Principal Project Company has not Rectified the Noncompliance Event; and
- (b) assess IFM Period Deductions (i) immediately for any IFM Failure Event or D&C Failure Event for which no Rectification Time is specified in the Performance Measurements Table; (ii) at the end of the Response Time (if any) if Principal Project Company has not Responded to the Noncompliance Event; and (iii) the end of each Rectification Time if Principal Project Company has not Rectified the Noncompliance Event.

**15.2.2** Principal Project Company acknowledges that any Deductions, are reasonable liquidated damages under the circumstances existing at the Effective Date, to compensate City for:

- (a) City's increased costs of administering the Contract Documents, including any obligations to pay or reimburse Governmental Entities over the Project for their increased costs of monitoring and enforcing Principal Project Company's compliance with applicable Regulatory Approvals;
- (b) City's potential loss of revenues due to a reduction in its operations at the Infrastructure Facility;
- (c) potential harm to the public; and

- (d) potential harm to the credibility and reputation of City with stakeholders, policy makers and with the general public.

**15.2.3** Principal Project Company further acknowledges that such increased costs and loss of revenue, credibility and reputation, would be difficult and impracticable to measure and prove, because, among other things, the costs of administering the Contract Documents prior to increases in the level thereof will be variable and extremely difficult to quantify and the variety of factors that influence use of and demand for the Infrastructure Facility and associated SFMTA services generally make it difficult to sort out causation and quantify the precise revenue loss attributable to the matters that will trigger these liquidated damages.

**15.2.4** Except for other remedies expressly provided in this Agreement, including City's right to assess Noncompliance Points and to be indemnified for Third Party claims, any Deduction assessed in accordance with this Agreement shall constitute City's sole remedy in respect of City's damages arising from the Noncompliance Event, for which such Deduction is assessed.

### **15.3 Noncompliance and Failure Reporting, Notification and Cure Process**

#### **15.3.1 Noncompliance Database**

**15.3.1.1** Principal Project Company shall establish and maintain an electronic database for recording and tracking Failure Events and Noncompliance Events (the "**Noncompliance Database**"). The format and design of the database shall be subject to City's approval, in its reasonable discretion. At a minimum, the database shall:

- (a) include a description of each Failure Event in reasonable detail;
- (b) provide for automatic notification to City of the entry of a Failure Event in the Noncompliance Database;
- (c) identify the location of the Failure Event (if applicable);
- (d) identify the date and time of each Failure Event;
- (e) identify the applicable Response Time and Rectification Time of the IFM Failure Event, if any, stated in the Performance Measurements Table;
- (f) indicate date and time of Response and Rectification for any Failure Event;
- (g) indicate when a Noncompliance Event has developed; and
- (h) record the number of assessed Noncompliance Points, the date of each assessment, and the date when each Noncompliance Event is cured.

**15.3.1.2** Principal Project Company shall provide City with full access to the Noncompliance Database at all times, including the ability to enter Failure Events into the Noncompliance Database as provided in Section 15.3.2 (Notification Initiated by City).

### **15.3.1.3 Notification Initiated by Principal Project Company**

As an integral part of Principal Project Company's self-monitoring obligations, Principal Project Company shall record in the Noncompliance Database, in real time and upon discovery, the occurrence of any Failure Event specified in the Performance Measurements Table.

### **15.3.2 Notification Initiated by City**

If City believes a Failure Event has occurred that Principal Project Company has not recorded in the Noncompliance Database, City may enter the Failure Event into the Noncompliance Database or deliver to Principal Project Company a Notice of Determination as provided in Section 15.3.3.2 via the Noncompliance Database, and delivery shall be deemed given upon proper entry of the information into the Noncompliance Database.

### **15.3.3 Performance Reports**

**15.3.3.1** Principal Project Company shall include in each Monthly Report and in each Monthly Progress Status Report required under Section 1.2.4.1 of Division 1 and Section B.11 of the IFM Specifications, a report of all Failure Events and Noncompliance Events that occurred during the preceding calendar month, which reports shall include the same detailed information required to be recorded in the Noncompliance Database. Principal Project Company shall correct any inaccuracies in reporting of Failure Events, Noncompliance Events and Noncompliance Points, within 10 Business Days of City's notification to Principal Project Company of such inaccuracies.

**15.3.3.2** Within a reasonable time after receiving the Monthly Report, City will deliver to Principal Project Company a Notice setting forth for each Failure Event City's determination whether the Failure Event was Responded to or Rectified (as applicable) during the applicable Rectification Time, City's determination whether a Noncompliance Event occurred, and the Noncompliance Points and Deductions to be assessed with respect to such Noncompliance Event (a "**Notice of Determination**").

### **15.3.4 Response and Rectification Times**

**15.3.4.1** Principal Project Company shall Respond to each IFM Failure Event by the end of the Response Time (if any) for each such Failure Event.

**15.3.4.2** Principal Project Company shall Rectify each IFM Failure Event by the end of the Rectification Time (if any) for each such Failure Event.

**15.3.4.3** For each IFM Failure Event identified, Principal Project Company's applicable Response Time and Rectification Time with respect to the IFM Failure Event shall be deemed to start on the date and time Principal Project Company first obtained Actual Knowledge or should have first reasonably known of (if Principal Project Company was in full compliance with the terms of the Contract Documents) the IFM Failure Event. For this purpose, if the Notice of the IFM Failure Event is initiated by City, Principal Project Company shall be deemed to first obtain Actual Knowledge of the IFM Failure Event not later than the date of delivery of the Notice to Principal Project Company.

**15.3.4.4** Following the occurrence of an Availability Deduction or Service Failure Deduction, Principal Project Company shall be allowed an additional Rectification Time as set out in

Section 6.3 of Exhibit 4 (Payment Mechanism). If, before the expiry of this additional period, Principal Project Company Rectifies the Availability Failure or Service Failure, no further Availability Deduction or Service Failure Deduction shall be made. Otherwise, a further Deduction shall be made of the applicable amount and a further Rectification Time of equal duration shall apply. This process and application shall continue until Principal Project Company Rectifies the Availability Failure or Service Failure, subject to any other rights and remedies of City in connection with such Availability Failure or Service Failure.

### **15.3.5 Notification of Response and Rectification**

**15.3.5.1** When Principal Project Company determines that its Response or Rectification (as applicable) of an IFM Failure Event has been completed, Principal Project Company shall make an entry in the Noncompliance Database that:

- (a) identifies the IFM Failure Event;
- (b) states that Principal Project Company has completed Response or Rectification; and
- (c) briefly describes the applicable Response or Rectification, including any modifications to the Project Management Plan to prevent future similar IFM Failure Events.

**15.3.5.2** Principal Project Company shall include the same information in the next Monthly Report.

**15.3.5.3** City may, via written Notice of rejection, reject any Principal Project Company Notice of completed Response or Rectification if it determines that Principal Project Company has not rectified the Failure Event and shall, upon making this determination, deliver a written Notice of rejection to Principal Project Company.

### **15.4 Assessment of Noncompliance Points**

**15.4.1** City may assess Noncompliance Points in accordance with this Section 15.4 (Assessment of Noncompliance Points), Section 6 of Exhibit 4 (Payment Mechanism) and the Performance Measurements Table upon the occurrence of Noncompliance Events.

**15.4.2** If, at any time, the Noncompliance Database or a Monthly Report indicates, or City is notified or otherwise obtains Actual Knowledge of, a Failure Event or Noncompliance Event, or City provides Principal Project Company with a Notice of Determination, then, without prejudice to any other right or remedy available to City, City may assess Noncompliance Points, subject to the following terms and conditions:

- (a) except as provided in Section 15.4.2(b), City may assess Noncompliance Points at each of the following times: (i) immediately for any IFM Failure Event or D&C Failure Event for which no Rectification Time is specified in the Performance Measurements Table; (ii) the end of the Response Time (if any) if Principal Project Company has not Responded to the Noncompliance Event; and (iii) the end of each Rectification Time if Principal Project Company has not Rectified the Noncompliance Event;

- 
- (b) if City initiated Notice of a Failure Event that becomes a Noncompliance Event entitling City to assess Noncompliance Points, and to the extent City has determined to assess Noncompliance Points, City may allocate the applicable Noncompliance Points at the commencement of the applicable Response Time or Rectification Time. If City and Principal Project Company deliver concurrent written Notices of the same Failure Event, or concurrently seek to enter the details of the Failure Event into the Noncompliance Database, Principal Project Company's Notice shall prevail, if complete and compliant;
  - (c) the number of points listed in Appendix A and Appendix D to Exhibit 4 (Payment Mechanism) or the Performance Measurements Table (as applicable) for any particular Noncompliance Event is the maximum number of Noncompliance Points that may be assessed for each event or circumstance that is a Noncompliance Event. City may, in its sole discretion, assess less than the maximum;
  - (d) if a Noncompliance Event continues beyond its relevant Response Time or Rectification Time (as applicable), if any, each subsequent Response Time or Rectification Time (as applicable), shall be treated as a new and separate Noncompliance Event, without necessity for further Notice and Noncompliance Points will continue to accrue for every additional Response Time or Rectification Time (as applicable), shall be treated as a new and separate Noncompliance Event; and
  - (e) 100% of the Noncompliance Points assessed during the D&C Period may be carried forward and used by City to calculate, after the Substantial Completion Date, accumulated Noncompliance Points for determining the occurrence of a Persistent PPC Default and for the purposes specified in Sections **Error!** **Reference source not found.** (Persistent PPC Default and Increased Oversight), 15.8 (Cure Plan for Persistent PPC Default), and 16.1.1(r).

**15.4.3** Regardless of the continuing assessment of Noncompliance Points under this Section 15.4 (Assessment of Noncompliance Points), City may exercise its step-in rights under Section 16.2.5 (City Step-in Rights) and, if applicable, its Work suspension rights under Section 16.2.8 (Suspension of Work), after expiration of the applicable Rectification Time.

## **15.5 Performance Notice**

**15.5.1** In addition to other remedies available under this Agreement, City may provide Principal Project Company, a Notice, indicating unsatisfactory performance and establishing the matters that give rise to such Notice, if the Performance Notice Threshold is reached ("Performance Notice").

**15.5.2** If a Performance Notice is given by the City, then:

- (a) Principal Project Company shall, within 20 days of receiving the Performance Notice, submit to the City a cure plan for review and approval in accordance with Exhibit 11 (Submittals Review Process) ("Performance Cure Plan"). The Performance Cure Plan will include reasons for the unsatisfactory

performance and specific actions (including timeframes) to be taken by Principal Project Company to improve its performance.

- (b) The Parties shall consult to develop and agree the Performance Cure Plan within 10 days of Principal Project Company's submittal of such plan; and
- (c) Following agreement or determination of the Performance Cure Plan, Principal Project Company shall implement and comply with the Performance Cure Plan and any failure to do so shall result in a second Performance Notice.

## **15.6 Increased Oversight**

**15.6.1** In addition to other remedies available under this Agreement, City may provide Principal Project Company, a Notice for increased Oversight, if the Increased Oversight Threshold is reached.

**15.6.2** In addition to other remedies available under this Agreement, City may, by Notice to Principal Project Company direct Principal Project Company to increase its own oversight or change the type and/or increase the level of City's Oversight of the Project, in such manner and to such level considered fit, if the Increased Oversight Threshold is reached.

**15.6.3** If City changes the type or increases the level of its Oversight due to Principal Project Company reaching the Increased Oversight Threshold, then Principal Project Company shall pay and reimburse City, within 30 days after receipt of written demand and reasonable supporting documentation, all reasonable increased costs and fees City incurs in connection with such action, including City's Recoverable Costs.

**15.6.4** If City directs Principal Project Company to increase its own oversight or changes the type or increases the level of its Oversight, then:

- (a) Principal Project Company shall, within 30 days of Notice submit to the City a cure plan for review and approval in accordance with Exhibit 11 (Submittals Review Process) ("Increased Oversight Cure Plan"). The Increased Oversight Cure Plan shall include specific actions (including timeframes) to be taken by Principal Project Company to improve its performance; and
- (b) the Parties shall consult to develop and agree to the Increased Oversight Cure Plan within 20 days of Principal Project Company's submittal of the Increased Oversight Cure Plan.

**15.6.5** Principal Project Company's obligation to pay and reimburse City for increased Oversight costs shall apply to all changes in the type or increases in the level of City's Oversight occurring until Principal Project Company has:

- (a) implemented and complied with the Increased Oversight Cure Plan;
- (b) fully and completely cured the breaches and failures that gave rise to the Increased Oversight;
- (c) diligently pursued cure of all other Failure Events; and

- (d) during the D&C Period, has accumulated less than 40 Noncompliance Points in the subsequent 90 days following notice of Increased Oversight; or
- (e) during the IFM Period, has accumulated less than 375 Noncompliance Points in the subsequent 90 days following notice of Increased Oversight

## **15.7 Persistent PPC Default**

**15.7.1** In addition to other remedies available under this Agreement including Section 15.6, City may provide PPC with a Notice of Persistent PPC Default (“Persistent PPC Default Notice”).

## **15.8 Cure Plan for Persistent PPC Default**

**15.8.1** Upon the occurrence of a Persistent PPC Default:

- (a) Principal Project Company shall, within 30 days of the Persistent PPC Default, submit to City a cure plan for review and approval in accordance with Exhibit 11 (Submittals Review Process) (“Persistent PPC Default Cure Plan”). The Persistent PPC Default Cure Plan shall include specific actions (including timeframes) to be taken by Principal Project Company to improve performance
- (b) City may require, in its good faith discretion, that Principal Project Company’s actions under this Section 15.8.1 include improving Principal Project Company’s quality management practices, plans and procedures, revising and restating the Project Management Plan, changing organizational and management structure, increasing monitoring and inspections, changing Key Personnel and other important personnel, replacement of IFM Provider, replacement of Subcontractors;
- (c) The Parties shall consult to develop and agree to the Persistent PPC Default Cure Plan within 20 days of Principal Project Company’s submittal of the plan; and
- (d) Following agreement or determination of the Persistent PPC Default Cure Plan, Principal Project Company shall implement and comply with the cure plan and any failure to do so shall result in an additional PPC Default which shall not be subject to any additional Notice or cure period.

**15.8.2** If:

- (a) Principal Project Company complies in all material respects with the approved Persistent PPC Default Cure Plan

As of the date it achieves such requirements, there exist no other uncured PPC Defaults for which a Default Notice was given; and

- 
- (b) During the D&C Period, Principal Project Company has accumulated less than 100 points in the subsequent 90 days, following notice of Persistent PPC Default; or
  - (c) During the IFM period, Principal Project Company has accumulated less than 750 Noncompliance points in the subsequent 6-month period, following notice of Persistent PPC Default

Upon successfully curing the Persistent PPC Default, during the IFM Period only, City will reduce the number of cumulative Noncompliance Points that would otherwise then be counted toward Persistent PPC Default by 50%. Such reduction will be taken from the earliest assessed Noncompliance Points that would otherwise then be counted toward Persistent PPC Default.

## **15.9 Amendment of IFM Period Performance Measurements Table**

**15.9.1** The Performance Measurements Table contains a representational, but not exhaustive, list of IFM Failure Events possible during the IFM Period under the Contract Documents. Subject to Sections 15.9.2 and 15.9.3, City may:

- (a) replace IFM Failure Events in the Performance Measurements Table by removing an IFM Failure Event and adding in its place an alternate IFM Failure Event identified in accordance with Section 15.9.2(a); and
- (b) establish the category applicable to, and set a reasonable “Performance Measurement,” “Response Time” and “Rectification Time”, each alternate Failure Event.

**15.9.2** City’s right to revise the Performance Measurements Table is subject to the following restrictions:

- (a) any existing contractual obligation of Principal Project Company may become an alternate IFM Failure Event if:
  - (i) Principal Project Company has failed to comply with that contractual obligation at least twice;
  - (ii) City provided Notice to Principal Project Company within 15 days of Principal Project Company’s second failure to comply and such Notice identifies the contractual obligation and the instances of Principal Project Company’s failure to comply, and indicates that City will add that contractual obligation to the Performance Measurements Table if Principal Project Company at any time again fails to comply with the specified contractual obligation; and
  - (iii) Principal Project Company fails a third time to comply with the contractual obligation specified in the Notice;
- (b) the total number of Noncompliance Points in the Performance Measurements Table as existing on the Financial Close Date shall not increase by more than

10% for the Term. City may elect to remove contractual obligations and reduce Noncompliance Points allocated to listed contractual obligations in order to comply with the 10% growth limit; and

- (c) the number of Noncompliance Points associated with any alternate IFM Failure Event added to the Performance Measurements Table shall not exceed 20 Noncompliance Points.

**15.9.3** Changes to the Performance Measurements Table made in accordance with this Section 15.9 (Amendment of IFM Period Performance Measurements Table) will be applied prospectively, starting three days after delivery to Principal Project Company of the revised table or such later date stated in the Notice delivering any revised table.

---

**ARTICLE 16. DEFAULT; REMEDIES**

**16.1 Default by Principal Project Company; Cure Periods**

**16.1.1 PPC Default**

Principal Project Company shall be in breach under this Agreement upon the occurrence of any one or more of the following events or conditions (each a “**PPC Default**”):

- (a) Principal Project Company fails to satisfy the conditions set forth in Section 7.4.3 (Commencement of Non-Construction Work) within 30 days after City’s issuance of NTP 1, to begin the D&C Work within 10 days following City’s issuance of NTP 2, or to diligently prosecute the Work to completion in accordance with the Contract Documents;
- (b) Principal Project Company abandons all or a material part of the Project, which abandonment is deemed to occur if (i) Principal Project Company demonstrates through statements, acts or omissions an intent not to continue, for any reason other than a Delay Event or Relief Event that materially impairs Principal Project Company’s ability to continue, to design, construct, operate or maintain all or a material part of the Project, or (ii) no significant Work (taking into account the Project Schedule, if applicable, and any Delay Event or Relief Event) on the Project is performed for a continuous period of more than 30 days unless due to Principal Project Company’s compliance with a City suspension order issued under this Agreement;
- (c) Principal Project Company fails to achieve Substantial Completion by the Long Stop Date;
- (d) Principal Project Company (i) fails to make any payment owing to City under the Contract Documents when due, or (ii) fails to deposit other funds into any custodial account, trust account or other reserve or account (including the Handback Requirements Reserve Account) in the amount and within the time period required by the Contract Documents;
- (e) Principal Project Company fails to begin the IFM Services within 30 days following the Substantial Completion Date;
- (f) (i) any representation or warranty in the Contract Documents made by Principal Project Company is false in any material respect, materially misleading or inaccurate in any material respect when made or omits material information when made, or (ii) any certificate, schedule, report, instrument or other document delivered by or on behalf of Principal Project Company, any Equity Member, Controlling Affiliate of Principal Project Company, Prime Contractor or Supplier to City as part of the Implementation Proposal or under the Contract Documents is false in any material respect, materially misleading or inaccurate in any material respect when made or omits material information when made;

- (g) Principal Project Company fails to obtain, provide and maintain any insurance, bonds, guarantees, letters of credit or other payment or performance security as required under the Contract Documents for the benefit of relevant parties, or Principal Project Company fails to comply with any requirement of the Contract Documents pertaining to the amount, terms or coverage of the insurance or security or fails to pay the associated premiums, deductibles, retain self-insured retentions, co-insurance or any other such amounts as and when due;
- (h) Principal Project Company ceases performing a substantial portion of its business, or a substantial portion of such business is suspended or is not being performed, whether voluntarily or involuntarily, that has or will have a material adverse effect on Principal Project Company's ability to perform its obligations under this Agreement;
- (i) (i) Principal Project Company makes, attempts to make or suffers a voluntary or involuntary assignment or transfer of all or any portion of the Contract Documents, the Project or PPC's Interest in violation of the limitations on assignment or transfer under this Agreement, (ii) there occurs an Equity Transfer or a Change of Control not permitted under this Agreement, or (iii) any other violation of the limitations on assignment or transfer under this Agreement occurs;
- (j) Principal Project Company fails to timely observe or perform, or cause to be observed or performed any material covenant, agreement, obligation, term or condition required to be observed or performed by Principal Project Company under the Contract Documents, including failure to pay for or perform the Design Work, Construction Work, IFM Services or any portion thereof (except to the extent payment is subject to a good faith payment dispute with a subcontractor) in accordance with the Contract Documents in any material respect, provided that any failure that constitutes a Noncompliance Event or Failure Event is not considered a default under this clause (j) although such failure may become a PPC Default in accordance with clause (r) or (s) below;
- (k) Principal Project Company, any Equity Member, any Controlling Affiliate of Principal Project Company, any Prime Contractor, any Supplier, or any of their respective partners, members, officers, directors, responsible managing officers, or responsible managing employees, has been convicted in a court of competent jurisdiction of any charge of fraud, bribery, collusion, conspiracy, or any other act in violation of any state or federal antitrust law in connection with the bidding upon, award of, or performance of, any public works contract, as defined in California Public Contract Code section 1101, with any public entity, as defined in California Public Contract Code section 1100, provided that, if the conviction relates to an Equity Member, a Controlling Affiliate of Principal Project Company, a Prime Contractor, a Supplier, or any of their or Principal Project Company's respective partners, members, officers, directors, responsible managing officers, or responsible managing employees, (i) such Person is involved in the Project at the time of such conviction and (ii) Principal Project Company fails to remove such Person from the Project;

- 
- (l) Principal Project Company fails to comply with City's order to suspend Work issued in accordance with Sections 9.8.6, 10.1.2.4(c), 16.2.4.5(b) or 16.2.8 (Suspension of Work) within the time reasonably allowed in such order;
  - (m) A Bankruptcy Event arises with respect to:
    - (i) Principal Project Company except to the extent such Bankruptcy Event is caused by a failure by City to pay Principal Project Company as required under this Agreement, and/or
    - (ii) Any D&C Contractor or IFM Provider, unless Principal Project Company:
      - (A) enters into a replacement D&C Contract, guarantee or IFM Contract (as relevant) with a reputable counterparty acceptable to City, in its good faith discretion, within 60 days of the relevant Bankruptcy Event; provided, however, that, if Principal Project Company has commenced and is diligently pursuing meaningful steps to secure a replacement D&C Contract, guarantee or IFM Contract (as relevant) immediately after the Bankruptcy Event, Principal Project Company shall have such additional period of time, up to a maximum period of 120 days after the Bankruptcy Event;
      - (B) in the absence of entering into a replacement D&C Contract, Principal Project Company otherwise demonstrates to the satisfaction of City, in its good faith discretion, that Principal Project Company possesses the technical and financial capacity to perform all remaining D&C Work in accordance with this Agreement; or
      - (C) in the absence of entering into a replacement IFM Contract, Principal Project Company otherwise demonstrates to the satisfaction of City, in its good faith discretion, that Principal Project Company possesses the technical and financial capacity to perform all remaining IFM Services in accordance with this Agreement;
  - (n) Principal Project Company draws against any custodial account, trust account, allowance or other reserve or account in violation of the Contract Documents or makes a false or materially misleading representation in connection with a draw against any such account, allowance or reserve;
  - (o) Principal Project Company fails to comply with applicable Regulatory Approvals or Laws, including the Laws described in Exhibit 16 (Federal, State and City Requirements) in any material respect;
  - (p) any use of the Project by any PPC-Related Entity that violates requirements of applicable Regulatory Approvals or Laws or otherwise is not permitted under the Contract Documents;

- (q) any D&C Contract or IFM Contract is terminated (other than non-default termination on its scheduled termination date) and Principal Project Company has not either:
  - (i) entered into a replacement D&C Contract or IFM Contract (as relevant) with a reputable counterparty acceptable to City, in its good faith discretion, within 60 days of the termination of the relevant D&C Contract or IFM Contract (as relevant); provided, however, that, if Principal Project Company has commenced and is diligently pursuing meaningful steps to secure a replacement D&C Contract or IFM Contract (as relevant) immediately after the termination, Principal Project Company shall have such additional period of time, up to a maximum period of 120 days after the termination; or
  - (ii) in the absence of entering into a replacement IFM Contract, Principal Project Company otherwise demonstrates to the satisfaction of City, in its good faith discretion, that Principal Project Company possesses the technical and financial capacity to perform all remaining IFM Services in accordance with this Agreement;
- (r) a Persistent PPC Default occurs, City delivers to Principal Project Company a Default Notice, and either (i) Principal Project Company fails to deliver to City, within 30 days after such Notice is delivered, a cure plan meeting the requirements for approval in Section 15.8 (Cure Plan for Persistent PPC Default) or (ii) Principal Project Company fails to fully comply with the schedule or specific elements of, or actions required under, the approved cure plan;
- (s) after any rights of appeal have been exhausted, Principal Project Company, any PPC-Related Entity or any Subcontractor (i) is determined to be disqualified, suspended or debarred, or otherwise excluded from bidding, proposing or contracting with a federal, State, or City department or agency, or (ii) has not dismissed any Subcontractor whose work is not substantially complete and who is determined to be disqualified, suspended or debarred, or otherwise excluded from bidding, or proposing or contracting with a federal, State, or City department or agency; or
- (t) In the event that LEED BD+C Gold Rating, including the mandatory 12x EAc2 Optimize Energy Performance credits, is not obtained within 24 months after the Final Acceptance Date, other than as a sole and direct result of any affirmative act or omission of City or unless unreasonably withheld by USGBC or an equivalent body.

## **16.1.2 Default Notice and Cure Periods**

### **16.1.2.1** Principal Project Company shall promptly:

- (a) provide Notice to City upon the occurrence of a PPC Default; and

- 
- (b) take steps to commence the cure of and mitigate the effects of any PPC Default.

**16.1.2.2** If Principal Project Company notifies City of a PPC Default in accordance with Section 16.1.2.1 or City considers a PPC Default has occurred, City may give PPC a Notice (“**Default Notice**”) which contains:

- (a) details of the PPC Default;
- (b) the cure period (if any) by which Principal Project Company shall cure the PPC Default in accordance with Section 16.1.2.3; and
- (c) if the PPC Default is not capable of being cured or no cure period is applicable, a date by which Principal Project Company shall comply with any requirements of City in connection with that PPC Default.

**16.1.2.3** The following list identifies Principal Project Company’s rights to receive Notice and opportunity to cure before City may exercise its right to terminate this Agreement or enforce its Performance Bond in accordance with Section 16.2.7 (Performance Bond), and identifies other PPC Defaults that are not subject to cure:

- (a) respecting any PPC Default under Sections 16.1.1(h) or 16.1.1(m), a period of 15 days after delivery by City to Principal Project Company of a Default Notice;
- (b) respecting a PPC Default under Sections 16.1.1(a), 16.1.1(b), 16.1.1(d), 16.1.1(i), 16.1.1(n), 16.1.1(o), or 16.1.1(p), a cure period of 30 days after City delivers to Principal Project Company a Default Notice; provided that City may effect cure, at Principal Project Company’s expense, if a PPC Default under Section 16.1.1(g) continues beyond five days after such Notice is delivered;
- (c) respecting a PPC Default under Sections 16.1.1(f), 16.1.1(j) or 16.1.1(k), a cure period of 30 days after City delivers to Principal Project Company a Default Notice; provided that:
  - (i) if the nature of such PPC Default is such that the cure cannot with diligence be completed within such time period and Principal Project Company has commenced and is diligently pursuing meaningful steps to cure immediately after receiving the Default Notice, Principal Project Company shall have such additional period of time, up to a maximum cure period of 60 days after City delivers the Default Notice, as is reasonably necessary to diligently effect cure; and
  - (ii) as to Section 16.1.1(f), cure will be regarded as complete when the adverse effects of the breach are cured;
- (d) respecting a PPC Default under Sections 16.1.1(c), 16.1.1(e), 16.1.1(l), 16.1.1(q), 16.1.1(r), or 16.1.1(s), no cure period is allowed; and

- (e) respecting a PPC Default under Section 16.1.1(t), a cure period of 30 days after City delivers to Principal Project Company a Default Notice, provided that if the nature of such PPC Default is such that the cure cannot with diligence be completed within such time period and Principal Project Company has commenced and is diligently pursuing meaningful steps to cure immediately after receiving the Default Notice, Principal Project Company shall have such additional period of time, up to a maximum cure period of 365 days after City delivers the Default Notice, as is reasonably necessary to diligently effect cure.

### **16.1.3 Warning Notices**

**16.1.3.1** Without prejudice to any other right or remedy available to City, City may deliver a Notice (a “**Warning Notice**”) to Principal Project Company, with a copy to the Collateral Agent, stating explicitly that it is a “Warning Notice” of a material PPC Default and stating in reasonable detail the matter or matters giving rise to the Warning Notice and, if applicable, amounts due from Principal Project Company, whenever there occurs a PPC Default.

**16.1.3.2** If City issues a Warning Notice for any PPC Default after it issues a Default Notice, then the remaining cure period available to Principal Project Company, if any, for such PPC Default before City may terminate this Agreement on account of such PPC Default will be extended by the time period between the date the Default Notice was issued and the date the Warning Notice is issued. However, this shall not affect the time when City may exercise any remedy other than termination respecting such PPC Default.

### **16.1.4 Principal Project Company to Comply with Default Notice and Provide Cure Plan**

**16.1.4.1** If City gives a Default Notice to Principal Project Company, then:

- (a) Principal Project Company shall comply with the Default Notice;
- (b) Except for a PPC Default under Sections 16.1.1(b), 16.1.1(e), 16.1.1(i), 16.1.1(m), 16.1.1(q), and 16.1.1(r), and PPC Defaults for which no cure period is applicable, Principal Project Company shall, as soon as possible, give City a plan for review and approval in accordance with Exhibit 11 (Submittal Review Process) to cure the PPC Default and comply with any requirements of City in accordance with the terms of City’s Default Notice (which plan shall also specify steps to address the underlying cause of the PPC Default and to avoid similar PPC Defaults occurring in the future);
- (c) The Parties shall consult to develop and agree to the cure plan; and
- (d) Following agreement or determination of the cure plan, Principal Project Company shall implement and comply with the cure plan. Any failure to implement the cure plan or comply with the agreed cure plan will result in a PPC Default which is not subject to any cure period.

**16.1.4.2** In the case of a Persistent PPC Default, Principal Project Company shall comply with Section 15.8 (Cure Plan for Persistent PPC Default).

---

## 16.2 City Remedies for PPC Default

**16.2.1** Subject to the rights of Lenders under any Direct Agreement, upon occurrence of a PPC Default that has not been cured within the applicable cure period, if any, City may:

- (a) Terminate this Agreement as provided in Section 17.3 (Termination for PPC Default);
- (b) Exercise its step-in rights in Section 16.2.5 (City Step-In Rights);
- (c) Recover any Losses on account of the occurrence of a PPC Default, regardless of when the Default Notice is given, whether the Losses accrue after the occurrence of the PPC Default or whether the PPC Default is subsequently cured;
- (d) Where such PPC Default is not cured within the applicable cure period, if any, specified in Section 16.1.2.3 make demand upon and enforce any performance security, and make demand upon, draw on and enforce and collect any letter of credit, guaranty or other payment or performance security (including the Handback Requirements Reserve Account and City's rights to withhold payment) available to City under this Agreement with respect to the PPC Default in any order, in City's sole discretion, without Notice to Principal Project Company. City will apply the proceeds of any such action to the satisfaction of Principal Project Company's obligations under this Agreement, including payment of amounts due City;
- (e) Suspend the Work in whole or part in accordance with Section 16.2.8 (Suspension of Work); or
- (f) Exercise any other remedies available under this Agreement or at law or in equity.

**16.2.2** Each right and remedy of City upon the occurrence of a PPC Default is cumulative as set out in Section 16.2.10 (Cumulative, Non-Exclusive Remedies).

### 16.2.3 Immediate City Entry and Cure of Wrongful Use

Without Notice and without awaiting lapse of the period to cure, in the event of any PPC Default under Section 16.1.1(p), City may enter and take control of the relevant portion of the Project to restore the permitted uses and reopen and continue operations for the benefit of the public, until such breach is cured or City terminates this Agreement; provided, however, that the foregoing shall be subject to the rights of Lenders under any Direct Agreement except in the event of an Emergency, an imminent safety risk, an unauthorized use of the Project by Principal Project Company or a PPC Default that materially precludes the use of the Project by City in the manner contemplated under this Agreement. Principal Project Company shall pay to City on demand City's Recoverable Costs in connection with such action, which payment will be reimbursed by City if a determination is ultimately made that no PPC Default occurred, promptly following such a determination. So long as City undertakes such action in good faith, even if under a mistaken belief in the occurrence of such a PPC Default, such action shall not be deemed unlawful or a breach of this Agreement, shall not expose City to any liability to Principal

Project Company, other than the reimbursement obligation described above, and shall not entitle Principal Project Company to any other remedy except if City's action constitutes gross negligence, recklessness or willful misconduct. Principal Project Company acknowledges that City has a high priority, paramount public interest in maintaining the authorized uses of the Project and continuous access to the Project. City's good faith determination that such action is needed shall be deemed conclusive in the absence of clear and convincing evidence to the contrary. City will promptly relinquish control and possession of the relevant portion of the Project to Principal Project Company once City determines that such PPC Default has been cured.

#### **16.2.4 Remedies for Failure to Meet Safety Standards or Perform Safety Compliance**

**16.2.4.1** If at any time Principal Project Company or its Surety fails to meet any Safety Standard or timely perform Safety Compliance or if City and Principal Project Company cannot reach an agreement regarding the interpretation or application of a Safety Standard or the valid issuance of a Safety Compliance Order within a period of time acceptable to City, City may undertake or direct Principal Project Company to undertake any work required to ensure implementation of and compliance with Safety Standards as interpreted or applied by City or with the Safety Compliance Order. If at any time a condition or deficiency of the Project violates any Law respecting health, safety or right of use and access, including the Americans with Disabilities Act of 1990, 42 U.S.C. Sections 12101 et seq., and regulations of the United States Occupational Safety and Health Administration (OSHA), City may take any immediate corrective actions required.

**16.2.4.2** Subject to Section 16.2.4.3, to the extent that any work done under Section 16.2.4.1 is undertaken by City and is reasonably necessary to comply with Safety Standards, perform valid previously issued Safety Compliance Orders or correct a violation of Law or a Regulatory Approval respecting health, safety or right of use and access, Principal Project Company shall pay to City on demand the costs of such work including City's Recoverable Costs in connection with such work. In such event, City (whether it undertakes the work or has directed Principal Project Company to undertake the work) shall have no obligation or liability to compensate Principal Project Company for any Losses Principal Project Company suffers or incurs arising from, resulting to or resulting from such work.

**16.2.4.3** To the extent that City requires Principal Project Company to perform Work under Section 16.2.4.1 that is not reasonably necessary to comply with Safety Standards, perform valid previously issued Safety Compliance Orders or correct a violation of Law or Regulatory Approval respecting health, safety or right of use and access, such requirement shall be considered a City Change, and Principal Project Company's obligation to pay City's Recoverable Costs shall not include City's costs relating to the City Change.

**16.2.4.4** Notwithstanding anything to the contrary contained in this Agreement and without limiting City's other rights and remedies under this Agreement, City shall have the rights and remedies specified in Section 16.2.4.5 if, in the good faith judgment of City:

- (a) Principal Project Company has failed to meet any Safety Standards or perform Safety Compliance and the failure results in an Emergency or danger to persons or property; or

- (b) Principal Project Company is not then diligently taking all necessary steps to rectify or deal with such Emergency or danger.

**16.2.4.5** Upon the occurrence of any event described in Section 16.2.4.4, City may without Notice and without awaiting lapse of the period to cure any breach:

- (a) immediately take such action as may be reasonably necessary to rectify the Emergency or danger, in which event Principal Project Company shall pay to City on demand the cost of such action, including City's Recoverable Costs, which payment will be reimbursed by City if a determination is ultimately made that Principal Project Company did not fail to meet applicable Safety Standards or to perform Safety Compliance; or
- (b) suspend Work and/or close or cause to be closed any and all portions of Project affected by the Emergency or danger.

**16.2.4.6** So long as City undertakes any action under Section 16.2.4.5 in good faith, even if under a mistaken belief in the occurrence of such failure or existence of an Emergency or danger, such action shall not be deemed unlawful or a breach of this Agreement, shall not expose City to any liability to Principal Project Company, other than the reimbursement obligation described in Section 16.2.4.5, and shall not entitle Principal Project Company to any other remedy, except if City's action was undertaken in bad faith or constitutes gross negligence, recklessness or willful misconduct.

**16.2.4.7** Principal Project Company acknowledges that City has a high priority, paramount public interest in protecting public and worker safety at the Project and adjacent areas. City's good faith determination of the existence of such a failure, Emergency or danger shall be deemed conclusive in the absence of clear and convincing evidence to the contrary. Immediately following rectification of such Emergency or danger, as determined by City, City will allow the Work to continue or such portions of the Project to reopen, as applicable.

## **16.2.5 City Step-in Rights**

**16.2.5.1** If Principal Project Company has not fully and completely cured a PPC Default by the expiration of the applicable cure period, if any, City may, subject to the terms of any Direct Agreement and in accordance with the terms and conditions of this Section 16.2.5 (City Step-in Rights), pay and perform all or any portion of Principal Project Company's obligations under the Contract Documents that are the subject of such PPC Default.

**16.2.5.2** Upon exercising its rights pursuant to Section 16.2.5.1, City may, to the extent necessary to cure a PPC Default:

- (a) perform or attempt to perform, or cause to be performed, such Work;
- (b) employ security guards and other safeguards to protect the Project;
- (c) spend such sums as City deems reasonably necessary to employ and pay such architects, engineers, consultants and contractors and obtain materials and equipment as may be required to perform such Work, without obligation or liability to Principal Project Company or any Contractors for loss of

opportunity to perform the same Work or supply the same materials and equipment;

- (d) in accordance with Section 16.2.7 (Performance Bond), draw on and use proceeds from the Performance Bond and any other available security or source of funds available to Principal Project Company for the purposes set forth in this Section 16.2.5.2 including amounts held in an operating account, to the extent such instruments provide recourse to pay such sums, provided City's right to access amounts held in an operating account shall not include a security interest in such funds nor shall the exercise of such right by City interfere with the right of the Lenders, if any, under the Security Documents and the Direct Agreement to access such funds;
- (e) execute all applications, certificates and other documents as may be required;
- (f) make decisions respecting, assume control over and continue Work as may be reasonably required;
- (g) modify or terminate any contractual arrangements in Principal Project Company's Contracts in City's sole discretion, without liability for termination fees, costs or other charges in accordance with the terms of those Contracts, including the requirements for each Contract listed in Section 9.3.2 (Key Contract Provisions);
- (h) meet with, coordinate with, direct and instruct Contractors and Suppliers, process invoices and applications for payment from Contractors and Suppliers, pay Contractors and Suppliers, and resolve claims of Contractors and Suppliers;
- (i) take any and all other actions it may consider necessary to effect cure and perform the Work; and
- (j) prosecute and defend any action or proceeding incident to the Work.

**16.2.5.3** Principal Project Company shall reimburse City on demand for its Recoverable Costs incurred in connection with the performance of any act or work authorized by this Section 16.2.5 (City Step-in Rights).

**16.2.5.4** In addition to its continuing ownership of the Project Site and rights to have access to the Project Site throughout the Term, including the rights described in Section 6.7 (Coordination, Cooperation and Access), City and its Authorized Representatives, contractors, subcontractors, vendors and employees shall have the right to enter onto all Temporary Areas, exercisable at any time or times without Notice, for the purpose of carrying out City's step-in rights under Section 16.2.3 (Immediate City Entry and Cure of Wrongful Use) and this Section 16.2.5 (City Step-in Rights). Principal Project Company grants City a perpetual, non-rescindable right of entry onto the Temporary Areas for such purpose.

**16.2.5.5** If City exercises any right to pay or perform under this Section 16.2.5 (City Step-in Rights), it nevertheless shall have no liability to Principal Project Company for the sufficiency, adequacy or quality of any such payment or performance, or for any effect of such payment or

performance on the Work or the Project, unless caused by the gross negligence, recklessness or willful misconduct of City. City and its Authorized Representatives, contractors, subcontractors, vendors and employees shall have no liability to Principal Project Company for any inconvenience or disturbance arising out of any entry onto the Project Site or Temporary Areas as contemplated by Section 16.2.3 (Immediate City Entry and Cure of Wrongful Use) or this Section 16.2.5 (City Step-in Rights), provided that the foregoing shall not absolve any Person of liability as a matter of law for its gross negligence, recklessness or willful misconduct.

**16.2.5.6** City's rights under this Section 16.2.5 (City Step-in Rights) (but not City's rights under Section 16.2.3 (Immediate City Entry and Cure of Wrongful Use) regarding City's immediate right of entry and right to cure wrongful use of the Project) are subject to the right of any Surety to assume performance and completion of all bonded work under a Performance Bond.

**16.2.5.7** If City takes action described in this Section 16.2.5 (City Step-in Rights) and it is later finally determined that City lacked the right to do so because there did not occur a PPC Default or because Principal Project Company had previously fully cured the default in accordance with this Agreement, then City's action shall be treated as a City Change.

#### **16.2.6 Damages; Offset**

**16.2.6.1** Except as limited by City's agreement to liquidate certain damages as specified in this Agreement, and subject to the limitations in Section 16.6 (Limitation on Consequential Damages), City shall be entitled to recover any and all damages available at law on account of the occurrence of a PPC Default. Principal Project Company shall owe any such damages that accrue after the occurrence of PPC Default regardless of when Default Notice is given or whether PPC Default is subsequently cured.

**16.2.6.2** In the case of a termination for PPC Default, City may deduct and offset any damages owing to it under the Contract Documents from and against any amounts City may owe to Principal Project Company. If the amount of damages owing to City is not liquidated or known with certainty at the time a payment is due from City to Principal Project Company with respect to such termination for a PPC Default, City may deduct and offset the amount it reasonably estimates will be due, subject to City's obligation to adjust such deduction or offset when the amount of damages owing to City is liquidated or becomes known with certainty.

**16.2.6.3** Damages owed to City under this Section 16.2.6 (Damages; Offset) shall bear interest at the Late Payment Rate from and after the date any amount becomes due to City until the date paid.

**16.2.6.4** Without limiting Section 16.2.6.2:

- (a) the amount of any damages attributable to Principal Project Company may be deducted or offset from periodic payments owing by City under Section 11.1 (Milestone Payment) (including damages attributable to any PPC Default that concerns the D&C Work and is the subject of a Notice delivered to Principal Project Company before the date such payments are owing), subject to Section 2.4 of Exhibit 4A (Milestone Payment Mechanism); and
- (b) the amount of any damages attributable to Principal Project Company may be deducted or offset from the Availability Payments (including damages

attributable to any PPC Default), provided that in certain cases damages are liquidated by the Deductions under Exhibit 4B (Availability Payment Mechanism).

**16.2.6.5** If the amount of damages owing to City from Principal Project Company is not liquidated or known with certainty at the time the payment is due, City may deduct and offset up to 105% of the amount it reasonably estimates will be due, in which case, the Parties shall adjust such deduction or offset when the amount of damages owing to City becomes known with certainty, with interest at the Late Payment Rate payable by City on excess amounts withheld and interest at the same rate payable by Principal Project Company on any shortfall.

**16.2.6.6** City's right of offset includes all amounts paid by City to satisfy, discharge and defend against any claim of lien, stop Notice, equitable lien or any other demand for payment or security made or filed with City, City's property or the Project by any Person claiming that any PPC-Related Entity has failed to perform its contractual obligations or to make payment for any obligation incurred for or in connection with the Work, provided that no such offset shall be made if Principal Project Company has filed surety bonds fully releasing City and City's property from such claim or lien under applicable Law.

## **16.2.7 Performance Bond**

**16.2.7.1** Subject to Sections 10.5.2 and 16.2.6.2, upon the occurrence of a PPC Default and expiration, without full and complete cure, of the applicable cure period, if any, under Section 16.1.2 (Default Notice and Cure Periods), without waiving or releasing Principal Project Company from any obligations or limiting other remedies that may be available to City, City may make demand upon and enforce any Performance Bond, and make demand upon, draw on and enforce and collect any letter of credit, guaranty or other payment or performance security available to City under this Agreement with respect to such PPC Default in any order. City will apply the proceeds of any such action to the satisfaction of Principal Project Company's obligations under this Agreement, including payment of amounts due to City.

**16.2.7.2** If City is an additional obligee under a Performance Bond, or is a transferee beneficiary under any letter of credit or guaranty, then City will forbear from exercising remedies as additional obligee or transferee beneficiary so long as Principal Project Company or the Collateral Agent commences the good faith, diligent exercise of remedies within 10 days after City delivers Notice to Principal Project Company and the Collateral Agent of City's intent to make a claim under such security, letter of credit or guaranty and subsequently continues such good faith, diligent exercise of remedies until the default is cured.

**16.2.7.3** Section 16.2.7.2 shall not apply where access to a bond, letter of credit, guaranty or other payment or performance security is for the purpose of satisfying damages owing to City, in which case City shall be entitled to make demand, draw, enforce and collect regardless of whether PPC Default is subsequently cured.

**16.2.7.4** City will provide Notice to Principal Project Company at the same time or promptly after City takes any action to make demand upon, draw on, enforce or collect any Performance Bond.

## 16.2.8 Suspension of Work

**16.2.8.1** Subject to the rights of the Lenders as provided in the Direct Agreement, in addition to any other right to suspend the Work under the Contract Documents, City may suspend all or part of the Work by Notice to Principal Project Company if Principal Project Company fails to cure and correct, within the applicable cure period available to Principal Project Company (if any), the following:

- (a) failure to perform the Work in compliance with the Contract Documents, where such failure is not substantially cured within 15 days after City delivers Notice thereof to Principal Project Company;
- (b) failure to comply with any Law or Regulatory Approval (including failure to implement protective measures for Threatened or Endangered Species, failure to handle, preserve and protect paleontological and cultural (including archaeological and historic) resources, or failure to handle Hazardous Materials, in accordance with applicable Laws and Regulatory Approvals);
- (c) performance of Design Work before achieving all conditions in Section 7.4.3 (Commencement of Non-Construction Work), or performance of Construction Work before all conditions precedent to commencement of Construction Work have been met;
- (d) discovery of Nonconforming Work not corrected within 15 days after City delivers Notice of such Nonconforming Work to Principal Project Company or, if correction will require more than 15 days, failure of Principal Project Company to deliver to City, within 15 days of said Notice, a plan acceptable to City for correction of the Nonconforming Work or to diligently execute and complete such plan;
- (e) failure to pay in full when due sums owing to any Contractor or Supplier for services, materials or equipment, except only for retainage provided in the relevant Contract and amounts in dispute, which amounts in dispute may include amounts withheld on account of damage caused by such Contractor or Supplier or arising out of such Contractor or Supplier's failure to comply with the relevant Contract;
- (f) failure to provide proof of required insurance coverage under Section 10.1.2.4 (Verification of Coverage);
- (g) failure to deliver or maintain Payment Bonds or Performance Bonds;
- (h) the existence of conditions unsafe for workers, other Project personnel or the general public, including failures to comply with Safety Standards or perform Safety Compliance in accordance with Section 16.2.4 (Remedies for Failure to Meet Safety Standards or Perform Safety Compliance) (and in any such case the order of suspension may be issued without awaiting any cure period);

- (i) failure to carry out and comply with Unilateral Change Orders, where such failure is not substantially cured within 15 days after City delivers Notice thereof to Principal Project Company; and
- (j) for the reasons specified in Sections 9.8.6, 10.1.2.4(c) and 16.2.4.4.

**16.2.8.2** In addition to the protections from liability under Section 16.2.4.6, City shall have no liability to Principal Project Company, and Principal Project Company shall have no right to make any Claim against City, due to any suspension under Section 16.2.8.1

**16.2.8.3** City shall have the right and authority to order suspension of Work, in whole or in part, for reasons other than those in Section 16.2.8.1. If City purports to order suspension of Work under Section 16.2.8.1 but it is finally determined under the Contract Dispute Procedures that no grounds under Section 16.2.8.1 exist for such suspension, then it shall be deemed a suspension under this Section 16.2.8.3

**16.2.8.4** Principal Project Company shall promptly comply with any such suspension order, even if Principal Project Company disputes the grounds for suspension. Principal Project Company shall promptly recommence the Work upon receipt of Notice from City directing Principal Project Company to resume work. City will lift the suspension order promptly after Principal Project Company fully cures and corrects the applicable breach or failure to perform or any other reason for the suspension order ceases to apply.

**16.2.8.5** Without limiting Principal Project Company's rights with respect to a Compensable Delay Event under clause (g) of the definition thereof or a Compensable Relief Event under clause (p) of the definition thereof, in case of suspension of work for any cause, Principal Project Company shall be responsible for the Project and shall take such precautions as may be necessary to prevent loss or damage to the materials, equipment and Work, provide for normal drainage and shall erect any necessary temporary structures, signs, or other facilities at Principal Project Company's expense.

#### **16.2.9 Other Rights and Remedies**

City shall also be entitled to exercise any other rights and remedies available under this Agreement, or available at law.

#### **16.2.10 Cumulative, Non-Exclusive Remedies**

Subject to the exception specified in Section 16.1.1(j) regarding failures that constitute a Noncompliance Event or Failure Event not being considered defaults under Section 16.1.1(i), each right of City under this Agreement shall be cumulative and shall be in addition to every other right provided under this Agreement or at law, and the exercise or beginning of the exercise by City of any one or more of any of such rights or remedies shall not preclude the simultaneous or later exercise by City of any or all other such rights or remedies.

## **16.3 Default by City; Cure Periods**

### **16.3.1 City Default**

City shall be in breach under this Agreement upon the occurrence of any one or more of the following events or circumstances (each a “**City Default**”):

- (a) City fails to make any payment due to Principal Project Company under this Agreement when due, provided that such payment is not subject to a Contract Dispute;
- (b) City ceases to be legally authorized to make any undisputed payment to the Principal Project Company under this Agreement; provided, however, that a failure to appropriate or an injunction or other legal or administrative constraint on making such payment shall not be considered a City Default; or
- (c) any representation or warranty made by City to Principal Project Company in the Agreement is false in any material respect, materially misleading or inaccurate in any material respect when made or omits material information when made.

### **16.3.2 Cure Periods**

City shall have the following cure periods to cure City Defaults:

**16.3.2.1** Respecting a City Default under Section 16.3.1(a), a period of 45 days after Principal Project Company delivers to City Notice of such City Default; and

**16.3.2.2** Respecting a City Default under Section 16.3.1(c), a period of 90 days after Principal Project Company delivers to City Notice of such City Default; provided that:

- (a) if the City Default is of such a nature that the cure cannot with diligence be completed within such time period and City has commenced meaningful steps to cure promptly after receiving the default Notice, City shall have such additional period of time, up to a maximum cure period of 180 days, as is reasonably necessary to diligently effect cure; and
- (b) cure will be regarded as complete when the adverse effects of the breach are cured.

## **16.4 Principal Project Company Remedies for City Breach**

### **16.4.1 Termination**

Refer to Section 17.4 (Principal Project Company Rights to Terminate) for provisions regarding Principal Project Company’s right to terminate for City Default.

### **16.4.2 Interest on Late Payment**

If City fails to make payments of undisputed Availability Payments or the Milestone Payment that are due and owing to Principal Project Company under this Agreement, then Principal Project Company shall be entitled to interest at the Late Payment Rate commencing 90 days after the due date thereof in accordance with Section 11.7 (Interest on Late Payments and Overpayments).

#### **16.4.3 Limitations on Remedies**

**16.4.3.1** Principal Project Company shall have no right to seek, and irrevocably waives and relinquishes any right to, non-monetary relief against City, except for (a) any sustainable action for relief available in mandamus, (b) any sustainable action to stop, restrain or enjoin use, reproduction, duplication, modification, adaptation or disclosure of PPC Intellectual Property in violation of the licenses granted, or to specifically enforce City's duty of confidentiality, under Section 21.4 (Intellectual Property), (c) declaratory relief under the Contract Dispute Procedures declaring the rights and obligations of the Parties under the Contract Documents, or (d) declaratory relief under the Contract Dispute Procedures declaring specific terms that shall bind the Parties.

**16.4.3.2** If City wrongfully withholds an approval or consent required under this Agreement, or wrongfully issues an objection to or disapproval of a Submittal or other matter under this Agreement, Principal Project Company's sole remedies against City shall be compensation and extensions of time, each to the extent provided in Articles 13 (General Provisions Applying to Delay Events and Relief Events) and 14 (Compensation and Other Relief for Delay Events and Relief Events). Principal Project Company shall have no right to suspend Work.

#### **16.4.4 Remedies at Law and in Equity**

Subject to Section 16.4.3 (Limitations on Remedies) and except as specifically provided otherwise in this Agreement, upon breach of this Agreement by City, Principal Project Company may exercise any remedies available at law or in equity.

#### **16.4.5 Principal Project Company Right to Suspend**

Principal Project Company may suspend Work based on City's failure, after required Notice and the expiration of the applicable cure period, to pay undisputed amounts owing to Principal Project Company with a cumulative value of \$1,000,000 or more, subject to the following:

- (a) Principal Project Company shall provide City with Notice regarding its intent to suspend at least 30 days before implementing the suspension, and may implement the suspension only if the breach remains uncured as of the suspension date; and
- (b) a suspension by Principal Project Company under this Section 16.4.5 (Principal Project Company Right to Suspend) shall be deemed to be a suspension of Work order issued by City for its convenience under Section 16.2.8.2, and the suspension order shall be deemed lifted upon Principal Project Company's receipt of payment in full of all undisputed amounts owing.

## **16.5 No Duplicative Payment**

Notwithstanding any other provisions of this Agreement to the contrary, neither Party shall be entitled to recover compensation or make a claim under this Agreement with respect to any loss that it has incurred to the extent that it has already been compensated with respect to that loss under this Agreement or otherwise.

## **16.6 Limitation on Consequential Damages**

**16.6.1** Except as stated here, Principal Project Company shall have no liability to City for any type of special, consequential, or incidental damages arising out of or connected with Principal Project Company's performance of the Work. This limit of liability applies under all circumstances including the breach, completion, termination, suspension or cancellation of the services under this Agreement, and negligence or strict liability of Principal Project Company. This limit of liability, however, shall not apply to, limit or preclude:

- (a) Principal Project Company's obligation to pay liquidated damages as set forth in the Contract Documents, including any credits, deductions or offsets for failure to meet performance requirements or pursuant to the noncompliance/deduction regime;
- (b) damages caused by a PPC Fault (other a PPC Fault that is a breach by a PPC-Related Entity of any obligations under the Contract Documents);
- (c) Principal Project Company's obligations to indemnify, defend and hold City and other Indemnities harmless for Third Party Claims as set forth in the Contract Documents;
- (d) Principal Project Company's liability damages that fall within the insurance coverages required under this Agreement;
- (e) Principal Project Company's liability for statutory damages imposed by City as a Governmental Entity under applicable Law;
- (f) statutory fines, penalties, and statutory damages, including punitive damages, treble damages, and statutory attorney fees and costs, including those due as a result of violations of environmental regulations and laws;
- (g) amounts that Principal Project Company is obligated to reimburse City under the express provisions of this Agreement, including any Recoverable Costs and any express interest thereon;
- (h) damages and other liability arising under claims by Third Parties for loss or damage to property or personal injuries, including wrongful death; or
- (i) damages and other liability for infringement of any Intellectual Property right.

---

## ARTICLE 17. TERMINATION

### 17.1 Termination for Convenience; Condemnation

**17.1.1** City may terminate this Agreement in whole, but not in part, if City determines in its sole discretion that termination is in City's best interest (a "**Termination for Convenience**").

**17.1.2** City may exercise a Termination for Convenience by delivering to Principal Project Company a Notice of Termination for Convenience specifying the election to terminate and its effective date, which shall not be earlier than 30 days after the date of delivery of such Notice.

**17.1.3** In the event of a Termination for Convenience, City shall pay compensation to Principal Project Company (or to the Collateral Agent as provided in the Direct Agreement) in an amount (without double counting) equal to:

- (a) (i) all amounts shown in the Financial Model as payable by Principal Project Company to Equity Members from the Early Termination Date, either as Distributions on Committed Investments or as payments of interest or repayments of principal made by Principal Project Company in respect of Equity Members Funding Agreements, each amount discounted back at the Equity IRR from the date on which it is shown to be payable in the Financial Model to the date on which the Termination Compensation is paid, minus  
(ii) Deferred Equity Amounts, discounted back at the Equity IRR from the date on which it is shown to be payable in the Financial Model to the date on which the Termination Compensation is paid; plus
- (b) Lenders' Liabilities; plus
- (c) PPC Employee and Contractor Breakage Costs; minus
- (d) Account Balances; minus
- (e) Insurance Proceeds; minus
- (f) any Deductions to the extent not deducted in full from the Milestone Payment or Quarterly Availability Payments.

**17.1.4** If:

- (a) City confiscates, sequesters, condemns or appropriates the PPC's Interest or any material part thereof; or
- (b) as a direct result of a City ordinance Principal Project Company is unable to perform all or substantially all of its obligations under the Contract Documents for a period of 180 consecutive days or more,

then this Agreement shall be deemed terminated for convenience and City shall pay compensation to Principal Project Company in the amount described in Section 17.1.3.

---

## 17.2 Termination for Force Majeure Termination Events or Insurance Unavailability

### 17.2.1 Notice of Conditional Election to Terminate – Force Majeure Termination Events

Subject to Section 17.2.2, either Party may deliver to the other Party Notice of its conditional election to terminate this Agreement (“**Notice of Conditional Termination**”) if a Force Majeure Event (excluding a Force Majeure Event under clauses (i) or (j) of the definition of Force Majeure Event) (“**Force Majeure Termination Event**”) has occurred and:

- (a) (i) the Notice of Conditional Termination is delivered before the Substantial Completion Date; (ii) as a direct result of the Force Majeure Termination Event, Principal Project Company is unable to perform all or substantially all of its obligations under the Contract Documents for a period of 255 consecutive days or more; and (iii) such inability to perform its obligations is not attributable to a concurrent non-Force Majeure Termination Event; or
- (b) (i) the Notice of Conditional Termination is delivered on or after the Substantial Completion Date; (ii) as a direct result of the Force Majeure Termination Event, all or substantially all of the Project has become and remains inoperable for a period of 255 consecutive days or more; and (iii) such suspension of operations is not attributable to another concurrent non-Force Majeure Termination Event; and
- (c) Principal Project Company could not have mitigated or cured such result through the exercise of diligent efforts; and
- (d) such result is continuing at the time of delivery of the written Notice; and
- (e) the written Notice sets forth in reasonable detail a description of the Force Majeure Termination Event, a description of the direct result and its duration, and a statement that the notifying Party’s intends to terminate this Agreement.

### 17.2.2 No Right to Termination Election

Notwithstanding the foregoing, if, following the occurrence of any Force Majeure Termination Event that results in damage or partial destruction of the Project:

- (a) the conditions listed in Section 17.2.1 (Notice of Conditional Election to Terminate – Force Majeure Termination Events) are satisfied;
- (b) insurance proceeds are available to fund work required to remedy the effects of the Force Majeure Termination Event; and
- (c) the Parties agree to a restoration plan in respect of such work required to remedy the effect of the Force Majeure Termination Event,

then neither Party shall have the right to elect to terminate this Agreement pursuant to Section 17.2.1 (Notice of Conditional Election to Terminate – Force Majeure Termination Events).

### **17.2.3 Principal Project Company Options Upon City Notice**

**17.2.3.1** If City delivers a Notice of Conditional Termination, Principal Project Company shall have the option either to accept such Notice or to continue this Agreement in effect by delivering to City Notice of Principal Project Company's choice not later than 30 days after City delivers its Notice. If Principal Project Company does not deliver such Notice within such 30 day period, then Principal Project Company shall be deemed to have accepted City's election to terminate this Agreement.

**17.2.3.2** If Principal Project Company delivers timely Notice under Section 17.2.3.1 choosing to continue this Agreement in effect, then:

- (a) City shall have no obligation to compensate Principal Project Company for any Extra Work Costs, Financing Delay Costs, Delay Costs, costs of restoration, repair or replacement arising out of the Force Majeure Termination Event and incurred after the date on which City gives written Notice of conditional election to terminate under this Section 17.2 (Termination for Force Majeure Events or Insurance Unavailability), except as provided in Section 17.2.3.2(b);
- (b) if the Force Majeure Termination Event occurred before the Substantial Completion Date and resulted in a Relief Event Delay, Principal Project Company shall be entitled to an extension of the applicable deadlines in accordance with Section 14.1.2 (Extension of Deadlines for General Delay Events); and
- (c) this Agreement shall continue in full force and effect and City's election to terminate shall not take effect.

### **17.2.4 City Options Upon Principal Project Company Notice**

**17.2.4.1** If Principal Project Company delivers a Notice of Conditional Termination, including an estimate (with supporting documentation) of the compensation that would be paid or reimbursed to Principal Project Company under Section 17.2.4.2, City shall have the option either: (a) to accept such Notice; or (b) to continue this Agreement in effect if City in its reasonable discretion determines that the Project can be completed or re-opened, as applicable, on a commercially reasonable basis. City shall exercise such option by delivering to Principal Project Company written Notice of City's choice not later than 30 days after Principal Project Company delivers its Notice of Conditional Termination. If City does not deliver such written Notice within such 30-day period, then it shall be conclusively deemed to have accepted Principal Project Company's election to terminate this Agreement.

**17.2.4.2** If City delivers timely written Notice under Section 17.2.4.1 choosing to continue this Agreement in effect, then:

- (a) subject to Section 13.8 (Burden of Proof and Mitigation), City shall be obligated to pay or reimburse Principal Project Company an amount equal to (without double-counting):
  - (i) where the Force Majeure Termination Event occurs prior to Substantial Completion, Financing Delay Costs and the Extra Work Costs directly

- caused by the Force Majeure Termination Event which are incurred after the date Principal Project Company delivers its written Notice of conditional election to terminate; plus
- (ii) where the Force Majeure Termination Event occurs prior to Substantial Completion, Delay Costs which are incurred after the date Principal Project Company delivers its written Notice of conditional election to terminate; plus
  - (iii) such other amounts so as to result in Principal Project Company achieving the same Equity IRR (with reference to the Base Case Equity IRR) from and after the date Principal Project Company delivers its written Notice of conditional election to terminate as if such Force Majeure Termination Event had not occurred; and
- (b) From and after the date which is 255 days after the occurrence of the Force Majeure Termination Event, Principal Project Company shall not be subject to Deductions or Noncompliance Points with respect to such Force Majeure Termination Event; and
  - (c) this Agreement shall continue in full force and effect and Principal Project Company's election to terminate shall not take effect for the period specified in City's written Notice under this Section 17.2.4 (City Options Upon Principal Project Company Notice) or such longer period as may be mutually agreed to in writing by the Parties.

#### **17.2.5 No Waiver**

No election by Principal Project Company under Section 17.2.3 (Principal Project Company Options Upon City Notice) or by City under Section 17.2.4 (City Options Upon Principal Project Company Notice) to continue this Agreement in effect shall prejudice or waive such Party's right to thereafter, at any time, give a Notice of conditional election to terminate with respect to the same or any other Force Majeure Termination Event.

#### **17.2.6 Termination for Insurance Unavailability**

If it becomes apparent that insurance required under the Contract Documents is not available as a result of Insurance Unavailability, City may deliver to Principal Project Company Notice of its election to terminate this Agreement for Insurance Unavailability and the effective date of the termination, which shall not be earlier than 30 days after the date of delivery of such Notice. Such Notice shall include reasonable details regarding the affected coverages and associated risks, as well as the estimated cost of premiums if Commercially Reasonable Insurance Rates are not available. In the event of a termination for Insurance Unavailability, City shall pay compensation to Principal Project Company (or to the Collateral Agent as provided in the Direct Agreement) calculated in accordance with Section 17.2.8 (Termination Compensation for Force Majeure Termination Events and Insurance Unavailability).

### 17.2.7 Concurrent Notices

If City and Principal Project Company deliver concurrent Notices of Conditional Termination under this Section 17.2 (Termination for Force Majeure Termination Events or Insurance Unavailability), Principal Project Company's Notice shall prevail. Notices shall be deemed to be concurrent if each Party sends its Notice before actually receiving the Notice from the other Party. Knowledge of the other Party's Notice obtained before actual receipt of the Notice shall have no effect on determining whether concurrent Notice has occurred.

### 17.2.8 Termination Compensation for Force Majeure Termination Events and Insurance Unavailability

If either Party accepts, or is deemed to accept, the other Party's conditional election to terminate under Section 17.2.3 (Principal Project Company Options Upon City Notice) or Section 17.2.4 (City Options Upon Principal Project Company Notice), as applicable, then this Agreement shall be deemed terminated on an Early Termination Date that is 30 days after the date of acceptance or deemed acceptance of the conditional election to terminate; and Principal Project Company will be entitled to compensation calculated as follows (calculated at the Early Termination Date and without double-counting):

- (a) an amount equal to its Equity Investments less Distributions paid to the Equity Members, which shall never be a negative number; plus
- (b) Lenders' Liabilities; plus
- (c) PPC Employee and Contractor Breakage Costs; minus
- (d) Account Balances; minus
- (e) Insurance Proceeds; minus
- (f) any Deductions to the extent not deducted in full from Milestone Payments or Quarterly Availability Payments.

### 17.3 Termination for PPC Default

#### 17.3.1 PPC Defaults Triggering City Termination Rights

17.3.1.1 Subject to the rights of the Lenders pursuant to any Direct Agreement, in the event that:

- (a) any PPC Default occurs and has not been cured within the applicable cure period, if any, set out in Section 16.1.2 (Default Notice and Cure Periods) or (if relevant) in accordance with any cure plan accepted by City under Section 15.8 (Cure Plan for Persistent PPC Default); or
- (b) any PPC Default occurs for which there is no cure period under Section 16.1.2 (Default Notice and Cure Periods);

(each a "Default Termination Event")

---

City may terminate this Agreement with immediate effect upon written Notice to Principal Project Company.

**17.3.1.2** Termination of this Agreement for a Default Termination Event in accordance with this Section 17.3 (Termination for PPC Default) will take effect on the date stated in the Notice given by City to Principal Project Company under Section 17.3.1.1.

### **17.3.2 Compensation to Principal Project Company**

**17.3.2.1** Subject to Section 17.3.2.2, if City issues a Notice of termination of this Agreement due to a PPC Default:

- (a) if termination occurs before the Substantial Completion Date, Principal Project Company will be entitled to compensation in an amount equal to the lesser of:
  - (i) the D&C Work Value; and
  - (ii) the amount equal to:
    - (A) Lenders' Liabilities; minus
    - (B) Account Balances; minus
    - (C) Insurance Proceeds (excluding proceeds of personal injury, property damage or other Third Party liability insurance payable to or for the account of a Third Party); minus
    - (D) any D&C Period Deductions to the extent not deducted in full from Milestone Payments;
- (b) if termination occurs on or after the Substantial Completion Date, Principal Project Company will be entitled to compensation equal to the amount calculated at the Early Termination Date (without double-counting) as follows:
  - (i) eighty percent (80%) of Lenders' Liabilities; minus
  - (ii) Maintenance Rectification Costs; minus
  - (iii) Account Balances; minus
  - (iv) Deferred Equity Amounts; minus
  - (v) Insurance Proceeds; minus;
  - (vi) any Deductions to the extent not deducted in full from the Milestone Payment or Quarterly Availability Payments; plus
  - (vii) the balance standing to the credit of the Handback Requirements Reserve Account on the Early Termination Date.

**17.3.2.2** If the calculation described in Section 17.3.2.1 results in a negative number, the negative value shall represent damages recoverable by City in accordance with Section 16.2.6.2.

### **17.3.3 Finality**

If City issues Notice of termination of this Agreement due to a PPC Default, termination shall be effective and final regardless of whether City is correct in determining that it has the right to terminate for PPC Default. If it is determined that City lacked such right, then such termination shall be treated as a Termination for Convenience as provided in Section 17.1 (Termination for Convenience; Condemnation) for the purpose of determining the Termination Compensation due.

## **17.4 Principal Project Company Rights to Terminate**

### **17.4.1 Termination for City Default**

**17.4.1.1** If a City Default under Section 16.3.1 (City Default) remains uncured following (a) Notice and expiration of the applicable cure period under Section 16.3.2 (Cure Periods), and (b) Principal Project Company's compliance with the warning requirements set forth in Section 17.4.1.2, Principal Project Company shall have the right to terminate this Agreement, effective immediately upon delivery of written Notice of termination to City. In the event of such termination, City shall pay compensation to Principal Project Company equal to the amount described in Section 17.1.3.

**17.4.1.2** Principal Project Company shall provide a warning Notice to City at least 15 Business Days before terminating, which Notice may not be delivered until 30 Business Days after delivery of the Notice under Section 16.3.2.1 Principal Project Company shall provide a second warning Notice to City at least five Business Days before terminating, which Notice may not be delivered until 10 Business Days after delivery of the first warning Notice. If City fails to effect cure within five Business Days after the date of delivery of the second warning Notice, Principal Project Company shall have the right to terminate this Agreement in accordance with Section 17.4.1.1

### **17.4.2 Termination for Suspension of Work**

**17.4.2.1** If City issues a suspension order under Section 16.2.8.3 that suspends the Work for a period of 270 days or more, and provided that (a) such suspension is not the result of any PPC Fault; and (b) Principal Project Company has delivered a warning Notice to City at least 15 days before terminating, Principal Project Company shall have the right to terminate this Agreement, effective immediately upon delivery of written Notice of termination to City. In the event of such termination, Principal Project Company will be entitled to compensation equal to the amount described in Section 17.1.3.

**17.4.2.2** Principal Project Company may not terminate under this Section 17.4.2 (Termination for Suspension of Work) if, at the time Principal Project Company's right to terminate would arise, circumstances exist entitling either Party to terminate under Sections 17.2 (Termination for Force Majeure Termination Events or Insurance Unavailability), 17.3 (Termination for PPC Default), 17.4.3 (Termination Due to Court Ruling) or 17.5 (Termination if Financial Close Fails to Occur).

### **17.4.3 Termination Due to Court Ruling**

Termination Due to Court Ruling means, and becomes effective upon: (a) issuance of a final order by a court of competent jurisdiction after exhaustion of all appeals to the effect that this Agreement is void, voidable, and/or unenforceable or impossible to perform in its entirety for reasons beyond the reasonable control of Principal Project Company; or (b) issuance of a final order by a court of competent jurisdiction after exhaustion of all appeals upholding the binding effect on Principal Project Company and/or City of a Change in Law that causes impossibility of performance of a fundamental obligation by Principal Project Company or City under the Contract Documents or impossibility of exercising a fundamental right of Principal Project Company or City under the Contract Documents. The final court order shall be treated as the Notice of termination. In the event of such termination, Principal Project Company will be entitled to compensation in an amount equal to the amount described in Section 17.2.8 (Termination Compensation for Force Majeure Termination Events and Insurance Unavailability); provided that if the Termination Due to Court Ruling is caused solely and directly by a City Default or a City Fault, Principal Project Company will be entitled to compensation in the amount described in Section 17.1.3.

### **17.5 Termination if Financial Close Fails to Occur**

Sections 3.6 (No-Fault Termination) and 3.7 (Principal Project Company's Failure to Achieve Financial Close) set forth the terms applicable to termination before Financial Close.

### **17.6 Termination Procedures and Duties**

The provisions of this Section 17.6 (Termination Procedures and Duties) shall apply upon expiration of the Term or earlier termination of this Agreement. Principal Project Company shall timely comply with such provisions independently of, and without regard to, the timing for determining, adjusting, settling and paying any amounts due Principal Project Company or City on account of termination. If City determines that Principal Project Company has failed to comply with the provisions of this Section 17.6 (Termination Procedures and Duties), then upon Notice from City to Principal Project Company making reference to this Section 17.6 (Termination Procedures and Duties), Principal Project Company acknowledges and agrees it shall be deemed to have surrendered its access rights in accordance with the Contract Documents.

#### **17.6.1 Performance of Work Pending Early Termination Date**

In any case where Notice of termination precedes the effective Early Termination Date, Principal Project Company shall continue performing the Work in accordance with all the standards, requirements and terms of the Contract Documents.

#### **17.6.2 Transition Plan**

**17.6.2.1** Within 90 days before expiration of the Term, or, if applicable, within three days after Principal Project Company receives or delivers a Notice of termination, Principal Project Company shall meet and confer with City for the purpose of developing a transition plan for the orderly transition of Work, demobilization and transfer of Project management, maintenance, operation, care, custody and control to City. The Parties shall use diligent efforts to complete preparation of the transition plan within 30 days before expiration of the Term or, if applicable,

within 15 days after the date Principal Project Company receives or delivers the Notice of termination.

**17.6.2.2** The transition plan shall include a plan to promptly deliver to City or its designee possession of all the property, data and documents described in Sections 17.6.5.1 and 17.6.5.2.

**17.6.2.3** The transition plan shall include an estimate of costs and expenses to be incurred by both Parties in connection with implementation of the transition plan. Neither Party shall be liable for the other Party's transition costs and expenses, regardless of the reason for termination.

**17.6.2.4** The transition plan shall:

- (a) be in form and substance acceptable to City and shall include and be consistent with the other provisions and procedures in this Section 17.6 (Termination Procedures and Duties);
- (b) reserve the last calendar month for City's operation of the system with technical support and other necessary management support from Principal Project Company similar to the demonstration test performed by Principal Project Company before Substantial Completion; and
- (c) if required by City, provide for Principal Project Company to continue to perform specified Work during the period between the Termination Date and the effective date of the release and discharge, following payment of Termination Compensation.

### **17.6.3 Relinquishment and Possession of Project**

**17.6.3.1** On or as soon as possible after the Termination Date as provided in the approved transition plan, Principal Project Company shall relinquish and surrender care, custody and control of the Project, to City, and shall cause all persons and entities claiming under or through Principal Project Company to do likewise (except as may be set forth in any Direct Agreement), in at least the condition required by Section 8.5.1 (Handback Condition).

**17.6.3.2** On the later of the Termination Date or the date Principal Project Company relinquishes all care, custody and control as provided in the transition plan, City shall have the exclusive right to, and shall assume responsibility at its expense for, care, custody and control of the Project and the Project Site, subject to any rights to damages against Principal Project Company where the termination is due to a Termination for PPC Default.

**17.6.3.3** If the transition plan developed under Section 17.6.2 (Transition Plan) requires Principal Project Company to perform any obligations under this Agreement after the Termination Date, this Agreement will remain in full force and effect only to the extent necessary for Principal Project Company to perform such obligations. On the Termination Date, or such later date provided in the approved transition plan, City grants to Principal Project Company a right to access the Project Site for the limited purpose of carrying out Principal Project Company's obligations contemplated by this Section 17.6 (Termination Procedures and Duties), including execution of the transition plan contemplated in Section 17.6.2 (Transition Plan). This right of access is subject to rescission by City for Principal Project Company's failure to perform

any of its obligations under this Agreement after the Termination Date, and shall automatically expire upon Principal Project Company's fulfillment of such obligations.

#### **17.6.4 Continuance or Termination of Key Contracts Before Work Completion**

**17.6.4.1** If, as of the Termination Date, Principal Project Company has not completed the Work, in whole or in part, City may elect, by written Notice to Principal Project Company to continue in effect some or all of the Key Contracts or to require their termination. If City elects to continue any Key Contracts, then Principal Project Company shall execute and deliver (or shall cause the relevant Key Contractor(s) to execute and deliver) to City a written assignment, in form and substance acceptable to City, acting reasonably, of all Principal Project Company's (or Key Contractor's) right, title and interest in and to such Key Contracts, and City shall assume in writing Principal Project Company's (or such Key Contractor's) obligations thereunder that arise from and after the Termination Date.

**17.6.4.2** If City elects (or is deemed to elect) to require termination of any Key Contracts, then Principal Project Company shall:

- (a) take such steps as are necessary to terminate the relevant Key Contracts, including providing Notice to each Key Contractor that its Key Contract is being terminated and that each of them is to stop Work on the date and to the extent specified in the Notice of termination and stop and cancel orders for materials, services or facilities, unless otherwise approved by City;
- (b) promptly and orderly demobilize and secure in a safe manner the Project Site in a manner satisfactory to City, remove all debris and waste materials and complete any Hazardous Materials Management Work already in process, except as otherwise approved by City;
- (c) take such other actions as are necessary or appropriate to mitigate further costs;
- (d) subject to City's reasonable prior approval, settle all outstanding liabilities and all claims arising out of, relating to or resulting from such Key Contracts;
- (e) as a condition to City's obligation to make payments to Principal Project Company under this Article 17 (Termination) and under the requirements of the transition plan, cause each of the Key Contractors to execute and deliver to City a written assignment, in form and substance acceptable to City, of all of their interest in (i) all Regulatory Approvals, Third Party agreements and permits pertaining to the Project or the Work (excluding Subcontracts), provided that City assumes in writing all of the Key Contractor's obligations under said approvals, agreements and permits that arise after the Termination Date; and (ii) all warranties, to the extent assignable, claims and causes of action held by each of them against Subcontractors and other Third Parties pertaining to the Project or the Work, provided that Principal Project Company shall retain the right to pursue any cause of action against the Subcontractor or other Third Parties for damages incurred by Principal Project Company; and

- 
- (f) as a condition to City's obligation to make payments to Principal Project Company under this Article 17 (Termination) and under the requirements of the transition plan, carry out such other reasonable directions as City may give for termination of the Work in accordance with the transition plan.

#### **17.6.5 Other Close-Out Activities**

**17.6.5.1** Within 90 days before expiration of the Term, or within 30 days after any earlier Notice of termination is delivered, Principal Project Company shall deliver to City a true and complete list of all materials, goods, machinery, equipment, hardware, parts, supplies and other tangible property in inventory or storage (whether then held by Principal Project Company or any Person on behalf of or for the account of Principal Project Company) for use in or respecting the Work or the Project, or on order or previously completed but not yet delivered from Suppliers for use in or respecting the Work or the Project. In addition, on or as soon after the Termination Date as is possible or as is provided in the approved transition plan, Principal Project Company shall transfer title through bills of sale or other documents of title, as directed by City, and deliver to City's Authorized Representative, all such materials, goods, machinery, equipment, hardware, parts, supplies and other property, provided City assumes in writing all of Principal Project Company's obligations under any contracts relating to the foregoing that arise after the later of the Termination Date or the effective date of the transfer.

**17.6.5.2** Within 90 days before the expiration of the Term, or within 30 days after any earlier Notice of termination is delivered, Principal Project Company shall provide City with a true and complete list of all the data and documents identified in this Section 17.6.5.2. Subject to Sections 21.4 (Intellectual Property) and 21.5 (Intellectual Property Escrows), Principal Project Company shall execute and deliver to City an executed bill of sale or other written instrument, in form and substance reasonably acceptable to City, assigning and transferring to City the following:

- (a) all completed or partially completed drawings (including plans, elevations, sections, details and diagrams), specifications, designs, Design Documents, Record Documents, plans, surveys, and other documents and information pertaining to the design or construction of the Project or the Utility Adjustments;
- (b) all samples, borings, boring logs, geotechnical data and similar data and information relating to the Project or the Project Site;
- (c) all Books and Records, reports, test reports, studies and other documents of a similar nature relating to the Work, the Project or the Project Site; and
- (d) all Intellectual Property, and IP Materials, documents evidencing licenses of PPC Intellectual Property and Third Party IP to City, other work product and other materials relating to all such Intellectual Property and PPC Intellectual Property.

Such bill of sale or other instrument shall be delivered to City as provided in the approved transition plan (or if not specified in the transition plan, shall be delivered on the Termination Date or as soon thereafter as possible), and shall be accompanied by originals or copies, as appropriate, of all of the materials described therein.

**17.6.5.3** Principal Project Company shall take all action that may be necessary, or that City may direct, for the protection and preservation of the Project, the Work and such materials, goods, machinery, equipment, hardware, parts, supplies, data, documentation and other property.

**17.6.5.4** On or as soon as possible after the Termination Date or as provided in the approved transition plan, Principal Project Company shall execute and deliver to City a written assignment, in form and substance acceptable to City, all of Principal Project Company's interest in any IP Escrows or similar arrangements for the protection of Source Code and Source Code Documentation of others used for or relating to the Project or the Work.

**17.6.5.5** On or as soon as possible after the Termination Date or as provided in the approved transition plan, Principal Project Company shall execute and deliver to City a written assignment, in form and substance acceptable to City, of all Principal Project Company's interest in all warranties, claims and causes of action held by Principal Project Company against Third Parties in connection with the Project or the Work, including claims under casualty and business interruption insurance, except to the extent that City has already received credit for such matters in calculating Termination Compensation amounts, in which case they may be pursued by Principal Project Company for its own account.

**17.6.5.6** Principal Project Company shall otherwise assist City in such manner as City may require before and for a reasonable period following the Termination Date to ensure the orderly transition of management, maintenance, operation, care, custody and control of the Project, to City, and shall, if appropriate and if requested by City, take all steps as may be necessary to enforce the provisions of the Key Contracts pertaining to the surrender of Project management, maintenance, operation, care, custody and control.

**17.6.5.7** For a period of four years following the Termination Date, Principal Project Company shall maintain a secure archive copy of all electronic data transferred to City.

## **17.6.6 Calculation of Compensation**

**17.6.6.1** Within 30 days after the Early Termination Date for termination pursuant to Section 17.3 (Termination for PPC Default), and within 15 days after the Early Termination Date for termination pursuant to Section 17.1 (Termination for Convenience; Condemnation), Section 17.2 (Termination for Force Majeure Termination Events or Insurance Unavailability) or Section 17.4 (Principal Project Company Rights to Terminate), Principal Project Company shall:

- (a) provide City with a written statement prepared by the Collateral Agent as to (i) the Lenders' Liabilities and (ii) the Account Balances, to the extent such accounts are controlled by the Collateral Agent, with documentation reasonably required by City to support such statement and the Collateral Agent's certification that such amounts are true and correct;
- (b) provide a written statement as to the following amounts, (without duplication of any Account Balances verified by the Collateral Agent under Section 17.6.6.1(a)(ii)), together with documentation reasonably required by City to support such statement and a certification that such amounts are true and correct:

- 
- (i) for termination pursuant to Section 17.1 (Termination for Convenience; Condemnation) or Section 17.4 (Principal Project Company Rights to Terminate), amounts described in clauses (i) and (ii) of Section 17.1.3(a) and Sections 17.1.3(c) through 17.1.3(f);
  - (ii) for termination pursuant to Section 17.2 (Termination for Force Majeure Termination Events or Insurance Unavailability), amounts described in Sections 17.2.8(a) and 17.2.8(c) through 17.2.8(f); or
  - (iii) for termination pursuant to Section 17.3 (Termination for PPC Default), (A) the amounts described in clauses (ii) through (vii) of Section 17.3.2.1(b), and (B) the Insurance Proceeds (excluding proceeds of personal injury, property damage or other Third Party liability insurance payable to or for the account of a Third Party; and
- (c) for termination pursuant to Section 17.1 (Termination for Convenience Condemnation), Section 17.2 (Termination for Force Majeure Termination Events or Insurance Unavailability), or Section 17.4 (Principal Project Company Rights to Terminate), an estimate of any interest and fees that will accrue (on a daily basis) on the outstanding principal due to Lenders at the rate due (excluding default interest), under the Financing Documents over the period between the Early Termination Date and the anticipated date that the Termination Compensation will be paid by City.

**17.6.6.2** From and after the Termination Date, except as otherwise stated in this Article 17 (Termination), Principal Project Company shall cease to have any right to (a) Availability Payments except for those accrued and owing before the Early Termination Date and (b) any other compensation, except as provided under Section 17.8.2.

## **17.7 Payment of Termination Compensation**

**17.7.1** For termination under Section 17.1 (Termination for Convenience; Condemnation) or Section 17.4 (Principal Project Company Rights to Terminate), provided Principal Project Company has timely provided to City the statements and information required under Section 17.6.6.1, City shall, within 120 days of the Early Termination Date, pay to Principal Project Company an amount equal to the:

- (a) Termination Compensation; plus
- (b) interest and fees that accrued on the outstanding principal due to Lenders (excluding default interest) under the Financing Documents over the period between the Early Termination Date and such payment date.

**17.7.2** For termination under Section 17.2 (Termination for Force Majeure Termination Events or Insurance Unavailability), provided Principal Project Company has timely provided to City the statements and information required under Section 17.6.6.1, City shall, within 120 days of the Early Termination Date, pay to Principal Project Company an amount equal to the:

- (a) Termination Compensation; plus

- (b) interest and fees that accrued on the outstanding principal due to Lenders (excluding default interest) under the Financing Documents over the period between the Early Termination Date and such payment date.

**17.7.3** For termination pursuant to Section 17.3 (Termination for PPC Default), provided Principal Project Company has timely provided to City the statements and information required under Section 17.6.6.1, City shall, within 120 days of the Early Termination Date, pay to Principal Project Company an amount equal to the Termination Compensation.

**17.7.4** If as of the date that City is required to tender payment of Termination Compensation under Sections 17.7.1, 17.7.2 or 17.7.3, as applicable, the Parties have not agreed upon the amount of Termination Compensation due, then:

- (a) City shall proceed to make payment to Principal Project Company of the undisputed portion of the Termination Compensation;
- (b) Within 30 days after receiving such payment Principal Project Company shall deliver to City written Notice of the additional amount of Termination Compensation that Principal Project Company in good faith determines is still owing (the “**disputed portion**”); and
- (c) City shall pay the disputed portion of the Termination Compensation to Principal Project Company in immediately available funds after the disputed portion is agreed to by the Parties or otherwise determined to be payable pursuant to **Error! Reference source not found.** (Contract Dispute Procedures), as the case may be.

## **17.8 Effect of Termination**

**17.8.1** Except to the extent set out in Section 17.6.3.3, and regardless of City’s prior Actual Knowledge or constructive knowledge thereof:

- (a) no Contract or agreement to which Principal Project Company is a party as of the Termination Date shall bind City, unless City elects to assume such Contract or agreement; and
- (b) except in the case of City’s express written assumption, no such Contract or agreement shall entitle the contracting party to continue performance of work or services respecting the Project following Principal Project Company’s relinquishment to City of Project care, custody and control, or to any claim, legal or equitable, against City.

**17.8.2** Termination of this Agreement shall not:

- (a) relieve Principal Project Company or any Surety of its obligation for any claims arising before the Termination Date;
- (b) excuse either Party from any liability arising out of, related to or resulting from any default as provided in this Agreement that occurred before the Termination Date; and

- (c) relieve City of claims of Principal Project Company to payment of Compensation Amounts for adverse cost and revenue impacts accruing before the Termination Date due to Compensable Delay Events or Compensable Relief Events that occurred before the Termination Date.

### **17.9 Liability after Termination; Final Release**

Notwithstanding the foregoing, any termination of this Agreement under Sections 17.2 (Termination for Force Majeure Termination Events or Insurance Unavailability), 17.3 (Termination for PPC Default), 17.4.3 (Termination Due to Court Ruling) or 17.5 (Termination if Financial Close Fails to Occur) shall automatically extinguish any claim of Principal Project Company to payment of Compensation Amounts for adverse cost and revenue impacts accruing after the Early Termination Date due to Relief Events that occurred before termination. Except as otherwise expressly provided in this Agreement (other than Section 16.2.10 (Cumulative, Non-Exclusive Remedies)), if this Agreement is earlier terminated for any reason, then City's payment to Principal Project Company of the amounts required under this Agreement (if any) shall constitute full and final satisfaction of, and upon payment City shall be forever released and discharged from, any and all claims, causes of action, suits, demands and Losses, known or unknown, suspected or unsuspected, that Principal Project Company may have against City arising out of, relating to or resulting from this Agreement or termination thereof, the other Contract Documents, or the Project, excluding any proceedings that are pending as of 30 days after the Termination Date, remain unresolved at the time of such payment, and are not related to termination or Termination Compensation. Upon such payment, Principal Project Company shall execute and deliver to City all such releases and discharges, including a release pursuant to Civil Code Section 1542, as City may reasonably require to confirm the foregoing, but no such written release and discharge shall be necessary to give effect to the foregoing satisfaction and release.

### **17.10 Exclusive Termination Rights**

This Article 17 (Termination) contain the entire and exclusive provisions and rights of City and Principal Project Company regarding termination of this Agreement, and each Party waives, to the maximum extent permitted by Law, any and all other rights to terminate at law.

### **17.11 Access to Information**

Principal Project Company shall conduct all discussions and negotiations to determine any Termination Compensation, and shall share with City all data, documents and information pertaining to the termination, on an Open Book Basis.

## **ARTICLE 18. PARTNERING; CONTRACT DISPUTE PROCEDURES**

### **18.1 Introduction**

**18.1.1** The Parties acknowledge fostering a collaborative working relationship during the entire Term is critical to early identification and resolution of issues, claims, and Contract Disputes. This Article 18 provides a structured approach for the Parties to address issues, claims, and Contract Disputes within the framework of informal project-level partnering and formal Contract Dispute procedures.

**18.1.2** The procedures in this Article 18 (Partnering; Contract Dispute Procedures) are necessary for the City to address potential and actual Contract Disputes. Prior knowledge of potential Contract Disputes before Principal Project Company starts disputed Work, and proper documentation from Principal Project Company during that Work, are critical for the City to make informed decisions affecting the Project's budget and schedule.

### **18.2 Partnering**

#### **18.2.1 Collaborative Partnering**

The Parties will engage in a partnering process to foster effective communication, enhance cooperation, and proactively address issues and claims to prevent them from escalating into Contract Disputes. The requirements for the partnering process are set forth in Part 3 of Section 01 31 33 (Partnering Procedures) of Division 10 of the Technical Requirements.

#### **18.2.2 Confidentiality**

In accordance with California Evidence Code sections 1119 and 1152, and Federal Rule of Evidence 408, and similar prohibitions, statements made during the partnering process, including the workshops and informal negotiations within the framework of the Issue Resolution Ladder, are confidential and not admissible or discoverable in any proceeding to resolve a Contract Dispute.

### **18.3 Contract Dispute Procedures**

#### **18.3.1 Disputes Generally**

##### **18.3.1.1 Outline of Dispute Process**

The following is an outline of the sequential process for submitting and resolving Contract Disputes, with each step serving as a condition precedent for Principal Project Company to proceed to subsequent steps, beginning with the Notice of Potential Dispute. These steps must be completed prior to submission by Principal Project Company of any Contract Dispute to litigation in San Francisco Superior Court.

- (a) Principal Project Company must submit a timely Notice of Contract Dispute in compliance with Section 18.3.2 before Principal Project Company can file a Contract Dispute.

- (b) Principal Project Company must submit a timely Contract Dispute in compliance with Section 18.3.3 before Principal Project Company can participate in the Issue Resolution Ladder.
- (c) Principal Project Company must timely comply with the Issue Resolution Ladder provisions in compliance with Section 18.3.3.5 before Principal Project Company can participate in mediation.
- (d) Principal Project Company must timely comply with the mediation provisions in Section 18.3.3.6 in order to exhaust its administrative remedies under this Agreement.
- (e) Principal Project Company must complete all steps outlined in this Section 18.3.1.1 above prior to commencing litigation against the City for disputes arising out of or related to this Agreement that are not expressly excluded from the Contract Dispute process by Section 18.3.1.3. The Principal Project Company must also submit a timely Government Code Claim in order to commence litigation against the City for disputes arising out of or related to this Agreement pursuant to Section 18.3.3.7.

**18.3.1.2** Disputed issues not timely raised and properly documented by Principal Project Company in conformance with this Section 18.3 will be deemed waived by Principal Project Company and may not be asserted in any subsequent litigation, or legal action. Furthermore, by executing this Agreement, Principal Project Company waives any and all claims or defenses of waiver, estoppel, or any other type of excuse of non-compliance with the Contract Dispute submission requirements.

**18.3.1.3** The Contract Dispute procedures specified in this Section 18.3 (Contract Dispute Procedures) do not apply to the following:

- (a) claims respecting penalties for forfeitures prescribed by statute or regulation that a government agency is specifically authorized to administer, settle, or determine;
- (b) claims respecting personal injury, death, reimbursement, or other compensation arising out of or resulting from personal injury of death;
- (c) claims by the City;
- (d) stop notices.
- (e) any matters that this Contract expressly states are final, binding, or not subject to Dispute resolution (including any Person's exercise of sole discretion);
- (f) disputes regarding compliance with applicable Law, the rights of City to terminate this Contract, or indemnification;
- (g) any claim for injunctive relief;
- (h) claims arising solely in tort;

- (i) any claim against an insurance company, including any Contractor Dispute that is covered by insurance;
- (j) Disputes regarding matters under the jurisdiction of OSHA;
- (k) issues regarding DBE participation;
- (l) any claim for, or Dispute based on, remedies expressly created by statute;
- (m) any Dispute that is actionable only against a Surety;
- (n) any claim arising out of or relating to the Work where a third party is a necessary or appropriate party (excluding any PPC-Related Entity); and
- (o) any claim or dispute that does not arise under the Contract.

### **18.3.2 Notice of Contract Dispute**

#### **18.3.2.1 Timely Submission**

Principal Project Company must submit a Notice of Contract Dispute to the City within seven-Days of the event, activity, occurrence, or other cause that gives rise to the Contract Dispute. If the Contract Dispute pertains to a Change or the rejection of a Relief Event by the City, the seven-Day period starts when the City's Authorized Representative issues a final written decision denying, in whole or in part, the corresponding PPC Change Request or Relevant Event claim.

#### **18.3.2.2 Content Requirements**

Notices of Contract Dispute must include:

- (a) description of the Contract Dispute's nature and circumstances;
- (b) reasons Principal Project Company believes additional compensation or time may be due, including Contract Document references and citations supporting its position;
- (c) good faith estimates of the potential cost and/or time impacts; and
- (d) for Contract Disputes related to a disputed Relevant Event, identification of items in the Implementation Proposal that form the basis for Principal Project Company's performance the affected Work.

### **18.3.3 Contract Dispute**

#### **18.3.3.1 Timely Submission**

- (a) Principal Project Company must submit a Contract Dispute to the City no later than 30 Days after the City's receipt of the corresponding Notice of Contract Dispute.

### 18.3.3.2 Content Requirements of all Contract Disputes

Contract Disputes must include:

- (a) cover letter;
- (b) certification, signed by Principal Project Company's Authorized Representative, stating, under penalty of perjury, that:
  - (i) the Contract Dispute is made in good faith;
  - (ii) supporting data are accurate and complete, to the best of their knowledge and belief; and
  - (iii) the amount requested accurately reflects adjustment in compensation or time for which Principal Project Company believes the City is liable;
- (c) narrative summary of Contract Dispute's merits and amount, and the specific provisions of Contract Documents under which the Contract Dispute is made;
- (d) list and copy of documents relating to Contract Dispute:
  - (i) Contract Documents;
  - (ii) correspondence; and
  - (iii) Agreement Exhibits;
- (e) detailed chronology of events and correspondence;
- (f) analysis of Contract Dispute merit; and
- (g) analysis of Contract Dispute cost (money and time).

### 18.3.3.3 Additional Requirements for Contract Disputes Relating to Delay Events Impacting the Critical Path

- (a) In addition to the contents required under Section 18.3.3.3 (Content Requirements of all Contract Disputes), Contract Disputes related to Delay Events prior to Substantial Completion and seeking time extensions or challenging the assessment of delay or liquidated damages shall include a written analysis of all changes and all delays impacting the Critical Path, including a TIA.
- (b) The TIA shall be updated to include the most recent information about the Project Schedule and the TIA shall include all activities represented or affected by the change, with activity numbers, durations, predecessor and successor activities, resources and cost, and with a narrative report, in form satisfactory to City, which compares the proposed new schedule to the Project Schedule, as appropriate. Principal Project Company shall reschedule

activities not otherwise affected by the event, in order to take advantage of additional Float available as the result of the time extension. Any such rescheduling shall be reflected in the Project Schedule.

- (c) The TIA shall account for all Delay Events in the relevant time frame with actual logic ties.

#### **18.3.3.4 Procedure for City Review and Determination**

- (a) The City will review only a timely, certified, and properly documented Contract Dispute.
- (b) The City will respond to a Contract Dispute in writing, within 45 days of receipt of such Contract Dispute. In its response, City will either grant or deny the Contract Dispute in whole or in part. If City does not respond to a Contract Dispute within the 45-day period, the Contract Dispute is deemed denied in its entirety.

#### **18.3.3.5 Issue Resolution Ladder**

After the City issues its written decision under Section 18.3.3.4 or the Contract Dispute is deemed denied in its entirety, the Parties shall utilize the Issue Resolution Ladder to negotiate and attempt to resolve the Contract Dispute in a timely and efficient manner before proceeding to mediation in accordance with Section 18.3.3.6. The requirements for the Issue Resolution Ladder are set forth in Part 3 of Section 01 31 33 (Partnering Procedures) of Division 10 of the Technical Requirements.

#### **18.3.3.6 Non-binding Mediation**

If the Parties are unable to resolve a Contract Dispute during the Issue Resolution Ladder process, either Party may submit the dispute to mediation, by written notice to the other, that a mutually acceptable third-party mediator shall be selected for the purpose of facilitating a negotiated resolution of the Contract Dispute. The Contract Dispute shall be submitted to mediation within 10 Days of the conclusion of the Issue Resolution Ladder process. The Parties will share the costs of the mediation equally. If the mediation is unsuccessful, the Principal Project Company shall submit a Government Claims Act claim pursuant to Section 18.3.3.7, Government Code Claim Requirement.

#### **18.3.3.7 Government Code Claim**

The timely submittal of a complete and proper PPC Change Request or Relevant Event claim and compliance with the procedures specified in this Article 18 (Partnering; Contract Dispute Procedures) shall operate to toll Principal Project Company's compliance with the Government Code dispute requirements under California Government Code section 900, et seq., and Administrative Code Chapter 10 until the Parties complete mediation. The Principal Project Company must comply with California Government Code section 900, et seq. and Administrative Code Chapter 10 prior to submitting a Contract Dispute to litigation in San Francisco Superior Court.

---

## ARTICLE 19. REPRESENTATIONS AND WARRANTIES

### 19.1 Principal Project Company Representations and Warranties

Principal Project Company represents and warrants to City, as of the Effective Date, as follows:

**19.1.1** The Financial Model (a) was prepared by or on behalf of Principal Project Company in good faith, (b) uses financial formulas that, as of the Effective Date are mathematically and formulaically correct and suitable for making reasonable projections, (c) was audited and verified by an independent recognized model auditor immediately before the Effective Date, (d) fully discloses all cost, revenue and other financial assumptions and projections that Principal Project Company has used or is using in making its decision to enter into this Agreement and in making disclosures to potential equity investors and Lenders under the Initial Financing Agreements and (e) as of the Effective Date represents the projections that Principal Project Company believes in good faith are the most realistic and reasonable for the Project; subject to the understanding that such projections are based upon a number of estimates and assumptions and are subject to significant business, economic and competitive uncertainties and contingencies, and that Principal Project Company's stated belief regarding the projections does not constitute a representation that any of the assumptions are correct, that such projections will be achieved or that the forward-looking statements expressed in such projections will correspond to actual results.

**19.1.2** Principal Project Company has evaluated the feasibility of performing the Work by the Contract Deadlines and for the Milestone Payment and Availability Payments, and has reasonable grounds for believing and does believe, subject to the express terms of this Agreement, that such performance is feasible and practicable.

**19.1.3** Principal Project Company has reviewed all applicable Laws relating to Taxes, and has taken into account all requirements imposed by such Laws in preparing the Financial Model.

**19.1.4** Based upon the work undertaken by PPC-Related Entities pursuant to the Predevelopment Agreement, review of information provided by City, and other Reasonable Investigations undertaken by PPC-Related Entities, Principal Project Company has evaluated the constraints affecting the development, design, and construction of the Project, including the Project Site, surface and subsurface conditions discoverable through such investigation, the terms of the CEQA Approval, the terms of the NEPA Approval and requirements of applicable Laws, and, based on the foregoing, Principal Project Company has reasonable grounds for believing and does believe that the Project can be developed, designed, and constructed.

**19.1.5** Principal Project Company conducted a Reasonable Investigation of property to which it had access and other available information regarding conditions at the Project Site, and as a result of such investigation, Principal Project Company is familiar with and accepts the physical requirements of the Work, subject to Principal Project Company's rights regarding Relief Events. Principal Project Company shall undertake and complete the Work and the Project at its sole cost and without any additional compensation, any extension of time, excuse from compliance or other relief on account of such compliance, regardless of whether such compliance would require additional time for performance or additional design, construction operations, maintenance, financing, labor, equipment, supplies and/or materials not expressly

provided for in the Contract Documents or would have an adverse effect on costs, subject only to Principal Project Company's rights regarding Delay Events and Relief Events.

**19.1.6** Principal Project Company familiarized itself with the requirements of all applicable Laws and the conditions of any required Regulatory Approvals.

**19.1.7** Principal Project Company has no reason to believe that any Regulatory Approval required to be obtained by Principal Project Company will not be granted in due course and thereafter remain in effect so as to enable the Work to proceed in accordance with the Contract Documents.

**19.1.8** All Work furnished by Principal Project Company will be performed by or under the supervision of Persons who hold all necessary licenses, certifications, registrations, permits or approvals to practice in the State, by personnel who are experienced, competent and skilled in their respective trades or professions, who are professionally qualified to perform the Work in accordance with the Contract Documents and who shall assume professional responsibility for the accuracy and completeness of the Design Documents, Construction Documents and other documents prepared or checked by them.

**19.1.9** Principal Project Company is a [\_\_\_\_\_], duly organized and validly existing under the laws of the [\_\_\_\_\_], has the requisite power and all required licenses to carry on its present and proposed activities, and has full power, right and authority to execute, and deliver this Agreement and to perform each and all of the obligations of Principal Project Company provided for under this Agreement. Principal Project Company is duly qualified to do business and is in good standing in the State as of the Effective Date, and will remain duly qualified and in good standing throughout the Term and for as long as any obligations remain outstanding under the Contract Documents.

**19.1.10** The execution, delivery and performance of this Agreement has been duly authorized by all necessary action of Principal Project Company's governing body, each person executing this Agreement has been duly authorized to execute and deliver each such document on behalf of Principal Project Company and this Agreement has been duly executed and delivered by Principal Project Company.

**19.1.11** No default under, violation of, or conflict with the governing instruments of Principal Project Company or any agreement, judgment or decree to which Principal Project Company is a party or is bound will result from (a) the execution and delivery by Principal Project Company of this Agreement, or (b) performance by Principal Project Company of its obligations under this Agreement.

**19.1.12** The execution and delivery by Principal Project Company of this Agreement, and the performance by Principal Project Company of its obligations under this Agreement will not conflict with any Laws applicable to Principal Project Company that are valid and in effect on the date of execution and delivery. As of the Effective Date, Principal Project Company is not in breach of any applicable Law that would have a material adverse effect on the Work or the performance of any of its obligations under the Contract Documents.

**19.1.13** This Agreement constitutes the legal, valid and binding obligation of Principal Project Company, enforceable against Principal Project Company in accordance with its terms, subject

only to applicable bankruptcy, insolvency and similar laws affecting the enforceability of the rights of creditors generally and the general principles of equity.

**19.1.14** No proceeds of or commitments to provide the Committed Investment, as applicable, is or shall be from a Prohibited Person.

**19.1.15** There is no action, suit, proceeding, investigation or litigation pending and served on Principal Project Company which challenges Principal Project Company's authority to execute, deliver or perform, or the validity or enforceability of, this Agreement or which challenges the authority of the representative of Principal Project Company executing this Agreement; and Principal Project Company has disclosed to City any pending and un-served or threatened action, suit, proceeding, investigation or litigation with respect to such matters of which Principal Project Company is aware. No current, pending or outstanding criminal, civil, or enforcement actions have been initiated against Principal Project Company by City or the State, and Principal Project Company agrees that it will immediately provide Notice to City if any such action is initiated during the Term.

**19.1.16** Principal Project Company has disclosed to City in writing all organizational conflicts of interest of Principal Project Company and its Contractors of which Principal Project Company was actually aware, which have not been approved in writing by City.

**19.1.17** As of the effective date of the relevant Key Contract, (a) each Key Contractor is duly organized, validly existing and in good standing under the laws of the state of its organization and is duly qualified to do business, and is in good standing, in the State, (b) the ownership interests (including options, warrants and other rights to acquire ownership interests) of each Key Contractor that is a single purpose entity formed for the Project are held by those Persons identified in a written certification delivered by Principal Project Company to City before such effective date; (c) each Key Contractor has the power and authority to do all acts and things and execute and deliver all other documents as are required to be done, observed or performed by it in connection with its engagement by Principal Project Company; (d) each Key Contractor has (i) obtained and will maintain all required registrations, licenses, certifications, permits and approvals required under applicable Law as of such date and (ii) expertise, qualifications, experience, competence, and skills and is qualified to perform the Work for which it is responsible; (e) each Key Contractor will be required by the applicable Key Contract to comply with all health, safety and Environmental Laws in the performance of any work activities for, or on behalf of, Principal Project Company for the benefit of City; and (f) no Key Contractor is in breach of any applicable Law that would have a material adverse effect on any aspect of the Work.

**19.1.18** Principal Project Company has not employed or retained, and Principal Project Company shall not employ or retain, any Person other than employees, agents, attorneys, consultants and advisors of a PPC-Related Entity, to solicit or secure this Agreement, and that it has not paid or agreed to pay any Person any fee or any other consideration contingent on the making of this Agreement.

**19.1.19** Principal Project Company warrants that it owns, or will own, and has, or will have, good and marketable title and sufficient rights to all materials, Intellectual Property, equipment, tools and supplies furnished, or to be furnished, by any PPC-Related Entity that become part of the Project or are purchased for City for the development, operation, maintenance or repair of

the Project, free and clear of all liens, royalties, fees or other charges of any kind or nature. All such materials, Intellectual Property, equipment, devices, or processes shall be delivered free of any claim of any Third Party for infringement of any Intellectual Property rights or ownership. Refer to Section 2.4.3 (Passage of Title) for provisions regarding transfer of title to City.

**19.1.20** Principal Project Company warrants that the individual signing this Agreement on behalf of Principal Project Company is the properly authorized representative, agent, member or officer of Principal Project Company, that he/she has not, nor has any other member, employee, representative, agent or officer of Principal Project Company, directly or indirectly, to the best of the undersigned's knowledge, entered into or offered to enter into any combination, collusion or agreement to receive or pay, and that he/she has not received or paid, any sum of money or other consideration for the execution of this Agreement other than that which appears upon the face of this Agreement.

**19.1.21** [ ] is a [ ], duly organized and validly existing under the laws of [ ], has the requisite power and all required licenses to carry on its present and proposed activities, and has full power, right and authority to perform each and all of the obligations of an Equity Member provided for under this Agreement. **[Note to PNC: Include for each Equity Member of PPC.]**

## **19.2 City Representations and Warranties**

City represents and warrants to Principal Project Company as follows:

**19.2.1** The City and County of San Francisco is a charter city and municipal corporation duly organized and validly existing under the Constitution of the State of California. As of the Effective Date, City has full power, right and authority to execute, deliver this Agreement and City has full power, right and authority to perform its obligations under this Agreement.

**19.2.2** Each person executing this Agreement on behalf of City is duly authorized to execute and deliver this Agreement, and this Agreement has been duly executed and delivered by City.

**19.2.3** This Agreement has each been duly authorized by City, and constitutes a legal, valid and binding obligation of City enforceable against City in accordance with its terms.

**19.2.4** As of the Effective Date, there is no action, suit, proceeding, investigation or litigation pending and served on City which challenges City's authority to execute, deliver and perform this Agreement, or which challenges the validity or enforceability of, this Agreement or which challenges the authority of City officials executing this Agreement; and City has disclosed any pending action, suit, proceeding, investigation or litigation against City (including filed but unserved complaints of which City has Actual Knowledge) relating to this Agreement or the Project.

**19.2.5** Neither the execution and delivery by City of this Agreement, nor the consummation of the transactions contemplated under this Agreement, is in conflict with or has resulted or will result in a default under or a violation of any agreement, judgment or decree to which City is a party or is bound.

**19.2.6** The execution and delivery by City of this Agreement, and the performance by City of its obligations under this Agreement, will not conflict with any Laws applicable to City that are

valid and in effect on the date of execution and delivery. City is not in breach of any applicable Law that would have a material adverse effect on the performance of any of its obligations under the Contract Documents.

**19.2.7** City's execution and delivery of this Agreement is not subject to any requirement to obtain consent or approval of any other Person (including Governmental Entities), other than consents and approvals already obtained.

### **19.3 Special Remedies for Mutual Breach of Warranty**

Notwithstanding any other provision of this Agreement, if any circumstance or event occurs that constitutes or results in a concurrent breach by both Principal Project Company and City of similar warranties referenced in Section 16.1.1(f) or 16.3.1(c) but does not also constitute or result in any other breach or default by either Party, then the only remedies shall be for the Parties to take action to rectify or mitigate the effects of such circumstance or event, to pursue severance and reformation of the Contract Documents in accordance with Section 23.11 (Severability), or Termination Due to Court Ruling in accordance with Section 17.4.3 (Termination Due to Court Ruling).

---

## ARTICLE 20. ASSIGNMENT AND TRANSFER

### 20.1 Restrictions on Equity Transfers and Change of Control

20.1.1 Except as provided in Section 20.1.3, any:

- (a) Change of Control of Principal Project Company; or
- (b) Equity Transfer that results in any Equity Member ceasing to own (directly or indirectly) the same percentage of the issued share capital, partnership or membership interests, as applicable, in Principal Project Company that it owned (directly or indirectly) as of the Financial Close Date,

shall be subject to City's prior written approval in accordance with Section 20.2 (Standards and Procedures for City Approval).

20.1.2 Neither an Equity Transfer to a Prohibited Person, nor a Change of Control that would involve the provision of any amount of Committed Investment directly or indirectly from a Prohibited Person, is permitted at any time. Further, none of the events described in clauses (b) through (g) of the definition of Change of Control are permitted at any time if it would result in the direct or indirect ownership by a Prohibited Person of any interest in Principal Project Company.

20.1.3 Transfers and transactions within any of the exceptions described in clauses (a) through (g) of the definition of Change of Control are allowed at any time without necessity for City's approval, provided that:

- (a) for an exception described in clause (a) (with respect to any initial public offering), or clause (b), (c) or (d), Principal Project Company shall deliver to City, on or before 10 Business Days before the effectiveness of the transfer or transaction, written Notice describing the transfer or transaction and (if applicable) the names of the transferor and transferee, together with documentation demonstrating that the transfer or transaction is within such an exception; and
- (b) for an exception described in clause (a) (other than with respect to an initial public offering), Principal Project Company shall deliver to City, within five days after the effectiveness of the transfer or transaction, written Notice describing the transfer or transaction and (if applicable) the names of the transferor and transferee, together with documentation demonstrating that the transfer or transaction is within such an exception.

### 20.2 Standards and Procedures for City Approval

20.2.1 Where City's prior written approval is required for a proposed sale, assignment, conveyance, transfer, pledge, mortgage, encumbrance, grant of right of entry, or grant of other special use, management or control, or for any proposed Equity Transfer or Change of Control (each, a "**Transaction**"), and such Transaction is proposed at any time during the period ending two years after the Substantial Completion Date, City may withhold or condition its approval in

its sole discretion. Any such decision of City to withhold consent shall be final, binding and not subject to the Contract Dispute Procedures.

**20.2.2** After the second anniversary of the Substantial Completion Date, City shall not unreasonably withhold its approval of a Transaction.

**20.2.3** Among other factors and considerations, it shall be reasonable for City to withhold its approval if:

- (a) Principal Project Company fails to demonstrate to City's reasonable satisfaction that: (i) the proposed Transaction that would amount to a Change of Control of Principal Project Company will not have any adverse effect on Principal Project Company's ability to timely perform its obligations under the Contract Documents and the Principal Project Documents, taking into account the financial resources, qualifications and experience of the proposed assignee, grantee or transferee; and (ii) the proposed assignee, grantee or transferee is in compliance with City's rules, regulations, and adopted written policies regarding organizational conflicts of interest; or
- (b) at the time of the proposed Transaction, there exists any uncured PPC Default or any event or circumstance that with the lapse of time, the giving of Notice or both would constitute a PPC Default, unless City receives from the proposed transferee assurances of cure and performance acceptable to City in its reasonable discretion.

**20.2.4** For Transactions subject to City's prior reasonable approval, City will approve or disapprove in writing within 60 days after it receives from Principal Project Company:

- (a) a request for approval;
- (b) a reasonably detailed description of the proposed Transaction;
- (c) such information, evidence, and supporting documentation as City may request concerning the identity, financial resources, qualifications, experience, and potential conflicts of interest of the proposed transferee and its proposed contractors; and
- (d) such evidence of organization and authority, and such incumbency certificates, certificates regarding debarment or suspension, and other certificates, representations, and warranties as City may reasonably request.

**20.2.5** For Transactions subject to City's prior reasonable approval, City will evaluate the identity, financial resources, qualifications, experience, and potential conflicts of interest using the same standards and criteria that it is then currently applying, or if there is no current application, then the same standards and criteria it most recently applied, to the evaluation of Persons responding to City's requests for qualifications for similar agreements for comparable projects and facilities.

**20.2.6** If for any reason City does not act within such 60 day period, or any extension thereof by mutual agreement of the Parties, then the proposed Transaction shall not be permitted,

subject to Principal Project Company's right, in the case of a proposed Transaction governed by Section 20.2.2, to submit a Contract Dispute for resolution according to the Contract Dispute Procedures.

### **20.3 Restrictions on Assignment, Subletting and Other Transfers of PPC's Interest or the Project**

**20.3.1** Principal Project Company shall not voluntarily or involuntarily sell, assign, convey, transfer, pledge, mortgage or otherwise encumber PPC's Interest or any portion thereof without City's prior written approval, in its sole discretion, except:

- (a) to Lenders for security as permitted by this Agreement, provided Principal Project Company retains responsibility for the performance of Principal Project Company's obligations under the Contract Documents; or
- (b) to any Substituted Entity approved by City in accordance with the Direct Agreement, provided that such Substituted Entity assumes in writing full responsibility for performance of the obligations of Principal Project Company under this Agreement, the other Contract Documents, and the Key Contracts and Financing Documents arising from and after the date of assignment.

**20.3.2** Subject to Section 20.3.1, assignments and transfers of the PPC's Interest permitted under this Section 20.3 (Restrictions on Assignment, Subletting and Other Transfers of PPC's Interest or the Project), or otherwise approved in writing by City, shall be effective only upon City's receipt of a written instrument executed by the transferee of PPC's Interest, including any Person who acquires PPC's Interest through foreclosure, transfer in lieu of foreclosure or similar proceeding, in form and substance acceptable to City, in which the transferee, without condition or reservation, (i) assumes all of PPC's Interest then in effect, (ii) agrees to perform and observe all of PPC's Interest, and (iii) agrees to be bound by, the Project Management Plan, the Key Contracts, the Regulatory Approvals, all agreements between the transferor and Third Parties related to or arising out of the Work and/or the Project, and all agreements between the transferor and Governmental Entities with jurisdiction over the Project or the Work, except to the extent otherwise approved by City, in its sole discretion.

**20.3.3** Principal Project Company shall not grant any right of entry onto, use of, or right to manage and control the Project to any other Person except as expressly contemplated in this Agreement without City's prior written approval, in its sole discretion. Any purported voluntary or involuntary sale, assignment, subletting, conveyance, transfer, pledge, mortgage, encumbrance or grant of other special use, management or control of the Project in violation of this provision shall be null and void ab initio and City, at its option, may declare any such attempted action to be a material PPC Default.

### **20.4 Assignment by City**

City may assign all or any portion of its right, title and interest in the Contract Documents, Payment Bonds and Performance Bonds, guarantees, letters of credit and other security for payment or performance:

- (a) in its sole discretion and without Principal Project Company's consent, to any other Person that succeeds to the powers and authority of SFMTA under the

San Francisco City Charter and San Francisco Administrative Code, has the legal authority to perform its obligations and has sources of funds to perform the payment obligations of the City that are at least as adequate and secure as the City's as of the time of the assignment; and

- (b) to others with the prior written consent of Principal Project Company, which consent cannot be unreasonably withheld if City's assignee has a credit rating equal to or better than City's senior lien rating at the time of the assignment as measured by a Rating Agency.

## **20.5 Change of Organization or Name**

**20.5.1** Principal Project Company shall not change the legal form of its organization in a manner that adversely affects City's rights, protections and remedies under the Contract Documents without the prior written approval of City.

**20.5.2** If either Party changes its name, such Party agrees to promptly furnish the other Party with Notice of change of name and appropriate supporting documentation.

---

**ARTICLE 21. RECORDS AND AUDITS; INTELLECTUAL PROPERTY**

**21.1 Maintenance and Inspection of Records**

**21.1.1** Principal Project Company shall undertake the following with respect to its Books and Records:

- (a) keep and maintain Books and Records, including copies of all original documents delivered to City, in San Francisco, California, or in another location approved by City in writing, and provide Notice to City where the Books and Records are kept;
- (b) keep and maintain Books and Records in accordance with applicable provisions of the Contract Documents, including the Technical Requirements, applicable provisions of the Project Management Plan, and in accordance with Good Industry Practice;
- (c) make all Books and Records available for inspection by City and its representatives in Principal Project Company's principal offices in San Francisco, California, or in accordance with each IP Escrow, at all times during normal business hours, or at other reasonable times during the Term;
- (d) provide to City, or make available to City for review in accordance with each IP Escrow, copies of any Books and Records as and when reasonably requested by City. City may inspect upon 48 hours' prior Notice or without prior Notice where there is good faith suspicion of fraud. City's right of inspection includes the right to make extracts and take notes and shall not be construed as a waiver by Principal Project Company of the attorney-client privilege;
- (e) retain all Books and Records related to the D&C Work until five years after the Substantial Completion Date and retain all Books and Records related to the IFM Services until five years after the date of final payment under the Contract Documents, provided that all records which are being audited or which relate to Claims and Contract Disputes being processed or actions brought under the Contract Dispute Procedures shall be retained and made available until any later date that such audits, Claims, Contract Disputes and actions are finally resolved; and
- (f) permit City, upon 10 days' prior Notice to Principal Project Company (which Notice shall identify the persons City requests to be present for an interview and describe with reasonable specificity the subject matter to be raised in the interview), to discuss the obligations of Principal Project Company under this Agreement with any of the directors, chief executive officer and chief financial officer of Principal Project Company or its representatives, for the purpose of enabling City to determine whether Principal Project Company is in compliance with this Agreement and applicable Law. The interviewees and their employers may have counsel present at the interviews.

**21.1.2** Principal Project Company shall cause each Key Contract to include the provisions of Section 21.1.1, to the extent applicable, modified as appropriate to apply to the Contractor's Books and Records.

**21.1.3** Exhibit 16 (Federal, State and City Requirements) includes additional requirements regarding maintenance and inspection of Books and Records.

## **21.2 Audits**

**21.2.1** City may review and audit Principal Project Company, its Contractors and their respective Books and Records as and when City deems necessary for purposes of verifying compliance with the Contract Documents and applicable Law and verifying Claims.

**21.2.2** Without limiting Section 21.2.1:

- (a) City may audit the Project Management Plan and compliance therewith, including the right to inspect Work and/or activities and to verify the accuracy and adequacy of the Project Management Plan and its component parts, plans and other documentation;
- (b) the audits may be performed by employees or consultants of City, City or the City's Controller, or by an auditor under contract with City, City or the City's Controller;
- (c) Principal Project Company shall provide adequate and appropriate work space for City or its representative(s) to conduct audits;
- (d) Principal Project Company shall: allow auditor(s) access to such Books and Records during normal business hours; provide to City copies thereof, in any physical and/or digital medium, as and when reasonably requested by City; allow interviews of any employee who might have information related to such Books and Records; and otherwise cooperate with the auditors including furnishing a management representation letter upon request of the auditor; and
- (e) Principal Project Company shall cause each Contract to include a similar right of City to audit records and interview staff of the Contractor, and a similar covenant to cooperate with the auditors.

The foregoing shall not be deemed to waive the right of Principal Project Company or Contractor to have counsel or other appropriate representatives present at the interview.

**21.2.3** If any City audit results in a material correction to the Books and Records, as determined by City in its reasonable discretion, Principal Project Company shall pay the reasonable costs of City in conducting the audit, but if not, City will bear the costs of the audit.

**21.2.4** Failure of Principal Project Company, Contractors or their agents to maintain and retain sufficient Books and Records to allow the auditors to verify all or a portion of a Claim or to permit the auditor access to its Books and Records to verify a Claim shall be sufficient basis for City to deny recovery by Principal Project Company of the Claim to the extent of such failure.

**21.2.5** Full compliance by Principal Project Company with the provisions of Section 21.2 (Audits) is a contractual condition precedent to Principal Project Company's right to seek relief on a Claim.

**21.2.6** City's rights of audit include the right to observe the business operations of Principal Project Company and its Contractors to confirm the accuracy of Books and Records.

**21.2.7** Principal Project Company shall include in the Project Management Plan internal procedures to facilitate review and audit by City and, if applicable, City representatives and the City's Controller or their employees and consultants.

**21.2.8** Principal Project Company represents and warrants the completeness and accuracy of all information it or its agents provides in connection with City audits, and shall cause all Contractors to represent and warrant the completeness and accuracy of all information such Contractors provide in connection with City audits.

**21.2.9** Principal Project Company's internal and Third Party quality and compliance auditing responsibilities shall be identified in the Project Management Plan, in accordance with Section 1.4 of Division 1 of the Technical Requirements and other related provisions concerning QA and compliance auditing.

**21.2.10** Nothing in the Contract Documents shall in any way limit the constitutional and statutory powers, duties and rights of elected officials, including the independent rights of the City's Controller, in carrying out his or her legal authority.

### **21.3 Public Records Act and San Francisco Sunshine Ordinance**

**21.3.1** Principal Project Company acknowledges and agrees that all Submittals, records, documents, drawings, plans, specifications and other materials in City's possession, including any Books and Records submitted by Principal Project Company to City, may be considered public information subject to disclosure under the California Public Records Act (the "PRA") and San Francisco Sunshine Ordinance.

**21.3.2** If Principal Project Company believes any Books and Records submitted to City constitute trade secrets, proprietary information or other information that is not subject to or excepted from disclosure under the PRA, Principal Project Company shall be solely responsible for specifically and conspicuously designating that information by placing "CONFIDENTIAL" in the center header of each such page affected, as it determines to be appropriate. Any such designation of trade secret or other basis for exemption shall be accompanied by a concise statement of reasons supporting the claim including the specific Law that authorizes the exemption from disclosure under the PRA.

**21.3.3** If City receives a request for public disclosure of information or materials that have been designated by Principal Project Company as "CONFIDENTIAL," City will use reasonable efforts to provide Notice to Principal Project Company of the request and may request advice from City's counsel before disclosing any such documents in accordance with applicable Law. Principal Project Company shall then have the opportunity to either consent to the disclosure or assert its basis for non-disclosure and claimed exception under the PRA or other applicable Law to City within the time period specified in the Notice issued by City (if any) and before the deadlines for release in the PRA and other applicable Law. However, it is the responsibility of

Principal Project Company to monitor requests for disclosure and proceedings and make timely filings. City may make filings of its own concerning possible disclosure; however, City is under no obligation to support Principal Project Company's positions. By entering into this Agreement, Principal Project Company consents to, and expressly waives any right to contest, provision by City to City's counsel of all, or representative samples of, information or materials designated as "CONFIDENTIAL" by Principal Project Company, in accordance with the PRA. City shall have no responsibility or obligation for a failure of Principal Project Company to respond or to respond timely to any request for disclosure of information or materials designated as "CONFIDENTIAL" by Principal Project Company, in accordance with the PRA, and City shall not be required to wait for a response before making a disclosure or otherwise taking action under the PRA or other applicable Law. Under no circumstances will City be responsible or liable to Principal Project Company or any other party as a result of disclosing any such materials, including materials marked "CONFIDENTIAL", whether the disclosure is deemed required by Law or by an order of court or City's general counsel or occurs through inadvertence, mistake or negligence on the part of City or its officers, employees, contractors or consultants.

**21.3.4** Nothing contained in this Section 21.3 (Public Records Act and San Francisco Sunshine Ordinance) shall modify or amend requirements and obligations imposed on City by the PRA or other applicable Law, and the provisions of the PRA or other Laws shall control to the extent of a conflict between the procedures under this Agreement and applicable Law. City will not advise a submitting party or Principal Project Company as to the nature or content of documents entitled to protection from disclosure under the PRA or other applicable Laws, as to the interpretation of such Laws, or as to definition of trade secret. Principal Project Company is advised to contact its own legal counsel concerning the effect of applicable Laws to Principal Project Company's Books and Records and actions to be taken to preserve confidentiality.

**21.3.5** In the event of any proceeding or litigation concerning the disclosure of any Books and Records to Third Parties, City's sole involvement will be as a stakeholder retaining the material until otherwise ordered by a court or other authority having jurisdiction. Principal Project Company shall be responsible for prosecuting or defending any action, acting on its own behalf, concerning such materials at its sole expense and risk; provided, however, that City may intervene or participate in the litigation in such manner as it deems necessary or desirable. Principal Project Company shall indemnify and hold harmless Indemnitees from and against any and all claims, causes of action, suits, legal or administrative proceedings, damages, losses, liabilities, response costs, costs and expenses, including any injury to or death of persons or damage to or loss of property (including damage to utility facilities), and including attorneys' and expert witness fees and costs, arising out of, relating to or resulting from City's refusal to disclose any material that Principal Project Company has designated as a trade secret.

## **21.4 Intellectual Property**

### **21.4.1 Developed IP**

**21.4.1.1** Principal Project Company acknowledges and agrees that all Developed IP, in any medium, is either owned by City or specially ordered or commissioned by City, including works made for hire pursuant to 17 U.S.C. § 101 (the U.S. Copyright Act of 1976), and shall be owned by City upon authorship, creation, development or invention. Principal Project Company hereby assigns to City all rights, title and interest in and to the Developed IP including any and all Software, Work Product and designs. If any Developed IP is not the proper subject matter or is determined not to be a work-made-for-hire pursuant to the U.S. Copyright Act, Principal Project

Company hereby assigns, and shall cause all PPC-Related Entities to assign, to City all rights, title and interest in and to the Developed IP including any deliverable. Principal Project Company agrees to execute, and shall cause all PPC-Related Entities to execute, such further documents and to do such further acts as may be necessary to perfect, register, or enforce City's ownership of such rights, in whole or in part. If any PPC-Related Entity fails or refuses to execute any such documents, Principal Project Company, for itself and on behalf of any PPC-Related Entity, hereby appoints City as the necessary PPC-Related Entity's attorney-in-fact (this appointment is irrevocable and is coupled with an interest) to act on PPC-Related Entity's behalf and to execute such documents. Principal Project Company hereby forever waives and agrees never to assert, and shall cause any PPC-Related Entity to waive and never to assert, against City, its successors or licensees any and all "moral rights" (including claims based on 17 U.S.C. §§ 101-810 (the Copyright Act of 1976, as modified), specifically including 17 U.S.C. § 106A(a) (the Visual Artists Rights Act of 1990, "VARA")) that such PPC-Related Entity may have in any Intellectual Property or deliverable even after expiration or termination of this Agreement.

**21.4.1.2** All deliverables authored, created or developed under or for the purpose of this Agreement, the Work or the Project shall be owned by City immediately upon creation or generation, physically or digitally, and whether or not such deliverable and/or work product have been delivered to City under the terms of this Agreement.

**21.4.1.3** Principal Project Company shall deliver to City all deliverables and/or other work product authored, created or developed under or for the purpose of this Agreement (i) at time(s)/date(s) pursuant to this Agreement, or (ii) as soon as reasonably practicable after such creation or generation, but in no event later than the effective date of termination of this Agreement.

#### **21.4.2 Principal Project Company IP**

**21.4.2.1** Principal Project Company hereby grants to City an irrevocable, perpetual, non-exclusive, transferable (solely to a permitted City's assignee), fully paid-up right and license to use, execute, perform, sublicense, exploit, manufacture, distribute, reproduce, adapt, display, and prepare derivative works ("**Base License Rights**") of Principal Project Company IP in connection with the Work or the Project. The rights granted herein shall survive the termination, expiration or cancellation of this Agreement or any rights related thereto.

**21.4.2.2** Principal Project Company shall identify and disclose to City all Principal Project Company IP required by, incorporated in, or combined with the Work or the Project.

#### **21.4.3 Third Party IP**

**21.4.3.1** Principal Project Company shall use commercially reasonable efforts to secure Base License Rights in the name of City to license Third Party IP in connection with the Project or Work, and shall pay any and all royalties and license fees required to be paid for any Intellectual Property required by, incorporated in, or combined with the Project IP.

**21.4.3.2** Subject to Section 21.4.3.3, if the owner of Third Party IP refuses to grant Base License Rights pursuant to Section 21.4.3.1, Principal Project Company shall:

- (a) obtain City's prior written approval, which shall not to be unreasonably withheld, of the terms and conditions of Third Party IP licenses;

- 
- (b) identify and disclose to City all Third Party IP required by, incorporated in, or combined with the Project IP; and
  - (c) obtain from each owner of the Third Party IP prior consent to have the relevant Third Party IP deposited into an IP Escrow in accordance with Section 21.5 (Intellectual Property Escrows), or, to the extent the owner of the relevant Third Party IP has not provided such consent, obtain City's prior written approval for a waiver of this requirement, not to be unreasonably withheld.

**21.4.3.3 COTS.** Only if the owner of Third Party IP refuses to grant Base License Rights pursuant to Section 21.4.3.1 and the subject Third Party IP is COTS, Principal Project Company shall secure license(s) in the name of City, based on commercially available terms for the COTS, including any standard end user license Contract. Principal Project Company shall provide (i) an outline of license deficiencies vs. Base License Rights and (ii) the identification of at least one (1) other COTS available for the same purpose, function or design. Principal Project Company shall identify and disclose to City all COTS required by, incorporated in, or combined with the Work and/or the Project.

#### **21.4.4 City IP and City Data**

**21.4.4.1** City hereby grants to PPC-Related Entities a limited, non-exclusive license to use, exploit, manufacture, distribute, reproduce, adapt and display the Project IP, City IP, and City Data, and any deliverable and/or other work product incorporating such Intellectual Property, solely in connection with and limited to the Allowed Uses. All rights not specifically granted in this Section 21.4.4.1 are reserved to City. For the avoidance of doubt, no rights to City trademarks, whether or not the subject of a trademark state or US application or registration, ("City Marks") are granted to Principal Project Company and Principal Project Company may not incorporate, refer to, or otherwise use City Marks for any marketing, promotional or advertising purposes.

**21.4.4.2** In addition to Principal Project Company's obligations and restrictions related to City Data in this Agreement, Principal Project Company acknowledges and agrees that all City Data, including the results or creation of any anonymization, de-identification, aggregation or other analysis of such City Data, whether physical or digital, is owned by City. Except as specifically provided in this Agreement, no PPC-Related Entity shall make use of City Data, including any anonymized, de-identified, or aggregated versions thereof, even if such use is for such PPC-Related Entity's internal use or analysis, whether or not commercial value is available or received, and/or such information or data is available in other, separate or cumulative sources.

**21.4.4.3** Notwithstanding any other term or condition of this Agreement, the rights and permissions granted under this Section 21.4.4 (City IP and City Data) shall terminate (i) upon the effective date of termination of this Agreement or (ii) upon 24-hour written Notice by City to Principal Project Company, whichever is earlier.

**21.4.4.4** Except as, and to the limited extent, required by applicable Laws, Principal Project Company shall keep and maintain, and shall cause all PPC-Related Entities to keep and maintain, all City IP and City Data strictly confidential. Before any release of any City IP or CTIP Data pursuant to applicable Laws, Principal Project Company must consult with City and the

City Attorney's Office regarding such release and obtain consent to such release. Any release shall be limited to the minimum required to satisfy the applicable Law.

#### **21.4.5 Delivery of IP Materials**

Principal Project Company shall deliver to City all IP Materials related to Principal Project Company IP and Third Party IP, or deposit such IP Materials into IP Escrow(s) in accordance with Section 21.5 (Intellectual Property Escrows), as soon as reasonably practicable following incorporation of the relevant Intellectual Property into the Project or Work.

#### **21.4.6 Payments Inclusive**

Principal Project Company acknowledges and agrees that the payments provided for in Article 11 (Payments to Principal Project Company) include all royalties, fees, costs and expenses arising from or related to the Project IP, including any fees pursuant to Section 21.5 (Intellectual Property Escrows).

### **21.5 Intellectual Property Escrows**

**21.5.1** City and Principal Project Company acknowledge that Principal Project Company or other PPC-Related Entities may deliver IP Materials pursuant to Section 21.4.5 (Delivery of IP Materials) that include Software, Source Code and Documentation or other Intellectual Property and may not wish to deliver the applicable IP Materials directly to City as public disclosure could deprive such Person of commercial value. Principal Project Company further acknowledges that City nevertheless must be ensured access to such IP Materials at any time, and must be assured that the IP Materials are delivered to City pursuant to Section 21.4.5 (Delivery of IP Materials).

**21.5.2** In lieu of delivering the IP Materials directly to City, Principal Project Company may elect to deposit the IP Materials with a neutral depository. In such event, City and Principal Project Company shall: (a) mutually select one or more escrow companies or other neutral depositories (each an "**IP Escrow Agent**") engaged in the business of receiving and maintaining escrows of software source code and/or other Intellectual Property; (b) establish one or more escrows (each an "**IP Escrow**") with the IP Escrow Agent on terms and conditions reasonably acceptable to City and Principal Project Company for the deposit, retention, upkeep, authentication, confirmation and release of IP Materials to City pursuant to this Agreement; (c) determine the date(s) for Principal Project Company's deposit of the IP Materials into the IP Escrow; and (d) determine a process for releasing from escrow the IP Materials to be delivered to City pursuant to this Agreement. IP Escrows also may include Affiliates as parties and may include deposit of their Intellectual Property. Principal Project Company shall be responsible for the fees and costs of the IP Escrow Agent(s).

**21.5.3** The IP Escrows shall survive expiration or earlier termination of this Agreement regardless of the reason.

**21.5.4** The IP Materials shall be released and delivered to City in any of the following circumstances:

- (a) this Agreement expires or is terminated prior to expiration for any reason;

- (b) voluntary or involuntary bankruptcy of Principal Project Company, PPC-Related Entity or the owner of Third Party IP, as to Principal Project Company IP or Third Party IP respectively; or
- (c) Principal Project Company, PPC-Related Entity or the owner of Third Party IP is dissolved or liquidated or otherwise ceases to engage in the ordinary course of the business of manufacturing, supplying, maintaining, and servicing the Software, product, part, or other item containing the relevant Intellectual Property.

## **21.6 City's Use of IP Materials**

**21.6.1** City may exercise all rights, including the Base License Rights, granted to City pursuant to Section 21.4 (Intellectual Property) for the purposes of the Project, including any subsequent expansion or additions, except that City's ownership or assigned rights pursuant to Section 21.4.1 (Developed IP) shall not be limited in any way, for any purpose. For the avoidance of doubt, City's rights include the right to sublicense any City rights to a future vendor. City's rights under this clause shall survive the termination, expiration or cancellation of this Agreement.

**21.6.2** City shall maintain the confidentiality of any IP Materials released pursuant to Section 21.5 (Intellectual Property Escrows) pursuant to Section 21.4 (Intellectual Property) and shall enter into a non-disclosure agreement with any third party to whom City, in its sole discretion, grants access to such IP Materials to the extent that such IP Materials contain Confidential Information.

---

## ARTICLE 22. ADVERTISING AND OTHER BUSINESS OPPORTUNITIES

### 22.1 Rights and Interests in the Project and Project Site

Principal Project Company's rights and interests in the Project and Project Site under this Agreement are limited to such rights and interests that are required for performing the Work and Principal Project Company's timely fulfillment of its obligations under the Contract Documents. Principal Project Company's rights and interests exclude any Airspace or other real property interest.

### 22.2 Advertising and Business Opportunities

22.2.1 City reserves all rights and opportunities concerning:

- (a) advertising on the Infrastructure Facility and, as between Principal Project Company and City, within the Project Site, including use of Infrastructure Facility physical assets for advertising purposes; and
- (b) entrepreneurial, commercial and business activities that are ancillary or collateral to the use and operation of the Infrastructure Facility and Project Site, whether developed or pursued by City or through others worldwide. The rights and opportunities reserved to City under this Section 22.2.1(b) include the rights described in Section 22.2.1(a) and any sponsorships, naming rights, etc. (collectively, "**Business Opportunities**").

22.2.2 Principal Project Company shall cooperate and, during the D&C Period, grant all necessary access to the Project Site to City and any Third Party designees, including tenants and vendors, authorized by City in connection with City's exercise of its rights relating to the Project Site and any advertising and Business Opportunities. During the IFM Period, Principal Project Company shall not interfere with access to the Infrastructure Facility by City and any Third Party designees, including tenants and vendors, authorized by City in connection with City's exercise of its rights relating to its operations at the Project Site and any advertising and Business Opportunities. Unless otherwise agreed to by the Parties, City shall be entitled to all revenues generated by business opportunities arising out of, relating to or resulting from the Infrastructure Facility or in the Project Site's Airspace, except rents paid by any Housing and Commercial Component tenants. Principal Project Company shall be compensated for reasonable costs and expenses incurred directly by Principal Project Company in installing and maintaining facilities for advertising or Business Opportunities (other than routine maintenance), through a Change Order.

22.2.3 Except as authorized by City, Principal Project Company shall not engage in, and shall not permit:

- (a) any advertising within the Project Site or within or on the exterior of the Infrastructure Facility;
- (b) use or occupation of the Project for any Business Opportunities; and

- (c) operation of any business at the Project Site or the Infrastructure Facility, including (i) the sale of products or services (including any newsstand or concession stand for the sale of food, beverages or gifts or other retail or rental services); or (ii) the sale or rental of any wire, cable, transmission or receiving device or any other utility on, or transmission or receipt of any electronic communication to or from, any part of the Project.

**22.2.4** Principal Project Company may request City to consider Business Opportunities. If City, in its sole discretion, consents, the Parties shall execute an amendment to the Contract Documents memorializing the agreement reached, including any agreement as to any revenue and cost attribution. Notwithstanding the foregoing, Principal Project Company shall be compensated pursuant to a City Change for Principal Project Company's reasonable costs and expenses that are directly attributable to implementation of such Business Opportunities (other than routine maintenance) as well as any support efforts the City Change requires Principal Project Company to provide.

**22.2.5** Unless expressly approved by City, Principal Project Company may not permit any Person to use or occupy the Project for any ancillary or collateral purpose.

### **22.3 Remedies**

If a PPC Default concerns a breach of the provisions of Section 22.2 (Advertising and Business Opportunities), then, in addition to any other remedies available to City under this Agreement or applicable Law, City shall be entitled to receive from Principal Project Company an amount equal to all profits from the prohibited activity, together with interest thereon at the Late Payment Rate from the date of collection until the date payment is made. In addition, City may require Principal Project Company to restore the Project Site and the Infrastructure Facility to its original condition or to transfer to City all of Principal Project Company's interest in the prohibited assets and improvements and revenues derived therefrom, or any combination of the foregoing.

## ARTICLE 23. MISCELLANEOUS

### 23.1 Standard for Approvals

In all cases where approvals, acceptances or consents are required to be provided by City or Principal Project Company hereunder, such approvals, acceptances or consents shall not be withheld unreasonably except in cases where a different standard (such as sole discretion) is specified. Any authorization by City shall be in writing. Any approval required by the SFMTA Board or Board of Supervisors will be at their respective sole discretion. In cases where sole discretion is specified, the decision shall not be subject to Contract Dispute Procedures hereunder.

### 23.2 Amendments

The Contract Documents may be amended only by a written instrument duly executed by or on behalf of the Parties, except to the extent expressly provided otherwise in this Agreement.

### 23.3 Waiver

**23.3.1** The failure of a Party to exercise or delay in exercising any right under this Agreement shall not:

- (a) constitute a waiver of such right or any other right under the Contract Documents; or
- (b) relieve the other Party from performance of its obligations under the Contract Documents except as otherwise provided in the Contract Documents.

**23.3.2** No waiver of any right under this Agreement shall be effective unless made in a writing duly executed by a duly authorized representative of the Party charged with the waiver.

**23.3.3** Any waiver under Section 23.3.2 shall be limited to the specific instance and shall not constitute a waiver of such right in the future or of any other right under this Agreement.

**23.3.4** If the Parties make and implement any interpretation of the Contract Documents without documenting such interpretation by an instrument in writing signed by both Parties, such interpretation and implementation thereof will not be binding in the event of any future Contract Disputes.

**23.3.5** No waiver of any right under this Agreement shall be deemed to have occurred as the result of any acceptance by City, any payment for or acceptance of the whole or any part of the Work, any extension of time, or any possession taken by City.

### 23.4 Independent Contractor; No Joint Venture or Partnership

**23.4.1** Principal Project Company is an independent contractor. Neither Principal Project Company nor any of its employees or agents is or shall be deemed to be an employee or agent of City, and in no event shall the relationship between City and Principal Project Company be construed as creating any relationship whatsoever between City and Principal Project Company's employees or agents. Except as otherwise provided in the Contract Documents,

Principal Project Company has sole authority and responsibility to employ, discharge and otherwise control its employees and has complete and sole responsibility as a principal for its agents, for all Contractors and for all other Persons that Principal Project Company or any Contractor hires to perform or assist in performing the Work.

**23.4.2** Nothing in the Contract Documents is intended or shall be construed to create any partnership, joint venture or similar relationship between City and Principal Project Company; and in no event shall either Party take a position in any tax return or other writing of any kind that a partnership, joint venture or similar relationship exists.

**23.4.3** Principal Project Company shall not have, or be deemed to have, power or authority to make any commitments on City's behalf or to execute agreements in the name of or on behalf of City. Principal Project Company shall not enter into any agreement with any Governmental Entity, Utility Owner, property owner or other Third Party having regulatory jurisdiction over any aspect of the Project or Work or having any property interest affected by the Project or the Work that in any way purports to obligate City, or states or implies that City has an obligation to the Third Party, to undertake any activity, unless City otherwise approves.

### **23.5 Successors and Assigns**

The Contract Documents shall be binding upon and inure to the benefit of City and Principal Project Company and each of their permitted successors, assigns and legal representatives.

### **23.6 Designation of Representatives; Cooperation with Representatives**

**23.6.1** City and Principal Project Company shall each designate an individual or individuals who shall be authorized to make decisions and bind the Parties on matters relating to the Contract Documents. Exhibit 10 (Initial Designation of Authorized Representatives) provides the initial Authorized Representative designations. A Party may change such designations by written Notice in accordance with Section 23.10 (Notices and Communications).

**23.6.2** Principal Project Company shall cooperate with City and all representatives of City designated as described above in performance of their obligations under the Contract Documents.

### **23.7 Survival**

The following provisions shall survive the expiration or earlier termination of this Agreement and/or the completion of the Work:

- (a) Principal Project Company's and City's representations and warranties;
- (b) the Contract Dispute Procedures;
- (c) the indemnifications, limitations and releases contained in Section 10.6 (Indemnities);
- (d) the limitations on remedies contained in Section 16.6 (Limitation on Consequential Damages);

- (e) the express obligations of the Parties following termination (including those in Articles 17 (Termination) and 20 (Assignment and Transfer);
- (f) the Direct Agreement); and
- (g) all other provisions which by their inherent character should survive expiration or earlier termination of this Agreement and/or completion of the Work.

### **23.8 Limitation on Third Party Beneficiaries**

Except to the extent that specific provisions (such as the warranty and indemnity provisions, and the provisions for the protection of certain Lenders under any Direct Agreement) identify Third Parties and state that they are entitled to benefits, (a) it is not intended by any of the provisions of the Contract Documents to create any third party beneficiary to this Agreement or to authorize anyone not a Party to maintain a suit for personal injury or property damage under this Agreement, and (b) the duties, obligations and responsibilities of the Parties with respect to third parties shall remain as imposed by Law. The Contract Documents shall not be construed to create a contractual relationship of any kind between City and a Contractor or any Person other than Principal Project Company.

### **23.9 Governing Law; Venue**

The Contract Documents shall be governed by and construed in accordance with the laws of the State, any applicable federal law, the San Francisco City Charter and Municipal Code, and the ordinances, regulations, codes, and Executive Orders enacted and/or promulgated pursuant thereto. The venue for any litigation arising from a Contract Dispute shall be in San Francisco, California to the extent that a court located in San Francisco has subject matter jurisdiction.

### **23.10 Notices and Communications**

**23.10.1** All notices, requests, demands, instructions, certificates, consents, explanations, agreements, approvals and other communications (each being a “**Notice**”) required or permitted under this Agreement must be in writing (whether or not “written notice” or “notice in writing” is specifically required by the applicable provision of this Agreement) and (a) delivered in person, (b) sent by commercial courier, next business day delivery requested, or (c) by registered, certified mail or express mail, return receipt requested, with postage prepaid, to the mailing addresses below. All Notices under this Agreement will be deemed given, received, made or communicated on the date personal receipt actually occurs or, if mailed, on the delivery date or attempted delivery date shown on the return receipt. For the convenience of the Parties, copies of Notices may also be given by email to the email address given below but the emailed copy will not be binding on either Party.

**23.10.2** The effective time of a Notice will not be affected by the receipt of the email copy of the Notice.

**23.10.3** Any mailing address, or email address, may be changed at any time by giving written Notice of the change in the manner provided above at least ten (10) days before the effective date of the change.

- 
- (a) All Notices to Principal Project Company shall be delivered to the following address or as otherwise directed by Principal Project Company's Authorized Representative:
- 

\_\_\_\_\_  
c/o \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
Attention: \_\_\_\_\_  
Telephone: \_\_\_\_\_  
E-mail: \_\_\_\_\_

- (b) All Notices to City shall be marked as regarding the Project and shall be delivered to the following address or as otherwise directed by City's Authorized Representative:

San Francisco Municipal Transportation Agency  
1 South Van Ness, 8th Floor  
San Francisco, CA 94103  
Attn: Chris Lazaro  
Email: [Chris.Lazaro@sfmta.com](mailto:Chris.Lazaro@sfmta.com)

With a copy to: Office of the City Attorney  
City Hall, Room 234  
1 Dr. Carlton B. Goodlett Place  
San Francisco, California 94102-4682  
Attn: Real Estate & Finance Group  
Re: Potrero Yard Modernization Project  
[Email: isidro.jimenez@sfcityatty.org](mailto:isidro.jimenez@sfcityatty.org)

**23.10.4** Any technical or other communications pertaining to the Work shall be conducted by Principal Project Company's Authorized Representative and City's Authorized Representative.

**23.10.5** Principal Project Company shall promptly provide to City a copy of each communication received from any Lender relating to any default or event of default under any Financing Agreement or Security Document.

### **23.11 Severability**

**23.11.1** If any provision or part of the Contract Documents is ruled invalid (including invalidity due to any statutory change or other change in Law) by a court having proper jurisdiction, then the Parties shall: (a) promptly meet and negotiate a substitute for such provision or part, which shall, to the greatest extent legally permissible, effect the original intent of the Parties, including an equitable adjustment to the Financial Model Update (or, if there has been no Update, the original Financial Model) and Principal Project Company's compensation to account for any change in the Work resulting from such invalidated portion; and (b) if necessary or desirable, apply to the court or other decision maker (as applicable) which declared such invalidity for an interpretation of the invalidated portion to guide the negotiations. The invalidity or

unenforceability of any such provision or part shall not affect the validity or enforceability of the balance of the Contract Documents, which shall be construed and enforced as if the Contract Documents did not contain such invalid or unenforceable provision or part.

**23.11.2** If after the efforts required by Section 23.11.1, no interpretation or reformation of the Contract Documents can reasonably be adopted that will return the Parties to the benefits of their original bargain, then the court order shall be treated as a Termination Due to Court Ruling under Section 17.4.3 (Termination Due to Court Ruling).

## **23.12 Construction and Interpretation of Agreement**

**23.12.1** The Contract Documents shall be construed simply, as a whole and in accordance with the fair meaning of the language used and not strictly for or against any Party.

**23.12.2** The Parties acknowledge and agree that: (a) the Contract Documents are the product of an extensive and thorough, arm's-length exchange of ideas, questions, answers, information and drafts during the Implementation Proposal preparation process; (b) each Party has been given the opportunity to independently review the Contract Documents with legal counsel; and (c) each Party has the requisite experience and sophistication to negotiate, understand, interpret and agree to the particular language of the provisions of the Contract Documents. Accordingly, in the event of a conflict, ambiguity or inconsistency in or Contract Dispute regarding the interpretation of the Contract Documents, the Contract Documents shall not be interpreted or construed against the Party preparing it, and instead the Contract Dispute resolver shall consult other customary rules of interpretation and construction.

**23.12.3** City's final answers to the questions posed during the Implementation Proposal preparation process for the Contract Documents shall in no event be deemed part of the Contract Documents and shall not be relevant in interpreting the Contract Documents except as they may clarify provisions otherwise considered ambiguous.

**23.12.4** The captions of the articles, sections and subsections in the Contract Documents are for convenience only and are not to be treated or construed as part of this Agreement.

**23.12.5** Unless otherwise expressly stated in the Contract Documents, words that have well-known technical or construction industry meanings are used in the Contract Documents in accordance with such recognized meaning.

**23.12.6** Wherever the word "including", "includes" or "include" is used in the Contract Documents, it is deemed to be followed by the words "without limitation." Wherever reference is made in the Contract Documents to a particular Governmental Entity, it includes any public agency succeeding to the powers and authority of such Governmental Entity.

**23.12.7** References to "days" contained in the Contract Documents shall mean calendar days unless otherwise stated.

**23.12.8** Subject to Section 23.12.9, if the day on or by which any thing is to be done in accordance with this Agreement is not a Business Day, that thing must be done on the next Business Day.

**23.12.9** If the Contract Documents require action to be taken in the event of an emergency and otherwise where it is clear that performance is intended to occur on a non-Business Day, Principal Project Company shall be required to perform such obligations, even though the date in question may fall on a non-Business Day.

**23.12.10** As used in this Agreement and as the context may require, the singular includes the plural and vice versa, and the masculine gender includes the feminine and vice versa.

**23.12.11** All monetary amounts and obligations in the Contract Documents are expressed and payable in U.S. dollars.

**23.12.12** Each party must perform its obligations in accordance with this Agreement at its own cost, unless expressly provided otherwise.

**23.12.13** If this Agreement requires calculation of an amount payable to a party there must be no double counting in calculating that amount.

### **23.13 Further Assurances**

Each Party shall promptly execute and deliver to the other Party all such instruments and other documents and assurances as are reasonably requested by the second Party to further evidence its obligations hereunder, including, specifically with respect to Principal Project Company, assurances regarding the validity of (a) the assignments of Contracts contained herein, and (b) any instruments securing performance hereof.

### **23.14 Entire Agreement**

City and Principal Project Company agree and expressly intend for the Contract Documents to constitute a single, non-severable, integrated agreement whose terms are interdependent and non-divisible. The Contract Documents contain the entire understanding of the Parties with respect to the subject matter of this Agreement and supersede all prior agreements, understandings, statements, representations and negotiations, in each case oral or written, between the Parties with respect to the subject matter of this Agreement.

### **23.15 Counterparts**

This instrument may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the date first written above.

**1 Year Scheduled Maintenance Plan** means detailed schedule, which highlights IFM Services activities that may impact SFMTA O&M Services, identifies implications and provides plans on how the potential impact will be mitigated or eliminated, prepared and submitted by Principal Project Company in accordance with Section C.6.7.1 of the IFM Specifications, as updated and approved by the City in accordance with this Agreement.

**24/7/365(6)** means 24 hours per day 7 days per week, 365(6) days per year.

**5 Year Scheduled Maintenance Plan** means detailed schedule, which identifies all major IFM Services activities that may impact SFMTA O&M Services, prepared and submitted by Principal Project Company in accordance with Section C.6.7.2 of the IFM Specifications, as updated and approved by the City in accordance with this Agreement.

**Access Date** has the meaning set forth in Section 2.2 (Right of Entry).

**Accessibility Condition** means a state or condition of the relevant Functional Unit or the means of access to it which allows all persons who are entitled to enter, occupy or use the

relevant Functional Unit to enter and leave the Functional Unit safely and conveniently and using normal access routes.

**Account Balances** means all amounts standing to the credit of any bank account held by or on behalf of Principal Project Company (excluding the Handback Requirements Reserve Account), or the value of any letter of credit issued in lieu of any bank account held or required to be held by or on behalf of Principal Project Company (excluding the Handback Requirements Reserve Account), at the Early Termination Date.

**Actual Insurance Policy(ies)** has the meaning set forth in Section 10.1.3(b)(ii).

**Actual Insurance Premiums** has the meaning set forth in Section 10.1.3(e)(i).

**Actual Knowledge** means (i) as to Principal Project Company, facts and information actually known to Principal Project Company or Principal Project Company's Authorized Representative (in each case, as applicable), after reasonable consultation with other personnel of each PPC-Related Entity that are involved with the performance of the Work or this Agreement, as applicable; and (ii) as to City, City's Authorized Representative, facts and information actually known to City's Authorized Representative.

**Additional Property(ies)** has the meaning set forth in Section 7.5.1.2.

**Adhoc Services** means services which, in accordance with the IFM Specifications, City is entitled to require Principal Project Company to provide but where Principal Project Company's obligation to provide those services does not arise unless and until it is requested to do so by City.

**Adjusted Annual Energy Target** or **AAET** means the Annual Energy Target in any Contract Year after adjusting pursuant to Section 3.2.1 of Exhibit 12.

**Adverse Event** means:

- (a) an Affordability Event, with the understanding that an Affordability Event occurring before the Effective Date shall be deemed to occur the day after the Effective Date;
- (b) either or both of the CEQA Approval or the NEPA Approval is invalidated for a reason other than PPC Fault;
- (c) a temporary restraining order, injunction or other form of legal order by a court prohibiting City or Principal Project Company from performing any of their respective material obligations under this Agreement or materially delaying the critical path;
- (d) the occurrence of exceptional circumstances in the financial markets in one or more of Europe, the United States of America, Japan/Asia Pacific and Canada that, in City's opinion determined in City's reasonable discretion, (i) results in material and substantial cessation of lending activity in national or relevant international capital or interbank markets and (ii) adversely affects access by Principal Project Company to such markets preventing Financial Close by the Scheduled Financial Close Date;

- 
- (e) any action, litigation or proceeding pending against City or affecting the Project, which, in each case, has a material likelihood of success and if determined adversely would have the effect of (i) preventing Financial Close; or (ii) prohibiting or materially impairing City from performing any of its material obligations under the Principal Project Documents;
  - (f) a downgrade to City's credit rating by a Rating Agency that has a material negative impact on the credit rating of any bond financing included in the Finance Plan when compared to the indicative investment grade rating(s) of such bonds included in the Finance Plan as of the Effective Date;
  - (g) the approval of this Agreement by the SFMTA Board or the Board of Supervisors is invalidated for any reason other than PPC Fault;
  - (h) failure of City to timely provide the deliverables set forth in Section 3.2.2 (City Deliverables);
  - (i) any event set forth in clauses (b), (e)-(f), (h), (l)-(m), (o), and (s)-(t) of the definition of Compensable Delay Event; or
  - (j) any event set forth in clauses (a)-(h) of the definition of "Force Majeure Event".

**Adverse Event Notice** has the meaning set forth in Section 3.4.2.

**Adverse Weather** means heavy rain, windstorm, flood, or any severe atmospheric condition that: (i) occurs at the Project Site during the D&C Period; and (ii) prevents Principal Project Company from proceeding with at least 75 percent of the scheduled labor, material, and equipment resources for at least five hours per Day on activities shown in the Critical Path on the Project Schedule).

**Adverse Weather Event** means Adverse Weather that exceeds the anticipated number of Days of Adverse Weather specified per year in Section 14.1.8 (Relief for Adverse Weather Event).

**Affiliate** means:

- (a) any Equity Member;
- (b) any Person which directly or indirectly through one or more intermediaries controls, or is controlled by, or is under common control with, Principal Project Company or any Equity Member; and
- (c) any Person owned in whole or in part by (i) Principal Project Company, (ii) any Equity Member or (iii) any Affiliate of Principal Project Company under clause (b) of this definition, whether the ownership interest is direct or indirect, beneficial or of record, provided that ownership of less than 10% of the equity interest in a Person shall not give rise to Affiliate status.

For purposes of this definition, the term "control" means the possession, directly or indirectly, of the power to cause the direction of the management of a Person, whether through voting rights or securities, by contract, family relationship or otherwise.

**Affordability Event** means the occurrence of a fluctuation in the Base Interest Rates and/or Baseline Credit Spreads during the Bank Debt Rate Protection Period or Bond Rate Protection Period that results, or in the good faith opinion of City is likely to result, in an increase to the Base Capital MaxAP of 10% or greater.

**Aggregate Actual Consumption** means the actual consumption of all Energy at the Infrastructure Facility, as invoiced by the relevant Utility companies for each Contract Year.

**Agreement** means the Design-Build-Finance-Operate-Maintain Agreement to which this **Exhibit 1** (Abbreviations and Definitions) is attached, including all exhibits, appendices and attachments, as such agreement may be modified from time to time.

**Airspace** means any and all real property, including the surface of the ground, within the vertical column extending above and below the surface boundaries of the Project Site and not necessary or required for the Infrastructure Facility (including Upgrades) or developing, permitting, designing, financing, constructing, installing, equipping, operating, maintaining, repairing, reconstructing, restoring, rehabilitating, renewing or replacing the Infrastructure Facility (including Upgrades) or Principal Project Company's timely fulfillment of its obligations under the Contract Documents. If the Project Site is a separate legal parcel with specific vertical limits, then the Airspace shall only mean the area within those vertical limits.

**Allowance** means the Office/Admin and Training Spaces FF&E Allowance, the City-Furnished IT/Comms Allowance and the Partnering Allowance, and **Allowances** means all of them as the context requires.

**Annual Energy Target** or **AET** means the targeted consumption of Energy in any Contract Year in respect of the Regulated Load, and, for clarity, does not include Non-Regulated Load consumption. Metered, Non-Regulated Load consumption shall be included for reference only.

**Annual Energy Review Meeting** has the meaning set forth in **Section 4.3** of **Exhibit 12**.

**Annual Service Plan** means the plan prepared and submitted by Principal Project Company that provides, at a minimum, the required items listed in **Section B.5.1** of the IFM Specifications, as updated and approved by the City in accordance with this Agreement.

**Annual Vandalism Deductible** has the meaning set forth in **Section 8.3.4**.

**Applicable Law and Standards** means applicable Law, all applicable Standards and Specifications, manufacturers' recommended maintenance and operations activities and maintenance and operations activities that would normally be undertaken in accordance with Good Industry Practices.

**As-Built Documents** means, collectively, the documents referred to in **Section 1.6.3** of **Division 1** of the Technical Requirements, as well as the following items referred to in **Division 1** of the Technical Requirements: As-Built Schedule, As-Built Drawings, and LOD 500 As-Built Model (**Section 1.10.1.2**).

**As-Built Drawings** means, revised sets of drawings submitted to reflect any changes made during the construction process, depicting the actual conditions, dimensions, and locations of installed elements as opposed to the originally planned design.

---

**As-Built Schedule** means has the meaning set forth in Section 1.2.5 of Division 1 of the technical Requirements.

**As-Built Schedule Analysis** has the meaning set forth in Section 18.3.5 (Additional Requirements for Contract Disputes Relating to Delay Events Impacting the Critical Path).

**Authority(ies) Having Jurisdiction** means an organization, including City acting in its regulatory capacity, office or individual responsible for enforcing the requirements of a code or standard, or for approving equipment, materials, an installation, or a procedure. The term “Authorities Having Jurisdiction” refers to more than one such organization, office or individual.

**Authorized Representative** means the authorized representative for either Party identified in Exhibit 10 (Initial Designation of Authorized Representatives) or otherwise designated in accordance with this Agreement.

**Availability Condition** means any of (i) the Accessibility Condition, (ii) the Safety Condition or (iii) the Use Condition.

**Availability Deduction** means a Deduction from an Availability Payment as a result of Functional Unit or Functional Component being deemed Unavailable.

**Availability Failure** means an IFM Failure Event which has not been Rectified within the relevant Rectification Time and which causes a Functional Unit to be Unavailable. For the avoidance of doubt, an Availability Failure may be applied to one or more Functional Components.

**Availability Failure Deduction** means a deduction from the Availability Payment as a result of an Availability Failure.

**Availability Payment** means the payments to be made by City to Principal Project Company under Section 11.2 (Availability Payments), determined on an annual basis in accordance with Exhibit 4B (Availability Payment Mechanism) and payable quarterly.

**Bank Debt** means any debt financing, other than Bond Financing, provided by a bank or similar financial institution.

**Bank Debt Pricing Date** means with respect to any Bank Debt proposed in the Finance Plan, the earliest to occur of:

- (a) the date of Financial Close;
- (b) the date at which the Bank Debt is fixed or hedged by Principal Project Company; and
- (c) such other date as is mutually agreed to by Principal Project Company and City.

**Bank Debt Rate Protection Period** means the period beginning at 3:00 p.m. Pacific Time on [●], 2025 and ending on, with respect to any Bank Debt, the Bank Debt Pricing Date.

**Bankruptcy Event** means any of the following events:

(a) a receiver, receiver manager or other encumbrance holder taking possession of or being appointed over, or any distress, execution or other process being levied or enforced upon, the whole or any material part of the assets of an entity;

(b) any proceedings with respect to the entity being commenced under the Bankruptcy Law and if such proceedings are commenced against and are disputed by the entity, such proceedings are not discontinued, withdrawn, dismissed or otherwise remedied within 60 days of such proceedings being instituted;

(c) the entity making an assignment for the benefit of its creditors, being declared bankrupt or committing an act of bankruptcy, becoming insolvent, making a proposal or otherwise taking advantage of provisions for relief under the Bankruptcy Law or similar legislation in any jurisdiction, or any other type of insolvency proceedings being commenced by or against the entity under the Bankruptcy Law or otherwise and, if proceedings are commenced against the entity and are disputed by the entity, such proceedings are not stayed, dismissed or otherwise remedied within 60 days of such proceedings being instituted;

(d) in any voluntary or involuntary case seeking liquidation, reorganization or other relief with respect to the entity or its debts under any bankruptcy Law or foreign bankruptcy, insolvency or other similar law now or hereafter in effect, this Agreement or any of the other Contract Documents is rejected, including a rejection under 11 U.S.C. § 365 or any successor statute; or

(e) the entity ceasing to carry on business.

**Bankruptcy Law** means the United States Bankruptcy Code, 11 U.S.C. §§ 101 *et seq.* as amended from time to time and any successor statute thereto. “Bankruptcy Law” also includes any similar state law relating to bankruptcy, insolvency, the rights and remedies of creditors, the appointment of receivers or the liquidation of companies and estates that are unable to pay their debts when due.

**Base Capital MaxAP** means, initially, [●], which is the Base Capital MaxAP reflected in the Financial Model for the first Contract Year, as adjusted from time to time in accordance with this Agreement.

**Base Case Financial Model** means the Financial Model as approved by the Parties as of the Effective Date.

**Base IFM MaxAP** means, initially, [●], which is the Base IFM MaxAP reflected in the Financial Model for the first Contract Year, as adjusted from time to time in accordance with this Agreement.

**Base Interest Rate** means the publicly-documented interest rates of each maturity included in the following indices:

- (a) [●];
- (b) [●];
- (c) [●].

The Base Interest Rates do not include any additional credit spread, margin or fee components.

**Baseline Credit Spreads** means the set of credit spreads issued by City that assumes different coupons for the range of maturities, ratings and types of Bond Financings that will serve as the basis for the Credit Spread Risk Mitigation.

**Basis of Design Report (BODR)** means the report described in Section 1.8.5.2.3 of Division 1 of the Technical Requirements, concerning design methodology and approach for the D&C Work, key assumptions and operations and maintenance design methodology.

**Bedding-In Period** means the three-month period following the Substantial Completion Date.

**Benchmarking Date** has the meaning set forth in Section 10.1.3(b).

**Best Management Practices (BMP)** has the meaning set forth in Storm Water Management For Construction Activities: Developing Pollution Prevention Plans and Best Management Practices (EPA Document 832 R 92-005).

**BIM Project Execution Plan** means Principal Project Company's plan describing BIM-enabled workflows and systems to successfully deliver, design, construct, operate, and maintain the Project, prepared and submitted by Principal Project Company in accordance with Section 1.10.2 of Division 1 of the Technical Requirements, as updated and approved by the City in accordance with this Agreement.

**Board of Supervisors** means the Board of Supervisors of the City and County of San Francisco.

**Bond Financing** means any debt financing comprising of bonds, which includes tax-exempt bonds issued by a Conduit Issuer or taxable capital market instruments.

**Bond Pricing Date** means with respect to any Bond Financing proposed in the Finance Plan, the earliest to occur of (a) the date of Financial Close, (b) the date at which any Bond Financing is priced, and (c) the date at which any Bond Financing is fixed or hedged.

**Bond Rate Protection Period** means the period beginning at 3:00 p.m. Pacific Time on [●], 2025 and ending on, with respect to any Bond Financing, the Bond Pricing Date.

**Books and Records** means any and all documents, books, records, papers, or other information of any PPC-Related Entity or Affiliate relating to the Project, the Work, the PPC-Furnished FF&E and the Project Site, including (a) all design and construction documents, and all operations and maintenance documents (including drawings, specifications, Submittals, Contracts, invoices, schedules, meeting minutes, budgets, forecasts, requests for change proposals, change responses, change requests, plans (including the Project Management Plan), reports and manuals), (b) daily time sheets and supervisor's daily reports, union agreements, insurance, welfare and benefits records, payroll registers, earning records, payroll tax forms, invoices and requisitions, equipment records, payment certificates, cancelled checks, job cost reports, job payroll ledges, general ledger, cash disbursement journal; (c) income statements, balance sheets, statements of cash flow and changes in financial position, details regarding operating income, expenses, capital expenditures and budgeted operating results; (d) all budgets, certificates, claims, correspondence, data (including test data), documents, expert

---

analyses, facts, files, information, investigations, materials, notices, plans, projections, proposals, records, reports, requests, samples, schedules, settlements, statements, studies, surveys, tests, test results, vehicular traffic information, operational information analyzed, categorized, characterized, created, collected, generated, maintained, processed, produced, prepared, provided, recorded, stored or used by Principal Project Company or its Contractors or any of their representatives in connection with the Project, (e) the Base Case Financial Model, Financial Model, subsequent Financial Model Updates and Financial Modeling Data, (f) records of the expenditure and investment of the Milestone Payment including records identifying expenditures for D&C Work and debt service payments, and (g) with respect to all of the above, any information that is stored electronically or on computer-related media (in its original source and not converted to PDF or other format). For purposes of the requirements of the Contract Documents to maintain Books and Records, the term “Books and Records” includes documents or information that are subject to the attorney-client privilege, but for purposes of requirements of the Contract Documents to provide access to Books and Records, the term specifically excludes the disclosure by any Party of Books and Records that are protected by the attorney-client or other legal privilege based upon an opinion of counsel reasonably satisfactory to the other Party.

**Breakage Costs** means any commercially reasonable prepayment premiums or penalties (including documented SOFR breakage fees, customary and reasonable trustee, Collateral Agent and Lender fees but excluding any fees related to legal or other consulting costs), make-whole payments or other prepayment amounts, including costs of early termination of interest rate and inflation rate hedging, swap, collar or cap arrangements, payable by or on behalf of, or credited against payments owing to, Principal Project Company, under any Financing Agreement or Security Document or otherwise as a result of the payment (including prepayment), redemption or acceleration of all or any portion of the principal amount of Project Debt prior to its scheduled payment date (less any breakage benefits), excluding, however, any such amounts included in the principal amount of any Refinancing. The term “Breakage Costs” excludes any such premiums, penalties, payments or other amounts relating to Equity Member Debt.

**Building Automation System** or **BAS** means the computer-based control system installed in buildings that controls, monitors and integrates the buildings’ systems, including HVAC, lighting, security, fire alarm and elevator control. The BAS controls building environmental conditions including temperature, humidity, CO2, illumination, heating and cooling and air flow distribution.

**Building Occupant(s)** means City Personnel, City Parties, Visitors, PPC-Related Entities and third party members of the public lawfully present on or using the Infrastructure Facility including, or each of them as the context requires.

**Buildings Cost Index (BCI)** means the “Buildings Cost Index” in San Francisco, as published by Engineering News-Record. If the BCI is discontinued or substantially altered, a suitable replacement will be determined by the Parties in accordance with general market practice at the time.

**Bus Yard Component** means the Facility’s transit component, which (a) will include the spaces needed for City’s operation and maintenance activities at the Facility after Substantial Completion of the Infrastructure Facility, (b) must meet the Bus Yard Component criteria in the Technical Requirements except as otherwise approved by City in writing, which approval shall be at its sole discretion, and (c) is not Common Infrastructure. The Bus Yard Component is

---

generally described in the “Project Description” included in Division 1 of the Technical Requirements.

**Business Day** means any weekday (i.e., Monday through Friday) except for those weekdays on which (a) City is officially closed for business or (b) banks are not required or authorized by Law to be open in the State.

**Business Opportunity(ies)** has the meaning set forth in Section 22.2.1(b).

**CAFM (Computerized Aided Facility Management) System** means, the computerized system used to track, record, manage and communicate day-to-day Infrastructure Facility operations and to support long-term planning. Modules may include asset, location, inventory, work order/request, Scheduled Maintenance, personnel and reports.

**Capacity Improvement** means any Project expansion, improvement, measure or procedure that both (a) maintains or increases the throughput capacity of the Project or any portion thereof and (b) improves the level of service of the Project.

**CEQA Approval** means the Final Environmental Impact Report for the Potrero Yard Modernization Project at 2500 Mariposa Street (Planning Department Case No. 2019-021884ENV), certified by the Planning Commission on January 11, 2024 and available at <https://sfplanning.org/environmental-review-documents?title=Potrero+Yard+Modernization+Project>.

**CEQA Event** means:

- (a) any new or modified CEQA Approval necessitated solely by a City Change, a Delay Event or Relief Event;
- (b) legal action being taken in respect of the CEQA Approval that results in a temporary restraining order, preliminary injunction or other form of interlocutory relief by a court of competent jurisdiction that prohibits prosecution of, or by complying with such temporary restraining order, preliminary injunction or other form of interlocutory relief by a court of competent jurisdiction results in prohibiting the prosecution of, a material portion of the Work;
- (c) review or revocation or material change to, the CEQA Approval; or
- (d) any review or revocation of, or change to, a CEQA Approval directly resulting from the circumstances specified in clauses (b) and (c),

except, in each case, to the extent resulting, in whole or in part, from Principal Project Company’s design, Work or from any PPC Fault.

**Certificate of Final Acceptance** means the certificate issued by City as contemplated in Section 7.9 (Final Acceptance).

**Certificate of Substantial Completion** means the certificate issued by City as contemplated in Section 7.8 (Substantial Completion).

---

**Change** means any acceleration, addition, decrease, omission, deletion, removal or modification from or to the Work.

**Change in Law** means:

- (a) any repeal (in whole or in part) of, or amendment or modification to, any applicable Law by, any Governmental Entity or any written change in interpretation or application of, any applicable Law, in each case, after the Setting Date; and
- (b) the adoption or enactment of any new applicable Law by any Governmental Entity after the Setting Date,

which, in either case, is materially inconsistent with any existing applicable Law or any existing interpretation or application of, any such applicable Law in effect prior to the Setting Date; but excluding, (i) any repeal of, or amendment or modification to, a written change in interpretation or application of, and applicable Law, or any new applicable Law, in each case, that is pending, passed or adopted but not yet effective as of the Setting Date, (ii) any repeal of, or amendment or modification to, or written change in interpretation or application of, or the adoption or enactment of, state or federal tax laws of general application, and (iii) any repeal of, or amendment or modification to, or written change in interpretation or application of, or adoption or enactment of, state labor laws.

**Change of Control** means any Equity Transfer, transfer of an interest, direct or indirect, in an Equity Member, or other assignment, sale, financing, grant of security interest, hypothecation, conveyance, transfer of interest or transaction of any type or description, including by or through voting securities, asset transfer, contract, merger, acquisition, succession, dissolution, liquidation, bankruptcy or otherwise, that results, directly or indirectly, in a change in possession of the power to direct or control or cause the direction or control of the management of Principal Project Company or a material aspect of its business. A change in possession of the power to direct or control or cause the direction or control of the management of an Equity Member may constitute a Change of Control of Principal Project Company if such Equity Member possesses, immediately prior to such Change of Control, the power to direct or control or cause the direction or control of the management of Principal Project Company. Notwithstanding the foregoing, the following shall not constitute a Change of Control:

- (a) a change in possession of the power to direct or control the management of Principal Project Company or a material aspect of its business due solely to bona fide open market transactions in securities effected on a recognized public stock exchange, including such transactions involving an initial public offering;
- (b) an upstream reorganization or transfer of indirect interests in Principal Project Company (including, for greater certainty, in connection with the issuance or redemption of interests pursuant to any employee ownership program) so long as no change occurs in the entity with ultimate power to direct or control or cause the direction or control of the management of Principal Project Company;
- (c) a change in possession of the power to direct or control the management of Principal Project Company or a material aspect of its business due solely to a bona fide transaction involving a beneficial interest in the ultimate parent

---

organization of an Equity Member (but not if the Equity Member is the ultimate parent organization), provided, however, that this exception shall not apply if at the time of the transaction the transferee is suspended or debarred from bidding, proposing or contracting with the City or any federal or State department or agency, or is subject to a suspension or debarment proceeding;

- (d) an Equity Transfer, where the transferring Equity Member and the transferee are under the same ultimate parent organization ownership, management and control before and after the transfer;
- (e) a transfer of interests (i) between managed funds that are under common ownership, management or control or (ii) by an Equity Member to a fund, investment vehicle or other entity managed by or under common control of such Equity Member, except, in each case, a change in the management or control of a fund, investment vehicle or other entity, as applicable, that manages or controls;
- (f) the exercise of minority veto or voting rights (whether pursuant to applicable Law, by Principal Project Company's organizational documents or by related member or shareholder agreements or similar agreements) over major business decisions of Principal Project Company, provided that if such minority veto or voting rights are exercised pursuant to shareholder or similar agreements, City received copies of such agreements on or before the date of this Agreement; and
- (g) the grant of Security Documents, including the Initial Security Documents, in compliance with the Direct Agreement or the exercise of lender remedies under such Security Documents, including foreclosure.

**Change Order** has the meaning set forth in Section 1.4.3 of Exhibit 9 (Change Procedures).

**Change Proposal** has the meaning set forth in Section 1.3.1 of Exhibit 9 (Change Procedures).

**City** has the meaning set forth in the Preamble.

**City Access Period** has the meaning set forth in Section 7.13.5.1.

**City Additional Insured(s)** means any (and all) of the City and County of San Francisco, and its respective successors, assigns, officeholders, officers, directors, agents, representatives, consultants and employees.

**City-Caused Delay Event** means any event falling under clauses (a)-(e), (k), (n), (q), (r) and (u)-(v) of the definition of Compensable Delay Event.

**City-Caused Relief Event** means any event falling under clauses (a)-(c), (q), (i), (l) and (r) of the definition of Compensable Relief Event.

**City Change** has the meaning set forth in Section 12.2.1.

**City Data** means any information, data, or document, whether or not protectable Intellectual Property, which is created, developed, or collected by, or on behalf of, City related to

transportation operations, national infrastructure planning and personal information of the City employees, vendors and consumers. For the avoidance of doubt, City Data shall include, but not be limited to, (a) all “nonpublic information,” as defined by the Gramm-Leach-Bliley Act (15 USC § 6801 et seq.), (b) personal information as defined by California Civil Code §§ 1798.29, 1798.82, and 1798.140 (California Consumer Privacy Act of 2018, effective January 1, 2020), as amended and supplemented by the California Privacy Rights Act of 2020 (effective December 16, 2020; operative January 1, 2023), (c) protected health information or individually identifiable health information as defined by the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and the Health Information Technology for Economic and Clinical Health (HITECH) Act or as defined by the Code of Federal Regulations (45 CFR § 160.103), and/or (d) personal data as defined by the EU General Data Protection Regulation (Regulation (EU) 2016/679). For the further avoidance of doubt, City Data is not limited to proprietary or confidential information, and need not constitute trade secret information.

**City Default** has the meaning set forth in Section 16.3.1 (City Default).

**City Fault** means:

- (a) a breach by City of any of its obligations or any representation or warranty under this Agreement;
- (b) City’s violation of any applicable Law; or
- (c) fraud, criminal conduct, intentional misconduct, recklessness, bad faith or gross negligence of the City.

**City-Furnished Equipment** means all FF&E classified as City-Furnished Equipment (or City-furnished) in the Technical Requirements (including items marked OP in the Equipment List, Table 5 and Table 6 of Division 1 of the Technical Requirements) or otherwise required to be included as such under Section 7.13.2 (Selection of City-Furnished Equipment).

**City-Furnished Equipment List** means the list of equipment identified as being City-Furnished Equipment in the Equipment List and Tables 5 and 6 of Division 1 of the Technical Requirements, as updated or amended in accordance with Section 7.13.2 (Selection of City-Furnished Equipment).

**City-Furnished IT/Comms Allowance** means the Allowance to be used pursuant to Section 11.11.3 (City-Furnished IT/Comms Allowance) by City for City-Furnished IT/Comms Equipment. The initial City-Furnished IT/Comms Allowance amount is identified in Section 11.11.3.

**City-Furnished IT/Comms FF&E** means all FF&E classified as City-Furnished IT/Comms FF&E in the Technical Requirements, all additional FF&E identified as City-furnished “IT/Comms FF&E” in Table 5 and Table 6 of Division 1 of the Technical Requirements and all additional IT/Comms Equipment selected by City under Section 7.13.1 (Selection and Procurement of PPC-Furnished FF&E).

**City IP** means all Intellectual Property owned by, or sufficiently licensed to, City including, without limitation, all rights, grants and interests pursuant to the Predevelopment Agreement.

**City Personnel** means every person employed, engaged, or hired by City or every person

---

employed, engaged, or hired by City Contractors to carry out any of the responsibilities or any of the services provided by City with respect to the Infrastructure Facility.

**City Ready for Move Condition** means the following state of condition of the Project Site:

- (a) With respect to Utilities, all Utility infrastructure will remain in place and will not be sealed, capped, disconnected, turned off and or controlled prior to vacation of the Project Site by City;
- (b) The buildings, grounds and existing structures will remain in their current state as of the Access Date, including all furniture, equipment, materials and supplies; and
- (c) All furniture, equipment, materials and supplies that are to be moved by Principal Project Company shall be boxed or otherwise prepared so they may be moved.

**City Relocation Plan** means the plan developed by Principal Project Company pursuant to the Predevelopment Agreement, and approved by City, that describes the scope of Work to be undertaken by Principal Project Company to fully relocate the applicable City equipment, supplies and materials from the Project Site.

**City Relocation Scope** means the scope of Work undertaken by Principal Project Company to fully relocate the applicable City equipment, furniture, supplies and materials from the Project Site, as more particularly described in the approved City Relocation Plan.

**City Policies** means policies developed, administered and maintained by City on a specific topic that are directly applicable to the IFM Services and are required to be complied with by the Principal Project Company.

**Claim** means any claim, proceeding, action, cause of action, investigation, demand or suit (including by way of contribution or indemnity) made:

- (a) in connection with this Agreement or the Infrastructure Facility; and
- (b) at law or for specific performance, in equity, restitution, payment of money (including damages), increase in the Milestone Payment or Availability Payments and extension of time or other form of relief.

**Cleaning Services** has the meaning given in Section C.5.2 of the IFM Specifications.

**Climate Baseline** means, for each year, the CAEC will be adjusted based on the Weather Data from the Energy Performance Commencement Date to the Current Contract Year.

**Collateral Agent** means (a) the Institutional Lender listed or otherwise designated in the Security Documents as trustee or agent and authorized to act on behalf of or at the direction of the other Lenders, or (b) the Institutional Lender designated to act as trustee or agent on behalf of or at the direction of the other Lenders in an intercreditor agreement or other document executed by all Lenders to whom Security Documents are outstanding at the time of execution of such document, a copy of which shall be delivered by Principal Project Company to City. For

---

any Project Debt issued and held by a single Lender, Collateral Agent means such Lender. The bond trustee, if an Institutional Lender, may also be the Collateral Agent.

**Commercial Close** means the execution and delivery of this Agreement by Principal Project Company and City on the Effective Date.

**Commercially Reasonable Insurance Rates** means insurance premiums that are less than or equal to the greater of (a) rates that a reasonable and prudent risk manager for a Person seeking to insure comparable risks would conclude are justified by the risk protection afforded, and (b) 200% of the rates indicated for the period in question in the Base Case Financial Model and related Financial Modeling Data.

**Committed Investment** means the sum of the Equity Investments and Deferred Equity Amounts.

**Common Infrastructure** means the physical infrastructure component of the Facility that is shared by the Bus Yard Component and the Joint Development Alternative, as further described in the Technical Requirements, including Division 1 of the Technical Requirements.

**Communication Protocol** means the protocol prepared and submitted by Principal Project Company and approved by the City in accordance with Section B.9.1.1 of the IFM Specifications, as updated in accordance with this Agreement.

**Compensable Delay Event** means any of the following events or circumstances to the extent, in each case, that it directly and adversely impacts (i) the D&C Work during the D&C Period or (ii) Principal Project Company's completion of Punch List items between the Substantial Completion Date and the Final Acceptance Date:

- (a) the implementation of a City Change, excluding any Change following a Change Request;
- (b) City Fault;
- (c) failure by City to (i) provide Principal Project Company with access to the Project Site on the Access Date; or (ii) leave the Project Site in the City Ready for Move Condition as of 90 days after the Access Date;
- (d) failure by City to issue NTP 1 or NTP 2, as applicable, within 10 Business Days after full and complete satisfaction of the conditions precedent to the relevant NTP under this Agreement;
- (e) a Hazardous Materials Event caused by City;
- (f) a Relevant Change in Law;
- (g) discovery of an Unidentified Utility within the Project Site;
- (h) a CEQA Event or a NEPA Event;
- (i) compliance by Principal Project Company with an order or direction of an

Emergency service provider in an Emergency (except for Emergencies that are or arise out of Force Majeure Termination Events);

- (j) any condemnation or other taking by eminent domain of any material portion of the Project Site or the D&C Work;
- (k) except with respect to Regulatory Approvals under the jurisdiction of the City acting in its regulatory capacity, failure of City to provide responses to proposed schedules, plans, design documents, and other Submittals and matters submitted to City after the Commercial Close for which response is required under this Agreement as an express prerequisite to Principal Project Company's right to proceed or act, within the time periods indicated in this Agreement, or if no time period is indicated, within a reasonable time, taking into consideration the nature, importance and complexity of the Submittal or matter; provided, however, that the foregoing shall apply only following delivery of Notice after the expiration of the applicable time period from Principal Project Company requesting such action in accordance with the terms and requirements of this Agreement;
- (l) discovery at, near or on the Project Site of any archeological, paleontological or cultural resources (including historic properties), excluding any such substance or resources known or disclosed to Principal Project Company as of the Setting Date (or which should have been known to Principal Project Company pursuant to a Reasonable Investigation);
- (m) discovery at, near or on the Project Site of any threatened or endangered species, excluding any such presence of species known or disclosed to Principal Project Company as of the Setting Date (or which should have been known to Principal Project Company pursuant to a Reasonable Investigation);
- (n) loss or damage to the Work directly caused by City Fault;
- (o) issuance of a temporary restraining order, preliminary injunction or other form of interlocutory relief by a court of competent jurisdiction that prohibits prosecution of, or by complying with such temporary restraining order, preliminary injunction or other form of interlocutory relief by a court of competent jurisdiction results in prohibiting the prosecution of, any material portion of the D&C Work;
- (p) discovery of:
  - (i) actual subsurface or latent physical conditions that differ materially from the baseline subsurface conditions indicated in the Geotechnical Baseline Report, excluding any such conditions (w) that are not defined in the Geotechnical Baseline Report; (x) known or disclosed to Principal Project Company prior to the Setting Date; or (y) that could have been reasonably anticipated as potentially present by an experienced global civil works contractor based on the information contained in such Geotechnical Baseline Report; or
  - (ii) discovery of actual subsurface physical conditions within the Project Site of an unusual nature, differing materially from those ordinarily

encountered in the area and generally recognized as inherent in the type of work provided for in this Agreement, excluding any such conditions known or disclosed to Principal Project Company prior to the Setting Date;

- (q) any order of City to suspend for convenience under Section 16.2.8.3 exceeding 24 hours in total for a single suspension or 144 cumulative hours in total across multiple suspensions;
- (r) subject to Principal Project Company complying with its obligations for coordination set forth in this Agreement, actions of the City (including its employees) or Other Contractors (other than any PPC-Related Entities, JDA-Related Entities and any entity that is not a JDA-Related-Entity but that executes an interface agreement substantially in the form of Exhibit 8 (Form of Interface Agreement)), that materially and directly disrupts, damages or interferes with the D&C Work;
- (s) a change in Standards and Specifications materially impacting the D&C Work or the Project with which City directs Principal Project Company to comply under this Agreement;
- (t) a Hazardous Materials Event caused by Third Parties or which exists prior to the Access Date; and
- (u) issuance by City of a Safety Compliance Order for a reason other than to comply with Safety Standards, perform valid previously issued Safety Compliance Orders or correct a violation of Law or Regulatory Approval respecting health, safety or right of use and access.

**Compensable Relief Event** means any of the following events or circumstances to the extent, in each case, that it interferes directly and adversely with, or causes a failure of, the performance of the IFM after the Substantial Completion Date:

- (a) the implementation of a City Change, excluding any Change following a Change Request;
- (b) City Fault;
- (c) a Hazardous Materials Event caused by the City;
- (d) compliance by Principal Project Company with an order or direction of an Emergency service provider in an Emergency (except for Emergencies that are or arise out of Force Majeure Termination Events);
- (e) a change in Standards and Specifications during the IFM Period materially impacting the IFM or the Project with which City directs Principal Project Company to comply under this Agreement;
- (f) a Relevant Change in Law;

- 
- (g) failure of City to provide responses to proposed schedules, plans, design documents, and other Submittals and matters submitted to City after the Effective Date for which response is required under this Agreement as an express prerequisite to Principal Project Company's right to proceed or act, within the time periods (if any) indicated in this Agreement, or if no time period is indicated, within a reasonable time, taking into consideration the nature, importance and complexity of the Submittal or matter; provided, however, that the foregoing shall apply only following delivery of Notice after the expiration of the applicable time period from the Principal Project Company requesting such action in accordance with the terms and requirements of this Agreement;
  - (h) discovery at, near or on the Project Site of any archeological, paleontological or cultural resources (including historic properties), excluding any such substance or resources known or disclosed to the Principal Project Company as of the Setting Date (or which should have been known to Principal Project Company pursuant to a Reasonable Investigation);
  - (i) discovery at, near or on the Project Site of any Threatened or Endangered Species (regardless of when the species was listed as threatened or endangered), excluding any such presence of species known to the Principal Project Company as of the Setting Date (or which should have been known or disclosed to Principal Project Company pursuant to a Reasonable Investigation);
  - (j) loss or damage to the Infrastructure Facility directly caused by City Fault;
  - (k) issuance of a temporary restraining order, preliminary injunction or other form of interlocutory relief by a court of competent jurisdiction that prohibits prosecution of a material portion of the IFM;
  - (l) subject to Principal Project Company complying with its coordination obligations under this Agreement, actions of the City (including its employees) or Other Contractors (other than any PPC-Related Entities)), except JDA-Related Entities and any entity that is not a JDA-Related-Entity but that executes an interface agreement substantially in the form of Exhibit 8 (Form of Interface Agreement), that materially and directly disrupts, damages or interferes with the IFM Services;
  - (m) Vandalism, excluding any Vandalism affecting the Infrastructure Facility building envelope or exterior grounds;
  - (n) any condemnation or other taking by eminent domain of any material portion of the Project Site or the Project;
  - (o) a Hazardous Materials Event caused by Third Parties or which exists prior to the Access Date;
  - (p) issuance by City of a Safety Compliance Order for a reason other than to comply with Safety Standards, perform valid previously issued Safety Compliance Orders or correct a violation of Law or Regulatory Approval respecting health, safety or right of use and access;

- 
- (q) a permanent change in voltage by a Utility Owner supplying electricity to the Project that is greater than 10%, has a material adverse effect on the IFM Services and requires the purchase and installation of one or more new transformers by Principal Project Company; and
  - (r) any order of City to suspend IFM Services for convenience under Section 16.2.8.3.

**Computerized Aided Facility Management System** or **CAFM** means the computerized system used to track, record, manage and communicate day-to-day Infrastructure Facility operations and to support long-term planning. Modules may include: asset, location, inventory, work order/request, scheduled maintenance, personnel and reports.

**Condition Report** has the meaning set forth in Section 8.5.4.2.

**Conditions to Assistance** has the meaning set forth in Section 7.6.12.2.

**Conduit Issuer** means an existing agency that will issue Private Activity Bonds in connection with the Project.

**Confidential Information means**, subject to Section 21 and without limiting applicable Law, all confidential and proprietary information that a party has designated as confidential and which is supplied, or to which access is granted, to or on behalf of the other party (whether before or after the date of this Agreement), either in writing, or in any other form, directly or indirectly pursuant to discussions with the other party and includes all analyses, compilations, studies and other documents whether prepared by or on behalf of a party which contain or otherwise reflect or are derived from such designated information.

**Construction Documents** means all shop drawings, working drawings, fabrication plans, material and hardware descriptions, specifications, construction quality control reports, construction quality assurance reports and samples necessary or desirable for construction of the Project included in the Construction Work, in accordance with the Contract Documents.

**Construction Equity Ratio** means, at any time, the ratio between:

- (a) the Committed Investments at the time; and
- (b) the sum of (i) Committed Investments at the time and (ii) the amount of Project Debt scheduled to be outstanding at the time as set forth in the Financial Model.

**Construction Management Plan** means Principal Project Company's plan describing its approach to undertake and achieve the requirements in Section 1.11 of Division 1 of the Technical Requirements, prepared and submitted by Principal Project Company in accordance with Section 1.1.7.2 of Division 1 of the Technical Requirements, as updated and approved by the City in accordance with this Agreement.

**Construction Work** means all Work to build or construct, make, form, manufacture, furnish, install, supply, deliver, landscape, equip, test and commission or demolish any structure, building, or other improvement to real property included in the Project, but excluding:

- 
- (a) Design Work, professional environmental services and similar services;
  - (b) preparing and processing applications for Regulatory Approvals;
  - (c) coordinating with adjacent property owners and Utility Owners; and
  - (d) IFM Services.

**Consumer Price Index (CPI)** means the Consumer Price Index for the City of San Francisco, as published by US Bureau of Labor Statistics from time to time, or failing such publication, such other index as the Parties (acting reasonably) may agree, or as may be determined in accordance with **Error! Reference source not found.** (Contract Dispute Procedures), which most closely resembles such index.

**Contract** means any agreement, and any modification of such agreement, by Principal Project Company with any Person to perform any part of the Work or provide any materials, equipment or supplies for any part of the Work, or any such agreement, supplement or amendment at a lower tier, between a Contractor and its lower tier Contractor or a Supplier and its lower tier Supplier, at all tiers. The term “Contract” does not include agreements with Utility Owners.

**Contract Deadline** means the Substantial Completion Deadline, the Final Acceptance Deadline or the Long Stop Date, as the context may require, and “Contract Deadlines” means the Substantial Completion Deadline, the Final Acceptance Deadline and the Long Stop Date, collectively.

**Contract Dispute(s)** means any dispute, disagreement or controversy between City and Principal Project Company concerning their respective rights and obligations under the Contract Documents, including concerning any Claim, alleged breach or failure to perform and remedies.

**Contract Dispute Procedures** means the procedures for resolving Contract Disputes set forth in **Error! Reference source not found.** (Contract Dispute Procedures).

**Contract Documents** means this Agreement and all its exhibits including the Technical Requirements and other documents identified in Section 1.2 (Contract Documents; Rules to Reconcile Conflicting Provisions).

**Contract Month** means a calendar month, except with respect to the first Contract Month, which runs from the Payment Commencement Date until the end of the calendar month in which the Payment Commencement Date falls, and the last Contract Month, which runs from the first day of the calendar month in which the Termination Date falls until the Termination Date.

**Contract Quarter** means a Quarter, except with respect to the first Contract Quarter, which runs from the Payment Commencement Date until the end of the calendar quarter in which the Payment Commencement Date falls, and the last Contract Quarter, which runs from the first day of the Quarter in which the Termination Date falls until the Termination Date.

**Contract Year** means a calendar year, provided that:

- (i) the first Contract Year shall be such period that commences on the Payment Commencement Date and ends on the next ensuing December 31<sup>st</sup>; and

- 
- (ii) the final Contract Year shall be such period that commences on the January 1st that precedes the date on which this Agreement expires or is terminated, for whatever reason, and ends on the expiry or termination of this Agreement.

Any computation made on the basis of a Contract Year shall be adjusted on a pro rata basis to take into account any Contract Year of less than 365 or 366 days, whichever is applicable.

**Contractor** means any Person or entity with whom Principal Project Company has entered into any Contract to perform any part of the Work or provide any materials, equipment or supplies for the Project on behalf of Principal Project Company, and any other Person or entity with whom any Contractor has further subcontracted any part of the Work, at all tiers.

**Controlling Affiliate** means any Person which directly, or indirectly through one or more intermediaries, controls a majority of the voting shares of Principal Project Company, or controls the election of a majority of the board of directors, trustees or other persons exercising similar functions for Principal Project Company. For purposes of this definition, the term “control” means the possession, directly or indirectly, of the power to cause the direction of the management of a Person, whether through voting rights or securities, by contract, family relationship or otherwise.

**Controlling Work Item** means the activity or work item on the Critical Path of the D&C Work having the least amount of total float.

**Core Hours** means the period:

- (a) for Maintenance and Transit Spaces, commencing at 4am and ending at 10pm, every day of every week.
- (b) for Office/Admin and Training Spaces, commencing at 8am and ending at 5pm, Monday to Friday of every week.

**Corrected Aggregate Energy Consumption** or **CAEC** means, for a Contract Year, the Aggregate Actual Consumption less the Non-Regulated Load consumption with appropriate adjustments for the Climate Baseline.

**Cost and Pricing Data** means the data (including calculations, formulas, unit and material prices, and other cost and fee information) acknowledged and accepted by Principal Project Company and delivered by Lead Developer as specified in the Predevelopment Agreement, which data supports and explains the basis of Principal Project Company’s cost estimates for development, design, construction, operations, and maintenance of the Project and provides all cost assumptions for human resources, including salary and benefits for non-management personnel performing the Work.

**Cost to Complete** means (without double-counting):

- (a) those costs (internal and external) that City reasonably and properly projects that it will incur in carrying out any process to request tenders from any parties interested in entering into a contract with City to achieve Final Acceptance, including all costs related to the preparation of tender documentation, evaluation of tenders and negotiation and execution of relevant contracts; plus

- 
- (b) costs that City reasonably and properly projects that it will incur in achieving Final Acceptance; plus
  - (c) any other Losses that, but for the termination of this Agreement, City would not have incurred prior to Final Acceptance; minus
  - (d) any insurance proceeds available to City for the purposes of achieving Final Acceptance.

**COTS** (or, **Commercially Available Off-the-Shelf Software**) means Software (i) sold in substantial quantities, (ii) readily available to City without Principal Project Company or third party participation, (iii) provided without modification in the same form in which it is sold in the commercial marketplace, and (iv) for which there are at least two (2) readily available alternative solutions or items with the same or substantially similar design, use or function as the proposed COTS. For the avoidance of doubt, COTS does not include so-called open source software or sole-source software.

**Credit Spread Risk Mitigation** has the meaning set forth in Section 3.2.3.2.

**Critical Path** means each critical path on the Project Schedule, which ends on the Substantial Completion Deadline or the Final Acceptance Deadline, as applicable (i.e., the term shall apply only following consumption of all available Float in the schedule for Substantial Completion or Final Acceptance, as applicable). The lower case term "critical path" means the activities and durations associated with the longest chain(s) of logically connected activities through the Project Schedule with the least amount of total float for all chains.

**Critical Path Method (CPM)** is a method of planning and scheduling a construction project where activities are arranged based on activity relationships.

**Current Status Documents** has the meaning set forth in Section 1.6.3(C) of Division 1 of the Technical Requirements.

**D&C Contract** means:

- (a) this Agreement, where Principal Project Company will self-perform the D&C Work; or
- (b) the contract for the D&C Work entered into between Principal Project Company and D&C Contractor dated on or about the date of this Agreement, where Principal Project Company will not self-perform the D&C Work; and
- (c) any other contract between Principal Project Company and a Subcontractor for the undertaking of the D&C Work.

**D&C Contract Amount** means [\$●].

**D&C Contractor** means the Contractor primarily responsible for the D&C Work.

**D&C Noncompliance** means and where a D&C Failure Event occurs which, where a Rectification Time applies, has not been Rectified within the relevant time. For the avoidance of

---

doubt, where no Rectification Time applies (for example, in respect of scheduled activities) there shall be a D&C Failure at the point at which the D&C Failure Event occurred (for example, non-performance of the scheduled activity by the scheduled time).

**D&C Failure Event** means each event identified in Appendix A (D&C Noncompliance Points and Deductions) of Exhibit 4 (Payment Mechanism) which occurs prior to the Final Acceptance Date.

**D&C Noncompliance Points** means points accrued in association with each D&C Noncompliance as set out in Section 2 (Escalation Factor) of Exhibit 4B (Availability Payment Mechanism).

**D&C Management Plan** means the City-approved document attached at Exhibit 2 (Project Management Plan) setting forth Principal Project Company's prescribed approaches to, and plan for, its scope of Work, as it may be modified and updated from time to time, following written approval thereof by City. The preliminary D&C Management Plan shall be replaced by the final approved D&C Management Plan, which shall be developed by Principal Project Company and approved by City pursuant to Division 1 of the Technical Requirements, as a condition precedent to issuance of NTP 2, as updated in accordance with this Agreement.

**D&C Payment Bond** means the payment bond(s) to secure payment for labor and materials for the D&C Work, as required under this Agreement.

**D&C Percentage** means the value of Design Work, Construction Work, and Work relating to the manufacturing and supply of equipment, completed at a given point in time divided by the value of the total Design Work, Construction Work, and Work relating to the manufacturing and supply of equipment required to be completed to achieve Final Acceptance.

**D&C Performance Bond** means the performance bond(s) securing performance of the D&C Work required under this Agreement.

**D&C Performance Security** has the meaning set forth in Section Error! Reference source not found.

**D&C Period** means that portion of the Term that commences on the Effective Date and ends at 11:59 p.m. on the day immediately preceding the Substantial Completion Date.

**D&C Period Deduction** means a deduction from the Milestone Payment made in accordance with Section 2 (D&C Period Deductions) of Exhibit 4A (Milestone Payment Mechanism).

**D&C Site** means the real property owned by City, under the jurisdiction of SFMTA, commonly known as 2500 Mariposa Street in San Francisco, California, which is a 4.4-acre site comprised of Assessor's Block No. 3971-001, bounded by Bryant Streets, 17th Street, Hampshire Street, and Mariposa Street, any Additional Properties acquired by City in accordance with Section 7.5.1 (Additional Acquisitions), and such additional areas as may, from time to time, be designated in writing by City for Principal Project Company's use in performance of the Work. If the parcel is later subdivided to accommodate a Joint Development Alternative, this definition may be amended upon mutual agreement. For purposes of insurance (subject to any notification and other requirements imposed by the insurer(s) for approval), indemnification, safety and security requirements, the prevailing wage requirements, and payment for use of

equipment, the term “Project Site” shall also include (a) the field office sites, (b) any property used for bonded storage of material for the Project approved by City, (c) staging areas dedicated to the Project, and (d) areas where activities incidental to the Project are being performed by Principal Project Company and Contractors covered by the worker’s compensation policy but excluding any permanent locations of Principal Project Company or such covered Contractors.

**D&C Quality Management Plan** means Principal Project Company’s plan to ensure that the Project deliverables and completed Work meet the minimum required standards of quality, prepared and submitted by Principal Project Company in accordance with Section 1.4 of Division 1 of the Technical Requirements, as updated and approved by the City in accordance with this Agreement.

**D&C Work** means all Work to be performed to achieve Final Acceptance, including Design Work and Construction Work.

**D&C Work Value** means an amount equal to the D&C Contract Amount minus the aggregate of (i) the Cost to Complete, (ii) the amount of the Milestone Payment if paid to Principal Project Company prior to the Early Termination Date, (and (iii) any Deduction or other reduction to the Milestone Payment or any Availability Payments under Exhibit 4 (Payment Mechanism) accrued prior to the Early Termination Date that has, in each case, not been deducted from the Milestone Payment or any Availability Payment (as applicable).

**Day** means calendar day, unless otherwise expressly specified.

**DBE Compliance Manual** means **[Note: City to provide definition]**

**DBE Contractor** means **[Note: City to provide definition]**

**Deduction** means a D&C Period Deduction or an IFM Period Deduction, or both as the context requires.

**Deduction Amounts** means the amount in dollars of each Deduction associated with a D&C Period Deduction, and/or an IFM Period Deduction in accordance with the applicable Functional Component Rank category in Appendix B (Response and Rectification Times) to Exhibit 4B (Availability Payment Mechanism).

**Default Notice** has the meaning set forth in Section 16.1.2.2.

**Default Termination Event** has the meaning set forth in Section 17.3.1.1.

**Defect** means a defect, whether due to design, construction, installation, damage or wear, affecting the condition, use, functionality or operation of any element of the Project, which would cause or have the potential to cause one or more of the following:

- (a) a hazard, nuisance or other risk to public or worker health or safety, including the health and safety of Building Occupants;
- (b) a structural deterioration of the affected element or any other part of the Project;

- 
- (c) damage to a Third Party's property or equipment;
  - (d) damage to the Environment; and
  - (e) failure of the affected element to meet the requirements of the Contract Documents.

**Deferred Equity Amounts** means, on any date, any amount of unfunded cash equity that has been committed to Principal Project Company (including commitments to provide an Equity Investment or Equity Member Debt) and is shown to be available for use in the Financial Model prior to the Final Acceptance Date, but only to the extent that the commitment to provide such amount is supported by an Equity Letter of Credit.

**Delay Costs** means direct costs incurred by Principal Project Company relating to Controlling Work Items that result solely and directly from a Delay Event, which are limited to those costs identified in and calculated in accordance with Exhibit 13 (Costs Schedule). The term "Delay Costs" does not include any Extra Work Costs, including those incurred by Principal Project Company that relate to non-Controlling Work Items incident or collateral to a Delay Event or Controlling Work Items that do not result solely and directly from a Delay Event. In any event, Principal Project Company shall not be entitled to Delay Costs to the extent Principal Project Company is responsible for the delay or could have reasonably mitigated.

**Delay Event** means any of the following events or circumstances that occurs prior to the Final Acceptance Date and directly impacts the D&C Work:

- (a) an Unavoidable Delay Event; or
- (b) a Compensable Delay Event.

**Delayed Financial Close Date** has the meaning set forth in Section 3.4.2(a).

**Demand Maintenance** means all unscheduled, corrective, or first response maintenance (other than Scheduled Maintenance) to the Maintained Elements, which includes the response to malfunctions and provision of minor repairs, adjustments and general maintenance as follows:

- (a) first response to equipment malfunctions and assessment of the problem (e.g., operator error, Utility problem, minor or major failure), and required response; and
- (b) performance of minor repairs and general maintenance, including topping-up fluids, adjustments, resets, clearing blockages, minor carpentry and replacing minor parts such as rollers, wheels, pulley and hoses.

**Demand Requisition** means a requisition for Demand Maintenance.

**Design Deliverables** has the meaning set forth in Section 1.8.5 of Division 1 of the Technical Requirements.

**Design Documents** means all studies, quantitative assessments, evaluations, reports, documents, calculations, plans, drawings, diagrams, specifications, and other documentation

that manifest the design for the Project, at all stages, as developed by Principal Project Company or any portion, component or element thereof, including design required in connection with the operation and maintenance of the Project and Renewal Work, in each case regardless of whether such documents are required by the Contract Documents or are prepared or used by Principal Project Company in the Design Work. Design Documents include the Final Design Documents.

**Design Management Plan** means Principal Project Company's plan describing its approach to undertake and achieve the requirements in Section 1.8 of Division 1 of the Technical Requirements, prepared and submitted by Principal Project Company in accordance with Section 1.1.7.1 of Division 1 of the Technical Requirements, as updated and approved by the City in accordance with this Agreement.

**Design Work** means all Work related to the design, engineering, architecture and other professional services for the Project, including all such Work relating to the Infrastructure Facility. Design Work includes any Early Works related to the design, engineering, architecture and other professional services for the Project.

**Developed IP** means Intellectual Property that is authored, created, invented or reduced to practice under or for the purposes of this Agreement, the Work or the Project, whether or not such Intellectual Property is incorporated into the Project IP but excluding any adaptation, continuation or derivative work that constitutes PPC Intellectual Property.

**Deviation(s)** means any change, deviation, modification or alteration from the Technical Requirements (other than Change Orders and amendments to this Agreement). Deviations are not intended to amend or modify portions of this Agreement other than the Technical Requirements.

**Direct Agreement** means the agreement substantially in the form of Exhibit 5B (Form of Direct Agreement), by and among City, Principal Project Company and the Lender (or if there is more than one Lender, the Collateral Agent on behalf of the Lenders) in connection with Lenders' rights in relation to the Contract Documents.

**Dispatch Function** means the Functional Components corresponding to Functional Unit references L2-011 as specified in Table B6 (Functional Components and Functional Units for Infrastructure Facility) of Appendix B (Functional Areas, Functional Units, Functional Unit Rankings and Deduction Amounts for Availability Failures and Service Failures) of Exhibit 4B (Availability Payment Mechanism).

**Distributions** means the proceeds of any Refinancing to the extent such proceeds are distributed to any Equity Member or to any Affiliate of Principal Project Company, and any of the following, whether in cash or in kind, and whether made or projected to be made to any Equity Member, an Affiliate of Principal Project Company. Any:

- (a) Dividend or other distribution in respect of any equity interest of any class;
- (b) Payments or other distributions in reduction of capital, redemption or purchase of shares or any other reorganization or variation to share capital;
- (c) Payments in respect of Equity Member Debt (whether of fees, principal, interest

---

including capitalized interest and interest on overdue interest, breakage costs, or otherwise and whether or not such items are included or excluded from the definition of Equity Member Debt);

- (d) Payment, loan, contractual arrangement, including any management agreement or payment in respect thereof, or transfer of assets or rights, in each case to the extent made or entered into after the date of this Agreement and not in the ordinary course of business nor on reasonable commercial terms including to any Equity Member, or any Affiliate of any Equity Member; and
- (e) Conferral of any other benefit which is not received in the ordinary course of business and not on commercially reasonable terms, including to any Equity Member, any Affiliate of any Equity Member or to Principal Project Company;
- (f) Other payment to any Equity Member, any current or former Affiliate of any Equity Member or Principal Project Company howsoever arising and whether made under the terms of an agreement or otherwise or in respect of any equity interest of any class in the capital of Principal Project Company if, in any such case, such payment would not have been made were it not for the occurrence of any Refinancing or Change in Control; or
- (g) Early release of any contingent funding liabilities, the amount of such release being deemed to be a gain for the purposes of any calculation of Refinancing Gain.

**Early Termination Date** means the effective date of termination of this Agreement prior to the stated expiration of the Term set forth in Section 2.3 (Term).

**Early Works** has the meaning set forth in the Early Works Agreement.

**Early Works Agreement** means the agreement entered into by City and Principal Project Company or an Affiliate with respect to the performance of certain Work by Principal Project Company or such Affiliate during the PDA Term and prior to Financial Close.

**Earthquake** means all land movement due to seismic activity, including shocks, tremors, volcanic action, tsunami and earth rising or shifting, including any aftershocks or other Earthquakes for a period of 168 hours after the initial event, which proximately causes damage to the physical improvements of the Project or interrupts the Work.

**Earthquake Inspection Plan** means the plan detailing an approach to minimize delay in re-occupying the Infrastructure Facility following a significant seismic event as part of the City of San Francisco's Building Occupancy Resumption Program (BORP), prepared and submitted by Principal Project Company in accordance with Section B.23.1(5) of the IFM Specifications, as updated and approved by the City in accordance with this Agreement.

**Effective Date** means the date of Commercial Close.

**Eligible Investments** has the meaning set forth in Section 8.6.2.3.

---

**Eligible LC Issuer** means a financial institution with long term unsecured debt ratings of at least the following, from at least two of the listed major rating agencies: (a) A- by Standard & Poor's Ratings Services; (b) A3 by Moody's Investor Service, Inc.; or (c) A- by Fitch Ratings.

**Eligible Surety(ies)** means a surety or insurance company, as applicable, meeting the requirements of applicable Law, licensed or authorized to do business in the State and rated at least "A" (excellent or above) according to A.M. Best's Financial Strength Rating and "VIII" or better according to A.M. Best's Financial Size Rating.

**Emergency** means any unplanned event within or adjacent to the Project Site that (a) causes or has the potential to cause disruption to operation of the Infrastructure Facility, (b) presents an immediate or imminent threat to the long term integrity of any part of the Facility, to the Environment, to property immediately adjacent to the Facility or to the safety of Building Occupants or the traveling public, or (c) is recognized or declared to be an emergency by the Mayor, Board of Supervisors, any other City official authorized under law, the Governor of the State, the Federal Emergency Management Administration (FEMA), the U.S. Department of Homeland Security or other Governmental Entity with authority to declare an emergency.

**Energy** means energy/power including electricity and natural gas.

**Energy Analysis Report** has the meaning set forth in Section 4.7 of Exhibit 12.

**Energy Pain Share/Gain Share Mechanism** means the energy risk share amount calculated pursuant to Appendix B (Functional Areas, Functional Units, Functional Unit Rankings and Deduction Amounts for Availability Failures) to Exhibit 4B (Availability Payment Mechanism).

**Energy Performance Commencement Date** means the date on which the Independent Energy Auditor issues the AET that is agreed to by Principal Project Company and City.

**Energy Service** means any calculated or metered provision of Energy in respect of the Regulated Load and Non-Regulated Load at the Utility connection.

**Engineer of Record (EOR)** has the meaning set forth in Section 1.1.4.2 of Division 10 of the Technical Requirements.

**Environment** means air, soils, submerged lands, surface waters, groundwaters, land, stream sediments, surface or subsurface strata, biological resources, including endangered, threatened and sensitive species, natural systems, including ecosystems, cultural (including historic and archaeological) resources and paleontological resources.

**Environmental Approvals** means all Regulatory Approvals arising from or required by any Environmental Law in connection with the Project.

**Environmental Compliance Plan** means the procedures and plans described in Sections 01 35 49, 01 35 50 and 01 35 51 of Division 10 of the Technical Requirements.

**Environmental Law(s)** means (a) any Law applicable to the Project or the Work regulating or imposing liability or standards of conduct that pertains to the Environment, Hazardous Materials, contamination of any type whatsoever, or health and safety matters, and (b) any requirements and standards that pertain to the protection of the Environment, or to the management or

---

Release of Hazardous Materials, contamination of any type whatsoever, or health and safety matters with respect to Hazardous Materials, set forth in any agreements, permits, licenses, approvals, plans, rules, regulations or ordinances adopted, or other criteria and guidelines promulgated, pursuant to Laws applicable to the Project or the Work, as each of the foregoing have been or are amended, modified, or supplemented from time to time (including any present and future amendments thereto and reauthorizations thereof), including those relating to:

- (a) the manufacture, processing, use, distribution, existence, treatment, storage, disposal, generation and transportation of Hazardous Materials;
- (b) air, soil, surface and subsurface strata, stream sediments, surface water, and groundwater;
- (c) releases of Hazardous Materials;
- (d) protection of wildlife, endangered, threatened, and sensitive species, wetlands, water courses and water bodies, paleontological, cultural, archaeological and historical resources and natural resources;
- (e) the operation and closure of underground or aboveground storage tanks;
- (f) health and safety of employees and other persons with respect to Hazardous Materials; and
- (g) notification, documentation and record keeping requirements relating to the foregoing.

Without limiting the above, the term “Environmental Laws” shall also include the following (each as may be amended from time to time):

- (i) the National Environmental Policy Act (42 U.S.C. § 4321 et seq.);
- (ii) the Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. § 9601 et seq.) and associated Superfund Amendments and Reauthorization Act (42 U.S.C. § 9601 et seq.);
- (iii) the Solid Waste Disposal Act (42 U.S.C. § 6901 et seq.);
- (iv) the Emergency Planning and Community Right to Know Act of 1986 (42 U.S.C. § 11001 et seq.);
- (v) the Clean Air Act (42 U.S.C. § 7401 et seq.);
- (vi) the Federal Water Pollution Control Act, as amended by the Clean Water Act (33 U.S.C. § 1251 et seq.);
- (vii) the Resource Conservation and Recovery Act (42 U.S.C. § 6901 et seq.);
- (viii) the Hazardous and Solid Waste Amendments of 1984 (42 U.S.C. § 6924 et seq.);

- 
- (ix) the Toxic Substances Control Act (15 U.S.C. § 2601 et seq.);
  - (x) the Hazardous Materials Transportation Act (49 U.S.C. § 5101 et seq.);
  - (xi) section 404 of the Clean Water Act (33 U.S.C. § 1344);
  - (xii) the Oil Pollution Act (33 U.S.C. § 2701 et. seq.);
  - (xiii) the Federal Insecticide, Fungicide and Rodenticide Act (7 U.S.C. § 136 et seq.);
  - (xiv) the Federal Safe Drinking Water Act (42 U.S.C. § 300 et seq.);
  - (xv) the Federal Radon and Indoor Air Quality Research Act (42 U.S.C. § 7401 et seq.);
  - (xvi) the Occupational Safety and Health Act (29 U.S.C. § 651 et seq.);
  - (xvii) the Endangered Species Act (16 U.S.C. § 1531 et seq.);
  - (xviii) the Fish and Wildlife Coordination Act (16 U.S.C. § 661 et seq.);
  - (xix) the California Environmental Quality Act (§ 21000 et seq. of the California Public Resources Code);
  - (xx) the California Clean Air Act of 1988 (§ 39000 et seq. of the California Health and Safety Code);
  - (xxi) the California Occupational Safety and Health Act of 1973 (§ 6300 et seq. of the California Labor Code);
  - (xxii) the Porter-Cologne Water Quality Act (§ 13000 et seq. of the California Water Code);
  - (xxiii) the Integrated Waste Management Act of 1989 (§ 40000 et seq. of the California Public Resources Code);
  - (xxiv) the Safe Drinking Water and Toxic Enforcement Act of 1986 (§ 25249.5 et seq. of the California Health and Safety Code);
  - (xxv) Hazardous Waste Control (§ 25100 et seq. of the California Health and Safety Code); and
  - (xxvi) Fish and Wildlife Protection and Conservation (§ 1600 et seq. of the California Fish and Game Code).

**Environmental Management System** or **EMS** means the system prepared and submitted by Principal Project Company and approved by the City in accordance with Section B.22.2 of the IFM Specifications, as updated in accordance with this Agreement.

---

**Environmental Protection Program** means the overarching system by which Principal Project Company shall ensure that commitments made during the environmental approval and permitting processes, and other environmental requirements, be carried forward and reflected, as appropriate, in the design and implemented throughout the Work, as provided in Sections 01 35 49, 01 35 50 and 01 35 51 of Division 10 of the Technical Requirements.

**Equipment List** means the list of all FF&E for the Infrastructure Facility prepared and maintained in accordance with this Agreement which identifies PPC-Furnished FF&E, City-Furnished Equipment and Existing FF&E. The initial form of the Equipment List is included in Appendix 1 of Division 3 of the Technical Requirements.

**Equity Investment(s)** means (a) any form of direct cash investment by Equity Members, including the purchase of newly issued equity shares in Principal Project Company and/or subordinated loans to Principal Project Company, and (b) any cash draws by or on behalf of Principal Project Company under the letter(s) of credit described in the definition of Deferred Equity Amount.

**Equity IRR** means the nominal post-tax internal rate of return to the Committed Investment over the full Term calculated, using the Financial Model, at the discount rate that, when applied to Committed Investment cash flows, gives a zero net present value. Equity IRR is initially equal to the Original Equity IRR and can change when and if the Financial Model is updated pursuant to Section 4.7.2 (Updates to the Financial Model). For purposes of this definition the phrase “post-tax” refers only to U.S. federal income tax, state income tax, and San Francisco gross receipts, homelessness gross receipts, and overpaid executive gross receipts taxes liability of Principal Project Company or its Equity Members (or, if an Equity Member is a single-member limited liability company disregarded for federal and state income tax purposes, the owner of such Equity Member) and specifically excludes (a) any foreign income tax and other tax of any kind, and (b) any withholding tax, including any tax that Principal Project Company or an Equity Member is obligated to withhold on Distributions (whether actual or constructive) or other payments or allocations to Equity Members or holders of debt of or equity interests in an Equity Member under 26 U.S.C. §§ 1441 – 1446, notwithstanding 26 U.S.C. § 1461.

**Equity Letter of Credit** means an irrevocable and unconditional on-demand letter of credit (which may be annually renewable) issued by an Eligible LC Issuer for the account of an Equity Member naming Principal Project Company and/or the Collateral Agent as beneficiary and securing the provision of any Deferred Equity Amounts by a date that is not later than the Final Acceptance Date.

**Equity Member(s)** means (a) [\_\_\_\_\_] and any Person that holds a direct ownership interest (legal and beneficial) in [\_\_\_\_\_] either based on Committed Investments or as a result of an Equity Transfer; or (b) each Person that will hold a 10% or greater indirect interest in Principal Project Company.

**Equity Member(s) Debt** means bona fide indebtedness for funds borrowed that: (a) is held by any Equity Member or Affiliate of any Equity Member; and (b) is subordinated in priority of payment and security to all Project Debt held by Persons who are not Equity Members or Affiliates of any Equity Member.

---

**Equity Members Funding Agreement** means any loan agreement, credit agreement or other similar financing agreement or subordination agreement providing for or evidencing Equity Member Debt.

**Equity Transfer** means any assignment, mortgage, encumbrance, hypothecation, conveyance, sale, or other transfer of equity interest in Principal Project Company.

**Escalated Benchmark Insurance Premiums** has the meaning set forth in Section 10.1.3(d)(ii).

**Escalation Factor** means the escalation factor calculated in accordance with Section 2 (Escalation Factor) of Exhibit 4B (Availability Payment Mechanism).

**Exempt Refinancing** means:

- (a) any Refinancing that was fully and specifically identified and taken into account in the Base Case Financial Model;
- (b) any of the following, provided that Principal Project Company does not receive a direct or indirect financial benefit therefrom, individually or in the aggregate:
  - (i) amendments, modifications, supplements or consents to Financing Agreements and Security Documents; or
  - (ii) the exercise by a Lender of rights, waivers, consents and similar actions, in the ordinary course of day-to-day loan administration and supervision;
- (c) movement of monies between the Project accounts in accordance with the terms of Financing Agreements and Security Documents;
- (d) any of the following acts by a Lender of senior lien priority Project Debt: (i) the syndication of any of such Lender's rights and interests in the senior Financing Agreements; (ii) the grant by such Lender of any rights of participation, or the disposition by such Lender of any of its rights or interests, with respect to the senior Financing Agreements in favor of any other Lender of senior lien Project Debt or any other investor; or (iii) the grant by such Lender of any other form of benefit or interest in either the senior Financing Agreements or the revenues or assets of Principal Project Company, whether by way of security or otherwise, in favor of any other Lender of senior lien Project Debt or any investor; and
- (e) periodic resetting and remarketing of tax-exempt or taxable bonds that bear interest at a variable or floating rate and are money market eligible under SEC Rule 2a-7.

**Existing FF&E** means all FF&E identified by City in the updated Equipment List under Section 7.13.2 (Selection of City-Furnished Equipment and Existing FF&E).

**External Energy Auditor** means a company licensed in California, specializing in assessing the energy efficiency of commercial and industrial buildings ('audit'), including the review of specifications, analysis of consumption data, energy modeling, and provision of recommendations.

---

**Extra Work** means any Work in the nature of additional work, altered work or deleted work that is directly attributable to the occurrence of a Compensable Delay Event, a Compensable Relief Event or uninsured Force Majeure Event (to the extent permitted under Section 14.6 (Loss or Damage Due to Force Majeure Termination Event)) and, absent the Compensable Delay Event, Compensable Relief Event or uninsured Force Majeure Event (to the extent permitted under Section 14.6 (Loss or Damage Due to Force Majeure Termination Event)), would not be required by the Contract Documents. The term “Extra Work” does not include “Delay”.

**Extra Work Costs** means the incremental increase in Principal Project Company’s cost of labor, material, equipment and other direct and indirect costs directly attributable to Extra Work, calculated in accordance with Section 1 of Exhibit 13 (Costs Schedule).

**Facility** means the Bus Yard Component, Joint Development Alternative (if built), and Common Infrastructure, collectively.

**Facility Condition Index** or **FCI** means the total maintenance, repair and replacement deficiencies of the Infrastructure Facility divided by the current replacement value of the Infrastructure Facility.

**Failure Event** means a D&C Failure Event or an IFM Failure Event, or both as the context requires.

**Failure Type** means the designation of either “SF” (Service Failure), in the Performance Measurements Table or “AF” (Availability Failure) in the case of an IFM Failure Event which has not been rectified within the relevant Rectification Time and which causes a Functional Part to be Unavailable.

**Final Acceptance** means that all D&C Work is complete and all other prerequisites for Final Acceptance have been met. Final Acceptance is deemed to have occurred upon satisfaction of all the conditions in Section 7.9 (Final Acceptance), as confirmed by City’s issuance of a certificate in accordance with the procedures and within the time frame established in Section 7.9 (Final Acceptance).

**Final Acceptance Date** means the date that Final Acceptance is achieved.

**Final Acceptance Deadline** means 180 days after the Substantial Completion Date, as such date may be extended from time to time pursuant to Section 14.1.2 (Extension of Deadlines for General Delay Events).

**Final Design** means the general design stage, consistent of all elements, collections of elements or areas of the Project at 100% design completion, as more fully set forth in the Technical Requirements, and depending on the context: the term “Final Design” may refer to (a) the Final Design Documents, (b) the design concepts set forth in the Final Design Documents or (c) the process of development of the Final Design Documents.

**Final Design Documents** means the complete final construction plans (including plan sheets, specifications, technical memoranda, reports, studies, calculations, drawings, elevations, sections, details and diagrams) and specifications needed for performance of Construction Work, which includes all Submittals specified as required to be part of the Final Design or Final Design Documents under the Technical Requirements.

---

**Final Environmental Impact Report (FEIR)** means the Final Environmental Impact Report for the Potrero Yard Modernization Project at 2500 Mariposa Street (Planning Department Case No. [\_\_\_\_]), dated [\_\_\_\_] and available at <https://sfplanning.org/environmental-review-documents?title=Potrero+Yard+Modernization+Project>.

**Final Schedule Report** means has the meaning set forth in Section 1.2.5 of Division 1 of the Technical Requirements.

**Finance Plan** means Principal Project Company's plan for financing the Project submitted to City at Performance Milestone 32 of the Predevelopment Agreement.

**Finance Plan Due Date** means the date on which Principal Project Company submitted its final Finance Plan to City at Performance Milestone 32 of the Predevelopment Agreement.

**Finance Plan Validity Period** means the period of 180 consecutive days commencing on the Finance Plan Due Date, as such period may be extended under the terms of the Predevelopment Agreement. If the period of 180 consecutive days commencing on the Finance Plan Due Date ends on a weekend or national holiday, then the Final Finance Plan Validity Period shall end on the next Business Day.

**Financial Close** means satisfaction by Principal Project Company of (a) all conditions precedent to the effectiveness of commitments of the Lenders under the Financing Documents; and (b) the conditions set forth in Section 3.2.4 (Conditions Precedent to Financial Close).

**Financial Close Date** means the date on which Financial Close occurs.

**Financial Close Deadline** means [\_\_\_\_\_, 2025], as such date may be extended by agreement of the Parties or as a result of an Adverse Event or other excuse set forth in this Agreement.

**Financial Close Security** means the bond or letter of credit in the amount of \$15,000,000 provided by Principal Project Company to City as a condition precedent to execution and delivery of this Agreement by both City and Principal Project Company.

**Financial Model** means the Microsoft Excel-based financial model that includes financial forecasts, projections and calculations with respect to revenues, expenses, the repayment of Project Debt and Distributions to Equity Members that result in achievement of the Equity IRR, which shall be in macro-enabled excel format, on electronic storage media, or in such other format and medium as the Parties may agree in writing.

**Financial Model Update(s)** has the meaning set forth in Section 4.7.2.1.

**Financial Modeling Data** means all books, documents and back-up information in any media or format setting forth all assumptions, estimates, projections, calculations and methodology used in the preparation of the Implementation Proposal, the Financial Model, and in Financial Model Updates of revenues, pricing, costs, expenses, repayment of Project Debt, Distributions and internal rate of return, including:

- (a) the logical layout and structure of the Financial Model, including the names of all worksheets and a description of the color coding and/or labeling scheme(s);

- 
- (b) an assumptions book, fully describing all assumptions and their sources underlying the estimates, projections and calculations in the Financial Model, revisions to the Base Case Financial Model in accordance with Sections 3.2.4 (Conditions Precedent to Financial Close) and 3.3.1, and updates to such assumptions book related to Financial Model Updates;
  - (c) a detailed description of the function and intended use of all macros (each of which must be logically structured and well documented with comments included within the programming code);
  - (d) the step-by-step instructions on the procedure to run and to optimize the Financial Model submitted with the Finance Plan and each Financial Model Update, such that City will be able to read, use and modify the data contained therein, operate the Financial Model and conduct detailed sensitivity analyses;
  - (e) copies of all offers, and all data and information within this definition, received from all Contractors (at all tiers) identified in the Implementation Proposal;
  - (f) copies of all offers, and all data and information within this definition, received from all Contractors (at all tiers) related to any Relief Event; and
  - (g) all other supporting data, technical memoranda, calculations, formulas, unit and materials prices (if applicable) and such other cost, charge, fee, financing, equity return, and revenue information used by Principal Project Company in the creation and derivation of the Implementation Proposal, Finance Plan, the Financial Model, or of any Financial Model Update, or related to any Delay Event, Relief Event or Change Order.

**Financial Proposal** means the Financial Proposal provided at Exhibit 3A (Financial Proposal). ***[Note to PNC: This will include the Finance Plan, including the Base Case Financial Model, with its audited report, and respective commitment letters for Bank Debt, Equity Investments, Security Documents and Insurance Policies, among other documents, and including the Final Price as determined under the PDA, PPC's financing costs, along with a schedule including the proposed Milestone Payment amount and the proposed Availability Payments payable from Substantial Completion to the end of the PDA Term.]***

**Financing Agreement** means:

- (a) any loan agreement, funding agreement, account maintenance or control agreement, insurance or reimbursement agreement, intercreditor agreement, subordination agreement, trust indenture, agreement from any Equity Member in favor of any Lender, hedging agreement, interest rate swap agreement, guaranty, indemnity agreement, agreement between any Contractor and any Lender, or other agreement by, with or in favor of any Lender pertaining to Project Debt (including any Refinancing), other than Security Documents;
- (b) any note, bond or other negotiable or non-negotiable instrument evidencing the indebtedness of Principal Project Company for Project Debt (including any Refinancing); and

- 
- (c) any amendment, supplement, variation or waiver of any of the foregoing agreements or instruments.

**Financing Delay Costs** means:

- (a) in the case of Delay Events, an amount equal to principal payments, interest payments, hedging costs and other financing costs accrued and/or paid, or which became payable, by Principal Project Company to the Senior Lenders in accordance with the Financing Agreements that accrued during the period of the schedule extension granted pursuant to Section 14.1.2 (Extension of Deadlines for General Delay Events); and
- (b) in the case of City-Caused Delay Event only, such other amounts so as to result in Principal Project Company achieving the same Equity IRR (with reference to the Base Case Equity IRR) as if such Compensable Delay Event had not occurred.

**Financing Documents** means Financing Agreements and Security Documents.

**Financing Document Terms** means Exhibit 5G (Financing Document Terms).

**Fiscal Year** means the consecutive 12 calendar month period starting on July 1 and ending on June 30.

**Fixed IFM Costs** means the sum of those fixed costs:

- (a) incurred by the IFM Provider with respect to insurance premiums, office rental and office expenses, equipment hire costs, depreciation on items of equipment used by Principal Project Company in the performance of the IFM Services excluding:
- (ii) equipment incorporated into the Infrastructure Facility and not capable of being demobilized and remobilized to a different site or portion of the Work, the Project, the Infrastructure Facility, the Project Site or to another project;
  - (iii) third party accounting, audit and legal costs; and
  - (iv) any costs payable by Principal Project Company to the IFM Provider for the provision of labor,
- (a) incurred directly by the IFM Provider during the IFM Period in meeting its obligations in accordance with this Agreement and solely and directly attributable to the Project and which are not reasonably capable of being deferred or avoided by the IFM Provider; and
- (b) evidenced in writing to the reasonable satisfaction of the City's Authorized Representative.

**Float** means the amount of time that any given activity or logically connected sequence of activities shown on the Project Schedule may be delayed before it will affect the Substantial

Completion Deadline or Final Acceptance Deadline, as applicable. Float is generally identified on the Project Schedule as the difference between the early start date and late start date, or early completion date and late completion date for activities shown on the Project Schedule, and shall include any float contained within an activity as well as any period containing an artificial activity (that is, an activity that is not encompassed within the meaning of the definition of “D&C Work”).

**Force Account Work** means Change Order work that City authorizes and will pay for on the basis of direct costs plus markup on direct costs for overhead and profit as provided in Exhibit 13 (Costs Schedule).

**Force Majeure Event** means the occurrence of any of the following events or circumstances which directly causes either Party to be unable to perform all or a material part of its obligations under this Agreement:

- (a) war (including civil war or revolution), invasion, violent act of foreign enemy or armed conflict occurring within the continental United States or military or armed blockade, or military or armed takeover of the Project;
- (b) any act of terrorism, riot, insurrection, civil commotion or sabotage that causes direct physical damage to, or otherwise directly causes interruption to construction or direct losses during maintenance of, the Project;
- (c) national or state-wide strikes not specific to Principal Project Company, or embargoes, that, in each case, directly cause interruption to construction or direct losses during maintenance of the Project;
- (d) nuclear, radioactive, or biological contamination of the Project unless the source or cause of the contamination is brought to or near the Project Site by PPC-Related Entities, or is the result of any PPC Fault;
- (e) flood, fire, explosion, tidal wave, sinkhole caused by natural events, or landslide caused by natural events, in each case, occurring within the City and directly impacting the Project or performance of Work;
- (f) SFMTA staff strikes and work stoppages not caused by PPC Fault that directly cause interruption to construction or direct losses during maintenance of the Project;
- (g) any City, or governor-declared, Emergency within the limits or precluding access to the Project Site;
- (h) (i) any epidemic in the State; or (ii) Pandemic (defined as the worldwide spread of a disease due to lack of immunity in most people, excluding COVID-19);
- (i) a Change in Law (other than a Relevant Change in Law);
- (j) an electricity outage upstream from the connection to the Project Site that affects prosecution of the IFM Services, provided that Principal Project Company was not, in whole or in part, the cause of such outage and was in compliance with

---

Section 2.10.5 of Division 3 of the Technical Requirements and all other requirements in the Contract Documents regarding back-up power for the Project; and

- (k) a seismic event in excess of a magnitude 3.5 on the Richter Scale, where (i) such Earthquakes, ground shaking, liquefaction, settlement, or ground movements directly impact, and cause damage to, temporary or permanent works of the Project; and (ii) such event is not insured or required to be insured under the terms of the Contract Documents.

**Force Majeure Termination Event** has the meaning given in Section 17.2.1.

**Functional Component** means a room, space or system within a Functional Unit in the Infrastructure Facility, which is specified as such in Appendix C (Functional Areas, Functional Units, Functional Unit Rankings and Deduction Amounts for Availability Failures) of Exhibit 4 (Payment Mechanism).

**Functional Component Rank** means the rank on a scale of 1 to 5 ascribed to each Functional Component in the Infrastructure Facility for the purpose of establishing Deduction Amounts associated with each Functional Component and calculating Deductions for Availability Failures based on the Rectification Time as set out in Appendix B (Response and Rectification Times) of Exhibit 4 (Payment Mechanism).

**Functional Part** means either a Functional Unit or a Functional Component.

**Functional Unit** means an area of the Infrastructure Facility specified as such in Appendix C (Functional Areas, Functional Units, Functional Unit Rankings and Deduction Amounts for Availability Failures) of Exhibit 4 (Payment Mechanism) comprising one or more Functional Components.

**Geotechnical Baseline Report (GBR)** means the report entitled Geotechnical Baseline Report, set forth in Appendix A of Division 3 of the Technical Requirements.

**Good Faith Efforts** means (a) with respect to DBE, the efforts to meet the DBE goal required under 49 CFR Part 26, Appendix A, (B) with respect to SBE, the efforts to meet the SBE Goal required by the Project Agreement.

**Good Industry Practice** means:

- (a) in the case of Work (excluding the Design Work), the exercise of the degree of skill, diligence, prudence and foresight which would reasonably and ordinarily be expected from a skilled and experienced constructor, supplier, operator or maintenance provider, as applicable, operating in the United States under the same or similar circumstances and conditions, seeking in good faith to comply with its contractual obligations, the Contract Documents and all applicable Laws and Regulatory Approvals in conformance with all professional engineering principles, construction, operations and maintenance practices generally accepted as standards of the industry in the State. With respect to storm water management for construction activities, Good Industry Practice means Best Management Practices;

in the case of Design Work, the exercise of the degree of skill, diligence, prudence, and foresight which would reasonably and ordinarily be expected from a professional designer or engineer, as applicable, operating in the United States under the same or similar circumstances and conditions, seeking in good faith to comply with its contractual obligations, the Contract Documents and all applicable Laws and Regulatory Approvals and engaged in the same type of undertaking under circumstances similar to the Project and conditions similar to those within the same geographic area as the Project Site.

**Government Code Dispute** has the meaning set forth in Section 18.4 (Government Code Dispute).

**Governmental Entity(ies)** means City in its regulatory capacity, any federal, state, local or foreign government and any political subdivision or any governmental, quasi-governmental, judicial, public or statutory instrumentality, administrative agency, authority, body or entity other.

**Governmental Utility(ies)** has the meaning set forth in Section 00 73 20 of Division 10 of the Technical Requirements.

**Handback** means the stage when Principal Project Company has done everything that this Agreement requires to enable Principal Project Company to handover the Project to meet the Handback Requirements at the end of the Term or Early Termination Date.

**Handback Inspection** has the meaning set forth in Section 8.5.4.1(c).

**Handback Renewal Work** means the Renewal Work required in order for the Project to meet the Handback Requirements.

**Handback Renewal Work Plan** means the plan prepared and submitted by Principal Project Company in accordance with Section F of the IFM Specifications, as updated and approved by the City in accordance with this Agreement.

**Handback Requirements** means the terms, conditions, requirements and procedures governing the condition in which Principal Project Company is to deliver the Infrastructure Facility and the Project Site upon Handback, as stated in Section F of the IFM Specifications.

**Handback Requirements Letter(s) of Credit** has the meaning set forth in Section 8.6.5.1.

**Handback Requirements Recovery Plan** means the plan to perform additional work needed to meet the Handback Requirements at the end of the IFM Period prepared and submitted by Principal Project Company in accordance with Section F.2 of the IFM Specifications, as updated and approved by the City in accordance with this Agreement.

**Handback Requirement Recovery Work** means the additional work as identified in the Handback Requirements Recovery Plan needed to bring any element of the Infrastructure Facility to meet the Handback Requirements.

**Handback Requirements Reserve Account** means the account established pursuant to Section 8.6.1.1.

---

**Handback Requirements Reserve Balance** means: (a) if no Handback Requirements Letter of Credit is delivered pursuant to Section 8.6.5.1, all amounts standing to the credit of the Handback Requirements Reserve Account on the Termination Date; or (b) if any Handback Requirements Letter of Credit is delivered pursuant to Section 8.6.5.1, all amounts that would have been standing to the credit of the Handback Requirements Reserve Account on the Termination Date if no Handback Requirements Letter of Credit had been delivered pursuant to Section 8.6.5.1.

**Handback Reserve Amount** has the meaning set forth in Section 8.5.4.2(h).

**Handback Year** means each consecutive 12 calendar month period commencing seven full years before the expected end of the Term.

**Hazardous Material(s)** means any (a) substance, product, waste, pollutant, contaminant or other material of any nature whatsoever that exceeds maximum allowable concentrations for that material, as defined by any Environmental Law; (b) substance, product, waste, pollutant, contaminant or other material of any nature whatsoever that is or becomes listed, regulated, or addressed under any Environmental Law; (c) substance, product, waste, pollutant, contaminant or other material of any nature whatsoever which may give rise to liability under clause (a) or (b) or under any statutory or common law theory based on negligence, trespass, intentional tort, nuisance, or strict liability or under any reported decisions of a state or federal court; (d) petroleum hydrocarbons excluding de minimis amounts and excluding petroleum hydrocarbon products contained within regularly operated motor vehicles; and (e) hazardous building materials including asbestos or asbestos-containing materials, lead or PCBs in structures and/or other improvements on or in the Project Site or in subsurface artifacts. The term “Hazardous Materials” includes Hazardous Waste and contaminated materials.

**Hazardous Materials Event** means Hazardous Materials in, over, under or emanating from the Project Site or which has migrated onto the Project Site from land or premises adjoining the Project Site that (1) render use of the Project unsafe or potentially unsafe absent assessment, containment and/or remediation, or (2) are required by applicable Law to be recycled, treated or stored, excluding Hazardous Materials:

- (a) that are Known or Suspected Hazardous Materials; and
- (b) to the extent caused, contributed, or, once discovered, exacerbated, by any PPC-Related Entity.

**Hazardous Materials Management** means procedures, practices and activities to address and comply with Environmental Laws and Environmental Approvals with respect to Hazardous Materials encountered, impacted, caused by or occurring in connection with the Project, Project Site or the Work (including demolition Work), including investigation and remediation of such Hazardous Materials. Hazardous Materials Management may include sampling, characterization, stock-piling, storage, backfilling in place, asphalt batching, recycling, treatment, clean-up, remediation, transportation and/or off-site disposal of Hazardous Materials, whichever approach is effective, most cost-efficient and permitted under applicable Law.

**Hazardous Waste** means waste as defined in 40 CFR Part 261 and/or 22 California Code of Regulations 66260.10.

---

**HCC Agreement** means an agreement between City and the Housing Project Company (or between City and the Principal Project Company and assigned by Principal Project Company to a Housing Project Company), pursuant to which City will grant a long-term real property interest in certain premises for the development of the Housing and Commercial Component.

**Health and Safety Plan** means Principal Project Company's plan describing the policies and procedures to be followed by all PPC personnel at the Site under CFR Title 29, CCR Title 8 and other applicable regulations, prepared and submitted by Principal Project Company in accordance with Section 01 35 45 of Division 10, as updated and approved by the City in accordance with this Agreement.

**Help Desk** means the contact point to be established by Principal Project Company pursuant to these IFM Specification for the notification of Failure Events and other day to day matters arising in relation to the provision of IFM Services.

**Help Desk Services** means services described in Section B.17 of the IFM Specifications, including methods and systems to receive, track and dispatch work requests, and track IFM Failure Events.

**Housing and Commercial Component** or **HCC** means the Facility's housing and commercial component, which, if implemented, would include the commercial space, the housing units and their associated support spaces (e.g., lobbies, vertical and horizontal circulation, storage, open space, rooms for building systems, offices for property management and residential services, and resident amenities such as laundry and community rooms) that are not used for the Bus Yard Component or the Common Infrastructure.

**IFM Contract** means each Contract between Principal Project Company and an IFM Provider. There may be more than one IFM Contract concurrently in effect.

**IFM Failure Event** means an incident or state of affairs which does not meet or comply with the IFM Specifications and/or results in an Availability Condition not being met in a Functional Part. An IFM Failure Event will become:

- (a) an Availability Failure, if it causes a Functional Unit or Functional Component (as the case made be) to be Unavailable and the IFM Failure Event is not Rectified within the Rectification Time;
- (b) separate and distinct Service Failures, if the IFM Failure Event is not Responded to within the Response Time or Rectified within the Rectification Time (in the case of IFM Failure Events requiring Rectification which do not constitute a breach of the Availability Conditions); or
- (c) if, in accordance with Performance Measurements Table, no Rectification Time or Response Time applies, the IFM Failure Event shall be a Service Failure.

**IFM Management Plan** means the document titled "IFM Management Plan" that is included in the approved PMP, which is attached as part of Exhibit 2 (Project Management Plan). The preliminary "IFM Management Plan" will be replaced with a final approved "IFM Management Plan", which shall be developed and submitted by Principal Project Company and approved by the City pursuant to Section 1.1.8 of Division 1 of the Technical Requirements and applicable

sections of the IFM Specifications, as updated in accordance with this Agreement.

**IFM Noncompliance Point(s)** means an accrual of points in accordance with Section 6 (IFM Noncompliance Points System) of Exhibit 4B (Availability Payment Mechanism).

**IFM Operations Committee** has the meaning set forth in Section B.9.1.2 (IFM Operations Committee) of the IFM Specifications.

**IFM Period** means that portion of the Term commencing on the later of the Substantial Completion Date and the Substantial Completion Deadline and ending on the Termination Date.

**IFM Period Deduction(s)** means an Availability Deduction and/or a Service Failure Deduction from the Availability Payment in accordance with Section 3 (Deductions from Availability Payments) of Exhibit 4B (Availability Payment Mechanism).

**IFM Project Site** means the real property owned by City, under the jurisdiction of SFMTA, on which the Infrastructure Facility is located as described and shown on the [IFM Site Plan]t. For purposes of insurance (subject to any notification and other requirements imposed by the insurer(s) for approval), indemnification, safety and security requirements, the prevailing wage requirements, and payment for use of equipment, the term “Project Site” shall also include (a) the field office sites, (b) any property used for bonded storage of material for the Project approved by City, (c) staging areas dedicated to the Project, and (d) areas where activities incidental to the Project are being performed by Principal Project Company and Contractors covered by the worker’s compensation policy but excluding any permanent locations of Principal Project Company or such covered Contractors.

**IFM Provider** means the Contractor primarily responsible for the IFM Services.

**IFM Quality Management Plan** means the plan prepared and submitted by Principal Project Company and approved by the City pursuant to Section B.14 of the IFM Specifications, as updated in accordance with this Agreement.

**IFM Records** means all data in connection with maintenance, operation, renewals and expansion of the Project including (a) all inspection and inventory records, whether generated by Principal Project Company or a Third Party, (b) any communication to and/or from City or a Third Party, and (c) any information system (as may be introduced or amended by City from time to time) in connection with operation, maintenance, renewal or handback of the Project that City requires Principal Project Company to use or operate.

**IFM Services** means all management, engineering, repairs and maintenance, renewals and replacement, and other ancillary services required at all times for the Infrastructure Facility to allow for the ongoing operations and maintenance activities needed at the Infrastructure Facility and to meet the service requirements specified in the IFM Management Plan and the Technical Requirements. IFM Services includes Maintenance Services, Renewal Work, and Technology Enhancements, but excludes D&C Work and SFMTA O&M Services.

**IFM Services Procedures** means the procedures prepared and submitted by Principal Project Company and approved by the City in accordance with Section B.6(3) of the IFM Specifications, as updated in accordance with this Agreement.

---

**IFM Services Submittals** means all Submittals required to be submitted under this Agreement with respect to the IFM Services.

**IFM Specifications** means Division 7 of the Technical Requirements.

**Implementation Proposal** means the Financial Proposal, provided at Exhibit 3A (Financial Proposal); and the specific elements of the following documents included at Exhibit 3B (Technical Proposal Elements): (i) the Lead Developer's design submittals under the Predevelopment Agreement, (ii) the D&C Contractor's design-build proposal for the D&C Contract submitted to Lead Developer in accordance with the Predevelopment Agreement, and (c) the IFM Provider's proposal for the IFM Contract submitted to Lead Developer in accordance with the Predevelopment Agreement.

**Incidental Utility Work** means, for all Utilities, all of the following work necessary for construction of the Project, including any necessary coordination with Utility Owners and property owners, furnishing design, performing construction, and obtaining and complying with all required Regulatory Approvals:

- (a) Service Line relocations;
- (b) The adjustment of Utility appurtenances (e.g., manholes, valve boxes and vaults) for line and grade upon completion of roadway work;
- (c) Protection in Place of Utilities;
- (d) All work necessary to remove and dispose of any Utilities (whether or not in use as of the Effective Date) in situations for which leaving the Utilities in place is not feasible or not permitted, or is required in order to accommodate or permit construction of the Project, regardless of whether replacements for such Utilities are being or have been installed in other locations;
- (e) All work necessary to abandon in place any Utility in accordance with applicable Law and proper Utility Owner and/or industry procedures (e.g., flushing, capping, slurry backfill, etc.) regardless of whether replacements for such Utilities are being or have been installed in other locations;
- (f) Traffic control for Utility Adjustment work;
- (g) Resurfacing and re-striping of streets; reconstruction of curbs, gutters and sidewalks; reinstallation of signage; and reinstallation or replacement of traffic signals;
- (h) Supplemental investigation, potholing, electronic detection, surveying and any other methods used to determine Utility locations, preparation of Principal Project Company's Utility conflict matrix and other material information concerning Utilities;
- (i) Temporary Relocations; and
- (j) Earthwork trenching requested by a Utility Owner.

---

**Increased Oversight Cure Plan** means the plan including specific actions (including timeframes) to be taken by Principal Project Company, to improve its performance, prepared and submitted by Principal Project Company in accordance with Section 15.6.4(a) of the Agreement, as updated and approved by the City in accordance with this Agreement.

**Increased Oversight Threshold** means:

During the D&C Phase;

- (a) Principal Project Company receives a total of 200 or more Noncompliance Points over the course of 12 consecutive calendar months (determined on a rolling basis); or
- (b) Principal Project Company receives a total of 350 or more Noncompliance Points over the course of 36 consecutive calendar months (determined on a rolling basis);

During the IFM Period;

- (c) Principal Project Company receives a total of 1406 or more Noncompliance Points over the course of 12 consecutive calendar months (determined on a rolling basis); or
- (d) Principal Project Company receives a total of 3687 or more Noncompliance Points over the course of 36 consecutive calendar months (determined on a rolling basis); or
- (e) Principal Project Company receives a second Performance Notice, either on a successive basis or for matters related to a prior Performance Notice.

**Indemnitees** means City, including its boards and commissions, other persons and entities designated as “Indemnitees” in the Contract Documents, and all of their respective officeholders, officers, directors, agents, members, consultants, employees, authorized representatives, successors, and assigns.

**Independent Energy Auditor** or **IEA** means a company specializing in energy modelling and reporting that is a licensed, professional engineer in the state of California.

**Independent Engineer** means the independent engineering consultant retained by the Parties in accordance with Section 8.6.2 (Independent Engineer).

**Information Management Plan** means Principal Project Company’s plan describing procedures to produce and control all documentation and relevant information, prepared and submitted by Principal Project Company in accordance with Section 1.6 of Division 1 of the Technical Requirements, as updated and approved by the City in accordance with this Agreement.

**Infrastructure Facility** means the Bus Yard Component and the Common Infrastructure.

---

**Initial Financing Agreements** means the documents identified in Part A (Initial Financing Agreements) of Exhibit 5A (List of Initial Financing Documents).

**Initial Financing Documents** means Initial Financing Agreements and Initial Security Documents.

**Initial Project Debt** means the Project Debt originally incurred to finance the Project and Work, in the total face amount at each lien priority, and with the particular Lenders, set forth in the Contract Documents, which Project Debt is evidenced by the Initial Financing Agreements and secured by the Initial Security Documents.

**Initial Schedule** means the schedule attached as Exhibit 19 (Initial Schedule), setting out all the relevant D&C Work activities from Commercial Close through Final Acceptance, with key interim milestones during that period of work, and at a minimum at Level 3 defined in AACE 91R-16 “Schedule Development”.

**Initial Security Documents** means the documents identified in Part B (Initial Security Documents) of Exhibit 5A (List of Initial Financing Documents).

**Institutional Lender** means:

- (a) The United States of America, any state thereof or any agency or instrumentality of either of them, any municipal agency, public benefit corporation or public authority, advancing or insuring mortgage loans or making payments which, in any manner, assist in the financing, development, operation and maintenance of projects;
- (b) Any (i) bank, trust company (whether acting individually or in a fiduciary capacity), savings and loan organization or insurance company organized and existing under the laws of the United States of America or any state thereof, (ii) foreign insurance company or bank qualified to do business as such, as applicable under the laws of the United States of America or any state thereof, or (iii) pension fund, foundation or university or college endowment fund; provided that an entity described in this clause (b) only qualifies as an Institutional Lender if it is subject to the jurisdiction of state and federal courts in the State in any actions;
- (c) Any “qualified institutional buyer” under Rule 144(a) under the Securities Act of 1933, 15 U.S.C. § 77a et seq., or any other similar Law hereinafter enacted that defines a similar category of investors by substantially similar terms;
- (d) Any purchaser of debt securities the proceeds of which are used to finance the Project that are not publicly offered pursuant to the exception to registration provided in Section 4(2) of the U.S. Securities Act of 1933; or
- (e) Any other financial institution or entity designated by Principal Project Company and approved in writing by City; provided that such institution or entity, in its activity under this Agreement, is acceptable under then current guidelines and practices of City;

---

provided, however, that each such entity (other than entities described in clause (c) and (d) of this definition), or combination of such entities if the Institutional Lender is a combination of such entities, shall have individual or combined assets, as applicable, of not less than \$1 billion. The foregoing dollar minimums shall automatically increase at the beginning of each calendar year by the percentage increase, if any, in the CPI during the immediately preceding calendar year, determined by comparing the CPI most recently published for the immediately preceding year with the CPI most recently published for the second preceding year.

**Insurance Policy(ies)** means all of the insurance policies Principal Project Company is required to carry under Exhibit 7 (Insurance Requirements).

**Insurance Proceeds** means all proceeds from insurance payable to Principal Project Company (or that would have been payable to Principal Project Company but for Principal Project Company's breach of any obligation under this Agreement to procure or maintain said insurance) on or after the Early Termination Date.

**Insurance Review Report** means the report furnished in accordance with Section 10.1.3(b).

**Insurance Unavailability** means either:

- (a) Any Insurance Policy coverage required under Section 10.1 (Insurance) or Exhibit 7 (Insurance Requirements) is deemed unavailable under Section 10.1.4 (Insurance Unavailability); or
- (b) Provision of all such Insurance Policy coverages has become unavailable at Commercially Reasonable Insurance Rates from insurers meeting the requirements in Section 10.1.2.1 (Insurers).

For the purpose of clause (b), the only increases in premiums that may be considered are those caused by changes in general market conditions in the insurance industry affecting insurance for project-financed transit facilities, and Principal Project Company shall bear the burden of proving that premium increases are the result of such changes in general market conditions. No increase in insurance premiums attributable to particular conditions of the Project or Project Site, or to claims or loss experience of any PPC-Related Entity or Affiliate, whether under an Insurance Policy required to be placed under this Agreement or in connection with any unrelated work or activity of PPC-Related Entities or Affiliates, shall be considered in determining whether Insurance Unavailability exists or has occurred.

**Intellectual Property** means all current and future legal and/or equitable rights and interests, anywhere in the world, in know-how, patents (including applications), copyrights (including moral rights), trademarks (registered and unregistered), service marks, trade secrets (as defined by the Defend Trade Secrets Act § 2(b)(1) (18 USC § 1839(3)), and pursuant to US state and federal laws), designs (registered and unregistered), utility models, circuit layouts, mask works, business and domain names, inventions, solutions embodied in technology, and other intellectual activity, and applications of or for any of the foregoing, subsisting in or relating to the Work or IP Materials. Without limiting the foregoing, Intellectual Property includes Software and City Data. For the avoidance of doubt, Intellectual Property is distinguished from the physical, electronic, and/or mechanical embodiments of such Intellectual Property (see IP Materials).

---

**IP Escrow(s)** has the meaning set forth in Section 21.5.2 of this Agreement.

**IP Escrow Agent** has the meaning set forth in Section 21.5.2 of this Agreement.

**IP Materials** means all physical, electronic and/or mechanical embodiments of, and documents disclosing, Intellectual Property. Without limiting the generality of the foregoing, IP Materials include embodiments, documents, deliverables and/or Work incorporating concepts, inventions (whether or not protected under patent laws), works of authorship, information, new or useful art, combinations, discoveries, formulae, algorithms, specifications, manufacturing techniques, technical developments, systems, computer architecture, artwork, Software, Source Code, decompilation instructions, programming, applets, scripts, designs, procedures, processes, and methods of doing business, and any other media, materials, plans, reports, project plans, work plans, documentation, training materials, and other tangible objects produced under the Contract or required by, incorporated into or combined with the Work or the Project.

**IT / Comms Site** means those areas related to City-Furnished IT/Comms FF&E, including locations of each MDF, IDF, wireless access point, RTLS point, a 15-foot radius immediately around each of these locations, and other areas the City, acting reasonably, deems necessary and identifies for PPC at least 14 days prior to the beginning of the City Access Period.

**JDA Project Company(ies)** means an entity, including a special-purpose entity(ies), that will undertake a Joint Development Alternative pursuant to an amendment to this Agreement or a separate agreement, including an HCC Agreement (with respect to the HCC).

**JDA-Related Entity(ies)** means:

- (a) each JDA Project Company;
- (b) any other persons or entities performing any work relating to a JDA;
- (c) any Affiliate of the Principal Project Company and any affiliate of any other PPC-Related Entity, any JDA Project Company and any other JDA-Related Entity participating in or responsible for any aspect of a JDA;
- (d) any other persons or entities for which a JDA Project Company may be legally or contractually responsible;
- (e) any non-City party to any separate agreement relating to a JDA, including an HCC Agreement, including all subcontractors, subconsultants and suppliers of any tier; and
- (f) the employees, personnel, officers, directors, agents, representatives, successors and assigns of any of the foregoing.

**Joint Development Alternative or JDA** means the design, construction, operation and/or maintenance of (i) an HCC; (ii) the Paratransit Facility or (iii) any other project or portion of the Facility for an SFMTA use, if and to the extent implemented.

**Joint Technical Review** has the meaning set forth in Section 8.5.4.1.

---

**Joint Technical Review Plan** has the meaning set forth in Section Error! Reference source not found.

**Joint Technical Review Report** has the meaning set forth in Section Error! Reference source not found.

**Key Contract** means any one of the following:

- (a) all Prime Contracts for Construction Work and Design Work;
- (b) all Prime Contracts for IFM Services;
- (c) all Prime Contracts for project or program management services; and
- (d) all other Prime Contracts with a single Contractor (or a single Contractor and its affiliates) that individually or in the aggregate total in excess of \$25 million on a term (not annual) basis.

The term “Key Contracts” means all such Contracts in the aggregate or more than one of such Contracts.

**Key Contractor** means each Contractor under any Key Contract.

**Key Personnel** means, collectively, those individuals: (a) in Exhibit 20 (List of Key Personnel); and (b) appointed by Principal Project Company and approved by City from time to time to fill the “Key Personnel” positions identified in Section 1.1.4 of Division 1 of the Technical Requirements (each is a “Key Person”).

**Key Ratios** means ratios contained in the Financing Documents that have financial covenants attached to them or ratios that are condition precedents to Financial Close under the Financing Agreements.

**Known or Suspected Hazardous Materials** means Hazardous Materials (i) that are known or reasonably suspected to exist as of the Setting Date based on information, data or analysis contained or referenced in the Reference Documents as of the Setting Date; (ii) excluding Hazardous Materials that are entirely subsurface, which should have been known or reasonably suspected pursuant to a Reasonable Investigation prior to the Setting Date, including those listed in the Technical Requirements; (iii) are identified or referenced in any of the information, data, analyses or reports undertaken by Principal Project Company pursuant to the Predevelopment Agreement; (iv) constituting asbestos, lead, PCBs, any byproducts of the foregoing and/or any other material or substance indicated as present or potentially present at, in, on or under the Project Site in that \_\_\_\_\_ ***[PNC to list/identify the haz mat report(s) it has prepared during PDA Term]***; (v) anticipated or likely to be present in a building or structure that was constructed in 1915 and in continuous operation as a bus maintenance facility and heavy industrial use since that time; and/or (vi) excluding Hazardous Materials that are entirely subsurface, which should have been identified or referenced pursuant to a Reasonable Investigation undertaken pursuant to the Predevelopment Agreement. Known or Suspected Hazardous Materials include Hazardous Materials arising in or from any of the Hazardous Materials sites listed in the CEQA documents, the NEPA documents or in the Technical Requirements.

---

**Late Payment Rate** means the legal rate, as set forth in Section 685.010(a) of the California Code of Civil Procedure, as may be amended from time to time, up to a maximum amount equal to 10% per annum.

**Law(s)** means (a) any statute, law, code, regulation, ordinance, rule or common law, (b) any binding judgment (other than regarding a Claim), (c) any binding judicial or administrative writ, order, judgment, injunction, award or decree (other than regarding a Claim), (d) any written directive, guideline, policy requirement or other governmental restriction (including those resulting from the initiative or referendum process, but excluding those by City within the scope of its administration of the Contract Documents) or (e) any similar form of decision of or determination by, or any written interpretation or administration of any of the foregoing by, any Governmental Entity, in each case which is applicable to or has an impact on the Project or the Work, whether taking effect before or after the Effective Date. The term “Laws”, however, excludes Regulatory Approvals.

**Lead Developer** means and Potrero Neighborhood Collective LLC, a limited liability company organized under the laws of the State of Delaware.

**Lender(s)** means each of the holders and beneficiaries of Security Documents, including any financial guarantor providing Project Debt or any guaranty or credit enhancement in respect thereof, and their respective successors, assigns, participating parties, trustees and agents, including the Collateral Agent.

**Lenders’ Liabilities** means, at the relevant time, the aggregate of (without double counting) all principal, interest (including capitalized and default interest under the Financing Documents, but with respect to default interest, only to the extent that it arises as a result of City making any payment later than the date that it is due under this Agreement or any other default by City under this Agreement), Breakage Costs, banking fees, premiums or reimbursement obligations with respect to financial insurance policies, agent and trustee fees, costs and expenses properly incurred owing or outstanding to the Lenders by Principal Project Company under or pursuant to the Financing Documents on the Early Termination Date, including any prepayment premiums or penalties, make-whole payments or other prepayment amounts, including costs of early termination of interest rate and inflation rate hedging, swap, collar or cap arrangements, that Principal Project Company must pay, or that may be payable or credited to Principal Project Company, under any Financing Agreement or Security Document or otherwise as a result of the payment, redemption or acceleration of all or any portion of the principal amount of Project Debt prior to its scheduled payment date that were determined to be reasonable by City at the time City reviewed and approved the Financing Agreements in connection with Financial Close, as evidenced by City’s approval of such Financing Agreements.

**Lenders’ Technical Advisor (LTA)** means the Lenders’ technical advisor, [\_\_\_\_\_], and any replacement technical advisor engaged by Principal Project Company and the Lenders with respect to the Project.

**Long Stop Date** means 12 calendar months after the Substantial Completion Deadline, as such date may be extended from time to time pursuant to Section 14.1.2 (Extension of Deadlines for General Delay Events).

**Loss(es)** means, whether asserted, suffered or incurred by a Party or a Third Party, any debt, assessment, claim, action, loss, proceeding, damage, injury, liability, obligation, cost, response

---

cost, expense (including attorneys', accountants' and expert witnesses' fees and expenses (including those incurred in connection with the enforcement of any indemnity or other provision of this Agreement), loss (whether direct or indirect), proceedings, demands and charges whether arising under statute, contract or at common law), compensation, charge or liability of any kind (including fees, judgments, or penalties), and whether or not arising under or for breach of contract, in tort (including negligence), restitution, under statute or otherwise at law. Losses include injury to or death of persons, damage or loss of property, and harm or damage to natural resources, utility facilities or Intellectual Property.

**LTA Agreement** means the technical advisory agreement dated as of the Financial Close Date between Principal Project Company, the Lenders (or the Collateral Agent) and Lenders' Technical Advisor.

**Maintenance and Transit Spaces** means the areas described as Maintenance and Transit Spaces and FF&E, as set forth in in Section A.2.1.2 of the IFM Specifications, and identified as Parking, Bays and Shops, Fare Box & Clipper Card Reader Repair Shop, Service & Clean, Parts, Maintenance, Operations, Transit Services (MRO) and enclosed circulation between in the Division 3 of the Technical Requirements.

**Major Approval** means the site permit issued by the City and County of San Francisco Department of Building Inspection, acting in its regulatory capacity.

**Major Approval Conditions to Assistance** has the meaning set forth in Section 6.3.8.2.

**Major Approval Deadline** means the following time period and deadline for Principal Project Company to secure each Major Approval:

***[Note: PNC to propose time period applicable to the Major Approval for City review and approval, in its sole discretion]***

Each such time period:

- (a) begins on the date the first Major Approval request is submitted to the applicable Governmental Entity after the last to occur of (x) Principal Project Company has submitted a fully compliant and complete request and application to the applicable Governmental Entity in accordance with applicable Law and the policies and procedures of such Governmental Entity; (y) Principal Project Company has paid in full all fees and charges required for the review, consultation and issuance of the Major Approval by the applicable Governmental Entity; and (z) Principal Project Company has satisfied all other conditions to the commencement of review by the applicable Governmental Entity in accordance with applicable Law and the policies and procedures of such Governmental Entity; and ends on the date that Governmental Entity's approval is received; and
- (b) includes any Governmental Entity comment requirements and Principal Project Company resubmissions.

**Major Approval Delay** means a delay to the Work resulting from the failure to obtain a Major Approval by the applicable Major Approval Deadline where that delay is not due, in whole or in part, to a change to the Principal Project Company's design between the Effective Date and Final Design Documents (unless such design change is as a direct and sole result of a City

---

Change, Compensable Delay Event or Unavoidable Delay Event (excluding Major Approval Delay)) or due to any act or omission of any PPC-Related Entity or any PPC Fault (including any failure to provide City with an updated Project Schedule or to perform the Work in accordance with the Project Schedule).

**Major Utility Adjustment** means the following Utility Adjustments:

***[Note: PNC to propose limited list of Utility Adjustments that City would provide time / Financing Delay Costs for City review and approval, in its sole discretion.]***

**Major Utility Adjustment Deadline** means the deadline to complete each Major Utility Adjustments specified below:

***[Note: PNC to propose time period for the above limited list of Utility Adjustments for City review and approval, in its sole discretion. Time period is to commence after submittal of complete, compliant Utility Adjustment package, design, etc. to Utility. With respect to any Utility Adjustment proposed, if included, this needs to be based on schedule that PNC has worked out with the affected Utility plus a reasonable contingency/buffer]***

**Major Utility Adjustment Delay** means a delay to the Utility Adjustment Work resulting from a failure by a Utility Owner to complete a Major Utility Adjustment by the applicable Major Utility Adjustment Deadline where that delay is not due, in whole or in part, to a change to the Principal Project Company's design between the Effective Date and Final Design Documents (unless such design change is as a direct and sole result of a City Change, Compensable Delay Event or Unavoidable Delay Event (excluding Major Utility Adjustment Delay)) or due to any act or omission by any PPC-Related Entity or any PPC Fault or failure of the Principle Project Company to act diligently in accordance with the requirements of the Contract Documents and Good Industry Practice (including any failure to provide City with an updated Project Schedule or to perform the Work in accordance with the Project Schedule).

**Main or Trunkline Utility** means an underground Utility, which is not a Service Line, and which relative to the particular system of which it is a part, (a) is a larger line serving as a main line to connecting tributary lines and (b) serves a larger area, all as determined by City, in its sole discretion. In determining whether a facility should be considered a Main or Trunkline Utility, City may refer to definitions in the relevant manual or code, if any, of the Utility Owner.

**Maintained Elements** means the Infrastructure Facility and the Project Site, including all equipment, component, finishes and any other elements required to satisfy the requirements of the Agreement, including all constructed maintained elements, building systems, cabling material, equipment, finishes, furniture and fixtures, excluding the SFMTA O&M Facilities.

**Maintenance and Transit Spaces** means the areas described as Maintenance and Transit Spaces and FF&E, as set forth in in Section A.2 of the IFM Specifications, and identified as Parking, Bays and Shops, Fare Box & Clipper Card Reader Repair Shop, Service & Clean, Parts, Maintenance, Operations, and Transit Services (MRO) in Division 3 of the Technical Requirements.

**Maintenance of Traffic (MOT)** means the comprehensive effort to maintain traffic.

---

**Maintenance Plan** means the plan to properly monitor and maintain the landscaped areas, prepared and submitted by Principal Project Company and approved by the City in accordance with Section C.4.3 of the IFM Specifications, as updated in accordance with this Agreement.

**Maintenance Rectification Costs** means, in respect of any termination of this Agreement that occurs after Substantial Completion, all Losses that City determines it is reasonably likely to incur as a direct result of the termination of this Agreement, including (without double counting):

- (a) those costs (internal and external) that City is reasonably likely to incur as a direct result of carrying out any process to request tenders from any parties interested in entering into a contract with City to carry out the IFM Services, including all costs related to the preparation of tender documentation, evaluation of tenders and negotiation, and execution of relevant contracts; and
- (b) those costs reasonably projected to be incurred by City in relation to:
  - (i) remediation or, if remediation is not possible or would cost more than renewal, renewal of any defective D&C Work or IFM Services;
  - (ii) rectification or cure of any breach of this Agreement by Principal Project Company; and
  - (iii) carrying out of all other matters necessary in order to ensure that within a reasonable period of the Early Termination Date, the Project complies with the requirements of the Contract Documents, and has a reasonable prospect of continuing to perform to the same standard and cost that it would have continued to perform at had this Agreement not been terminated and the Project been in compliance with all of the requirements of the Contract Documents,

including, for the avoidance of doubt, any amount which, but for the termination of this Agreement, either should have been deposited with or paid to City in accordance with the terms of this Agreement.

**Maintenance Services** means all Work during the IFM Period to maintain, repair, preserve, replace, refurbish, test, commission and modify the Project, including the supply of machinery, equipment, materials, hardware, software, systems or any other items related to such Work, and including Demand Maintenance, Scheduled Maintenance and Renewal Work, but excluding (a) D&C Work remaining to be performed following Substantial Completion, and (b) SFMTA O&M Services.

**Major Service Failure** means a Service Failure which has been designated in the Technical Requirements or Exhibit 4 (Payment Mechanism) as a Major Service Failure.

**Manual** or **Manuals** means policies, procedures, practices, guidelines, plans, checklists, deliverables, etc. that are developed, implemented and updated by Principal Project Company.

**Maximum Availability Payment (MaxAP)** means the maximum annual Availability Payment that Principal Project Company can earn in a given Contract Year during the IFM Period, as

calculated in accordance with Exhibit 4B (Availability Payment Mechanism), and as may be further adjusted in accordance with the Contract Documents.

**Maximum Quarterly Availability Payment (MaxQAP)** means the maximum Quarterly Availability Payment that Principal Project Company can earn in a given Contract Quarter during the IFM Period, as calculated in accordance with Exhibit 4B (Availability Payment Mechanism), and as may be further adjusted in accordance with the Contract Documents.

**Medium Service Failure** means a Service Failure which has been designated in the Technical Requirements or Exhibit 4 (Payment Mechanism) as a Medium Service Failure.

**Meet and Greet** means the Functional Components corresponding to Functional Unit references GL-025 as specified in Table B5 (Functional Components and Functional Units for Infrastructure Facility) of Appendix B (Functional Areas, Functional Units, Functional Unit Rankings and Deduction Amounts for Availability Failures and Service Failures) of Exhibit 4B (Availability Payment Mechanism).

**Milestone Payment** has the meaning set forth in Section 1(a) of Exhibit 4A (Milestone Payment Mechanism).

**Minimum Agreed Availability Condition** means all of the Accessibility Conditions, the Safety Conditions and the Use Conditions, as temporarily modified as permitted in accordance with Exhibit 4B (Availability Payment Mechanism) for the purposes of a Temporary Repair.

**Minor Service Failure** means a Service Failure which has been designated in the Technical Requirements or Exhibit 4 (Payment Mechanism) as a Minor Service Failure.

**Model Update Event** has the meaning set forth in Section 4.7.1.1.

**Monthly Progress Meeting** has the meaning set forth in Section 1.1.3.7 of Division 1 of the Technical Requirements.

**Monthly Progress Status Report** has the meaning set forth in Section 1.2.4.1 of Division 1 of the Technical Requirements.

**Monthly Report** means each of the reports described in Section 1.2.4.1 of Division 1 and Section B.11 of the IFM Specifications.

**Move-In** has the meaning set forth in Section 7.14 (Move-In).

**Move-In Plan** means the plan prepared and submitted by Principal Project Company and approved by the City in accordance with Section B.25 of the IFM Specifications, as updated in accordance with this Agreement.

**Move-In Resource Candidate** has the meaning set forth in Section 7.14.3.1.

**Move-In Resource** means the advisor selected in accordance with Section **Error! Reference source not found.**

**Move-In Subcommittee** has the meaning set forth in Section 7.14.2.1.

---

**NEPA Approval** means the \_\_\_\_\_ dated [\_\_\_\_\_] and available at \_\_\_\_\_.

**NEPA Event** means:

- (a) any new or modified NEPA Approval necessitated solely by a City Change, a Delay Event or Relief Event;
- (b) legal action being taken in respect of the NEPA Approval that results in a temporary restraining order, preliminary injunction or other form of interlocutory relief by a court of competent jurisdiction that prohibits prosecution of, or by complying with such temporary restraining order, preliminary injunction or other form of interlocutory relief by a court of competent jurisdiction results in prohibiting the prosecution of, a material portion of the Work;
- (c) review or revocation or material change to, the NEPA Approval;
- (d) any review or revocation of, or change to, a NEPA Approval directly resulting from the circumstances specified in clauses (b) and (c); or
- (e) any new or modified condition, mitigation or constraint set forth in the NEPA Approval that directly and adversely affects the D&C Work and is materially different from the conditions, mitigations or constraints set forth in Exhibit \_\_\_\_\_,  
***[NOTE TO PNC: THIS CONDITION (e) WILL BE DELETED IF THE NEPA APPROVAL IS OBTAINED PRIOR TO COMMERCIAL CLOSE]***

except, in each case, to the extent resulting, in whole or in part, from Principal Project Company's design, Work or from any PPC Fault.

**Noncompliance Database** has the meaning set forth in Section 15.3.1.1.

**Noncompliance Event** means a D&C Noncompliance Event, Service Failure or Unavailability Failure.

**Non-Core Hours** means:

- (a) for Maintenance and Transit Spaces, commencing at 10:01 pm until 3:59 am every day of every week; and
- (b) for Office/Admin and Training Spaces, commencing at 5:01 pm until 7:59 am, Monday to Friday of every week.

**Non-Dig Alert Utilities** means Utilities that are not documented by or recorded with USA Dig Alert.

**Noncompliance Points** means the points that may be assessed in accordance with Section 15.4 (Assessment of Noncompliance Points).

**Nonconforming Work** means any D&C Work (including any product of the D&C Work) that does not conform to the requirements of the Contract Documents, the Regulatory Approvals,

applicable Law, the Design Documents or the Construction Documents, including any Work required to be repaired or replaced under Section 7.11 (Nonconforming Work) of this Agreement.

**Non-Digalert Utility** means a Utility owned or operated by a Utility Owner that is not a member of the California Digalert organization/notification process. “Non-Digalert Utilities” are not “Unidentified Utilities.”

**Non-Regulated Load** means the metered provision of Energy other than Regulated Load. Non-Regulated Loads are to be aggregated in a logical fashion through a submetering system.

**Non-Revenue Vehicle Parking Space** means the Functional Components corresponding to Functional Unit references GL-025 as specified in Table B5 (Functional Components and Functional Units for Infrastructure Facility) of Appendix B (Functional Areas, Functional Units, Functional Unit Rankings and Deduction Amounts for Availability Failures and Service Failures) of Exhibit 4B (Availability Payment Mechanism).

**Notice** has the meaning given in Section 23.10 (Notices and Communications).

**Notice(s) of Conditional Termination** has the meaning set forth in Section 17.2.1 (Notice of Conditional Election to Terminate – Force Majeure Termination Events).

**Notice of Determination** has the meaning set forth in Section 15.3.3.2.

**Notice of Potential Claim** means a written Notice submitted by Principal Project Company in accordance with Section 18.2 (Notice of Potential Claim).

**Notice of PPC Default** means a written Notice provided by City concerning City’s determination that a PPC Default has occurred, with respect to any default for which a cure period is allowed under Section 16.3.2 (Cure Periods).

**NTP 1** means the written Notice issued by City to Principal Project Company in accordance with Section 7.4.3 (Commencement of Non-Construction Work) authorizing Principal Project Company to proceed with non-Construction Work.

**NTP 2** means the written Notice issued by City to Principal Project Company in accordance with Section 7.4.4 (Commencement of Construction Work) authorizing Principal Project Company to proceed with Construction Work.

**Office/Admin and Training Spaces FF&E** means all FF&E to be included in Office/Admin and Training Spaces and all additional FF&E identified as "Office/Admin and Training Spaces FF&E" in the Equipment List or otherwise required to be included in the Office/ Admin and Training Spaces under Section 7.13.1 (Selection and Procurement of PPC-Furnished FF&E).

**Office/ Admin and Training Spaces** means administration and training facility spaces including Office/Admin and Training Spaces FF&E, as set forth in Section A.2 of the IFM Specifications and identified as “Office Modules”, “Training” and “Operations” and enclosed circulation between in Division 3 of the Technical Requirements.

---

**Open Book Basis** means review by City of documentation showing Principal Project Company's underlying assumptions, documents, information and data associated with the issue in question, including assumptions as to the Financial Model and each updated Financial Model, pricing or compensation or adjustments thereto, costs of the Work, costs or compensation claimed with respect to Model Update Events, schedule, composition of equipment spreads, equipment rates (including rental rates), labor rates and benefits, productivity, estimating factors, design and productivity allowance, contingency and indirect costs, Extra Work Costs, risk pricing, discount rates, interest rates, inflation and deflation rates, swap and hedge rates, insurance rates, bonding rates, letter of credit fees, overhead, profit, traffic volumes and other items reasonably required by City to satisfy itself as to validity or reasonableness.

**Ordinance** has the meaning set forth in Recital D.

**Original Equity IRR** means [●]%, which is the Equity IRR listed in the Base Case Financial Model.

**Other Adjustments (OA)** means the aggregate of any other adjustments for a Contract Quarter to reflect previous over-payments and/or under-payments, any interest payable in respect of any amounts owed, and any other amount due and payable from Principal Project Company to the City or from the City to Principal Project Company under this Agreement, as set out in Section 11.9 (Other Adjustments; Full Compensation).

**Other Amounts** has the meaning given in Section 11.4.2.

**Other Contractor** means any contractor, tradesperson or other person engaged by City to do work other than Principal Project Company and its Subcontractors.

**Oversight** means monitoring, inspecting, sampling, measuring, spot-checking, reviewing, attending, observing, testing, investigating, auditing and conducting any other ongoing oversight respecting any part or aspect of the Project or the Work, by any Person so entitled, including all the activities described in Section 5.4.2.

**Paratransit Facility** means the paratransit component which will (a) include the spaces needed for paratransit operation and maintenance activities at the Paratransit Facility, (b) reside on the roof of the bus yard component with access and egress from vehicular ramps extending from the Bus Yard Component onto the Bus Yard Component podium roof, (c) must meet the paratransit criteria in the Technical Requirements, (c) delivered pursuant to a Change Order or by Principal Project Company or another entity under a separate agreement. Paratransit Facility would be developed as Joint Development Alternative 2 Paratransit Component, as described in the "Project Description" included in Division 1 of the Technical Requirements.

**Partnering** means the partnering process as set forth in Article 18 of this Agreement.

**Party** means Principal Project Company or City, as the context may require, and "Parties" means Principal Project Company and City, collectively.

**Pass-Through Costs** means the cost of diesel incurred by PPC directly and paid to utility owners with respect to PPC's performance of the IFM Services consistent with Section A. 2.1.1 of the IFM Specifications for operations and management of back-up power systems and Section 11.3.

---

**Payment Bond** means the payment bond(s) to secure payment for labor and materials, as required under this Agreement.

**Payment Commencement Date** means the date that is one day after the Substantial Completion Date.

**PDA-Related Costs** means the following costs incurred by or accruing to City under the PDA:

- (a) The reasonably required costs of any assistance, action, activity or work undertaken by City which Principal Project Company is liable for or is obligated to reimburse City for under the terms of the PDA, including the charges of third party contractors and reasonably allocated wages, salaries, compensation and overhead of City staff and employees performing such action, activity or work; plus
- (b) Reasonably required out-of-pocket costs City incurs to publicly procure any such third party contractors; plus
- (c) Reasonable fees and costs of attorneys (including the reasonably allocable fees and costs of the Office of the City Attorney), financial advisors, engineers, architects, insurance brokers and advisors, investigators, traffic and revenue consultants, risk management consultants, other consultants, and expert witnesses, as well as court costs and other litigation costs, in connection with any such assistance, action, activity or work, including in connection with defending claims by and resolving disputes with third party contractors; plus
- (d) Interest on all the foregoing sums at the Late Payment Rate, commencing on the date due under the applicable terms of the PDA and continuing until paid; plus
- (e) An administrative fee of 10% of the actual aggregate costs incurred by City as described in clauses (a) through (d) of this definition.

**PDA Term** means the period commencing on November 2, 2022 and expiring on the Effective Date.

**Performance Action Plan** or **PAP** means the plan, at minimum, containing a summary of the issues raised by City, an analysis of the root causes of the issues, the steps and timeframes for such steps to be undertaken by Principal Project Company to address the issues, prepared and submitted by Principal Project Company in accordance with Section B.18.2 of the IFM Specifications, as updated and approved by the City in accordance with this Agreement.

**Performance Bond** means the performance bond(s) securing performance of the Work required under this Agreement.

**Performance Cure Plan** means the plan prepared and submitted by Principal Project Company and approved by the City in accordance with Section 15.5.2(a) of the Agreement, as updated in accordance with this Agreement.

**Performance Measure** has the meaning given in the Performance Measurements Table.

---

**Performance Measurements Table** means the table in Section G of the IFM Specifications.

**Performance Monitoring** means a detailed inspection and/or monitoring of the Project by Principal Project Company during the IFM Period in accordance with the Technical Requirements, including the IFM Specifications, to verify compliance with the Contract Documents.

**Performance Monitoring Report** means a report documenting all Failure Events, associated Noncompliance Points and Deductions, and showing space temperatures during period, including identification of rooms that have not met the requirements of the Technical Requirements, including the IFM Specifications.

**Performance Notice** means a written Notice provided by City, as set forth in Section 15.5.1.

**Performance Notice Threshold** means

- (a) if Principal Project Company receives a total of 375 or more Noncompliance Points over the course of 3 consecutive calendar months (determined on a rolling basis); or
- (b) A material Noncompliance Event occurs, as determined by the City

**Permanent Repair** means Rectification where a Temporary Repair has been permitted and carried out pursuant to Section 9 (Amendment of IFM Period Performance Measures Table) of Exhibit 4B (Availability Payment Mechanism).

**Permanent Repair Deadline** has the meaning given in Section 8(b) of Exhibit 4B (Availability Payment).

**Persistent PPC Default** means if:

During the D&C Phase;

- (a) Principal Project Company receives a total of 500 or more Noncompliance Points over the course of 12 consecutive calendar months (determined on a rolling basis); or
- (b) Principal Project Company receives a total of 875 or more Noncompliance Points over the course of 36 consecutive calendar months (determined on a rolling basis);

During the IFM Period;

- (a) Principal Project Company receives a total of 3867 or more Noncompliance Points over the course of 12 consecutive calendar months (determined on a rolling basis); or
- (b) Principal Project Company receives a total of 10,635 or more Noncompliance Points over the course of 36 consecutive calendar months (determined on a rolling basis); or

- 
- (c) 58,005 or more cumulative Noncompliance Points or have occurred over the course of the IFM Period.

**Persistent PPC Default Cure Plan** means the plan including specific actions (including timeframes) to be taken by Principal Project Company to improve performance, prepared and submitted by Principal Project Company in accordance with Section 15.8.1 of the Agreement, as updated and approved by the City in accordance with this Agreement.

**Person** means any individual, corporation, joint venture, limited liability company, company, voluntary association, partnership, trust, unincorporated organization or Governmental Entity.

**Planning Department** means the City's Planning Department.

**Post-Refinancing Financial Model** has the meaning set forth in Section 1.2 (Create a Post-Refinancing Financial Model) of Exhibit 5C (Calculation of Refinancing Gain).

**Potential Contract Dispute** has the meaning set forth in Section 18.2.1.

**PNC** has the meaning set forth in Recital E.

**PPC Change Request** has the meaning set forth in Section 3.1 of Exhibit 9 (Change Procedures).

**PPC Default** has the meaning set forth in Section 16.1.1 (PPC Default).

**PPC Employee(s)** means employee(s) of Principal Project Company or any other PPC-Related Entity at the Project Site.

**PPC Employee and Contractor Breakage Costs** means:

- (a) the payment of all wages earned, accrued unused vacation time, and any other payments required to be made by Principal Project Company to its employees under law, or under the terms and conditions of Principal Project Company's employment agreements with its employees as a direct result of the termination of this Agreement;
- (b) Losses that have been or will be reasonably and properly incurred by Principal Project Company under a Key Contract as a direct result of the termination of this Agreement (and which shall not include lost profit or lost opportunity), but only to the extent that:
  - (i) the Losses are incurred in connection with the Project and with respect to the Work required to be provided or carried out, including:
    - (1) any materials or goods ordered or subcontracts placed that cannot be cancelled without such Losses being incurred;
    - (2) any expenditure incurred in anticipation of the provision of services or the completion of Work in the future; and

- 
- (3) the cost of demobilization including the cost of any relocation of equipment used in connection with the Project; and
  - (ii) the Losses are reasonably and properly incurred under arrangements and/or agreements that are consistent with terms that have been entered into in the ordinary course of business and on an arm's length basis; and
  - (c) Principal Project Company and the relevant Key Contractor have each used their reasonable efforts to mitigate such Losses.

**PPC Fault** means:

- (a) the breach by any PPC-Related Entity of any of its obligations or any representation, warranty or covenant under the Contract Documents;
- (b) a breach of applicable Law or any Regulatory Approval by any PPC-Related Entity; and
- (c) fraud, criminal conduct, intentional misconduct, recklessness, bad faith, gross negligence, negligence or other culpable act or omission of any PPC-Related Entity.

**PPC Intellectual Property** means Intellectual Property developed by Principal Project Company, Contractors, or any of their respective Affiliates either (a) prior to the Effective Date, (b) independently of the Contract Documents or (c) any adaptation, continuation or derivative work which requires the incorporation, exercise or practice of Intellectual Property that is the subject of either subsection (a) or (b).

**PPC Release** means, with respect to Hazardous Materials, (a) any Release of Hazardous Material, or the exacerbation of any such Release, attributable to any PPC Fault; (b) any Release of Hazardous Materials arranged to be brought onto the Project Site by any PPC-Related Entity; regardless of cause; (c) any migration of Hazardous Materials into, onto, under or from the Project Site where the source of such Hazardous Materials is a PPC-Related Entity; or (d) any use, containment, storage, management, handling, transport or disposal of any Hazardous Materials, by any PPC-Related Entity in violation of the requirements of the Contract Documents, Good Industry Practice or any applicable Law or Regulatory Approval.

**PPC Resources** means the employees of Principal Project Company or any Principal Project Company that are not at the Project Site.

**PPC's Construction Quality Plan (PCQP)** means the Principal Project Company deliverable described in Section 1.4.3 of Division 1 of the Technical Requirements, following approval thereof by City, as updated in accordance with this Agreement.

**PPC's Design Quality Plan (PDQP)** means the Principal Project Company deliverable described in Section 1.4.2 of Division 1 of the Technical Requirements, following approval by City, as updated in accordance with this Agreement.

**PPC-Furnished FF&E** means all FF&E required by the Technical Requirements or the Equipment List (including items marked CP) or otherwise required to be included on the

---

Equipment List under Section 7.13.1 (Selection and Procurement of PPC-Furnished FF&E) including the Office/Admin and Training Spaces FF&E and the IT/Comms Equipment, but excluding City-Furnished Equipment and Existing FF&E.

**PPC's Interest** means all right, title and interest of Principal Project Company in, to, under or derived from the Contract Documents, including the Infrastructure Facility, Project Management Plan, Subcontracts, Submittals, Claims and Intellectual Property.

**PPC-Maintained FF&E** means the PPC-Furnished FF&E, excluding the Office/Admin and Training Spaces FF&E and the IT/Comms Equipment.

**PPC's Quality Program (PQP)** means the program described in Section 1.4.1 of Division 1 of the Technical Requirements, including all sub-plans.

**PPC's Quality Program Plan (PQPP)** means Principal Project Company's plan describing its approach to undertake and achieve the requirements in Section 1.4.1 of Division 1 of the Technical Requirements, prepared and submitted by Principal Project Company in accordance with Section 1.4 of Division 1 of the Technical Requirements, as updated and approved by the City in accordance with this Agreement.

**PPC-Related Entity(ies)** means:

- (a) Principal Project Company;
- (b) Principal Project Company's Equity Members, including Lead Developer;
- (c) Contractors;
- (d) any other persons or entities performing any of the Work;
- (e) any other persons or entities for whom Principal Project Company may be legally or contractually responsible;
- (f) any Affiliate of the Principal Project Company, or any other PPC-Related Entity (excluding such Affiliates to the extent that they are participating in or responsible for any aspect of a Joint Development Alternative); and
- (g) the employees, agents, officers, directors, representatives, consultants, successors and assigns of any of the foregoing.

**PPC Spaces** has the meaning given in Section 2.1.4 of the IFM Specifications.

**Predevelopment Agreement** has the meaning set forth in Recital F of this Agreement.

**Pre-Existing Hazardous Materials** means Hazardous Materials that:

- (a) are located in, on or under, or are emanating from, any parcel within the boundaries of the Project Site as of the date access to such parcel is provided to Principal Project Company; or

- 
- (b) existed in another location as of the date access to such a parcel was provided and thereafter migrated to such parcel,

excluding any Hazardous Materials that are located in, on or under, or are emanating from any Additional Property or Temporary Areas or which arise as a result of any act or omission of any PPC-Related Entity in connection with any Additional Property or Temporary Areas.

**Pre-Refinancing Financial Model** has the meaning set forth in Section 1.1 (Create a Pre-Refinancing Financial Model) of Exhibit 5C (Calculation of Refinancing Gain).

**Prevailing Rate of Wages** has the meaning given in Section 6.22(e) and 21C of the San Francisco Administrative Code.

**Prime Contract** means a direct Contract between Principal Project Company and a Contractor.

**Prime Contractor** means any Contractor that has a direct contract with Principal Project Company.

**Principal Project Company (PPC)** means [\_\_\_\_\_], a [\_\_\_\_\_] organized under the laws of the State of [\_\_\_\_\_], and its permitted successors and assigns.

**Principal Project Company IP** means Intellectual Property that is (i) owned by any PPC-Related Entity prior to the Effective Date, (ii) developed or acquired by any PPC-Related Entity independently of this Agreement or not for the purposes of performing the Work (iii) any adaptation, continuation or derivative work which requires the incorporation, exercise or practice of Intellectual Property that is the subject of either subsection (i) or (ii).

**Principal Project Document(s)** means the Contract Documents, the Key Contracts and the escrow agreements relating to the escrow of the Financial Model and Cost and Pricing Data and the IP Escrows.

**Priority 1** has the meaning given in Section B.18.1.1 of the IFM Specifications.

**Priority 2** has the meaning given in Section B.18.1.1 of the IFM Specifications.

**Priority 3** has the meaning given in Section B.18.1.1 of the IFM Specifications.

**Private Placement** means the issuance of debt securities that are exempt from registration under U.S. securities law and are sold directly in the private market.

**Proceeds Account** means a deposit account with the Collateral Agent, bearing **[Insert name of bank]** Account No. **[To be completed at Financial Close]**.

**Prohibited Person** means any Person who is:

- (a) debarred, suspended, proposed for debarment with a final determination still pending, declared ineligible or voluntarily excluded from participating in procurement or nonprocurement transaction or determined to be a non-responsible bidder or contractor (as such terms are defined or used in City's Contractor Responsibility Program);

- 
- (b) indicted or convicted of a crime, including misdemeanors, or had a civil suit or administrative judgment rendered against such Person involving the bidding, awarding, or performance of a government contract, a false claim or material misrepresentation to any private or governmental entity, or the crime of theft, fraud, embezzlement, perjury, or bribery (as such terms are defined or used in City's Contractor Responsibility Program);
  - (c) identified on the list entitled "Entities Prohibited from Contracting with Public Entities in California per the Iran Contracting Act of 2010" maintained by the Department of General Services;
  - (d) a financial institution against which, or a banking institution chartered or licensed in a jurisdiction against which, the United States Secretary of the Treasury has imposed special measures under Section 311 of the USA PATRIOT Act;
  - (e) located within or is operating from a jurisdiction that has been designated as a "high-risk and non-cooperative jurisdiction" by the Financial Action Task Force;
  - (f) a "senior foreign political figure" or a prohibited "foreign shell bank" within the meaning of 31 CFR Section 1010.605; or
  - (g) engaged in litigation with the City of San Francisco relating to performance of a contract or business practices (unless the City has first waived (in the City's sole discretion) by written Notice to the transferring equity holder, with a copy to Principal Project Company, the prohibition on a transfer to such Person during the continuance of the relevant litigation).

**Project** means the design, construction, financing, operation and maintenance of the Infrastructure Facility as described in the Contract Documents.

**Project Debt** means bona fide indebtedness (including subordinated indebtedness) for or with respect to funds borrowed or obligations incurred (including bona fide indebtedness with respect to any financial insurance issued for funds borrowed) or for the value of goods or services rendered or received, the repayment of which has specified payment dates and is secured by one or more Security Documents. Project Debt includes principal, capitalized interest, accrued interest, customary and reasonable lender, financial insurer, agent and trustee fees, costs, expenses and premiums with respect thereto, payment obligations under interest rate and inflation rate hedging agreements or other derivative facilities with respect thereto, reimbursement obligations with respect thereto and lease financing obligations. Project Debt excludes (a) any indebtedness of Principal Project Company or any Equity Member of Principal Project Company that is secured by anything less than the entire Principal Project Company's Interest, such as indebtedness secured only by an assignment of economic interest in Principal Project Company or of rights to cash flow or dividends from Principal Project Company, (b) debt that constitutes consideration paid for the sale of the economic rights in Principal Project Company or Principal Project Company's Equity Members, and (c) any increase in indebtedness to the extent resulting from an agreement or other arrangement Principal Project Company enters into after it was aware (or should have been aware, using reasonable due diligence) of the occurrence or prospective occurrence of an event of termination giving rise to an obligation of City to pay Termination Compensation, including Principal Project Company's receipt of a Notice of Termination for Convenience and occurrence of a City Default of the type

entitling Principal Project Company to terminate this Agreement. In addition, no debt shall constitute Project Debt unless and until the Collateral Agent provides City with Notice thereof and the related Financing Agreements and Security Documents in accordance with the relevant Direct Agreement.

**Project Debt Competition** has the meaning set forth in Section 3.4.2(d)(ii).

**Project Financial Performance** means the cashflows from Principal Project Company's operations, financing and investments, including: (a) cash revenues and expenses, (b) Project Debt drawdowns, fees, interest expense and repayments, (c) Committed Investment drawdowns and Distributions; and (d) funding and release of reserves.

**Project IP** means all PPC Intellectual Property, Third Party IP and City IP incorporated into the Project, Implementation Proposal or Work.

**Project Management Plan (PMP)** means the D&C Management Plan and the IFM Management Plan (or either as the context requires).

**Project Manager** means the Key Person described in Section • of Exhibit 3 (Implementation Proposal).

**Project Schedule** means (i) during the period from the Effective date until NTP2, the Initial Schedule; and (ii) from NTP2 until Final Acceptance, the fully cost loaded CPM schedule for all D&C Work meeting the requirements of the Technical Requirements, including the requirements in Section 1.2.1 of Division 1 thereof, as approved and updated in accordance with this Agreement.

**Project Site** means the D&C Site and the IFM Project Site, or either, as applicable.

**Proposed Change Order** means a Change Order proposed by City in accordance with Section 1.2 of Exhibit 9 (Change Procedures).

**Proprietary Design Review** has the meaning set forth by Section 1.8.5 of Division 1 of the Technical Requirements.

**Protection(s) in Place** means any action taken to avoid damaging a utility facility which does not involve removing or relocating that facility, including staking the location of a facility, exposing the facility, locating construction equipment so as to avoid impacts to facilities, installing steel plating or concrete slabs, encasement in concrete, temporarily de-energizing power lines, and installing physical barriers. For example, temporarily lifting power lines without cutting them would be considered a Protection in Place; whereas temporarily moving power lines to another location after cutting them would be considered a phased Utility Adjustment and not a Protection in Place. The term "Protection in Place" includes both temporary measures and permanent installations meeting the foregoing definition.

**Provision Document(s)** has the meaning set forth in Section 1.8.5.2.4 of Division 1 of the Technical Requirements.

**Public Outreach Plan** has the meaning set forth in Section 1.15.2 of Division 1 of the Technical Requirements.

---

**Public Records Act (PRA)** means California Public Records Act, Cal. Gov't Code § 6250 et seq., as amended from time to time.

**Punch List** means an itemized list of D&C Work as agreed upon by Principal Project Company and City which remains to be completed after the Substantial Completion Date with respect to the Infrastructure Facility as a condition to Final Acceptance, and which is limited to minor incidental items of Work necessary to correct imperfections which have no adverse effect on the safety, use or operability of the Project.

**Quality Assurance (QA)** means all planned and systematic actions by Principal Project Company necessary to provide confidence that QC is performed in accordance with Principal Project Company's Design Quality Plan and Principal Project Company's Construction Quality Plan, that all Work complies with the Contract Documents and that all materials incorporated in the Work, and that all equipment and all elements of the Work will perform satisfactorily for the purpose intended. QA actions include: monitoring and verification of design through auditing, spot-checking and participation in the review of the Design Documents and work plans; and monitoring and verification of construction, manufacturing/process facilities and equipment, on-site equipment and QC documentation through auditing, spot inspections and reconciliation of material acceptance and rejection based on QC testing and Verification Sampling and Testing at production sites and the Project Site. Quality Assurance also includes documentation of all QA efforts.

**Quality Audit** means the audits performed by Principal Project Company in connection with its quality audit program, as described in further detail in Section 1.4.1 of Division 1 of the Technical Requirements.

**Quality Control (QC)** means the total of all activities performed by Principal Project Company to ensure that the Work meets the requirements of the Contract Documents. For design, this includes procedures for design quality, checking, and design review including reviews for constructability, and review and approval of work plans. For construction, this includes: procedures for materials handling and construction quality; inspection, sampling, testing and acceptance/rejection of materials, plants, production and construction; material certifications; calibration and maintenance of equipment; production process control; and monitoring of environmental compliance. Quality Control also includes documentation of all QC design and construction efforts.

**Quality Management Plan** means the plan to manage and measure the quality of IFM Services, prepared and submitted by Principal Project Company and approved by the City in accordance with Section B.16.2 of the IFM Specifications, as updated and approved by City in accordance with this Agreement.

**Quality Program Manager** has the meaning set forth in Section 1.1.4.9 of Division 1 of the Technical Requirements.

**Quality Records** means the documentation required to be produced and maintained by PPC-Related Entities in accordance with Principal Project Company's Quality Program.

**Quarter** means a time period comprised of three calendar consecutive calendar months.

---

**Quarterly Availability Payment (QAP)** means the sum in dollars payable by City to Principal Project Company in each Contract Quarter of the IFM Period in accordance with this Agreement, as calculated in Exhibit 4B (Availability Payment Mechanism).

**Quarterly Deduction Cap** has the meaning given in Section 5.1.1(a) of Exhibit 4B (Availability Payment Mechanism).

**Rating Agency(ies)** means any credit rating agency registered with the Securities and Exchange Commission as a nationally recognized statistical rating organization (“**NRSRO**”).

**Reasonable Accuracy** means with respect to the description or identification of a Utility in the Utility Information:

- (a) The Utility's actual centerline location is located at or less than five feet distant from the horizontal centerline location indicated therefor in the Utility Information (without regard to vertical location);
- (b) The Utility Information shows an active and existent Utility as not abandoned;
- (c) The Utility Information shows a non-existent or inactive Utility as abandoned; or
- (d) The Utility has an actual nominal diameter (excluding casings and any other appurtenances) greater than 12 inches, and its actual nominal diameter is either greater than or less than the diameter shown in the Utility Information by 25% or less of the diameter shown in the Utility Information.

Any other inaccuracies in the Utility Information (e.g., as to type of material or encasement status) shall have no impact on "reasonable accuracy" of its identification and shall not result in a determination that the Utility was not identified with "reasonable accuracy." If there is any discrepancy between any of the components of the Utility Information, only the most accurate information shall be relevant for purposes of determination of "reasonable accuracy."

**Reasonable Investigation** means the following activities by appropriate, qualified professionals:

- (a) Visit and inspection of the Project Site and adjacent locations, including inspection to identify the presence of other facilities, such as barriers, railing, structures, manholes or identifying markers;
- (b) Undertaking the geotechnical, Utility, Hazardous Material and other intrusive site conditions investigations, sampling, testing, analyses and assessments as required to identify conditions at a specific point or to identify where conditions change between points, and otherwise contemplated by the Predevelopment Agreement;
- (c) Review and analysis of all Reference Documents and online map tools;
- (d) Review and analysis of the CEQA Approval, NEPA Approval and other Regulatory Approvals;

- 
- (e) Without limiting clause (b), reasonable inquiry with Utility Owners, including request for and review of Utility plans provided by Utility Owners;
  - (f) Review and analysis of material applicable Law applicable to the Project or the Work as of the Setting Date; and
  - (g) Other activities consistent with Good Industry Practice sufficient to familiarize Principal Project Company with surface and subsurface conditions, including the presence of Utilities, Hazardous Materials, archeological, paleontological and cultural resources, and Threatened or Endangered Species, affecting the Project Site or surrounding locations.

**Reasonable Wear and Tear** means wear and tear that is reasonable given the use and age of the Infrastructure Facility and consistent with wear and tear that could reasonably be expected to exist at a similar facility, operating in a similar environment and similar circumstances but not including any degradation in the functionality or operability of the IFM Facility that, subject to the exceptions specified in the Technical Requirements, will result in the Infrastructure Facility failing to meet the Technical Requirements or failing to comply with Applicable Law and Standards.

**Record Documents** means construction drawings, specifications and related documentation furnished by Principal Project Company to reflect the actual conditions and location in detail of Work as constructed and installed, which may be generated initially as marked-up Release for Construction Documents, revised subsequently as finished revised drawings and documents, and updated thereafter as required by the Technical Requirements.

**Recoverable Costs** means:

- (a) The reasonably required costs of any assistance, action, activity or work undertaken by City which Principal Project Company is liable for or is obligated to reimburse City for under the terms of the Contract Documents, including the charges of third party contractors and reasonably allocated wages, salaries, compensation and overhead of City staff and employees performing such action, activity or work; plus
- (b) Reasonably required out-of-pocket costs City incurs to publicly procure any such third party contractors; plus
- (c) Reasonable fees and costs of attorneys (including the reasonably allocable fees and costs of the Office of the City Attorney), financial advisors, engineers, architects, insurance brokers and advisors, investigators, traffic and revenue consultants, risk management consultants, other consultants, and expert witnesses, as well as court costs and other litigation costs, in connection with any such assistance, action, activity or work, including in connection with defending claims by and resolving disputes with third party contractors; plus
- (d) Interest on all the foregoing sums at the Late Payment Rate, commencing on the date due under the applicable terms of the Contract Documents and continuing until paid; plus

- 
- (e) An administrative fee of 10% of the actual aggregate costs incurred by City as described in clauses (a) through (d) of this definition.

**Recovery Schedule** has the meaning set forth in Section 1.2.1.4 of Division 1 of the Technical Requirements.

**Rectification** means resolving and curing the Service Failure or Availability Failure (as applicable) in a way that Principal Project Company is in full compliance with this Agreement, with respect to that Service Failure or Availability Failure.

**Rectification Time** means, with respect to each Service Failure or Availability Failure (as applicable), the relevant period within which Principal Project Company shall Rectify such failure as specified in Appendix B (Response and Rectification Time) of Exhibit 4 (Payment Mechanism).

**Reference Documents** means the documents provided with and so designated by City in the RFP or in writing during the PDA Term, which are provided for disclosure purposes only and without any warranty as to their accuracy, completeness or fitness for any particular purpose.

**Refinancing** means:

- (a) any amendment, variation, novation, extension, renewal, supplement, refunding, defeasance or replacement of any Project Debt, Financing Agreement or Security Document (other than any Equity Member Debt);
- (b) any Project Debt incurred by Principal Project Company in addition to the Initial Project Debt, secured or unsecured;
- (c) the disposition of any rights or interests in, or the creation of any rights of participation with respect to, Project Debt, Financing Agreements and Security Documents or the creation or granting by Principal Project Company or any Lender of any other form of benefit or interest in either Project Debt, Financing Agreements and Security Documents or Principal Project Company's Interest whether by way of security or otherwise; or
- (d) any other arrangement put in place by Principal Project Company or another Person which has an effect similar to any of clauses (a) through (c) above.

**Refinancing Data** means the Pre-Refinancing Financial Model, the Post-Refinancing Financial Model, any interim Financial Models, and all assumptions, calculations and other information supporting the calculation of the Refinancing Gain, including any debt term sheets or other similar documentation relating to the proposed Refinancing.

**Refinancing Gain** means an amount equal to the greater of (a) zero and (b)  $(A - B)$ , as such variables are calculated in accordance with Exhibit 5C (Calculation of Refinancing Gain).

**Regulated Load** means the metered provision of Energy for the following end-uses: (i) space heating; (ii) humidification; (iii) space cooling; (iv) dehumidification; (v) heat rejection; (vi) all fans; (vii) lighting; (viii) domestic hot water; and (ix) all pumps except for any domestic water booster pumps and any process-related pumps.

---

**Regulatory Approvals** means all permits, licenses, consents, concessions, grants, franchises, authorizations, waivers, variances or other approvals, guidance, protocol(s), mitigation agreement(s), or memoranda of agreement/understanding, and any amendment(s) or modification(s) of any of them, required or provided by Governmental Entities, including State, local, or federal regulatory agencies, agents, or employees, which authorize or pertain to the Project or the Work or take actions required to complete obligations in connection with this Agreement. Regulatory Approvals include encroachment permits and other access rights or right of entries for Work to be performed in areas under the jurisdiction of Governmental Entities, Major Approvals and Environmental Approvals.

**Regulatory Approvals Plan** means Principal Project Company's plan defining its approach to obtain all Regulatory Approvals, prepared and submitted by Principal Project Company in accordance with Section 1.1.6 of Division 1 of the Technical Requirements, as updated and approved by the City in accordance with this Agreement.

**Related Project(s)** has the meaning set forth in Section 1.14.2 of Division 1 of the Technical Requirements.

**Release** or **Release of Hazardous Materials** means, with respect to Hazardous Materials, any spill, leak, emission, release, discharge, injection, escape, leaching, dumping or disposal of Hazardous Materials into the soil, air, water, groundwater or environment, including any exacerbation of an existing release or condition of Hazardous Materials contamination.

**Release for Construction Documents (RFCD)** means Design Documents that have been authorized to be used as the basis for Construction Work or Renewal Work, in accordance with the design management portion of the approved Project Management Plan, and as set forth in Section 1.8.6 of Division 1 of the Technical Requirements.

**Relevant Event** has the meaning set forth in Section 13.3.1.

**Relevant Change in Law** means a discriminatory Change in Law which is principally borne by Principal Project Company (including PPC-Related Entities) and principally directed at, affects or relates only to the design, supply, construction (including installation), operation and maintenance of the Infrastructure Facility:

- (a) Except where such change (i) is in response, in whole or in part, to any PPC Fault, or (ii) is otherwise expressly permitted under the Contract Documents;
- (b) Where such Change in Law is a Change in Law for which compliance requires material capital expenditures by Principal Project Company; or
- (c) Where such Change in Law is a Change in Law for which compliance requires specific and material adverse changes in Principal Project Company's normal and compliant operation or maintenance procedures.

As used in this definition of "Relevant Change in Law", material capital expenditures are capital expenditures in excess of \$25,000 per event, such threshold to be index-linked and increased by the Escalation Factor calculated in accordance with Section 2 of Exhibit 4B (Availability Payment Mechanism).

---

**Relief Event** means any of the following events or circumstances to the extent, in each case, that the event interferes directly and adversely with, or causes a failure of, the performance of the IFM Services after the Substantial Completion Date:

- (a) a Force Majeure Event; and
- (b) any Compensable Relief Event.

**Renewal Work** means all work related to the capital replacement, reconstruction, overhaul, refurbishment and reinstatement of the Infrastructure Facility, including the supply of machinery, equipment, materials, hardware, software, systems or any other items related to such Work, carried by Principal Project Company during the Term to maintain compliance with the Contract Documents. Renewal Work excludes D&C Work and SFMTA O&M Services.

**Renewal Work Plan** means the plan which defines design life, specific replacement and/or refurbishment strategies, prepared and submitted by Principal Project Company in accordance with Section E of the IFM Specifications, as updated and approved by the City in accordance with this Agreement.

**Repeat Failure Ratchet** has the meaning given in Section 4.3 (Repeat Service Failures and Repeat Failure Ratchet) of Exhibit 4B (Availability Payment Mechanism).

**Request for Change Proposal** means a written Notice issued by City to Principal Project Company setting forth a proposed City Change and requesting Principal Project Company's assessment of cost and schedule impacts thereof, as described in Section 1.1 of Exhibit 9 (Change Procedures).

**Request for Proposals (RFP)** means the request for proposals to design, build, finance, and maintain the Infrastructure Facility and design, build, finance, operate and maintain the Housing and Commercial Component at the Project Site, issued by City on April 9, 2021, as amended.

**Request for Qualifications (RFQ)** means the request for qualifications to invite interested parties to submit a statement of qualifications to design, build, finance and maintain the Infrastructure Facility at the Project Site and design, build, finance, operate and maintain the Housing and Commercial Component at the Project Site, issued by City on August 21, 2020 as amended.

**Required Minimum Insurance Policy(ies)** means the Insurance Policies required in Exhibit 7 (Insurance Requirements) for performing the IFM Services, subject to Section 10.1.2.12 (Inadequacy of Required Coverage).

**Rescue Refinancing** means any Refinancing that:

- (a) occurs due to the failure or imminent failure of Principal Project Company to comply with any material financial obligation under any Financing Document;
- (b) results in the cure of such failure or imminent failure;
- (c) does not result in an increase in the Equity IRR beyond the Original Equity IRR; and

- 
- (d) does not result, singly or in the aggregate, in an actual or potential increase of the Lenders' Liabilities (determined without including any Exempt Refinancings) by more than 10%.

**Residual Life** means, for an element of the Work, the period remaining until the element will next require reconstruction, rehabilitation, restoration, renewal or replacement. The Residual Life of an element would be equal to its originally calculated Useful Life less its age if (a) the element has performed in service in the manner and with the levels of Reasonable Wear and Tear, and (b) Principal Project Company has performed the type of routine maintenance of the element which is normally included as an annually recurring cost in transit facility maintenance and repair budgets, and as a result thereof the element complies throughout its originally calculated Useful Life with all applicable requirements of the Contract Documents. The Residual Life of an element would be different from its originally calculated Useful Life minus its age if any of the foregoing conditions is not true.

**Response** means:

- (a) the surrounding area to a state or condition such that in the good faith opinion of City's Authorized Representative, the area is free of conditions which might otherwise create a condition that is hazardous or unsafe for maintenance and operating personnel; and
- (b) sufficiently reducing the risk during the remainder of the Rectification Time that further damage, nonperformance, safety hazards or adverse consequences caused by the Service Failure or Availability Failure (as applicable), might occur.

**Response Time** means with respect to each Service Failure or Availability Failure (as applicable), the relevant period within which Principal Project Company shall Respond to such failure as specified in Appendix B (Response and Rectification Time) of Exhibit 4 (Payment Mechanism).

**Retaining Wall** means a wall structure which retains fill with a minimum exposed face height of 4 feet and a minimum overall height from top of footing to top of wall of 5 feet.

**Revenue Vehicle Parking Space** means the Functional Units corresponding to Functional Unit references AL-010 and AL-011, as specified in Table C2 (Functional Components and Functional Units for Infrastructure Facility) of Appendix C (Functional Areas, Functional Units, Functional Unit Rankings and Deduction Amounts for Availability Failures and Service Failures) of Exhibit 4B (Availability Payment Mechanism).

**Review Date** has the meaning set forth in Section 8.5.4.1.

**Revised Project Schedule** has the meaning set forth in Section 1.2.1.3 of Division 1 of the Technical Requirements.

**Room Data Sheet** means a sheet or document that summarizes the requirements for each room in the Infrastructure Facility. It should include the room name, number, location, and the relevant prescriptive criteria and performance criteria from the Technical Requirements including for finishes, fixtures and fittings such as furniture and storage, mechanical and

electrical requirements, acoustic and lighting performance, and IT Comms and audio-visual requirements.

**Safety Compliance** means any and all improvements, repair, reconstruction, rehabilitation, restoration, renewal, replacement, changes in configuration, or procedures implemented to correct a specific safety condition or risk that City has reasonably determined to exist by investigation or analysis (excluding a safety condition or risk that exists by reason of Principal Project Company's failure to comply with the requirements of the Contract Documents).

**Safety Compliance Order** means a written order or directive from City to Principal Project Company to implement Safety Compliance.

**Safety Condition** means a state or condition of the relevant Functional Part which allows those persons who it can reasonably be expected may from time to time require to enter, leave, occupy, and use such Functional Part to do so safely, including compliance with applicable Law, relevant policies of the City and the City's requirements related to fire safety or health or workplace safety.

**Safety Orientation Program** means Principal Project Company's detailed plan for the safety orientation of employees and visitors, as more particularly described in Section 01 35 45 of Division 10 of the Technical Requirements.

**Safety Standards** means those provisions of the Technical Requirements that relate to Project safety, including Section B.8.1.6 and Section 01 35 45 of Division 10 of the Technical Requirements. Safety Standards are considered to be important measures to protect public safety, worker safety or the safety of property.

**Scheduled Financial Close Date** has the meaning set forth in Section 3.1.2 (Date of Financial Close).

**Scheduled Maintenance** means regular, routine and planned maintenance scheduled and performed according to a usage, time or other factors to determine frequency and timing of the maintenance.

**Scheduled Milestone Payment Date** means *[Note to PNC: Date to be inserted]*.

**Security Document** means any mortgage, deed of trust, pledge, lien, indenture, trust agreement, hypothecation, assignment, collateral assignment, account control agreement, financing statement under the enacted Uniform Commercial Code of any jurisdiction, security instrument or other charge or encumbrance of any kind, including any lease in the nature of a security instrument, given to any Lender as security for Project Debt or Principal Project Company's obligations pertaining to Project Debt and encumbering Principal Project Company's Interest.

**Senior Debt Service Amount** means the debt service payments that are senior to all other debt obligations in the cash flow waterfall.

**Service Category(ies)** means the discreet services as outlined in Section B and Section C of the IFM Specifications.

---

**Service Failure** means any failure by Principal Project Company to provide the IFM Services in accordance with Performance Measures designated Failure Type “SF” in the Performance Measurements Table and which, where a Response Time or Rectification Time applies, has not been Responded to or Rectified (as the case may be) within the relevant time. For the avoidance of doubt, where no Response Time and/or Rectification Time applies (for example, in respect of scheduled activities) there shall be a Service Failure at the point at which the IFM Failure Event occurred (for example, non-performance of the scheduled activity by the scheduled time).

**Service Failure Deduction** means a deduction from the Availability Payment as a result of a Service Failure.

**Service Failure Performance Measure** means a Performance Measure designated as SF in the Performance Measurements Table.

**Service Line(s)** means a utility line, the function of which is to connect directly the improvements on an individual property (e.g., a commercial building or an industrial warehouse) to another utility line located off such property, which other utility line connects more than one such individual line to a larger system, as well as any cable or conduit that supplies an active feed from a Utility Owner’s facilities to activate or energize a Governmental Entity’s local lighting and electrical systems, traffic control systems, street lights, communications systems and/or irrigation systems.

**Service Requests** means Demand Maintenance, Demand Requisitions, any request for service, report of a Service Failure, report of an Incident or IFM Failure Event or any other report, inquiry, complaint or comment, made by a Building Occupant or automatically generated, to the Help Desk or to Principal Project Company, whether by phone or electronically.

**Setting Date** means \_\_\_\_\_, 2025 ***[30 days prior to the proposal due date for submittal of proposals in connection with the D&C Contractor RFP].***

**SFMTA Board** means the San Francisco Municipal Transportation Agency Board of Directors.

**SFMTA O&M Facilities** means the elements of the Project generally described in Section A.2.1.2 of the IFM Specifications for which SFMTA will provide SFMTA O&M Services.

**SFMTA O&M Facilities Warranty Bond** has the meaning set forth in Section 10.9 (SFMTA O&M Facilities Warranty Bond).

**SFMTA O&M Services** means the transit operations and maintenance services specified in Section A.2.1.2 of the IFM Specifications [and Retail Space maintenance services specified in Section A.2.1.2 of the IFM Specifications] that SFMTA will perform with respect to the SFMTA O&M Facilities. ***[Note: Further consideration required with respect to retail construction and services]***

**Site Security Plan (SSP)** Principal Project Company’s plan defining its oversight management program, team organization, and operating strategy to provide and maintain work site security, prepared and submitted by Principal Project Company in accordance with Section 1.11.2.2 of Division 1 of the Technical Requirements, as updated and approved by the City in accordance with this Agreement.

**SOFR** with respect to any US banking day means a rate per annum equal to the secured overnight financing rate published for such US banking day by the Federal Reserve Bank of New York, on the Federal Reserve Bank of New York's Website. The calculation of SOFR with respect to a loan that bears interest at a rate based on SOFR shall be the rate for the one/three/six calendar months period on the date of determination published by the SOFR Administrator; provided, however, that if as of 5:00 p.m. (New York City time) on any date of determination the SOFR rate for the applicable tenor has not been published by the SOFR Administrator, then the SOFR rate will be the SOFR rate for such tenor as published by the SOFR Administrator on the first preceding day.

**SOFR Administrator** means the CME Group Benchmark Administration Limited (CBA) (or a successor administrator of the SOFR rate as determined by the City, in its reasonable discretion.

**Software** means individually each, and collectively all, of the computer programs developed or provided by Principal Project Company, and any PPC-Related Entity, under this Agreement (including Developed IP, Principal Project Company IP and/or Third-Party IP), including as to each such program, the processes, and routines used in the processing of data, the object code, interfaces to be provided hereunder by PPC-Related Entity, updates, upgrades, and any and all programs otherwise provided by PPC-Related Entity under this Agreement.

**Source Code** means the version of a Software computer program in which the programmer's original programming statements are expressed in any programming language.

**Source Code Documentation** means (a) software written in programming languages, such as C and Fortran, including all comments and procedural code, such as job control language statements, which shall be in a form intelligible to trained programmers and capable of being translated into object or machine readable code for operation on computer equipment through assembly or compiling, and (b) documentation, including flow charts, schematics, statements of principles of operations, architectural standards, and commentary, explanations and instructions for compiling, describing the data flows, data structures, and control logic of the software in sufficient detail to enable a trained programmer through study of such documentation to maintain and/or modify the software without undue experimentation. Source Code and Source Code Documentation also include all modifications, revisions, additions, substitutions, replacements, updates, upgrades and corrections made to the foregoing items.

**Source of Supply Certificate of Compliance** has the meaning set forth in Section 1.4.3.3 of Division 1 of the Technical Requirements.

**Special Tools** means (a) specialized tools necessary for maintenance or repair of Project elements or equipment (including vehicles), and (b) other tools obtained or developed by Principal Project Company or any Contractor for use in performance of the IFM Services. The term excludes tools used in performance of the Work that were not procured for the Project or developed for use on the Project and that were acquired by Principal Project Company or Contractor at its own expense for use on multiple projects. The term "tool" as used in the Contract Documents includes "special tools."

**Standards and Specifications** means the standards, specifications and other documents referenced in the Technical Requirements.

---

**Starting Insurance Benchmarking Premiums** has the meaning set forth in Section 10.1.3(a).

**State** means the State of California.

**Statement of Qualification (SOQ)** means Principal Project Company's Statement of Qualification, provided in response to the Request for Qualifications.

**Step-in Party** means (a) the Collateral Agent, a Lender or any entity that is wholly owned by a Lender or group of Lenders, or (b) any Person approved by City as a Substituted Entity; in each case where such Person is not a Prohibited Person.

**Structure** means, as the context may require, bridges, Culverts, catch basins, drop inlets, retaining walls, cribbing, manholes, end walls, buildings, sewers, service pipes, under drains, foundation drains, steps, fences and other features which may be encountered in the Work and not otherwise classified.

**Subcontract** means each Contract with a Subcontractor.

**Subcontractor** means each Contractor that is not a Prime Contractor.

**Submittal(s)** means, generally, any document, work product or other written or electronic end-product, report or item required to be delivered or submitted to City, Third Parties, or Governmental Entities in connection with this Agreement or the Project.

**Submittal Schedule** has the meaning set forth in Section 1.2.1.6 of Division 1 and Section B.6.1 of the IFM Specifications.

**Substantial Completion** means that all D&C Work is complete (except for Punch List items that do not affect normal and safe use and operation of the Infrastructure Facility and any D&C Work that, by its nature, is to be performed after the Substantial Completion Date), and all other prerequisites for Substantial Completion have been met. Substantial Completion is deemed to have occurred upon satisfaction of all the conditions for the Project in Exhibit 15C (Conditions to Substantial Completion), as confirmed by City's issuance of a Certificate of Substantial Completion in accordance with the procedures and within the time frame established in Section 7.8 (Substantial Completion).

**Substantial Completion Date** means the date City issues a Certificate of Substantial Completion for the Project.

**Substantial Completion Deadline** means **[April 30, 2029 [IF D&C CONTRACTOR PROPOSES EARLIER, THIS DAY WILL BE THE EARLIER DATE]**, as such date may be extended from time to time pursuant to Section 14.1.2 (Extension of Deadlines for General Delay Events).

**Substituted Entity** means a Third Party proposed by the Collateral Agent and approved by City under a Direct Agreement to act in Principal Project Company's stead and not merely as a Step-in Party, in each case where such Person is (a) a Suitable Substitute and (b) not a Prohibited Person.

**Suitable Substitute** means a Person, approved in writing by City in accordance with the Direct

Agreement that:

- (a) has the legal capacity, power and authority to become the party to and perform the obligations of Principal Project Company under this Agreement;
- (b) is in compliance with City's rules and regulations, and has adopted written policies regarding organizational conflicts of interest consistent with City's conflicts of interest policy;
- (c) has ensured that all of its subcontractors are in compliance with City's rules and regulations;
- (d) has adopted written policies regarding organizational conflicts of interest consistent with City's conflicts of interest policy;
- (e) employs individuals having the appropriate qualifications, experience and technical competence to timely perform Principal Project Company's obligations under the Contract Documents and the Principal Project Documents; and
- (f) otherwise has available resources (including committed financial resources and subcontracts) sufficient to enable it to perform the obligations of Principal Project Company under the Contract Documents and the Principal Project Documents.

**Superfund Site** means a site listed on either the National Priorities List or the Proposed National Priorities List at <https://www.epa.gov/superfund/superfund-national-priorities-list-npl>.

**Supplier** means any Person not performing work at or on the Project Site that supplies machinery, equipment, materials, hardware, software, systems or any other appurtenance to the Project to Principal Project Company or to any Contractor in connection with the performance of the Work. Persons that merely transport, pick up, deliver or carry materials, personnel, parts or equipment or any other items or persons to or from the Project Site shall not be deemed to be performing Work at the Project Site.

**Surety(ies)** means each properly licensed surety company, insurance company or other Person approved by City, which has issued a Payment Bond or a Performance Bond.

**Sustainability Management Plan** means Principal Project Company's plan describing its approaches to ensure achievement of the sustainability requirements of the Contract Documents, prepared and submitted by Principal Project Company in accordance with Section 1.9.1 of Division 1 of the Technical Requirements, as updated and approved by the City in accordance with this Agreement.

**System Condition Index or SCI** means the total maintenance, repair and replacement deficiencies of the Infrastructure Facility divided by the current replacement value of the Infrastructure Facility.

**Systems Manual** has the meaning set forth in Section 6.6.4.1 (Systems Manual) of Division 6 of the Technical Requirements.

**Taxes** means federal, State, local or foreign income, margin, gross receipts, sales, use, excise, transfer, consumer, license, payroll, employment, severance, stamp, business, occupation, premium, windfall profits, environmental (including taxes under Section 59A of the Internal Revenue Code of 1986, as amended), customs, permit, capital stock, franchise, profits, withholding, social security (or similar), unemployment, disability, real property, personal property, registration, value added, alternative or add-on minimum, estimated or other taxes, levies, imposts, duties, fees or charges imposed, levied, collected, withheld or assessed at any time, whether direct or indirect, relating to, or incurred in connection with, the Project, the performance of the Work, revenues or act, business, status or transaction of Principal Project Company, including any interest, penalty or addition to such amounts, and including utility rates or rents, in all cases whether disputed or undisputed.

**Technical Requirements** means Exhibit 18 (Technical Requirements).

**Technology Enhancements** means modifications, additions, refinements, substitutions, revisions, replacements and upgrades made to Intellectual Property, equipment, mechanism, operational technology, or to any related documentation, that accomplish incidental, performance, structural, or functional improvements. Technology Enhancements specifically includes modifications, updates, or revisions made to software or any related documentation that correct errors or support new models of input-output devices with which the software is designed to operate.

**Temporary Areas** means areas outside of the Project Site where activities incidental to construction of the Project are being performed by Contractors, including field office sites, storage sites, staging areas dedicated to the Project, temporary work areas and parking areas, but excluding any permanent locations of Principal Project Company or any Contractor.

**Temporary Relocation** means any (a) interim relocation of any Utility (i.e., the installation, removal and disposal of an interim facility) pending installation of a permanent facility in the same or a new location, and (b) removal and reinstallation of the Utility in the same place without an interim relocation.

**Temporary Repair** means, in respect of the occurrence of an IFM Failure Event which results in an Availability Condition not being met in Functional Unit or Functional Component, works of a temporary nature that do not constitute Rectification but satisfy the Minimum Agreed Availability Conditions and substantially make good the relevant IFM Failure Event for the period until a Permanent Repair can be undertaken.

**Temporary Work** means any temporary works and structures necessary for the construction of permanent improvements. This includes falsework, formwork, scaffolding, shoring, temporary earthworks, sheeting, cofferdams, special erection equipment and the like.

**Term** means the period commencing on the Effective Date and ending on the date specified in Section 2.3 (Term).

**Termination Compensation** means the measure of compensation owing from City to Principal Project Company upon termination of this Agreement prior to the stated expiration of the Term, as determined in accordance with this Agreement.

---

**Termination Date** means (a) the date of expiration of the Term, or (b) if applicable, the Early Termination Date.

**Termination Due to Court Ruling** has the meaning set forth in Section 17.4.3 (Termination Due to Court Ruling).

**Termination for Convenience** has the meaning set forth in Section 17.1.1 (Termination for Convenience).

**Test Procedures** means a description of a test to be performed. Test Procedures shall describe the test configuration, the test equipment required, the personnel required to perform the test, all construction and testing pre-requisites that must be completed before the test can be performed, lists each individual step to be followed in the test, expected result of each step, and the pass/fail criteria for each step, and shall include a Test Report form on which the results of the test shall be recorded.

**Test Report** means a form that lists each step to be performed in a test. Each Test Report shall identify the expected results of each step, a location to enter the actual results of each step, a place for the person responsible for performing the test to sign and date the form, and a place for any witnesses of the test to sign and date the form.

**Three-week Look-ahead Activity Reports** has the meaning set forth in Section 1.2.1.7 of Division 1 of the Technical Requirements.

**Third Party(ies)** means any person or entity unrelated to City or Principal Project Company. Third Parties expressly excludes any PPC-Related Entities.

**Third Party IP** means Intellectual Property owned by any Person unrelated to the Principal Project Company, any Contractor, or any of their respective Affiliates.

**Third Party and Utility Owner Coordination Work Plans** has the meaning set forth in Section 1.13 of Division 1 of the Technical Requirements.

**Threatened or Endangered Species** means any species listed by the United States Fish and Wildlife Service as threatened or endangered under the Endangered Species Act, as amended, 16 U.S.C. § 1531 et seq., or any species listed as threatened or endangered under the California Endangered Species Act, Fish and Game Code § 2050 et seq.

**Total Unavailability** has the meaning set forth in Section 5.4 (Total Unavailability) of Exhibit 4B (Availability Payment Mechanism).

**Traffic Control Plan(s) (TCP)** means the site-specific design plan that provides necessary details to control traffic through and around the work area.

**Trainee Plan** means the plan prepared and submitted by Principal Project Company and approved by the City to implement the SFMTA Trainee Program.

**Transaction** has the meaning set forth in Section 20.2.1.

---

**Transaction Survey(s)** means surveys covering IFM Services and people making enquiries or Service Requests by telephone, in writing, electronically or otherwise to Principal Project Company.

**Transportation Management Plan** means Principal Project Company's plan describing how safe traffic operations will be managed and maintained during each phase of construction and in every work zone of the Project, prepared and submitted by Principal Project Company in accordance with Section 1.11.3.1 of Division 1 of the Technical Requirements, as updated and approved by the City in accordance with this Agreement.

**Utility Easement** means a permanent replacement easement and/or other interest in real property (excluding a franchise) located outside of the Project Site that is necessary for a Utility Adjustment.

**Unavailable** means, in relation to a Functional Unit or Functional Component, that such Functional Unit or Functional Component is in a state or condition which does not comply with any one or more of the Availability Conditions and "Unavailability" shall be construed accordingly.

**Unavailable Component Threshold** means, the number of Functional Components in a Functional Unit that if exceeded by Unavailable Components at any point triggers deemed Unavailability of all Functional Components in the relevant Functional Unit. Table 2 (Unavailable Component Thresholds) in Section 5.6 (Unavailable Component Thresholds) of Exhibit 4B (Availability Payment Mechanism) lists the threshold value for each affected Functional Unit.

**Unavoidable Delay Event** means any of the following events or circumstances that occurs prior to the Final Acceptance Date and directly impacts the D&C Work:

- (a) a Force Majeure Event;
- (b) a Major Approval Delay;
- (c) a Utility Delay; or
- (d) an Adverse Weather Event.

**Unidentified Utility** means a subsurface Main or Trunkline Utility, (i) where the Utility Information incorrectly indicates that the subject Main or Trunkline Utility does not exist anywhere within the boundary lines of the Project Site and which Main or Trunkline Utility could not have been reasonably inferred as of the Setting Date based on a Reasonable Investigation; (ii) where the Utility Information does not identify the subject Main or Trunkline Utility within the boundary lines of the Project Site with Reasonable Accuracy and such information could not have been reasonably inferred as of the Setting Date based on a Reasonable Investigation; (iii) where such Main or Trunkline Utility is not identified or referenced in any of the information, data, analyses or reports undertaken by Principal Project Company pursuant to the Predevelopment Agreement; and (iv) where such Main or Trunkline Utility should have been identified or referenced pursuant to a Reasonable Investigation undertaken pursuant to the Predevelopment Agreement. Unidentified Utilities specifically exclude any Utility that serves the Project Site as of the Setting Date and which is to be de-energized or de-activated and removed as part of the Project.

---

**Unilateral Change Order** has the meaning set forth in Section 2 (Unilateral Change Orders) of Exhibit 9 (Change Procedures).

**Uninterruptible Power Supply (UPS)** has the meaning set forth in Section 3.12.14 and Appendix G, Section 2.10.8 of Division 3 of the Technical Requirements.

**Unsafe Condition** means a condition that (a) gives rise to the imminent possibility of serious injury to workers or the public or of serious damage to property or the environment, or (b) affects safe movement.

**Upgrades** means alterations, improvements, modifications or changes, including Capacity Improvements, that Principal Project Company makes to any portion of the Project, as originally designed and constructed, at any time after the Substantial Completion Date, except as part of ordinary maintenance or Renewal Work. Upgrades may include alterations, improvements, modifications or changes that require an amendment or supplement to the final environmental impact documents for the Project or that are to be located outside the boundaries of the original Project Site. Upgrades exclude Technology Enhancements and any alterations, improvements, modifications or changes undertaken in the use or development of a Business Opportunity.

**Use Condition** means a state or condition of the relevant Functional Unit or Functional Component which satisfies the Use Parameters for that Functional Part.

**Use Parameters** means the range of functional requirements for the proper use and enjoyment of a Functional Unit or Functional Component, including the use of, in the case of the Infrastructure Facility, the ancillary equipment for its particular purpose as set out in the Technical Requirements.

**Useful Life** means, for an element, the period following its first installation, or following its last reconstruction, rehabilitation, restoration, renewal or replacement, until the element will next require reconstruction, rehabilitation, restoration, renewal or replacement.

**Utility(ies) or utility(ies)** means a privately, publicly or cooperatively owned facility (which term includes lines, systems and other facilities, and includes municipal and/or government facilities) for transmitting or distributing communications, cable television, power, electricity, gas, oil, crude products, water, steam, waste, or any other similar commodity, including any fire or police signal system as well as streetlights associated with roadways owned by local agencies. However, when used in the context of Utility Adjustments of facilities to accommodate the Project, the term "Utility" or "utility" excludes traffic signals, ramp metering systems, flashing beacon systems, and lighting systems for roads adjacent to the Project. Necessary appurtenances to each utility facility (including the utility source, guide poles, Service Lines, supports, etc.) shall be considered part of the facility. Without limitation, any service lateral connecting directly to a utility shall be considered an appurtenance to that utility, regardless of the ownership of such service lateral.

**Utility Adjustment** means each relocation (temporary or permanent), abandonment, Protection in Place, removal (of previously abandoned utility facilities as well as newly-abandoned facilities), replacement, reinstallation, and/or modification of existing Utilities necessary to accommodate the Project or the Work. For any utility crossing the Project Site or public right of way, the Utility Work for each crossing of the Project Site or public right of way, as applicable, by that utility shall be considered a separate Utility Adjustment. For any utility installed

longitudinally within the Project Site or the public right of way, the Utility Work for each continuous segment of that utility located within the Project Site or public right of way, as applicable, shall be considered a separate Utility Adjustment.

**Utility Betterment** means any upgrading of a Utility that is not attributable to the construction of the Project and is made during the course of a Utility Adjustment solely for the benefit of and at the election of the Utility Owner, including an increase in the capacity, capability, efficiency or function of the facility over that which was provided by the existing Utility. The following are not considered Utility Betterments:

- (a) any upgrading required for accommodation of the Project;
- (b) any upgrading required under the Contract Documents;
- (c) replacement devices or materials that are of equivalent standards although not identical;
- (d) replacement of devices or materials no longer regularly manufactured with an equivalent or next higher grade or size;
- (e) any upgrading required by applicable Law;
- (f) replacement devices or materials that are used for reasons of economy (e.g., non-stocked items may be uneconomical to purchase); and
- (g) any upgrading required by the Utility Owner's applicable Utility Standards.

**Utility Delay** has the meaning set forth in Section 7.6.13.1

**Utility Information** means as-built drawings, existing facility drawings, or other documentation of existing underground Utilities within the Project Site available to Principal Project Company or generated by any PPC-Related Entity. Utility Information includes the Utility conflict matrix and subsurface utility engineering investigations undertaken by or on behalf of Principal Project Company during the PDA Term.

**Utility Owner** means the owner or operator of any Utility (including both privately held and publicly held entities, cooperative utilities, and municipalities and other governmental agencies), including City acting by and through the San Francisco Public Utilities Commission (it being understood that the San Francisco Public Utilities Commission is not the "City" for other purposes under this Agreement)).

**Utility Standards** means the standard specifications, standards of practice, and construction methods that a Utility Owner customarily applies to facilities (comparable to those being adjusted on account of the Project) constructed by the Utility Owner (or for the Utility Owner by its contractors), at its own expense. Except as may be specifically identified in the Technical Requirements, "Utility Standards" are not "Standards and Specifications."

**Utility Work** means the design and construction necessary for a Utility Adjustment. Any Utility Work furnished or performed by Principal Project Company is part of the D&C Work; and any

Utility Work furnished or performed by a Utility Owner is not part of the D&C Work. Utility Work expressly includes Utility Adjustments of PG&E's power lines and poles that impact the Project.

**Vandalism** means willful or malicious damage or defacement (including graffiti) that:

- (a) was not the result of Principal Project Company's failure to comply with its obligations under the Contract Documents and its IFM Management Plan with respect to Vandalism; and
- (b) does not arise from, or was not contributed to, directly or indirectly, by any act or omission of Principal Project Company or any PPC-Related Entity.

**Verification Sampling and Testing** means sampling and testing performed to validate the quality of the product. City, or its designee, will perform Verification Sampling and Testing as part of its QA Oversight efforts.

**Warning Notice** has the meaning set forth in Section 16.1.3.1.

**Weather Data** means a record of annual hourly data for dry and wet bulb temperature, dew point, relative humidity, total horizontal solar radiation, wind speed and direction and atmospheric pressure at the Weather Monitoring Station.

**Weather Monitoring Station** means the closest National Weather Service weather monitoring station to the Infrastructure Facility.

**Work** means all of the work, services and obligations required to be furnished, performed and provided by Principal Project Company under the Contract Documents, including activities to obtain financing as well as all administrative, design, engineering, construction, demolition, Utility Adjustments, payment to Third Parties, support services, financing services, operations, maintenance and other work of renewal, reconstruction, repair or reinstatement of Project improvements and equipment, and management services. The term does not include any efforts which the Contract Documents expressly specify will be performed by Persons other than PPC-Related Entities.

**EXHIBIT 2**

**PROJECT MANAGEMENT PLAN**

**[NOTE TO PNC: FULL PRELIMINARY DRAFT TO BE INCLUDED AT COMMERCIAL CLOSE. FINAL APPROVED DRAFT TO BE INSERTED AND REPLACE PRELIMINARY AS A CONDITION TO NTP 2]**

**EXHIBIT 3**

**IMPLEMENTATION PROPOSAL**

**Exhibit 3A Financial Proposal**

***[NOTE TO PNC: This will include the Finance Plan, including the Base Case Financial Model, with its audited report, and respective commitment letters for Bank Debt, Equity Investments, Security Documents and Insurance Policies, among other documents, and including the Final Price as determined under the PDA, PPC's financing costs, along with a schedule including the proposed Milestone Payment amount and the proposed Availability Payments payable from Substantial Completion to the end of the PDA Term. To be included at Commercial Close.]***

**Exhibit 3B Technical Proposal Elements**

***[NOTE TO PNC: This will include the following elements developed pursuant to the PDA, as selected by City in its discretion:***

- ***aspects PNC/PPC's design and other submittals***
- ***aspects of D&C Contractor's design-build proposal***
- ***aspects of IFM Contractor's proposal***

***This may include listed subs, identified Key Personnel, designs, enhancements to the Technical Requirements, etc. that City chooses to include as contractual requirements. To be included at Commercial Close.]***

**EXHIBIT 4**

**PAYMENT MECHANISM**<sup>1</sup>

**PART A: DEFINITIONS**

**1 DEFINITIONS**

Unless otherwise specified, capitalized terms used in this Exhibit 4 (Payment Mechanism) have the meanings given in Exhibit 1 (Abbreviations and Definitions) to the Agreement.

---

<sup>1</sup> This Exhibit remains subject to continued review in light of ongoing refinements to the IFM Specifications and Technical Requirements

**EXHIBIT 4A**

**MILESTONE PAYMENT MECHANISM**

**1. MILESTONE PAYMENT**

- (a) Subject to the terms and conditions of this Section 1 (Milestone Payment) and the Contract Documents, Principal Project Company shall be entitled to receive a single milestone payment from the City as partial compensation for Principal Project Company's performance of the D&C Work and reaching Substantial Completion (the "Milestone Payment").
- (b) The Milestone Payment shall be calculated using the following formula:
- $$MP = MMP - D$$
- Where:
- MP = Milestone Payment;
- MMP = the amount [\$●];
- D = D&C Deductions incurred for the period commencing on the Effective Date and ending on the Substantial Completion Date as set out in Section 2 (D&C Period Deductions) of Exhibit 4A (Milestone Payment Mechanism).
- (c) For the Milestone Payment, Principal Project Company shall submit an invoice no later than the 10th day of the month immediately following issuance of a Certificate of Substantial Completion in accordance with the process in Section 11.3 (Invoice, Other Amounts and Payments) of the Agreement.
- (d) The City will pay Principal Project Company the Milestone Payment accordance with the process in Section 11.3 (Invoice, Other Amounts and Payments) of the Agreement.
- (e) The Milestone Payment shall not be used to pay the principal of any outstanding obligations, the interest on which is excludable from gross income for federal income tax purposes as set forth under the Internal Revenue Code of 1986, as amended.

## 2. D&C PERIOD DEDUCTIONS

- 2.1 Subject to the provisions of this Agreement, if at any time prior to the Substantial Completion Date, a D&C Failure Event occurs, the City may make a Deduction from the relevant Milestone Payment in respect of that D&C Failure Event.
- 2.2 Principal Project Company shall submit to City, 30 days before the anticipated date of Substantial Completion and Final Acceptance, a report providing a preliminary summary of all D&C Noncompliance Points and D&C Period Deductions calculated as of 30 days prior to the anticipated Substantial Completion Date and Final Acceptance Date (as applicable). Within 30 days following the Substantial Completion Date, Principal Project Company shall submit to City a final summary of all D&C Period Noncompliance Points and D&C Period Deductions calculated as of the Substantial Completion Date or Final Acceptance Date (as applicable).
- 2.3 Principal Project Company will accrue D&C Period Noncompliance Points for every D&C Failure Event in accordance with this Section 2, Section 15.4 of the Agreement and as set forth in Appendix A (D&C Noncompliance Points and Deductions) in this Exhibit 4A (Milestone Payment Mechanism) up until the Substantial Completion Date for the D&C Period.
- 2.4 Principal Project Company will include in its Performance Monitoring Report a summary of all D&C Period Noncompliance Points accrued in the month and cumulative number of points accrued up to the month being reported from the Effective Date.

***[Note: D&C Thresholds under development/review]***

**APPENDIX A**  
**D&C PERIOD NONCOMPLIANCE POINTS AND DEDUCTIONS**

**Table A1 – D&C Failure Event Table**

ID	Main Heading	Subheading	Failure To	Rectification Time	D&C Noncompliance Points	D&C Noncompliance Event Deductions in \$ (for New or Recurred Events)	Recurrence Period	Reference Section(s) of Contract Documents
<b>1</b>	<b>Division 01 - General</b>							
1.1	Project Management	Project Management Plan	Prepare, submit and update Project Management Plan in accordance with the Contract Documents	5 days	5 per D&C Failure Event	-	2 days	Technical Requirements, Division 01, Section 1.1.1
1.2	Project Management	Initiation Meetings	Conduct Initiation Meetings and submit meeting agendas and minutes in accordance with the Contract Documents	1 day	3 per D&C Failure Event	\$150	1 day	Technical Requirements, Division 01, Section 1.1.3.1-5
1.3	Project Management	Weekly Project Coordination Meetings	Conduct Weekly Project Coordination Meetings in accordance with the Contract Documents	1 day	3 per D&C Failure Event	\$150	1 day	Technical Requirements, Division 01, Section 1.1.3.6
1.4	Project Management	Monthly Progress Meetings	Conduct Monthly Progress Meetings and submission of meeting agenda and minutes in accordance with the Contract Documents	1 day	3 per D&C Failure Event	\$150	1 day	Technical Requirements, Division 01, Section 1.1.3.7
1.5	Project Management	Ongoing Coordination Meeting	Conduct Ongoing Coordination Meetings and submission of meeting agenda and minutes in	3 days	1 per D&C Failure Event	\$50	1 day	Technical Requirements, Division 01, Section 1.1.3.8

ID	Main Heading	Subheading	Failure To	Rectification Time	D&C Noncompliance Points	D&C Noncompliance Event Deductions in \$ (for New or Recurred Events)	Recurrence Period	Reference Section(s) of Contract Documents
			accordance with the Contract Documents					
1. 6	Project Management	Special Meetings	Conduct Special Meetings and submission of meeting agenda and minutes in accordance with the Contract Documents	3 days	1 per D&C Failure Event	\$50	1 day	Technical Requirements, Division 01, Section 1.1.3.9
1. 7	Intentionally Omitted							
1. 8	Project Management	Regulatory Approvals Plan	Prepare, submit and update a Regulatory Approvals Plan in accordance with the Contract Documents	5 days	3 per D&C Failure Event	\$150	3 days	Technical Requirements, Division 01, Section 1.1.7
1. 9	Project Management	Design and Construction Management Plans	Prepare, submit and update a complete Design Management Plan to achieve the requirements of Design Management in accordance with the Contract Documents	5 days	5 per D&C Failure Event	-	2 days	Technical Requirements, Division 01, Section 1.1.7.1
1. 10	Project Management	Design and Construction Management Plans	Prepare, submit and update a complete Construction Management Plan to achieve the requirements of Construction Management in	5 days	5 per D&C Failure Event	-	2 days	Technical Requirements, Division 01, Section 1.1.7.2

ID	Main Heading	Subheading	Failure To	Rectification Time	D&C Noncompliance Points	D&C Noncompliance Event Deductions in \$ (for New or Recurred Events)	Recurrence Period	Reference Section(s) of Contract Documents
			accordance with the Contract Documents					
1. 11	Project Management	IFM Management Plan	Prepare, submit and update a complete preliminary IFM Management Plan in accordance with the Contract Documents	5 days	5 per D&C Failure Event	\$300	3 days	Technical Requirements, Division 01, Section 1.1.8
1. 12	Project Controls and Performance Management	Project Schedules	Prepare, submit and update Initial Schedule in accordance with the Contract Documents	5 days	5 per D&C Failure Event	\$1,000	2 days	Technical Requirements, Division 01, Section 1.2.1.2
1. 13	Project Controls and Performance Management	Project Schedules	Prepare, submit and update Project Schedule (excluding the Initial Schedule) in accordance with the Contract Documents	3 days	5 per D&C Failure Event	\$300	1 day	Technical Requirements, Division 01, Section 1.2.1.3 and Section 1.2.2
1. 14	Project Controls and Performance Management	Project Schedules	Prepare, submit and update Recovery Schedule in accordance with the Contract Documents	5 days	5 per D&C Failure Event	\$300	2 days	Technical Requirements, Division 01, Section 1.2.1.4 and Section 1.2.2
1. 15	Project Controls and Performance Management	Project Schedules	Prepare, submit and update complete Project Schedule Monthly Updates in accordance with the Contract Documents	2 days	3 per D&C Failure Event	\$150	1 day	Technical Requirements, Division 01, Section 1.2.1.5 and Section 1.2.2

6.4	Construction Requirements	Functional Performance Testing (FPT)	Provide notice and results of Functional Performance Testing in accordance with the Contract Documents	5 days	3 per D&C Failure Event	\$150	3 days	Technical Requirements, Division 6, Section 6.6.3.6
6.5	Construction Requirements	Commissioning Report	Prepare, submit and update Commissioning Report in accordance with the Contract Documents	5 days	1 per D&C Failure Event	\$50	3 days	Technical Requirements, Division 6, Section 6.6.3.7
6.6	Post Substantial Completion Requirements	Deliver Systems Manual	Prepare, submit and update the necessary operating documents and reports to City in accordance with the Contract Documents	10 days	1 per D&C Failure Event	\$50	10 days	Technical Requirements, Division 6, Section 6.6.4.1
6.7	Post Substantial Completion Requirements	Post Occupancy Review of Building Operations	Meet requirements associated with the Post Occupancy Review of Building Operations in accordance with Contract Documents	10 days	3 per D&C Failure Event	\$150	3 days	Technical Requirements, Division 6, Section 6.6.4.2
6.8	Post Substantial Completion Requirements	Near Warranty End Post Occupancy Review	Meet requirements associated with the Warranty End Post Occupancy Review in accordance with Contract Documents	10 days	3 per D&C Failure Event	\$150	3 days	Technical Requirements, Division 6, Section 6.6.4.3

ID	Main Heading	Subheading	Failure To	Rectification Time	D&C Noncompliance Points	D&C Noncompliance Event Deductions in \$ (for New or Recurred Events)	Recurrence Period	Reference Section(s) of Contract Documents
6.9	Post Substantial Completion Requirements	On-going Commissioning Plan	Prepare, submit and update the Ongoing Commissioning Plan in accordance with the Contract Documents	5 days	1 per D&C Failure Event	\$50	3 days	Technical Requirements, Division 6, Section 6.6.4.4
6.10	Operational Readiness	Operational Readiness	Prepare, submit and update an integrated Operational Readiness Plan in accordance with the Contract Documents	5 days	5 per D&C Failure Event	\$300	3 days	Technical Requirements, Division 6, Section 6.8.

## **EXHIBIT 4B**

### **AVAILABILITY PAYMENT MECHANISM**

#### **3 Availability Payments**

##### **3.1 Maximum Availability Payment**

The Maximum Availability Payment for each Contract Year (y) (“MaxAP<sub>y</sub>”) shall be calculated for any period commencing on or after the Payment Commencement Date as follows:

$$MaxAP_y = MaxAPC_y + (MAPIFM_y \times ESC_y)$$

Where:

*MaxAPC<sub>y</sub>* means the capital portion of the MaxAP for Contract Year y as set out in Appendix D (Payment Schedule) to this Exhibit 4B (Availability Payment Mechanism)

*MaxAPIFM<sub>y</sub>* means the IFM Payment MaxAP for Contract Year y, as set out in Appendix D (Payment Schedule) to this Exhibit 4B (Availability Payment Mechanism)

*ESC<sub>y</sub>* is the escalation factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism)

##### **3.2 Maximum Quarterly Availability Payment**

Subject to any limitations and exceptions expressly provided in the Agreement, Availability Payments shall be paid to the Principal Project Company through Quarterly Availability Payments. The Maximum Quarterly Availability Payment (“MaxQAP”) shall be calculated as the quarterly amount of the MaxAP in accordance with the following formula.

$$MaxQAP_{q,y} = \frac{1}{4} \times MaxAP_y$$

Where:

*MaxAP<sub>y</sub>* is the Maximum Availability Payment for Contract Year y

*MaxQAP<sub>q,y</sub>* is the MaxQAP for Contract Quarter q in Contract Year y

##### **3.3 Availability Payments**

**3.3.1** The Maximum Availability Payment (“MaxAP”) shall be subject to Deductions, if any, with respect to the availability and performance of the Infrastructure Facility. Each Quarterly Availability Payment paid to the Principal Project Company in Contract Year y shall be calculated as follows:

$$QAP_{q,y} = MaxQAP_{q,y} - \sum D_{q,y} + ENC_{q,y} + \sum OA_{q,y}$$

where:

**QAP<sub>q,y</sub>** is the Quarterly Availability Payment for Contract Quarter **q** in Contract Year **y**;

**MaxQAP<sub>q,y</sub>** is the Maximum Quarterly Availability Payment for Contract Quarter **q** in Contract Year **y**;

$\sum D_{q,y}$  is the aggregate sum of all Deductions for Contract Quarter **q** in Contract Year **y** in relation to D&C Failure Events (to the extent not deducted from the Milestone Payment), Service Failures and Availability Failures calculated in accordance with the provisions set out in Section 5 (Deductions from Availability Payments) of this Exhibit 4B (Availability Payment Mechanism);

**ENC<sub>q,y</sub>** is Energy Net Compensation (determined pursuant to the Energy Pain Share/Gain Share Mechanism) for Contract Quarter **q** in Contract Year **y**;

$\sum OA_{q,y}$  is the aggregate of any other adjustments for Contract Quarter **q** in Contract Year **y** to reflect previous over-payments and/or under-payments, any interest payable in respect of any amounts owed, and, except as set out in Section 11.3.2(ii) of the Agreement any Other Amounts due and payable from Principal Project Company to the City or from the City to Principal Project Company under the Agreement.

**3.3.2** If in the Contract Quarter in which the Payment Commencement Date falls or in the last Contract Quarter of the Term, a pro rata adjustment shall be made to reflect the actual number of days in the Contract Quarter from and including the Payment Commencement Date (for the first Contract Quarter) and up to and including the last day of the IFM Period (for the last Contract Quarter) for purposes of calculating the Quarterly Availability Payments and Deductions.

#### **3.4 Invoicing and Payment of Quarterly Availability Payments**

For each Quarterly Availability Payment, Principal Project Company shall submit an invoice no later than the 10<sup>th</sup> day of the month immediately following the relevant Contract Quarter in accordance with the process in Section 11.3 (Invoice, Other Amounts and Payment) of the Agreement. The City will pay Principal Project Company the Quarterly Availability Payment accordance with the process in Section 11.3 (Invoice, Other Amounts and Payments) of the Agreement.

### **4 ESCALATION FACTOR**

**4.1** The Escalation Factor shall be calculated in accordance with the following formula:

$$ESC_y = \frac{CPI_y}{CPI_0}$$

where:

**ESC<sub>y</sub>** is the escalation factor applicable to the relevant Contract Year **y**;

**CPI<sub>y</sub>** Consumer Price Index as of the reference month that is available in the year that is immediately prior to the commencement of Contract Year **y**, as published by US Bureau of Labor Statistics, for Urban Consumers, for the San Francisco-Oakland-Hayward, CA areas (All Items). **ESC<sub>y</sub>** shall apply to all calculations relating to Contract Year **y**; and

**CPI<sub>0</sub>** is the prevailing value of Consumer Price Index as of the Effective Date, published by US Bureau of Labor Statistics, for Urban Consumers for the San Francisco-Oakland-Hayward, CA areas (All Items).

## 5 DEDUCTIONS FROM AVAILABILITY PAYMENTS

### 5.1 Entitlement to Make Deductions

5.1.1 Subject to the provisions of this Agreement, if at any time during the Term, a D&C Failure Event (to the extent not deducted from the Milestone Payment), Service Failure or Availability Failure occurs, the City may make a Deduction from the relevant Maximum Availability Payment in respect of that Failure Event, except that:

- (a) the maximum aggregate Deduction amount that the City can make from a Quarterly Availability Payment shall not exceed 35% of the Maximum Quarterly Availability Payment (“**MaxQAPIFMq**”) for that Contract Quarter (“**Quarterly Deduction Cap**”); and
- (b) if the aggregate Deduction accrued for a Contract Quarter exceed the Quarterly Deduction Cap, the Deduction amount in excess of the Quarterly Deduction Cap shall be applied to the next Quarterly Availability Payment where the Quarterly Deduction Cap has not been exceeded.

### 5.2 Classification of IFM Failure Events

5.2.1 The classification of an IFM Failure Event as a potential Availability Failure or a Service Failure, shall be made at the time at which the occurrence of the IFM Failure Event is reported to the Help Desk. For clarity, this classification is for the identification of applicable Response Time and Rectification Time, however the IFM Failure Event shall not be considered (a) an Availability Failure unless it causes a Functional Unit or Functional Component (as the case may be) to be Unavailable and the IFM Failure Event is not Rectified within the Rectification Time; or (b) a Service Failure, if the IFM Failure Event is not Responded to within the Response Time or Rectified within the Rectification Time (in the case of IFM Failure Events requiring Rectification which do not constitute a breach of the Availability Conditions). If, in accordance with Performance Measurements Table, no Rectification Time or Response Time applies, the IFM Failure Event shall be a

Service Failure An IFM Failure Event which is incorrectly classified may be re-classified with the approval of Authorized Representatives, acting reasonably, in which case the applicable Performance Monitoring Report will be revised accordingly.

- 5.2.2** For the purposes of calculating Deductions and Noncompliance Points, and noting that classification of IFM Failure Events shall proceed in accordance with Section 5.2.1,
- (a) the identification of Availability Failures will be made in accordance with the Functional Units and Components Table included in Appendix B (Functional Areas, Functional Units, Functional Unit Rankings and Deduction Amounts for Availability Failures and Services Failures) to this Exhibit 4B (Availability Payment Mechanism); and
  - (b) the identification of Service Failures shall be made in accordance with the Performance Measurements included in the Performance Measurements Table and with reference to Appendix A (Space Tolerances) of Division 7 (IFM Specifications) of Exhibit 18 (Technical Requirements).

### **5.3 Bedding-In Period and Seasonal Bedding-In Period**

**5.3.1** During the Bedding-In Period, the number of Noncompliance Points and the amount of any Deductions in respect of Service Failures occurring in the provision of any IFM Service shall be reduced by 25%.

**5.3.2** For the avoidance of doubt, there shall be no relief from Noncompliance Points or Deductions relating to Availability Failures during the Bedding-In Period.

## **6 SERVICE FAILURE DEDUCTIONS**

### **6.1 Service Failure Deductions**

**6.1.1** Service Failure Deductions shall be applied in accordance with Section 15.2 of the Agreement and this Exhibit 4B.

**6.1.2** Subject to this Section 6 (Deductions for Service Failures), the amount of the Service Failure Deduction shall be as specified below.

- (a) in the case of a Minor Service Failure, the sum of \$75 per Service Failure, index-linked using the Escalation Factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism);
- (b) in the case of a Medium Service Failure, the sum of \$300 per Service Failure, index-linked using the Escalation Factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism); and
- (c) in the case of a Major Service Failure, the sum of \$650 per Service Failure, index-linked using the Escalation Factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism).

## 6.2 Performance Action Plans and Energy Performance Action Plans

**6.2.1** Missed submittals of Performance Action Plans or failure to implement particular actions within the Performance Action Plan are to be considered separate and distinct Service Failure Deductions as described below;

- (a) where a complete Performance Action Plan is not submitted within the due date as identified in [Section B.16.2 of Division 7 (IFM Specifications) of Exhibit 18 (Technical Requirements)], a Performance Action Plan deduction of \$300 as of the first missed due date, index-linked using the Escalation Factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism);
- (b) for every 7 calendar days following the first due date where that Performance Action Plan is not submitted, a further Deduction of \$300 applies, index-linked using the Escalation Factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism); and
- (c) where each key activity listed in the Performance Action Plan is not implemented according to the milestone date included in the Performance Action Plan, a Deduction of \$300 applies. A further \$300 Deduction applies for each key activity milestone still not implemented every 14 calendar days following the first milestone date, index-linked using the Escalation Factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism).

**6.2.2** Missed submittals of Energy Performance Action Plans or failure to implement particular actions within the Energy Performance Action Plan are to be considered separate and distinct Service Failure Deductions as described below;

- (a) where a complete Energy Performance Action Plan is not submitted within the due date as identified in Section 4.1.1 of Exhibit 12 Energy Management], an Energy Performance Action Plan deduction of \$500 applies as of the first missed due date, index-linked using the Escalation Factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism);
- (b) for every 7 days following the first due date where that Energy Performance Action Plan is not submitted, a further Deduction of \$500 applies, index-linked using the Escalation Factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism); and
- (c) where each key activity listed in the Energy Performance Action Plan is not implemented according to the milestone date included in the Energy Performance Action Plan, a Deduction of \$2,000 applies. A further \$2,000 Deduction applies for each key activity milestone still not implemented every 14 days following the first milestone date, index-linked using the Escalation Factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism).

### **6.3 Repeat Service Failures and Repeat Failure Ratchet**

- 6.3.1** Following the occurrence of a Service Failure Deduction, Principal Project Company shall be allowed an additional Rectification Time equivalent to the original Rectification Time, provided that:
- (a) there shall be no Rectification Time (where applicable) for a second Service Failure of the same Performance Measurement which occurs within the same Day; and
  - (b) where three or more Service Failures occur with respect to the same Performance Measurement in any rolling period of 10 days, then a repeat failure ratchet of 150% of the applicable Deduction (“Repeat Failure Ratchet”) shall be applied to the third and every subsequent Service Failure Deduction for each Service Failure related to the same Performance Measure in such 10-day period.
- 6.3.2** The provisions of this Section 4.3 (Repeat Service Failures and Repeat Failure Ratchet) of Exhibit 4B (Availability Payment Mechanism) shall not apply to Service Failures in cases where, if the Response or Rectification is not carried out within the Response Time or the Rectification Time, as applicable, the City’s Authorized Representative notifies Principal Project Company’s Authorized Representative that the City no longer requires the relevant IFM Services, in which cases no Deduction shall be applied.
- 6.3.3** Where a Service Failure has no Response Time or Rectification Time, a Service Failure shall occur upon the occurrence of the IFM Failure Event in question.
- 6.3.4** Following the occurrence of a Service Failure Deduction, Principal Project Company shall be allowed additional Rectification Time and a Service Failure Deduction shall apply in accordance with this Section 6 (Service Failure Deductions) of Exhibit 4B (Availability Payment Mechanism) and shall repeat as follows:
- (a) every 24 hours until rectified for Major Service Failures;
  - (b) every 72 hours for Medium Service Failures; or
  - (c) every 7 calendar days for Minor Service Failures.

## **7 DEDUCTIONS FOR AVAILABILITY FAILURES**

### **7.1 Unavailability Deductions**

- 7.1.1** Unavailability Deductions shall be applied in accordance with Section 15.2 of the Agreement and this Exhibit 4B.
- 7.1.2** Subject to this Exhibit 4B (Availability Payment Mechanism), the amount to be deducted from the Maximum Availability Payment in respect of any Availability Failure shall be the aggregate of the Availability Failure Deduction amounts for all Functional Components

made Unavailable as a result of the Availability Failure, calculated based on the duration the Functional Component is Unavailable.

**7.1.3** Availability Failure Deductions will be calculated in accordance with the conditions and deduction thresholds included in Section 7 (Deductions for Availability Failures) of Exhibit 4B (Availability Payment Mechanisms) and Appendix A (Response and Rectification Times) to this Exhibit 4B (Availability Payment Mechanism) and will be indexed using the Escalation Factor calculated in accordance with Section 4 (Escalation Factor) of this Exhibit 4B (Availability Payment Mechanism).

**7.1.4** If any of the Functional Unit are rendered Unavailable but the City continues to use it (or any part thereof), the Availability Failure Deduction for that Functional Unit will be reduced by 50% and the IFM Noncompliance Points will be reduced by 50%. Principal Project Company shall be obliged to continue to provide IFM Services in respect of that Functional Part such that Performance Requirements are normally provided as part of day to day functioning, acting reasonably, and any failure to provide the same may, subject to the provisions of this Exhibit 4B (Availability Payment Mechanism), give rise to a Service Failure.

## **7.2 Service Failure Becoming an Availability Failure**

A Service Failure may become or lead to an Availability Failure if circumstances change, or the Service Failure continues. In such a circumstance, if a Functional Part becomes Unavailable, the Service Failure will have ended (without prejudice to the Service Failure Deductions that have accrued to that point) and an Availability Failure will have occurred.

## **7.3 Effect of Availability Failures on Service Failures**

**7.3.1** Until an Availability Failure has been Rectified, the Deduction in respect of the Availability Failure shall be the only Deduction available to be made in respect of any Functional Part in which the Availability Failure has occurred. No Service Failure Deduction shall be made for any Service Failure that occurs subsequent to the Availability Failure which may occur in the relevant Functional Part during the period until Rectification has been completed.

## **7.4 Total Unavailability**

**7.4.1** Total Unavailability means, that all of the following events have occurred at any given time:

- (a) 40% or greater of all Revenue Vehicle Parking Spaces are Unavailable;
- (b) 100% of the Functional Components associated with the Dispatch Function are Unavailable: and
- (c) the Meet and Greet is Unavailable.

**7.4.2** In the event of Total Unavailability, all Functional Units in the Infrastructure Facility shall be deemed to be Unavailable for purposes of calculating deductions associated with Availability Failures.

**7.5 Repeat Availability Failures and Repeat Failure Ratchet**

- 7.5.1** Following the occurrence of an Availability Failure and the relevant Deduction has been applied, Principal Project Company shall be allowed an additional Rectification Time equivalent to the initial Rectification Time, provided that;
- (a) there shall be no Rectification Time for a second Availability Failure which occurs within the same Day, of the same type of Availability Failure and which relates to the same Functional Component or to a different Functional Component within the same Functional Unit and there is reason to believe that the root cause of each Availability Failure is the same; and
  - (b) where three or more Availability Failures occur with respect to the same type of Availability Failure related to the same Functional Part in any rolling period of 20 days, then a Repeat Failure Ratchet of 150% of the applicable Availability Failure shall be applied to the third and every subsequent Availability Failure Deduction for each Availability Failure related to the same Availability Failures and Functional Part in such 20-day period.

**7.6 Unavailable Component Tiers and Thresholds**

- 7.6.1** For Revenue Vehicle Parking Spaces and Non-Revenue Vehicle Parking Spaces, City shall be entitled to make Deductions with respect to the number of Unavailable Functional Components as a percentage of the Functional Unit, in a tiering system as per Table 2 (Unavailable Tiers for Revenue / Non-Revenue Parking) below.

**Table 2 – Unavailable Tiers for Revenue/ Non-Revenue Vehicle Parking Spaces**

<b>Unavailable % of Functional Unit</b>	<b>Deductions</b>
0-9% of Functional Unit	Deductions to be applied based on number of Unavailable Functional Components
10- 19% of Functional Unit	20% of Functional Unit
20 – 29% of Functional Unit	40% of Functional Unit
30 – 39% of Functional Unit	60% of Functional Unit
40 – 49% of Functional Unit	80% of Functional Unit
50- 100% of Functional Unit	100% of Functional Unit

- 7.6.2** For the Functional Units included in Table 3 (Unavailable Component Thresholds) below, if any combination of Availability Failures occur that render a number of Functional Components Unavailable that exceeds the Unavailable Component Threshold for that Functional Unit, all of the Functional Components in that Functional Unit will be deemed Unavailable until the number of Unavailable Functional Components falls below the Unavailable Component Threshold.

**Table 3– Unavailable Component Thresholds**

Item	Functional Unit Reference	Unavailable Unit Threshold
Elevators at grid A7-B8 (Levels B1, Ground, Mezzanine)	AL-016A	1
60' Bus Repair Bays	GL-011	4
60' Preventative Maintenance Bays	GL-012	2

**7.7 Rectification**

- 7.7.1 No Availability Failure shall occur if Principal Project Company successfully carries out the Rectification within the specified Rectification Time and in such circumstances no Deduction shall be made and no Noncompliance Points shall be assigned.
- 7.7.2 When carrying out a Rectification, or a Temporary Repair pursuant to Section 9 (Temporary Repairs) of this Exhibit 4B (Availability Payment Mechanism), Principal Project Company shall act in accordance with Applicable Law and Standards and Good Industry Practice. Failure to do so shall be deemed to be a new Minor Service Failure, unless the failure constitutes a breach of applicable Law, in which case a Major Service Failure will be deemed to have occurred.

**8 IFM NONCOMPLIANCE POINTS SYSTEM**

**8.1 IFM Noncompliance Points Application**

- 8.1.1 The provisions included in Sections 6 (Deductions for Availability Failures) of this Exhibit 4B (Availability Payment Mechanism) notwithstanding, IFM Noncompliance Points shall accrue to relevant IFM Failure Event in accordance with this Section 8.1, Section 15.4 of the Agreement and Appendix C (IFM Noncompliance Points) to this Exhibit 4B (Payment Mechanism).
- 8.1.2 In the case of failure in more than one Functional Component, the number of IFM Noncompliance Points to be awarded in respect of that the IFM Failure Event shall be determined by the number of Functional Components affected in accordance with conditions and thresholds included in Appendix C (IFM Noncompliance Points) to this Exhibit 4B (Payment Mechanism).
- 8.1.3 The maximum aggregate IFM Noncompliance Points that the City can award in any one Response Time or Rectification Time shall be 250 IFM Noncompliance Points, regardless of the number of Functional Components impacted by such IFM Failure Event.
- 8.1.4 Principal Project Company will report on all accumulated IFM Noncompliance Points in the Performance Monitoring Report, including a report on the accumulated IFM Noncompliance Points per Functional Part, an explanation of the reasons for the accumulation, total IFM Noncompliance Points for the previous quarters and Contract Year and the total cumulative IFM Noncompliance Points for the period since the commencement of the Payment Commencement Date.

**8.1.5** The cumulative points record over the IFM Period will be used for purposes of tracking thresholds leading to Performance Notices, Increased Oversight, cure plans and assessing Persistent PPC Default and other related actions as defined in Article 15 (Deductions and Noncompliance Points) of the Agreement.

## **9 TEMPORARY REPAIRS**

**9.1** If Principal Project Company informs the City that it is unable to Rectify an IFM Failure Event within the specified Rectification Time due to the need for specialized materials or personnel that are not, and cannot reasonably be expected to be, immediately available at the Infrastructure Facility but that a Temporary Repair can be effected:

- (a) the City shall permit Principal Project Company to carry out the Temporary Repair proposed by Principal Project Company unless the City, acting reasonably, considers that, if the Temporary Repair proposed by Principal Project Company is carried out, the use of the relevant Functional Part will not be in accordance with Good Industry Practice or applicable Laws; and
- (b) where a Temporary Repair is permitted pursuant to Section 8.1(a), a deadline by which a Permanent Repair must be made shall be agreed to by the Parties, each acting reasonably, giving Principal Project Company a reasonable period within which to carry out the Permanent Repair (the “**Permanent Repair Deadline**”).

**9.2** During any period beginning at the time when a Temporary Repair is permitted and ending at the earlier of:

- (a) the time at which a Permanent Repair is successfully completed; and
- (b) the Permanent Repair Deadline,

the Availability Conditions shall be replaced by the Minimum Agreed Availability Conditions, to be agreed between the City’s Authorized Representative and the Principal Project Company’s Authorized Representative, each acting reasonably, for the purposes of assessing if the relevant Functional Part is Unavailable.

**9.3** If the Response Time (where applicable) is met, and Temporary Repair is effected within the specified Rectification Time and the Permanent Repair is effected by no later than the Permanent Repair Deadline, no Availability Failure or Service Failure occur, and no Deduction may be made, in respect of the IFM Failure Event.

**9.4** If the Temporary Repair is not effected within the specified Rectification Time, a Service Failure or, as the case may be, Availability Failure, shall be deemed to occur and the following provisions shall apply:

- (a) there shall be a further period in which to effect the Temporary Repair beginning at the expiry of the Rectification Time and of a duration equal to that of the original Rectification Time;
- (b) Principal Project Company shall ensure that the Temporary Repair is successfully carried out prior to the expiry of the additional period referred to in Section 9.4(a);

- (c) if the Temporary Repair is not successfully carried out prior to the expiry of the additional period referred to in Section 8.4(a), a further Service Failure or, as the case may be, Availability Failure shall occur and a further additional period shall commence; and
- (d) if the Temporary Repair is not successfully carried out prior to the Permanent Repair Deadline, and no Permanent Repair has been successfully carried out, the right for Principal Project Company to carry out a Temporary Repair pursuant to this Section 9 (Temporary Repairs) of Exhibit 4B (Availability Payment Mechanism) shall cease and Sections 6 (Deductions for Service Failures) and 7 (Deductions for Availability Failures) of this Exhibit 4B (Availability Payment Mechanism) shall apply.

## **10 AMENDMENT OF IFM PERIOD PERFORMANCE MEASURES TABLE**

Section 15.9 (Amendment of IFM Period Performance Measurement Table) of the Agreement shall apply to any amendment of the Performance Measures Table.

## **11 FAILURE BY PRINCIPAL PROJECT COMPANY TO MONITOR OR REPORT**

- 11.1** The Performance Monitoring Reports produced by Principal Project Company for any month shall be the source of factual information regarding the performance of the IFM Services for the relevant Contract Quarter for the purposes of reporting the occurrence of all Availability Failures and Service Failures, and the calculation of resulting Deductions and Noncompliance Points in accordance with the provisions of this Exhibit 4B (Availability Payment Mechanism).
- 11.2** Principal Project Company shall also report the aggregate Deductions arising as a result of Availability Failures and Service Failures in accordance with the categories and rolling Contract Quarter periods identified for the purposes of measuring the performance of the IFM Services in terms of the amount of Deductions incurred. If there is any error or omission in the Performance Monitoring Report for any Contract Month, Principal Project Company and the City shall agree to an amendment to the Performance Monitoring Report or, failing agreement within 10 days of notification of the error or omission, which shall be made not more than 2 calendar months following the submission of the applicable Performance Monitoring Report to the City, except in the “relevant circumstances” referred to in this Section 10 (Failure by Principal Project Company to Monitor or Report) either Party may refer the matter to the Contract Dispute Procedures.
- 11.3** If Principal Project Company fails to monitor or accurately report an IFM Failure Event (Service Failure or Availability Failure) then, without prejudice to the Deduction to be made in respect of the relevant Service Failure or Availability Failure (if any), the failure to monitor or report the IFM Failure Event shall be deemed to be a new Minor Service Failure, unless the “relevant circumstances” set out below apply, in which case it shall be deemed to be a new Major Service Failure.
- 11.4** In the event that any inspection or investigation by the City of records made available pursuant to the Agreement reveals any further matters of the type referred to in this Section 10 (Failure by Principal Project Company to Monitor or Report), those matters

shall be dealt with in accordance with Section 9 (Amendment of IFM Period Performance Measures Table) of this Exhibit 4B (Availability Payment Mechanism), as appropriate, and the City shall, in addition, be entitled to make Deductions in respect of any Service Failures or Availability Failures in the manner prescribed in Sections 6 (Service Failure Deductions), 7 (Deductions for Availability Failures) and 8 (IFM Noncompliance Points System) of this Exhibit 4B (Availability Payment Mechanism). Any such Deductions shall be made from the Maximum Quarterly Availability Payment payable in respect of the Contract Quarter in which the relevant matters were revealed by the City's investigations.

**11.5** For the purposes of this Section 11 (Failure by Principal Project Company to Monitor or Report) of Exhibit 4B (Availability Payment Mechanism), the "relevant circumstances" are:

- (a) fraudulent action or inaction;
- (b) deliberate misrepresentation; or
- (c) gross misconduct or incompetence in each case on the part of PPC-Related Entities

**11.6** The provisions of this Section 11 (Failure by Principal Project Company to Monitor or Report) of Exhibit 4B (Availability Payment Mechanism) shall be without prejudice to any rights of the City pursuant to the relevant sections of the Agreement.

## **12 EXTENSION OF RESPONSE TIME OR RECTIFICATION TIME**

**12.1** Principal Project Company will be entitled to an extension of the duration of the Response Time or Rectification Time (as applicable) if Principal Project Company is unable to Respond to or Rectify a Service Failure or Availability Failure due to:

- (a) a direction of the City's Authorized Representative to delay or reschedule the Response, or Rectification;
- (b) Principal Project Company performing Scheduled Maintenance and Renewal Work;
- (c) Principal Project Company not being able to access the applicable portion of the Project Site due to work performed by City or Other Contractors, but only to the extent and for the period that Principal Project Company's ability to Respond or Rectify the Noncompliance Event was directly and adversely affected; or
- (d) a Relief Event, but only to the extent and for the period that Principal Project Company's ability to Respond to or Rectify the Service Failure or Availability Failure was directly and adversely affected, as determined by the City's Authorized Representative, acting in good faith.

**APPENDIX A  
 RESPONSE AND RECTIFICATION TIMES**

Service Failures and/or Availability Failures (unless specifically identified otherwise), will only occur upon the expiry of the following Response and Rectification Times in accordance with this Appendix A (Response and Rectification Times) of this Exhibit 4B (Availability Payment Mechanism) and the Performance Measurement Table.

**RESPONSE AND RECTIFICATION TIMES**

**Table A1 – Service Failure Response and Rectification Times by Event Category**

<b>Category</b>	<b>Definition</b>	<b>Response Time</b>	<b>Rectification Time</b>
Priority 1	Situations requiring immediate action to return the Infrastructure Facility to normal operations, stop accelerated deterioration, or correct a safety hazard that imminently threatens life or serious injury to public and/or City employees.	15 minutes	4 hours (for all Functional Component Rank categories)
Priority 2	Situations that will imminently become critical, if not corrected expeditiously, includes intermittent interruptions and/or potential safety hazards.	The longer of 30 minutes or prior to the resumption of core work hours	The longer of 8 hours or prior to the resumption of core work hours (for all FunctionalComponent Rank categories)
Priority 3	Conditions requiring appropriate attention to preclude deterioration or potential downtime and associated damage or higher costs if deferred further. Items representing a practical improvement to existing conditions. These items are not required for the most basic functions of the Infrastructure Facility but will improve the overall usability and accessibility and/or reduce long-term maintenance.	The longer of 2 hours or prior to the resumption of core work hours	7 calendar days

**Table A2 – Availability Failure Response and Rectification Times per Functional Unit Rank Category**

<b>Functional Component Rank Category</b>	<b>Response Time</b>	<b>Rectification Time</b>
5	15 minutes	4 hours
4	15 minutes	8 hours
3	The longer of 30 minutes or prior to the resumption of core work hours	12 hours
2	The longer of 30 minutes or prior to the resumption of core work hours	24 hours
1	The longer of 60 minutes or prior to the resumption of core work hours	48 hours

**APPENDIX B**

**FUNCTIONAL AREAS, FUNCTIONAL UNITS, FUNCTIONAL UNIT RANKINGS, CORE HOURS, AND DEDUCTION AMOUNTS FOR AVAILABILITY FAILURES**

**Table B1: Deduction Amounts for Availability Failures – Facility**

<b>Functional Unit Rank Category</b>	<b>Deduction Amount (per Rectification Time period)</b>
5	\$2,500, index-linked using the Escalation Factor calculated in accordance with <u>Section 2</u> (Escalation Factor) of this <u>Exhibit 4B</u> (Availability Payment Mechanism)
4	\$1,000, index-linked using the Escalation Factor calculated in accordance with <u>Section 2</u> (Escalation Factor) of this <u>Exhibit 4B</u> (Availability Payment Mechanism)
3	\$550, index-linked using the Escalation Factor calculated in accordance with <u>Section 2</u> (Escalation Factor) of this <u>Exhibit 4B</u> (Availability Payment Mechanism)
2	\$200, index-linked using the Escalation Factor calculated in accordance with <u>Section 2</u> (Escalation Factor) of this <u>Exhibit 4B</u> (Availability Payment Mechanism)
1	\$90, index-linked using the Escalation Factor calculated in accordance with <u>Section 2</u> (Escalation Factor) of this <u>Exhibit 4B</u> (Availability Payment Mechanism)

**Table B2: Space Types and Core Hours**

<b>Space Type</b>	<b>Core Hours</b>
Maintenance and Transit Spaces (“Transit/ Maintenance”)	4am – 10pm, Monday to Sunday
Office/ Admin and Training Spaces (“Training/ Administration”)	8am – 5pm, Monday to Friday

### Functional Units in Facility

The following tables presented in this Appendix B identify the Functional Components and Functional Units in the Infrastructure Facility, and Functional Component Rank Category. The Functional Components and Functional Units have been identified by floor level in the Infrastructure Facility and the functions carried out in that part of the Infrastructure Facility.

**Table B3: Functional Components and Functional Units for facilities on multiple levels**

Level	Space	Space Type	Functional Unit	FU Reference	Functional Components	No. of Functional Components	Component Ref.	Rank	
All Levels (Basement, Ground, Levels 2-4)	Parking	Transit/Maintenance	Bus Parking (40' Buses)	AL-010	40' Bus Parking Bays	53	AL-010-1	4	
			Bus Parking (60' Buses)	AL-011	60' Bus Parking Bays	160	AL-011-1	4	
			Parking for Standard Non-Revenue Vehicles (staff)	AL-012	Std N-Rev Parking Bays	151	AL-012-1	2	
			Parking for Large Non-Revenue Vehicles	AL-013	Large N-Rev Parking Bays	12	AL-013-1	2	
	Bus Washing	Transit/Maintenance	Bus Washer Function	AL-014	Bus Washer (Levels 3 & 4)	2	AL-014-1	4	
	Building Spaces	Transit/Maintenance	Stairs		AL-015	Stairs at grid A7-B8 (B1, Ground, Level 1)	1	AL-015-1	5
						Stair at grid A11-B12 (Ground and Level 1)	12	AL-015-2	5
						Stairs at grid D12-E13 (Ground, L1-4) - common stairs	1	AL-015-3	5
						Stairs at grid B1-B2 (L1)	1	AL-015-4	5

					Stairs at grid H11-J12 (Ground, L1-4)	1	AL-015-5	5
					Stairs at grid G1-H2 (Ground, L1)	1	AL-015-6	5
			Elevators at grid A7-B8 (Levels B1, Ground, Mezzanine)	AL-016	Elevators	3	AL-016-1	4
			Other Elevators for BYC	AL-017	Elevator at grid C12-D13 (Ground, Mezzanine)	1	AL-017-1	4
					Elevator at grid H11 (Ground, Mezzanine, L2 and 3)	1	AL-017-2	4
			Distribution Chases, Shafts, or Raceways, vertical or horizontal.	AL-018	Distribution Chases, Shafts, or Raceways, vertical or horizontal.	1	AL-018-1	3
			Common-Use/Exterior Spaces	AL-019	All public spaces such as sidewalks, landscaping, etc.	1	AL-019-1	1

**Table B4: Functional Components and Functional Units for Basement Level**

Level	Space	Space Type	Functional Unit	FU Reference	Functional Components	No. of Functional Components	Component Ref.	Rank
BYC Basement	Parking	Transit/Maintenance	Basement Parking Spaces	B1-010	Parking for Car Share	5	B1-010-1	2
					FMO Parking	3	B1-010-2	2
					Bicycle parking	10	B1-010-3	2
	Service & Clean	Transit/Maintenance	Water Reclamation	B1-011	Water Reclamation	2	B1-011-1	2
FMO			Office spaces	B1-012	Site Manager	1	B1-012-1	2

		Transit/ Maintenance			Admin Open Office Area	1	B1-012-2	2
			Janitor	B1-013	Janitor Closet 1	1	B1-013-1	2
					Janitor Closet 2	1	B1-013-2	2
			IT & Storage	B1-014	IT Room	1	B1-014-1	3
					Tech Shop	1	B1-014-2	2

**APPENDIX C**

**IFM NONCOMPLIANCE POINTS**

IFM Noncompliance Points will be assessed based on the following categorization for IFM Failure Events in accordance with this Exhibit 4 and the Performance Measurement Table.

**Table C1: IFM Noncompliance Points Table for Service Failures**

Service Failure Level	Noncompliance Points	Recurrence Period
MAJOR	10	As per 'FREQ' column in Performance Measurement Table in accordance with relevant Performance Measure
MED	5	As per 'FREQ' column in Performance Measurement Table in accordance with relevant Performance Measure
MINOR	1	As per 'FREQ' column in Performance Measurement Table in accordance with relevant Performance Measure

**Table C2: IFM Noncompliance Points Table for Availability Failures**

Functional Component Rank Category	Noncompliance Points	Recurrence Period
5	10	4 hours
4	10	8 hours
3	5	12 hours
2	5	24 hours
1	1	48 hours

**APPENDIX D**  
**PAYMENT SCHEDULE**

**[To be inserted based on Financial Proosal]**

**EXHIBIT 6**

**FORMS OF PAYMENT AND PERFORMANCE SECURITY**

Exhibit 6A: Financial Close Security

Exhibit 6B: Form of D&C Payment Bond<sup>1</sup>

Exhibit 6C: Form of D&C Performance Bond<sup>1</sup>

Exhibit 6D: Form of Multiple Obligee Rider for D&C Payment Bond<sup>1</sup>

Exhibit 6E: Form of Multiple Obligee Rider for D&C Performance Bond<sup>1</sup>

Exhibit 6F: Form of SFMTA O&M Facilities Warranty Bond

<sup>1</sup> If the bond is to secure the performance or payment obligations of the D&C Contractor or other Key Contractor, rather than Principal Project Company, then the form of the bond shall be revised in accordance with Section 10.3.1.8 of this Agreement.

**EXHIBIT 6A**

**FORM OF FINANCIAL CLOSE SECURITY**

**FORM 6A-1 - FORM OF FINANCIAL CLOSE BOND<sup>1</sup>**

**Bond No.** \_\_\_\_\_

**KNOW ALL PERSONS BY THESE PRESENTS**, that the \_\_\_\_\_, as Principal and \_\_\_\_\_, as Surety, each authorized and licensed to transact business in the State of California (“**State**”), and each a corporation duly organized under the laws of the State indicated on the attached page, having its principal place of business at the address listed on the attached page, in the State indicated on the attached page, and each Surety authorized as a surety in the State, are jointly and severally held and firmly bound unto the City and County of San Francisco (the “**City**”), a municipal corporation acting by and through the **San Francisco Municipal Transportation Authority (“SFMTA”)**, in the sum of [\_\_\_\_\_ **United States Dollars (US \$\_\_\_\_\_)**] (the “**Bonded Sum**”), the payment of which we each bind ourselves, and our heirs, executors, administrators, representatives, successors, and assigns, jointly and severally, firmly by these presents.

**WHEREAS**, the Principal has entered into an Infrastructure Facility Design-Build-Finance-Operate-Maintain Agreement with the City dated as of \_\_\_\_ 2025 (the “**Agreement**”) to design, construct, finance, operate and maintain the Infrastructure Facility of the Potrero Yard Modernization Project (the “**Project**”);

**NOW, THEREFORE**, the condition of this bond is such that this obligation shall be null and void upon (a) occurrence of Financial Close for the Project by the Financial Close Deadline set forth in the Agreement; or (b) Principal’s receipt of written Notice from City that the Agreement is terminated pursuant to Section 17.6 of the Agreement; otherwise it shall remain in full force and effect, and the Bonded Sum will be forfeited to City as liquidated damages and not as a penalty, upon receipt by Principal and Surety of Notice of such forfeiture from City:

The Surety hereby agrees to pay to City the full Bonded Sum hereinabove set forth, as liquidated damages and not as a penalty, within ten days after Notice from City that Principal has failed to achieve Financial Close by the Financial Close Deadline set forth in the Agreement, and such failure is not excused in accordance with the Agreement.

<sup>1</sup> The amount of a single bond may be less than \$[\_\_\_\_\_] on the condition that Proposer provides Financial Close Security that totals \$[\_\_\_\_\_] in the aggregate.

The following terms and conditions shall apply with respect to this bond:

1. If suit is brought on this bond by City and judgment is recovered, Surety shall pay all costs incurred by City in bringing such suit, including, without limitation, reasonable attorneys' fees and costs as determined by the court.

2. Any extension(s) of the time for award of the Agreement that Principal may grant in accordance with the Agreement or otherwise, shall be subject to the reasonable approval of Surety.

3. Correspondence, Notices or claims relating to this bond should be sent to Surety at the following address:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

This agreement shall be binding on the Principal and Surety executing the same, their legal representatives, successors and assigns.

Capitalized terms used but not defined herein shall have the meaning given to them in the Agreement.

**FORM 6A-2 - FORM OF FINANCIAL CLOSE LETTER OF CREDIT<sup>b</sup>**

**IRREVOCABLE STANDBY LETTER OF CREDIT – FINANCIAL CLOSE**

**ISSUER:** \_\_\_\_\_

**PLACE FOR PRESENTATION OF DRAFT:** (Name and Address of Bank/Branch -- MUST be San Francisco, California, Los Angeles, California, Chicago, Illinois, or New York, New York address)

**APPLICANT:** \_\_\_\_\_

**BENEFICIARY:** CITY AND COUNTY OF SAN FRANCISCO

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

**LETTER OF CREDIT NUMBER:** \_\_\_\_\_

**PLACE AND DATE OF ISSUE:** \_\_\_\_\_

**AMOUNT:** [[ \_\_\_\_\_ ] United States Dollars (US \$[ \_\_\_\_\_ ])]

**EXPIRATION DATE:** \_\_\_\_\_

The above named Issuer issues this Irrevocable Standby Letter of Credit in favor of the City and County of San Francisco (“**City**”), for any sum or sums up to the aggregate amount of [[ \_\_\_\_\_ ] **United States Dollars (US \$[ \_\_\_\_\_ ])**], available by draft at sight drawn on the Issuer. Any draft under this Irrevocable Standby Letter of Credit shall be signed by an authorized representative of the above named Beneficiary and shall:

1. Identify this Irrevocable Standby Letter of Credit by the name of the Issuer, and the Letter of Credit number, amount, and place and date of issue, stated above; and
2. State:

“This drawing is due to \_\_\_\_\_ (Applicant’s name)’s failure to achieve Financial Close by the Financial Close Deadline set forth in the Infrastructure Facility Design-Build-Finance-Operate-Maintain Agreement with the City and County of San Francisco dated as of \_\_\_\_ 2025 (the “**Agreement**”) without excuse under the Agreement.”

All drafts presented in compliance with the terms of this Irrevocable Standby Letter of Credit will be honored if presented by physical delivery of such original documents or via overnight courier

---

<sup>b</sup> The amount of a single letter of credit may be less, on the condition that Proposer provides Financial Close Security that totals \$[ \_\_\_\_\_ ] in the aggregate.

---

of such original documents to \_\_\_\_ (Name & San Francisco, California, Los Angeles, California, Chicago, Illinois, or New York, New York address)\_\_\_\_ on or before the stated expiration date described above or any extended expiration date.

This Irrevocable Standby Letter of Credit is subject to the rules of the “International Standby Practices” ISP98. If a conflict between ISP98 and New York law should arise, New York law shall prevail, without regard to principles of conflicts of law. If legal proceedings are initiated by any party with respect to payment of the Irrevocable Standby Letter of Credit, we agree that such proceeding shall be governed by New York law and may be brought in the State Courts of New York, venue in New York City, provided that the obligations of City shall be governed and construed in accordance with California law. Venue for any proceeding involving issues related to the obligations of City shall be in San Francisco, California.

Any failure by you to draw upon this Irrevocable Standby Letter of Credit as permitted hereunder shall not cause this Irrevocable Standby Letter of Credit to be unavailable for any future drawing, provided that this Irrevocable Standby Letter of Credit has not expired prior to such future drawing and that all requirements of this Irrevocable Standby Letter of Credit are independently satisfied with respect to any such future drawing.

Capitalized terms used but not defined herein shall have the meaning given to them in the Agreement.

**EXHIBIT 6B**

**FORM OF D&C PAYMENT BOND**

**(Bond No. \_\_\_\_\_)**

**[INSERT PRINCIPAL PROJECT COMPANY NAME]** (the “**Principal Project Company**”) has entered into a contract with the City and County of San Francisco (the “**City**”), a municipal corporation acting by and through the San Francisco Municipal Transportation Agency (“**SFMTA**”), bearing the date of **[INSERT DATE]**, 2025, to design, build, finance, operate and maintain the Infrastructure Facility of the Potrero Yard Modernization Project (the “**Agreement**”); and

That we **[INSERT CONTRACTOR NAME]**, an entity duly authorized to do business in the State of California (the “**State**”) and having its principal place of business at **[INSERT STREET ADDRESS, CITY, STATE, ZIP AND PHONE #]** (the “**Principal**” or “**Contractor**”), have entered into a contract (the “**Contract**”) with Principal Project Company bearing the date of **[INSERT DATE]**, for the performance of design and construction work in connection with the Infrastructure Facility of the Potrero Yard Modernization Project; and

That the Principal and **[INSERT SURETY NAME]** (the “**Surety**”) (or the “**Co-Sureties**”), duly authorized to do business in the State, having its principal place of business at **[INSERT HOME OFFICE ADDRESS]** are held and firmly bound unto Principal Project Company, in the full and just sum of **[INSERT D&C PAYMENT BOND AMOUNT]** lawful money of the United States of America (**US\$**\_\_\_\_), to whom payment well and truly will be made, we bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally;

CONDITIONS OF THIS BOND ARE AS FOLLOWS:

- A. Principal shall promptly make all payments owing when due to all persons who furnish labor, services, or materials for the prosecution of the work provided for in the Contract.
- B. Each said claimant shall have a right of action against the Principal and Surety (or Co-Sureties) for the amount due him or her, including unpaid finance charges due under the claimant’s contract.
- C. A claimant, except a laborer, who is not in privity with the Principal shall, before commencing or not later than 20 days after commencing to furnish labor, materials, or supplies for the prosecution of the work, furnish the Principal with a preliminary Notice that he or she intends to look to this bond for protection. No action for the labor, materials, or supplies may be instituted against the Principal or the Surety (or Co-Sureties) unless the preliminary Notice has been given. Notices required or permitted shall be given in compliance with the requirements of Sections 8100 et seq. and 9300 et seq. of the California Civil Code.
- D. The amount of this bond is a fixed amount and shall not be changed.

E. Neither any change in or under the Contract, nor any compliance or noncompliance with any formalities provided in the Contract nor the change shall relieve the Surety (or Co-Sureties) of its obligations under this bond.

Correspondence, Notices or claims relating to this bond should be sent to the following Surety's authorized representative and address:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

If there are Co-Sureties, the Co-Sureties agree to empower the above authorized representative with the authority to act on behalf of all of the Co-Sureties with respect to this bond, so that City will have no obligation to deal with multiple sureties hereunder. The above authorized representative may be changed only by delivery of written Notice (by personal delivery or by certified mail, return receipt requested) to City designating a single new authorized representative, signed by all of the Co-Sureties.

IN WITNESS WHEREOF, Principal and Surety have executed these presents and the Surety (or Co-Sureties) has affixed its seal, this \_\_\_\_\_ day of \_\_\_\_\_, 2025.

**PRINCIPAL:** \_\_\_\_\_ Date: \_\_\_\_\_, 2025

Authorized Signature: \_\_\_\_\_

Print Name & Title: \_\_\_\_\_

**NAME OF SURETY:** \_\_\_\_\_

Date: \_\_\_\_\_, 2025

Signature (Attorney-in-Fact): \_\_\_\_\_

(Affix Seal)

Print Full Name, Address and Telephone No.

**[If more than one Surety, then add appropriate number of lines to signature block]**

**NOTES CONCERNING SURETY AND EXECUTION:**

A. SURETY COMPANY REQUIREMENTS

To be acceptable to the City, each Surety shall meet all of the requirements of the Agreement and laws of California.

**B. EXECUTION OF BOND**

1. Enter each Surety's name and address on each copy of this bond in the space provided.
2. Have each copy of this bond signed on behalf of the Principal by the same person that signed the Contract on behalf of the Principal (affix Corporate Seal, if appropriate).
3. Have each copy of this bond signed by the person authorized to sign on behalf of the Surety (or Co-Sureties). Put the date the signature was affixed in the space provided. Print that person's name in the place provided on each copy of this bond. Also, have each Surety's Corporate Seal affixed to each copy of this bond beside that person's signature (no copies are acceptable).
4. Each copy of this bond must have a Power of Attorney attached indicating that the person in item B.3 above is authorized to sign on behalf of the relevant Surety.
5. Each copy of the Power of Attorney must have the Surety's Corporate Seal manually affixed.
6. The date of execution of the Power of Attorney is the same as the date shown on the signature line for the Surety Attorney-In-Fact.

**CALIFORNIA ALL PURPOSE ACKNOWLEDGEMENT**

A notary public or other officer completing this certificate verifies only the identity of the individual who signed the document to which this certificate is attached, and not the truthfulness, accuracy or validity of that document.

State of \_\_\_\_\_

County of \_\_\_\_\_

On this \_\_\_ day of \_\_\_\_\_ in the year of \_\_\_\_\_ before me, a notary public in and for the county and state aforesaid, personally appeared \_\_\_\_\_ who proved to me on the basis of satisfactory evidence to be the person(s) whose name(s) is/are subscribed to within the instrument and acknowledged to me that he/she executed the same in his/her authorized capacity(ies), and that by his/her signature(s) on the instrument, the person(s) or the entity upon behalf of which the person(s) acted, executed the instrument.

Witness my hand and official seal:

\_\_\_\_\_ (SEAL) \_\_\_\_\_

*Signature of Notary Public*

**EXHIBIT 6C**

**FORM OF D&C PERFORMANCE BOND**

**(Bond No. \_\_\_\_\_)**

**[INSERT PRINCIPAL PROJECT COMPANY NAME]** (the “**Principal Project Company**”) has entered into a contract with the City and County of San Francisco (the “**City**”), a municipal corporation acting by and through the San Francisco Municipal Transportation Agency (“**SFMTA**”), bearing the date of **[INSERT DATE]**, 2025, to design, build, finance, operate and maintain the Infrastructure Facility of the Potrero Yard Modernization Project (the “**Agreement**”); and

That we **[INSERT CONTRACTOR NAME]**, an entity duly authorized to do business in the State of California (the “**State**”) and having its principal place of business at **[INSERT STREET ADDRESS, CITY, STATE, ZIP AND PHONE #]** (the “**Principal**” or “**Contractor**”), have entered into a contract (the “**Contract**”) with Principal Project Company bearing the date of **[INSERT DATE]** related to the performance of design and construction work for the Infrastructure Facility of the Potrero Yard Modernization Project; and

That the Principal and **[INSERT SURETY NAME]** (the “**Surety**”) (or the “**Co-Sureties**”), duly authorized to do business in the State, having its principal place of business at **[INSERT HOME OFFICE ADDRESS]** are held and firmly bound unto Principal Project Company and the Indemnitees (as defined in the Agreement) (Principal Project Company and the Indemnitees are collectively referred to herein as the “**Obligees**”) in the full and just sum of **[INSERT D&C PERFORMANCE BOND AMOUNT]** lawful money of the United States of America (**US\$ \_\_\_\_\_**), to whom payment well and truly will be made, we bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally and firmly by these presents;

**WHEREAS**, it was one of the conditions of the Contract and the Agreement that these presents shall be executed;

**NOW, THEREFORE**, the conditions of this obligation are such that if Principal shall faithfully, promptly, efficiently and fully perform in accordance with the obligations of the Contract and shall indemnify and save harmless the Obligees from all cost and damage by reason of Principal's failure to do so, then this obligation shall be void; otherwise, it shall remain in full force and effect.

The Surety's obligations under this bond shall arise after:

- (a) Either: (i) Principal Project Company provides Notice to Principal and the Surety that Principal Project Company is considering declaring a default by Principal under the Contract; or (ii) the City provides Notice to the Principal Project Company, with a copy to the Surety, that it is considering declaring a default of Principal Project Company under the Agreement as the result of a material breach by Principal of its obligations to Principal Project Company under the Contract. The relevant Notice shall indicate whether the Principal Project Company or the City, as the case may be, is requesting a conference among Principal Project Company, Principal, City and the Surety to discuss Principal's performance. If a conference is not requested, the Surety may, within five (5)

---

business days after receipt of the relevant Notice, request such a conference. If the Surety timely requests a conference, Principal Project Company and City shall attend. Unless Principal Project Company and City agrees otherwise, any such conference shall be held within ten (10) business days of the Surety's receipt of the relevant Notice; and

- (b) Principal Project Company declares a default by Principal under the Contract, terminates the Contract and provides Notice to the Surety.

Failure on the part of Principal Project Company or the City to comply with the Notice requirement in Section (a) shall not constitute a failure to comply with a condition precedent to the Surety's obligations, or release the Surety from its obligations.

Should the conditions set forth in (a)-(b) above be satisfied, the Surety (or Co-Sureties) shall pay Principal Project Company (or any one or more of the Obligees) all costs assessed against the Principal because of the default which were not withheld from Contract proceeds, and upon an Obligee's demand, the Surety (or Co-Sureties) shall (i) take over performance of the Contract obligations; provided, however, that in the event Principal Project Company (or any one or more of the Obligees) elects to have the Surety (or Co-Sureties) take over performance of the Contract obligations, the Surety (or Co-Sureties) may not select the Principal or any affiliate of the Principal to perform the Contract obligations for and on behalf of the Surety (or Co-Sureties) without the express written consent of the Obligees; or (ii) waive the right to take over performance of the Contract obligations and tender payment of an amount necessary to compensate the Obligees for the cost to perform the Principal's obligations under the Contract, up to the full penal sum of this bond.

The Surety (or Co-Sureties) shall be fully liable under this bond up to the full penal sum hereof, regardless of any modifications (of whatever amount) to the Contract amount, provided that the Surety's obligations under this bond shall not be greater than those of Principal under the Contract.

No alteration, modification or supplement to the Contract or the nature of the work to be performed thereunder, including without limitation any extension of time for performance, shall in any way affect the obligations of Surety (or Co-Sureties) under this bond. Surety hereby waives Notice of any such alteration, modification or supplement, including changes in time, to the Contract.

Correspondence, Notices or claims relating to this bond should be sent to the following Surety's authorized representative and address:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

If there are Co-Sureties, the Co-Sureties agree to empower the above authorized representative with the authority to act on behalf of all of the Co-Sureties with respect to this bond, so that City will have no obligation to deal with multiple sureties hereunder. The above authorized representative may be changed only by delivery of written Notice (by personal delivery or by certified mail, return receipt requested) to City designating a single new authorized representative, signed by all of the Co-Sureties.

If any provision of this bond is found to be unenforceable as a matter of law, all other provisions shall remain in full force and effect.

This bond shall be governed by and construed in accordance with the laws of the State of California, without regard for conflict of laws principles, and any action seeking enforcement of the bond will be litigated exclusively in the courts of the State of California.

WITNESS the signature of the Principal and the signature of the Surety (or Co-Sureties) by \_\_\_\_\_ its \_\_\_\_\_ (Agent or Attorney-in-Fact) with the seals of said Principal and Surety (or Co-Sureties) hereunto affixed this \_\_\_\_\_ day of \_\_\_\_\_, 2025.

Complete the following as appropriate

Principal (Entity Name)*
Authorized Signature: _____
*Signature: _____
Printed Name: _____
* _____
Title: _____
(Seal)
*Include the signature and printed name of each partner required to be affixed per partnership agreement.

Principal shall record this bond in the official records of the Clerk of Court of the county where the improvement is located prior to commencing the work.

**EXHIBIT 6D**

**FORM OF MULTIPLE OBLIGEE RIDER FOR D&C PAYMENT BOND**

MULTIPLE OBLIGEE RIDER

This Rider is executed concurrently with and shall be attached to and form a part of Payment Bond \_\_\_\_\_(hereinafter referred to as the “**Payment Bond**”).

WHEREAS, **[INSERT PRINCIPAL PROJECT COMPANY NAME]** (the “**Principal Project Company**”) has entered into a contract with the City and County of San Francisco (the “**City**”), a municipal corporation acting by and through the San Francisco Municipal Transportation Agency (“**SFMTA**”), bearing the date of **[INSERT DATE]**, 2025, to design, build, finance, operate and maintain the Infrastructure Facility of the Potrero Yard Modernization Project (the “**Agreement**”); and

WHEREAS, on or about the \_\_\_\_ day of \_\_\_\_\_, 2025, \_\_\_\_\_ **[INSERT CONTRACTOR NAME]**, (hereinafter called the “**Principal**”), entered into a written agreement bearing the date of \_\_\_\_\_, 2025 (hereinafter called the “**Contract**”) with Principal Project Company, (hereinafter called the “**Primary Obligee**”) for the performance of design and construction work for the Infrastructure Facility of the Potrero Yard Modernization Project; and

WHEREAS, the Primary Obligee requires that Principal provide a payment bond and that the City and County of San Francisco, a municipal corporation acting by and through the San Francisco Municipal Transportation Agency, the other Indemnitees (as defined in the Agreement) [and \_\_\_\_\_ **[INSERT COLLATERAL AGENT, if appropriate]**] (“**Additional Obligee(s)**”) be named as additional obligee(s) under the payment bond; and

WHEREAS, Principal and the Surety (or Co-Sureties) identified below have agreed to execute and deliver this Rider concurrently with the issuance of the Payment Bond, upon the conditions herein stated.

NOW, THEREFORE, the undersigned hereby agree and stipulate as follows:

1. The Additional Obligee(s) is/are hereby added to the Payment Bond as named obligee(s).
2. The aggregate liability of the Surety (or Co-Sureties) to the Primary Obligee and the Additional Obligee(s) is limited to the penal sum of the Payment Bond.
3. The Additional Obligee(s)’s rights under the Payment Bond are subject to the same defenses that the Principal and/or the Surety (or Co-Sureties) have against the Primary Obligee.

**EXHIBIT 6E**

**FORM OF MULTIPLE OBLIGEE RIDER FOR D&C PERFORMANCE BOND**

MULTIPLE OBLIGEE RIDER

This Rider is executed concurrently with and shall be attached to and form a part of Performance Bond \_\_\_\_\_(hereinafter referred to as the “**Performance Bond**”).

WHEREAS, **[INSERT PRINCIPAL PROJECT COMPANY NAME]** (the “**Principal Project Company**”) has entered into a contract with the City and County of San Francisco (the “**City**”), a municipal corporation acting by and through the San Francisco Municipal Transportation Agency (“**SFMTA**”), bearing the date of **[INSERT DATE]**, 2025, to design, build, finance, operate and maintain the Infrastructure Facility of the Potrero Yard Modernization Project (the “**Agreement**”); and

WHEREAS, on or about the \_\_\_\_ day of \_\_\_\_\_, 2025, \_\_\_\_\_ **[INSERT CONTRACTOR NAME]**, (hereinafter called the “**Principal**”), entered into a written agreement bearing the date of \_\_\_\_\_, 2025 (hereinafter called the “**Contract**”) with Principal Project Company, (hereinafter called the “**Primary Obligee**”) for the performance of design and construction work for the Infrastructure Facility of the Potrero Yard Modernization Project; and

WHEREAS, the Primary Obligee requires that Principal provide a performance bond and that the City and County of San Francisco, a municipal corporation acting by and through the San Francisco Municipal Transportation Agency, the Indemnitees (as defined in the Agreement) [and \_\_\_\_\_ **[INSERT COLLATERAL AGENT, if appropriate]**] (“**Additional Obligee(s)**”) be named as additional obligee(s) under the performance bond; and

WHEREAS, Principal and the Surety (or Co-Sureties) identified below have agreed to execute and deliver this Rider concurrently with the issuance of the Performance Bond, upon the conditions herein stated.

NOW, THEREFORE, the undersigned hereby agree and stipulate as follows:

1. The Additional Obligee(s) is/are hereby added to the Performance Bond as named obligee(s).

2. The Surety (or Co-Sureties) shall not be liable under the Performance Bond to the Primary Obligee, the Additional Obligee(s), or any of them, unless the Primary Obligee, the Additional Obligee(s), or any of them, shall make payments to the Principal (or in the case the Surety (or Co-Sureties) arrange for completion of the Contract, to the Surety (or Co-Sureties)) in accordance with the terms of the Contract as to payments and shall perform all other obligations to be performed under the Contract in all material respects at the time and in the manner therein set forth such that no material breach by the Primary Obligee shall have occurred and be continuing under the Contract.

3. The aggregate liability of the Surety (or Co-Sureties) under the Performance Bond, to any or all of the obligees, as their interests may appear, is limited to the penal sum of the Performance Bond. The Additional Obligee(s)'s rights hereunder are subject to the same defenses Principal and/or Surety (or Co-Sureties) have against the Primary Obligee. The total liability of the Surety (or Co-Sureties) under the Contract shall in no event exceed the amount recoverable from the Principal by the Primary Obligee.

4. The Surety (or Co-Sureties) may, at their option, make any payments under the Performance Bond by check issued jointly to all of the obligees.

5. In the event of a conflict between the Performance Bond and this Rider, this Rider shall govern and control. All references to the Performance Bond, either in the Performance Bond or in this Rider, shall include and refer to the Performance Bond as supplemented and amended by this Rider. Except as herein modified, the Performance Bond shall be and remains in full force and effect.

Signed, sealed and dated this \_\_\_\_\_ day of \_\_\_\_\_, 2025.

**EXHIBIT 6F**

**FORM OF SFMTA O&M FACILITIES WARRANTY BOND**

Bond No. \_\_\_\_\_

For

**POTRERO YARD MODERNIZATION PROJECT**

**KNOW ALL WHO SHALL SEE THESE PRESENTS:**

**THAT WHEREAS**, the City and County of San Francisco (“City” or “Obligee”), a municipal corporation acting in its proprietary capacity by and through the San Francisco Municipal Transportation Agency, has awarded to [\_\_\_\_\_] (the “Principal Project Company” or “Principal”), an Infrastructure Facility Design-Build-Finance-Operate-Maintain Agreement dated as of [\_\_\_\_\_] 2025 (as amended from time to time, the “Agreement”), which Agreement is specifically incorporated by reference in this Bond, for the design, build, finance, operation and maintenance of the Potrero Yard Modernization Project (the “Project”);

**AND WHEREAS**, initially capitalized terms not otherwise defined in this Bond have the meaning given in the Agreement;

**AND WHEREAS**, pursuant to Section 10.9 of the Agreement, upon achieving Final Acceptance Principal Project Company must provide a warranty bond to City for the SFMTA O&M Facilities warranty Work (this “Bond”);

**NOW THEREFORE**, We the undersigned Principal and \_\_\_\_\_ (the “Surety” or “Co-Sureties”) are firmly bound and held unto the Obligee, in the penal sum of [\_\_\_\_\_] (\$[\_\_\_\_\_] (the “Bonded Sum”), good and lawful money of the United States of America for the payment whereof, well and truly to be paid to the Obligee, we bind ourselves, our heirs, successors, executors, administrators, and assigns, jointly and severally, firmly by these presents.

**THE CONDITION OF THE FOREGOING OBLIGATION IS SUCH THAT**, if Principal shall promptly and faithfully perform all of its obligations under the Agreement, as they may be amended or supplemented, including, without limitation, the performance of all SFMTA O&M Facilities warranty Work and payment of claims as described in paragraph 5 below, then the obligations under this Bond shall be null and void; otherwise this Bond shall remain in full force and effect, it being expressly understood and agreed that the liability of Surety for any and all claims hereunder shall in no event exceed the bonded sum.

The following terms and conditions shall apply with respect to this Bond:

1. The Agreement is incorporated by reference into this Bond.

**2.** If the Principal shall promptly and faithfully perform all of its obligations under the Agreement, as they may be amended or supplemented, related to the SFMTA O&M Facilities warranty Work, enforcement of Contractor warranties, and payment of claims as described in paragraph 6 below, then the obligations under this Bond shall be null and void; otherwise this Bond shall remain in full force and effect, it being expressly understood and agreed that the liability of Surety (or Co-Sureties) for any and all claims hereunder shall in no event exceed the bonded sum.

**3.** If the above bound Principal, or its heirs, executors, administrators, successors or assigns, shall in all things stand to and abide by and well and truly keep and perform the covenants, conditions, obligations and agreements in the Agreement related to the SFMTA O&M Facilities warranty Work, including any and all amendments, supplements, and alterations made to the Agreement as therein provided, on the Principal's part to be kept and performed at the time and in the manner therein specified, and shall indemnify, defend and save harmless the Obligee and all other Indemnitees (as defined in the Agreement), as therein stipulated, then this obligation shall become and be null and void; otherwise, it shall be and remain in full force and virtue.

**4.** This Bond shall cover the cost to perform all the obligations of the Principal related to the SFMTA O&M Facilities warranty Work. The obligations covered by this Bond specifically include all payment obligations, liability for damages and warranties related to the SFMTA O&M Facilities warranty Work as specified in the Agreement, but not to exceed the bonded sum.

**5.** Whenever the Principal shall be, and is declared by the Obligee to be, in default under the Agreement with respect to the related to the SFMTA O&M Facilities warranty Work, the Surety (or Co-Sureties) shall promptly:

(a) remedy such default;

(b) complete the SFMTA O&M Facilities warranty Work and perform the obligations covered by this Bond in accordance with the terms and conditions of the Agreement then in effect; or

(c) select a contractor or contractors to complete the SFMTA O&M Facilities warranty Work and perform the obligations covered by this Bond in accordance with the terms and conditions of the Agreement then in effect, using a contractor or contractors approved by the Obligee in its sole discretion, arrange for a contract that contains substantially the same terms and conditions of the Agreement between such contractor or contractors and the Obligee, and make available as work progresses (even though there should be a default or a succession of defaults under such contract or contracts of completion arranged under this paragraph) sufficient funds to pay the cost of completion of the SFMTA O&M Facilities warranty Work and obligations covered by this Bond; but not exceeding, including other costs and damages for which the Surety (or Co-Sureties) is (are) liable hereunder, the bonded sum.

**6.** This Bond shall inure to the benefit of anyone required to be paid by law under the Agreement so as to give a right of action to such persons or their assigns in any suit brought upon this Bond. The obligations covered by this Bond specifically include:

(a) payments owing to any of the persons involved in prosecution of the SFMTA O&M Facilities warranty Work, as provided for in the Agreement;

(b) any amounts required to be deducted, withheld, and paid over to the Department of Revenue from the wages of employees of the Principal and its Contractors with respect to such work and labor, and

(d) any other payments owing to anyone required to be paid by law.

In case suit is brought to enforce the provisions of this paragraph 6, the Surety (or Co-Sureties) will pay reasonable attorneys' fees, to be fixed by the court.

7. The Surety (or Co-Sureties) agree(s) that no change, extension of time, alterations, additions, omissions or other modifications of the terms of the Agreement, or in the work to be performed with respect to the Project, or in the specifications or plans, or any change or modification of any terms of payment or extension of time for any payment pertaining or relating to the Agreement, or any rescission of this Bond, solely due to acts of Principal, or any fraud practiced by any other person other than the claimant seeking to recover this Bond, shall in any way affect its obligations on this Bond, and it does hereby waive notice of such changes, extension of time, alterations, additions, omissions or other modifications.

8. **[NTD: Use in case of multiple or co-sureties]** The Co-Sureties agree to empower a single representative with authority to act on behalf of all of the Co-Sureties with respect to this Bond, so that the Obligee and claimants will have no obligation to deal with multiple sureties hereunder. All correspondence from the Obligee or claimants to the Co-Sureties and all claims under this Bond shall be sent to such designated representative. The designated representative may be changed only by delivery of written notice (by personal delivery or by certified mail, return receipt requested) to the Obligee designating a single new representative, signed by all of the Co-Sureties. The initial representative shall be \_\_\_\_\_.

---

**EXHIBIT 7**

**INSURANCE REQUIREMENTS**

Principal Project Company shall obtain and keep in force, or cause to be obtained and kept in force, the following policies of insurance, in accordance with the terms of this Exhibit 7. Each policy shall be obtained and be effective as set forth below. Each policy shall contain, or be endorsed to contain, a provision that coverage cannot be canceled, voided, suspended, lapsed or modified or reduced in coverage except for 60 days' (or for non-payment of premium, 10 days') prior written notice has been given to City.

**1. Insurance during the Design and Construction Period**

As a condition precedent to Financial Close and issuance of NTP 1, Principal Project Company shall obtain and keep in force, or cause to be obtained and kept in force, from and after the Financial Close Date and throughout the D&C Period, the following insurance coverage.

1.1. Worker's Compensation and Employer's Liability. Worker's compensation and employer's liability insurance for Principal Project Company and Contractors as required by applicable Law, and employer's liability insurance having coverage limits of \$1,000,000 for each accident, \$1,000,000 for disease (each employee), and \$1,000,000 for disease (policy limit). Policies shall contain a voluntary compensation endorsement; an alternative employer endorsement; and on an "if any" basis, endorsements providing coverage for all states, U.S. Longshore and Harbor Workers' Act, Jones Act and Federal Employer's Liabilities Act.

1.2. Commercial General Liability. A commercial general liability insurance policy, written on an occurrence basis and covering liabilities arising out of the construction of the Project. Coverage shall be at least as broad as the broadest available version of Insurance Services Office form CG 00 01. This insurance policy shall:

- (a) have a limit for any one occurrence of not less than \$2,000,000 per occurrence, a \$4,000,000 general aggregate with one reinstatement during the D&C Period, and a \$4,000,000 completed operations aggregate, applicable solely to the construction of the Project;
- (b) have no "contractor's limitation" endorsements, as that term is defined, as of the date of this Agreement, in the Glossary of Insurance and Risk Management Terms published by the International Risk Management Institute, that have not been reviewed and approved by the City. There shall be no endorsement or modification of the CGL limiting the scope of coverage for liability assumed under an insured contract;
- (c) have no exclusion for professional services except the latest ISO form CG 22 79 or CG 22 80 or both;
- (d) include products and completed operations liability coverage for a period of not less than the California Statute of Repose which is currently 10 years following Final Completion or the Termination Date, whichever occurs later; and
- (e) be maintained throughout the Term until Final Completion.

---

The City, SFMTA, and San Francisco Board of Supervisors and their employees, officers, and officials shall be added to the primary policy as insureds using Insurance Services Office forms CG 20 10 10 01 and CG 20 37 10 01 or, in City's sole discretion, forms providing the same scope of coverage, including coverage for completed operations. The policy shall provide for separation of insureds. The policy shall contain no insured vs. insured exclusion. Principal Project Company shall require its Contractors to have these additional insureds included as insureds in the same manner as specified for Principal Project Company in this Section 1.2 (Commercial General Liability), and shall prohibit use of any endorsement forms that require, to effect additional insured status, the execution or existence of any contract directly between such Contractors and any of the additional insureds. Exclusions are prohibited for work within 50 feet of a railroad. For use of any unmanned aircraft vehicles (UAV), any Principal Project Company-Related Entity may provide insurance either through an aircraft liability insurance policy, or by endorsement to the entity's commercial general liability insurance policy and excess liability policies, which shall be not less than \$10,000,000 per occurrence.

1.3. Commercial Excess Liability. A policy or policies of commercial umbrella/excess liability insurance covering bodily injury, property damage, personal injury and advertising injury with an annual reinstatement of limits of not less than \$100,000,000 per occurrence and general aggregate. There shall also be a project-specific products and completed operations aggregate of not less than \$100,000,000. Coverage may be arranged in any combination or structure so that total required limits of liability are met. Coverage must apply as excess over commercial general liability insurance as required in Section 1.2 (Commercial General Liability), and may apply as excess over commercial automobile liability insurance and employer's liability insurance. Umbrella/excess liability policies shall follow form to all underlying policies, including coverage in the excess liability policies for insureds covered under the primary policies.

1.4. Commercial Automobile Liability. Commercial automobile liability insurance with limits of liability of not less than \$20,000,000 combined single limit for Principal Project Company and Key Contractors. The required limits can be met in any combination of primary and excess/umbrella liability policies. Coverage shall be at least as broad coverage provided in Insurance Services Office form CA 00 01. The insurance must cover "any auto" ("**Symbol 1**"). If Principal Project Company or any Contractor's activities involve transportation of materials (including Hazardous Materials) that require endorsement MCS 90 (as described below), the automobile liability Insurance Policy for Principal Project Company or such Contractor shall be endorsed to include for private, non-commercial vehicles Motor Carrier Act Endorsement-Hazardous Materials Clean up (MCS-90) and shall be endorsed to provide coverage for liability arising from release of pollutants (CA 99 48 – Pollution Liability – Broadened Coverage for Covered Autos – Business Auto, Motor Carrier and Truckers Coverage Form).

1.5. Contractor's Pollution Liability. Contractor's pollution liability insurance written on an occurrence form with a limit for any one occurrence of not less than \$20,000,000 and a policy aggregate limit of \$20,000,000. The policy must be written on an occurrence basis and not on a "claims made" form. The policy must include coverage to extend to the full California statute of repose, which is currently 10 years.

The policy shall cover sums that the insured becomes legally obligated to pay to a third party or for the investigation, removal, remediation (including associated monitoring) or disposal of soil, surface water, groundwater or other contamination to the extent required by environmental laws (together "**clean-up costs**") caused by pollution conditions resulting from covered operations, subject to the policy terms and conditions, including bodily injury, property

damage (including natural resource damages), clean-up costs, and legal defense costs. Such policy shall cover claims related to pollution conditions to the extent such are caused (a) by the performance of Work, (b) by transportation, including loading and unloading, by owned and non-owned vehicles and/or (c) by other activities performed by or on behalf of Principal Project Company that occur on the Project. The policy shall have no exclusions or limitations for loss occurring over water including but not limited to a navigable waterway. Coverage shall apply to sudden and non-sudden pollution conditions resulting from the escape or release of smoke, vapors, fumes, acids, alkalis, toxic chemicals, liquids, or gases, waste materials, or other irritants, contaminants, or pollutants. The policy shall contain a severability provision.

1.6. Professional Liability Insurance. Professional liability insurance, in one or more policies, at Principal Project Company's discretion, which shall:

- (a) cover claims for liability for providing Design Work for the Project;
- (b) cover claims for liability for providing Design Work by any Contractor;
- (c) be in an amount not less than \$20,000,000 per claim and in the aggregate;
- (d) have a deductible or self-insured retention no greater than \$1,000,000 unless approved by the City;
- (e) cover the performance of Design Work or other professional services in connection with the Project (except Design Work that results in the provision of a product) and shall be fully retroactive to the first date any such Design Work was performed, with no exclusion for prior acts applying to any pre-award professional services provided by any insured; and
- (f) have an extended reporting period, or be renewed to be continuous for a period, of not less than ten years after the Effective Date.

1.7. Builder's Risk. A builder's risk insurance policy covering all real property at the Project Site, during testing and commissioning, while in transit and at any temporary off-site location; including all materials, supplies, machinery, fixtures and equipment intended to become a permanent part of the Project or for permanent use in the Project. Property that is incidental to the construction; foundations, including pilings, but excluding normal settling, shrinkage, or expansion. All temporary structures at the Project Site that are to be used in or incidental to the fabrication, erection, testing, or completion of the Project shall be insured and declared to and approved by the insurers and to the extent the cost thereof is included in the Work, included in the coverage while on or about the Project Site awaiting or during construction. The builder's risk policy:

- (a) shall be obtained prior to the start of construction and maintained until the end of the D&C Period;
- (b) shall be in an amount not less than the estimated completed value of the Project or other such amount as may be agreed up on by Principal Project Company and the City;

- 
- (c) shall be written on an “all risk,” replacement cost basis with no coinsurance clauses or penalties;
  - (d) during any period of exposure to loss of property in transit, shall cover transit, including ocean marine (unless insured by the Supplier or through a separate marine cargo policy), with sub-limits sufficient to insure the maximum value of any property in transit at any one time;
  - (e) shall cover physical damage arising because of faulty workmanship or materials;
  - (f) shall cover ensuing loss from design error not otherwise excluded (LEG 3);
  - (g) shall cover water damage and flood, (including the overflow of inland or tidal waters, the unusual accumulation or runoff of surface waters from any source, or mudslides or mudflows which are caused by flooding) with a sublimit of no less than \$10,000,000;
  - (h) shall cover perils of earthquake and earth movement with a sublimit of no less than \$10,000,000;
  - (i) shall cover physical damage resulting from machinery accidents but excluding normal and natural wear and tear, corrosion, erosion, inherent vice or latent defect in the machinery;
  - (j) shall cover demolition and debris removal coverage, with a sublimit of 20% of the loss or no less than \$10,000,000 insuring the buildings, structures, machinery, equipment, materials, facilities, fixtures and all other properties constituting a part of the Project;
  - (k) shall cover increased cost for repair, rebuilding or reconstruction of damaged property due to enforcement of any law or ordinance with a sublimit of no less than \$20,000,000, including professional fees with a sublimit of no less than \$10,000,000;
  - (l) shall include a sublimit for soft costs to include recurring costs should there be physical damage to the project, delay costs, loss of revenues during a delayed opening, including architects and engineers fees, and owner’s extended project costs including administration and overhead during a restoration period of 12 months,
  - (m) shall include civil authority ingress and egress;
  - (n) shall cover plans, blueprints and specifications;
  - (o) shall cover full collapse, including collapse resulting from design error, as set forth in LEG3 coverage;
  - (p) shall include as named insureds City, SFMTA, Principal Project Company, and Contractors;
  - (q) shall not include “as their interests may appear” language pertaining to insureds;

- 
- (r) shall include a blanket waiver of subrogation as required by contract; and
  - (s) may include deductibles, but such deductible shall not exceed \$1,000,000 per occurrence unless prior approval from the City.

1.8. Railroad Protective Liability. If required by any railroad, a railroad protective liability insurance policy or policies as required by one or more railroads operating near or adjacent to the Project location. The terms, limits, and specifications of such policy(ies) are set forth by each railroad.

1.9. Other. Any other form of insurance and with such limits, in such form, in amounts and for risks as the City or SFMTA, acting reasonably, may require from time to time. Principal Project Company's compensation shall be adjusted to reflect the cost of any such additionally required insurance.

## 2. Insurance During the Infrastructure Facilities Maintenance (IFM) Period

Principal Project Company shall obtain and keep in force, or cause to be obtained and kept in force, throughout the IFM Period the following insurance coverage:

2.1. Worker's Compensation and Employer's Liability. Worker's compensation and employer's liability insurance as required by applicable Law, and employer's liability insurance having coverage limits of \$1,000,000 for each accident, \$1,000,000 for disease (each employee), and \$1,000,000 for disease (policy limit).

2.2. Commercial General Liability. Commercial general liability insurance insuring against liability of Principal Project Company and Lead IFM Contractor with respect to the Project or arising out of the Work, written on an occurrence basis. Coverage shall be at least as broad as the broadest available version of Insurance Services Office form CG 00 01. City, SFMTA, and the Board of Supervisors and their employees, officers, and officials shall be added to the primary policy as insureds using Insurance Services Office form CG 20 10 10 01 or, in City's sole discretion, forms providing the same scope of coverage. Principal Project Company shall require its Contractors to have these additional insureds included as insureds in the same manner as specified for Principal Project Company in this Section 2.2 (Commercial General Liability), and shall prohibit use of any endorsement forms that require, to effect the insured status, the execution or existence of any contract directly between such Contractors and any of the additional insureds. The insurance shall (a) apply separately for each insured against whom a claim is made or a lawsuit is brought, subject only to the insurance policy limits of liability and (b) have coverage for any one occurrence of not less than \$50,000,000, \$50,000,000 general aggregate, and \$50,000,000 products/completed operations which requirement may be met by any combination of primary and excess coverage so long as the excess coverage is written on a "follow form" basis. Exclusions are prohibited for work within 50 feet of a railroad.

2.3. Commercial Automobile Liability. Commercial automobile liability insurance with limits of liability of not less than \$5,000,000 per accident. The insurance must cover liability arising from any motor vehicle (i.e., "**Symbol 1**"), including owned, hired or non-owned vehicles, assigned to or used in connection with the operation and maintenance of the Project.

2.4. Pollution Legal Liability. Pollution legal liability insurance applicable to bodily injury, property damage, including loss of use of damaged property or of property that has not

---

been physically injured or destroyed, cleanup costs, and defense, including costs and expenses incurred in the investigation, defense, or settlement of claims, all in connection with any loss arising from the Project. Coverage shall be maintained in an amount of at least \$10,000,000 per loss, with an annual aggregate of at least \$10,000,000. Coverage shall apply to sudden and non-sudden pollution conditions resulting from the escape or release of smoke, vapors, fumes, acids, alkalis, toxic chemicals, liquids, or gases, waste materials, or other irritants, contaminants, or pollutants. If coverage is written on a claims-made basis, Principal Project Company warrants that continuous coverage will be maintained or an extended discovery period will be exercised for a period of 10 years beginning from the Termination Date.

2.5. Property Insurance. A property insurance policy covering the full replacement value of the Project throughout the entire IFM Period. Coverage shall include the following: equipment breakdown, wind perils, collapse, terrorism, water damage including overflow, leakage, sewer backup or seepage, utility interruption, debris removal, extra expense, boiler and machinery and valuable papers. Coverage shall also include earthquake insurance at a limit of \$25,000,000 and flood insurance with a sublimit of not less than \$10,000,000. City shall be named a named insured. The Collateral Agent shall be the sole loss payee on the property throughout the entire IFM Period.

During the period of any Renewal Work or other significant capital maintenance or repair work that is not associated with a loss from a covered peril, Principal Project Company shall provide coverage either through a course of construction coverage extension under the property policy or insure through a separately placed Builder's Risk Insurance policy.

The property insurance policy shall also include coverage for:

- (a) Foundations and pilings;
- (b) Physical damage resulting from machinery accidents or mechanical or electrical breakdown including electrical substations but excluding normal and natural wear and tear, corrosion, erosion, inherent vice, or latent defect in the machinery;
- (c) Plans, blueprints, and specifications;
- (d) Demolition and debris removal coverage insuring the buildings, structures, machinery, equipment, materials, facilities, fixtures, and all other properties constituting a part of the Project, with a sublimit of no less than \$10,000,000;
- (e) Increased replacement cost due to any change in applicable Law;
- (f) Business interruption/time element coverage, including loss of revenue, including loss of any Availability Payments, expediting and extra expense, with a sublimit in the amount of \$\_\_\_\_\_; **[NTD: AMOUNT TO BE DETERMINED BASED ON AP/AGREEMENT BEFORE COMMERCIAL CLOSE]**
- (g) Building ordinance compliance, with the building ordinance exclusion deleted;
- (h) All buildings, fixtures, improvements, and equipment that are built or placed on the Project Site; and

- (i) Coverage at least as broad as coverage provided by the most recent Insurance Services Office commercial property Special Cause of Loss form.

2.6. Other. Any other form of insurance and with such limits, in such form, in amounts and for risks as the City or SFMTA, acting reasonably, may require from time to time. Principal Project Company's compensation shall be adjusted to reflect the cost of any such additionally required insurance.

**EXHIBIT 8**

**FORM OF INTERFACE AGREEMENT**

***[NOTE TO PNC: TO FOLLOW FROM PNC ONCE FINALIZED]***

## **EXHIBIT 9**

### **CHANGE PROCEDURES**

#### **1. City Change Procedures**

**1.1** The provisions of this Section 1 (City Change Procedures) and of Section 2 (Unilateral Change Orders) shall apply with respect to any City Change.

**1.2** If City desires to initiate or evaluate whether to initiate a City Change, then City may issue a proposed Change Order (a “**Proposed Change Order**”). The Proposed Change Order shall state the nature, extent and details of the contemplated City Change.

#### **1.3 Response to Proposed Change Order**

**1.3.1** As soon as possible, and in any case, within 20 days after City delivers to Principal Project Company a Proposed Change Order, Principal Project Company shall deliver to City a change proposal (“**Change Proposal**”) prepared in accordance with this Section 1.3 (Response to Proposed Change Order). Except as expressly set forth in this Section 1.3.1, the obligation of Principal Project Company to provide a Change Proposal is not Extra Work and shall not entitle Principal Project Company to any additional compensation, time extension or other relief. Upon receipt of a Proposed Change Order from City, if Principal Project Company believes it will incur substantial out-of-pocket contracted design costs to prepare a Change Proposal, Principal Project Company, within 7 days of the receipt of the Proposed Change Order, provide Notice to City setting forth the reasonable out-of-pocket contracted design costs that Principal Project Company will incur to prepare such Change Proposal. Failure to provide such Notice within such 7 day period shall forfeit any Claim for payment for such out-of-pocket contracted design costs. Upon delivery of such Notice by Principal Project Company, Principal Project Company shall promptly meet with City, at City’s request, to explain and discuss such potential costs and such discussions and negotiations shall occur on an Open Book Basis. City, in its sole discretion, may agree to compensate Principal Project Company for such specified and approved reasonable out-of-pocket contracted design costs as Extra Work Costs, in which case, Principal Project Company shall proceed with the Change Proposal as required in the Contract Documents. Payment of such approved amounts shall be the sole compensation to Principal Project Company and no other compensation, time extension or other relief shall be available or provided. Should City elect, in its sole discretion, to not approve such potential costs, the Proposed Change Order shall be deemed withdrawn. The Parties agree that the foregoing payment of reasonable out-of-pocket contracted design costs for preparation of a Change Proposal shall only apply to unusual circumstances involving substantial design and out-of-pocket contracted design costs.

**1.3.2** Each Change Proposal shall include:

- (a) a detailed explanation of how the contemplated City Change would impact both the D&C Work and the IFM Services;
- (b) if the Proposed Change Order is issued before Substantial Completion, a detailed description of any suggested adjustments to the Project Schedule. This includes changes

- to any Contract Deadline that would be necessary because of potential delays caused by implementing the contemplated City Change;
- (c) if adjustments to any Contract Deadline are suggested:
- (i) a time impact analysis that identifies Critical Path impacts (including activity numbers, durations, predecessor and successor activities, resources, costs and impact, if any, on Float). The time impact analysis must show how schedule changes or disruptions would affect the Contract Deadlines while complying with the requirements of Section 1.2.1 of Division 1 of the Technical Requirements;
  - (ii) an assessment of the feasibility of accelerating the Work to meet the original deadline or to reduce the total delay period; and
  - (iii) if acceleration is feasible, an estimate of the cost to accelerate, as well as information about any Extra Work Costs, Financing Delay Costs, and Delay Costs, if any, payable by City if the schedule is not accelerated;
- (d) a detailed, itemized estimate of any applicable Extra Work Costs, Financing Delay Costs or Delay Costs claimed; Principal Project Company shall provide all information on an Open Book Basis as specified in Exhibit 13 (Costs Schedule);
- (e) an estimate of the cost savings, if any, resulting from the contemplated City Change, including reductions in direct labor, material and equipment, site overhead and home office overhead, operations and maintenance, and financing costs;
- (f) the effect (if any) of the contemplated City Change on Principal Project Company's ability to perform the IFM Services stated by Contract Year;
- (g) where relief from obligations under the Contract Documents is sought, the effect of the contemplated City Change on Principal Project Company's ability to perform any of its obligations under the Contract Documents that if not performed would result in the accrual of Noncompliance Points, the assessment of Deductions or the occurrence of a PPC Default, in each case including details of the relevant obligations, the effect on each such obligation, the likely duration of that effect and the specific relief sought;
- (h) a description of any additional consents or approvals required, including amendments, if any, of any Regulatory Approvals required to implement the contemplated City Change;
- (i) a detailed description of the steps Principal Project Company will take to implement the contemplated City Change, including measures that Principal Project Company will take to mitigate the costs, delay and other consequences of the contemplated City Change; and
- (j) any other relevant information related to the contemplated City Change.

## 1.4 Negotiation of Change Order

**1.4.1** Following City's receipt of Principal Project Company's Change Proposal and City's further assessment of the cost, schedule and other impacts of the contemplated City Change, City and Principal Project Company, shall engage in good faith negotiations to reach agreement on the terms of a change order, including any Extra Work Costs, Financing Delay Costs or Delay Costs, adjustment of the Contract Deadlines or other relief to which Principal Project Company is entitled, and any net cost savings and schedule savings to which City is entitled.

**1.4.2** City may, by written Notice, modify or abandon a contemplated City Change at any time prior to the Parties reaching an agreement on the Change Order. Principal Project Company will, as soon as practicable but in no event more than 10 Business Days after receipt of a modification, provide Notice to City of any subsequent changes to the Change Proposal.

**1.4.3** A City Change will become effective upon mutual execution of a written change order (a "**Change Order**"). The Change Order shall be in a form provided by City, and shall specify, as applicable, the timing and method for payment or deduction of any Extra Work Costs, Financing Delay Costs, Delay Costs or Financing Costs, or for realizing any net savings in the cost of the Work.

## 1.5 Disagreement on Change Proposal

If the Parties do not agree on a Change Proposal, then City may seek to resolve any points of disagreement through the Contract Dispute Procedures without issuing a Unilateral Change Order, or City may issue a Unilateral Change Order.

## 2. Unilateral Change Orders

**2.1** City may, at any time, in its sole discretion, issue a Unilateral Change Order to Principal Project Company regarding any matter for which a Change Order can be issued or, in the event of any Contract Dispute, regarding the scope of the Work or whether Principal Project Company has performed the Work in accordance with the requirements of the Contract Documents (a "**Unilateral Change Order**"). The Unilateral Change Order will state that it is issued under this Section 2 (Unilateral Change Orders), will describe the Work to be performed and will state the basis for determining compensation, if any, and schedule adjustment, if any. The Unilateral Change Order will either: (a) direct Principal Project Company to implement a City Change; or (b) state that disputed Work is within Principal Project Company's original scope of Work or is necessary to comply with the requirements of the Contract Documents.

**2.2** If the Unilateral Change Order does not state that the Work constitutes a City Change, Principal Project Company shall proceed with the Work as directed but may assert a Claim that a City Change has occurred under the procedures in Article 12 (City Change Process; Unilateral Change Orders; Deviations) of this Agreement.

**2.3** If the Unilateral Change Order provides for the implementation of a City Change, Principal Project Company shall, within 21 Business Days after the issuance of the Unilateral Change Order, deliver to City a Change Proposal in accordance with Section 1.3 (Response to Proposed Change Order) of this Exhibit 9 (Change Procedures), and the Parties shall subsequently follow the procedures and provisions set forth in Section 1.4 (Negotiation of Change Order) of this Exhibit 9 (Change Procedures).

**2.4** If the Unilateral Change Order provides for the implementation of a City Change or Principal Project Company intends to assert a Claim under Section 2.2, Principal Project Company shall maintain records for such Work in accordance with Section 2.2.9 of Exhibit 13 (Costs Schedule), pending resolution of the Contract Dispute or execution of a Change Order.

**2.5** The fact that a Unilateral Change Order was issued by City shall not be considered evidence that a City Change has occurred. The determination whether a City Change has occurred shall be based on an analysis of the original requirements of the Contract Documents and a determination as to whether the Unilateral Change Order in fact constituted a change in those requirements.

### **3. Principal Project Company Change Requests**

**3.1** Principal Project Company may, at any time, request a Change by submitting to City a written request for a Change ("**PPC Change Request**"). PPC Change Requests must comply with the requirements of Section 1.3.2 of this Exhibit 9 (Change Procedures) and be in a form approved by the City.

**3.2** City has the sole discretion to accept or reject any PPC Change Request. If the City accepts a PPC Change Request, Principal Project Company shall execute a Change Order and implement the proposed change in accordance with the Change Order, applicable Technical Requirements, the Project Management Plan, Good Industry Practice and all applicable Law. Acceptance is only valid when documented in a written Change Order signed by City's Authorized Representative or their designee appointed in writing.

**3.3** If City accepts a PPC Change Request, Principal Project Company shall be solely responsible for bearing any increase in the Extra Work Costs or other costs, and any additional risks that result from the accepted Change, except as may otherwise provided in the Change Order. Principal Project Company shall not be entitled to any extension of the Project Schedule or any Contract Deadline due to delays or other impacts that result from the City accepting the PPC Change Request, except as may otherwise provided in the Change Order.

**3.4** If a PPC Change Request accepted by City results in a net cost savings to Principal Project Company, City will be entitled to 50% of such savings. City will obtain its share of the savings in the manner described in Section 1.4.3 and otherwise in accordance with Exhibit 13 (Costs Schedule).

Certain minor changes without significant cost savings may be approved in writing by City as Deviations, and in such event, shall not require a Change Order. Any other change in the requirements of the Contract Documents shall require a Change Order.

## **EXHIBIT 11**

### **SUBMITTALS REVIEW PROCESS**

#### **1. Submittal Requirements**

Each Submittal provided by Principal Project Company to City for information, review and comment, review and acceptance or approval shall:

- (a) be accurate, complete and in conformity with the Contract Documents;
- (b) include a completed transmittal form in form agreed between City and Principal Project Company; and
- (c) include all necessary information and documentation concerning the subject matter and any additional information reasonably requested by City.

#### **2. Submittal Types and Time Periods**

**2.1** Submittals provided by Principal Project Company to City will consist of the following types:

- (a) Submittals for information. Submittals for City information do not include any deadline for City to respond. City may provide comments at any time or not at all.
- (b) Submittals for review and comment. For any Submittal subject to review and comment, City may respond at any time or not all. Principal Project Company is only required to resubmit a Submittal if City responds within 14 days. City responses include: (i) reviewed with no comments; (ii) reviewed with comments, resubmittal not required; or (iii) reviewed with comments, resubmittal required. Submittals are subject to City's review and comment unless either the Contract Documents or the City-accepted Submittal Schedule contemplates a different type of review.
- (c) Submittals for review and acceptance. For any Submittal subject to City review and acceptance, City will have 21 days to respond. City responses include: (i) reviewed and accepted; (ii) reviewed and accepted with comments, resubmittal not required; or (iii) reviewed and not accepted with comments, resubmittal required.
- (d) Submittals for approval. For any Submittal subject to City approval, City will have 21 days to respond. City responses include: (i) approved; (ii) approved with comments, resubmittal not required; or (iii) not approved with comments, resubmittal required.

**2.2** If any other provision of the Contract Documents expressly provides a longer or shorter period for City to act in response to a specific Submittal, then such period shall prevail over the time periods set forth in Section 2.1.

**2.3** The Parties shall agree in good faith upon any necessary extensions of the review period to accommodate particularly complex or comprehensive Submittals.

**2.4** If the number of Submittals delivered simultaneously to City exceeds the limits specified in Section 1.3 of Division 1 of the Technical Requirements, then City may extend the applicable period for it to act with respect to such Submittals to allow City a reasonable period to respond, and no such extension shall constitute a City-Caused Delay Event, a City-Caused Relief Event, or other basis for any Claim. Submittals are considered “delivered simultaneously” if the review time periods available to City under this Article 2 (Submittal Types and Time Periods) for two or more Submittals entirely or partially overlap.

**2.5** Whenever City is in receipt of Submittals delivered simultaneously, Principal Project Company may provide Notice to City including a requested order of priority for processing such Submittals. Upon receipt of such Notice, City will use reasonable efforts to accommodate the requested order of priority; provided, however, that City will not be obligated to shorten the review times otherwise applicable under this Article 2 (Submittal Types and Time Periods).

**2.6** All time periods for City to act under this Article 2 (Submittal Types and Time Periods) shall be extended by the period of any delay in City’s review caused by any Relief Event (other than a City-Caused Delay Event or City-Caused Relief Event) or any PPC Fault.

**2.7** During any time that City is entitled to increase the level of its Oversight under Section 15.5 (Persistent PPC Default and Increased Oversight) of this Agreement, the applicable period for City to act on any Submittals received during such time and not related to addressing events that instigated the Section 15.5 (Persistent PPC Default and Increased Oversight) of this Agreement action shall be extended as reasonably needed due to the increased level of Oversight, but not to exceed an additional 10 Business Days per Submittal. No such extension shall constitute a City-Caused Delay Event, City-Caused Relief Event or other basis for any Claim.

**2.8** Principal Project Company may, by Notice to City, request expedited action on a specific Submittal. City has no obligation to expedite any Submittal but upon receipt of such a request will use reasonable efforts to accommodate such request within the practical limitations (a) on availability of City personnel relevant to the request or (b) imposed by restrictions upon City’s rights under agreements with Third Parties and Utility Owners. However, City’s obligation to use reasonable efforts to accommodate such a request shall not apply with respect to the review periods described in Section 2.7.

### **3. City Actions Relevant to Submittals**

If a Submittal is subject to City’s acceptance or approval, Principal Project Company may not proceed without receiving City’s acceptance or approval, as applicable.

### **4. City Objection, Rejection Binding**

**4.1** Any exception, objection, rejection, non-acceptance or disapproval by City shall be deemed reasonable if, among other reasons, the determination is based on any of the following grounds:

- (a) the Submittal or subject provision fails to comply, or is inconsistent, with any applicable Standards and Specifications or any covenant, condition, requirement, term or provision of the Contract Documents, Project Management Plan;
- (b) the Submittal or subject provision does not at a minimum meet Good Industry Practice;
- (c) Principal Project Company has not provided all necessary information and documentation concerning the subject matter and any additional information reasonably requested relating to the Submittal (provided that Principal Project Company may subsequently resubmit the Submittal with the required or reasonably requested content or information); or
- (d) adoption of the Submittal or subject provision, or of any course of action proposed in the Submittal, would result in a conflict with or violation of any Law or Regulatory Approval.

**4.2** Principal Project Company shall respond in writing to all of City's comments (including any exceptions, objections, rejections and disapprovals) relating to a Submittal, and subject to Sections 2.1(a) and (b), shall make modifications to the Submittal as necessary to fully reflect and resolve all such comments in accordance with the review processes in this Exhibit 11 (Submittals Review Process), prior to executing the Work identified in the Submittal.

**4.3** If Principal Project Company does not accommodate or otherwise resolve any City comment, Principal Project Company shall, within 10 Business Days after receipt of City's comments, provide an explanation setting out:

- (a) why modifications based on City's comments are not required;
- (b) the facts, analyses and reasons that support Principal Project Company's conclusion; and
- (c) the basis for any belief that incorporating City's comments or resolving exceptions, objections, rejections or disapprovals that would render the Submittal erroneous, defective or reflective of less than Good Industry Practice.

**4.4** Promptly following delivery of Principal Project Company's explanation under Section 4.3, Principal Project Company shall meet with City with the goal of reaching agreement regarding changes to be made to the Submittal. City may at any time issue a Unilateral Change Order, in which case Principal Project Company shall proceed in accordance with City's Unilateral Change Order with the right to seek resolution of the Contract Dispute under the Contract Dispute Procedures.

**4.5** If Principal Project Company fails to provide an explanation to City in accordance with Section 4.3, City may deliver to Principal Project Company a Notice setting out comments that have not been addressed and relevant dates for Principal Project Company to respond. If Principal Project Company fails to address such comments by the dates specified by City, Principal Project Company shall make all changes necessary to accommodate and resolve the comment and will be fully responsible for such changes without right to assert a City-Caused

Delay Event, City-Caused Relief Event or other basis for a Claim that City has assumed design or other liability.

**EXHIBIT 12**

**ENERGY MANAGEMENT**

**1. DEFINITIONS**

1.1 Capitalized terms used but not defined herein shall have the meaning given to them in Exhibit 1 of the Agreement.

**2. CALCULATION OF ANNUAL ENERGY TARGET**

**2.1 Annual Energy Target**

(a) After the second anniversary of the Final Acceptance Date, Principal Project Company and City shall appoint an Independent Energy Auditor to provide a report inclusive of operating assumptions, current Weather Data and energy model simulation files regarding the Infrastructure Facility's Energy performance and to establish an Annual Energy Target (the "**Annual Energy Target**").

**2.2 Program or Variation Adjustments to the Annual Energy Target**

2.2.1 At any time commencing after the Energy Performance Commencement Date, City or PPC can apply an adjustment to the Annual Energy Target for the purposes of preparing the Energy Analysis Report to account for:

- (a) any Regulated Load change(s) that results from a Change Order;
  - (b) changes in Infrastructure Facility occupancy;
  - (c) changes to Core Hours; or
  - (d) changes in the utilization or other foreseen operating conditions of the Infrastructure Facility which materially differ from those assumed for the purpose of calculating the Annual Energy Target.

For greater certainty, Principal Project Company and City acknowledge that an adjustment to the Annual Energy Target shall be made only as a result of a circumstance specified in Section 2.2.1.

2.2.2 Upon an adjustment to the Annual Energy Target as a result of a circumstance specified in Section 2.2.1, the Parties shall appoint, subject to the other Party's approval (acting reasonably), a complete energy audit to be conducted by an Independent Energy Auditor. The costs associated with the Independent Energy Auditor shall be shared equally between the Parties. Each Party shall cooperate with (including providing any information requested by) the IEA. The IEA shall prepare a report making recommendations regarding adjustments to the Annual Energy Target; the report shall include a detailed computer simulation, or other mutually agreed energy analysis method, of Energy usage by function and a comprehensive evaluation of Energy usage patterns. The

Parties shall work in good faith to have such IEA deliver its report within 30 days of the IEA's appointment. In preparing the report, the IEA shall have access to the most recent Energy Analysis Report. For greater certainty, the recommended adjustments should only apply for that period of time that the circumstance(s) in Section 2.2.1 giving rise to such adjustments occur, continue or impacted. Both City and Principal Project Company, each acting reasonably, shall have 20 days following receipt of such report to provide notice to the other of (i) its agreement to the recommended adjustments to the Annual Energy Target set forth in such report; or (ii) its disagreement with such recommendations, together with its rationale for such disagreement. In the event that either Party provides notice of its disagreement with the IEA's recommendations, then either Party may refer the matter to the Contract Dispute Procedures. If both Parties are in agreement with the recommendations, then the Annual Energy Target shall be adjusted in accordance with such recommendations effective as of the date on which the circumstance(s) in Section 2.2.1 commenced.

### 3. MEASUREMENT

- 3.1 Without prejudice to Exhibit 18 – Technical Requirements or anything else in this Exhibit 12, Principal Project Company shall measure the amount of Aggregate Actual Consumption to meet LEED BD+C Measurement and Verification mandatory credits and to meet LEED EBOM reporting requirements for the Infrastructure Facility in respect of each calendar month beginning on the Substantial Completion Date and ending on the earlier of expiry of Term or termination of the Agreement.
- 3.2 For each Contract Year after the Energy Performance Commencement Date, Principal Project Company shall provide City with a draft Energy Analysis Report within 60 days following the end of each Contract Year, which report shall include copies of all working papers to fully support the draft Energy Analysis Report. The draft Energy Analysis Report shall be consistent with the format and content requirements set out in Section 3.7.
- 3.3 As soon as practicable and in any event within 30 days after receipt by City of the draft Energy Analysis Report (or on such other date as may be agreed between City and Principal Project Company ), Principal Project Company and City shall convene an annual energy review meeting to be attended by the PPC Representative, the City Representative and such other individuals as may be agreed to by the Parties (the “**Annual Energy Review Meeting**”). At the Annual Energy Review Meeting, Principal Project Company shall present the draft Energy Analysis Report to City, and City and Principal Project Company shall discuss the Aggregate Actual Consumption for each discrete Energy Service for the preceding Contract Year.
- 3.4 Principal Project Company shall assist the City Representative and afford the City Representative such information and access to the Infrastructure Facility, building management system records, Utility meters, and Help Desk (as such services are described in Exhibit 18 – Technical Requirements) and by other means as may reasonably be required for the City Representative to review and confirm the content of the draft Energy Analysis Report provided by Principal Project Company.

3.5 City shall notify Principal Project Company within 21 days after the Annual Energy Review Meeting of the details of any disagreement of all or any aspect of the draft Energy Analysis Report, and the Parties shall then seek to agree to any matters in dispute. Where matters cannot be resolved within 20 days following receipt by Principal Project Company of notification by City of a disagreement (or such other period as may be otherwise agreed between the City Representative and the PPC Representative, acting reasonably), the disagreement shall be dealt with in accordance with the Dispute Resolution Procedure.

3.6 Subject to Section 3.5, within 20 days following each Annual Energy Review Meeting, or within such period as may be otherwise agreed between the City Representative and the PPC Representatives, acting reasonably, City shall confirm its acceptance of all or any aspects of the Energy Analysis Report.

### 3.7 Content and Format of the Energy Analysis Report

3.7.1 The Energy Analysis Report shall present findings of Aggregate Actual Consumption for each separate Energy Service for the relevant Contract Year and calculation of the Corrected Aggregate Energy Consumption (CAEC) and shall include the following:

- 3.7.1.1 a summary of (A) actual usage and breakdown by Utility in megajoules and cubic meters, or other Utility rate units; and (B) any exceptional changes in consumption or pattern of use since any previous Energy Analysis Report;
- 3.7.1.2 accurate and precise consumption data;
- 3.7.1.3 identification of potential cost savings in respect of Energy usage at the Infrastructure Facility and provide an estimate of potential Energy Service consumption savings broken down by fuel type, implementation costs, and projected savings, along with identifying potential risks associated with each proposed cost savings measure;
  - (i) presentation of Aggregate Actual Consumption for each individual Energy Service;
  - (ii) presentation of correlated energy Weather Data for the relevant Contract Year;
  - (iii) detailed analysis of all sub metered end-uses; and
  - (iv) calculation of the Corrected Aggregate Energy Consumption for each individual Energy Service;
- 3.7.1.4 outline of any outstanding issues from any previous Energy Analysis Report; and,
- 3.7.1.5 summary of adjustments to the Annual Energy Target, if any, as agreed upon in accordance with Section 2.2.

3.8 Principal Project Company shall deliver a Monthly Energy Report to City, following Substantial Completion, five business days following the end of each Contract Month.

3.9 Content and Format of the Monthly Energy Report

3.9.1.1 The Energy Analysis Report shall show monthly Aggregate Actual Consumption and monthly Corrected Aggregate Energy Consumption data for each individual Energy Service

3.9.1.2 For the monthly Corrected Aggregate Energy Consumption:

- (i) A comparison against the previous month's value, as well as supporting narrative articulating reasons for any variance
- (ii) A comparison against the value of the same month of the previous Contract Year, as well as supporting narrative articulating reasons for any variance
- (iii) A comparison of current rolling 12-month average against the previous month's rolling 12-month average, as well as supporting narrative articulating reasons for any variance

**4. COMPARING CORRECTED AGGREGATE CONSUMPTION WITH ADJUSTED ANNUAL ENERGY TARGET**

4.1 After the acceptance of the Energy Analysis Report as described in Section 3.6 for each Contract Year, the CAEC for each Energy Service shall be compared to the Annual Energy Target or Adjusted Annual Energy Target for each Energy Service, and:

4.1.1 if the CAEC in respect of any discrete Energy Service is greater than 115% of the AET or AAET in respect of such Energy Service, then City may request that the Principal Project Company prepare and submit an Energy Performance Action Plan ('EPAP'). For the purposes of an Energy Performance Action Plan in respect of this Section 4.1.1, the PAP will be due no later than 30 days after acceptance of the Energy Analysis Report; and

4.1.2 if the CAEC in respect of any Energy Service is less than 115% of the AET or AAET in respect of such Energy Service, no further action is required.

4.2 If an EPAP is required pursuant to Section 4.1.1, the Energy Performance Action Plan will, at a minimum;

- (a) identify the variances between the CAEC and the AET or AAET;
- (b) summarize potential issues giving rise to the variances;
- (c) include a root cause analysis, where possible, or a plan to develop root cause analysis if it cannot be established prior to issuance of the PAP; and

- (d) the steps or actions that will be undertaken by Principal Project Company to address the issues and specific and reasonable timeframes for such steps.

4.3 If an EPAP is required pursuant to Section 4.1.1, any missed submittals of Energy Performance Action Plans or failure to implement particular steps or actions of such EPAPs shall be addressed in accordance with Section 6.2.2 of Exhibit 4 (Payment Mechanism).

## **5. EXTERNAL ENERGY AUDITOR**

5.1 In accordance with Section 8.9.2 of the Agreement, City has the right to procure an External Energy Auditor to provide Infrastructure Facility operations and energy usage and consumption advice. This review would likely also include recommendations that cover PPC IFM Services and SFMTA O&M Services scope.

5.2 Similar to Section 4.1.1, if the CAEC is greater than 115% of the AET or AAET, then Principal Project Company will be required to comply with the recommendations of the External Energy Auditor, if procured, at its own cost. Such recommendations may include operational and maintenance recommendations, but may not require Principal Project Company to replace any material equipment or incur any material capital expenditure. Any requirement to replace material equipment or incur material capital expenditures shall be addressed in accordance with Section 12 of the Agreement. Additionally, Principal Project Company would not be required to comply with any recommendations that contradict specific advice provided by equipment manufacturers.

## **EXHIBIT 13**

### **COSTS SCHEDULE**

#### **1.0 Overview and General Principles**

**1.1** This Exhibit 13 (Costs Schedule) describes the methods for calculating:

- (A) Extra Work Costs, Delay Costs, and Financing Delay Costs owing from City to Principal Project Company pursuant to Article 12 (City Change Process; Unilateral Change Orders; Deviations) and Article 14 (Compensation and Other Relief for Delay Events and Relief Events) of this Agreement; and
- (B) Any other amount expressly payable by City or Principal Project Company under this Agreement.

**1.2** The following general principles apply to Extra Work Costs, Delay Costs, and Financing Delay Costs calculated under this Exhibit 13 (Costs Schedule):

- (A) Principal Project Company shall provide all information referred to in this Exhibit 13 (Costs Schedule) or Exhibit 9 (Change Procedures) on an Open Book Basis;
- (B) All payments or deductions made by City to Principal Project Company in accordance with this Exhibit 13 (Costs Schedule) will be made as and when incurred or in arrears in accordance with Section 7.0 (Form of Timing of Compensation) or as otherwise expressly provided under this Agreement;
- (C) In calculating Extra Work Costs, Delay Costs, and Financing Costs, the time value of money and timing of cash flows shall be accounted for. This means cash flows, whether they are costs incurred or payments received, shall be discounted or inflated to reflect when they occur (if applicable);
- (D) Extra Work Costs shall not include Delay Costs or Financing Delay Costs; and
- (E) No amounts shall be double counted.

**1.3** Principal Project Company's recovery for any Extra Work Costs, Delay Costs, and Financing Delay Costs under this Exhibit 13 (Costs Schedule) is subject to Principal Project Company complying with the timeframes specified in Article 14 (Compensation and Other Relief for Delay Events and Relief Events), and Exhibit 9 (Change Procedures) as applicable, and otherwise in accordance with this Agreement.

## 2.0 Extra Work Costs

### 2.1 Methods of Determining Extra Work Costs

Extra Work Costs, payable in accordance with Article 14 (Compensation and Other Relief for Delay Events and Relief Events) or Exhibit 9 (Change Procedures) of this Agreement, shall be determined using the following methods:

- (A) negotiated lump sum;
- (B) unit prices; or
- (C) Force Account.

Each method is described below.

### 2.2 Negotiated Lump Sum

If the City determines in its good faith discretion, Extra Work Costs will be determined on a negotiated lump sum basis. Subject to the City's right to issue a Unilateral Change Order, lump sum costs of Extra Work, negotiated and agreed with Principal Project Company shall be based on the direct costs to perform the Extra Work, as follows:

**2.2.1 Direct Costs.** The City will pay Principal Project Company the sum of the direct costs of labor, materials, and equipment used to perform Extra Work as follows:

- (A) Labor. The direct costs of labor for workers that actually perform Extra Work. Such workers include superintendents and supervisory foremen only if they are at the Project Site planning, coordinating, or overseeing Extra Work. All other supervision costs shall be included in the markup defined in Section 2.2.3 (Markup for Overhead and Profit). Whether the employer is Principal Project Company, a Contractor, a lower tier Contactor, or other forces, the direct cost of labor is the sum of the following:
  - (1) Actual Wages. The actual wages paid, including any actual payments by the employer for its workers' health and welfare, pension, vacation, training, and similar purposes.
  - (2) Labor Surcharge. The applicable labor surcharges in the California Department of Transportation's Labor Surcharge and Equipment Rental Rates publication in effect on the date the Extra Work is completed. These labor surcharges shall constitute full compensation for employer's payment of workers' compensation insurance, Social Security, Medicare, state and federal unemployment insurance, and state training taxes. City will not pay any other fixed labor burdens unless approved in writing by the City.
  - (3) Subsistence and Travel Allowance. The actual allowance paid to workers for subsistence and travel.

- (B) Materials. The direct costs of materials required and furnished specifically for Extra Work. This includes only the direct expenditure, including sales tax, borne by the purchaser from the Supplier and any transportation expenses (e.g., shipping fees, freight charges), except delivery charges unless specifically required for the Extra Work. If a genuine Supplier offers a trade discount to purchaser, Principal Project Company shall credit the City with this discount, even if the discount was not originally taken. If materials originate from a Supplier wholly or partially owned by a PPC-Related Entity, the City's payment therefor shall not exceed the current wholesale price, as determined by the City. The term "trade discount" includes the concept of cash discounting.
- (C) Equipment. The direct costs of equipment are the applicable rental rates for equipment in the California Department of Transportation's Labor Surcharge & Equipment Rental Rate Book (including its supplement Miscellaneous Equipment Rental Rates) in effect on the date the Extra Work is completed.
- (1) As deemed appropriate, the City may adjust such rental rates and use them to compute payments for equipment, regardless of whether the equipment is under the control of a PPC-Related Entity through direct ownership, leasing, renting, or other method of acquisition; except that, for equipment rented or leased in arm's length transactions with outside vendors, the City will reimburse Principal Project Company at the actual rental or leased invoice rates when such rates are reasonably in line with the applicable rates specified in the Labor Surcharge & Equipment Rental Rate Book (including its supplement Miscellaneous Equipment Rental Rates) as determined by the City. Arm's length rental or lease transactions are those in which the firm involved in the rental or lease of such equipment is not associated with, owned by, have common management, directorship, facilities, or stockholders with the firm renting the equipment. Principal Project Company has the burden of proof to demonstrate that a rental or lease transaction was an arm's length transaction. Principal Project Company shall submit copies of all rental or lease invoices, and other information as requested by the City, if any, as supporting documentation with each Proposed Change Order cost proposal.
  - (2) For equipment that is not listed in the Labor Surcharge & Equipment Rental Rate Book, Principal Project Company shall provide to the City three separate quotes for rental of the applicable equipment for City's consideration.
  - (3) The City will pay for equipment based on daily, weekly, or monthly rates, whichever are lowest. The City will not pay for equipment based on hourly rates including operator. Unless otherwise specified, Principal Project Company shall use manufacturer's ratings and manufacturer-approved modifications to classify equipment for determination of applicable rental rates. If, however, equipment of unwarranted size or type and cost is used, Principal Project Company shall calculate the cost at the rental rate for equipment of proper size and type.

- (4) The City will pay for equipment only for the time the equipment is in productive operation on the Extra Work. The City will not pay for equipment while inoperative due to breakdown or for non-work days. In addition, the City will not pay for any equipment rental time required to move the equipment to and from the Project Site. The City will pay for equipment loading and transportation costs, in lieu of rental time, only if the equipment does not move under its own power and is utilized solely for the Extra Work. The City will not pay for mobilization or demobilization of equipment already on the Project Site. The City will reimburse Principal Project Company for equipment that is idle, non-operating, or in standby mode at the lesser of Caltrans' rates, as adjusted by Caltrans Delay Factor (defined in the Labor Surcharge & Equipment Rental Rate Book), as adjusted by its standby calculation, unless such equipment is rented or leased as provided above.
- (5) Individual pieces of equipment having a replacement value of \$1,000 or less are considered small tools or small equipment; City will not pay for such tools and equipment since the costs of these tools and equipment are included as part of markups for overhead and profit as defined in Section 2.2.3 (Markup for Overhead and Profit).
- (6) Payment to Principal Project Company for the use of equipment as set forth in this Exhibit 13 (Costs Schedule) shall constitute full compensation to Principal Project Company for the cost of fuel, power, oil, lubricants, supplies, small equipment, necessary attachments, repairs and maintenance of any kind, depreciation, storage, insurance, labor (except for equipment operators), and any and all costs to Principal Project Company incidental to the use of the equipment.

**2.2.2 Costs Included as Part of Markup for Overhead and Profit.** To the total of the direct costs of labor, materials, and equipment computed as provided in Section 2.2.1 (Direct Costs), the City will pay Principal Project Company markups for overhead and profit, as specified in Section 2.2.3 (Markup for Overhead and Profit). These markups shall constitute full compensation for all direct and indirect overhead costs and profit, which shall be deemed to include all items of expense not specifically listed in Section 2.2.1 (Direct Costs) as direct costs. The City shall not be obligated to pay for any separate allowance or itemization for any overhead costs. The following is a list, not intended to be comprehensive, of the types of costs that are included in the markups for overhead and profit for all Extra Work:

- (A) Home office and field personnel including, principals, project managers, superintendents and supervisory foremen (unless they are at the Project Site planning, coordinating, or overseeing Extra Work), estimators, project engineers, detailers, draftspersons, schedulers, consultants, watchpersons, payroll clerks, administrative assistants, and secretaries.
- (B) All field and home office expenses, including: field trailers; parking; storage sheds; office equipment and supplies; telephone service at the Project Site; long-distance telephone calls; fax machines; computers and software; internet and e-mail services; temporary utilities; sanitary facilities and services; janitorial

services; small tools and equipment with a cost under \$1,000 each; portable scaffolding; blocking; shores; appliances; job vehicles; security and fencing; conformance to all regulatory requirements including compliance with safety regulations, safety programs, and safety meetings; cartage; warranties; record documents; and all related maintenance costs.

- (C) Administrative functions, including reviewing, coordinating, distributing, processing, posting, recording, estimating, negotiating, scheduling, schedule updating and revising, expediting, surveying, engineering, drawing, detailing, revising shop drawings, preparing record drawings, carting, cleaning, protecting the Work, and other incidental Work related to the Change Order.
- (D) Bond and insurance costs.
- (E) All other costs and taxes required to be paid, but not included under direct costs as defined in Section 2.2.1 (Direct Costs).

**2.2.3 Markup for Overhead and Profit.** To the actual total direct costs of labor, material, and equipment used to perform Extra Work, the City will apply the following markups for overhead and profit:

- (A) Initial Markup. An initial maximum markup for the PPC-Related Entity that performs the Extra Work based on the direct cost categories, as follows:

Direct Cost Categories	Maximum Markup
Principal Project Company – labor *	10%
Principal Project Company – materials*	10%
Principal Project Company – equipment*	10%
Prime Contractor/Subcontractor (of any tier) – labor	10%
Prime Contractor/Subcontractor (of any tier) – materials	10%
Prime Contractor/Subcontractor (of any tier) – equipment	10%

\* Extra Work self-performed by Principal Project Company.

- (B) Additional Markup. An additional maximum markup for the administration of Extra Work performed by a Contractor, as follows:
  - (1) Prime Contractor. For Extra Work performed by a Prime Contractor, an additional maximum markup of 5% for Principal Project Company’s administration of the Extra Work.

- (2) Subcontractor. For Extra Work performed by a Subcontractor, additional maximum markups of 5% each for Principal Project Company, Prime Contractor, and, if applicable, the higher-tier Subcontractor(s) for their respective administration of the Extra Work. The total of these additional markups shall not exceed 10% regardless of the number of Subcontractor tiers involved with the Extra Work.

**2.2.4 Adjustments and Considerations for Extra Work Costs.**

- (A) When both additions and credits are involved in any one Change Order, Principal Project Company's markup for direct costs shall be computed on the basis of its direct costs and labor productivity for the net change in the quantity of the Extra Work. For example, if a Change Order adds 14 units on one drawing and deletes 5 units on another drawing, the markup shall be based on the net addition of 9 units. No markup will be allowed if the deductive cost exceeds the additive cost.
- (B) If the City issues written notice of deletion of a portion of Extra Work after the commencement of such Extra Work or after Principal Project Company has ordered acceptable materials for such Work which cannot be cancelled, or if part or all of such Extra Work is not performed by Principal Project Company because it is unnecessary due to actual Project Site conditions, City will pay Principal Project Company for direct costs of such Work actually performed plus markup for overhead and profit as provided in Section 2.2.3 (Markup for Overhead and Profit).
- (C) The City shall not be obligated to compensate Principal Project Company for costs incurred after Principal Project Company receives the City's written notice deleting the portion of Extra Work.
- (D) Materials ordered by Principal Project Company prior to the City's issuance of a notice of deletion and paid for by the City shall become the property of the City, and the City will pay for the actual cost of any further handling of such material. If the material is returnable to the vendor, and if the City so directs, Principal Project Company shall return the material and the City will pay Principal Project Company only for the actual charges made by the vendor for returning the material including restocking charges.
- (E) Principal Project Company shall be solely responsible for determining which of its Contractors and Suppliers are assigned Change Orders. The City will not provide additional compensation to Principal Project Company for the cost of its Contractors and Suppliers to review, post, coordinate, or perform related tasks to administer Change Orders.

**2.2.5 Records.** Principal Project Company shall maintain its records in such a manner as to provide a clear distinction between the direct costs of Change Orders and the cost of original Work. This requirement pertains to all types of Change Orders, as well as the additions, deletions, revisions, and Claims initiated by Principal Project Company.

## 2.3 Unit Prices

If mutually agreed by the Parties or specified in the Contract Documents, the cost of Extra Work will be determined on a unit-cost basis.

**2.3.1 Initial Estimate.** The City will calculate an initial cost estimate by multiplying the pre-agreed unit prices by the estimated quantities indicated in the corresponding Change Order.

**2.3.2 Final Cost Calculation.** The actual cost payable to Principal Project Company for the Extra Work will be based on the real quantities of work completed, not the initial estimates.

**2.3.3 Overhead and Profit.** Unit prices must include any overhead and profit, the calculation of which shall follow the guidelines provided in this Exhibit 13 (Costs Schedule).

## 2.4 Force Account

If the City determines in its good faith discretion, Extra Work Costs will be determined on a Force Account basis. In such a case, the City will direct Principal Project Company to proceed with the Extra Work on a Force Account basis, subject to a "not to exceed" budget established by the City.

**2.4.1 General.** When the City pays Extra Work on a Force Account basis, all direct costs itemized in accordance with Section 2.2.1 (Direct Costs) shall be subject to the approval of the City and compensation will be determined as set forth in this Exhibit 13 (Costs Schedule).

- (A) All requirements for direct costs and markup for overhead and profit provided in Section 2.2.3 (Markup for Overhead and Profit) shall apply to Force Account Work. However, the City will pay only the actual necessary costs verified in the field by the City on a daily basis.
- (B) Principal Project Company shall be responsible for all costs related to the documentation, data preparation, and administration of Force Account Work. Compensation for these costs shall be fully covered by the markup for overhead and profit markup as provided in Section 2.3 (Unit Prices).
- (C) Notification and Verification. Before commencing any Force Account Work, Principal Project Company shall provide written notice to the City at least 24 hours before the scheduled Work. The Force Account Work must be witnessed, documented, and approved in writing by the City on the day the Work is performed. Failure by the Principal Project Company to provide timely notice to the City before initiating Force Account Work shall result in the City not being obligated to compensate for such Work.

In addition, Principal Project Company shall notify the City when the cumulative costs incurred by Principal Project Company for the Force Account Work equal 80% of the budget pre-established by the City. The City shall not be obligated to compensate Principal Project Company for Force Account Work exceeding the "not to exceed" budget amount if Principal Project Company fails to provide the required notice before exceeding 80% of the Force Account budget.

- (D) Reports. Principal Project Company shall diligently proceed with City-directed Force Account Work and shall submit to the City no later than 12:00 p.m. of the day following performance of Force Account Work a daily Force Account Work report on a form obtained from the City. The report shall provide an itemized, detailed account of the daily Force Account labor, material, and equipment, including names of the individuals and the specific pieces of equipment identified by manufacturer's model type and serial number. Principal Project Company's authorized representative shall complete and sign the report. The City shall not be obligated to compensate Principal Project Company for Force Account Work for which Principal Project Company does not timely complete and submit the aforementioned report to the City.
- (E) Agreement. If Principal Project Company and the City reach a negotiated, signed agreement on the cost of a Change Order while the Extra Work is proceeding on a Force Account basis, Principal Project Company's signed written reports shall be discontinued and all previously signed reports shall become invalid.

### 3.0 Delay Costs

- (A) General. In the event of a City-Caused Delay Event, the City will pay Principal Project Company for incurred Delay Costs as specified in this Section 3.0 (Delay Costs) to the extent (i) expressly allowed under Section 14.1.4(b) of this Agreement, and (ii) such costs have not been previously paid as allowed under Section 2.4 (Force Account). Such payment constitutes full compensation for incurred Delay Costs.
- (B) The City will not pay for Delay Costs until Principal Project Company submits an itemized statement of those costs; Principal Project Company must provide the content specified in Section 2.4 (Force Account), for the applicable items in this statement and as follows:
- (1) Proof of cost of superintendent, or other project staff salaries, wages, and payroll taxes and insurance;
  - (2) Proof of cost of office rent, utilities, land rent, and office supplies;
  - (3) Proof of escalated cost for labor, equipment, and material;
  - (4) Proof of material storage costs; and
  - (5) Proof of other increased Delay Costs consistent with this Section 3.0 (Delay Costs).
- (C) Allowable Delay Costs. Increases in cost for labor, equipment, and materials will be calculated as follows:
- (1) Idle Labor. Labor costs during delays must be calculated as specified in Section 2.2.1(A) for all non-salaried personnel remaining on the Project as required under collective bargaining agreements or for City-approved reasons.

- (2) Escalated Labor. Payments authorized for increases in labor costs will be based on (i) the difference between old and new labor rates established by a State or federal agency, or (ii) a project labor agreement or other agreement between the employee's and Principal Project Company's bargaining agency, which is accepted by City. Payment will be based on certified payrolls. Payment will also include the increases in fringe benefit rates and increases in payroll taxes that Principal Project Company is required to pay.
- (3) Idle Equipment. Payment may be allowed on a rental basis for the idled equipment if any of the following criteria is met:
  - a. The equipment is on the Project Site at the time of the delay, is required for the controlling operation, and cannot be used at other locations on the Project Site.
  - b. The equipment is specialized and directly related to the controlling operation, whether on or off the Project Site. This must be certified by Principal Project Company and verified by the City.
  - c. The rental rate for idled leased or rented equipment will be the leased or rented rate established in Section 2.2.1(C). However, the City may direct Principal Project Company to return equipment and take it off rental.
  - d. The rental rate for idled equipment owned by PPC-Related Entities will be one-half the rate established in Section 2.2.1(C). No payment will be allowed for operating costs.
  - e. Payment will be limited to the difference between the hours used and 8 hours in any one day and to the difference between the hours used and 40 hours in any one week. No additional compensation for overhead will be allowed.
  - f. Equipment demobilization and remobilization, if directed by City, will be paid in accordance with Section 2.0 (Extra Work Costs).
- (4) Material Escalation or Material Storage. Payment for increased cost of materials will be based on differences in the invoice costs before and after the delay period. When requesting an increase in cost of materials, Principal Project Company shall document the increased costs due to the delay. The cost of materials storage during the delay will be the invoiced storage cost.

#### **4.0 Financing Delay Costs**

Financing Delay Costs, when allowed under this Agreement, will be paid in the form and timing as described in Section 7.0 (Form and Timing of Compensation).

## 5.0 Directed Acceleration

If the City orders Principal Project Company to accelerate the D&C Work in accordance with Section 1.3.2(c) of Exhibit 9 (Change Procedures), and in the absence of agreed upon compensation, the City will compensate Principal Project Company for performance of the accelerated work in accordance with Section 2.4 (Force Account).

## 6.0 Unrecoverable Costs

Principal Project Company is not entitled to compensation for the following costs:

- (A) Loss of anticipated profit.
- (B) Consequential damages, including loss of bonding capacity, loss of bidding opportunities, insolvency, and the effects of force account work on other projects, or business interruption.
- (C) Indirect costs.
- (D) Attorneys' fees, claim preparation expenses, and the costs of litigation.
- (E) Unabsorbed or extended field or home office overhead or any damages using an Eichleay or similar equation, except as otherwise provided in the mark ups specified in Section 2.2.2 (Costs Included as Part of Markup for Overhead and Profit).
- (F) The cost of project management services provided by Principal Project Company.

The following do not constitute cause for a Claim for Extra Work Costs or Delay Costs:

- (1) The inability to secure satisfactory materials, for reasons beyond Principal Project Company's control, from the source upon which the proposal was based, unless project specific single source Suppliers are specified by City; or
- (2) Changes in carrier rates or the alteration of transportation facilities for these materials during the Term.

## 7.0 Form and Timing of Compensation

### 7.1 Payments or Deductions of Extra Work Costs, Delay Costs and Financing Delay Costs

If a Delay Event or Relief Event:

- (A) results in an amount owing from Principal Project Company to City in accordance with this Agreement, City will deduct such amount from the Milestone Payment (only to the extent that such Delay Event or Relief Event affects the (1) D&C Work or (2) IFM Services prior to the Substantial Completion Date) or Availability Payments payable to Principal Project Company after the Delay Event or Relief

Event, or if no subsequent Milestone Payment or Availability Payments are payable to Principal Project Company, such amount will be a debt due and payable by Principal Project Company to City;

- (B) results in an amount owing from City to Principal Project Company that is not financed by Principal Project Company in accordance with Section 7.2 (Additional Funding), City will compensate Principal Project Company as follows:
- (1) subject to Sections 7.1(B)(2) and 7.1(B)(3) in the form of:
    - a. an adjustment to the Milestone Payment or Availability Payments over the Term;
    - b. a lump sum payment;
    - c. progress or other periodic payments invoiced as Extra Work is completed or as other multiple payments over the Term; or
    - d. any combination of the above,in accordance with the payment arrangements set out in the Change Order or Unilateral Change Order or otherwise as determined by the City in its sole discretion;
  - (2) in respect of Extra Work Costs or Delay Costs, within 1 calendar month after the date of the receipt from Principal Project Company of the Change Order except to the extent that any Extra Work Costs or Delay Costs are disputed by City and referred for dispute resolution in accordance with Article 18 (Contract Dispute Procedures); and
  - (3) in respect of Financing Delay Costs, on the date which City would have paid the Milestone Payment or Availability Payment relating to those days of delay had Substantial Completion not been delayed by the relevant Compensable Delay Event; or
- (C) results in an amount owing from City to Principal Project Company that is financed by Principal Project Company in accordance with Section 7.2 (Additional Funding), City will pay such amount to Principal Project Company in the same manner as Section 7.1(B).

## 7.2 Additional Funding

Where City requests Principal Project Company obtain funding for a Delay Event or Relief Event, Principal Project Company shall use all reasonable endeavors to obtain such funding, including by:

- (A) using any savings resulting from other Delay Events or Relief Events which have resulted in amounts being available under the Financing Documents;
- (B) utilizing any standby facility that may be available to Principal Project Company;

- (C) arranging for additional funding under the Financing Documents and from other sources (if permitted under the Financing Documents); and
- (D) arranging other funding obtained on commercial terms for Principal Project Company by City (without any obligation on City to make any such arrangements).

To the extent Principal Project Company is able to obtain funding, the cost of the funding will be taken into consideration by the parties in the compensating Principal Project Company for the Delay Event or Relief Event in accordance with Section 7.1 (Payments or Deductions of Extra Work Costs, Delay Costs and Financing Delay Costs). City shall pay Principal Project Company an amount equal to the reasonable out-of-pocket expenses incurred by Principal Project Company in seeking such financing, provided that City approved such expenses prior to Principal Project Company incurring them.

Where, having used all reasonable endeavors, Principal Project Company is unable to obtain funding or funding is on terms which are not satisfactory to City, City will, without limiting its rights under Exhibit 9 (Change Procedures), compensate Principal Project Company in accordance with Section 7.1(A)-(C).

**EXHIBIT 14**

**KEY CONTRACT PROVISIONS**

**I. Key Contracts**

Each Key Contract shall:

- (a) Include a covenant to maintain all licenses required by applicable Law;
- (b) Require the Key Contractor to carry out its scope of work in accordance with applicable requirements of the Contract Documents, the Regulatory Approvals, applicable Law, and plans, systems and manuals developed and used by Principal Project Company under the Contract Documents;
- (c) Set forth representations, warranties, guaranties and liability provisions of the Key Contractor appropriate for work of a similar scope and scale;
- (d) Expressly state that all warranties and guaranties remaining in effect upon the expiration of the Term or earlier termination of this Agreement, whether express or implied, shall inure to the benefit of City, its successors and assigns, and any Third Parties for whom Work is being performed;
- (e) Set forth a standard of professional responsibility or a standard for commercial practice (as applicable) equal to or better than the requirements of the Contract Documents and in accordance with Good Industry Practice for work of similar scope and scale;
- (f) To the extent applicable, if not obtained by Principal Project Company, require the Key Contractor to provide Payment Bond(s) and Performance Bond(s) as required under Section 10.2 (Performance Security) of this Agreement before commencement of any work by or on behalf of the Key Contractor, and expressly require such Key Contractor to provide any surety Notices of loss or potential loss to Principal Project Company and City;
- (g) Preclude suspension of performance or demobilization by the Key Contractor unless and until it delivers to City Notice of the other contracting party's breach or default under such Key Contract and allows City the reasonable opportunity to cure such breach or default;
- (h) Not be assignable by the Key Contractor without Principal Project Company's and City's prior consent, provided that this provision shall not prohibit subcontracting of portions of the Work to qualified Subcontractors;
- (i) Include the requirements and provisions in this Agreement applicable to Contractors regarding title to and other Intellectual Property rights and licenses;
- (j) Require the Key Contractor to participate in meetings between Principal Project Company and City concerning matters pertaining to such Key Contractor, its work or the coordination of its work with Other Contractors in accordance with direction to such Key

- Contractor provided by Principal Project Company or other party to the Key Contract, provided that City retains authority to give such direction or take such action as in its opinion is necessary to remove an immediate and present threat to the safety of life or property;
- (k) Require the Key Contractor to participate in, be subject to and give evidence in any dispute resolution proceeding under Article 18 (Contract Dispute Procedures) of this Agreement, if such participation is requested by either City or Principal Project Company;
  - (l) Without cost to Principal Project Company or City, and subject to the rights of the Collateral Agent under any Direct Agreement, permit assignment to City or its successors, assigns or designees of all Principal Project Company's or other contracting party's rights under the Key Contract (with such assignment to include the benefit of all Key Contractor warranties, indemnities, guarantees and professional responsibility), contingent only upon delivery of Notice from City following the Termination Date, allowing City or its successor, assign or designee to obtain the benefit of Principal Project Company's or other contracting party's rights with liability only for those remaining obligations of Principal Project Company or the other contracting party accruing after the date of delivery of said Notice from City, without extinguishing existing claims of the Key Contractor against Principal Project Company or the corresponding Claims of Principal Project Company against City;
  - (m) Expressly state that any acceptance of assignment of the Key Contract by City, the Collateral Agent or either or their respective successors, assigns or designees shall not operate to make the assignee responsible or liable for any breach of the Key Contract by Principal Project Company or for any amounts due and owing under the Key Contract for work or services rendered before acceptance of the assignment;
  - (n) Expressly include the Indemnitees as indemnitees, with direct right of enforcement, in any indemnity given by the Key Contractor under the Key Contract;
  - (o) Expressly include an acknowledgement that, except to the extent of stop notice rights under State law, the Key Contractor has no right or claim to any lien or encumbrance upon the Project and Project Site for failure of the other contracting party to pay amounts due the Key Contractor, and a waiver of any such right or claim that may exist at Law or in equity;
  - (p) Expressly include the right of Principal Project Company to terminate the Key Contract in whole or in part upon any termination of this Agreement without liability of Principal Project Company or City for the Key Contractor's lost profits or business opportunity;
  - (q) Not contain any terms that do not comply or are inconsistent with the terms of the Contract Documents;
  - (r) Include:
    - (i) a covenant acknowledging that, subject to the rights of the Collateral Agent under any Direct Agreement, upon receipt of written Notice from City, City is entitled to exercise step-in rights with respect to the Key Contract (where City is also

exercising its step-in rights under Section 16.2.5 (City Step-in Rights) of this Agreement), without any necessity for a consent or approval from Principal Project Company or the making of a determination whether City validly exercised its step-in rights; and

- (ii) a waiver and release by Principal Project Company of any claim or cause of action against the Key Contractor arising out of, relating to or resulting from its recognition of City's step-in rights in reliance on any such written Notice from City;
- (s) Include a covenant that will survive termination of the Key Contract obligating the Key Contractor to promptly execute and deliver to City or its successor, assign or designee a new contract between the Key Contractor and City or its successor, assign or designee on the same terms as the Key Contract, if (i) the Key Contract is rejected by Principal Project Company in bankruptcy or is wrongfully terminated by Principal Project Company and (ii) City delivers a request for such new contract within 60 days following termination or expiration of this Agreement;
- (t) Include a covenant that will survive termination of the Key Contract to the effect that if the Key Contractor was a party to an escrow agreement for an IP Escrow and Principal Project Company terminates it, then the Key Contractor also shall execute and deliver to City, concurrently with such new contract, a new escrow agreement on the same terms as the terminated escrow agreement, and shall concurrently make the same deposits to the new IP Escrow as made or provided under the terminated escrow agreement. The obligation to include the same terms in each such new contract (including new IP Escrows) is subject to the following exceptions: (i) terms of a Key Contract or IP Escrow agreement rendered moot or inapplicable solely due to change in the identity of the contracting party; and (ii) terms of a Key Contract that must be adjusted due to schedule delay caused solely by Principal Project Company's rejection in bankruptcy or wrongful termination;
- (u) Require the Key Contractor to (i) maintain usual and customary Books and Records for the type and scope of operations of business in which it is engaged and retain such Books and Records for the period stated in Section 21.1.1(e) of this Agreement or other applicable period specified in the Contract Documents, (ii) permit audit of Books and Records by City and (iii) provide progress reports to Principal Project Company appropriate for the type of work it is performing sufficient to enable Principal Project Company to furnish reports required under this Agreement;
- (v) Include a right of inspection for City, or City's designee(s), consistent with City's inspection rights under the Contract Documents;
- (w) Include provisions for Renewal Work during the last two years of the Term ensuring that warranties and guaranties under each Key Contract inure to the benefit of both City and Principal Project Company; and
- (x) Provide that any purported amendment contrary to the requirements of this Exhibit 14 (Key Contract Provisions), without the prior written consent of City, shall be null and void.

## II. D&C Contract

Each D&C Contract shall:

- (b) Ensure D&C Contractor participation in and compliance with commissioning tasks, including the requirements under Division 6 (Testing & Commissioning and Operational Readiness) of the Technical Requirements, to provide a properly functioning building that includes fundamental commissioning requirements; and
- (c) At a minimum, outlining the following commissioning requirements, in accordance with Division 6 (Testing & Commissioning and Operational Readiness) of the Technical Requirements:
  - (i) Commissioning team roles and responsibilities;
  - (ii) Requirements for a communication protocol between Principal Project Company, D&C Contractor, and the Commissioning Provider;
  - (iii) Submittal requirements and review procedures;
  - (iv) Operation and maintenance documentation requirements;
  - (v) Meetings;
  - (vi) Construction verification procedures;
  - (vii) Cost of retesting;
  - (viii) Start-up, testing, adjusting and balancing documentation and verification;
  - (ix) Functional performance testing requirements;
  - (x) Systems Manual requirements;
  - (xi) Training of IFM Provider and City personnel;
  - (xii) Schedule and contractual milestones;
  - (xiii) End of warranty site visit; and
  - (xiv) Commissioning specifications are to be provided to the D&C Contractor.

**EXHIBIT 15**

**CONDITIONS PRECEDENT**

- Exhibit 15A: Conditions to NTP 1 - Commencement of Non-Construction Work
- Exhibit 15B: Conditions to NTP 2 - Commencement of Construction Work
- Exhibit 15C: Conditions to Substantial Completion
- Exhibit 15D: Conditions to Final Acceptance

**EXHIBIT 15A**

**CONDITIONS TO NTP1 - COMMENCEMENT OF NON-CONSTRUCTION WORK**

The conditions to NTP 1 are:

- (a) Financial Close has occurred;
- (b) City has accepted the following elements of the Project Management Plan: (i) the Design Management Plan; and (ii) the Quality Management Plan (Design);
- (c) all Insurance Policies required to be in effect at NTP 1 pursuant to Exhibit 7 (Insurance Requirements) have been obtained and are in full force and effect and Principal Project Company has delivered to City verification thereof as required under Section 10.1.2.4(a) of this Agreement;
- (d) Principal Project Company has certified to City that all personnel who will perform D&C Work either hold all licenses, certifications, registrations, permits or approvals necessary for performance of the D&C Work or will obtain them before starting work;
- (e) Principal Project Company is not then in receipt of any Notice of PPC Default from City unless any such default has been cured or waived in writing by City;
- (f) Principal Project Company is not then in receipt of any Notice of default delivered pursuant to the Financing Documents unless any such default has been cured, and no Lender has otherwise indicated that it is unwilling or unable to presently fund Principal Project Company's costs of the Work; and
- (g) All representations and warranties of Principal Project Company in Section 19.1 (Principal Project Company Representations and Warranties) of this Agreement shall be and remain true and correct in all material respects, and Principal Project Company has delivered to City a certificate certifying to the same.

**EXHIBIT 15B**

**CONDITIONS TO NTP 2 - COMMENCEMENT OF CONSTRUCTION WORK**

The conditions to NTP 2 are:

- (a) City has issued NTP 1;
- (b) City has accepted the Project Schedule;
- (c) City has accepted the Project Management Plan;
- (d) City's has accepted the Health and Safety Plan required pursuant to Section 01 35 45 of Division 10 of the Technical Requirements;
- (e) all Insurance Policies required to be in effect at NTP 1 pursuant to Exhibit 7 (Insurance Requirements) remain in full force and effect, and Principal Project Company has delivered to City verification thereof as required under Section 10.1.2.4(a) of this Agreement;
- (f) all Regulatory Approvals necessary to begin the applicable portions of the Construction Work have been obtained and Principal Project Company has furnished to City fully executed copies of such Regulatory Approvals other than the CEQA Approval;
- (g) the Access Date has occurred and all rights of access necessary for commencement of Construction Work on the applicable portion of the Project Site have been obtained;
- (h) all applicable pre-construction requirements, as set forth in the final MMRP contained in Section 01 35 50 (Appendix A) of Division 10 of the Technical Requirements and contained in Section 01 35 43, Section 01 35 50, Section 02 80 13, and Section 02 81 10 of Division 10 of the Technical Requirements, have been reviewed and confirmed to be completed by City in its regulatory capacity;
- (i) all applicable pre-construction requirements contained in any Regulatory Approvals, in each case for the applicable portion of the Construction Work, have been satisfied;
- (j) All Utility Adjustments have been completed and Principal Project Company certifies that, other than Utility Adjustments arising out of any Unidentified Utilities found after the Setting Date, no further Utility conflicts exist with respect to the Project;
- (k) Principal Project Company has obtained approvals from Authorities Having Jurisdiction required for, as well as City approval of, any proposed lane closures, and has taken other appropriate measures to ensure maintenance of traffic in the area affected by the Work;
- (l) Principal Project Company has delivered to City, and City has accepted or approved (as applicable), all Submittals relating to the applicable portion of the Construction Work required by the Project Management Plan and the Contract Documents to be accepted or

- approved, in the form and content required by the Project Management Plan or Contract Documents;
- (m) Principal Project Company has delivered to City, and City has approved, the Final Commissioning Plan;
  - (n) Principal Project Company has obtained City approval of the Release for Construction Documents for the affected Construction Work in accordance with Section 1.8.6 of Division 1 of the Technical Requirements;
  - (o) the guarantees in favor of City, if any, required under Section 10.5 (Guarantees) of this Agreement have been executed, obtained and delivered to, and received by, City and are in full force and effect;
  - (p) Principal Project Company is not then in receipt of any Notice of PPC Default from City unless any such default has been cured or waived in writing by City;
  - (q) Principal Project Company is not then in receipt of any Notice of default delivered pursuant to the Financing Documents unless any such default has been cured, and no Lender has otherwise indicated that it is unwilling or unable to presently fund Principal Project Company's costs of the Work; and
  - (r) All representations and warranties of Principal Project Company in Section 19.1 (Principal Project Company Representations and Warranties) of this Agreement shall be and remain true and correct in all material respects, and Principal Project Company has delivered to City a certificate certifying to the same.

**EXHIBIT 15C**

**CONDITIONS TO SUBSTANTIAL COMPLETION**

The conditions to Substantial Completion are:

- (a) Principal Project Company has completed all D&C Work in accordance with the requirements of this Agreement and the Infrastructure Facility can be utilized safely for its intended purpose, including (i) full access to all points of entry and exit and (ii) completion of all Construction Work other than Punch List items approved by City;
- (b) each Authority Having Jurisdiction has issued a temporary certificate of occupancy for the Infrastructure Facility, to the extent such certificate is required by applicable Law, or has accepted the Infrastructure Facility, as applicable;
- (c) Principal Project Company has accepted the updated IFM Management Plan;
- (d) the Infrastructure Facility is in a condition of full operational functionality and operational readiness to allow the SFMTA's transit operations to relocate to the Infrastructure Facility as required in Section 01 77 00 of Division 10 and Division 6 of the Technical Requirements, respectively including with all emergency testing and commissioning activities successfully completed, and with the Help Desk established and operating;
- (e) Principal Project Company has:
  - (i) completed training of Principal Project Company's IFM Services personnel in accordance with Section 1.7 of Division 1 of the Technical Requirements;
  - (ii) completed training of City's SFMTA O&M Services personnel in accordance with Section 1.7 of Division 1 of the Technical Requirements;
  - (iii) delivered to City a certificate, in form acceptable to City, executed by Principal Project Company that it and its Contractors are fully staffed with such trained personnel and are ready, willing and able to operate and maintain the Infrastructure Facility in accordance with the terms of the Contract Documents including the approved Project Management Plan;
  - (iv) delivered to City training records evidencing compliance with training requirements for both Principal Project Company's IFM Services personnel and City's SFMTA O&M Services personnel, including copies of course completion certificates issued to each of the subject personnel, and including SFMTA O&M Services training manuals and video recordings of training sessions;
  - (v) completed and documented completion of all training required to allow full access to the Project Site to those individuals designated by City in accordance Section 1.7 of Division 1 of the Technical Requirements; and
  - (vi) satisfactorily demonstrated integrated operational functionality through "live" coordinated responses (in conjunction with City staff including emergency response

personnel) to failure management and other emergency events during the operations of the Infrastructure Facility in accordance with Division 6 of the Technical Requirements;

- (f) the relevant systems and equipment have passed all required tests and Principal Project Company has delivered to City all reports, data, and documentation relating to such tests;
- (g) Principal Project Company has delivered to City, and City has approved, the Systems Manual;
- (h) Principal Project Company has, in accordance with Section 21.4 (Intellectual Property), granted to City all Base License Rights to PPC IP and Third Party IP, delivered to City all Developed IP, delivered to City all IP Materials, and made all deposits to the IP Escrow required with respect to the D&C Work;
- (i) Principal Project Company has prepared and submitted a Punch List in accordance with the Contract Documents and City has accepted such list;
- (j) Principal Project Company is not then in receipt of any Default Notice from City unless any such default has been cured or waived in writing by City;
- (k) Principal Project Company is not then in receipt of any Notice of default delivered pursuant to the Financing Documents unless any such default has been cured;
- (l) Principal Project Company has delivered to City (i) all manufacturers' warranties required under, and in the form and content specified by the Technical Requirements (including Division 3 of the Technical Requirements and Section 01 78 36 of Division 10 of the Technical Requirements) and (ii) all documents and other evidence of warranties under Sections 7.9 (Final Acceptance) and 6.11 (Warranties) of this Agreement;
- (m) all Insurance Policies required to be in effect for the IFM Period pursuant to Exhibit 7 (Insurance Requirements) have been obtained and are in full force and effect and Principal Project Company has delivered to City verification thereof as required under Section 10.1.2.4(a) of this Agreement; and
- (n) all Submittals required by the Project Management Plan or Contract Documents to be submitted, accepted and/or approved by City have been submitted to and accepted or approved by City, as applicable.

**EXHIBIT 15D**

**CONDITIONS TO FINAL ACCEPTANCE**

The conditions to Final Acceptance are:

- (a) Principal Project Company has completed all D&C Work in accordance with this Agreement;
- (b) City has issued a Certificate of Substantial Completion for the Infrastructure Facility;
- (c) all Punch List items have been completed to the reasonable satisfaction of City;
- (d) Principal Project Company has delivered to City a reasonable inventory of all spare parts, spare components, spare equipment, special tools, materials, expendables and consumables necessary for the operation and maintenance of the Infrastructure Facility;
- (e) all Submittals that Principal Project Company is required by the Contract Documents to submit upon Final Acceptance have been submitted to City;
- (f) each Authority Having Jurisdiction has issued a certificate of occupancy, to the extent such certificate is required by applicable Law, and/or has provided other approvals required for operation of the Infrastructure Facility, as applicable;
- (g) City has received a complete set of the As-Built Documents and documentation for the Infrastructure Facility;
- (h) Principal Project Company has, in accordance with Section 21.4 (Intellectual Property), granted to City all Base License Rights to PPC IP and Third Party IP, delivered to City all Developed IP, delivered to City all IP Materials, and made all deposits to the IP Escrow required at or prior to Final Acceptance;
- (i) all Insurance Policies required to be in effect for the IFM Period pursuant to Exhibit 7 (Insurance Requirements) have been obtained and are in full force and effect and Principal Project Company has delivered to City verification thereof as required under Section 10.1.2.4(a) of this Agreement;
- (j) Principal Project Company has completed the Move-In, in accordance with Section 7.13 (Move-In) of this Agreement.
- (k) Principal Project Company is not then in receipt of any Notice of PPC Default from City unless any such default has been cured or waived in writing by City; and
- (l) Principal Project Company is not then in receipt of any Notice of default delivered pursuant to the Financing Documents unless any such default has been cured.

**FEDERAL, STATE AND CITY REQUIREMENTS**

- Exhibit 16A: Federal Requirements
- Exhibit 16B: State Requirements
- Exhibit 16C: City Requirements
- Exhibit 16D: SFMTA's Surveillance Technology Policy

**EXHIBIT 16A**

**FEDERAL REQUIREMENTS**

***[NOTE TO PNC: FEDERAL PROVISIONS UNDER DEVELOPMENT AND SUBJECT TO ADDITIONAL REVISION]***

**1. NO FEDERAL GOVERNMENT OBLIGATIONS TO THIRD PARTIES**

Principal Project Company and City acknowledge and agree that, notwithstanding any concurrence by the federal government in, or approval of, the solicitation or award of this Agreement, absent the express written consent by the federal government, the federal government is not a party to this Agreement and shall not be subject to any obligations or liabilities to City, Principal Project Company or any other party pertaining to any matter resulting from this Agreement. Principal Project Company agrees to include the above clause in each Contract financed in whole or in part with federal assistance provided by the FTA. It is further agreed that the clause shall not be modified, except to identify the Contractor who will be subject to its provisions.

**2. FALSE STATEMENTS OR CLAIMS – CIVIL OR CRIMINAL FRAUD**

49 U.S.C. § 5323(l)(1)  
31 U.S.C. §§ 3801-3812  
18 U.S.C. § 1001  
49 C.F.R. part 31

Principal Project Company acknowledges that the provisions of the Program Fraud Civil Remedies Act of 1986, as amended, 31 U.S.C. § 3801 et seq. and U.S. DOT regulations, "Program Fraud Civil Remedies," 49 C.F.R. part 31, apply to its actions pertaining to the Project. Upon execution of this Agreement, Principal Project Company certifies or affirms the truthfulness and accuracy of any statement it has made, it makes, it may make, or causes to be made, pertaining to this Agreement or the Project. In addition to other penalties that may be applicable, Principal Project Company further acknowledges that if it makes, or causes to be made, a false, fictitious, or fraudulent claim, statement, submission, or certification, the federal government reserves the right to impose the penalties of the Program Fraud Civil Remedies Act of 1986 on Principal Project Company to the extent the federal government deems appropriate. Principal Project Company also acknowledges that if it makes, or causes to be made, a false, fictitious, or fraudulent claim, statement, submission, or certification to the federal government under a contract connected with a project that is financed in whole or in part with federal assistance originally awarded by FTA under authority of 49 U.S.C. chapter 53, the Government reserves the right to impose the penalties of 18 U.S.C. § 1001 and 49 U.S.C. § 5323(l) on Principal Project Company, to the extent the federal government deems appropriate. Principal Project Company agrees to include the above two clauses in each Contract financed in whole or in part with federal assistance provided by FTA. It is further agreed that the clauses shall not be modified, except to identify the Contractor who will be subject to the provisions.

---

### 3. ACCESS TO THIRD PARTY CONTRACT RECORDS

49 U.S.C. § 5325(g)  
2 C.F.R. § 200.333  
49 C.F.R. part 633

- (a) **Record Retention.** Principal Project Company will retain, and will require its Contractors of all tiers to retain, complete and readily accessible records related in whole or in part to this Agreement, including, but not limited to, data, documents, reports, statistics, sub-agreements, leases, subcontracts, arrangements, other third party agreements of any type, and supporting materials related to those records.
- (b) **Retention Period.** Principal Project Company agrees to comply with the record retention requirements in accordance with 2 C.F.R. § 200.333. Principal Project Company shall maintain all books, records, accounts and reports required under this Agreement for a period of at not less than three (3) years after the date of termination or expiration of this Agreement, except in the event of litigation or settlement of claims arising from the performance of this Agreement, in which case records shall be maintained until the disposition of all such litigation, appeals, claims or exceptions related thereto.
- (c) **Access to Records.** Principal Project Company agrees to provide sufficient access to FTA and its contractors to inspect and audit records and information related to performance of this Agreement as reasonably may be required and to the U.S. Secretary of Transportation and the Comptroller General of the United States, the state, or their duly authorized representatives, access to all third party contract records (at any tier) as required under 49 U.S.C. § 5325(g).
- (d) **Access to the Sites of Performance.** Principal Project Company agrees to permit FTA and its contractors access to the sites of performance under this Agreement as reasonably may be required.

### 4. CHANGES TO FEDERAL REQUIREMENTS

- (a) Principal Project Company shall at all times comply with all applicable FTA regulations, policies, procedures and directives, as these regulations, policies, procedures, and directives may be amended from time to time, including those listed directly or by reference in any Master Agreement between City and FTA. Principal Project Company's failure to so comply shall constitute a material breach of this Agreement.
- (b) Federal requirements that apply to City or the award, this Agreement, and any amendments thereto may change due to changes in federal law, regulation, other requirements, or guidance, or changes in the City's underlying agreement including any information incorporated by reference and made part of that underlying agreement.
- (c) Applicable changes to those federal requirements will apply to this Agreement and Parties thereto at any tier.

---

## 5. TERMINATION

2 C.F.R. § 200.339  
2 C.F.R. App. II(B) to part 200

See Article 17 (Termination) of this Agreement.

## 6. CIVIL RIGHTS

Principal Project Company is an Equal Opportunity Employer. As such, Principal Project Company agrees to comply with all applicable federal civil rights laws and implementing regulations. Apart from inconsistent requirements imposed by federal laws or regulations, Principal Project Company agrees to comply with the requirements of 49 U.S.C. § 5323(h)(3) by not using any federal assistance awarded by FTA to support procurements using exclusionary or discriminatory specifications. Under this Agreement, Principal Project Company shall at all times comply with the following requirements and shall include these requirements in each Contract entered into as part thereof.

- (a) **Nondiscrimination.** In accordance with federal transit law at 49 U.S.C. § 5332, Principal Project Company agrees that it will not discriminate against any employee or applicant for employment because of race, color, religion, national origin, sex, disability, or age; and that the Principal Project Company and each Contractor maintains no employee facilities segregated on the basis of race, color, religion or national origin. In addition, Principal Project Company agrees to comply with applicable federal implementing regulations and other implementing requirements FTA may issue.
- (b) **Race, Color, Religion, National Origin, Sex.** In accordance with Title VII of the Civil Rights Act, as amended, 42 U.S.C. § 2000e et seq., and federal transit laws at 49 U.S.C. § 5332, Principal Project Company agrees to comply with all applicable equal employment opportunity requirements of U.S. Department of Labor (U.S. DOL) regulations, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor," 41 C.F.R. chapter 60, and Executive Order No. 11246, "Equal Employment Opportunity in Federal Employment," September 24, 1965, 42 U.S.C. § 2000e note, as amended by any later Executive Order that amends or supersedes it, referenced in 42 U.S.C. § 2000e note. Principal Project Company agrees to take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, national origin, or sex (including sexual orientation and gender identity). Such action shall include, but not be limited to, the following: employment, promotion, demotion or transfer, recruitment or recruitment advertising, layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. In addition, Principal Project Company agrees to comply with any implementing requirements FTA may issue.
- (c) **Nondiscrimination – Title VI of the Civil Rights Act.** Principal Project Company will:
  - (i) prohibit discrimination based on race, color, or national origin;

- 
- (ii) comply with: (A) Title VI of the Civil Rights Act of 1964, as amended, 42 U.S.C. § 2000d, et seq.; (B) U.S. DOT regulations, “Nondiscrimination in Federally-Assisted Programs of the Department of Transportation – Effectuation of Title VI of the Civil Rights Act of 1964,” 49 C.F.R. Part 21; and (C) Federal transit law, specifically 49 U.S.C. § 5332; and
  - (iii) follow: (A) The most recent edition of FTA Circular 4702.1, “Title VI Requirements and Guidelines for Federal Transit Administration Recipients,” to the extent consistent with applicable federal laws, regulations, requirements, and guidance; (B) U.S. DOJ, “Guidelines for the enforcement of Title VI, Civil Rights Act of 1964,” 28 C.F.R. § 50.3; and (C) All other applicable federal guidance that may be issued.

For more information on Title VI of the Civil Rights Act requirements, Principal Project Company shall review City’s Title VI Program developed for the Project to comply with Title VI of the Civil Rights Act of 1964.

- (d) **Age.** In accordance with the Age Discrimination in Employment Act, 29 U.S.C. §§ 621- 634, U.S. Equal Employment Opportunity Commission (U.S. EEOC) regulations, “Age Discrimination in Employment Act,” 29 C.F.R. part 1625, the Age Discrimination Act of 1975, as amended, 42 U.S.C. § 6101 et seq., U.S. Health and Human Services regulations, “Nondiscrimination on the Basis of Age in Programs or Activities Receiving Federal Financial Assistance,” 45 C.F.R. part 90, and Federal transit law at 49 U.S.C. § 5332, Principal Project Company agrees to refrain from discrimination against present and prospective employees for reason of age. In addition, Principal Project Company agrees to comply with any implementing requirements FTA may issue.
- (e) **Disabilities.** In accordance with section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. § 794, the Americans with Disabilities Act of 1990, as amended, 42 U.S.C. § 12101 et seq., the Architectural Barriers Act of 1968, as amended, 42 U.S.C. § 4151 et seq., and Federal transit law at 49 U.S.C. § 5332, Principal Project Company agrees that it will not discriminate against individuals on the basis of disability. In addition, Principal Project Company agrees to comply with any implementing requirements FTA may issue.
- (f) **Department of Transportation Funding Requirements.** To ensure compliance with requirements applicable to agreements funded in whole or in part by USDOT funds the following requirements shall apply to this Agreement:
  - (i) Principal Project Company and each Contractor shall not discriminate on the basis of race, color, national origin, or sex in the award and performance of this Agreement.
  - (ii) Principal Project Company and each Contractor shall carry out applicable requirements of 49 C.F.R. Part 26, and shall take all necessary and reasonable steps under 49 C.F.R. Part 26 to ensure nondiscrimination in the award and administration of USDOT-assisted Contracts.

- 
- (iii) Failure by Principal Project Company and any of its Contractors to carry out the requirements of this Section 6(f) (Department of Transportation Funding Requirements) is a material breach of this Agreement, which may result in the termination of this Agreement or such other remedy as the City deems appropriate, which may include but which are not limited to: withholding of monthly payments, assessment of sanctions, liquidated damages, and/or disqualifying Principal Project Company from future work as non-responsible.

**7. SPECIAL DEPARTMENT OF LABOR EQUAL EMPLOYMENT OPPORTUNITY  
CLAUSE FOR CONSTRUCTION PROJECTS**

During the performance of this Agreement, Principal Project Company agrees as follows:

- (a) Principal Project Company will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. Principal Project Company will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, sexual orientation, gender identity, or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. Principal Project Company agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.
- (b) Principal Project Company will, in all solicitations or advertisements for employees placed by or on behalf of Principal Project Company, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.
- (c) Principal Project Company will not discharge or in any other manner discriminate against any employee or applicant for employment because such employee or applicant has inquired about, discussed, or disclosed the compensation of the employee or applicant or another employee or applicant. This provision shall not apply to instances in which an employee who has access to the compensation information of other employees or applicants as a part of such employee's essential job functions discloses the compensation of such other employees or applicants to individuals who do not otherwise have access to such information, unless such disclosure is in response to a formal complaint or charge, in furtherance of an investigation, proceeding, hearing, or action, including an investigation conducted by the employer, or is consistent with Principal Project Company's legal duty to furnish information.
- (d) Principal Project Company will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of Principal Project Company's commitments under this section,

and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

- (e) Principal Project Company will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.
- (f) Principal Project Company will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.
- (g) In the event of Principal Project Company's noncompliance with the nondiscrimination clauses of this Agreement or with any of the said rules, regulations, or orders, this Agreement may be canceled, terminated, or suspended in whole or in part and Principal Project Company may be declared ineligible for further government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.
- (h) Principal Project Company will include the portion of the sentence immediately preceding paragraph (a) and the provisions of paragraphs (a) through (h) in every Contract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each Contractor or vendor. Principal Project Company will take such action with respect to any Contract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: *Provided*, however, that in the event Principal Project Company becomes involved in, or is threatened with, litigation with a Contractor or vendor as a result of such direction by the administering agency, Principal Project Company may request the United States to enter into such litigation to protect the interests of the United States.

## 8. DISADVANTAGED BUSINESS ENTERPRISES (DBES)

49 C.F.R. part 26

- (a) **DBE Goals.** City will establish a DBE Program and DBE Program goals for the Project, and will be required to report on DBE participation on a semi-annual basis so that its attainment efforts may be evaluated. Such requirements are in addition to all other equal opportunity employment requirements of this Agreement. Principal Project Company shall comply with the DBE goals that City establishes for the Project and this Agreement.
- (b) **Post-Award Compliance Monitoring.** City will conduct post-award monitoring of Principal Project Company's compliance with the DBE provisions of this

Agreement. Principal Project Company shall cooperate with City requests for assistance with post-award monitoring. Principal Project Company shall maintain records sufficient to document, on an ongoing basis, name of each DBE Contractor, work assignment of each DBE Contractor, DBE commitments, amounts paid to each DBE Contractor during the reporting period, amounts paid to each DBE Contractor as a percentage of the total commitment to each DBE Contractor, etc., among other information. Principal Project Company will be required to submit supplemental reports on a monthly basis including a monthly DBE report and forecast chart showing planned and actual attainment of DBE Contractors.

- (c) **California Unified Certification Program.** Principal Project Company shall only use, and City shall only accept the use of, DBEs that are certified through the California Unified Certification Program.
- (d) **Listed DBEs.** Principal Project Company shall utilize the specific DBEs listed in this Agreement unless Principal Project Company obtains City's written consent to terminate or substitute a DBE Contractor. Unless City's consent is provided, Principal Project Company shall not be entitled to any payment for work or material unless it is performed or supplied by the listed DBE.
- (e) **Access to Records.** City will require Principal Project Company and its Contractors to maintain records and documents of payments to DBEs for three years following the performance of the contract. These records will be made available for inspection upon request by any authorized representative of City or the USDOT. This reporting requirement also extends to any certified DBE Contractor. The authorized representative(s) of City, the USDOT, the Comptroller General of the United States, shall have the right to inspect and audit all data and records of Principal Project Company relating to its performance under this Article 8 (Disadvantaged Business Enterprises (DBEs)).
- (f) **Special Requirements for a Transit Vehicle Manufacturer.** The transit vehicle manufacturer, as a condition of being authorized to bid or propose on FTA-assisted transit vehicle procurements, must certify that it has complied with the requirements of 49 C.F.R. part 26.
- (g) **No Discrimination.** Principal Project Company and its Contractors shall not discriminate on the basis of race, color, national origin, or sex in the performance of this Agreement. Principal Project Company shall carry out applicable requirements of 49 C.F.R. Part 26 in the award and administration of USDOT-assisted contracts. Failure by Principal Project Company to carry out these requirements is a material breach of this Agreement, which may result in the termination of this Agreement or such other remedy as City deems appropriate, which may include, but is not limited to:
  - (i) Withholding monthly progress payments;
  - (ii) Assessing sanction;
  - (iii) Liquidated damages; and/or

- 
- (iv) Disqualifying Principal Project Company from future bidding as non-responsible (49 C.F.R. § 26.13(b)).

## 9. INCORPORATION OF FTA TERMS

This Agreement includes, in part, certain standard terms and conditions required by the USDOT and FTA, whether or not expressly set forth in the preceding contract provisions. All contractual provisions required by the USDOT, as set forth in FTA Circular 4220.1F, dated November 1, 2008, as revised by Rev. 1, dated April 14, 2009, Rev. 2, dated July 1, 2010, Rev. 3, dated February 14, 2011, and Rev. 4, dated March 18, 2013, as may be amended, are hereby incorporated by reference. Principal Project Company shall comply with all applicable FTA regulations, policies, procedures and directives, including those listed directly in or referred to in the current FTA Master Agreement. Anything to the contrary herein notwithstanding, all FTA mandated terms shall be deemed to control in the event of a conflict with other provisions contained in this Agreement. Principal Project Company shall not perform any act, fail to perform any act, or refuse to comply with any City requests which would cause the City to be in violation of FTA terms and conditions. Principal Project Company will include these requirements in all Contracts issued pursuant to this Agreement.

## 10. DEBARMENT AND SUSPENSION

2 C.F.R. part 180  
2 C.F.R. part 1200  
2 C.F.R. § 200.213  
2 C.F.R. part 200 Appendix II (I)  
Executive Order 12549  
Executive Order 12689

Principal Project Company shall comply and facilitate compliance with USDOT regulations, “Non-procurement Suspension and Debarment,” 2 C.F.R. part 1200, which adopts and supplements the U.S. Office of Management and Budget (U.S. OMB) “Guidelines to Agencies on Government wide Debarment and Suspension (Non-procurement),” 2 C.F.R. part 180. These provisions apply to each contract at any tier of \$25,000 or more, and to each contract at any tier for a federally required audit (irrespective of the contract amount), and to each contract at any tier that must be approved by an FTA official irrespective of the contract amount. As such, Principal Project Company shall verify that its principals, Affiliates, and Contractors are eligible to participate in this federally funded contract and are not presently declared by any federal department or agency to be:

- (i) debarred from participation in any federally assisted award;
- (ii) suspended from participation in any federally assisted award;
- (iii) proposed for debarment from participation in any federally assisted award;
- (iv) declared ineligible to participate in any federally assisted award;
- (v) voluntarily excluded from participation in any federally assisted award; or

(vi) disqualified from participation in any federally assisted award.

The certification in this clause is a material representation of fact relied upon by City. If it is later determined by City that Principal Project Company knowingly rendered an erroneous certification, in addition to remedies available to City, the federal government may pursue available remedies, including but not limited to suspension and/or debarment. Principal Project Company agrees to comply with the requirements of 2 C.F.R. part 180, subpart C, as supplemented by 2 C.F.R. part 1200 throughout the period of any contract that may arise from this Agreement or the Project. Principal Project Company further agrees to include a provision requiring such compliance in its lower tier covered transactions and agreements.

## 11. BUY AMERICA

49 U.S.C. 5323(j)  
49 C.F.R. part 661  
Pub. L. No. 117-58, §§ 70901-17

Principal Project Company agrees to comply with 49 U.S.C. 5323(j), 49 C.F.R. part 661 and Pub. L. No. 117-58, §§ 70901-17, which provide that federal funds may not be obligated unless all steel, iron, and manufactured products used in FTA funded projects are produced in the United States and designated construction materials are manufactured in the United States, unless a waiver has been granted by FTA or the product is subject to a general waiver. General waivers are listed in 49 C.F.R. § 661.7. Separate requirements for rolling stock are set out at 49 U.S.C. 5323(j)(2)(C) and 49 C.F.R. § 661.11.

The Buy America requirements flow down from the City to Principal Project Company, which is responsible for ensuring that lower tier Contractors are in compliance.

***In accordance with 49 C.F.R. § 661.6, for the procurement of steel, iron, manufactured products or construction materials, use the certifications below.***

### *Certificate of Compliance with Buy America Requirements*

The bidder or offeror hereby certifies that it will comply with the requirements of 49 U.S.C. 5323(j)(1), the applicable regulations in 49 C.F.R. part 661 and Pub. L. No. 117-58, §§ 70901-17.

**12. RESOLUTION OF DISPUTES, BREACHES, OR OTHER LITIGATION**

See Article 18 (Contract Dispute Procedures) of this Agreement.

---

**13. LOBBYING RESTRICTIONS**

31 U.S.C. § 1352  
2 C.F.R. § 200.450  
2 C.F.R. part 200 appendix II (J)  
49 C.F.R. part 20

Principal Project Company certifies, to the best of its knowledge and belief, that:

- (a) no federally appropriated funds have been paid or will be paid, by or on behalf of Principal Project Company, to any person for influencing or attempting to influence an officer or employee of an agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.
- (b) if any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with this federal contract, grant, loan, or cooperative agreement, Principal Project Company shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.
- (c) Principal Project Company shall require that the language of this certification be included in the award documents for all sub-awards at all tiers (including Contracts, sub-grants, and Subcontracts under grants, loans, and cooperative agreements) and that all sub recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

**14. CLEAN AIR ACT AND CLEAN WATER ACT**

42 U.S.C. §§ 7401 – 7671q  
33 U.S.C. §§ 1251-1387  
2 C.F.R. part 200, Appendix II (G)

The Clean Air and Federal Water Pollution Control Act requirements apply to each contract and subcontract exceeding \$150,000.

Principal Project Company agrees:

- (a) it will not use any violating facilities;

- (b) it will report the use of facilities placed on or likely to be placed on the U.S. EPA “List of Violating Facilities”;
- (c) it will report violations of use of prohibited facilities to the FTA; and
- (d) it will comply with the inspection and other requirements of the Clean Air Act, as amended, (42 U.S.C. §§ 7401 – 7671q) and the Federal Water Pollution Control Act, as amended, (33 U.S.C. §§ 1251-1387).

**15. FLY AMERICA**

49 U.S.C. § 40118  
41 C.F.R. part 301-10  
48 C.F.R. part 47.4

- (a) As used in this clause “international air transportation” means transportation by air between a place in the United States and a place outside the United States or between two places both of which are outside the United States. “United States” means the 50 States, the District of Columbia, and outlying areas. “U.S.-flag air carrier” means an air carrier holding a certificate under 49 U.S.C. Chapter 411.
- (b) When federal funds are used to fund travel, Section 5 of the International Air Transportation Fair Competitive Practices Act of 1974 (49 U.S.C. 40118) (Fly America Act) requires contractors, recipients, and others use U.S.-flag air carriers for U.S. government-financed international air transportation of personnel (and their personal effects) or property, to the extent that service by those carriers is available. It requires the Comptroller General of the United States, in the absence of satisfactory proof of the necessity for foreign-flag air transportation, to disallow expenditures from funds, appropriated or otherwise established for the account of the United States, for international air transportation secured aboard a foreign-flag air carrier if a U.S.-flag air carrier is available to provide such services.
- (c) if available, Principal Project Company, in performing work under this Agreement, shall use U.S.-flag carriers for international air transportation of personnel (and their personal effects) or property.
- (d) In the event that Principal Project Company selects a carrier other than a U.S.-flag air carrier for international air transportation, Principal Project Company shall include a statement on vouchers involving such transportation essentially as follows:

*Statement of Unavailability of U.S.-Flag Air Carriers*

*International air transportation of persons (and their personal effects) or property by U.S.-flag air carrier was not available or it was necessary to use foreign-flag air carrier service for the following reasons. See FAR § 47.403.*

*[State reasons]:* \_\_\_\_\_

*(End of statement)*

- 
- (e) Principal Project Company shall include the substance of this clause, including this paragraph (e), in each Contract or purchase under this Agreement that may involve international air transportation.

## **16. EMPLOYEE PROTECTIONS**

49 U.S.C. § 5333(a)  
40 U.S.C. §§ 3141-3148  
29 C.F.R. part 5  
18 U.S.C. § 847  
29 C.F.R. part 3  
40 U.S.C. §§ 3701-3708  
29 C.F.R. part 1926

### **16.1 PREVAILING WAGE AND COPELAND ANTI-KICKBACK ACT**

For all prime construction, alteration or repair contracts in excess of \$2,000 awarded by FTA, Principal Project Company shall comply with the Davis-Bacon Act and the Copeland “Anti-Kickback” Act. Under 49 U.S.C. § 5333(a), prevailing wage protections apply to laborers and mechanics employed on FTA assisted construction, alteration, or repair projects. Principal Project Company will comply with the Davis-Bacon Act, 40 U.S.C. §§ 3141-3144, and 3146-3148 as supplemented by DOL regulations at 29 C.F.R. part 5, “Labor Standards Provisions Applicable to Contracts Governing Federally Financed and Assisted Construction.” In accordance with the statute, Principal Project Company shall pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, Principal Project Company agrees to pay wages not less than once a week. Principal Project Company shall also comply with the Copeland “Anti-Kickback” Act (40 U.S.C. § 3145), as supplemented by DOL regulations at 29 C.F.R. part 3, “Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in part by Loans or Grants from the United States.” Principal Project Company is prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled.

### **16.2 CONTRACT WORK HOURS AND SAFETY STANDARDS ACT**

For all contracts in excess of \$100,000 that involve the employment of mechanics or laborers, Principal Project Company shall comply with the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 3701-3708), as supplemented by the DOL regulations at 29 C.F.R. part 5. Under 40 U.S.C. § 3702 of the Act, Principal Project Company shall compute the wages of every mechanic and laborer, including watchmen and guards, on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. § 3704 and DOL regulations, “Recording and Reporting Occupational Injuries and Illnesses,” 29 C.F.R. part 1904; “Occupational Safety and Health Standards,” 29 C.F.R. part 1910; and “Safety and Health Regulations for Construction,” 29 C.F.R. part 1926 are applicable to construction work and provide that no laborer or mechanic be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchase of supplies or materials or articles ordinarily available on the open market, or to contracts for transportation or transmission of intelligence.

In the event of any violation of the clause set forth herein, Principal Project Company and any Contractor responsible therefor shall be liable for the unpaid wages. In addition, Principal Project Company and Contractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of this clause in the sum of \$10 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by this clause.

The FTA shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by Principal Project Company or any Contractor under this Agreement or any Contract entered into in furtherance thereof or any other federal contract with Principal Project Company, or any other federally-assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by Principal Project Company, such sums as may be determined to be necessary to satisfy any liabilities of Principal Project Company or any Contractor for unpaid wages and liquidated damages as provided in this section.

Principal Project Company or any Contractor shall insert in any Contracts the clauses set forth in this section and also a clause requiring the Contractors to include these clauses in any lower tier Contracts. Principal Project Company shall be responsible for compliance by any Contractor or lower tier Contractor with the clauses set forth in this Agreement.

#### **Contract Work Hours and Safety Standards for Awards Not Involving Construction**

Principal Project Company shall comply with all federal laws, regulations, and requirements providing wage and hour protections for non-construction employees, in accordance with 40 U.S.C. § 3702, Contract Work Hours and Safety Standards Act, and other relevant parts of that Act, 40 U.S.C. § 3701 *et seq.*, and U.S. DOL regulations, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction (also Labor Standards Provisions Applicable to Non-construction Contracts Subject to the Contract Work Hours and Safety Standards Act)," 29 C.F.R. part 5.

Principal Project Company shall maintain payrolls and basic payroll records during the course of the work and shall preserve them for a period of three (3) years from the completion of this Agreement for all laborers and mechanics, including guards and watchmen, working on this Agreement. Such records shall contain the name and address of each such employee, social security number, correct classifications, hourly rates of wages paid, daily and weekly number of hours worked, deductions made, and actual wages paid.

Such records maintained under this paragraph shall be made available by Principal Project Company for inspection, copying, or transcription by authorized representatives of the FTA and the Department of Labor, and Principal Project Company will permit such representatives to interview employees during working hours on the job.

Principal Project Company shall require the inclusion of the language of this clause within Contracts of all tiers.

### **16.3 AWARDS INVOLVING COMMERCE**

Principal Project Company agrees to comply with the Fair Labor Standards Act (FLSA), 29 U.S.C. § 201 *et seq.* to the extent that the FLSA applies to employees performing work involving commerce, and as the federal government otherwise determines applicable.

### **17. BONDING REQUIREMENTS**

2 C.F.R. 200.326

See Section 10.2 (Performance Security) of this Agreement.

### **18. SEISMIC SAFETY**

42 U.S.C. 7701 *et seq.*

49 C.F.R. part 41

Executive Order (E.O.) 12699

Principal Project Company agrees that any new building or addition to an existing building will be designed and constructed in accordance with the standards for seismic safety required in Department of Transportation (DOT) seismic safety regulations 49 C.F.R. part 41 and will certify to compliance to the extent required by the regulation. Principal Project Company also agrees to ensure that all work performed under this Agreement, including work performed by a Contractor, is in compliance with the standards required by the seismic safety regulations and the certification of compliance issued on the project.

### **19. ENERGY CONSERVATION**

42 U.S.C. 6321 *et seq.*

49 C.F.R. part 622, subpart C

These requirements apply to Principal Project Company and extend to all third-party contractors and their contracts at every tier and sub-recipients and their subcontracts at every tier.

Principal Project Company agrees to comply with mandatory standards and policies relating to energy efficiency, which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act.

### **20. RECYCLED PRODUCTS**

42 U.S.C. § 6962

40 C.F.R. part 247

2 C.F.R. part § 200.322

These requirements apply to Principal Project Company and extend to all third-party contractors and their contracts and subcontracts at every tier where the value of an EPA designated item exceeds \$10,000.

Principal Project Company agrees to provide a preference for those products and services that conserve natural resources, protect the environment, and are energy efficient by complying with

and facilitating compliance with Section 6002 of the Resource Conservation and Recovery Act, as amended, 42 U.S.C. § 6962, and U.S. Environmental Protection Agency (U.S. EPA), “Comprehensive Procurement Guideline for Products Containing Recovered Materials,” 40 C.F.R. part 247.

## 21. ADA ACCESS

Federal Protections for Individuals with Disabilities. The Americans with Disabilities Act of 1990, as amended (ADA), 42 U.S.C. Sections 12101 *et seq.*, prohibits discrimination against qualified individuals with disabilities in programs, activities, and services, and imposes specific requirements on public and private entities. Principal Project Company must comply with its responsibilities under Titles I, II, III, IV, and V of the ADA in employment, public services, public accommodations, telecommunications, and other provisions, many of which are subject to regulations issued by other federal agencies.

## 22. SAFE OPERATION OF MOTOR VEHICLES

23 U.S.C. part 402  
Executive Order No. 13043  
Executive Order No. 13513  
U.S. DOT Order No. 3902.10

The Safe Operation of Motor Vehicles requirements shall apply to Principal Project Company and all Contractors at every tier.

- (a) **Seat Belt Use.** Principal Project Company is encouraged to adopt and promote on-the-job seat belt use policies and programs for its employees and other personnel that operate company-owned vehicles, company-rented vehicles, or personally operated vehicles. The terms “company-owned” and “company-leased” refer to vehicles owned or leased either by Principal Project Company or City.
- (b) **Distracted Driving.** Principal Project Company agrees to adopt and enforce workplace safety policies to decrease crashes caused by distracted drivers, including policies to ban text messaging while using an electronic device supplied by an employer, and driving a vehicle the driver owns or rents, a vehicle Principal Project Company or Contactor owns, leases, or rents, or a privately-owned vehicle when on official business in connection with the work performed under this Agreement.

## 23. ENVIRONMENTAL PROTECTIONS

- (a) **General.** Principal Project Company will comply with all applicable environmental and resource use laws, regulations, and requirements, and follow applicable guidance, now in effect or that may become effective in the future, including state and local laws, ordinances, regulations, and requirements and follow applicable guidance.
- (b) **National Environmental Policy Act.** An award of federal assistance requires the full compliance with applicable environmental laws, regulations, and requirements. Accordingly, Principal Project Company shall:

- 
- (i) comply and facilitate compliance with federal laws, regulations, and requirements, including, but not limited to: (A) federal transit laws, such as 49 U.S.C. § 5323(c)(2), and 23 U.S.C. § 139; (B) the National Environmental Policy Act of 1969 (NEPA), as amended, 42 U.S.C. §§ 4321, et seq., as limited by 42 U.S.C. § 5159, and CEQ's implementing regulations 40 C.F.R. Part 1500 – 1508; (C) Joint FHWA and FTA regulations, "Environmental Impact and Related Procedures," 23 C.F.R. Part 771 and 49 C.F.R. Part 622; (D) Executive Order No. 11514, as amended, "Protection and Enhancement of Environmental Quality," March 5, 1970, 42 U.S.C. § 4321 note (35 Fed. Reg. 4247); and (E) other federal environmental protection laws, regulations, and requirements applicable to City or the Project.
  - (ii) follow the federal guidance identified herein to the extent that the guidance is consistent with applicable authorizing legislation: (A) Joint FHWA and FTA final guidance, "Interim Guidance on MAP-21 Section 1319, Accelerated Decision-making in Environmental Reviews," January 14, 2013; (B) Joint FHWA and FTA final guidance, "SAFETEA-LU Environmental Review Process (Public Law 109-59)," 71 Fed. Reg. 66576, November 15, 2006; and (C) other federal environmental guidance applicable to the Project.
- (c) **Environmental Justice.** Principal Project Company will promote environmental justice by following:
- (i) Executive Order No. 12898, "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations," February 11, 1994, 42 U.S.C. § 4321 note, (59 Fed. Reg. 7629, 3 C.F.R. 1994 Comp., p. 859) as well as facilitating compliance with that Executive Order;
  - (ii) U.S. DOT Order 5610.2(a), "Department of Transportation Updated Environmental Justice Order," 77 Fed. Reg. 27534, November 8, 2012; and
  - (iii) the most recent edition of FTA Circular 4703.1, "Environmental Justice Policy Guidance for Federal Transit Administration Recipients," August 15, 2012, to the extent consistent with applicable federal laws, regulations, requirements, and guidance.
- (d) **Other Environmental Federal Laws.** Principal Project Company will comply or facilitate compliance with all applicable federal laws, regulations, and requirements, and will follow applicable guidance, including, but not limited to, the Clean Air Act, Clean Water Act, Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271-1287), Coastal Zone Management Act of 1972, the Endangered Species Act of 1973, Magnuson Stevens Fishery Conservation and Management Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation, and Liability Act, Executive Order No. 11990 relating to "Protection of Wetlands," and Executive Order No. 11988, as amended, "Floodplain Management."

- 
- (e) **Use of Certain Public Lands.** Principal Project Company will comply with USDOT laws, specifically 49 U.S.C. § 303 (often referred to as “section 4(f)”), and joint FHWA and FTA regulations, “Parks, Recreation Areas, Wildlife and Waterfowl Refuges, and Historic Sites,” 23 C.F.R. Part 774, and referenced in 49 C.F.R. Part 622.
- (f) **Historic Preservation.** Principal Project Company will:
- (i) comply with USDOT laws, including 49 U.S.C. § 303 (often referred to as “section 4(f)”), which requires certain findings be made before an award may be undertaken if it involves the use of any land from a historic site that is on or eligible for inclusion on the National Register of Historic Places;
  - (ii) encourage compliance with the federal historic and archaeological preservation requirements of section 106 of the National Historic Preservation Act, as amended, 54 U.S.C. § 306108;
  - (iii) comply with the Archeological and Historic Preservation Act of 1974, as amended, 54 U.S.C. § 312501, et seq.;
  - (iv) comply with U.S. Advisory Council on Historic Preservation regulations, “Protection of Historic Properties,” 36 C.F.R. Part 800; and
  - (v) comply with federal requirements and follow federal guidance to avoid or mitigate adverse effects on historic properties.
- (g) **Indian Sacred Sites.** Principal Project Company will facilitate compliance with federal efforts to promote the preservation of places and objects of religious importance to American Indians, Eskimos, Aleuts, and Native Hawaiians, and facilitate compliance with the American Indian Religious Freedom Act, 42 U.S.C. § 1996, and Executive Order No. 13007, “Indian Sacred Sites,” May 24, 1996, 42 U.S.C. § 3161 note (61 Fed. Reg. 26771).

## 24. FEDERAL TAX LIABILITY AND RECENT FELONY CONVICTIONS

- (a) **Transactions Prohibited.** Principal Project Company must certify that it:
- (i) does not have any unpaid federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with City responsible for collecting the tax liability; and
  - (ii) was not convicted of the felony criminal violation under any federal law within the preceding 24 months from the Effective Date.
- (b) If Principal Project Company cannot so certify, City agrees to refer the matter to FTA and not to enter into any contract with Principal Project Company without FTA’s written approval. Principal Project Company shall include this requirement in Contracts at all lower tiers, without regard to the value of such Contracts.

---

## 25. NOTIFICATION TO FTA

If a current or prospective legal matter that may affect the federal government emerges, Principal Project Company must notify City, who will promptly notify the FTA Chief Counsel and FTA Regional Counsel for the region in which City is located. Principal Project Company must include a similar notification requirement in its sub-agreements at every tier, for any agreement that is a “covered transaction” according to 2 C.F.R. §§ 180.220 and 1200.220.

- (a) **Types.** The types of legal matters that require notification include, but are not limited to, a major dispute, breach, default, litigation, or naming any federal government as a party to litigation or a legal disagreement in any forum for any reason.
- (b) **Matters.** Matters that may affect any federal government include, but are not limited to, the federal government’s interests in the award, this Agreement, and any amendments thereto, or the any federal government’s administration or enforcement of federal laws, regulations, and requirements.
- (c) **Additional Notice to U.S. DOT Inspector General.** Principal Project Company must notify City, who will promptly notify the USDOT Inspector General in addition to the FTA Chief Counsel or Regional Counsel for the Region in which City is located, if Principal Project Company has knowledge of potential fraud, waste, or abuse occurring on a project receiving assistance from FTA. The notification provision applies if a person has or may have submitted a false claim under the False Claims Act, 31 U.S.C. § 3729, et seq., or has or may have committed a criminal or civil violation of law pertaining to such matters as fraud, conflict of interest, bid rigging, misappropriation or embezzlement, bribery, gratuity, or similar misconduct involving federal assistance. This responsibility occurs whether the Project is subject to any agreement between City and FTA. Knowledge, as used in this paragraph, includes, but is not limited to, knowledge of a criminal or civil investigation by a federal, state, or local law enforcement or other investigative agency, a criminal indictment or civil complaint, or probable cause that could support a criminal indictment, or any other credible information in the possession of Principal Project Company. In this paragraph, “promptly” means to refer information without delay and without change.

## 26. PROHIBITION ON CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE SERVICES OR EQUIPMENT

- (a) Pursuant to section 889 of the National Defense Authorization Act of 2019 (H.R. 5515 at pp. 282-284; Pub. L. 115-232) (NDAA), and as promulgated at 2 C.F.R. § 200.216, Principal Project Company and any Contractor at any tier shall not procure or obtain the Covered Equipment and Services in the performance of work for the Project or in connection with this Agreement.
- (b) “Covered Equipment and Services” is defined to include any telecommunication or video surveillance equipment, systems, or services produced or provided by any of the following entities, or any subsidiary or affiliate of the following entities:
  - (i) Huawei Technologies Company;

- 
- (ii) ZTE Corporation;
  - (iii) Hytera Communications Corporation;
  - (iv) Hangzhou Hikivision Digital Technology Company;
  - (v) Dahua Technology Company; and
  - (vi) any entity that the Secretary of Defense, in consultation with the Director of the National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the government of a covered foreign country.
- (c) The burden of proof for the origin or place of production of telecommunications or video surveillance equipment, systems, or services is the responsibility of Principal Project Company.
  - (d) Prior to the use of any telecommunication or video surveillance equipment, systems, or services pursuant to this Agreement, Principal Project Company shall furnish a certification to City stating that the telecommunication or video surveillance equipment, systems, or services are not Covered Equipment and Services pursuant to this Article 26 (Prohibition on Certain Telecommunications and Video Surveillance Services or Equipment), 2 C.F.R. § 200.216, and the NDAA.

## **27. SENSITIVE SECURITY INFORMATION**

Principal Project Company must protect, and take measures to ensure that its Contractors at each tier protect “sensitive security information” made available during the administration of this Agreement or any Contract to ensure compliance with 49 U.S.C. Section 40119(b) and implementing USDOT regulations, “Protection of Sensitive Security Information,” 49 C.F.R. Part 15, and with 49 U.S.C. Section 114(r) and implementing Department of Homeland Security regulations, “Protection of Sensitive Security Information,” 49 C.F.R. Part 1520.

## **28. FLOOD INSURANCE**

Principal Project Company agree to comply with flood insurance laws and guidance as follows:

- (a) It will have flood insurance as required by the Flood Disaster Protection Act of 1973, 42 U.S.C. § 4012a(a), for any building located in a special flood hazard area (100-year flood zone), before accessing federal assistance to acquire, construct, reconstruct, repair, or improve that building.
- (b) Each such building and its contents will be covered by flood insurance in an amount at least equal to the federal investment (less estimated land cost) or to the maximum limit of coverage made available with respect to the particular type of property under the National Flood Insurance Act of 1968, 42 U.S.C. § 4001, et seq., whichever is less.

- 
- (c) It will follow FTA guidance, except to the extent FTA determines otherwise in writing.

## 29. PROMPT PAYMENT AND RETENTION

- (a) **Payment of Contractors.** Principal Project Company shall pay its Contractors within 30 calendar days from receipt of each payment made to Principal Project Company by City or any Lender. The 30 calendar days is applicable unless a shorter time period controls as provided in Section 9.4 (Prompt Payment to Contractors) of this Agreement. Any delay or postponement of payment over 30 calendar days (or any controlling shorter period) may occur only for good cause and with the prior written approval of City.
- (b) **Retention of Funds.**
  - (i) No standard retention will be withheld by City from payments due to Principal Project Company.
  - (ii) Any retention withheld by Principal Project Company or Contractors from Progress Payments due applicable Contractors shall be promptly paid in full to Contractors within 30 days (or any shorter time period that controls as provided in Section 9.4 (Prompt Payment to Contractors) of this Agreement) after the Contractor's work is satisfactorily completed. Principal Project Company shall assure that each Contract contains a clause obligating Principal Project Company or the applicable Contractor to make prompt and full payment of any retention kept by Principal Project Company or the applicable Contractor to the Subcontractor within such time period. For this purpose, a Contractor's work is satisfactorily completed when all the tasks called for in the Contract have been accomplished and documented as required by City.
- (c) When City has made an incremental acceptance of a portion of the D&C Work, the Work of a Contractor covered by that acceptance is deemed to be satisfactorily completed. These requirements shall not be construed to limit or impair any contractual, administrative, or judicial remedies otherwise available to Principal Project Company or Contractor in the event of a dispute involving late payment or nonpayment by Principal Project Company, deficient Contractor performance, or noncompliance by a Contractor.
- (d) This Section applies to both DBE and non-DBE Contractors.

**EXHIBIT 16B**

**STATE REQUIREMENTS**

Principal Project Company shall perform its obligations under the Contract Documents in accordance with the following requirements.

**1. LABOR CODE REQUIREMENTS**

**1.1 Worker's Compensation**

Principal Project Company shall comply with the provisions of Section 3700 of the California Labor Code which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that Code, and to secure the payment of compensation to his or her employees. Before commencing the Work, Principal Project Company and Contractors will sign and file a certification with City under Labor Code Section 1861 stating the following:

*I am aware of the provisions of Section 3700 of the Labor Code which require every employer to be insured against liability for worker's compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of any work or services under the Agreement, any contract or subcontract.*

**1.2 Prevailing Wages**

Pursuant to the provisions of Section 1773 of the State Labor Code, City has obtained the general prevailing rate of wages (which rate includes employer payments for health and welfare, pension, vacation, travel time and subsistence pay as provided for in Section 1773.8 of said Code, apprenticeship or other training programs authorized by Section 3093 of said Code, and similar purposes) applicable to the Work to be done, for straight time, overtime, Saturday, Sunday, and holiday work. The holiday wage rate listed shall be applicable to all holidays recognized in the collective bargaining agreement of the particular craft, classification or type of worker concerned. Said prevailing wage rates are incorporated herein by reference. These prevailing rates of wages will be furnished to Principal Project Company and other interested parties on request and are on file at City's offices. These wage rates are also available through the California State Department of Industrial Relations at <http://www.dir.ca.gov>. For crafts or classifications not shown on the prevailing wage determinations, Principal Project Company may be required to pay the wage rate of the most closely related craft or classification shown in such determinations for the Work. Principal Project Company shall post a copy of the prevailing wage rates at the jobsite or material staging area. Workers employed in the Work must be paid at the rates at least equal to the prevailing wage rates as adopted. This Agreement is also subject to federal requirements for payment of prevailing wages as determined by the Secretary of Labor. Where there are differences in the rates, the higher shall apply.

**1.3 Hours of Work/Overtime Requirements**

Eight hours labor constitutes a legal day's work. Neither Principal Project Company nor any Contractor shall require or permit any worker to work in excess of eight hours in any one

calendar day or in excess of 40 hours in any one calendar week (defined as seven sequential calendar days) unless such worker receives compensation at a rate not less than one and one-half times the basic rate of pay for all hours worked in excess of eight hours in any one calendar day or in excess of 40 hours in any one calendar week, whichever is greater. Failure to comply with the preceding requirements shall subject Principal Project Company to the penalties specified in Labor Code Section 1813.

#### **1.4 Payroll Records**

- (a) Principal Project Company and each Contractor performing any portion of the Work under this Agreement shall keep an accurate payroll record as required by Law (California Labor Code Section 1776), including showing the name, address, social security number, work classification, straight time and overtime hours for each day and week, and the actual per diem wages paid to each journeyman, apprentice, worker, professional, salaried, or other employee employed by him or her in connection with the Work.
- (b) The payroll records of Principal Project Company and each Contractor (including payroll records for professional or salaried employees) shall be certified and shall be available for inspection at the principal office of Principal Project Company.
- (c) Principal Project Company shall file a certified copy of the payroll records (including those applicable to professional and salaried employees) with City within 10 days after receipt of a written request from City.
- (d) Principal Project Company shall inform City of the location of said payroll records, including the street address, city and county, and shall, within five days, provide a Notice of change of location and address of said payroll records.
- (e) It shall be the responsibility of Principal Project Company to ensure compliance for itself and the Contractors with the provisions of this section.
- (f) In the event of noncompliance with the requirements of this section, Principal Project Company shall have 10 days in which to comply subsequent to receipt of written Notice specifying in what respect it must comply. Should noncompliance exist after the said 10-day period, Principal Project Company shall be subject to a fee of \$50.00 for each day, or portion thereof, for each worker to whom the noncompliance pertains, until strict compliance is effectuated. Principal Project Company acknowledges that, without limitation as to other remedies of enforcement available to City, upon the request of the Division of Apprenticeship Standards or the Division of Labor Standards Enforcement of the California Department of Industrial Relations, such penalties shall be withheld from payments due Principal Project Company.
- (g) Certified payroll records shall be submitted to City by Principal Project Company and all Contractors performing work on the Project regardless of dollar amount or type of contract.
- (h) The period covered shall be from the time Work starts until all Work is completed on the Project. Failure to submit said certified payrolls on time may result in the

withholding of payments to Principal Project Company and the assessment of penalties as set forth in the California Labor Code.

## 1.5 Specific Labor Code Provisions

Principal Project Company's attention is directed to the following requirements of the Labor Code. Principal Project Company shall cause Contractors to insert in any Contracts a copy of each such Code section and shall also cause Subcontractors to include these clauses in any lower tier Subcontracts. Principal Project Company shall be responsible for the compliance by any Contractor or Subcontractor with the clauses set forth in this Section 1.5 (Specific Labor Code Provisions), as may be amended and updated from time to time.

### **Labor Code Section 1725.5**

1725.5. A contractor shall be registered pursuant to this section to be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any public work contract that is subject to the requirements of this chapter. For the purposes of this section, "contractor" includes a subcontractor as defined by Section 1722.1.

(a) To qualify for registration under this section, a contractor shall do all of the following:

(1) (A) Register with the Department of Industrial Relations in the manner prescribed by the department and pay an initial nonrefundable application fee of four hundred dollars (\$400) to qualify for registration under this section and an annual renewal fee on or before July 1 of each year thereafter. The annual renewal fee shall be in a uniform amount set by the Director of Industrial Relations, and the initial registration and renewal fees may be adjusted no more than annually by the director to support the costs specified in Section 1771.3.

(B) Beginning June 1, 2019, a contractor may register or renew according to this subdivision in annual increments up to three years from the date of registration. Contractors who wish to do so will be required to prepay the applicable nonrefundable application or renewal fees to qualify for the number of years for which they wish to preregister.

(2) Provide evidence, disclosures, or releases as are necessary to establish all of the following:

(A) Workers' compensation coverage that meets the requirements of Division 4 (commencing with Section 3200) and includes sufficient coverage for any worker whom the contractor employs to perform work that is subject to prevailing wage requirements other than a contractor who is separately registered under this section. Coverage may be evidenced by a current and valid certificate of workers' compensation insurance or certification of self-insurance required under Section 7125 of the Business and Professions Code.

(B) If applicable, the contractor is licensed in accordance with Chapter 9 (commencing with Section 7000) of the Business and Professions Code.

(C) The contractor does not have any delinquent liability to an employee or the state for any assessment of back wages or related damages, interest, fines, or penalties pursuant to any final judgment, order, or determination by a court or any federal, state, or local administrative agency, including a confirmed arbitration award. However, for purposes of this paragraph, the contractor shall not be disqualified for any judgment, order, or determination that is under appeal, provided that the contractor has secured the payment of any amount eventually found due through a bond or other appropriate means.

(D) The contractor is not currently debarred under Section 1777.1 or under any other federal or state law providing for the debarment of contractors from public works.

(E) The contractor has not bid on a public works contract, been listed in a bid proposal, or engaged in the performance of a contract for public works without being lawfully registered in accordance with this section, within the preceding 12 months or since the effective date of the requirements set forth in subdivision (e), whichever is earlier. If a contractor is found to be in violation of the requirements of this paragraph, the period of disqualification shall be waived if both of the following are true:

(i) The contractor has not previously been found to be in violation of the requirements of this paragraph within the preceding 12 months.

(ii) The contractor pays an additional nonrefundable penalty registration fee of two thousand dollars (\$2,000).

(b) Fees received pursuant to this section shall be deposited in the State Public Works Enforcement Fund established by Section 1771.3 and shall be used only for the purposes specified in that section.

(c) A contractor who fails to pay the renewal fee required under paragraph (1) of subdivision (a) on or before the expiration of any prior period of registration shall be prohibited from bidding on or engaging in the performance of any contract for public work until once again registered pursuant to this section. If the failure to pay the renewal fee was inadvertent, the contractor may renew its registration retroactively by paying an additional nonrefundable penalty renewal fee equal to the amount of the renewal fee within 90 days of the due date of the renewal fee.

(d) If, after a body awarding a contract accepts the contractor's bid or awards the contract, the work covered by the bid or contract is determined to be a public work to which Section 1771 applies, either as the result of a determination by the director pursuant to Section 1773.5 or a court decision, the requirements of this section shall not apply, subject to the following requirements:

(1) The body that awarded the contract failed, in the bid specification or in the contract documents, to identify as a public work that portion of the work that the determination or decision subsequently classifies as a public work.

(2) Within 20 days following service of notice on the awarding body of a determination by the Director of Industrial Relations pursuant to Section 1773.5 or a decision by a court that the contract was for public work as defined in this chapter, the contractor and any

subcontractors are registered under this section or are replaced by a contractor or subcontractors who are registered under this section.

(3) The requirements of this section shall apply prospectively only to any subsequent bid, bid proposal, contract, or work performed after the awarding body is served with of the determination or decision referred to in paragraph (2).

(e) The requirements of this section shall apply to any bid proposal submitted on or after March 1, 2015, to any contract for public work, as defined in this chapter, executed on or after April 1, 2015, and to any work performed under a contract for public work on or after January 1, 2018, regardless of when the contract for public work was executed.

(f) This section does not apply to work performed on a public works project of twenty-five thousand dollars (\$25,000) or less when the project is for construction, alteration, demolition, installation, or repair work or to work performed on a public works project of fifteen thousand dollars (\$15,000) or less when the project is for maintenance work.

#### **Labor Code Section 1735**

1735. A contractor shall not discriminate in the employment of persons upon public works on any basis listed in subdivision (a) of Section 12940 of the Government Code, as those bases are defined in Sections 12926 and 12926.1 of the Government Code, except as otherwise provided in Section 12940 of the Government Code. Every contractor for public works who violates this section is subject to all the penalties imposed for a violation of this chapter.

#### **Labor Code Section 1771**

1771. Except for public works projects of one thousand dollars (\$1,000) or less, not less than the general prevailing rate of per diem wages for work of a similar character in the locality in which the public work is performed, and not less than the general prevailing rate of per diem wages for holiday and overtime work fixed as provided in this chapter, shall be paid to all workers employed on public works.

This section is applicable only to work performed under contract, and is not applicable to work carried out by a public agency with its own forces. This section is applicable to contracts let for maintenance work.

#### **Labor Code Section 1771.1**

1771.1 (a) A contractor or subcontractor shall not be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any contract for public work, as defined in this chapter, unless currently registered and qualified to perform public work pursuant to Section 1725.5. It is not a violation of this section for an unregistered contractor to submit a bid that is authorized by Section 7029.1 of the Business and Professions Code or by Section

10164 or 20103.5 of the Public Contract Code, provided the contractor is registered to perform public work pursuant to Section 1725.5 at the time the contract is awarded.

(b) Notice of the requirement described in subdivision (a) shall be included in all bid invitations and public works contracts, and a bid shall not be accepted nor any contract or subcontract entered into without proof of the contractor or subcontractor's current registration to perform public work pursuant to Section 1725.5.

(c) An inadvertent error in listing a subcontractor who is not registered pursuant to Section 1725.5 in a bid proposal shall not be grounds for filing a bid protest or grounds for considering the bid nonresponsive, provided that any of the following apply:

(1) The subcontractor is registered prior to the bid opening.

(2) Within 24 hours after the bid opening, the subcontractor is registered and has paid the penalty registration fee specified in subparagraph (E) of paragraph (2) of subdivision (a) of Section 1725.5.

(3) The subcontractor is replaced by another registered subcontractor pursuant to Section 4107 of the Public Contract Code.

(d) Failure by a subcontractor to be registered to perform public work as required by subdivision (a) shall be grounds under Section 4107 of the Public Contract Code for the contractor, with the consent of the awarding authority, to substitute a subcontractor who is registered to perform public work pursuant to Section 1725.5 in place of the unregistered subcontractor.

(e) The department shall maintain on its Internet Web site a list of contractors who are currently registered to perform public work pursuant to Section 1725.5.

(f) A contract entered into with any contractor or subcontractor in violation of subdivision (a) shall be subject to cancellation, provided that a contract for public work shall not be unlawful, void, or voidable solely due to the failure of the awarding body, contractor, or any subcontractor to comply with the requirements of Section 1725.5 or this section.

(g) If the Labor Commissioner or his or her designee determines that a contractor or subcontractor engaged in the performance of any public work contract without having been registered in accordance with this section, the contractor or subcontractor shall forfeit, as a civil penalty to the state, one hundred dollars (\$100) for each day of work performed in violation of the registration requirement, not to exceed an aggregate penalty of eight thousand dollars (\$8,000) in addition to any penalty registration fee assessed pursuant to clause (ii) of subparagraph (E) of paragraph (2) of subdivision (a) of Section 1725.5.

(h) (1) In addition to, or in lieu of, any other penalty or sanction authorized pursuant to this chapter, a higher tiered public works contractor or subcontractor who is found to have entered into a subcontract with an unregistered lower tier subcontractor to perform any public work in violation of the requirements of Section 1725.5 or this section shall be subject to forfeiture, as a civil penalty to the state, of one hundred dollars (\$100) for each

day the unregistered lower tier subcontractor performs work in violation of the registration requirement, not to exceed an aggregate penalty of ten thousand dollars (\$10,000).

(2) The Labor Commissioner shall use the same standards specified in subparagraph (A) of paragraph (2) of subdivision (a) of Section 1775 when determining the severity of the violation and what penalty to assess, and may waive the penalty for a first time violation that was unintentional and did not hinder the Labor Commissioner's ability to monitor and enforce compliance with the requirements of this chapter.

(3) A higher tiered public works contractor or subcontractor shall not be liable for penalties assessed pursuant to paragraph (1) if the lower tier subcontractor's performance is in violation of the requirements of Section 1725.5 due to the revocation of a previously approved registration.

(4) A subcontractor shall not be liable for any penalties assessed against a higher tiered public works contractor or subcontractor pursuant to paragraph (1). A higher tiered public works contractor or subcontractor may not require a lower tiered subcontractor to indemnify or otherwise be liable for any penalties pursuant to paragraph (1).

(i) The Labor Commissioner or his or her designee shall issue a civil wage and penalty assessment, in accordance with the provisions of Section 1741, upon determination of penalties pursuant to subdivision (g) and subparagraph (B) of paragraph (1) of subdivision (h). Review of a civil wage and penalty assessment issued under this subdivision may be requested in accordance with the provisions of Section 1742. The regulations of the Director of Industrial Relations, which govern proceedings for review of civil wage and penalty assessments and the withholding of contract payments under Article 1 (commencing with Section 1720) and Article 2 (commencing with Section 1770), shall apply.

(j) (1) Where a contractor or subcontractor engages in the performance of any public work contract without having been registered in violation of the requirements of Section 1725.5 or this section, the Labor Commissioner shall issue and serve a stop order prohibiting the use of the unregistered contractor or the unregistered subcontractor on all public works until the unregistered contractor or unregistered subcontractor is registered. The stop order shall not apply to work by registered contractors or subcontractors on the public work.

(2) A stop order may be personally served upon the contractor or subcontractor by either of the following methods:

(A) Manual delivery of the order to the contractor or subcontractor personally.

(B) Leaving signed copies of the order with the person who is apparently in charge at the site of the public work and by thereafter mailing copies of the order by first class mail, postage prepaid to the contractor or subcontractor at one of the following:

(i) The address of the contractor or subcontractor on file with either the Secretary of State or the Contractors' State License Board.

(ii) If the contractor or subcontractor has no address on file with the Secretary of State or the Contractors' State License Board, the address of the site of the public work.

(3) The stop order shall be effective immediately upon service and shall be subject to appeal by the party contracting with the unregistered contractor or subcontractor, by the unregistered contractor or subcontractor, or both. The appeal, hearing, and any further review of the hearing decision shall be governed by the procedures, time limits, and other requirements specified in subdivision (a) of Section 238.1.

(4) Any employee of an unregistered contractor or subcontractor who is affected by a work stoppage ordered by the commissioner pursuant to this subdivision shall be paid at his or her regular hourly prevailing wage rate by that employer for any hours the employee would have worked but for the work stoppage, not to exceed 10 days.

(k) Failure of a contractor or subcontractor, owner, director, officer, or managing agent of the contractor or subcontractor to observe a stop order issued and served upon him or her pursuant to subdivision (j) is guilty of a misdemeanor punishable by imprisonment in county jail not exceeding 60 days or by a fine not exceeding ten thousand dollars (\$10,000), or both.

(l) This section shall apply to any bid proposal submitted on or after March 1, 2015, and any contract for public work entered into on or after April 1, 2015. This section shall also apply to the performance of any public work, as defined in this chapter, on or after January 1, 2018, regardless of when the contract for public work was entered.

(m) Penalties received pursuant to this section shall be deposited in the State Public Works Enforcement Fund established by Section 1771.3 and shall be used only for the purposes specified in that section.

(n) This section shall not apply to work performed on a public works project of twenty-five thousand dollars (\$25,000) or less when the project is for construction, alteration, demolition, installation, or repair work or to work performed on a public works project of fifteen thousand dollars (\$15,000) or less when the project is for maintenance work.

#### **Labor Code Section 1771.4**

1771.4 (a) All of the following are applicable to all public works projects that are otherwise subject to the requirements of this chapter:

(1) The call for bids and contract documents shall specify that the project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

(2) The awarding body shall post or require the prime contractor to post job site notices, as prescribed by regulation.

(3) Each contractor and subcontractor shall furnish the records specified in Section 1776 directly to the Labor Commissioner, in the following manner:

(A) At least monthly or more frequently if specified in the contract with the awarding body.

(B) In a format prescribed by the Labor Commissioner.

(4) If the contractor or subcontractor is not registered pursuant to Section 1725.5 and is performing work on a project for which registration is not required because of subdivision (f) of Section 1725.5, the unregistered contractor or subcontractor is not required to furnish the records specified in Section 1776 directly to the Labor Commissioner but shall retain the records specified in Section 1776 for at least three years after completion of the work.

(5) The department shall undertake those activities it deems necessary to monitor and enforce compliance with prevailing wage requirements.

(b) The Labor Commissioner may exempt a public works project from compliance with all or part of the requirements of subdivision (a) if either of the following occurs:

(1) The awarding body has enforced an approved labor compliance program, as defined in Section 1771.5, on all public works projects under its authority, except those deemed exempt pursuant to subdivision (a) of Section 1771.5, continuously since December 31, 2011.

(2) The awarding body has entered into a collective bargaining agreement that binds all contractors performing work on the project and that includes a mechanism for resolving disputes about the payment of wages.

(c) The requirements of paragraph (1) of subdivision (a) shall only apply to contracts for public works projects awarded on or after January 1, 2015.

(d) The requirements of paragraph (3) of subdivision (a) shall apply to all contracts for public work, whether new or ongoing, on or after January 1, 2016.

#### **Labor Code Section 1775**

1775. (a) (1) The contractor and any subcontractor under the contractor shall, as a penalty to the state or political subdivision on whose behalf the contract is made or awarded, forfeit not more than two hundred dollars (\$200) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rates as determined by the director for the work or craft in which the worker is employed for any public work done under the contract by the contractor or, except as provided in subdivision (b), by any subcontractor under the contractor.

(2) (A) The amount of the penalty shall be determined by the Labor Commissioner based on consideration of both of the following:

(i) Whether the failure of the contractor or subcontractor to pay the correct rate of per diem wages was a good faith mistake and, if so, the error was promptly and voluntarily corrected when brought to the attention of the contractor or subcontractor.

(ii) Whether the contractor or subcontractor has a prior record of failing to meet its prevailing wage obligations.

(B) (i) The penalty may not be less than forty dollars (\$40) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, unless the failure of the contractor or subcontractor to pay the correct rate of per diem wages was a good faith mistake and, if so, the error was promptly and voluntarily corrected when brought to the attention of the contractor or subcontractor.

(ii) The penalty may not be less than eighty dollars (\$80) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, if the contractor or subcontractor has been assessed penalties within the previous three years for failing to meet its prevailing wage obligations on a separate contract, unless those penalties were subsequently withdrawn or overturned.

(iii) The penalty may not be less than one hundred twenty dollars (\$120) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, if the Labor Commissioner determines that the violation was willful, as defined in subdivision (c) of Section 1777.1.

(C) If the amount due under this section is collected from the contractor or subcontractor, any outstanding wage claim under Chapter 1 (commencing with Section 1720) of Part 7 of Division 2 against that contractor or subcontractor shall be satisfied before applying that amount to the penalty imposed on that contractor or subcontractor pursuant to this section.

(D) The determination of the Labor Commissioner as to the amount of the penalty shall be reviewable only for abuse of discretion.

(E) The difference between the prevailing wage rates and the amount paid to each worker for each calendar day or portion thereof for which each worker was paid less than the prevailing wage rate shall be paid to each worker by the contractor or subcontractor, and the body awarding the contract shall cause to be inserted in the contract a stipulation that this section will be complied with.

(b) If a worker employed by a subcontractor on a public works project is not paid the general prevailing rate of per diem wages by the subcontractor, the prime contractor of the project is not liable for any penalties under subdivision (a) unless the prime contractor had knowledge of that failure of the subcontractor to pay the specified prevailing rate of wages to those workers or unless the prime contractor fails to comply with all of the following requirements:

(1) The contract executed between the contractor and the subcontractor for the performance of work on the public works project shall include a copy of the provisions of Sections 1771, 1776, 1777.5, 1813, and 1815.

(2) The contractor shall monitor the payment of the specified general prevailing rate of per diem wages by the subcontractor to the employees, by periodic review of the certified payroll records of the subcontractor.

(3) Upon becoming aware of the failure of the subcontractor to pay his or her workers the specified prevailing rate of wages, the contractor shall diligently take corrective action to halt or rectify the failure, including, but not limited to, retaining sufficient funds due the subcontractor for work performed on the public works project.

(4) Prior to making final payment to the subcontractor for work performed on the public works project, the contractor shall obtain an affidavit signed under penalty of perjury from the subcontractor that the subcontractor has paid the specified general prevailing rate of per diem wages to his or her employees on the public works project and any amounts due pursuant to Section 1813.

(c) The Division of Labor Standards Enforcement shall notify the contractor on a public works project within 15 days of the receipt by the Division of Labor Standards Enforcement of a complaint of the failure of a subcontractor on that public works project to pay workers the general prevailing rate of per diem wages.

#### **Labor Code Section 1777.5**

1777.5. (a) This chapter does not prevent the employment of properly registered apprentices upon public works.

(b) (1) Every apprentice employed upon public works shall be paid the prevailing rate of per diem wages for apprentices in the trade to which he or she is registered and shall be employed only at the work of the craft or trade to which he or she is registered.

(2) Unless otherwise provided by a collective bargaining agreement, when a contractor requests the dispatch of an apprentice pursuant to this section to perform work on a public works project and requires the apprentice to fill out an application or undergo testing, training, an examination, or other preemployment process as a condition of employment, the apprentice shall be paid for the time spent on the required preemployment activity, including travel time to and from the required activity, if any, at the prevailing rate of per diem wages for apprentices in the trade to which he or she is registered. Unless otherwise provided by a collective bargaining agreement, a contractor is not required to compensate an apprentice for the time spent on preemployment activities if the apprentice is required to take a preemployment drug or alcohol test and he or she fails to pass that test.

(c) Only apprentices, as defined in Section 3077, who are in training under apprenticeship standards that have been approved by the Chief of the Division of Apprenticeship Standards and who are parties to written apprentice agreements under Chapter 4 (commencing with Section 3070) of Division 3 are eligible to be employed at the apprentice wage rate on public works. The employment and training of each apprentice shall be in accordance with either of the following:

(1) The apprenticeship standards and apprentice agreements under which he or she is training.

(2) The rules and regulations of the California Apprenticeship Council.

(d) If the contractor to whom the contract is awarded by the state or any political subdivision, in performing any of the work under the contract, employs workers in any apprenticeable craft or trade, the contractor shall employ apprentices in at least the ratio set forth in this section and may apply to any apprenticeship program in the craft or trade that can provide apprentices to the site of the public work for a certificate approving the contractor under the apprenticeship standards for the employment and training of apprentices in the area or industry affected. However, the decision of the apprenticeship program to approve or deny a certificate shall be subject to review by the Administrator of Apprenticeship. The apprenticeship program or programs, upon approving the contractor, shall arrange for the dispatch of apprentices to the contractor. A contractor covered by an apprenticeship program's standards shall not be required to submit any additional application in order to include additional public works contracts under that program. "Apprenticeable craft or trade," as used in this section, means a craft or trade determined as an apprenticeable occupation in accordance with rules and regulations prescribed by the California Apprenticeship Council. As used in this section, "contractor" includes any subcontractor under a contractor who performs any public works not excluded by subdivision (o).

(e) Before commencing work on a contract for public works, every contractor shall submit contract award information to an applicable apprenticeship program that can supply apprentices to the site of the public work. The information submitted shall include an estimate of journeyman hours to be performed under the contract, the number of apprentices proposed to be employed, and the approximate dates the apprentices would be employed. A copy of this information shall also be submitted to the awarding body, if requested by the awarding body. Within 60 days after concluding work on the contract, each contractor and subcontractor shall submit to the awarding body, if requested, and to the apprenticeship program a verified statement of the journeyman and apprentice hours performed on the contract. The information under this subdivision shall be public. The apprenticeship programs shall retain this information for 12 months.

(f) The apprenticeship program supplying apprentices to the area of the site of the public work shall ensure equal employment and affirmative action in apprenticeship for women and minorities.

(g) The ratio of work performed by apprentices to journeymen employed in a particular craft or trade on the public work may be no higher than the ratio stipulated in the apprenticeship standards under which the apprenticeship program operates if the contractor agrees to be bound by those standards. However, except as otherwise provided in this section, in no case shall the ratio be less than one hour of apprentice work for every five hours of journeyman work.

(h) This ratio of apprentice work to journeyman work shall apply during any day or portion of a day when any journeyman is employed at the jobsite and shall be computed on the basis of the hours worked during the day by journeymen so employed. Any work performed by a journeyman in excess of eight hours per day or 40 hours per week shall not be used to calculate the ratio. The contractor shall employ apprentices for the number of hours computed as above before the end of the contract or, in the case of a subcontractor, before the end of the subcontract. However, the contractor shall endeavor, to the greatest extent possible, to employ apprentices during the same time period that

the journeymen in the same craft or trade are employed at the jobsite. When an hourly apprenticeship ratio is not feasible for a particular craft or trade, the Administrator of Apprenticeship, upon application of an apprenticeship program, may order a minimum ratio of not less than one apprentice for each five journeymen in a craft or trade classification.

(i) A contractor covered by this section who has agreed to be covered by an apprenticeship program's standards upon the issuance of the approval certificate, or who has been previously approved for an apprenticeship program in the craft or trade, shall employ the number of apprentices or the ratio of apprentices to journeymen stipulated in the applicable apprenticeship standards, but in no event less than the 1-to-5 ratio required by subdivision (g).

(j) Upon proper showing by a contractor that he or she employs apprentices in a particular craft or trade in the state on all of his or her contracts on an annual average of not less than one hour of apprentice work for every five hours of labor performed by journeymen, the Administrator of Apprenticeship may grant a certificate exempting the contractor from the 1-to-5 hourly ratio, as set forth in this section for that craft or trade.

(k) An apprenticeship program has the discretion to grant to a participating contractor or contractor association a certificate, which shall be subject to the approval of the Administrator of Apprenticeship, exempting the contractor from the 1-to-5 ratio set forth in this section when it finds that any one of the following conditions is met:

(1) Unemployment for the previous three-month period in the area exceeds an average of 15 percent.

(2) The number of apprentices in training in the area exceeds a ratio of 1 to 5.

(3) There is a showing that the apprenticeable craft or trade is replacing at least one-thirtieth of its journeymen annually through apprenticeship training, either on a statewide basis or on a local basis.

(4) Assignment of an apprentice to any work performed under a public works contract would create a condition that would jeopardize his or her life or the life, safety, or property of fellow employees or the public at large, or the specific task to which the apprentice is to be assigned is of a nature that training cannot be provided by a journeyman.

(l) If an exemption is granted pursuant to subdivision (k) to an organization that represents contractors in a specific trade from the 1-to-5 ratio on a local or statewide basis, the member contractors shall not be required to submit individual applications for approval to local joint apprenticeship committees, if they are already covered by the local apprenticeship standards.

(m) (1) A contractor to whom a contract is awarded, who, in performing any of the work under the contract, employs journeymen or apprentices in any apprenticeable craft or trade shall contribute to the California Apprenticeship Council the same amount that the director determines is the prevailing amount of apprenticeship training contributions in the area of the public works site. A contractor may take as a credit for payments to the council any amounts paid by the contractor to an approved apprenticeship program that can

supply apprentices to the site of the public works project. The contractor may add the amount of the contributions in computing his or her bid for the contract.

(2) At the conclusion of the 2002–03 fiscal year and each fiscal year thereafter, the California Apprenticeship Council shall distribute training contributions received by the council under this subdivision, less the expenses of the Department of Industrial Relations for administering this subdivision, by making grants to approved apprenticeship programs for the purpose of training apprentices. The funds shall be distributed as follows:

(A) If there is an approved multiemployer apprenticeship program serving the same craft or trade and geographic area for which the training contributions were made to the council, a grant to that program shall be made.

(B) If there are two or more approved multiemployer apprenticeship programs serving the same craft or trade and county for which the training contributions were made to the council, the grant shall be divided among those programs based on the number of apprentices from that county registered in each program.

(C) All training contributions not distributed under subparagraphs (A) and (B) shall be used to defray the future expenses of the Department of Industrial Relations for the administration and enforcement of apprenticeship standards and requirements under this code.

(3) All training contributions received pursuant to this subdivision shall be deposited in the Apprenticeship Training Contribution Fund, which is hereby created in the State Treasury. Upon appropriation by the Legislature, all moneys in the Apprenticeship Training Contribution Fund shall be used for the purpose of carrying out this subdivision and to pay the expenses of the Department of Industrial Relations.

(n) The body awarding the contract shall cause to be inserted in the contract stipulations to effectuate this section. The stipulations shall fix the responsibility of compliance with this section for all apprenticeable occupations with the prime contractor.

(o) This section does not apply to contracts of general contractors or to contracts of specialty contractors not bidding for work through a general or prime contractor when the contracts of general contractors or those specialty contractors involve less than thirty thousand dollars (\$30,000).

(p) An awarding body that implements an approved labor compliance program in accordance with subdivision (b) of Section 1771.5 may, with the approval of the director, assist in the enforcement of this section under the terms and conditions prescribed by the director.

### **Labor Code Section 1813**

1813. The contractor or subcontractor shall, as a penalty to the state or political subdivision on whose behalf the contract is made or awarded, forfeit twenty-five dollars (\$25) for each worker employed in the execution of the contract by the respective contractor or subcontractor for each calendar day during which the worker is required or permitted to work more than 8 hours in any one calendar day and 40 hours in any one

calendar week in violation of the provisions of this article. In awarding any contract for public work, the awarding body shall cause to be inserted in the contract a stipulation to this effect. The awarding body shall take cognizance of all violations of this article committed in the course of the execution of the contract, and shall report them to the Division of Labor Standards Enforcement.

### **Labor Code Section 1815**

1815. Notwithstanding the provisions of Sections 1810 to 1814, inclusive, of this code, and notwithstanding any stipulation inserted in any contract pursuant to the requirements of said sections, work performed by employees of contractors in excess of 8 hours per day, and 40 hours during any one week, shall be permitted upon public work upon compensation for all hours worked in excess of 8 hours per day at not less than 11/2 times the basic rate of pay.

## **1.6 Excavation Safety**

Principal Project Company shall comply with Labor Code Section 6705 while excavating. For an excavation five feet or more in depth, submit shop drawings for a protective system.

The drawings must show the design and details for providing worker protection from caving ground during excavation.

Shop drawings of protective systems for which the Construction Safety Orders issued by Cal/OSHA require design by a registered professional engineer must be sealed and signed by an engineer who is registered as a civil engineer in the State.

## **2. PUBLIC CONTRACT CODE REQUIREMENTS**

### **2.1 Ineligible Contractors**

Principal Project Company shall not enter into or permit entering into any Contract with a Contractor who is ineligible to perform work on the Project pursuant to Section 1777.1 or 1777.7 of the Labor Code.

### **2.2 Assignment of Causes of Action**

Principal Project Company's attention is directed to the following requirements in Public Contract Code Section 7103.5:

(b) In entering into a public works contract or a subcontract to supply goods, services, or materials pursuant to a public works contract, the contractor or subcontractor offers and agrees to assign to the awarding body all rights, title, and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 U.S.C. Sec. 15) or under the Cartwright Act (Chapter 2 (commencing with Section 16700) of Part 2 of Division 7 of the Business and Professions Code), arising from purchases of goods, services, or materials pursuant to the public works contract or the subcontract. This assignment shall be made and become effective at

the time the awarding body tenders final payment to the contractor, without further acknowledgment by the parties.

### **2.3 [RESERVED]**

### **2.4 Specifications by Brand or Trade Names**

Principal Project Company's attention is directed to the following requirements in Public Contract Code Section 3400:

(b) No agency of the state, nor any political subdivision, municipal corporation, or district, nor any public officer or person charged with the letting of contracts for the construction, alteration, or repair of public works, shall draft or cause to be drafted specifications for bids, in connection with the construction, alteration, or repair of public works, (1) in a manner that limits the bidding, directly or indirectly, to any one specific concern, or (2) calling for a designated material, product, thing, or service by specific brand or trade name unless the specification is followed by the words "or equal" so that bidders may furnish any equal material, product, thing, or service. In applying this section, the specifying agency shall, if aware of an equal product manufactured in this state, name that product in the specification. Specifications shall provide a period of time prior to or after, or prior to and after, the award of the contract for submission of data substantiating a request for a substitution of "an equal" item. If no time period is specified, data may be submitted any time within 35 days after the award of the contract.

(c) Subdivision (b) is not applicable if the awarding authority, or its designee, makes a finding that is described in the invitation for bids or request for proposals that a particular material, product, thing, or service is designated by specific brand or trade name for any of the following purposes:

(1) In order that a field test or experiment may be made to determine the product's suitability for future use.

(2) In order to match other products in use on a particular public improvement either completed or in the course of completion.

(3) In order to obtain a necessary item that is only available from one source.

(4)(A) In order to respond to an emergency declared by a local agency, but only if the declaration is approved by a four-fifths vote of the governing board of the local agency issuing the invitation for bid or request for proposals.

(B) In order to respond to an emergency declared by the state, a state agency, or political subdivision of the state, but only if the facts setting forth the reasons for the finding of the emergency are contained in the public records of the authority issuing the invitation for bid or request for proposals.

---

### 3. GOVERNMENT CODE REQUIREMENTS

#### 3.1 Removal, Relocation or Protection of Existing Utilities

Principal Project Company acknowledges and agrees that the provisions of Article 14 (Compensation and Other Relief for Delay Events and Relief Events) of this Agreement satisfy City's obligations pursuant to Government Code Section 4215. Principal Project Company agrees that to the extent that Government Code Section 4215 may be construed to the contrary, Principal Project Company hereby waives the benefit of such statute.

#### 3.2 Nondiscrimination and Compliance Employment Programs

Principal Project Company shall comply with, and shall require Contractors to comply with, the provisions of:

- (b) the Fair Employment and Housing Act (Government Code section 12900 et seq.), and the applicable regulations promulgated thereunder (California Code of Regulations, Title 2, section 7285 et seq.); and
- (c) the Fair Employment and Housing Commission regulations implementing Government Code section 12990 (a-f) set forth in Chapter 5 of Division 4 of Title 2 of the California Code of Regulations,

which are incorporated into, and made a part of this Agreement as if set forth in full. Principal Project Company shall require each Contractor to include the compliance requirements under this Section 3.2 (Nondiscrimination and Compliance Employment Programs) in its Contract, and give written Notice of such Contractor's obligations under this Section 3.2 (Nondiscrimination and Compliance Employment Programs) to labor organizations with which it has a collective bargaining or other agreement, as appropriate.

### 4. BUSINESS AND PROFESSIONS CODE

Principal Project Company's attention is directed to the following requirements in Business and Professions Code Sections 7030(a) and 7108.5(a) through (d):

**7030.** (a) Except for contractors writing home improvement contracts pursuant to Section 7151.2 and contractors writing service and repair contracts pursuant to Section 7159.10, every person licensed pursuant to this chapter shall include the following statement in at least 10-point type on all written contracts with respect to which the person is a prime contractor:

"Contractors are required by law to be licensed and regulated by the Contractors' State License Board which has jurisdiction to investigate complaints against contractors if a complaint regarding a patent act or omission is filed within four years of the date of the alleged violation. A complaint regarding a latent act or omission pertaining to structural defects must be filed within 10 years of the date of the alleged violation. Any questions concerning a contractor may be referred to the Registrar, Contractors' State License Board, P.O. Box 26000, Sacramento, CA 95826."

**7108.5** (a) A prime contractor or subcontractor shall pay to any subcontractor, not later than seven days after receipt of each progress payment, unless otherwise agreed to in writing, the

respective amounts allowed the contractor on account of the work performed by the subcontractors, to the extent of each subcontractor's interest therein. In the event that there is a good faith dispute over all or any portion of the amount due on a progress payment from the prime contractor or subcontractor to a subcontractor, the prime contractor or subcontractor may withhold no more than 150 percent of the disputed amount.

(b) Any violation of this section shall constitute a cause for disciplinary action and shall subject the licensee to a penalty, payable to the subcontractor, of 2 percent of the amount due per month for every month that payment is not made.

(c) In any action for the collection of funds wrongfully withheld, the prevailing party shall be entitled to his or her attorney's fees and costs.

(d) The sanctions authorized under this section shall be separate from, and in addition to, all other remedies, either civil, administrative, or criminal.

## **EXHIBIT 16C**

### **CITY REQUIREMENTS**

***[NOTE TO PNC: Local Hire, First Source, and SFMTA Training Program requirements to be added]***

#### **1. CITY REQUIREMENTS**

Principal Project Company has reviewed, understands, and is ready, willing, and able to comply with the terms and conditions of this Exhibit 16C (City Requirements), which summarizes special City requirements as of the Effective Date, each of which is fully incorporated by reference. Principal Project Company acknowledges that City requirements in effect when any Contract Documents are executed will be incorporated into the Contract Documents, as applicable, and will apply to all Contractors, Subcontractors, and any other PPC-Related Entities, as applicable. City requirements of general applicability will apply to the Project even if not summarized below.

The following summary is for Principal Project Company's convenience only; Principal Project Company is obligated to become familiar with all applicable requirements and to comply with them fully as they are amended from time to time. City ordinances are currently available on the web at [www.sfgov.org](http://www.sfgov.org) and at [www.amlegal.com/codes/client/san-francisco\\_ca](http://www.amlegal.com/codes/client/san-francisco_ca). References to specific laws in this Exhibit 16C (City Requirements) refer to the San Francisco Municipal Code unless specified otherwise. Capitalized terms used in this Exhibit 16C (City Requirements) and not defined in this Agreement will have the meanings assigned to them in the applicable Section of the San Francisco Municipal Code.

##### **1.1. Nondiscrimination in City Contracts and Benefits Ordinance.**

(a) Non-Discrimination in Contracts. Principal Project Company shall comply with the provisions of Chapters 12B and 12C of the Administrative Code, which are incorporated into this Agreement by this reference. Principal Project Company shall incorporate by reference in all Contractor Documents the provisions of Sections 12B.2(a), 12B.2(c)-(k), and 12C.3 of the Administrative Code and shall require all PPC-Related Entities to comply with such provisions. Principal Project Company is subject to the enforcement and penalty provisions in Chapters 12B and 12C.

(b) Non-Discrimination in the Provision of Employee Benefits. Principal Project Company does not as of Effective Date, and will not during the Term, in any of its operations in San Francisco, on real property owned by San Francisco, or where work is being performed for City elsewhere in the United States, discriminate in the provision of employee benefits between employees with domestic partners and employees with spouses and/or between the domestic partners and spouses of such employees, subject to the conditions set forth in San Francisco Administrative Code Section 12B.2.

**1.2. Requiring Health Benefits for Covered Employees.** All undefined, initially-capitalized terms used in this Section 1.2 (Requiring Health Benefits for Covered Employees) shall have the meanings given to them in Administrative Code Chapter 12Q (the "HCAO"). If the HCAO applies to this Agreement, Principal Project Company shall comply with the requirements of the HCAO. For each Covered Employee, Principal Project Company shall

---

provide the appropriate health benefit set forth in Section 12Q.3 of the HCAO. If Principal Project Company chooses to offer the health plan option, such health plan shall meet the minimum standards set forth by the San Francisco Health Commission. Information about and the text of the HCAO, as well as the Health Commission's minimum standards, is available on the web at <http://sfgov.org/olse/hcao>. Principal Project Company is subject to the enforcement and penalty provisions in the HCAO. Any Contract entered into by Principal Project Company shall require any PPC-Related Entity with 20 or more employees to comply with the requirements of the HCAO and shall contain contractual obligations substantially the same as those set forth in this Section 1.2 (Requiring Health Benefits for Covered Employees).

**1.3. Minimum Compensation Ordinance.** If San Francisco Administrative Code Chapter 12P applies to this Agreement, Principal Project Company shall pay covered employees no less than the minimum compensation required by San Francisco Administrative Code Chapter 12P ("**Chapter 12P**"), including a minimum hourly gross compensation, compensated time off, and uncompensated time off. Principal Project Company is subject to the enforcement and penalty provisions in Chapter 12P. Information about and the text of the Chapter 12P is available on the web at <http://sfgov.org/olse/mco>. Principal Project Company is required to comply with all of the applicable provisions of Chapter 12P, irrespective of the listing of obligations in this Section 1.3 (Minimum Compensation Ordinance). By signing and executing this Agreement, Principal Project Company certifies that it complies with Chapter 12P.

**1.4. Prevailing Rate of Wages and Working Conditions.**

(a) Covered Services. Principal Project Company agrees it will pay, and require the PPC-Related Entities to pay, the Prevailing Rate of Wages for any Work performed by Principal Project Company or the PPC-Related Entities ("**Covered Services**"), including any trade work for the Project performed by or for Principal Project Company during the Term. The provisions of Section 6.22(e) and 21C of the San Francisco Administrative Code are incorporated as provisions of this Agreement as if fully set forth herein and will apply to any Covered Services performed by Principal Project Company and the PPC-Related Entities.

(b) Determining the Prevailing Rate of Wages. The latest Prevailing Rate of Wages for private employment on public contracts as determined by the San Francisco Board of Supervisors and the Director of the California Department of Industrial Relations, as such prevailing wage rates may be changed during the Term, are hereby incorporated as provisions of this Agreement. Copies of the Prevailing Rate of Wages as fixed and determined by the Board of Supervisors are available from the Office of Labor Standards and Enforcement ("**OLSE**") and on the Internet at <http://www.dir.ca.gov/DLSR/PWD> and <http://sfgov.org/olse/prevailing-wage>. Principal Project Company agrees that it and the PPC-Related Entities will pay no less than the Prevailing Rate of Wages, as fixed and determined by the Board of Supervisors, to all workers who perform Covered Services and are employed by Principal Project Company or the PPC-Related Entities.

(c) Subcontract Requirements. As required by Section 6.22(e)(5) of the San Francisco Administrative Code, Principal Project Company shall require each Contractor to insert in every Subcontract or other arrangement, which it may make for the performance of Covered Services under this Agreement, a provision that said Subcontractor shall pay to all Persons performing labor in connection with Covered Services under said Subcontract or other arrangement not less than the highest general the Prevailing Rate of Wages as fixed and determined by the Board of Supervisors for such labor or services.

---

(d) Posted Notices. As required by Section 1771.4 of the California Labor Code, Principal Project Company shall post job site notices prescribed by the California Department of Industrial Relations (“DIR”) at all job sites where Covered Services are to be performed.

(e) Payroll Records. As required by Section 6.22(e)(6) of the San Francisco Administrative Code and Section 1776 of the California Labor Code, Principal Project Company shall keep or cause to be kept complete and accurate payroll records for all trade workers performing Covered Services. Such records shall include the name, address and social security number of each worker who provided Covered Services on the project, including apprentices, his or her classification, a general description of the services each worker performed each day, the rate of pay (including rates of contributions for, or costs assumed to provide fringe benefits), daily and weekly number of hours worked, deductions made and actual wages paid. Every Contractor and Subcontractor who shall undertake the performance of any part of Covered Services shall keep a like record of each person engaged in the execution of Covered Services under the Contract or Subcontract. All such records shall at all times be available for inspection of and examination by City and its authorized representatives and the DIR.

(f) Certified Payrolls. Certified payrolls shall be prepared pursuant to San Francisco Administrative Code Section 6.22(e)(6) and California Labor Code Section 1776 for the period involved for all employees, including those of Subcontractors, who performed labor in connection with Covered Services. Principal Project Company and each Subcontractor performing Covered Services shall submit certified payrolls to City and to the DIR electronically. Principal Project Company shall submit payrolls to City via the reporting system selected by City. The DIR will specify how to submit certified payrolls to it. City will provide basic training in the use of the reporting system at a scheduled training session. Principal Project Company, all Contractors and all Subcontractors that will perform Covered Services must attend the training session. Principal Project Company, Contractors, and Subcontractors shall comply with electronic certified payroll requirements (including training) at no additional cost to City.

(g) Compliance Monitoring. Covered Services to be performed under this Agreement are subject to compliance monitoring and enforcement of prevailing wage requirements by the DIR and/or the OLSE. Principal Project Company, Contractors and Subcontractors performing Covered Services will cooperate fully with the DIR and/or the OLSE and other City employees and agents authorized to assist in the administration and enforcement of the prevailing wage requirements, and agrees to take the specific steps and actions as required by Section 6.22(e)(7) of the San Francisco Administrative Code. Steps and actions include but are not limited to requirements that: (i) Principal Project Company will cooperate fully with the Labor Standards Enforcement Officer and other City employees and agents authorized to assist in the administration and enforcement of the Prevailing Wage requirements and other labor standards imposed on Principal Project Company by the Charter and Chapter 6 of the San Francisco Administrative Code; (ii) Principal Project Company agrees that the Labor Standards Enforcement Officer and his or her designees, in the performance of their duties, shall have the right to engage in random inspections of job sites and to have access to the employees of Principal Project Company, employee time sheets, inspection logs, payroll records and employee paychecks; (iii) Contractors and Subcontractors shall maintain a sign-in and sign-out sheet showing which employees are present on the job site; (iv) Principal Project Company shall prominently post at each job-site a sign informing employees that the project is subject to the City’s Prevailing Wage requirements and that these requirements are enforced by the Labor Standards Enforcement Officer; and (v) that the Labor Standards Enforcement Officer may audit such records of Principal Project Company as he or she reasonably deems necessary to determine compliance with the Prevailing Wage and other labor standards imposed by the

---

Charter and this Chapter and applicable to this Agreement. Failure to comply with these requirements may result in penalties and forfeitures consistent with analogous provisions of the California Labor Code, including Section 1776(g), as amended from time to time.

(h) **Remedies.** Should Principal Project Company, Contractors or Subcontractors who shall undertake the performance of any Covered Services, fail or neglect to pay to the persons who perform Covered Services under this Agreement, Contracts or Subcontracts or other arrangement for the Covered Services, the general prevailing rate of wages as herein specified, Principal Project Company shall forfeit, and in the case of any Subcontractor so failing or neglecting to pay said wage, Principal Project Company and the Subcontractor shall jointly and severally forfeit, back wages due plus the penalties set forth in San Francisco Administrative Code Section 6.22 (e) and/or California Labor Code Section 1775. City, when certifying any payment, which may become due under the terms of this Agreement, shall deduct from the amount that would otherwise be due on such payment the amount of said forfeiture.

**1.5. Prohibition on Use of Public Funds for Political Activity.** In performing the Work, Principal Project Company shall comply with San Francisco Administrative Code Chapter 12G, which prohibits funds appropriated by City for this Agreement from being expended to participate in, support, or attempt to influence any political campaign for a candidate or for a ballot measure. Principal Project Company is subject to the enforcement and penalty provisions in Chapter 12G.

**1.6. Consideration of Salary History.** Principal Project Company shall comply with San Francisco Administrative Code Chapter 12K, the Consideration of Salary History Ordinance or “Pay Parity Act.” Principal Project Company is prohibited from considering current or past salary of an applicant in determining whether to hire the applicant or what salary to offer the applicant to the extent that such applicant is applying for employment to be performed on this Agreement or in furtherance of this Agreement, and whose application, in whole or part, will be solicited, received, processed or considered, whether or not through an interview, in City or on City property. The ordinance also prohibits employers from (1) asking such applicants about their current or past salary or (2) disclosing a current or former employee’s salary history without that employee’s authorization unless the salary history is publicly available. Principal Project Company is subject to the enforcement and penalty provisions in Chapter 12K. Information about and the text of Chapter 12K is available on the web at <https://sfgov.org/olse/consideration-salary-history>. Principal Project Company is required to comply with all of the applicable provisions of 12K, irrespective of the listing of obligations in this Section 1.6 (Consideration of Salary History).

**1.7. Consideration of Criminal History in Hiring and Employment Decisions.**

(a) Principal Project Company agrees to comply fully with and be bound by all of the provisions of Chapter 12T, “City Contractor/Subcontractor Consideration of Criminal History in Hiring and Employment Decisions,” of the San Francisco Administrative Code (“**Chapter 12T**”), including the remedies provided, and implementing regulations, as may be amended from time to time. The provisions of Chapter 12T are incorporated by reference and made a part of this Agreement as though fully set forth herein. The text of the Chapter 12T is available on the web at <http://sfgov.org/olse/fco>. Principal Project Company is required to comply with all of the applicable provisions of 12T, irrespective of the listing of obligations in this Section 1.7 (Consideration of Criminal History in Hiring and Employment Decisions). Capitalized terms used in this Section 1.7 (Consideration of Criminal History in Hiring and Employment

Decisions.) and not defined in this Agreement shall have the meanings assigned to such terms in Chapter 12T.

(b) The requirements of Chapter 12T shall only apply to a Principal Project Company's or its Agent's operations to the extent those operations are in furtherance of the performance of this Agreement, shall apply only to applicants and employees who would be or are performing work in furtherance of this Agreement, and shall apply when the physical location of the employment or prospective employment of an individual is wholly or substantially within the City of San Francisco. Chapter 12T shall not apply when the application in a particular context would conflict with federal or state law or with a requirement of a government agency implementing federal or state law.

**1.8. Resource Efficiency Requirements.** The Project will be subject to Chapter 7 of the San Francisco Environment Code. Accordingly, the Project must meet certain resource efficient requirements. Principal Project Company agrees that it will design the Project to comply with Chapter 7 of the San Francisco Environment Code, as may be amended from time to time, or any similar law.

**1.9. MacBride Principles Northern Ireland.** City urges companies doing business in Northern Ireland to move towards resolving employment inequities, and encourages such companies to abide by the MacBride Principles. City urges San Francisco companies to do business with corporations that abide by the MacBride Principles.

**1.10. Notification of Limitations on Contributions.** Principal Project Company acknowledges its obligations under Section 1.126 of the San Francisco Campaign and Governmental Conduct Code, which prohibits any person who contracts with, or is seeking a contract with, any department of City for the rendition of personal services, for the furnishing of any material, supplies or equipment, for the sale or lease of any land or building, for a grant, loan or loan guarantee, or for a development agreement, from making any campaign contribution to (i) a City elected official if the contract must be approved by that official, a board on which that official serves, or the board of a state agency on which an appointee of that official serves, (ii) a candidate for that City elective office, or (iii) a committee controlled by such elected official or a candidate for that office, at any time from the submission of a proposal for the contract until the later of either the termination of negotiations for such contract or twelve months after the date City approves the contract. The prohibition on contributions applies to (a) each prospective party to the contract, (b) each member of the contractor's board of directors, the contractor's chairperson, chief executive officer, chief financial officer and chief operating officer, (c) any person with an ownership interest of more than ten percent (10%) in the contractor, (d) any Subcontractor listed in the bid or contract, and (e) any committee that is sponsored or controlled by the contractor. Principal Project Company certifies that it has informed each such person of the limitation on contributions imposed by Section 1.126 by the time it submitted the Implementation Proposal, and has provided the names of the persons required to be informed to City.

**1.11. Sunshine Ordinance.** Principal Project Company acknowledges that the Contract Documents and all records related to its formation, Principal Project Company's performance of Work, and City's payment are subject to the California Public Records Act, (California Government Code § 6250 et. seq.), and the San Francisco Sunshine Ordinance, (San Francisco Administrative Code Chapter 67). Such records are subject to public inspection and copying unless exempt from disclosure under federal, state or local law.

**1.12. Conflicts of Interest.** Principal Project Company acknowledges that it is familiar with the provisions of San Francisco Charter, Article III, Chapter 2, Section 15.103 of the City's Campaign and Governmental Conduct Code, and California Government Code Sections 87100 *et seq.* and Sections 1090 *et seq.*, certifies that it does not know of any facts that would constitute a violation of these provisions, and agrees that if Principal Project Company becomes aware of any such fact during the Term, Principal Project Company will provide Notice to City immediately.

**1.13. Certification of Funds.** This Agreement is subject to the fiscal provisions of the City's Charter and the budget decisions of its Mayor and Board of Supervisors, each acting in its sole discretion. No funds will be available hereunder until prior written authorization certified by the City's Controller. The City's Controller cannot authorize payments unless funds have been certified as available in the budget or in a supplemental appropriation. City's obligations hereunder shall never exceed the amount certified by the City's Controller for the purpose and period stated in such certification. City, its employees and officers are not authorized to offer or promise any additional funding without City's Controller certification of such additional funding. Without such lawful approval and certification, City shall not be required to provide such additional funding.

**1.14. Art Commission Design Review; Art Enrichment Allocation.** The Facility will be subject to the requirements of San Francisco Charter Section 5.103 and Administrative Code Section 3.19. Principal Project Company must work with the San Francisco Arts Commission, in consultation with the City, to design and build the Facility in compliance with those requirements.

**1.15. Tropical Hardwoods and Virgin Redwood Ban.** City urges companies not to import, purchase, obtain, or use for any purpose, any tropical hardwood, tropical hardwood wood product, virgin redwood, or virgin redwood wood product, except as expressly permitted by the application of San Francisco Environment Code sections 802(b) and 803(b). Principal Project Company will not, except as permitted by the application of sections 802(b) and 803(b), use or incorporate any tropical hardwood, tropical hardwood wood product, virgin redwood, or virgin redwood wood product in the performance of this Agreement.

**1.16. City Business and Tax Regulations Code.** Principal Project Company acknowledges that under Section 6.10-2 of the San Francisco Business and Tax Regulations Code, the City Treasurer and Tax Collector may require the withholding of payments to any vendor that is delinquent in the payment of any amounts that the vendor is required to pay the City under the San Francisco Business and Tax Regulations Code. If, under that authority, any payment City is required to make to Principal Project Company under this Agreement is withheld, then City will not be in breach or default under this Agreement, and the Treasurer and Tax Collector will authorize release of any payments withheld under this paragraph to Principal Project Company, without interest, late fees, penalties, or other charges, upon Principal Project Company coming back into compliance with its San Francisco Business and Tax Regulations Code obligations.

**1.17. Contracting Requirements.** The following City requirements are incorporated into this Agreement and apply to the Principal Project Company, Contractors and Subcontractors, together with any other applicable City contract requirements that are in effect on the Effective Date.

(a) Tobacco and Alcohol Products Advertising Ban. Principal Project Company acknowledges and agrees that no advertising of cigarettes, tobacco products, or

alcoholic beverages is allowed on any real property owned by or under the control of City. This prohibition includes the placement of the name of a company producing, selling or distributing cigarettes, tobacco products, or alcoholic beverages or the name of any cigarette, tobacco product, or alcoholic beverages in any promotion of any event or product. This prohibition does not apply to any advertisement sponsored by a state, local, nonprofit, or other entity designed to: (a) communicate the health hazards of cigarettes and tobacco products or alcoholic beverages; (b) encourage people not to smoke or to stop smoking, or not to drink alcohol or to stop drinking alcohol; or (c) provide or publicize drug or alcohol treatment or rehabilitation services.

**(b) Alcohol and Drug-Free Workplace.** City reserves the right to deny access to, or require Principal Project Company to remove any PPC-Related Entities from City facilities if City has reasonable grounds to believe that person has engaged in alcohol abuse or illegal drug activity which in any way impairs City's ability to maintain safe work facilities or to protect the health and well-being of City employees and the general public. City shall have the right of final approval for the entry or re-entry of any that person previously denied access to, or removed from, City facilities. Illegal drug activity means possessing, furnishing, selling, offering, purchasing, using or being under the influence of illegal drugs or other controlled substances for which the person lacks a valid prescription. Alcohol abuse means possessing, furnishing, selling, offering, or using alcoholic beverages, or being under the influence of alcohol.

**(c) Drug-Free Workplace.** Principal Project Company acknowledges that pursuant to the Federal Drug-Free Workplace Act of 1988 (41 U.S.C. §§ 8101 et seq.), the unlawful manufacture, distribution, possession or use of a controlled substance is prohibited on City property.

**(d) Food Service Waste Reduction Ordinance.** Principal Project Company agrees to comply fully with and be bound by the Food Service Waste Reduction Ordinance (San Francisco Environment Code Chapter 16), including but not limited to the remedies for noncompliance provided therein.

**(e) Sugar Sweetened Beverages and Packaged Water.** Principal Project Company agrees that it will not sell, provide, or otherwise distribute Sugar-Sweetened Beverages, as defined by San Francisco Administrative Code Chapter 101, as part of its performance of this Agreement. Principal Project Company agrees that it shall not sell, provide, or otherwise distribute Packaged Water, as defined by San Francisco Environment Code Chapter 24, as part of its performance of this Agreement.

**1.18. Preservative Treated Wood Products.** Principal Project Company shall comply with the provisions of San Francisco Environment Code Chapter 13, which requires that anyone purchasing preservative-treated wood products on behalf of the City, shall only purchase such products from the list of alternatives adopted by the Department of the Environment pursuant to Section 1302 of Chapter 13, unless otherwise granted an exemption by the terms of that Chapter.

**1.19. SFMTA Surveillance Technology Policy.** Principal Project Company must comply with the SFMTA's Surveillance Technology Policy, adopted under San Francisco Administrative Code Chapter 19B. A copy of the SFMTA's Surveillance Technology Policy is attached as Exhibit 16D (SFMTA's Surveillance Technology Policy).

**1.20. Clean Construction.** Principal Project Company agrees to comply fully with and be bound by the Clean Construction requirements set forth in Section 6.25 of the San

San Francisco Administrative Code and Chapter 25 of the Environment Code. The provisions of Section 6.25 and Chapter 25 are incorporated into this Agreement by reference. Principal Project Company may seek waivers from the Clean Construction requirements as set forth in Chapter 25 of the Environment Code. By entering into this Agreement, Principal Project Company and City agree that if Principal Project Company uses off-road equipment and/or off-road engines in violation of the Clean Construction requirements set forth in Section 6.25 of the Administrative Code and Chapter 25 of the Environment Code, the City will suffer actual damages that will be impractical or extremely difficult to determine. Accordingly, Principal Project Company and the City agree that Principal Project Company shall pay the City the amount of \$100 per day per each piece of off-road equipment and each off-road engine used to complete work on the Project in violation of the Clean Construction requirements. Such amount shall not be considered a penalty, but rather agreed monetary damages sustained by City because of Principal Project Company's failure to comply with the Clean Construction requirements.

**1.21. Compliance with Americans with Disabilities Act.** Principal Project Company shall provide the Work in a manner that complies with the Americans with Disabilities Act (ADA), including but not limited to Title II's program access requirements, and all other applicable federal, state and local disability rights legislation.

**1.22. Government Code Claim Requirement.** No suit for money or damages may be brought against the City until a written claim therefor has been presented to and rejected by the City in conformity with the provisions of San Francisco Administrative Code Chapter 10 and California Government Code Section 900, et seq. Nothing set forth in this Agreement shall operate to toll, waive or excuse Contractor's compliance with the California Government Code Claim requirements set forth in San Francisco Administrative Code Chapter 10 and California Government Code Section 900, et seq.

**1.23. Restrictions on Use of Pesticides.** Chapter 3 of the San Francisco Environment Code (the Integrated Pest Management Program Ordinance or "IPM Ordinance") describes an integrated pest management ("IPM") policy to be implemented by all City departments. PCC-Related Entities shall not use or apply or allow the use or application of any pesticides on the Project Site or contract with any party to provide pest abatement or control services to the Project Site without first receiving City's written approval of an IPM plan. PCC-Related Entities will comply, and will require all of PCC-Related Entities' contractors to comply, with any IPM plan approved by the City and will comply with the requirements of sections 300(d), 302, 304, 305(f), 305(g), and 306 of the IPM Ordinance, as if PCC-Related Entities were a City department.

**1.24. All-Gender Toilet Facilities.** If applicable, PCC-Related Entities will comply with San Francisco Administrative Code Section 4.1-3 requiring at least one all-gender toilet facility in any new building constructed on City-owned land or that is constructed by or for the City where toilet facilities are required or provided. An "all-gender toilet facility" means a toilet that is not restricted to use by persons of a specific sex or gender identity by means of signage, design, or the installation of fixtures.

**EXHIBIT 17**

**SECTION 3.6 INVOICE**

Reference is made to that certain Design-Build-Finance-Operate-Maintain Agreement dated as of [\_\_\_\_], 2025 (the “**Agreement**”), by and between the City and County of San Francisco (“**City**”), a municipal corporation acting by and through the San Francisco Municipal Transportation Agency (“**SFMTA**”), and [\_\_\_\_] (“**Principal Project Company**”).

Capitalized terms used but not defined herein have the meaning given to them in this Agreement.

Pursuant to Section 3.6 of this Agreement, Principal Project Company hereby requests payment of [\_\_\_\_] U.S. dollars (\$[\_\_\_\_]), based on the following: (a) this Agreement has been terminated under Section 3.6.1 or Section 3.6.2 of this Agreement; (b) this invoice is submitted within 30 days of the termination; and (c) Principal Project Company has submitted to City all work product produced by Principal Project Company related to the Project, as required in Section 3.6.5 of this Agreement.

Principal Project Company represents and warrants to City that: (a) Principal Project Company is eligible for payment pursuant to Section 3.6 of this Agreement; and (b) Principal Project Company has attached documentation reasonably required by City sufficient to support such statement.

Principal Project Company acknowledges that: (a) such payment is the exclusive compensation payable by City to Principal Project Company under this Agreement for a termination under Section 3.6.1 or Section 3.6.2 of this Agreement; and (b) submission of this invoice, and payment by City of any amount in response to this invoice, is in all respects subject to the terms and conditions of this Agreement.

**EXHIBIT 5B**

**FORM OF DIRECT AGREEMENT**

**THIS DIRECT AGREEMENT** dated as of [\_\_\_\_], 2025 (“**Direct Agreement**”) among the City and County of San Francisco (“**City**”), a municipal corporation, acting by and through the San Francisco Municipal Transportation Agency (“**SFMTA**”), [\_\_\_\_\_] (“**Principal Project Company or PPC**”), a [\_\_\_\_\_] and [\_\_\_\_], as trustee or collateral agent (in such capacity, together with its successors in such capacity, the “**Collateral Agent**”) for the Lenders (as defined in the IF DBFOM Agreement).

**WHEREAS**

(A) On November 2, 2022, City and Potrero Neighborhood Collective LLC, a limited liability company organized under the laws of the State of Delaware, entered into a Predevelopment Agreement for the Potrero Yard Modernization Project (the “**Predevelopment Agreement**”), which is comprised of a transit operations component (“**Bus Yard Component**”), a mixed-income housing and commercial component (“**Housing and Commercial Component**”), and the common infrastructure shared by the two components (“**Common Infrastructure**”),

(B) Following the processes described in the Predevelopment Agreement, City and Principal Project Company entered into an Infrastructure Facility Design-Build-Finance-Operate-Maintain Agreement dated as of [\_\_\_\_], 2025 (the “**IF DBFOM Agreement**”) for the Bus Yard Component and Common Infrastructure (collectively, the “**Infrastructure Facility**”), and the integration of the Infrastructure Facility, and its interface with, the Housing and Commercial Component (together, the “**Project**”). The IF DBFOM Agreement contemplates Principal Project Company obtaining financing or Refinancing for the Project from third parties. The Housing and Commercial Component will be delivered by [\_\_\_\_], under separate agreements,

(C) In order to enable Principal Project Company to finance certain activities and certain obligations with respect to the Project, the Lenders have agreed to make available debt facilities, on the terms set out in the Financing Agreements and Security Documents, for the purpose of financing the Project, subject to provision of certain assurances from City regarding Lender’s and Collateral Agent’s rights in the event of an Event of Default or PPC Default,

(D) In reliance on such assurances, and on this Direct Agreement, Lenders have agreed to make available such financing or Refinancing facilities for the purpose of financing or Refinancing all or part of the Project, and

(E) The execution of this Direct Agreement by City in favor of the Collateral Agent is a condition precedent to such financing or Refinancing facilities being made available to Principal Project Company by Lender.

**NOW, THEREFORE**, in consideration of the foregoing and the mutual terms and covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged by the parties, each of City, Principal Project Company and Collateral Agent hereby agree as follows:

---

## 1. DEFINITIONS AND INTERPRETATION

### 1.1 Definitions

Capitalized terms used but not otherwise defined in this Direct Agreement and references used but not construed in this Direct Agreement have the respective meanings and constructions assigned to such terms in the IF DBFOM Agreement. In addition, the following terms have the meanings specified below:

**City** has the meaning given to it in the Preamble.

**City Notice** has the meaning given to it in Section 5.1.

**Collateral Agent** has the meaning given to it in the Preamble.

**Control Agreement** means the Control Agreement, dated as of the date hereof, by and among Principal Project Company, City and Custodian, with respect to the Handback Requirements Reserve Account.

**Cure Period** means the period starting on the date of the receipt of the City Notice and ending on the earlier of:

- (a) the Step-in Date; and
- (b) 90 days after the expiration of any cure periods provided to Principal Project Company under the IF DBFOM Agreement, provided that:
  - (i) if the Collateral Agent provides a Notice of Intent to City within 30 days of the date of the receipt of the City Notice indicating that the Lenders' intend to proceed to cure the PPC Default(s) or to exercise step-in rights, then the Cure Period will end on the earlier of the Step-in Date and 120 days after the expiration of any cure periods provided to Principal Project Company under the IF DBFOM Agreement; and
  - (ii) if the Collateral Agent is prohibited from curing any non-monetary default or from substituting Principal Project Company with the Substituted Entity by any process, stay or injunction issued by any Governmental Entity or pursuant to any bankruptcy or insolvency proceeding or other similar proceeding involving Principal Project Company, then the time period specified herein for curing a default shall be extended for the period of such prohibition.

**Custodian** means [\_\_\_\_], as custodian under the Control Agreement.

**Default** means an Event of Default as defined in any Financing Agreement or any event or circumstance specified in any Financing Agreement which would (with the expiration of a grace period, the giving of notice, the lapse of time, the making of any determination under the Financing Documents or any combination of any of the foregoing) be an Event of Default.

**Direct Agreement** has the meaning given to it in the Preamble.

**Discharge Date** means the date on which all of the obligations of Principal Project Company under the Financing Documents have been irrevocably discharged in full to the satisfaction of the Collateral Agent.

**Event of Default** means an Event of Default as defined in any Financing Agreement.

**IF DBFOM Agreement** has the meaning given to it in the Recitals.

**Lender Notice** has the meaning given to it in Section 7.1.

**Notice of Intent** has the meaning given to it in Section 5.4.

**Predevelopment Agreement** has the meaning given to it in the Recitals.

**Principal Project Company** or **PPC** has the meaning given to it in the Preamble.

**Project** has the meaning given to it in the Recitals.

**Property** means any right or interest in or to property of any kind whatsoever, whether real, personal or mixed and whether tangible or intangible.

**Revival Date** has the meaning given to it in Section 14.1.

**Step-in Date** has the meaning given to it in Section 10.1.

**Step-in Notice** has the meaning given to it in Section 9.1.

**Step-in Party** has the meaning given to it in Section 9.2.

**Step-in Period** means the period from and including the Step-in Date until the earliest of:

- (a) the Substitution Effective Date;
- (b) the Step-out Date;
- (c) the date of termination of the IF DBFOM Agreement by City in accordance with this Direct Agreement and the IF DBFOM Agreement;
- (d) the date of the expiration or early termination of the Term under the IF DBFOM Agreement;
- (e) 12 calendar months after the Step-in Date; and
- (f) the Long Stop Date,

provided, however, that if the Collateral Agent is prohibited from curing any nonmonetary default after the Step-in Date or from substituting Principal Project Company with the Substituted Entity by any process, stay or injunction issued by any Governmental Entity or pursuant to any bankruptcy or insolvency proceeding or other similar proceeding involving Principal Project Company, then the time periods specified herein for curing a default shall be extended for the period of such prohibition.

---

**Step-out Date** means the date upon which the notice period set forth in any Step-out Notice expires.

**Step-out Notice** has the meaning given to it in Section 11 (Step-out).

**Substitute Accession Agreement** means the agreement to be entered into by a Substituted Entity pursuant to Section 13.1.

**Substituted Entity** means any Person selected by Lenders and approved by City in accordance with Section 12 (Substitution Entities and Substitution Proposals) to perform all or a portion of Principal Project Company's obligations and succeed to all or a portion of Principal Project Company's rights under the Contract Documents.

**Substitution Effective Date** has the meaning given to it in Section 13.1.

**Substitution Notice** has the meaning given to it in Section 12.2.

## 1.2 Interpretation

Unless the context otherwise clearly requires:

- (a) The definitions of terms herein shall apply equally to the singular and plural forms of the terms defined;
- (b) Whenever the context may require, any pronoun shall include the corresponding masculine, feminine and neuter forms;
- (c) The words "include", "includes" and "including" shall be deemed to be followed by the phrase "without limitation";
- (d) The word "will" shall be construed to have the same meaning and effect as the word "shall";
- (e) Any definition of or reference to any agreement, instrument or other document herein shall be construed as referring to such agreement, instrument or other document as from time to time amended, supplemented or otherwise modified (subject to any restrictions on such amendments, supplements or modifications set forth herein);
- (f) Any reference herein to any Person, or to any Person in a specified capacity, shall be construed to include such Person's successors and assigns or such Person's successors in such capacity, as the case may be;
- (g) The words "herein", "hereof" and "hereunder", and words of similar import, shall be construed to refer to this Direct Agreement in its entirety and not to any particular provision hereof;
- (h) All references herein to Sections and Schedules shall be construed to refer to Sections of and Schedules to this Direct Agreement. Any Schedules to this Direct Agreement are an integral part hereof. The provisions of this Direct Agreement

---

shall prevail over the provisions of any Schedules to the extent of any inconsistency;

- (i) The headings used in this Direct Agreement are for convenience of reference only and are not to affect the construction of or to be taken into consideration in interpreting this Direct Agreement; and
- (j) “Winding-up”, “liquidation”, “dissolution”, “insolvency”, “adjustment” or “reorganization” of a Person and references to the “liquidator”, “assignee”, “administrator”, “receiver”, “custodian”, “conservator”, “sequestrator” or “trustee” of a Person shall be construed so as to include any equivalent or analogous proceedings or, as the case may be, insolvency representatives or officers under the law of the jurisdiction in which such Person is incorporated, organized or constituted or any jurisdiction in which such Person or, as the case may be, insolvency representative or officer carries on business including the seeking of winding up, liquidation, dissolution, reorganization, administration, arrangement, adjustment or relief of debtors.

## 2. REPRESENTATIONS AND WARRANTIES

### 2.1 City represents and warrants that:

- (a) **Organization; Power and Authority.** City is a charter city and municipal corporation duly organized and validly existing under the Constitution of the State of California. City has full power, right and authority to execute and deliver this Direct Agreement and the IF DBFOM Agreement; and City has full power, right and authority to perform its obligations under the provisions hereof and thereof.
- (b) **Authorizations, Enforceability.** This Direct Agreement and the IF DBFOM Agreement have been duly authorized by City, and this Direct Agreement and the IF DBFOM Agreement constitute legal, valid and binding obligations of City, enforceable against City in accordance with their terms, except as such enforceability may be limited by (i) applicable bankruptcy, insolvency, reorganization, moratorium or other similar laws affecting the enforcement of creditors’ rights generally and (ii) general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law).
- (c) **No Default.** As of the date of the execution of this Direct Agreement, there is no City Default. City is not aware of any PPC Default, and there exists no event or condition of which City has Actual Knowledge that would, with the giving of notice or passage of time or both, constitute such a PPC Default or City Default.

### 2.2 Principal Project Company represents and warrants that:

- (a) **Organization; Power and Authority.** Principal Project Company is a [\_\_\_\_], duly organized and validly existing under the laws of [\_\_\_\_] and has the requisite power and all required licenses to carry on its present and proposed activities, and has full power, right and authority to execute and deliver this Direct Agreement and the IF DBFOM Agreement; and

---

Principal Project Company has the power and authority to perform the provisions hereof and thereof.

- (b) **Authorizations, Enforceability.** This Direct Agreement and the IF DBFOM Agreement have been duly authorized by Principal Project Company, and this Direct Agreement and the IF DBFOM Agreement constitute legal, valid, and binding obligations of Principal Project Company, enforceable against Principal Project Company in accordance with their terms, except as such enforceability may be limited by (i) applicable bankruptcy, insolvency, reorganization, moratorium, or other similar laws affecting the enforcement of creditors' rights generally; and (ii) general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law).

**2.3** The Collateral Agent represents and warrants that:

- (a) **Organization; Power and Authority.** The Collateral Agent is a [\_\_\_\_\_], duly organized and validly existing under the laws of [\_\_\_\_\_] and has the requisite power and all required licenses to carry on its present and proposed activities, and has full power, right and authority to execute and deliver this Direct Agreement and to perform each and all of the obligations of the Collateral Agent provided for under this Direct Agreement.
- (b) **Authorizations, Enforceability.** This Direct Agreement has been duly authorized by the Collateral Agent, and this Direct Agreement constitutes a legal, valid and binding obligation of the Collateral Agent, enforceable against the Collateral Agent in accordance with its terms, except as such enforceability may be limited by (i) applicable bankruptcy, insolvency, reorganization, moratorium or other similar laws affecting the enforcement of creditors' rights generally and (ii) general principles of equity (regardless of whether such enforceability is considered in a proceeding in equity or at law). The Collateral Agent is duly authorized by the Lenders to enter into this Direct Agreement on behalf of the Lenders and to validly bind the Lenders to the terms and conditions hereof.

**3. CONDITIONS AND LIMITATIONS RESPECTING LENDERS' RIGHTS**

**3.1** No Lender shall be entitled to the rights, benefits and protections of this Direct Agreement unless and until City has received a copy (certified as true and correct by the Collateral Agent) of the Financing Agreements and Security Documents bearing, if applicable, the date and instrument number or book and page of recordation or filing thereof, including a copy of a specimen bond, note or other obligation (certified as true and correct by the Collateral Agent) secured by such Security Document, together with written notice of the address of the Collateral Agent to which notices may be sent. In the event of an assignment of any such Financing Agreement (excluding any instrument described under subsection (b) of the definition of Financing Agreement) or Security Document, such assignment shall not be subject to the terms of this Direct Agreement unless and until City has received prior written notice and a certified copy thereof, which copy shall, if required to be recorded, bear the date and instrument number or book and page of recordation thereof, together with written notice of the assignee thereof to which notices may be sent. In the event of any change in the identity of the Collateral Agent, such change shall not be binding upon City unless and until City has received a written

notice thereof signed by the replaced and substitute Collateral Agent and setting forth the address of the substitute Collateral Agent to which notices may be sent.

**3.2** Neither the Collateral Agent nor the Lenders shall exercise any right it may have pursuant to any Financing Documents to assign, transfer or otherwise dispose of any right, title or interest it may have in, or obligations it may have pursuant to, the Financing Documents to the extent the exercise of such rights would constitute a Refinancing and Principal Project Company has failed to comply with the requirements of Section 4.4 (Refinancing) of the IF DBFOM Agreement.

**3.3** No Security Document or other instrument purporting to mortgage, pledge, encumber, or create a lien, charge or security interest on or against PPC's Interest shall extend to or affect the fee simple interest of City in the Project or the Site or improvements thereto or City's rights or interests under the Contract Documents.

**3.4** City shall not have any obligation to any Lender pursuant to the IF DBFOM Agreement, except for the express obligations to Lenders set forth in this Direct Agreement or any other instrument or agreement signed by City in favor of such Lender or Collateral Agent, provided that the Collateral Agent has notified City of the existence of its Security Documents.

**3.5** Each Financing Agreement and Security Document shall require that the Collateral Agent deliver to City, concurrently with delivery to Principal Project Company or any other Person, any notice of default or notice of election or enforcement of remedies, including an election to sell or foreclose, notice of sale or foreclosure or other notice required by Law or by the Security Document in connection with the exercise of remedies under the Financing Agreement or Security Document.

**3.6** No Financing Documents shall grant to the Lender any right to apply funds in the Handback Requirements Reserve Account or to apply proceeds from any Handback Requirements Letter of Credit to the repayment of Project Debt, to any other obligation owing the Lender or to any other use except the uses set forth in Section 8.7.3 (Use of Handback Requirements Reserve Account) of the IF DBFOM Agreement, and any provision purporting to grant such right shall be null and void; provided, however, that the foregoing shall not preclude any Lender or Substituted Entity from, following foreclosure or transfer in lieu of foreclosure, automatically succeeding to all rights, claims and interests of Principal Project Company in and to the Handback Requirements Reserve Account.

#### **4. AGREEMENTS, CONSENT TO SECURITY AND SUBORDINATION OF SECURITY**

**4.1** City acknowledges notice and receipt of copies of the Initial Financing Documents and Initial Security Documents. Notwithstanding anything in the IF DBFOM Agreement to the contrary, but subject to Section 3 (Conditions and Limitations Respecting Lenders' Rights), City:

- (a) consents to (i) the assignment by Principal Project Company to the Collateral Agent of all of PPC's Interest, and (ii) the granting by each Equity Member to the Collateral Agent of a security interest in such Equity Member's equity interest in Principal Project Company, in each case pursuant to the terms and provisions of the applicable Initial Security Documents; and

- (b) agrees that such collateral assignment and grant of security interests in and first lien over all of the PPC's Interest pursuant to the Initial Security Documents and the grant of the security interest by each Equity Member in its equity interests in Principal Project Company pursuant to such Security Documents, and the execution by Principal Project Company and City of this Direct Agreement and the performance of their respective obligations hereunder, in each case, does not (i) constitute a PPC Default or any other breach by Principal Project Company of the Contract Documents, (ii) with the giving of notice or lapse of time, or both, constitute a PPC Default or any other breach by Principal Project Company of the IF DBFOM Agreement, or (iii) require the consent of City except as provided herein.

**4.2** Except as expressly contemplated in the IF DBFOM Agreement as of the Effective Date thereof, while any Security Document is in effect, no agreement between City and Principal Project Company for the modification or amendment of the IF DBFOM Agreement that in any way could reasonably be expected to have a material adverse effect on the rights or interests of the Lender(s) shall be binding on the Lender(s) under such Security Document without the Collateral Agent's consent.

**4.3** As long as any Project Debt secured by any Security Document shall remain outstanding, City shall promptly provide the Collateral Agent with a copy of any notice it sends to Principal Project Company concerning an actual or potential PPC Default.

**4.4** Except as set forth in this Direct Agreement, City shall not be precluded from or delayed in exercising any remedies, including termination of the IF DBFOM Agreement due to the accumulation of Noncompliance Points during the Step-in Period and City's rights to cure PPC Default at Principal Project Company's expense; provided, however, City shall not be entitled to exercise its right of termination due to Noncompliance Points accumulated prior to such step in.

**4.5** Neither City nor any officer, employee, agent or representative of City shall have any liability whatsoever for payment of the principal sum of any Project Debt, any other obligations issued or incurred by Principal Project Company or a PPC-Related Entity in connection with the IF DBFOM Agreement or the Project, or any interest accrued thereon or any other sum secured by or accruing under any Financing Document. Except for a violation by City of its express obligations to Lenders under this Direct Agreement, no Lender is entitled to seek any damages or other amounts from City, whether for Project Debt or any other amount. City's review of any Financing Documents or other Project financing documents is not a guarantee or endorsement of the Project Debt, any other obligations issued or incurred by Principal Project Company or a PPC-Related Entity in connection with the IF DBFOM Agreement or the Project, and is not a representation, warranty or other assurance as to the ability of Principal Project Company or a PPC-Related Entity to perform its obligations with respect to the Project Debt or any other obligations issued or incurred by Principal Project Company or a PPC-Related Entity in connection with the IF DBFOM Agreement or the Project, or as to the adequacy of the Payments to provide for payment of the Project Debt or any other obligations issued or incurred by Principal Project Company in connection with the IF DBFOM Agreement or the Project. The foregoing does not affect City's liability to Principal Project Company under Article 17 (Termination) of the IF DBFOM Agreement for Termination Compensation that is measured in whole or in part by outstanding Project Debt.

---

**4.6** The Collateral Agent consents to the grant of security by Principal Project Company to City of a first priority security interest in the Handback Requirements Reserve Account (or in any Handback Requirements Letter of Credit delivered by Principal Project Company in accordance with Section 8.7.5 (Handback Requirements Letters of Credit) of the IF DBFOM Agreement in lieu of establishing a Handback Requirements Reserve Account).

**5. CITY NOTICE OF TERMINATION AND EXERCISE OF REMEDIES; LENDER NOTICE OF INTENT**

**5.1** City shall give the Collateral Agent written notice (a “**City Notice**”):

- (a) promptly upon obtaining Actual Knowledge of the occurrence of any event giving rise to a PPC Default, City’s right to terminate or give notice terminating the IF DBFOM Agreement pursuant to Section 17.3.1 (PPC Defaults Triggering City Termination Rights) of the IF DBFOM Agreement, or exercise any rights under Sections 16.2.4 (Remedies for Failure to Meet Safety Standards or Perform Safety Compliance), 16.2.5 (City Step-in Rights) or 16.2.7.1 of the IF DBFOM Agreement; or
- (b) promptly upon obtaining Actual Knowledge of the occurrence of any event giving rise to City’s right to suspend its performance (including in connection with any insolvency or bankruptcy proceeding in relation to Principal Project Company) under the IF DBFOM Agreement.

**5.2** A City Notice shall specify:

- (a) the unperformed obligations of Principal Project Company under the IF DBFOM Agreement and grounds for termination of, or suspension of performance or the other rights all as referred to in Sections 17.3.1 (PPC Defaults Triggering City Termination Rights), 16.2.4 (Remedies for Failure to Meet Safety Standards or Perform Safety Compliance), 16.2.5 (City Step-in Rights) or 16.2.7.1 under the IF DBFOM Agreement, in detail sufficient to enable the Collateral Agent to assess the scope and amount of any liability of Principal Project Company resulting therefrom;
- (b) any other unperformed obligations of Principal Project Company of which City obtains Actual Knowledge as of the date of such City Notice;
- (c) all amounts due and payable by Principal Project Company to City under the IF DBFOM Agreement on or before the date of such City Notice and which remain unpaid at such date and the nature of Principal Project Company’s obligation to pay such amounts; and
- (d) the amount of Principal Project Company’s payment obligation to City that City reasonably foresees will arise during the applicable Cure Period.

**5.3** City shall update its City Notice to reflect unperformed obligations of Principal Project Company under the IF DBFOM Agreement that have been identified or that have arisen and amounts payable by Principal Project Company to City that become due, in each case, after the date of the City Notice but prior to the proposed Step-in Date.

**5.4** Within 30 days of the date of receipt of the City Notice, the Collateral Agent shall provide City with notice, via written correspondence and email, of the intent of the Lenders' and shall indicate in such notice whether the Lenders' intend to proceed to cure the PPC Default(s) or to exercise step-in rights (a "**Notice of Intent**"). The hardcopy Notice of Intent shall be sent to City via certified or registered mail, return receipt requested.

## **6. PROCEEDS ACCOUNT**

Subject to the Collateral Agent directing otherwise in accordance with this Direct Agreement, Principal Project Company irrevocably directs City to remit all amounts due and owing to Principal Project Company under the IF DBFOM Agreement directly to the Proceeds Account.

## **7. LENDER NOTICE**

**7.1** The Collateral Agent shall give City notice (a "**Lender Notice**") via written correspondence and email, with a hardcopy and electronic copy to Principal Project Company, promptly upon becoming aware of the occurrence of any Default or Event of Default (whether or not a City Notice has been served relating to the same event). The hardcopy Lender Notice shall be sent to City via certified or registered mail, return receipt requested.

**7.2** The Collateral Agent shall specify in any Lender Notice the circumstances and nature of the Default or Event of Default to which Lender Notice relates.

**7.3** Unless directed otherwise by the Collateral Agent pursuant to Section 7.4, City shall, following receipt of a Lender Notice of the occurrence of any Event of Default and until further notice from the Collateral Agent pursuant to Section 7.8, continue to make any payments required to be made by City to Principal Project Company under the IF DBFOM Agreement, including any payment of any termination sum calculated in accordance with Article 17 (Termination) of the IF DBFOM Agreement, to the Proceeds Account.

**7.4** The Collateral Agent may direct City to make the payments described in Section 7.3 to an alternate account designated by the Collateral Agent by providing written notice to City specifying the following information with respect to the account: (a) account details and wiring instructions; and (b) the name, title, mailing address, telephone number, fax number, and email address of the individual responsible for administering the account. City shall have no liability, whatsoever, for any delay in processing any payment request pursuant to this Section 7.4, provided that such delay does not extend 20 days beyond the date of City's certified, return-receipt or registered mail receipt of the Lender Notice.

**7.5** All sums paid as provided in Sections 7.3 and 7.4 shall be deemed paid to Principal Project Company under the IF DBFOM Agreement and shall constitute a complete discharge of City's relevant payment obligations to Principal Project Company.

**7.6** The Collateral Agent shall promptly notify City via written correspondence and email of any decision to accelerate amounts outstanding under the Financing Documents or to exercise any enforcement remedies under the Financing Documents.

**7.7** Neither the Collateral Agent nor the Lender shall exercise any right it may have pursuant to the Security Documents to assign, transfer or otherwise dispose of any right, title or interest it may have in, or obligations it may have pursuant to, the Security Documents to the extent the

---

exercise of such rights would constitute a Refinancing and Principal Project Company has failed to comply with the requirements of Section 4.4 (Refinancing) of the IF DBFOM Agreement.

**7.8** The Collateral Agent shall promptly notify City via written correspondence and email, with a hardcopy and electronic copy to Principal Project Company, of a full cure of an Event of Default that is the subject of a Lender Notice.

**7.9** Following receipt of a Lender Notice of the occurrence of an Event of Default until delivery of a further notice under Section 7.8 with respect to any full cure of such Event of Default, the Collateral Agent shall have the right to deliver to City a Step-in Notice as provided in Section 9 (Step-in Notice).

## **8. NO TERMINATION DURING CURE PERIOD**

**8.1** City agrees not to take any of the following actions prior to the expiration of any applicable Cure Period:

- (a) terminate or give notice terminating the IF DBFOM Agreement or exercise any rights under Sections 10.4 (Letters of Credit), 10.5 (Guarantees), 16.2.4 (Remedies for Failure to Meet Safety Standards or Perform Safety Compliance), 16.2.5 (City Step-in Rights), 16.2.7 (Performance Bond), 16.2.8 (Suspension of Work), 16.2.9 (Other Rights and Remedies) or 17.3.1 (PPC Defaults Triggering City Termination Rights) of the IF DBFOM Agreement or in respect of the IFM Contract or D&C Contract;
- (b) suspend its performance (including with respect to (i) payments required to be made to Principal Project Company to the Proceeds Account or to an alternate account designated by the Collateral Agent in accordance with Section 7.4, or (ii) any insolvency or bankruptcy proceeding in relation to Principal Project Company) under the IF DBFOM Agreement; and
- (c) take or support any action for the liquidation, bankruptcy, administration, receivership, reorganization, dissolution or winding up of Principal Project Company or for the composition or readjustment of Principal Project Company's debts, or any similar insolvency procedure in relation to Principal Project Company, or for the appointment of a receiver, trustee, custodian, sequestrator, conservator, liquidator, administrator or similar official for Principal Project Company or for any part of Principal Project Company's property;

provided that such agreement of City shall not prevent City from taking actions which are permitted under this Direct Agreement on a Revival Date in respect of any other prior PPC Default or other breach by Principal Project Company of the IF DBFOM Agreement which has occurred and has not been remedied or waived.

**8.2** During any Cure Period, without giving a Step-in Notice, the Collateral Agent shall have the right (but shall have no obligation), at its sole option and discretion, to perform or arrange for the performance of any act, duty, or obligation required of Principal Project Company under the IF DBFOM Agreement, or to cure any default of Principal Project Company thereunder, which performance by the Collateral Agent shall be accepted by City in lieu of performance by Principal Project Company and in satisfaction of Principal Project Company's obligations under

the IF DBFOM Agreement. To the extent that any default of Principal Project Company under the IF DBFOM Agreement is cured and/or any payment liabilities or performance obligations of Principal Project Company are performed by the Collateral Agent during the Cure Period, such action shall discharge the relevant liabilities or obligations of Principal Project Company to City. Subject to the terms of this Direct Agreement, the Collateral Agent's right to cure any default of Principal Project Company as provided in this Section 8.2 may be exercised after the expiration of relevant cure period granted to Principal Project Company in Section 16.1.2 (Default Notice and Cure Periods) of the IF DBFOM Agreement, provided that the cure occurs within the Cure Period. Curing of any PPC Default by the Collateral Agent shall not be construed as an assumption by the Collateral Agent of any obligations, covenants or agreements of Principal Project Company under the Contract Documents, except to the extent the Collateral Agent has exercised step-in rights or proposed a Substitute Entity and otherwise as set forth in this Direct Agreement.

## **9. STEP-IN NOTICE**

**9.1** Upon the issuance of a City Notice or a Lender Notice of the occurrence of any Event of Default, the Collateral Agent may give a written notice (a "**Step-in Notice**") under this Section 9 (Step-in Notice) to City at any time during the Cure Period in the case of the issuance of a City Notice or at any time following the receipt by City of a Lender Notice, provided that the Event of Default to which Lender Notice relates is continuing.

**9.2** The Collateral Agent shall nominate, in the Step-in Notice: (a) the Collateral Agent, a Lender or any of their respective Affiliates; or (b) any Person, subject to approval by City in accordance with Section 12 (Substitution Entities and Substitution Proposals), and the person so nominated being referred to as the "**Step-in Party**."

## **10. RIGHTS AND OBLIGATIONS ON STEP-IN**

**10.1** On and from the date of the receipt of the Step-in Notice and the approval of City to the appointment of the Step-in Party if required by Section 9.2 (the "**Step-in Date**") and during the Step-in Period, the Step-in Party shall be:

- (a) entitled to exercise and enjoy the rights and powers expressed to be assumed by or granted to Principal Project Company under the IF DBFOM Agreement and this Direct Agreement;
- (b) entitled to exercise and enjoy the rights and powers expressed to be assumed by or granted to a Step-in Party under this Direct Agreement; and
- (c) liable for the performance of all of Principal Project Company's obligations under the IF DBFOM Agreement and this Direct Agreement arising on or after the Step-in Date.

**10.2** Without prejudice to Section 14 (Revival of Remedies), during the Step-in Period, City shall:

- (a) not terminate or give notice terminating the IF DBFOM Agreement or exercise any rights under Sections 10.4 (Letters of Credit), 10.5 (Guarantees), 16.2.4 (Remedies for Failure to Meet Safety Standards or Perform Safety Compliance),

---

16.2.5 (City Step-in Rights), 16.2.7 (Performance Bond), 16.2.8 (Suspension of Work), 16.2.9 (Other Rights and Remedies), or 17.3.1 (PPC Defaults Triggering City Termination Rights) of the IF DBFOM Agreement or in respect of the IFM Contract or D&C Contract, unless the grounds for termination or giving notice of termination pursuant to Section 17.3.1 (PPC Defaults Triggering City Termination Rights) of the IF DBFOM Agreement or exercising its rights under the above listed sections of the IF DBFOM Agreement are failure by the Step-in Party to perform Principal Project Company's obligations under the IF DBFOM Agreement;

- (b) not suspend its performance (including in connection with any insolvency or bankruptcy proceeding in relation to Principal Project Company) under the IF DBFOM Agreement, unless the grounds for suspension of performance are failure by the Step-in Party to perform Principal Project Company's obligations under the IF DBFOM Agreement;
- (c) not take or support any action for the liquidation, bankruptcy, administration, receivership, reorganization, dissolution or winding up of Principal Project Company or for the composition or readjustment of Principal Project Company's debts, or any similar insolvency procedure in relation to Principal Project Company, or for the appointment of a receiver, trustee, custodian, sequestrator, conservator, liquidator, administrator or similar official for Principal Project Company or for any part of Principal Project Company's property;
- (d) continue to make payments required to be made to Principal Project Company under the IF DBFOM Agreement to the Proceeds Account or to an alternate account designated by the Collateral Agent in accordance with Section 7.4; and
- (e) endorse or pay over, as directed by the Collateral Agent, any checks received by City with respect to, or funds drawn by City under, the Performance Bond; provided that the Collateral Agent reimburses City for any Losses incurred by City in attempting to cure the PPC Default as and to the extent: (i) City is entitled to such reimbursement pursuant to the IF DBFOM Agreement; (ii) City has promptly notified the Collateral Agent of such Losses at or prior to the time of endorsement or payment and (iii) the Collateral Agent's obligation to reimburse City for such Losses does not exceed the proceeds from any such security.

**10.3** City shall owe its obligations under the IF DBFOM Agreement and this Direct Agreement to Principal Project Company and the Step-in Party jointly; provided that:

- (a) the receipt of, or performance by City in favor of, either such Step-in Party or Principal Project Company shall be a good and effective discharge of City's obligations under this Direct Agreement and the IF DBFOM Agreement;
- (b) the Collateral Agent shall be entitled at any time by notice in writing to City to direct (such direction being binding on the Collateral Agent, City and Principal Project Company) that, at all times during the Step-in Period, the Step-in Party shall be solely entitled to make any decisions, to give any directions, approvals or consents, to receive any payments or otherwise to deal with City under the IF DBFOM Agreement and this Direct Agreement; and

- 
- (c) any amount due from Principal Project Company to City under the IF DBFOM Agreement or this Direct Agreement as of the Step-in Date and notified to such Step-in Party prior to the Step-in Date shall be paid to City on the Step-in Date, failing which City shall be entitled to exercise its rights under the IF DBFOM Agreement in respect of the amount so due and unpaid.

**10.4** Principal Project Company shall not be relieved from any of its obligations under the IF DBFOM Agreement or this Direct Agreement, whether arising before or after the Step-in Date, by reason of the Step-in Party exercising the rights provided herein, except to the extent provided in Section 8.2 and Section 11 (Step-out).

## **11. STEP-OUT**

A Step-in Party may, at any time, by giving not less than 30 days' prior written notice ("**Step-out Notice**") to City terminate its obligations to City under this Direct Agreement, in which event such Step-in Party shall be released from all obligations under this Direct Agreement, except for any obligation or liability of the Step-in Party arising during the Step-in Period. The obligations of City to the Step-in Party under this Direct Agreement shall also terminate on the Step-Out Date. Notwithstanding the foregoing, this Direct Agreement shall continue to remain effective according to its terms after the Step-Out Date if the Step-in Party is the Collateral Agent or a Lender.

## **12. SUBSTITUTION ENTITIES AND SUBSTITUTION PROPOSALS**

**12.1** Any payment to be made or action to be taken by the Collateral Agent as a prerequisite to keeping the IF DBFOM Agreement in effect shall be deemed properly to have been made or taken by the Collateral Agent if such payment is made or action is taken by a Substituted Entity proposed by the Collateral Agent and reasonably approved by City. City shall have no obligation to recognize any claim to PPC's Interest by any person or entity that has acquired PPC's Interest by, through, or under any Security Document or whose acquisition shall have been derived immediately from any holder thereof, unless such person or entity is a Substituted Entity reasonably approved by City in accordance with this Section 12 (Substitution Entities and Substitution Proposals).

**12.2** The Collateral Agent may give a notice ("**Substitution Notice**") under this Section 12 (Substitution Entities and Substitution Proposals) in writing to City at any time:

- (a) during any Cure Period;
- (b) during any Step-in Period; or
- (c) after delivery of a Lender Notice of the occurrence of any Event of Default and prior to delivery by the Collateral Agent to City of a further notice under Section 7.9.

**12.3** In any Substitution Notice, the Collateral Agent shall notify City that it intends to designate a Substituted Entity.

**12.4** The Collateral Agent shall, as soon as practicable, provide to City the information regarding the proposed Substituted Entity and any third party entering into a material

---

subcontract with such Substituted Entity as required by this Section 12 (Substitution Entities and Substitution Proposals), including:

- (a) the name and address of the proposed Substituted Entity;
- (b) the names of the proposed Substituted Entity's shareholders or members and the share capital or partnership or membership interests, as the case may be, held by each of them;
- (c) the manner in which the proposed Substituted Entity will be financed and the extent to which such financing is committed;
- (d) copies of the proposed Substituted Entity's most recent financial statements (and if available such financial statements shall be for the last three financial years) or in the case of a newly-formed special purpose company its opening balance sheet;
- (e) a copy of the proposed Substituted Entity's formation documents;
- (f) details of the resources available to the proposed Substituted Entity and the proposed Substituted Entity's appropriate qualifications, experience and technical competence available to the proposed Substituted Entity to enable it to perform the obligations of Principal Project Company under the IF DBFOM Agreement;
- (g) the names of the proposed Substituted Entity's directors and any key personnel who will have responsibility for the day-to-day management of its participation in the Project;
- (h) a rectification plan providing details of the plan to rectify Principal Project Company's breaches with respect to the breaches which are capable of being rectified by the Substituted Entity;
- (i) such other information, evidence and supporting documentation concerning the identity, financial resources, pre-qualifications, experience and potential conflicts of interest of the proposed Substituted Entity and its contractors as City may reasonably request; and
- (j) such evidence of organization, authority, incumbency certificates, certificates regarding debarment or suspension, and other certificates, representations and warranties as City may reasonably request.

**12.5** City will approve or disapprove a proposed Substituted Entity within 45 days after it confirms receipt from the Collateral Agent of a request for approval together with the information required under Section 12.4. City will evaluate the financial resources, qualifications, experience and potential conflicts of interest of the proposed Substituted Entity and its contractors using the same standards and criteria that it is then currently applying, or if there is no current application, then the same standards and criteria it most recently applied, to the evaluation of Persons responding to City's requests for qualifications for concession or similar agreements for comparable projects and facilities.

---

**12.6** City shall have no obligation to approve the proposed Substituted Entity:

- (a) unless the Collateral Agent demonstrates to City's reasonable satisfaction that:
  - (i) the proposed Substituted Entity and its contractors collectively have the financial resources, qualifications and experience to timely perform Principal Project Company's obligations under the Contract Documents and Key Contracts to which Principal Project Company is a party; (ii) the proposed Substituted Entity and its contractors, each of their respective direct and indirect beneficial owners, any proposed key personnel, each of their respective officers and directors and each of their respective affiliates have a good and sound background and reputation (including the absence of criminal, civil or regulatory claims or actions against any such Person, and each such Person's adherence to Good Industry Practice, contract terms and applicable standards regarding past or present performance on comparable projects); and (iii) the proposed Substituted Entity and its contractors are in compliance with City's rules, regulations and adopted written policies regarding pre-qualification and organizational conflicts of interest;
- (b) if there are unremedied breaches under the IF DBFOM Agreement and there is no rectification plan reasonably acceptable to City with respect to the breaches which are capable of being rectified by the Substituted Entity; and
- (c) if any proposed security interests to be granted by the proposed Substituted Entity to the Collateral Agent and/or the Lender in addition to (or substantially different from) the security interests granted to the Collateral Agent and/or the Lender under the Initial Financing Documents materially and adversely affect the ability of the Substituted Entity to perform Principal Project Company's obligations under the Contract Documents or have the effect of increasing any liability of City, whether actual or potential (unless a Rescue Refinancing is concurrently proposed, in which case the Lenders' Liabilities may increase by up to 10%).

**12.7** The Collateral Agent may request approval of more than one Substituted Entity. The Collateral Agent may request approval at any time or times. Any approval by City of a Substituted Entity shall expire (unless otherwise agreed in writing by City) one year after the approval is issued if the Substituted Entity has not succeeded to PPC's Interest within that period of time. City may revoke an approval if at any time prior to succeeding to PPC's Interest the Substituted Entity ceases to be in compliance with City's rules and regulations regarding organizational conflicts of interest. If the Substituted Entity succeeds to PPC's Interest, then City shall not be entitled to terminate due to Noncompliance Points accumulated by Principal Project Company prior to its replacement by the Substituted Entity, provided the Noncompliance Event that resulted in such Noncompliance Points are being cured by the Substituted Entity as quickly as practicable using commercially reasonable efforts. Once all Noncompliance Events have been cured, City shall cancel any Noncompliance Points accrued prior to succession.

**12.8** Notwithstanding the foregoing, any entity that is wholly owned by a Lender or group of Lenders shall be deemed a Substituted Entity, without necessity for City approval, upon delivery to City of documentation proving that the entity is duly formed, validly existing and wholly owned by the Lender, including a certificate signed by a duly authorized officer of each Lender in favor of City certifying, representing and warranting such ownership.

---

### 13. SUBSTITUTION

**13.1** If City approves (or is deemed to have approved) a Substitution Notice pursuant to Section 12 (Substitution Entities and Substitution Proposals), the Substituted Entity named therein shall execute a duly completed Substitute Accession Agreement substantially in the form attached to this Direct Agreement as Schedule A and submit it to City (with a copy thereof to the other parties to this Direct Agreement) and such assignment shall become effective on and from the date on which City countersigns the Substitute Accession Agreement (the “**Substitution Effective Date**”) or the date that is 10 days after the date City receives the completed Substitute Accession Agreement if City fails to sign the Substitute Accession Agreement.

**13.2** As of the Substitution Effective Date:

- (a) such Substituted Entity shall become a party to the IF DBFOM Agreement and this Direct Agreement in place of Principal Project Company who shall be immediately released from its obligations arising under, and cease to be a party to, the IF DBFOM Agreement and this Direct Agreement from and after Substitution Effective Date;
- (b) all of Principal Project Company’s obligations and liabilities under the IF DBFOM Agreement and under this Direct Agreement arising from and after the Substitution Effective Date shall be immediately and automatically transferred to the Substituted Entity;
- (c) such Substituted Entity shall exercise and enjoy the rights and perform the obligations of Principal Project Company under the IF DBFOM Agreement and this Direct Agreement; and
- (d) City shall owe its obligations (including any undischarged liability with respect to any loss or damage suffered or incurred by Principal Project Company prior to the Substitution Effective Date) under the IF DBFOM Agreement and this Direct Agreement to such Substituted Entity in place of Principal Project Company, subject to City’s right to offset any losses or damages suffered or incurred by City as provided under the IF DBFOM Agreement and this Direct Agreement.

**13.3** City shall use its reasonable efforts to facilitate the transfer to the Substituted Entity of Principal Project Company’s obligations under the IF DBFOM Agreement and this Direct Agreement.

**13.4** The Substituted Entity shall pay to City on the Substitution Effective Date any amount due to City under the IF DBFOM Agreement and this Direct Agreement, including City’s reasonable costs and expenses incurred in connection with (a) Principal Project Company’s default and termination, (b) City’s activities with respect to the Project during any period City was in possession of the Project, and (c) the approval of the Substituted Entity, all as of the Substitution Effective Date and notified to such Substituted Entity prior to the Substitution Effective Date. City’s receipt of the payment pursuant to this Section 13.4 shall be a condition precedent to the Substitution Effective Date.

**13.5** As of the Substitution Effective Date:

- 
- (a) any right of termination suspended by virtue of Section 8.1 shall be of no further effect and City shall not be entitled to terminate or suspend performance of the IF DBFOM Agreement and this Direct Agreement by virtue of any act, omission or circumstance that occurred prior to such Substitution Effective Date; and
  - (b) City shall enter into an equivalent direct agreement on substantially the same terms as this Direct Agreement, save that Principal Project Company shall be replaced as a party by the Substituted Entity.

#### 14. REVIVAL OF REMEDIES

14.1 If a City Notice has been given, the grounds for that notice are continuing and have not been remedied or waived and:

- (a) as of the end of the Cure Period, no Step-in Notice has been given and no Substituted Entity becomes a party to the IF DBFOM Agreement and this Direct Agreement; or
- (b) the Step-in Period ends without a Substituted Entity becoming a party thereto,

then, from and after the date such Cure Period or such Step-in Period, as the case may be, expires (the “**Revival Date**”), City shall be entitled to:

- (i) act upon any and all grounds for termination or suspension available to it in relation to the IF DBFOM Agreement in respect of defaults under the IF DBFOM Agreement not remedied or waived;
- (ii) pursue any and all claims and exercise any and all remedies against Principal Project Company; and
- (iii) if and to the extent that it is then entitled to do so under the IF DBFOM Agreement, take or support any action of the type referred to in Section 16.2 (City Remedies for PPC Default) of the IF DBFOM Agreement.

#### 15. NEW PROJECT AGREEMENT

15.1 If:

- (a) the IF DBFOM Agreement is rejected by a trustee or debtor-in-possession in, or terminated as a result of, any bankruptcy or insolvency proceeding involving Principal Project Company, or
- (b) a PPC Default under Section 16.1.1(m) of the IF DBFOM Agreement occurs with respect to any Equity Member with a material financial obligation owing to Principal Project Company for a Committed Investment, and Equity Members’ obligations relating to Principal Project Company or the Project are rejected by a trustee or debtor-in-possession in, or terminated as a result of any bankruptcy or insolvency proceeding involving such Equity Member and, within 90 days after such rejection or termination, the Collateral Agent shall so request and shall

certify in writing to City that it intends to perform the obligations of Principal Project Company as and to the extent required under the IF DBFOM Agreement,

then City will execute and deliver to the Collateral Agent (or any Substituted Entity satisfying the requirements of this Direct Agreement if directed to do so by the Collateral Agent) a new project agreement. Such new project agreement shall contain conditions, agreements, terms, provisions and limitations which are the same as those of the IF DBFOM Agreement, except for any obligations that have been fulfilled by Principal Project Company, any party acting on behalf of or stepping-in for Principal Project Company or City prior to such rejection or termination. References in this Direct Agreement to the "Agreement" shall be deemed also to refer to any such new project agreement.

## **16. RECEIVERS**

**16.1** The appointment of a receiver at the behest of Principal Project Company shall be subject to City's prior written approval in its sole discretion. The appointment of a receiver at the behest of any Lender shall be subject to the following terms and conditions:

- (a) City's prior approval shall not be required for the appointment of the receiver or the selection of the Person to serve as receiver;
- (b) whenever any Lender commences any proceeding for the appointment of a receiver, the Collateral Agent shall serve on City not less than ten (10) days' prior written notice of the hearing for appointment and of the Lender's pleadings and briefs in the proceeding;
- (c) City may appear in any such proceeding to challenge the selection of the Person to serve as receiver, but waives any other right to oppose the appointment of the receiver; and
- (d) City may at any time seek an order for replacement of the receiver by a different receiver.

**16.2** No receiver appointed at the behest of Principal Project Company or any Lender shall have any power or authority to replace the IFM Contractor or D&C Contractor except by reason of default or unless the replacement is a Substituted Entity reasonably approved or deemed approved by City.

## **17. ESTOPPEL CERTIFICATES**

**17.1** At any time and from time to time, within 30 days after written request of any Lender or proposed Lender, City, without charge, shall certify by written instrument duly executed and acknowledged, to any Lender or proposed Lender as follows:

- (a) as to whether the IF DBFOM Agreement has been supplemented or amended, and if so, attaching a copy of such supplement or amendment to such certificate;
- (b) as to the validity and force and effect of the IF DBFOM Agreement against City, in accordance with its terms, subject to applicable bankruptcy, insolvency and

similar laws affecting the enforceability of creditors' rights generally and the general principles of equity;

- (c) as to the existence of any PPC Default of which City has Actual Knowledge;
- (d) as to the existence of events which, by the passage of time or notice or both, would constitute a PPC Default, to City's Actual Knowledge;
- (e) as to the then accumulated amount of Noncompliance Points;
- (f) as to the existence of any Claims by City regarding the IF DBFOM Agreement; and
- (g) as to the Effective Date and the expiration date of the Term.

**17.2** City shall deliver the same certified, written instrument to a Substituted Entity or proposed Substituted Entity within fifteen (15) days after receiving its written request, provided that the request is delivered to City either before the proposed Substituted Entity succeeds to PPC's Interest or within sixty (60) days after the Substituted Entity has succeeded to PPC's Interest.

**17.3** Any such certificate may be relied upon by, and only by, the Lender, proposed Lender, Substituted Entity or proposed Substituted Entity to whom the same may be delivered, and the contents of such certificate shall be binding on City.

## **18. GENERAL**

**18.1** Neither the Lender nor the Collateral Agent shall have any obligation hereunder to extend credit to City or any contractor to City at any time, for any purpose.

**18.2** For so long as any amount under the Financing Documents is outstanding, City shall not, without the prior written consent of the Collateral Agent, consent to any assignment, transfer, pledge or hypothecation of the IF DBFOM Agreement or any interest therein by Principal Project Company, other than as specified in the IF DBFOM Agreement or this Direct Agreement.

**18.3** No Lender holding Equity Member Debt, whether secured or unsecured, shall have any rights, benefits or protections under this Direct Agreement.

## **19. TERMINATION**

This Direct Agreement shall remain in effect until the earlier to occur of (a) the Discharge Date; (b) the time at which all of City's obligations and liabilities have expired or have been satisfied in accordance with the terms of the IF DBFOM Agreement and this Direct Agreement; and (c) any assignment to a Substituted Entity has occurred under Section 13 (Substitution) and City shall have entered into an equivalent direct agreement on substantially the same terms as this Direct Agreement, save that Principal Project Company has been replaced as a party by the Substituted Entity.

## **20. EFFECT OF BREACH**

Without prejudice to any rights a party may otherwise have, a breach of this Direct Agreement shall not of itself give rise to a right to terminate the IF DBFOM Agreement.

## **21. NO PARTNERSHIP**

Nothing contained in this Direct Agreement shall be deemed to constitute a partnership between the parties to this Direct Agreement. None of the parties shall hold itself out contrary to the terms of this Section 21 (No Partnership).

## **22. REMEDIES CUMULATIVE; NO WAIVER**

No failure or delay by City, the Lenders or the Collateral Agent (or their designee) in exercising any right or power hereunder shall operate as a waiver thereof, nor shall any single or partial exercise of any such right or power, or any abandonment or discontinuance of steps to enforce such a right or power, preclude any other or further exercise thereof or the exercise of any other right or power. The remedies provided herein are cumulative and not exclusive of any remedies provided by law and may be exercised by the Lenders, the Collateral Agent or any designee, transferee or assignee thereof from time to time. In no event shall any provision of this Direct Agreement or any consent to any departure by any party therefrom be effective unless such waiver is permitted by Section 23 (Amendment), and then such waiver or consent shall be effective only in the specific instance and for the purpose for which given.

## **23. AMENDMENT**

No amendment, modification or waiver of any provision of this Direct Agreement, or consent to any departure herefrom by any party to this Direct Agreement, shall be effective against any party to this Direct Agreement unless the same shall be in writing and signed by the party against whom enforcement is sought, and then such amendment or waiver shall be effective only in the specific instance and for the specific purpose for which it was given.

## **24. SUCCESSORS AND ASSIGNS**

**24.1** No party to this Direct Agreement may assign or transfer any part of its rights or obligations hereunder without the consent of the other parties, save that the Collateral Agent may assign or transfer its rights and obligations hereunder to a successor Collateral Agent in accordance with the Financing Documents. In connection with any such assignment or transfer, City agrees to enter into a new Direct Agreement with the successor Collateral Agent on terms that are substantially the same as those of this Direct Agreement.

**24.2** This Direct Agreement shall be binding upon and inure to the benefit of the parties to this Direct Agreement and their respective successors and permitted assigns.

## **25. COUNTERPARTS**

This Direct Agreement may be executed in any number of counterparts, each of which shall be identical and all of which, taken together, shall constitute one and the same instrument, and the parties may execute this Direct Agreement by signing any such counterpart. Transmission by facsimile or electronic mail of an executed counterpart of this Direct Agreement shall be deemed

to constitute due and sufficient delivery of such counterpart, to be followed thereafter by an original of such counterpart. The Parties, in the manner specified by City, may sign this Direct Agreement electronically.

**26. SEVERABILITY**

If, at any time, any provision of this Direct Agreement is or becomes illegal, invalid or unenforceable in any respect under any law of any jurisdiction, neither the legality, validity or enforceability of the remaining provisions nor the legality, validity or enforceability of such provision under the law of any other jurisdiction will in any way be affected or impaired.

**27. NOTICES**

**27.1** Any notice, approval, election, demand, direction, consent, designation, request, agreement, instrument, certificate, report or other communication required or permitted to be given or made under this Direct Agreement (each, a notice) to a party must be given via written correspondence and email. All notices will be validly given if given on a Business Day to each party at the following address:

To City: San Francisco Municipal Transportation Agency  
1 South Van Ness, 8th Floor  
San Francisco, CA 94103

**27.2** A notice shall be deemed to have been given on the earliest of:

- (a) date of receipt, if delivered in person;

- 
- (b) date of receipt (confirmed by automatic answer back or equivalent evidence of receipt), if validly transmitted electronically before 3:00 p.m. (local time at the place of receipt) on a Business Day;
  - (c) one Business Day after delivery to the courier properly addressed, if delivered by overnight courier; and
  - (d) four Business Days after deposit with postage prepaid and properly addressed, if delivered by United States certified or registered mail.

**27.3** Each of the parties will notify each other via written correspondence and email of any change of address, such notification to become effective 15 days after notification.

## **28. GOVERNING LAW AND JURISDICTION**

**28.1** The venue for any litigation arising out of, relating to or resulting from any matter relating to this Direct Agreement shall be in San Francisco, California to the extent that a court located in San Francisco has subject matter jurisdiction.

**28.2** This Direct Agreement shall be governed by and construed in accordance with the laws of the State of California, any applicable federal law, the San Francisco City Charter and Municipal Code, and the ordinances, regulations, codes, and Executive Orders enacted and/or promulgated pursuant thereto.

**28.3** Each of Principal Project Company, City and the Collateral Agent irrevocably consents to service of process by personal delivery, certified mail, postage prepaid or overnight courier. Nothing in this Direct Agreement will affect the right of any party to serve process in any other manner permitted by law.

**28.4** Each of City, Principal Project Company and the Collateral Agent (a) certifies that no representative, agent or attorney of another party has represented, expressly or otherwise, that such party would not, in the event of a proceeding, seek to enforce the mutual waivers in this Section 28 (Governing Law and Jurisdiction) and (b) acknowledges that it has been induced to sign, or change its position in reliance upon the benefits of, this Direct Agreement by, among other things, the mutual waivers and certifications in this Section 28 (Governing Law and Jurisdiction).

## **29. CONFLICT WITH PROJECT AGREEMENT**

In the event of any conflict or inconsistency between the provisions of this Direct Agreement and the IF DBFOM Agreement, the provisions of this Direct Agreement shall prevail.

**IN WITNESS WHEREOF**, each of the parties to this Direct Agreement has caused this Direct Agreement to be duly executed by its duly authorized officer as of the date first written above.

## **EXHIBIT 5C**

### **CALCULATION OF REFINANCING GAIN**

#### **1. Calculation of the Refinancing Gain**

The total amount of Refinancing Gain equals  $(A - B)$ , as calculated in accordance with this Exhibit 5C (Calculation of the Refinancing Gain), provided that such amount is greater than zero. Each of the variables used to calculate Refinancing Gain shall be determined as follows:

##### **1.1 Create a Pre-Refinancing Financial Model**

Principal Project Company shall create a pre-Refinancing financial model (the “**Pre-Refinancing Financial Model**”) by updating the Financial Model then in effect for actual and projected Project Financial Performance so as to be current immediately prior to the Refinancing, but excluding the impact of the current Refinancing. The Pre-Refinancing Financial Model shall take into account any Refinancing that qualifies as an Exempt Refinancing (under clause (a) of the definition of Exempt Refinancing) exactly as it was reflected in the Base Case Financial Model. In the Pre-Refinancing Financial Model, the resulting net present value of Distributions projected from the anticipated date of the Refinancing through to the end of the Term, discounted at the Original Equity IRR, shall be the value of “B”.

##### **1.2. Create a Post-Refinancing Financial Model**

Principal Project Company shall create a post-Refinancing financial model (the “**Post-Refinancing Financial Model**”) by updating the Pre-Refinancing Financial Model for the impact of the Refinancing, including costs reasonably incurred to achieve the Refinancing. In the Post-Refinancing Financial Model, the resulting net present value of Distributions projected from the anticipated date of the Refinancing through to the end of the Term, discounted at the Original Equity IRR, shall be the value of “A”.

#### **2. Calculating City’s 50% Entitlement**

##### **2.1 Create a Final Refinancing Financial Model**

**2.1.1** Principal Project Company shall create a final refinancing financial model by updating the Post-Refinancing Financial Model to reflect the impact of the amounts and timing of the payment(s) (or credits) to be made to City under Section 4.5 (Refinancing Gain) of the Agreement, such that the net present value of such payments, discounted at the Original Equity IRR, is equal to 50% of the amount equal to  $(A - B)$ . The resulting nominal post-tax equity internal rate of return shall be deemed to be the “**Refinancing Equity IRR.**”

**2.1.2** If the Refinancing Equity IRR is lower than the Original Equity IRR, then Principal Project Company shall adjust the amounts and timing of the payment(s) (or credits) to be made to City under Section 4.5 (Refinancing Gain) of the Agreement, such that the Refinancing Equity IRR would be increased to a level up to, but not in excess of, the Original Equity IRR.

### **3. Mutual Agreement and Financial Model Update**

Subject to the mutual agreement by Principal Project Company and City of the Refinancing Gain calculations and entitlement amount, Principal Project Company shall prepare a Financial Model Update to the Financial Model then in effect in accordance with Section 4.7.2 (Updates to the Financial Model) of the Agreement that incorporates actual and projected Project Financial Performance, the impact of the Refinancing and the sharing of the Refinancing Gain.

**EXHIBIT 5D**

**FORM OF OPINION FROM CITY'S LEGAL COUNSEL**

***[City Attorney's Office Letterhead]***

1. ***[Insert Address of Principal Project Company and Lender(s)]***

\_\_\_\_\_, 2025

Ladies and Gentlemen:

I am a Deputy City Attorney assigned to provide counsel to the City and County of San Francisco ("**City**"), a municipal corporation acting by and through the San Francisco Municipal Transportation Agency ("**SFMTA**"), and as such have advised City in connection with its execution of:

(i) the Infrastructure Facility Design-Build-Finance-Operate-Maintain Agreement for the Potrero Yard Modernization Project dated as of [\_\_\_\_], 2025 by and between the City and [\_\_\_\_], a [\_\_\_\_] (the "**Principal Project Company**"); and

(ii) the Direct Agreement dated as of [\_\_\_\_], 2025 by and between the City, the Principal Project Company and [\_\_\_\_], the collateral agent for the Lenders.

The agreements in clauses (i) – (ii) are collectively referred to hereinafter as the "**City Agreements**".

We have examined executed originals or copies identified to our satisfaction of each of the City Agreements. We have further examined such other documents, certificates and other materials as we have deemed necessary in order to render the opinions expressed herein.

With respect to the various factual matters material to my opinion, we have relied upon certificates and representations of the City and other public officials. We have assumed the due execution and delivery, pursuant to due authorization of the City Agreements by parties other than the City, the validity and binding effect thereof as to such other parties and the genuineness of all signatures (other than those of the City) on all documents seen or reviewed by us, the authenticity of all documents submitted to us as originals and the conformity with the original documents of all documents submitted to us as copies.

Whenever an opinion expressed herein is stated to be to my knowledge, or known to me, it means that, during the course of my representation of the City, I have not acquired information giving me actual knowledge of the existence or absence of the facts forming the basis for such opinion, and that, except to the extent expressly set forth herein I have not conducted an independent investigation to determine the existence or absence of such facts.

Based on the foregoing, I am of the opinion that:

1. Ordinance No. 38-21, adopted by the Board of Supervisors on March 16, 2021, has been duly enacted and is in full force and effect.

2. The City and County of San Francisco is a charter city and municipal corporation duly organized and validly existing under the Constitution of the State of California.
3. The City is duly organized and operating pursuant to the San Francisco Charter and has the full legal capacity, right, power and authority to enter into and deliver the City Agreements. The City has the full legal capacity, right, power and authority to carry out and perform its obligations under the City Agreements.
4. Each of the City Agreements has been duly authorized, executed and delivered by the City, and such documents are legal, valid and binding instruments of the City and are enforceable against the City in accordance with their terms, except as enforceability may be limited or otherwise affected by (a) bankruptcy, insolvency, reorganization, moratorium and other laws affecting the rights of creditors generally, (b) principles of equity, whether considered at law or in equity, (c) the sovereign immunity of the City; provided that sovereign immunity shall not bar the enforcement of claims presented in accordance with the provisions of the applicable City Agreement, City Charter and Administrative Codes and California law, so long as such claims are based on contractual rights, and (d) the limitations and conditions set forth herein.
5. The execution and delivery by the City of the City Agreements and the performance of its obligations under the City Agreements are within its powers and do not and will not conflict with, or constitute a breach or result in a violation of (a) any existing constitutional or statutory provision of the State of California, (b) to my knowledge, any existing agreement or other instrument to which the City is a party or by which it is bound, or (c) to my knowledge, any existing order, rule, regulation, judgment, decree ordinance of any court, government or governmental authority having jurisdiction over the City as applicable or its properties.
6. All official action required to be taken by the City and all consents, approvals, authorizations or orders of or filings with or notice to, any governmental or regulatory authority necessary to authorize and enable the City to execute and deliver the City Agreements or to authorize and enable City to perform its obligations thereunder (other than acts under the City Agreements that may be taken by City in the future) have been taken and obtained.

The opinions expressed in this letter are limited to the opinions expressly stated, and no other opinions should be inferred. The opinions are expressed only as of the date hereof.

Sincerely,

*[Insert Signature]*

**EXHIBIT 5E**

**FORM OF OPINION FROM PRINCIPAL PROJECT COMPANY'S LEGAL COUNSEL**

*[Insert Firm Letterhead]*

*[Insert City Address]*

*[Insert Lender Addressees]*

\_\_\_\_\_, 2025

Ladies and Gentlemen:

We [\_\_\_\_\_] ("**Firm**") have acted as special counsel to [\_\_\_\_\_] a [\_\_\_\_\_] (the "**Principal Project Company**") in connection with the Infrastructure Facility Design-Build-Finance-Operate-Maintain Agreement for the Potrero Yard Modernization Project dated as of [\_\_\_\_], 2025 (the "**Agreement**") between the City and County of San Francisco ("**City**"), a municipal corporation acting by and through the San Francisco Municipal Transportation Agency ("**SFMTA**"), and the Principal Project Company (Contract # \_\_\_\_). This opinion is being furnished pursuant to Section 3.2.4 (Conditions Precedent to Financial Close) of the Agreement. Capitalized terms used herein without definition have the meanings ascribed to such terms in the Agreement.

In connection with the opinions contained herein, we have examined executed counterparts, or copies of such executed counterparts certified or otherwise identified to our satisfaction, of:

- (i) the Agreement;
- (ii) the Direct Agreement, by and between the City, the Principal Project Company and the Collateral Agent;
- (iii) the Equity Members Funding Agreements;
- (iv) the D&C Contract;
- (v) the IFM Contract; and
- (vi) the Financing Documents.

***[add other agreements, if necessary]***

Collectively, (i) through (iv) above shall be hereinafter referred to as the "**Transaction Documents**".

We have further examined and relied upon the accuracy of original, certified, conformed, photocopied or telecopied copies of such records, agreements, certificates and other

documents as we have deemed necessary or appropriate to enable us to render the opinions expressed herein. In all such examinations we have assumed the genuineness of signatures on original documents and the conformity to such original documents of all copies submitted to us as certified, conformed, photocopied or telecopied copies. We have further assumed that none of such documents has been subsequently rescinded, revoked, restated, modified or amended in any way other than by documents that have been submitted to us. We have made no independent inquiry or investigation of any factual matters or circumstances relevant to the opinions herein set forth, but instead have relied solely upon the accuracy of oral or written statements and representations of officers and other representatives of the Principal Project Company, statements, representations and warranties made in the Transaction Documents.

In our examination, we have assumed, without independent investigation, the following:

- (i) the Transaction Documents have been duly authorized, executed and delivered by each party thereto (other than the Principal Project Company);
- (ii) that each party (other than the Principal Project Company) to each Transaction Document is duly organized, validly existing and in good standing under the laws of the jurisdiction of its organization, and has full power and authority to enter into and to carry out its obligations under such Transaction Document;
- (iii) the authorization, execution and delivery by each party (other than the Principal Project Company) of each Transaction Document to which it is a party does not, and such party's performance thereunder will not, breach, conflict with, or constitute a violation of, (A) the organizational documents, bylaws or similar governing documents of such party or (B) any laws or any writ, order, injunction or decree of any court or governmental authority or any provision of any agreement or instrument to which such party or its properties may be bound;
- (iv) that each Transaction Document is the legal, valid and binding obligation of each party thereto (other than the Principal Project Company) enforceable against such party in accordance with the terms of such Transaction Document;
- (v) the legal capacity and competency of all Persons signing the Transaction Documents on behalf of the parties thereto (other than the Principal Project Company); and
- (vi) that each party to the Transaction Documents (other than the Principal Project Company) has all necessary governmental consents, approvals, licenses or permits required in order to execute and deliver the Transaction Documents to which it is a party.

The opinions set forth below that make reference to, or are stated to be qualified by, the expression "to our knowledge" or any expression of similar import are limited to the current actual knowledge of the individual attorneys at this Firm who have devoted substantial attention to the representation of the Principal Project Company in connection with the preparation, negotiation, execution and delivery of the Transaction Documents (but not the knowledge of any other attorney

of this Firm or any constructive or imputed knowledge of any information, whether by reason of our representation of the Principal Project Company or otherwise). We have not undertaken an independent investigation to determine the accuracy of any such statement, and any limited inquiry undertaken by us during the preparation of this letter should not be regarded as such an investigation.

Based upon the foregoing and our examination of such questions of law as we have deemed necessary or appropriate, and subject to limitations and qualifications set forth below, it is our opinion that:

1. The Principal Project Company is a [\_\_\_] validly existing and in good standing under the laws of [\_\_\_] and has all requisite limited liability company power to execute and deliver, and to perform its obligations under, the Transaction Documents.
2. The Principal Project Company is qualified to transact interstate business as a foreign limited liability company in the State of California.
3. The execution and delivery of, and the performance of obligations under, the Transaction Documents by the Principal Project Company, have been duly authorized by all necessary action on the part of the Principal Project Company. Each person executing such Transaction Documents on the Principal Project Company's behalf has been duly authorized to execute and deliver each such document on Principal Project Company's behalf, and such Transaction Documents have been duly executed and delivered by the Principal Project Company.
4. Each of the Transaction Documents constitutes the valid and binding obligation of the Principal Project Company, enforceable against the Principal Project Company in accordance with the terms thereof.
5. The execution and delivery by the Principal Project Company of the Transaction Documents does not, and the consummation by the Principal Project Company of any of the transactions contemplated thereunder will not, result in the violation by Principal Project Company of any United States federal statute, rule or regulation, which in our experience is normally applicable with respect to transactions of the type contemplated by the Transaction Documents (without taking into account the particular nature of the business conducted by the parties to the Transaction Documents). The execution and delivery by the Principal Project Company of the Transaction Documents does not, and the consummation by it of the transactions contemplated thereunder will not, result in a violation by Principal Project Company of any provision of the LLC Agreement (as defined in Annex I) or the Certificate of Formation (as defined in Annex I).
6. The execution and delivery by the Principal Project Company of the Transaction Documents and the performance of its obligations under the Transaction Documents are within its powers and do not and will not conflict with, or constitute a breach or result in a violation of (a) any existing constitutional or statutory provision of the State of California, (b) to my knowledge, any existing agreement or other instrument to which Principal Project Company is a party or by which it is

bound, or (c) to my knowledge, any existing order, rule, regulation, judgment, decree ordinance of any court, government or governmental authority having jurisdiction over Principal Project Company as applicable or its properties.

Our opinions are subject to the following additional assumptions, limitations and qualifications:

A. Our opinions are subject to bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium and similar laws of general applicability relating to or affecting creditors' rights and to general principles of equity. Without limiting the foregoing qualifications, the opinions expressed herein do not purport to cover, and we express no opinion with respect to, the applicability of Section 548 of the federal Bankruptcy Code or any comparable provision of state law, including the provisions relating to fraudulent conveyances.

B. Indemnities, rights of contribution, exculpatory provisions, provisions in respect of rights to liquidated damages, penalties or punitive damages, waivers of rights and provisions requiring arbitration of disputes may be limited on public policy grounds or may be prohibited by law.

C. Certain of the remedies in the Transaction Documents may be limited or rendered unenforceable by applicable law. In our opinion, however, applicable law does not render the remedies afforded by the Financing Documents inadequate for the practical realization by the Lenders of the principal benefits intended to be provided by the Financing Documents.

D. We express no opinion with respect to any provision of the Transaction Documents that purports to require a prevailing party in a dispute to pay attorney's fees and expenses, or other costs, to a non-prevailing party.

E. We express no opinion as to the enforceability of any agreements in any Transaction Document by the parties thereto to agree in the future upon any matter.

This letter speaks only as of the date hereof, and we disclaim any undertaking to update this letter to take into account any future changes of fact or law. The opinions expressed herein are solely for your benefit, and may not be relied on in any manner or for any purposes by any other Person without our written consent, and are not to be used, circulated, quoted, published or otherwise referred to or disseminated for any other purpose.

Very truly yours,

*[Insert Signature]*

**EXHIBIT 5F**

**BASE CAPITAL MaxAP ADJUSTMENT FOR  
BASE INTEREST RATE FLUCTUATION AND CREDIT SPREAD RISK MITIGATION**

To facilitate the adjustment process described in this Exhibit, Principal Project Company and City will collaboratively prepare a Financial Model closing protocols document that will set forth additional details for how the calculations set forth in this Exhibit will be applied to the Base Case Financial Model and the Key Ratios therein.

**1. Base Interest Rate Fluctuations**

**1.1** Promptly following Financial Close, Principal Project Company shall update the Base Case Financial Model in effect as of the Effective Date to:

- (a) reflect 100% of the changes to the Base Interest Rates that have occurred during the Bond Rate Protection Period or Bank Debt Rate Protection Period (as applicable), without changing the coupon structure of any Bond Financing;
- (b) solve for the lowest possible MaxAP;
- (c) maintain the Equity IRR to be equal to the Original Equity IRR; and
- (d) satisfy all Key Ratios in the Base Case Financial Model.

**1.2** The capital portion of the MaxAP resulting from the update to the Base Case Financial Model in accordance with Section 1.1 will be the Base Interest Rate adjusted Base Capital MaxAP (“**MaxAP<sub>BIRBase</sub>**”) and the resulting Financial Model will be referred to herein as “**BIR Financial Model**”).

**2. Credit Spread Fluctuations**

**2.1** If Principal Project Company is not eligible for Credit Spread Risk Mitigation:

- (a) Principal Project Company shall bear 100% of the impact (either positive or negative) on its Original Equity IRR for changes in credit spreads over the Bond Rate Protection Period;
- (b) the remainder of this Section 2 (Credit Spread Fluctuations) and Section 3 (Adjustments to the Base Capital MaxAP for Base Interest Rate fluctuation and Credit Spread Risk Mitigation) of this Exhibit 5F (Base Capital MaxAP Adjustment for Base Interest Rate Fluctuation and Credit Spread Risk Mitigation) do not apply to Principal Project Company; and
- (c) MaxAP<sub>BIRBase</sub> calculated pursuant to Section 1 (Base Interest Rate Fluctuations) will become the interim Base Capital MaxAP (“**MaxAP<sub>INTERIM</sub>**”) used in the final Financial Model solve required under Section 4 (Financial Model Update, Base Capital MaxAP and Base Operating MaxAP Revision).

**2.2** If Principal Project Company is eligible for Credit Spread Risk Mitigation, Principal Project Company shall calculate the following, in each case, to achieve the lowest possible applicable MaxAP and maintain the Original Equity IRR at the same levels reflected in Principal Project Company's Base Case Financial Model while its Key Ratios remain in compliance with the Financing Agreements and consistent with the Base Case Financial Model:

- (a) **"MaxAP<sub>BASELINE</sub>"** representing the Base Capital MaxAP calculated by updating the BIR Financial Model (which was prepared in accordance with Section 1 (Base Interest Rate Fluctuations) of this Exhibit 5F(Base Capital MaxAP Adjustment for Base Interest Rate Fluctuation and Credit Spread Risk Mitigation)) with the applicable Baseline Credit Spreads (if different from those already in BIR Financial Model);
- (b) **"MaxAP<sub>PRICING</sub>"** representing the Base Capital MaxAP calculated by updating the Base Case Financial Model with the actual Bond Financing pricing and the actual net proceeds, coupon and term structure as of the Bond Pricing Date; and
- (c) the upper boundary (**"MaxAP<sub>UPPER</sub>"**) and lower boundary (**"MaxAP<sub>LOWER</sub>"**) between which Principal Project Company shall bear the full impact of changes in credit spreads (the **"No-Mitigation Range"**), calculated as follows:
  - (i)  $\text{MaxAP}_{\text{UPPER}}$  shall be the greater of  $\text{MaxAP}_{\text{BIRBase}}$  and  $\text{MaxAP}_{\text{BASELINE}}$ ,  
 $\text{MaxAP}_{\text{UPPER}} = \text{Maximum} ( \text{MaxAP}_{\text{BIRBase}}, \text{MaxAP}_{\text{BASELINE}} )$and
  - (ii)  $\text{MaxAP}_{\text{LOWER}}$  shall be the lessor of  $\text{MaxAP}_{\text{BIRBase}}$  and  $\text{MaxAP}_{\text{BASELINE}}$   
 $\text{MaxAP}_{\text{LOWER}} = \text{Minimum} ( \text{MaxAP}_{\text{BIRBase}}, \text{MaxAP}_{\text{BASELINE}} )$ .

**3. Adjustments to the Base Capital MaxAP for Base Interest Rate fluctuation and Credit Spread Risk Mitigation**

Principal Project Company shall, subject to City's review and approval, calculate the Base Capital MaxAP (**"MaxAP<sub>INTERIM</sub>"**) to be used in Section 4 (Financial Model Update, Base Capital MaxAP and Base Operating MaxAP Revision), in accordance with one of the following scenarios:

- (a) if  $\text{MaxAP}_{\text{PRICING}}$  is above the No-Mitigation Range, then  $\text{MaxAP}_{\text{INTERIM}}$  shall be  $\text{MaxAP}_{\text{BIRBase}}$  plus 50% of the difference between the  $\text{MaxAP}_{\text{PRICING}}$  and the higher of the  $\text{MaxAP}_{\text{BASELINE}}$  and  $\text{MaxAP}_{\text{BIRBase}}$ :  
  
if  $\text{MaxAP}_{\text{PRICING}} > \text{MaxAP}_{\text{UPPER}}$ , then  
 $\text{MaxAP}_{\text{INTERIM}} = \text{MaxAP}_{\text{BIRBase}} + 50\% \times ( \text{MaxAP}_{\text{PRICING}} - \text{MaxAP}_{\text{UPPER}} )$ ;
- (b) if  $\text{MaxAP}_{\text{PRICING}}$  is below the No-Mitigation Range, then  $\text{MaxAP}_{\text{INTERIM}}$  shall be  $\text{MaxAP}_{\text{BIRBase}}$  reduced by 50% of the difference between the  $\text{MaxAP}_{\text{PRICING}}$  and the lower of the  $\text{MaxAP}_{\text{BASELINE}}$  and  $\text{MaxAP}_{\text{BIRBase}}$ :  
  
if  $\text{MaxAP}_{\text{PRICING}} < \text{MaxAP}_{\text{LOWER}}$ , then  
 $\text{MaxAP}_{\text{INTERIM}} = \text{MaxAP}_{\text{BIRBase}} + 50\% \times ( \text{MaxAP}_{\text{PRICING}} - \text{MaxAP}_{\text{LOWER}} )$ ; and

- (c) if  $\text{MaxAP}_{\text{PRICING}}$  falls on or within the No-Mitigation Range, then there will be no further adjustment to  $\text{MaxAP}_{\text{BIRBase}}$  and  $\text{MaxAP}_{\text{INTERIM}}$  will equal  $\text{MaxAP}_{\text{BIRBase}}$ .
- if (  $\text{MaxAP}_{\text{PRICING}} \leq \text{MaxAP}_{\text{UPPER}}$  AND  $\text{MaxAP}_{\text{PRICING}} \geq \text{MaxAP}_{\text{LOWER}}$  ), then  $\text{MaxAP}_{\text{INTERIM}} = \text{MaxAP}_{\text{BIRBase}}$ .

Tables 3A and 3B below illustrate the scenarios described in Section 3 (Adjustments to the Base Capital MaxAP for Base Interest Rate fluctuation and Credit Spread Risk Mitigation).

**Table 3A - Scenario A**

After adjusting for movements in Base Interest Rates, the Base Capital MaxAP is equal to or lower than the Base Capital MaxAP calculated using the Baseline Credit Spreads (also adjusted for movements in Base Interest Rates).

		<u>Pricing Outcomes:</u>		
		(i) MaxAP <sub>PRICING</sub> is above the No-Mitigation Range	(ii) MaxAP <sub>PRICING</sub> is below the No-Mitigation Range	(iii) MaxAP <sub>PRICING</sub> falls on or within the No-Mitigation Range
		MaxAP <sub>PRICING</sub> ↑		
MaxAP <sub>BASELINE</sub>				↓ MaxAP <sub>PRICING</sub>
MaxAP <sub>BIRBase</sub>				↑
			↓ MaxAP <sub>PRICING</sub>	
		MaxAP <sub>BIRBase</sub> is increased by 50% of the difference between MaxAP <sub>BASELINE</sub> and MaxAP <sub>PRICING</sub>	MaxAP <sub>BIRBase</sub> is decreased by 50% of the difference between MaxAP <sub>BIRBase</sub> and MaxAP <sub>PRICING</sub>	No adjustment made to MaxAP <sub>BIRBase</sub>

**Table 3B - Scenario B**

After adjusting for movements in Base Interest Rates, the Base Capital MaxAP is higher than the Base Capital MaxAP calculated using the Baseline Credit Spreads (also adjusted for

movements in Base Interest Rates).

		<b><u>Pricing Outcomes:</u></b>		
		<b>(i)</b> MaxAP <sub>PRICING</sub> is above the No-Mitigation Range	<b>(ii)</b> MaxAP <sub>PRICING</sub> is below the No-Mitigation Range	<b>(iii)</b> MaxAP <sub>PRICING</sub> falls on or within the No-Mitigation Range
		MaxAP <sub>PRICING</sub> ↑		
MaxAP <sub>BIRBase</sub>				↓ MaxAP <sub>PRICING</sub>
MaxAP <sub>BASELINE</sub>				↑
			↓ MaxAP <sub>PRICING</sub>	
		MaxAP <sub>BIRBase</sub> is increased by 50% of the difference between MaxAP <sub>BIRBase</sub> and MaxAP <sub>PRICING</sub>	MaxAP <sub>BIRBase</sub> is decreased by 50% of the difference between MaxAP <sub>BASELINE</sub> and MaxAP <sub>PRICING</sub>	No adjustment made to MaxAP <sub>BIRBase</sub>

**4. Financial Model Update, Base Capital MaxAP and Base Operating MaxAP Revision**

**4.1** On the date of Financial Close, Principal Project Company shall update and solve the Base Case Financial Model then in effect with the following:

- (a) Base Capital MaxAP set equal to the MaxAP<sub>INTERIM</sub> (as calculated in accordance with Section 2.1 or Section 3 (Adjustments to the Base Capital MaxAP for Base Interest Rate fluctuation and Credit Spread Risk Mitigation), as applicable);
- (b) actual Project Debt pricing, including net proceeds, Base Interest Rates, credit spreads, coupons and term structure as of the Bank Debt Pricing Date or Bond Pricing Date, as applicable;
- (c) all other changes in terms of financing assumed between those indicated in the Bid Financial Model submitted with Principal Project Company’s Financial Proposal and in Principal Project Company’s financial plan as set forth in the Financing Documents as of the Financial Close Date; and
- (d) all other changes required to be reflected in the Financial Model as result of any steps taken under Section 3.4.2 of the Agreement.

**4.2** The financial model resulting from the update to the Base Case Financial Model in accordance with Section 4.1 shall be proposed by Principal Project Company to City as the Financial Model Update described in Section 3.3.1 of the Agreement and, upon execution of the amendment agreement referred to in Section 3.3.2 of the Agreement: (a) the resulting financial model shall become the “**Financial Model**”; (b) the projected Base Capital MaxAP for the first Contract Year (annualized to be a 12-calendar month period) therein will become the new “**Base Capital MaxAP**”; (c) the Base Operating MaxAP shall become the new “**Base Operating MaxAP**”; and (d) the internal rate of return on equity therein shall become the “**Equity IRR.**”

**EXHIBIT 5G**

**FINANCING DOCUMENT TERMS**

(a) The Security Documents may only secure Project Debt, the proceeds of which are obligated to be used exclusively for the purposes of:

- (i) performing the Work;
- (ii) paying interest and principal on other existing Project Debt and any costs and fees in connection with the development and award of the Project, achieving commercial close and closing and administering of any permitted Project Debt;
- (iii) paying reasonable development fees to PPC-Related Entities or to a D&C Contractor or its affiliates for services related to the Project;
- (iv) paying fees and premiums to any Lender of the Project Debt or such Lender's agents;
- (v) paying Taxes;
- (vi) funding reserves required under this Agreement, Financing Documents, applicable securities laws, or Environmental Laws;
- (vii) making Distributions; and
- (viii) Refinancing any Project Debt in accordance with this Agreement.

(b) The Security Documents may only secure Project Debt and Financing Documents issued and executed by (a) Principal Project Company, (b) its permitted successors and permitted assigns, (c) a special purpose entity that owns Principal Project Company but no other assets and has purposes and powers limited to the Project and the Work or (d) any special purpose entity or subsidiary wholly owned by Principal Project Company or such entity.

(c) Project Debt under a Financing Agreement and secured by a Security Document must be issued and held only by Institutional Lenders who qualify as such at the date the Security Document is executed and delivered (or, if later, at the date any such Institutional Lender becomes a party to the Security Document), except that (i) qualified investors, including PABs holders that may purchase the PABs in a public offering, other than Institutional Lenders may acquire and hold interests in Project Debt, but only if an Institutional Lender acts as Collateral Agent for such Project Debt and (ii) Equity Member Debt is not subject to this provision.

(d) The Security Documents, as a whole, securing each separate issuance of debt shall encumber the entire PPC's Interest, provided that the foregoing does not preclude entry by Principal Project Company into subordinate Security Documents (such subordination to be in accordance with the terms set forth in the Financing Documents) or into equipment lease financing.

(e) No Security Document or other instrument purporting to mortgage, pledge, encumber, or create a lien, charge or security interest on or against PPC's Interest shall extend to or affect the

right, title and interest of the City in the Project or the Facility or City's rights or interests under this Agreement.

(f) No Security Document or other instrument purporting to mortgage, pledge, encumber, or create a lien, charge or security interest on or against PPC's Interest shall extend to or affect City's right to access Principal Project Company's funds held in an operating account in the event of a PPC Default and the exercise of remedies by City under Section 16.2 (City Remedies for PPC Default) of the Agreement; provided such right shall not include a security interest in such funds nor shall the exercise of such right by City interfere with the right of the Lenders, if any, under the Security Documents and the Direct Agreement to access such funds. Specifically, with respect to any such operating account (and associated account agreement and account control agreement):

(i) City shall be named as an authorized representative of Principal Project Company for purposes of the account, including specifically under any associated account control agreement, in the event of City's exercise of its Step-In Rights, and

(ii) Any account control agreement shall expressly state the terms, prohibitions, City rights and other provisions in this Exhibit 5G (Financing Document Terms), including specifically those set forth in Sections (g) through (m) of this Exhibit 5G (Financing Document Terms).

(g) Each note, bond or other negotiable or non-negotiable instrument evidencing Project Debt, or evidencing any other obligations issued or incurred by any Person described in this Exhibit 5G (Financing Document Terms) in connection with this Agreement or the Project shall include or refer to a document controlling or relating to the foregoing that includes a conspicuous recital on its face to the effect that payment of the principal thereof and interest thereon is a valid claim only as against the obligor and the security pledged by Principal Project Company or the obligor therefor, is not an obligation, moral or otherwise, of the City, any other agency, instrumentality or political subdivision of the City, or any elected official, member, director, officer, employee, agent or representative of any of them, and neither the full faith and credit nor the taxing power, and no assets, of the City, or any other agency, instrumentality or political subdivision of the City is pledged to the payment of the principal thereof and interest thereon.

(h) Each Financing Document containing provisions regarding default by Principal Project Company shall require that if Principal Project Company is in default thereunder and the Collateral Agent gives notice of such default to Principal Project Company, then the Collateral Agent shall also give concurrent notice of such default to City. Each Financing Document and Security Document that provides Lender remedies for default by Principal Project Company or the borrower shall require that the Collateral Agent deliver to City, concurrently with delivery to Principal Project Company or any other Person, every notice of election or enforcement of remedies, including an election to sell or foreclose, notice of sale or foreclosure or other notice required by Applicable Law or by the Security Document in connection with the exercise of remedies under the Financing Document or Security Document.

(i) No Financing Document that may be in effect during any part of the period that the Handback Requirements apply shall grant to the Lender any right to apply funds in the Handback Requirements Reserve Account or to apply proceeds from any Handback Requirements Letter of Credit in accordance with Section 8.7.5 (Handback Requirements Letters of Credit) of the Agreement to the repayment of Project Debt, to any other obligation owing the Lender or to any

other use except the uses set forth in Section 8.6 (Handback) of the Agreement, and any provision purporting to grant such right shall be null and void, provided, however, that (a) any Lender or Substituted Entity shall, following foreclosure or transfer in lieu of foreclosure, automatically succeed to all rights, claims and interests of Principal Project Company in and to the Handback Requirements Reserve Account and (b) a Financing Document or Security Document may create such rights regarding excess funds described in Section 8.7.2.5 of the Agreement.

Each relevant Financing Document and Security Document that may be in effect during any part of the period that the Handback Requirements apply shall expressly permit, without condition or qualification, Principal Project Company to (a) use and apply funds in the Handback Requirements Reserve Account in the manner contemplated by this Agreement, (b) issue additional Project Debt, secured by the PPC's Interest, for the added limited purposes of funding work pursuant to Handback Requirements in accordance with Section 8.6 (Handback) of the Agreement and (c) otherwise comply with its obligations in this Agreement regarding Handback Renewal Work, the Handback Requirements and the Handback Requirements Reserve Account. Subject to the foregoing, any protocols, procedures, limitations and conditions concerning draws from the Handback Requirements Reserve Account set forth in any Financing Document or the issuance of additional Project Debt as described in clause (b) above shall be consistent with the permitted uses of the Handback Requirements Reserve Account, and shall not constrain Principal Project Company's or City's access thereto for such permitted uses, even during the pendency of a default under the Financing Document.

For the avoidance of doubt:

- (i) The Lenders then holding Project Debt may limit additional Project Debt if other funds are then, in City's determination, readily available to Principal Project Company for the purpose of funding the Work;
  - (ii) No Lender then holding Project Debt is required hereby to grant pari passu lien or payment status to any such additional Project Debt; and
  - (iii) The Lenders then holding Project Debt may impose reasonable and customary requirements as to performance and supervision of the Work that are no more onerous than those set forth in their respective existing Financing Documents or Security Documents.
- (j) Each Financing Document and Security Document shall expressly state that the Lender shall not name or join City, any other agency, instrumentality or political subdivision of the City, or any elected official, member, director, officer, employee, agent or representative of any of them in any legal proceeding seeking collection of the Project Debt or other obligations secured thereby or the foreclosure or other enforcement of the Financing Documents, except as such language may be modified in the Financing Documents approved by City as provided in any Direct Agreement.
- (k) Each Financing Document shall expressly state that the Lender shall not seek any damages or other amounts from City, any other agency, instrumentality or political subdivision of the City, or any elected official, member, director, officer, employee, agent or representative of any of them, whether for Project Debt or any other amount, except (a) damages from City only for a violation by City of its express obligations to Lenders set forth in any Direct Agreement, if applicable, and (b) amounts due from City under this Agreement where the Lender has succeeded

to the rights and interests of Principal Project Company under this Agreement, whether by way of assignment or subrogation.

(l) Each Financing Document shall expressly state that the Lender and the Collateral Agent shall respond to any request from City or Principal Project Company for consent to a modification or amendment of any of this Agreement within a reasonable period of time.

(m) Each Financing Document that addresses the use of insurance proceeds shall expressly state that the Lender and the Collateral Agent shall (a) apply proceeds from Insurance Policies as specified in Exhibit 7 (Insurance Requirements) and (b) remit any amounts due to City from proceeds from Insurance Policies, as set forth in Exhibit 7 (Insurance Requirements), in each case, if any such Lender or Collateral Agent is named as the loss payee for the Insurance Policy.

## PROJECT DESCRIPTION

The Project will demolish the SFMTA's existing, outdated 100+ year old transit facility located on 4.4 acres at 2500 Mariposa Street, between 17th, Bryant, and Hampshire Streets and replace it with a modern, three-story bus maintenance, storage, and training facility to service the SFMTA's all electric trolley bus transit fleet, which may transition in the future to battery-electric buses. The IFM Facility will provide efficient transit-related services to San Francisco, aligning with SFMTA's commitment to safe, equitable, and sustainable transportation. The Project also demonstrates the City's commitment to zero-emission public transit, to delivering modern amenities for SFMTA employees, and to contributing a new building with improved site connectivity and urban design to the Mission and Potrero neighborhoods. As a core facility for the SFMTA's citywide transit operations, the Project represents an operationally critical public infrastructure project for the City.

Additionally, development plans are proposed to build mixed use commercial and residential uses adjacent to and above the Bus Yard Component to help the City towards fulfilling its 2022 Housing Plan. As an alternative, if housing above the Bus Yard Component is not feasible, City may choose to build a Paratransit Facility above the Bus Yard Component as a permanent site for paratransit operations, which are currently located on leased land elsewhere.

The Project consists of a single, integrated facility with a Bus Yard Component and Common Infrastructure, which are generally described as follows. Joint Development Alternative 1 or 2 would be subject to a separate HCC Agreement:

**Bus Yard Component (or BYC).** The BYC shall be a podium structure with four levels for bus storage and maintenance. The BYC includes bus and non-revenue vehicle parking and circulation; bus maintenance service and storage facilities; and administration offices, a bus operator training facility, and other support spaces. The BYC must have the minimum capacity to store at least 213 buses, which is a nearly 50% increase in capacity from the current operation. In addition, for resiliency purposes, the BYC must be built to structural and seismic standards that exceed the minimum code requirements. The BYC will have the required infrastructure to support the SFMTA's future transition to a fully battery electric bus fleet, and shall achieve LEED Gold rating and meet other City sustainability policies. The BYC shall also include a retail space at the corner of 17<sup>th</sup> and Hampshire, provided as a 'warm shell' that is operationally ready for permitted occupancy with electrical and water service metered separately from the Infrastructure Facility, security card access, and a surveillance system.

**Joint Development Alternative 1 Housing and Commercial Component (or HCC):** The potential HCC is the preferred alternative, which is envisioned to be a multi-floor housing project immediately adjacent to and on the perimeter of the Bus Yard Component podium along Bryant Street and one or more multi-floor housing projects on top of the Bus Yard Component podium. This option would also include ground floor uses, appropriate for a diverse neighborhood, to activate street frontages at the perimeter of the podium such as commercial or other uses. HCC development is not part of the Project and is subject to a separate HCC Agreement.

**Joint Development Alternative 2 Paratransit Component (or Paratransit):** Should housing development on top of the Bus Yard Component podium be deemed infeasible, per the terms of the HCC Agreement, then the City may direct the Principal Project Company to develop Paratransit Facility on top of the BYC podium. Paratransit would provide facilities and provisions to enable the SFMTA to service, maintain, and store a fleet of buses and vans. Paratransit will consist of bays and shops, operations areas, maintenance areas, and vehicular ramps extending onto the roof of the BYC providing access to and from the BYC podium roof. Please refer to *Division 3* of the Technical Requirements for a complete definition of and requirements for the

Paratransit Facility. Also, subject to the HCC Agreement, a multi-floor housing project immediately adjacent to and on the perimeter of the Bus Yard Component podium along Bryant Street will be developed as part of this Alternative.

**Common Infrastructure (CI).** The Common Infrastructure is the physical infrastructure shared by the BYC and the Joint Development Alternatives. The scope of the Common Infrastructure generally includes: (a) the BYC's structural system necessary to support either Joint Development Alternative; (b) the complete building envelope of the Facility, including cladding, waterproofing, and insulation; (c) shared vertical circulation elements, such as stairs, emergency egress, and elevators; (d) shared or common areas such as open space (e.g., public or private), shared lobbies, and shared service areas (e.g., loading docks, storage spaces, waste handling facilities, etc.) excluding residential use lobbies and elevators; (e) shared or common utility and building systems (e.g., systems such as mechanical, electrical, plumbing, fire and life safety, communications, etc.) and their corresponding spaces and vertical/horizontal distribution chases; and (f) drainage and stormwater management systems. The scope for the Common Infrastructure is defined below.

Together, the Bus Yard Component and the Common Infrastructure make up the Infrastructure Facility. For an avoidance of doubt, the Infrastructure Facility must fully enable the design, construction, operations and maintenance of either Joint Development Alternative. The entirety of the Infrastructure Facility requirements are provided throughout this Exhibit 18 (Technical Requirements).

## Scope of Common Infrastructure

Table 1 below defines the systems, spaces, and elements considered Common Infrastructure to be delivered by Principal Project Company as part of the Project. Each item is further defined in the Technical Requirements or will be required through the Regulatory Approvals process.

**Table 1: Facility’s Systems, Spaces, and Elements included in the Common Infrastructure**

Common Infrastructure Scope Item	Description
<b>Building Systems</b>	
Structural system	The portions of the vertical and lateral structural system of the BYC needed to support the HCC. This includes: (a) the BYC’s roof structure supporting the HCC over it; (b) the vertical structure and complete foundations system; and (c) the BYC’s complete lateral force resisting system including foundations, collectors, etc.
Building envelope	The complete exterior envelope of the entire Facility, including cladding, waterproofing, and insulation. The building envelope includes the waterproofing system of the roof structure supporting the HCC over the podium.
Demising walls separating the BYC from the HCC	If Principal Project Company’s approach for the Project provides demising walls that are designed and constructed as a single wall assembly, then demising walls will be considered to be part of the Common Infrastructure. If Principal Project Company’s approach for the Project provides demising walls that are designed and constructed as two separate and independent wall assemblies – one facing the BYC and the other facing the HCC –, then each will be considered to be part of the corresponding Project component.
Signage and wayfinding systems	All signage and wayfinding components for the building spaces allocated to the Common Infrastructure.
Building MEP systems and common utility systems	If Principal Project Company’s approach for the Project includes common utility systems for the Facility as a whole, as described in <u>Division 4 (Supplementary Design Criteria)</u> of the Technical Requirements, then the common utility systems will be part of the Common Infrastructure. In this case, they will include the Facility-wide building management system. If Principal Project Company’s approach for the Project provides for separate building mechanical, electrical, and plumbing systems for each Project component, then each such system will be part of the corresponding Project component. In this case, each component will have an independent building automation system (BAS). In all cases each Project component shall have separate metering.

<b>Common Infrastructure Scope Item</b>	<b>Description</b>
Fire and life-safety systems	<p>If Principal Project Company's approach for the Project includes an integrated Facility-wide fire and life-safety system, then the fire and life-safety system will be considered to be part of the Common Infrastructure. In this case, it will include the Facility-wide fire and life-safety control systems.</p> <p>If Principal Project Company's approach for the Project provides for separate fire and life-safety systems for each Project component, then each such system will be considered to be part of the corresponding Project component. In this case, each component will have an independent fire and life-safety control systems</p>
Civil and Site utility systems	<p>The Facility's stormwater drainage systems (including risers, inlets, catch basins, sump pumps, sewer ejector pumps, surge tanks, sub-drains, separators, and piping), water distribution systems (including mains, water treatment equipment, storage, controls, valves, irrigation for common use areas, non-potable/reuse systems, fire suppression systems, and meters), sanitary sewer systems (including sewer lines, lift stations, main connections, underground delivery systems, separators, backflows, and traps), utility connections, and related systems.</p> <p>Each Project component shall have separate metering.</p>
<b>Building Spaces</b>	
Building system spaces	<p>All rooms containing a supportive function for any civil and site utility systems, MEP systems, and/or common utility systems that are allocated to the Common Infrastructure as described above.</p> <p>Includes their associated distribution chases, shafts, or raceways, whether vertical or horizontal.</p>
Vertical circulation	<p>All stairs, emergency egress, escalators, and elevators in the Facility, that have shared uses by the BYC and HCC. This includes all the mechanical and electrical systems for vertical conveyance systems that have shared used by the BYC and the HCC. For avoidance of doubt, vertical circulation elements that are for the exclusive use of either the BYC or the HCC are not included in the scope of the Common Infrastructure.</p>
Common-use spaces	<p>All common use enclosed or open spaces (whether public or private, including the podium roof open space), any shared entrance lobbies, shared restrooms (whether public or private), and shared service areas (e.g., loading docks, storage spaces, waste handling facilities). For avoidance of doubt, entrance lobbies or other spaces that are for the exclusive use of either the BYC or the HCC are not included in the scope of the Common Infrastructure.</p>

BYC = Bus Yard Component

HCC = Housing and Commercial Component

MEP = mechanical, electrical, and plumbing

# 1. GENERAL PROVISIONS

## 1.1. PROJECT MANAGEMENT

- A. Principal Project Company is responsible for all elements of the management of the Project. Principal Project Company shall manage the Project through the application of a defined management approach, procedures, systems and reporting mechanisms, designed to maintain control of scope, schedule, quality, and budget, as further defined herein.
- B. Where submittals to the City are required in this Division 1 and other sections of this Exhibit 18, they shall be made in accordance with the submission dates and for the City action defined in Exhibit 18, Division 1 Appendix B (Initial List of Submittals).
- C. When planning or executing Project management, Principal Project Company shall consider and address all applicable Law, including those in Exhibit 16 (Federal, State, and Local Requirements) and other requirements that may result from the Project receiving Federal funding.

### 1.1.1. Project Management Plan

- A. Principal Project Company shall submit to the City a D&C Project Management Plan (PMP) and incorporating the essential elements of a successor plan for IFM Services (the “IFM Management Plan”) that describes the management approach, procedures, systems and reporting mechanisms, and provides scope, schedule, quality, and cost management for the D&C Period. Principal Project Company shall manage the Project in accordance with the City-approved PMP.
- B. Principal Project Company’s PMP shall, at a minimum:
  - 1. Provide a detailed Project description and summary scope of work.
  - 2. Provide clear, actionable and measurable objectives of the Project.
  - 3. State the purpose of the PMP, which description shall delineate how the Project is going to be managed by Principal Project Company, with support from and through the performance of Principal Project Company-Related Entities, including separate D&C Contractor and IFM Provider.
  - 4. Describe and distinguish between the roles and responsibilities, including the organizational structure, of the Principal Project Company and Principal Project Company-Related Entities to perform their corresponding scope of the Work as well as how the Principal Project Company will manage the interfaces where one entity’s corresponding scope of the Work interfaces with another.
  - 5. An organizational chart that clearly illustrates these roles and responsibilities among Principal Project Company and Principal Project Company-Related Entities.
  - 6. Identify the products and services that the Project will deliver to the City and others.
  - 7. Incorporate the Project Schedule.
  - 8. Identify the key Stakeholders (and their personnel), defining their roles and responsibilities on the Project.
  - 9. Describe the process for managing and reporting on progress status against the baseline requirements in the various plans required by the Technical Requirements.

10. Describe the process for information management, how Principal Project Company will exchange information with the City.
11. Describe change management procedures and protocols to incorporate and accept modifications to the Agreement scope.
12. Explain the development, establishment, and management approach for the Project Schedule, and how progress measured against the planned schedule will be evaluated and reported.
13. Describe (i) the process for developing, implementing, and managing a D&C Quality Management Plan, and (ii) how quality results will be independently observed, measured, reported, and documented for the Project to ensure that the Project deliverables and completed Work meet the minimum required standards of quality.
14. Explain how human and material resources will be applied to the Project.
15. Define the lines of communication and the methods of communication to be used, identifying roles and responsibilities with respect to communications, and defining what each individual role is responsible for communicating and to whom, how frequently they need to communicate, which communications tools and media will be used, and any specific triggers for initiating communication.
16. Coordinate and incorporate all other Project-specific plans, including those supplemental plans defined in Section 1.1.7 (Design and Construction Management Plans), identifying through cross-referencing such plans.
17. Be sufficiently developed and readily updatable to facilitate external audits, including audits performed by the City.
18. Describe how the Principal Project Company plans to utilize Disadvantaged Business Enterprises .

**1.1.2. General Coordination with the City**

- A. Principal Project Company shall establish a comprehensive coordination process with the City to minimize risk impacts to scope and schedule performance associated with contracts for design, construction, and systems integration activities. Refer to separate provisions in Section 1.12 (Coordination with Third Parties) and Section 1.13 (Coordination with Utility Owners).

**1.1.3. Project Meetings**

- A. Principal Project Company shall conduct Project meetings to enable orderly review of the progress of the Work with the City, and to provide for systematic discussion of items and issues affecting the progress and outcome of the Work. The following are initial and ongoing meeting minimum requirements, Principal Project Company shall propose additional meetings as needed to fulfil the Agreement requirements.
- B. Principal Project Company personnel attending and participating in Project meetings as Principal Project Company representatives shall have the required levels of authority to commit Principal Project Company to actions and resolutions agreed upon during such meetings.
- C. Principal Project Company shall electronically manage meeting calendars, notifications and invitations on a real-time basis.

- D. Principal Project Company shall, to the greatest extent possible, provide to the City agendas and meeting materials at least three Business Days in advance of meetings. Principal Project Company shall lead and facilitate meetings and shall prepare and distribute meeting minutes to the City and all attendees for their review and comment within three Business Days after concluding the meeting.
- E. The City may require, with reasonable notice to Principal Project Company, additional meetings at any time, at no additional cost to the City.

**1.1.3.1. Project Work Initiation Meeting**

- A. Principal Project Company shall conduct a Project Work initiation meeting upon receiving the City's notification of Contract award and shall submit to the City the agenda and meeting minutes. Key Personnel shall attend the Project Work initiation meeting and those in attendance shall address:
  - 1. Project Management Plan, including Key Personnel resumes and team organization chart.
  - 2. Initial Schedule.
  - 3. Approach to D&C Work and IFM Services.
  - 4. Information Management Plan.
  - 5. Third Party and Utility Owner Coordination Work and Project Execution Plans, including integration and permits.
  - 6. Quality Program Plan.
  - 7. Plan and status for development of various other required Project Plans.
  - 8. Submittal procedures and document control/records management.
  - 9. Inclusivity, including Small Business Enterprise, Local Business Enterprise, Local Small Business Enterprise and Disabled Veteran Business Enterprise participation.
  - 10. Approach to sustainability.
  - 11. Public Outreach Plan.
  - 12. Insurance certificates and other commercial/financial instruments needed before commencing with the Work.
  - 13. Early Works and other topics deemed necessary by the City or Principal Project Company.

**1.1.3.2. Design Initiation Meeting**

- A. Principal Project Company shall conduct a Design Initiation Meeting upon receiving the City's NTP 1 and shall submit to the City the agenda and meeting minutes. Key Personnel shall attend the Design Initiation Meeting and those in attendance shall address:
  - 1. Design Management Plan, including lead personnel and design team organization chart.
  - 2. Explanation of Design Work locations and logistics.
  - 3. Submittals list and design review procedures.

4. Principal Project Company Design Quality Plan.
5. Design of safety considerations.
6. Design of security considerations.
7. Information Management Plan.
8. Third Party and Utility Owner Coordination Work Plans, including integration and permits.
9. BIM Project Execution Plan.
10. Other topics deemed necessary by the City or Principal Project Company.

**1.1.3.3. Construction Initiation Meeting**

- A. Principal Project Company shall conduct the Construction Initiation Meeting prior to NTP2 and shall submit to the City the agenda and meeting minutes. Key Personnel shall attend the Construction initiation meeting and those in attendance shall address:
1. Major construction and field activities.
  2. Construction Management Plan, including lead personnel and construction team organization chart.
  3. Explanation of construction field offices, storage yards, materials laydown and staging areas, crane locations, etc..
  4. Most current Project Schedule incorporating timing of deliveries, construction phasing plans, and other worksite logistics.
  5. Principal Project Company Construction Quality Plan.
  6. Construction Quality Work Plans.
  7. Information Management Plan.
  8. Third Party and Utility Owner Project Execution Plans, including integration and permits.
  9. Plan to demarcate any restricted zones and within the Project Site.
  10. Construction safety plans in compliance with Division 10 of the Technical Requirements (Exhibit 18)
  11. Site Security Plan.
  12. Health and illness prevention plans.
  13. Transportation Management Plan and Traffic Control Plan.
  14. Environmental permitting, monitoring and mitigation measures compliance plans and reporting.
  15. Project controls processes and procedures for maintaining and retrieving current status documents, and including protocols for archiving and safekeeping Record Documents.
  16. BIM Project Execution Plan.
  17. Other topics deemed necessary by the City or Principal Project Company.

#### **1.1.3.4. Quality Initiation Meeting**

- A. Principal Project Company shall conduct a Quality initiation meeting within 15 Days after concluding the Project Work initiation meeting and shall submit to the City the agenda and meeting minutes. This meeting shall include discussion of all aspects of the Principal Project Company Quality Program (see Section 1.4.1) with a focus on implementing required processes and procedures.
- B. The meeting shall introduce individuals comprising Principal Project Company's quality management staff during the D&C Period, and shall include discussion on testing and inspections, quality program surveillance and audits, and identifying and resolving nonconforming Work and deficiencies in both Design Work and Construction Work.

#### **1.1.3.5. Environmental Compliance Initiation Meeting**

- A. Principal Project Company shall conduct an Environmental Compliance initiation meeting within 60 Days after NTP1 and prior to commencing any D&C Work, and shall submit to the City the agenda and meeting minutes. The meeting shall include discussion of the Sustainability Management Plan, all aspects of the environmental mitigation, protection, and permitting requirements applicable to the D&C Period, and shall address green initiatives associated with sustainable design and construction, including the environmental procedure requirements in Division 10 of the Technical Requirements. Principal Project Company shall show these permitting targets (or milestones) on the Project Schedule and shall explain the work plans and processes to be followed to achieve each requirement.

#### **1.1.3.6. Weekly Project Coordination Meetings**

- A. Weekly Project coordination meetings shall be conducted by Principal Project Company throughout the D&C Period covering a three-week Project Schedule review period (one week back and two weeks forward) of daily activity including schedule activities and sub-activities, interfaces, milestones, deliveries, and other events significant to Project Schedule performance.
- B. Principal Project Company shall prepare and submit to the City the agenda for each Weekly Project coordination meeting and include meeting minutes from the previous week's meeting.
- C. Representatives of Principal Project Company's team responsible for the activities presented in the Three-week Look-ahead Activity Reports, as defined in Section 1.2.1.7 (Look-Ahead Activity Reports), shall be present to discuss activities and coordination with others.
- D. Weekly Project coordination meetings shall include invited representatives of Third Parties, Utility Owners, and specialty engineers and subcontractors as necessary. Principal Project Company shall invite the City to these meetings, who may have representatives attend representing subject matters related to the schedule activities.
- E. Weekly Project coordination meetings shall address, but not be limited to, the following:
  - 1. Precedence and other constraints caused by outside parties that occur during the forthcoming two weeks that may potentially delay the Project Schedule activity or sub-activity.

2. Issues and actions that are needed to maintain these scheduled activities and sub-activities, such as Regulatory Approvals, material deliveries, equipment mobilization and setup. and
3. Actual schedule accomplishment defined in the previous week reflected in the Project Schedule.
4. Progress on Regulatory Approvals and Regulatory Approvals Plan
5. Status and track of Delay Events and Relief Events and
6. Status and tracking of City Changes.

#### **1.1.3.7. Monthly Progress Meetings**

- A. Principal Project Company shall conduct Monthly Progress Meetings and shall submit to the City meeting minutes. Attendees shall include, at a minimum, Key Personnel and the City representatives. Principal Project Company shall commence the first of Monthly Progress Meetings one week after submission of the first Monthly Progress Status Report, and continue these progress meetings throughout the D&C Period. Such meetings shall include, at a minimum, discussion of progress updates and issues for the following topics, as appropriate:
1. Project Schedule, including actual progress during prior 30-day reporting cycle and progress forecasted for next 90 Days.
  2. Design Management Plan and Construction Management Plan updates.
  3. Quality. Quality Program Plan and various quality plan updates.
  4. Safety. Health and Safety Plan update, see Section 01 35 45 of Division 10 of the Technical Requirements.
  5. Security. Site Security Plan update.
  6. Environmental compliance and permitting. Sustainable Management Plan update.
  7. Third Party and Utility coordination. Third Party and Utility Project Execution Plan updates.
  8. Traffic detours and maintenance of traffic. Transportation Management Plan and Traffic Control Plan updates.
  9. Inclusivity.
  10. Public outreach. Public Outreach Plan update.
  11. Submittals and review process.
  12. Design modifications and other changes in scope, coordination on Allowance-related scope, schedule and costs impacting budget and schedule forecasts, along with proposed mitigations and/or corrections. Regulatory Approvals Plan, Design Management Plan and Design Progress Tracking Reports. Substantial Completion planning and coordination.
  13. Other pertinent and timely discussion topics.

#### **1.1.3.8. Ongoing Coordination Meetings**

- A. Principal Project Company shall arrange and minute additional meetings as described herein Division 1, and as needed to fulfil the Agreement, such as:
  - 1. Third Party coordination meetings
  - 2. Utility coordination meetings
  - 3. City outreach meetings
  - 4. Community Stakeholder meetings
  - 5. Potrero Yard Neighborhood Working Group meetings

#### **1.1.3.9. Special Meetings**

- A. Principal Project Company shall conduct special meetings as necessary throughout the D&C Period, including meetings at the City's request. Special meetings may include timely discussions of any issues relevant to the Project.
- B. Principal Project Company shall provide, within the meeting invitation, a brief narrative about the issue or concern and a brief narrative of any suggested solutions to mitigate adverse schedule and cost impacts.
- C. Principal Project Company shall schedule meetings to discuss testing, performance demonstration, and operational readiness with no less than five Business Days' advance notice to invitees, and shall endeavor to enclose briefing materials within the body of the meeting invitation.
- D. Principal Project Company shall schedule other special meetings with not less than five Business Days' notice otherwise it is in the City's sole discretion for participation in the meeting.

#### **1.1.4. Key Personnel**

- A. Principal Project Company shall provide individuals meeting the requirements of each Key Personnel position defined in this Section 1.1.4.
- B. Principal Project Company shall prepare, submit to the City, and maintain a Key Personnel register with name, firm, title, project role, address, email, and phone number for each Key Personnel as well as resumes. Key Personnel shall meet the requirements of Section 9.5 of the Agreement. Key Personnel shall not be changed or replaced without the City's concurrence as evidenced by documented review and acceptance of a replacement in advance.
- C. Principal Project Company shall submit to the City resumes for any proposed replacement of Key Personnel, each a Candidate Key Person Replacement resume with three references, aligned with the requirements of the Agreement. References shall be from previous owners, clients, or employers and include the name, position, company, or agency and current postal and email addresses and phone numbers for each reference. Accordingly, the City will formally respond and reserves the right to interview replacement Key Personnel candidates prior to their acceptance.

- D. Where Key Personnel are required to be located at the Project Site, such requirement is deemed inclusive of location at the offices defined in Section 1.11.4.2 (Project Management Office Requirements) and Section 1.11.4.3 (Construction Management Office Requirements).

**1.1.4.1. Project Director**

- A. The Project Director shall be responsible for managing PPC's day-to-day activities on a full-time basis for the Project, including ongoing communications and coordination with City and acting as the main point of contact between City and PPC.
- B. The Project Director shall have, at a minimum, 20 years of competent experience in a senior position within an organization where his/her principal professional experience has been as an infrastructure developer.

**1.1.4.2. Project Manager**

- A. The Project Manager shall have full responsibility for the execution of the Work on behalf of Principal Project Company.
- B. The Project Manager for the D&C Period shall have, at a minimum, 15 years of competent experience in a senior position within an organization where he/she had responsibility for:
  - 1. At least one P3 project with a capital construction cost of more than \$150 million and a contract duration greater than 15 years; and
  - 2. Integrating design, construction, operations and maintenance on at least one project of similar complexity.
- C. The Project Manager for the IFM Period shall have, at a minimum, 10 years of relevant experience in a senior position within an organization where he/she had responsibility for directing operations and maintenance related activities for projects of similar complexity.

**1.1.4.3. Deputy Project Manager**

- A. The Deputy Project Manager shall provide support to the Project Manager in performing the daily management and coordination of the Work on behalf of PPC.
- B. The Deputy Project Manager for the D&C Period shall have, at a minimum, 8 years of progressive relevant experience where he/she had provided support for:
- C. At least one design-build or P3 project with a capital construction cost of more than \$150 million of similar scale and complexity.
- D. Integrating design, construction, operations and maintenance on at least one project of similar complexity

**1.1.4.4. Equity Member's Project Principal**

- A. The Equity Member's Project Principal is the person each Equity Member proposes as their representative principally responsible for that Equity Member's role on the PPC.
- B. The Equity Member's Project Principal shall have, at a minimum, 15 years of competent professional experience.

- C. If the Equity Member's Project Principal will also serve as the PPC's Project Director, that Equity Member's Project Principal shall have a minimum of 20 years of competent experience in a senior position within an organization where his/her principal professional experience has been as an infrastructure developer.

**1.1.4.5. Engineer(s) of Record**

- A. Each Engineer of Record (EOR) shall have a bachelor's degree or equivalent diploma from an accredited educational institution and shall be a currently licensed professional engineer registered under the laws of the State of California. Engineer(s) of Record shall have experience, in a lead design role, on at least two projects of similar scope and complexity, each with a capital construction cost of not less than \$150 million, completed within the last 10 years.
- B. An EOR may also serve in the role of the Design Manager subject to demonstration of his/her qualifying experience and competence to the City's satisfaction.

**1.1.4.6. Architect(s) of Record**

- A. Every Architect of Record (AOR) shall have a bachelor's degree or equivalent diploma from an accredited education institution and each individual shall be a currently licensed architect registered under the laws of the State of California. AOR(s) shall have experience, in a lead design role, on at least two projects of similar scope and complexity, each with a capital construction cost of not less than \$150 million, completed within the last 10 years.
- B. An AOR may also serve in the role of the Design Manager subject to demonstration of his/her qualifying experience and competence to the City's satisfaction.

**1.1.4.7. Design Manager**

- A. The Design Manager is responsible for managing and overseeing the Project's development and coordination of the integrated design on behalf of Principal Project Company.
- B. The Design Manager shall have relevant experience on at least three design-build projects, each with a capital construction cost of not less than \$100 million. The Design Manager shall have at least 10 years of relevant design, supervisory and management experience.
- C. The Design Manager shall be located in San Francisco bay area, assigned full-time from Financial Close until all major design milestones are completed.

**1.1.4.8. Construction Manager**

- A. The Construction Manager is responsible for managing and overseeing the activities of construction on behalf of Principal Project Company, from pre-construction to the end of construction and turnover of the facility to its end-users.
- B. The Construction Manager shall have previous relevant experience as a project/construction manager on at least three design-build projects, each with a capital construction cost of not less than \$150 million.
- C. The Construction Manager shall be located at the Site, assigned full-time and exclusively for the Project throughout the D&C Period and until Substantial Completion.

#### **1.1.4.9. Quality Program Manager**

- A. The Quality Program Manager shall have the authority and responsibility for managing and overseeing quality-related activities for all aspects of the Work, including the establishment and maintenance of, and compliance with, the Quality Program Plan (PQPP).
- B. The Quality Program Manager's Project-specific responsibilities shall be limited to only quality assurance and quality improvement. The Quality Program Manager shall act independently from Principal Project Company's staff and the duties of such staff associated with the execution of the Work.
- C. The Quality Program Manager's authority shall be independent of the Project Manager and shall be equivalent to the authority of the Project Manager with respect to assuring and controlling quality results. It shall be the duty of the Quality Program Manager to report to superiors above the level of the Project Manager, and to the City, on the performance of, and compliance with, all Project management and quality plans. The Quality Program Manager shall be assigned full-time and exclusively for the Project throughout the D&C Period.
- D. The Quality Program Manager shall have a minimum of 10 years of relevant quality management and supervisory experience on projects of similar scope and complexity. The Quality Program Manager shall have undertaken training in the use and application of internationally recognized quality programs, including the application of ISO 9001.

#### **1.1.4.10. Third Party and Utility Coordination Manager**

- A. The Third Party and Utility Coordination Manager shall serve as the main point of contact for utility owners and the City, overseeing all utility work performed for the mutual benefit of the PPC and the City.
- B. The Third Party and Utility Coordination Manager shall have, at a minimum, 5 years of previous relevant experience in at least two design-build projects, with at least one in the San Francisco area within the last five years.
- C. The Third Party and Utility Coordination Manager shall be located at the Project Site, assigned full-time from Commercial Close until the end of the D&C Period, and upon request by the City, shall remain available until Final Acceptance.

#### **1.1.4.11. Project Safety Representative**

- A. The Project Safety Representative (PSR) shall manage and oversee safety issues related to the Project, working closely with the Design Manager and the Construction Manager during the D&C Period and as specified in Division 10, section 01 35 45 of the Technical Requirements. During the IFM Period, the PSR shall work closely with the IFM Manager to assure safe and secure operation of the IFM Facilities, with required protection for patrons, employees and the public.

#### **1.1.4.12. Infrastructure Facility Maintenance (IFM) Manager**

- A. The IFM Manager shall be responsible and authorized to act on behalf of Principal Project Company in matters pertaining to operations and maintenance of the IFM Facilities. Principal Project Company shall keep the City informed, in writing, of the identity and activities of the IFM Manager.
- B. The IFM Manager shall have overall responsibility for Principal Project Company's IFM Services performed throughout the IFM Period and IFM Manager shall devote their time exclusively to their responsibilities in connection with this duty. City will have the right, using reasonable discretion, to approve or reject any IFM Manager selected by Principal Project Company if the qualifications under 1.1.4.8 are not met.
- C. The IFM Manager shall have at least 10 years of progressive experience in daily maintenance and capital replacement activities for operating facilities of similar scope and complexity. Experience shall include seven or more years in a qualifying management position.
- D. The IFM Manager shall be located in San Francisco assigned to the Project from no later than one year prior to the planned Substantial Completion and for duration of the IFM Period.

#### **1.1.4.13. Infrastructure Facility Maintenance Quality Manager**

- A. The IFM Quality Manager is responsible for effectiveness of Principal Project Company's quality personnel throughout the IFM Period, qualifying and supervising experienced personnel in sufficient numbers to adequately perform the duties and fulfill obligations addressed in the Quality Management Plan or equivalent controlling documents. Such quality personnel shall report directly to the IFM Quality Manager.
- B. The IFM Quality Manager shall hold a bachelor's degree or equivalent. The IFM Quality Manager shall have a minimum of five years of quality management experience on projects of similar scope and complexity and shall have undertaken training in the use and application of nationally recognized quality programs.

#### **1.1.5. Principal Project Company Services**

- A. Principal Project Company shall be responsible for providing the following services during the Term:
  - 1. Project management including cost control and management, schedule control and management, and risk management.
  - 2. Information management.
  - 3. Public information and communications.
  - 4. Utility coordination.
  - 5. Third Party coordination.
  - 6. Interface management.
  - 7. Environmental compliance and mitigation monitoring.
  - 8. Safety and Security.

9. Quality assurance and quality control.
10. Design, design management and design assurance.
11. Develop and manage Allowances for Infrastructure Facility.
12. Develop and manage Provisions required to support the Joint Development Alternatives.
13. Subsurface and Site investigations
14. Surveys and land surveying.
15. Pre-construction.
16. Procurement.
17. Administration of Contractors, Suppliers and Vendors.
18. Construction and construction management.
19. Commissioning, Verification and achieving operational readiness.
20. Infrastructure Facility maintenance services.
21. Asset management and inventory control.
22. Capital asset replacement.
23. Handback.

#### **1.1.6. Regulatory Approvals Plan**

Principal Project Company shall prepare and submit to the City a Regulatory Approvals Plan defining its approach to obtain all Regulatory Approvals including approvals from City departments in their regulatory capacity, and all Authorities Having Jurisdiction. This plan shall specifically address the Principal Project Company's construction permitting plan that is coordinated with the Project Schedule.

#### **1.1.7. Design and Construction Management Plans**

Principal Project Company shall prepare a Design Management Plan and a Construction Management Plans as supplements to the PMP.

##### **1.1.7.1. Design Management Plan**

- A. Principal Project Company shall prepare and submit to the City a Design Management Plan (DMP) describing its approach to undertake and achieve the requirements in Section 1.8 (Design Management).
- B. The DMP shall:
  1. Describe the design organizational structure, design phase management philosophy and staff positions, and descriptions of the organizational relationships within Principal Project Company's design, construction, IFM and quality management organizations;
  2. Describe the planned design packaging scheme and reviews process, including internal, City's proprietary review packages, and permit reviews by all AHJs;
  3. Describe the content and format of each design stage package submission;
  4. Describe process and environment prescriptions to ensure development and coordination of the integrated design progresses reasonably;

5. Address when and how coordination will occur with the City regarding Allowances and any other City-furnished and installed FF&E;
  6. Address provisions for the Joint Development Alternatives required in these Technical Requirements;
  7. Address how the design deliverables will be managed to fulfill their associated deadlines to submit them for reviews and/or approvals;
  8. Address how design reviews by the City will be managed by the Principal Project Company, including resolution and record-keeping of City design review comments;
  9. Address how changes to the Project will be recorded, tracked, and communicated; and
  10. Incorporate the Owner's Information Requirements and the BIM-enabled processes and workflows described in the BIM Project Execution Plan (see Section 1.10)
- C. The Design Management Plan shall include a section that describes the Principal Project Company's procedures to obtain proprietary and regulatory design reviews and, as applicable, approvals of Design Deliverables. All proprietary design reviews shall be consistent with Exhibit 11 (Submittal Review Process) and Section 1.8.5(Proprietary Design Reviews).

#### **1.1.7.2. Construction Management Plan**

- A. Principal Project Company shall prepare and submit to the City a Construction Management Plan (CMP) describing its approach to undertake and achieve the requirements in Section 1.11 (Construction Management).
- B. The CMP shall include:
  1. The construction organizational structure, construction phase management and staff positions, and descriptions of the organizational relationships within Principal Project Company's design, construction, IFM, and quality management organizations;
  2. Principal Project Company's construction packaging plan, and include initial construction phasing and sequencing approach to the Project;
  3. Principal Project Company's process for conducting pre-construction surveys for existing structures, utilities, and other infrastructure, as appropriate for the Work;
  4. Explanation of how Principal Project Company will perform construction planning and logistics, with specific mention of when and how construction coordination will occur with the City regarding any City Furnished Equipment and
  5. Request for Information and Change processes
    - a. Including but not limited to changes during construction that affect the Joint Development Alternatives
    - b. Such changes are subject to the requirements of Exhibit 9 (Change Procedures).

#### **1.1.8. IFM Management Plan**

Principal Project Company shall prepare and submit to the City a revised IFM Management Plan that describes the management approach for delivering the IFM Services. Principal Project Company's preliminary IFM Management Plan shall, at a minimum, among other tasks:

- A. Provide clear description and delineation of the IFM Services and SFMTA O&M Services.

- B. Develop a detailed plan to address customer service and work management support, including the approach to customer interface procedures and protocols through the Help Desk. This will also include the approach to receive, schedule and dispatch work requests.
- C. Prepare a Human Resource plan that outlines the resourcing structure including on-site and off-site qualified personnel to perform the IFM Services. This will include clear roles and responsibilities.
- D. Outline Principal Project Company's approach to maintain, repair, and replace elements of the Infrastructure Facility including Renewal Work, Scheduled Maintenance and Demand Maintenance. This will include:
  - 1. Estimated design life and Useful Life of assets.
  - 2. Criteria for determining whether rehabilitation, refurbishment or replacement will be necessary to meet performance and Handback requirements of assets.
  - 3. Identification of assets that are critical to the successful delivery of the project and require specific Scheduled Maintenance or subcontracting expertise.
  - 4. Process for assessing and reporting on the risk associated with asset failure and supporting mitigation strategies.
  - 5. Processes for ensuring that preventive maintenance is in line with Scheduled Maintenance plans
  - 6. Integration of IFM Services and the CAFM System
- E. Approach to the development of IFM Services procedures intended to guide the on-going service delivery by Principal Project Company across general management and project-specific service areas.
- F. Describe the process for developing a Quality Management Plan to manage and measure the quality of IFM Services
- G. Outline how the Building Information Model will be updated in line with Renewal Work and other IFM Services
- H. Approach to developing and maintaining assets such that they comply with the Handback Requirements

The revised IFM Management Plan shall be developed and submitted per the requirements in Division 7 of the Technical Requirements to approved by the City. Once approved, the final IFM Management Plan will supersede the preliminary IFM Management Plan included in Exhibit 2 (Project Management Plan).

## 1.2. PROJECT CONTROLS AND PERFORMANCE MEASUREMENT

### 1.2.1. Project Schedule

- A. It is expressly understood and agreed that the time of beginning, the rate of progress, and the time of completion of the work are of the essence of the Agreement. The Work shall be executed with such progress as required to prevent any delay to the Project, the Contract Deadlines, and the general completion of the Agreement.
- B. Principal Project Company's Initial Schedule shall be a detailed critical path method schedule, and shall govern all Work from the Effective date until NTP2.
- C. Principal Project Company's Project Schedule shall be a detailed critical path method schedule for the entire Project, applicable from NTP2 to Final Acceptance, and shall incorporate scheduling information details exhibited in the Initial Schedule and subsequently updated and refined through an interactive process defined in Section 1.2.1.1 (Project Schedules).
- D. The Project Schedule shall demonstrate that adequate planning, scheduling, and resource allocations occur to provide a reasonable and executable baseline work plan.
- E. Principal Project Company shall use the applicable Project Schedule for coordinating the various Work sequences, monitoring the progress of completed Work activities, identifying pending Work, and evaluating the effect of scope changes and re-sequencing of Work activities. The Project Schedule and subsequent revisions and updates shall comply with all requirements defined in Section 1.2.2 (Schedule Requirements) and shall be broken down into work packages and deliverables of reasonable duration for all activities, and not exceeding 10 working days for each construction activity for which progress can readily be reported and verified.
- F. The Project Schedule shall include all required City and Third Party activities and/or milestones. At a minimum, these activities and milestones shall include:
  - 1. Availability of right-of-way, reviews of submittals, and special instructions as may be detailed in the Contract Documents; and
  - 2. Adequate time for City to install and test any City-furnished FF&E related to an Allowance or the preliminary equipment list.
- G. The Project Schedule shall comply with all schedule requirements of the Contract Documents. The Project Schedule shall have activities depicting a logical sequence of coordinated work products and deliverables each of reasonable duration, generally of not more than 10 working days duration for construction activities, for which progress can be readily reported and verified.
- H. Design Work, including time-critical preconstruction planning and coordination, may commence immediately after Principal Project Company's receipt of NTP 1, provided however, that such activities are addressed in the Design Management Plan and Principal Project Company's Design Quality Plan, for which submissions have previously been received by the City.

- I. In the event the Contractor fails to define any element of work, activity or logic and the City review does not detect this omission or error, such omission or error, when discovered by the Contractor or City, shall be corrected by the Contractor at the next monthly Schedule Update and shall not affect any Contract Deadline.
- J. Pursuant to float sharing requirements of this Section, use of any float-suppression techniques such as preferential sequencing or logic, special lead/lag logic restraints, and extended activity times or durations are prohibited.
- K. The City-Furnished Equipment, if any, are the Principal Project Company's responsibility to identify as separate construction activities. Indicate delivery dates, logic ties to predecessor and successor activities or schedule windows of such items set forth in the Contract or furnished by the City.
- L. The Principal Project Company is responsible to include Project start-up, testing and commissioning activities in the Project Schedule detailing all activities needed to provide a fully functional facility that meets all building management systems, fire-life-safety and City requirements in accordance with Division 6 of the Technical Requirements.

#### **1.2.1.1. Project Schedules**

- A. Several forms of the Project Schedule shall be required, as further defined below:
  - 1. Project Schedule
  - 2. Revised Project Schedule
  - 3. Recovery Schedule(s)
- B. Principal Project Company shall archive each monthly progress report and schedule update, together with all the City-approved Project Schedules.
- C. Principal Project Company shall maintain an up-to-date and validated As-Built Schedule throughout the course of construction.

#### **1.2.1.2. Project Schedule**

- A. Principal Project Company shall submit to the City for review and approve an update to the Initial Schedule detailing all D&C Work activities between NTP2 and Final Acceptance to a Level 4 as defined in AACE 91R-16 "Schedule Development" and following all schedule requirements established in this section 1.2 of Division 1 in accordance with Exhibit 11 to the Agreement (Submittal Review Process). This update of the Initial Schedule shall be submitted no later than 90 Days prior to scheduled NTP2 and conform to all milestones in the Agreement and the Initial Schedule (as applicable). This Project Schedule, once accepted by the City, shall be saved by Principal Project Company as a unique schedule file that, along with its associated reports and back-up documentation, establishes the Project Schedule. A City-approved Project Schedule is a condition precedent to NTP2.
- B. Principal Project Company shall use the Initial Schedule as the basis for the Project Schedule, closely matching key activity sequences and milestones included in the Initial Schedule and conforming with all project schedule milestone requirements set forth in the Agreement.

- C. Prior to NTP 2, Principal Project Company shall provide progress reporting against the Initial Schedule.

#### **1.2.1.3. Revised Project Schedule**

- A. Principal Project Company shall, throughout the D&C Period, update the Project Schedule to reflect actual progress and status of the Work. These updates shall not amend the contractual milestones in this Agreement.
- B. If the Project Schedule needs to be amended as a result of a Change Order or Compensable Delay Event, the revised and City-approved schedule shall replace the previously established Project Schedule and, henceforth, shall be the Revised Project Schedule.

#### **1.2.1.4. Recovery Schedule**

- A. Whenever the Project Schedule shows any schedule activities with a completion date having 15 Days or more negative float, Principal Project Company shall prepare and submit to the City a Proposed Recovery Schedule. Such submittals shall include a list of all activity and resource changes required to eliminate such negative float and an accompanying narrative explaining the nature of such changes. The recovery schedule shall be a separate submittal from the Project Schedule Monthly Update (see Section 1.2.1.5), unless the City elects to waive the separate submittal upon determining that current Project Schedule is acceptable with only minor changes.
- B. If the proposed schedule revisions include sequence changes, Principal Project Company shall provide a fragmentary network (fragnet) schedule diagram that compares the original sequence to the revised sequence.
- C. After obtaining formal acceptance by the City, the approved Recovery Schedule shall replace the previously established Project Schedule and shall be the Project Schedule.
- D. If Principal Project Company's proposed schedule revisions are not acceptable to the City, then the City's comments shall form the basis for resubmission of Principal Project Company's proposed recovery schedule

#### **1.2.1.5. Project Schedule Monthly Updates**

- A. Principal Project Company shall prepare and submit to the City Project Schedule Monthly Updates to reflect actual progress and to define future activities. The last day of each monthly reporting period shall be the data date used to calculate the schedule.
- B. The current Project Schedule shall be the basis for monthly updates, which shall:
1. Show activities that have started, are on-going, or have completed during the reporting period.
  2. Show actual start and finish dates for activities.
  3. Show remaining duration for on-going activities, with remaining duration based on updated determinations of the amount of time required to complete the work activity.
  4. Modify activity relationships or otherwise re-baseline the currently established Project Schedule only as necessary to correct out-of-sequence progress for on-going activities or to accurately reflect Principal Project Company's plan for completing remaining Work.

5. Be accompanied by a narrative report, which shall:
    - a. Identify the Project Schedule version.
    - b. Provide a summary of, and reasons for, revisions and deviations (if any).
    - c. Identify milestones.
    - d. Include started activities for the period.
    - e. Include completed activities for the period.
    - f. Explain missed activity starts for the period.
    - g. Explain missed activity completions for the period.
    - h. Discuss critical resources.
    - i. Describe the critical path.
    - j. Identify near-critical activities (total float less than nine Days).
    - k. Describe any pending Time Impact Analysis (TIA).
    - l. Describe Project issues encountered.
    - m. Identify potential changes from the original accepted Baseline Schedule (and last accepted update thereof).
    - n. Describe impacts to current period activities.
    - o. Highlight upcoming Project-related the City and Third Party activities within the next six months.
  6. Include the following reported schedule data in supporting tables:
    - a. Critical Path.
    - b. Added activities.
    - c. Deleted activities.
    - d. Added predecessors.
    - e. Revised relationship lags.
    - f. Deleted predecessors.
    - g. Revised original durations.
    - h. Revised activity names.
    - i. Changed calendars.
    - j. Activities started during the period.
    - k. Activities completed during the period.
    - l. Near-critical activities (total float less than nine Days).
    - m. Activities scheduled but not started during the period.
    - n. Activities scheduled but not completed during the period. and
    - o. Activities started or completed in the previous period.
- C. Principal Project Company shall submit Project Schedule Monthly Updates properly coordinated with each Monthly Progress Status Report, as defined in Section 1.2.4.1 (Monthly Progress Status Report).

#### **1.2.1.6. Submittal Schedule for D&C Submittals**

- A. Principal Project Company shall prepare and submit to the City a preliminary Submittal Schedule for the D&C Period, identifying design documents and showing dates by when all Submittals (documents, data, , samples, mock-ups, etc.) required by the Contract Documents will be submitted to the City and the appropriate AHJs. This preliminary submittal schedule shall be consistent with the required submittal dates in the Project

Schedule. The required submittal dates in the finalized Submittal Schedule shall be coordinated with the Project Schedule and any updates thereafter.

#### **1.2.1.7. Look-Ahead Activity Reports**

- A. As an integral part of every Weekly Coordination Meeting defined in Section 1.13 (Weekly Coordination Meetings), a one-week look-back and two-week look-ahead schedule (also called a "Three-Week Look-ahead Report") shall be generated from the latest evaluation of actual progress based on each activity in the look-ahead schedule corresponding to an activity in the Project Schedule.
- B. The Three-Week Look-Ahead Report shall show activities that occurred over the previous week and those necessary to meet the schedule over the ensuing two weeks. The report shall include, at a minimum, all activities planned to be performed during the look-ahead period. activities related to Project interfaces, the City-actions, and Third Party and Utility Owner coordination. and time-critical material deliveries.
- C. The Three-Week Look-Ahead Report shall be a spreadsheet containing activity IDs and descriptions from the Project Schedule and include the following information: start and finish dates for these activities as they will be performed on Project Site showing the planned prosecution of the activity (with interruptions and resumptions of work), total float from the schedule current during that month, original duration, remaining duration, percent complete, and pertinent remarks as to activity status. The Three-Week Look-Ahead Report shall be submitted to the Construction Manager at least three days prior to the weekly meeting for review. Submit copies of Three-Week Look-Ahead Report on 11 inch by 17 inch paper. The look-ahead must indicate which activities are on the critical path.
- D. During each Weekly Coordination Meeting, the Three-Week Look-Ahead Report shall guide attendees' discussion and review of activities, whether planned or ongoing.

#### **1.2.2. Schedule Requirements**

- A. The Project Schedule, in all its forms, shall comply with the Contract Documents and shall be consistent with project planning and scheduling best practices. The Project Schedule shall, at a minimum, conform to the requirements in the following subsections:
- B. Include a written narrative that explains the approach for meeting all milestones and Contract Deadlines. The narrative shall include a clear description of the critical path activities from beginning to end. The narrative shall set out the schedule basis and assumptions, including determining activity durations used to develop the critical path network and methodology for resource loading.
- C. Include activities that meet the following minimum requirements:
  - 1. Activity durations shall be the total number of actual days required to perform the activity, including consideration of normal weather impact on completion of the activity.
  - 2. Activity durations shall be based on anticipated production rates for design and preconstruction activities, labor (crafts), equipment and materials required to perform each activity on a normal workday basis.
  - 3. Each activity shall have one predecessor and one successor (excluding the Project start and finish milestones).

4. All activity names shall be clearly and uniquely named with a description of Work readily identifiable to inspection staff. Each activity shall have a descriptive label consisting of at least one action or work function such as submit, form, place, excavate, etc.. an object such as design calculations, slab, concrete, foundation, etc.. and location such as gridline, sector, building, etc..
- D. Include all major activities of the Work in sufficient detail to enable the City to monitor and evaluate design and construction progress from Financial Close through Final Acceptance.
- E. Become the basis for standalone, partially delineated schedules as may be required by Third Party and Utility Owner Agreements.
- F. Utilize the critical path method of network calculation, the most critical path being the longest network path through the Project having the least amount of float.
- G. Utilize the precedence diagram method to establish relationships and interdependencies between the individual activities required to complete the Project, subject to the following:
  1. Total float criteria are not acceptable for identifying or representing the Critical Path; and
  2. The scheduling software shall be configured to show the longest path in any schedule calculation. and graphical representation shall distinguish between the critical path and near-critical paths.
- H. Be resource-loaded, inclusive of labor resources, equipment resources, and any limitations or restrictions on resources.
- I. Ensure that activity identification numbers, textual descriptions, and codes are consistently applied and have unique descriptors for each activity.
- J. Breakdown the D&C Work throughout the D&C Period into measurable performance activities, with appropriate logic ties, to show that:
  1. Overall approach to sequencing is efficient and effective;
  2. Logical relationships between activities reflect the actual intended sequence of Work;
  3. Design activities are appropriately matched to deliverables and completion of the activities, subject to the City approval of those deliverables;
  4. No construction activity is greater than 10 working days in duration (except those activities relating to procurement, manufacturing, fabrication, shipments, submittals, and review cycles), subject to the City pre-approval of any exceptions;
  5. No open-ended activities (i.e. those activities without their predecessors and successors identified) occur other than Early Work Start, Financial Close, NTP 1, Project Start, Substantial Completion, and Final Acceptance; and
  6. No constraint dates begin or complete any activity unless particular constraint dates are specifically required in the Contract Documents or are explicitly accepted by the City.
- K. Use no relationships that cannot be shown to demonstrate a true dependency.
- L. Show any required City, Third Party and/or Utility Owner activities and milestones including, at a minimum, installation of City-furnished FF&E, procurement milestones (such as product delivery dates), right-of-way/right-of-entry availability, and Project elements that interface with Related Projects (see Section 1.14.2).

- M. Show phasing of the Work including procurement, fabrication, delivery, installation, testing of materials and equipment, commissioning of systems, and any long-lead time orders for major or significant materials and equipment.
- N. Identify all required regulatory approvals, allow reasonable durations for acquiring approvals and dates by which such approvals are needed to avert delays.
- O. Incorporate the availability and unavailability of various Rights-of-Way/Rights of Entry and temporary easements necessary to facilitate field construction (“TCEs”).
- P. Minimize use of leads and lags, with any leads and lags subject to the City approval.
- Q. Use retained logic methodology for schedule calculations.
- R. Exhibit no float sequestering or float suppression techniques, as no scheduled activity shall exhibit negatively valued total float.
- S. Include printed calendar report(s) with every schedule submission. The schedule’s global calendar shall reflect workweeks of seven 24-hour days without holidays or non-work days.
- T. Take into consideration potential construction delay due to Adverse Weather and include, at a minimum, 17 days per year for the anticipated number of days of Adverse Weather as stipulated in Section 14.1.8.2 of the Agreement.

### **1.2.3. Scheduling System**

- A. Principal Project Company shall utilize the latest version of Primavera Project Management (P6, or later, for Windows) software running on a hardware system commensurate for the size and complexity of the Project. This hardware and software, working together, shall be called the “Scheduling System”, and shall be capable of handling, processing, printing and plotting data to satisfy requirements set forth in the Contract Documents.
- B. Principal Project Company shall continuously maintain the Scheduling System and the Project Schedule. Principal Project Company shall ensure the scheduling software maintenance agreement(s) remain current until Final Acceptance.
- C. Each schedule submitted by Principal Project Company, or by any person or firm employed by Principal Project Company, shall be in native .xer format with textual schedule reports accompanying each schedule submittal in both hard copy and electronic “.pdf” forms.

### **1.2.4. Performance Reporting**

#### **1.2.4.1. Monthly Progress Status Report**

- A. Principal Project Company shall prepare and submit to the City a Monthly Progress Status Report, from NTP2 to Final Acceptance, with agreed content and formatting, that contains information on Principal Project Company’s performance of Work during the previous calendar month. At a minimum, each such report shall contain:
  - 1. Work-completed reports (and marked-up work-completed reports, as necessary) for the reporting period, description of Work planned for the next reporting period, and a summary of any critical issues or decisions affecting the Work.

2. Report shall have a subsection for each of the following that shall address progress, risks, mitigations and corrections for:
  - a. Project Schedule.
  - b. Quality.
  - c. Safety and security.
  - d. Environmental compliance and permitting.
  - e. Third Party and Utility coordination.
  - f. Traffic detours and maintenance of traffic.
  - g. Inclusivity.
  - h. Public outreach.
  - i. Submittals and review process.
  - j. Design progress tracking, and design modifications and other changes in scope.
  - k. Interface management.
  - l. Operational readiness planning and coordination.
  - m. Other pertinent and timely discussion topics.
3. Description of environmental issues that arose within the Project Site (or work sites relating to the Project) and their resolution or current disposition.
4. Description of safety and security issues that arose within the Project Site (or work sites relating to the Project) and their resolution or current disposition.
5. Description of incremental and cumulative progress made towards the achievement of Disadvantaged Business Enterprises participation compared to planned levels of such Inclusivity participation.
6. Listing of Nonconforming Work, whether self-reported or identified by the City, and/or corrective actions and their resolution or current disposition.
7. Providing a copy of the latest Noncompliance Database, noting any new assessment of Noncompliance Points in the previous month, and generally reporting on the D&C requirements contained in Article 15 (Deductions and Noncompliance Points) of the Agreement.
8. For the Final Monthly Progress Report addressing the D&C Period, Principal Project Company shall update all information and incorporate such information into an As-Built Schedule, as defined in Section 1.2.5, for purposes of closing out the D&C Work.

#### **1.2.5. As-Built Schedules**

- A. Principal Project Company shall prepare and submit to the City for review and comment a Final Schedule Report, which shall provide the last Revised Project Schedule, an overview of the Project Schedule process, the history of changes to the Project Schedule, resulting effects on contractual dates, if any, and any outstanding schedule issues.

#### **1.2.6. Time Impact Analysis for Proposed Extensions of Time**

- A. Principal Project Company shall submit a detailed Time Impact Analysis (TIA) to support all requests of claims for extension to any Contract Deadline.
- B. The date upon which the Relief Event or Force Majeure Event occurred shall serve as the basis for each TIA or, in the event of a proposed Change Order, the implementation date of the proposed Change Order.

- C. Each TIA shall show a current status of the Work using the Project Schedule or Revised Project Schedule, as the case may be, and corresponding Performance Monitoring Report prior to the initiation of the events resulting in the claim for an extension of any Contract Deadline. The TIA shall show all affected activities together with a demonstration of actions deployed by Principal Project Company to mitigate any impacts to a Contract Deadline.
- D. Each TIA shall include a fragmentary network schedule (most commonly called “fragnet”) demonstrating how Principal Project Company proposes to incorporate the quantifiable time impact into the most recent Project Schedule update prior to the initiation of events in-question. The fragnet is subject to the same requirements controlling activities in the Project Schedule, including resource information for added scope and assignment of activity codes and appropriate work breakdown structure, whether existing or amended.
- E. With regard to each fragnet relating to a Relief Event or Force Majeure Event, Principal Project Company shall:
  - 1. Demonstrate that recalculation of an activity or activities duration based on quantities, with resource loading and productivity ratios for the fragnet activities, as well as the scheduled activities that were affected and impacted by delay, are justified.
  - 2. Identify the predecessors to new activities demonstrating the impacts caused to successor activities.
  - 3. Insert fragnet into the most recent Project Schedule update prior to the start date of the alleged Relief Event or Force Majeure Event.
  - 4. Run the schedule calculations and submit the impacted Project Schedule as required by the Contract Documents. and
  - 5. Include a narrative report describing the effects of new activities, resources and relationships to Contract milestones and the applicable Completion Date with each TIA.
- F. A submitted TIA can be accepted when Principal Project Company proves one or more of these conditions justifiable to the City:
  - 1. When a Change Order affects the completion date or sequence of items of the Work.
  - 2. When the City directs a change that affects the milestone date(s) specified in the Contract or alters the length of a critical path.
- G. Principal Project Company, or any person or firm employed by Principal Project Company, shall submit each TIA in .xer file format, to the City for examination, evaluation and consideration.
- H. After obtaining formal acceptance by the City, Principal Project Company shall incorporate the accepted TIA into the next Project Schedule update. Principal Project Company shall incorporate, and include as an attachment to the corresponding Change Order, any TIA related to a Change involving an extension to a Contract Deadline.

### 1.3. SUBMITTAL MANAGEMENT

- A. Each Submittal provided to the City shall include sufficient detail to demonstrate that Principal Project Company understands and is fully responsive to, and compliant with, the specific requirements of the Contract Documents addressed in that Submittal. Submittals shall be logically organized and clearly presented, and shall be compliant with the requirements of Article 5.1 (Submittal Review Terms and Procedures) of, and Exhibit 11 (Submittals Review Process) to, the Agreement.
- B. The content of Submittals to be provided to AHJs, Third Parties, and Utility Owners for their review and/or approval shall be as required by the applicable regulations, codes, Third Party agreements, and Utility Owner agreements, consistent with the respective Project Execution Plans, as applicable.
- C. Exhibit 18, Division 1 Appendix B (Initial List of Submittals) provides the minimum requirements for technical submittals during the Term. Principal Project Company shall expand and submit to the City the List of Technical Submittals as further defined in Exhibit 11 (Submittals Review Process) to the Agreement.

## 1.4. QUALITY MANAGEMENT

- A. Principal Project Company is responsible for effectively managing quality and assuring quality results in each phase and element of the Work.
- B. Principal Project Company's Quality Management processes and procedures shall be independent of its management and oversight of Project scope, schedule, budget, and production activities. Acting independently, Principal Project Company's Quality Management team shall provide status reports on non-compliance actions and results of quality reviews and audits, and documentation related to achieving major schedule milestones.

### 1.4.1. Principal Project Company Quality Program

- A. Principal Project Company shall document, implement, and maintain an effective Principal Project Company Quality Program (PQP) that guides processes to manage, control, document, and ensure that all aspects of the Work comply with requirements of the Contract Documents. The PQP shall apply to all Work performed by Principal Project Company, its Contractors, Suppliers and Vendors, as applicable.
- B. The PQP shall contain processes and procedures necessary to ensure complete quality assurance and quality control for the following major activity categories: design, design and constructability reviews, energy modeling and other sustainability verifications, materials, equipment, inspections, testing, construction, performance demonstration, coordination, workmanship, fabrication, and document control for on-site and off-site Work performed by Principal Project Company. Multiple volumes shall be compiled separately addressing Project Management, Design and Construction, and Operations and Maintenance.
- C. The processes and procedures established under the PQP shall comply with ISO 9001 requirements and, at a minimum, the following elements:

- Element 1: Management Responsibility
- Element 2: Documented Quality Management System
- Element 3: Design Control
- Element 4: Document and Data Control
- Element 5: Purchasing
- Element 6: Control of Third Party Supplied Items
- Element 7: Product Identification, Availability, and Traceability
- Element 8: Process Control
- Element 9: Inspection and Testing
- Element 10: Control of Inspection, Measuring and Test Equipment
- Element 11: Inspection and Test Status
- Element 12: Control of Nonconforming Work
- Element 13: Corrective and Preventive Action
- Element 14: Control of Quality Records

Element 15: Quality Audits

Element 16: Training

- D. Principal Project Company shall require and cause the preparation and adoption of separate, formalized quality programs by each Principal Project Company-Related Entity, coordinated and consistent with requirements in the PQP. The quality assurance and quality control obligations for which Principal Project Company is responsible shall extend to Work performed by Contractors and Subcontractors.
- E. Principal Project Company shall comprehensively document the PQP in the Principal Project Company Quality Program Plan (PQPP). Principal Project Company shall submit to the City for review and acceptance prior to submitting any Design Documents or commencing any field activities. Principal Project Company shall submit to the City all subsequent updates to the PQPP.
- F. The PQPP shall include an organization chart showing names, titles, responsibilities, authority, and the interrelationship between those involved in managing and directing the PQP. Principal Project Company's Quality Program Manager (QPM) shall be responsible for managing and overseeing the overall program and its preparation and implementation, including updates thereof. The PQP shall establish a Quality team that is distinct and independent from Principal Project Company's design and construction production organizations. Members of the Quality team shall inform the City's quality oversight personnel, as appropriate, and shall report directly to the QPM who, in turn, reports directly to Principal Project Company's senior management team.
- G. The PQPP is subject to revision, and both Principal Project Company and the City may identify the need for such revisions. Principal Project Company shall update content to reflect current circumstances and changes in conditions as the Work progresses. Principal Project Company shall submit any such revisions or updates no later than each anniversary of the initial submittal of the PQP. Principal Project Company shall then redistribute a conformed PQPP, with revisions highlighted, in accordance with the requirements herein.
- H. The initial PQPP must address all D&C Work. An updated PQPP must be submitted to the City for review and acceptance

#### **1.4.1.1. Management Responsibility**

- A. Principal Project Company shall define and document a quality policy that includes objectives for the Project and shall communicate, implement, and maintain that policy at every level of its organization.
- B. Principal Project Company shall publish a statement of its commitment to quality and its organization's quality objectives. The stated commitment shall explain Principal Project Company's means to attain quality results in the completed Work, how such commitment extends to all Project staff, and a signed copy of such management commitment shall be included in the PQPP.

#### **1.4.1.2. Documented Quality Management System**

- A. Principal Project Company shall establish, submit necessary documentation to the City, and maintain a highly documented Quality Management System (QMS) to ensure that Project-specific quality goals and objectives are satisfied. The QMS requirements shall extend to Principal Project Company's entire organization and Principal Project Company's management and oversight of quality assurance/quality control shall be independent of Principal Project Company's management and oversight of design and construction production, and subsequent operations and maintenance activities.
- B. The QMS shall define the interface between Principal Project Company's quality organization and its design and construction organization, and subsequent operations and maintenance organization, and shall be in writing to ensure that employees have a full understanding of how the QMS works. Principal Project Company shall fully document and report to the City all Nonconforming Work, as required in Section 1.4.1.9 (Control of Nonconforming Work), and Corrective Actions, as required in Section 1.4.1.10 (Corrective and Preventive Action).
- C. The QMS shall contain a statement of its purpose and scope, and shall include references to appropriate codes, standards, and specifications. The QMS shall identify any inspection equipment, skills, or special quality processes needed to ensure quality performance. The QMS shall contain formats for the quality records and related documentation. .

#### **1.4.1.3. Design Control**

- A. Principal Project Company is solely responsible to provide Design Documents in accordance with the Contract Documents and the approved PDQP, as defined in Section 1.4.2 (Principal Project Company Design Quality). City's review of the Design Documents is proprietary in nature and does not relieve Principal Project Company of the responsibility to meet all obligations and requirements of the Agreement and Authorities Having Jurisdiction.
- B. During development of Design Documents and the PDQP, Principal Project Company shall incorporate respective designers' quality control provisions and references into the PDQP. Principal Project Company shall establish and maintain procedures to ensure conformance with the Contract Documents, and with applicable requirements of AHJs, Third Parties, and Utilities Owners. Principal Project Company shall ensure designers have a clear understanding of the applicable requirements, properly coordinate design interfaces, plan and execute design validation and conformance verification activities, and implement effective design control processes and procedures, to control changes in the design throughout the entire D&C Period.
- C. Design control applies to computer programs, design tables, calculations, graphs, and any other work products used to analyze results in developing or checking proposed designs.
- D. The PDQP shall include procedures on how changes in design are to be initiated, reviewed and approved, implemented, inspected and documented, shall define a process to provide effective configuration management/control, and shall identify those individuals or persons authorized to approve such changes in design. An approved PDQP must be established and followed prior to any submission of Design Documents to the City.

#### **1.4.1.4. Product Identification, Availability, and Traceability**

- A. Principal Project Company shall establish, submit to the City, and implement documented product identification, availability and traceability procedures for identifying and controlling the provision of any items of production (such as batch, materials, parts, and components) for incorporation into the Project. Effective measures shall prevent the use of incorrect or defective items and shall ensure the use or incorporation of only correct and acceptable items. Principal Project Company shall submit to the City, in a complete and timely fashion, formal product identification procedures, for application from receipt through all stages of production, delivery, and installation.

#### **1.4.1.5. Process Control**

- A. Special processes, including welding, nondestructive testing, and heat treatment, the results of which cannot be directly verified by subsequent inspection and testing of the product, shall be continuously monitored by Principal Project Company during the process to ensure required quality results in the final product.

#### **1.4.1.6. Inspection and Testing**

- A. Principal Project Company shall plan and implement inspection and testing procedures as necessary to verify product or production quality. Inspection and testing shall follow formal procedures, with documented results, before receiving incoming products for final inspection, verification, and testing for acceptance. Testing requirements and procedures shall include references to required certifications, testing procedures, frequency and location, requirements for witnessing of tests, and where factory inspection and/or testing is necessary prior to shipping or transporting the finished product.
- B. Principal Project Company is responsible for performing all quality assurance and quality control inspections and tests under the Contract Documents. The PQP shall address the required certifications, inspections, and tests, and the establishment of quality records, in appropriate detail.
- C. Principal Project Company shall provide a means for identifying the inspection and test status of Work during production and installation. Only products or installed Work that has passed the required inspections and tests may be accepted.

#### **1.4.1.7. Control of Inspection, Measuring, and Test Equipment**

- A. Inspection, measuring, and test equipment (including test software) necessary to perform inspection and testing shall be identified, controlled, calibrated, and maintained appropriately, to demonstrate the conformance of work to the specified requirements.
- B. Principal Project Company shall submit to the City a Schedule of Testing Equipment identifying all equipment that needs periodic and regularly scheduled recalibration, including date of initial calibration, schedule for recalibrations, and current calibration status. Principal Project Company's Quality Assurance personnel shall ensure the schedule is current by audit. Principal Project Company shall provide the associated schedule of updates and audit reports to the City's Quality Assurance personnel upon request.

#### **1.4.1.8. Inspection and Testing Status**

- A. Conformance or nonconformance of any Work items shall be identified through inspection and testing by suitable means. Principal Project Company shall ensure all Work items have passed their requisite inspections and tests and shall report such status throughout all production, installation, and servicing processes.

#### **1.4.1.9. Control of Nonconforming Work**

- A. Principal Project Company shall submit to the City and implement procedures to prevent the use, installation, or allowance of Nonconforming Work in the Work.
- B. Principal Project Company shall identify, document in the Noncompliance Database, and evaluate the root cause of every instance of Nonconforming Work as per Section 15.3 of the Agreement.

#### **1.4.1.10. Corrective and Preventive Action**

- A. Principal Project Company implement the corrective actions needed to correct each instance Nonconforming Work, prevent recurrence, and analyses to detect and eliminate potential Nonconforming Work.
- B. Principal Project Company shall verify accomplishment of corrective actions to the City's satisfaction. Principal Project Company shall develop and implement preventive actions to mitigate or eliminate potential Nonconforming Work or otherwise prevent occurrence/recurrence of Nonconforming Work. Such prevention includes implementing and recording changes in procedures resulting from preventive actions, corrective actions, and continual quality improvement initiatives.

#### **1.4.1.11. Control of Quality Records**

- A. Principal Project Company shall establish, submit to the City, and implement effective procedures for organizing, maintaining, and safekeeping Quality Records, both in hard copy and electronic forms. The procedures shall identify those Project-related records for safekeeping, responsibility for production and collection of such records, and responsibility for indexing, filing, storage, retrieving, and other disposition of Quality Records.
- B. Quality Records shall demonstrate conformance to specific requirements and contribute to effective operation of the QMS. Principal Project Company shall maintain, and be able to produce records necessary to provide objective evidence of Agreement review, procedure compliance, design review, training, demonstration, certification, and complete acceptance of inspection and test results, including traceability of equipment or items used in the Work.
- C. Quality Records shall be legible and shall be stored and retained in a manner that is readily retrievable, housed in locally accessible facilities that provide a suitable environment to prevent damage or deterioration, and secured to prevent loss or unauthorized access.
- D. Quality Records shall always be available to the City, for examination or inspection, in accordance with the Contract Documents, in which their retention periods and storage medium shall be as specified, consistent with the PQP and the Contract Documents.

#### **1.4.1.12. Quality Audits**

- A. Principal Project Company shall establish, submit to the City, and follow documented procedures for planning and implementing a comprehensive program of scheduled and unscheduled Quality Audits, the Quality Audit procedures. Quality Audits shall verify compliance with applicable requirements and ensure that all elements of the QMS are functioning effectively.
- B. Quality team personnel shall conduct Quality Audits on a planned and scheduled basis, commensurate with the importance of the activities being performed, but no less frequently than every quarter throughout the Term. The Quality team shall initiate Quality Audits early enough in the life of the activity to assure effective Quality Control throughout the activity's timeframe. Quality Audits shall encompass project management, supervisory and administrative functions, and performance of technical activities of the Work.
- C. The results of Quality Audits shall be fully documented, recorded, and reported to those persons and firms having direct responsibility in the Work area audited. Principal Project Company shall immediately instigate timely corrective action of any deficiencies noted in the Quality Audit.
- D. Principal Project Company's personnel conducting a Quality Audit shall be independent and separate from those directly responsible for performing the activity audited. Qualifying experience and credentials (such as ASQ certification) for an Auditor shall be established and documented by Principal Project Company, with such personnel qualification records kept on file, maintained in the Quality Records, and available to the City.

#### **1.4.1.13. Training**

- A. Consistent with the provisions in Section 1.7 (Training), Principal Project Company shall establish, submit to the City, and follow written procedures for identifying training needs and providing training to all Quality Assurance/Quality Control personnel for activities affecting quality in the Work and in accordance with the Contract Documents.
- B. Records of training and certifications shall be maintained in the Quality Records, and be available to the City, identifying certification of personnel performing specific assigned tasks. Such certification shall be based on appropriate education, training, and experience.
- C. Principal Project Company shall document its training procedures and maintain current training records to ensure only qualified personnel are performing quality related activities and assigned tasks. Principal Project Company shall prepare training procedures through ongoing training efforts and the recorded accumulation of personnel experiences, including systematic reviews of personnel competence at determined levels before any deployment in new quality-related roles. Such training shall focus on improving competency and skill levels for those performing activities affecting quality in the Work.

#### **1.4.2. Principal Project Company Design Quality**

- A. Principal Project Company shall prepare and submit to the City for review and acceptance a Principal Project Company Design Quality Plan (PDQP) addressing Principal Project Company's responsibilities for performance, oversight, and verification of all Design Work. The PDQP shall tier off from the PQPP to specifically address the design process. No Design Work may commence until the City verifies that the submitted PDQP complies with the requirements of Contract Documents and is deemed acceptable to the City.
- B. Principal Project Company shall require and cause the preparation and adoption of separate, formalized design quality plans by each design firm engaged by Principal Project Company, coordinated and consistent with requirements in the PDQP.
- C. The Design Manager and the QPM shall administer the design management and quality oversight responsibilities for which Principal Project Company owes a duty of care to the City.

##### **1.4.2.1. Design Documentation**

- A. Principal Project Company shall prepare, submit to the City, and maintain a Design Progress Tracking Report that includes engineering and design progress against the design activities in Project Schedule and as required by Section 1.8 of this Division 1, as well as any design work related to Changes or Deviations.
- B. The Design Manager shall submit to the City a Monthly PDQP Report for information purposes at the same time as Principal Project Company's Monthly Progress Status Report to, at a minimum, address:
  - 1. Summary of design reviews conducted;
  - 2. Any design activities related to Nonconforming Work; and
  - 3. Updated list of Principal Project Company's internal and external design submittals, for reference (as such documents are cited in the PDQP).
- C. Upon completion of Design Documents per the Proprietary Design Review process (see Section 1.8.5 of this Division 1), the Design Manager or QPM shall notify Principal Project Company's project management and design team members, with a copy to the City, of any outstanding issues or unresolved review comments. Outstanding issues or unresolved review comments shall also be noted in the final Design Progress Tracking Report. Principal Project Company shall revise the final Design Progress Tracking Report to incorporate responses to the City's comments and resubmit to the City within 15 Days of receipt of comments.
- D. To facilitate determination of Quality Assurance sampling and testing needs, Principal Project Company shall quantify key items of the Work subject to sampling and testing, and presented in measurable units that facilitate sampling and testing. Principal Project Company shall submit to the City its quantity estimates prior to commencing the relevant construction activity.
- E. BIM formatting for Design Documents, design submittals, and As-Built Documents shall conform to the BIM requirements herein and the requirements of the applicable AHJ.

#### **1.4.2.2. Design Quality Records**

- A. Principal Project Company shall maintain an auditable record of PDQP procedures, reviews and checks. Notwithstanding the City's right to audit, an auditor independent of Principal Project Company's management and production teams shall be able to determine, and verify by reviewing pertinent documentation, that Principal Project Company is following quality procedures included in the PDQP.
- B. Principal Project Company shall enter instances of Nonconforming Work relating to Design Work into the Noncompliance Database in accordance with Section 15.3 of the Agreement.

#### **1.4.2.3. Design Quality Assurance**

- A. The QPM shall certify to Principal Project Company and to the City that the design process activities and Design Work products comply with the approved PDQP and other Contract Documents..
- B. Performance of design quality assurance shall in no way relieve the Design Manager, EOR(s) or AOR(s), or other design firm(s), from their respective responsibilities to check and review the quality, content, and correctness of Design Work produced for the Project. Each of the responsible design firms and responsible professionals performing these checks and reviews shall document their efforts, forwarding such evidence to the Design Manager and QPM, such that notes of checks and reviews are maintained as Quality Records.

#### **1.4.3. Principal Project Company Construction Quality**

- A. Principal Project Company shall prepare and submit to the City for review and acceptance a Principal Project Company Construction Quality Plan (PCQP) defining the processes and approach that will be implemented to ensure compliance with the requirements herein. The PCQP shall tier off from the PQPP to specifically address the construction process. No permanent Construction Work, except for site demolition, grading, and other preparatory activities, may commence until the City verifies that the submitted PCQP complies with the requirements of Contract Documents and is deemed acceptable to the City.

##### **1.4.3.1. Quality-in-Construction Organization**

- A. Principal Project Company shall organize a Quality-in-Construction (QIC) program to oversee, manage, certify, and perform construction related quality activities including preparation of the PCQP and managing and scheduling all quality assurance/quality control inspections, sampling, and testing of Construction Work items.
- B. The Quality Program Manager shall be responsible for overall management and supervision of Principal Project Company's QIC program, which duties shall include coordinating the daily schedules of the field inspectors, testers, and samplers involved in ongoing design or construction activities.
- C. The PCQP shall include formal training procedures that provides Project-specific quality/safety and security orientation and clearly defines the education, previous experience, and training requirements applicable to all personnel assigned to Principal Project Company's QIC organization. The training procedures shall include evaluating each candidate's knowledge of the PQPP, QMS, PDQP, and PCQP.

- D. QIC staff shall act independently from those responsible for and involved in the production of construction materials or the progress of Construction Work.
- E. Principal Project Company shall utilize independent testing laboratories to conduct all laboratory-based and field-based testing in compliance with statutory requirements for Independent Testing Laboratory (ITL) certification and specific requirements for the City certification for applicable tests. Principal Project Company shall submit to the City candidate ITL credentials and the City reserves the right to reject any candidate ITL proposed by Principal Project Company or revoke prior ITL certifications, in the City's sole discretion, at any time. Recognized ITL accreditations shall include the AASHTO Material Reference Laboratory, the Concrete Cement Reference Laboratory, the National Precast Concrete Association, the Prestressed Concrete Institute, the American Association for Laboratory Accreditation, and/or the National Voluntary Laboratory Accreditation Program, as appropriate and approved by the City.
- F. Principal Project Company's ITL shall provide written policies and procedures to assure portable and satellite laboratories performing testing activities on the Project are capable of providing testing services in compliance with the applicable test methods. These policies and procedures shall address continual inspection and calibration of testing equipment as well as an established correlation-testing program between the accredited ITL and their portable or satellite facilities.

#### **1.4.3.2. Construction Control**

- A. The PCQP shall contain procedures and policies to detect and prevent the reoccurrence of Nonconforming Work or other deficiency.

#### **1.4.3.3. Material/Equipment Certifications**

- A. Principal Project Company shall submit a source of supply and item material/equipment types report, for the City's information, as follows:
  - 1. Initially, within either 30 Days prior to material/equipment use or 60 Days following Financial Close, whichever is the earlier, to the extent that information is known. and
  - 2. For materials/equipment not initially identified, or changes to an initial source provided, the actual source of supply shall be identified as soon as known, but not less than 30 Days prior to delivery of relevant materials/equipment to the Project Site.
- B. Documented evidence that materials and equipment conform to requirements of the Contract Documents shall be available for the City's inspection, at the Project Site, prior to installing or using such materials and equipment. Principal Project Company shall maintain such evidence (the "Material and Equipment Conformance Certifications") at the location of placement or secured storage, with definitive content sufficient to identify these specific requirements and to certify compliance, such as working drawings, codes, standards, or the Technical Provisions. Substitutions of specified materials or equipment shall not occur without prior written approval by the City, notwithstanding a consenting determination of the responsible AOR or EOR. Failure to obtain prior formal approvals of a substitution will result in a finding of Nonconforming Work and the City's rejection of the unsatisfactory work containing such nonconforming material or equipment. City reserves the right to audit and review these certifying documents at any time.

- C. Principal Project Company shall submit to the City, as soon as Principal Project Company receives documented evidence, a Source of Supply Certificate of Compliance, signed by both the Project Manager and CQCM, indicating that sourced materials and permanent equipment incorporated into the Work conform to the requirements of the Contract Documents.

**1.4.3.4. Process Control**

- A. Principal Project Company shall establish and implement policies and procedures, as documented in the PCQP, for controlling key processes associated with construction.
- B. Principal Project Company shall initiate Quality Check Points (QCPs) at appropriate stages of construction progress to ensure that trade Work is being performed in accordance with approved Design Documents, consistent with the PQPP and the PQCP, and satisfying the requirements of the Contract Documents and Good Industry Practice. Principal Project Company shall request Code-mandated structural observations and documentation of each visit by the responsible AOR or EOR (or his/her designee). Concrete pours shall routinely require a “pour card” evidencing that those inspecting the Work on behalf of the permittee and the AHJ have certified by their signature that the Work is correctly prepared and ready to receive placement of concrete.
- C. Throughout the course of Construction Work, the Construction Manager, together with the responsible AOR(s) or EOR(s) shall periodically, but not less than monthly, meet with the City representatives to review quality control documentation and procedures including, at minimum, material certifications, daily inspection records, material testing results, survey results, permits, and material placement records.

## 1.5. EXISTING CONDITIONS

- A. Principal Project Company shall ensure that the physical condition of existing buildings, structures, roadways, sidewalks, paths, trails, lighting and signal equipment, or other property that are to remain in place or are to be modified, are not adversely affected by the performance of the Work. Principal Project Company shall perform appropriate property/pre-construction surveys to document existing conditions in order to establish an adequate mapping of baseline conditions, as well as subsequent monitoring to record any variance in baseline conditions. Principal Project Company is solely responsible to protect in place certain property and shall repair or replace any property damage caused by construction of the Work. Principal Project Company shall submit to the City copies of these surveys prior to commencing any construction activity in the affected worksite location(s).

### 1.5.1. Pre-Construction Information, Pre- and Post-Construction Surveys

- A. At a minimum, Principal Project Company shall perform Pre-Construction and Post-Construction Surveys, detailing the 'before' and 'after' condition of all roadways, site features, above ground utilities, and other relevant information. Surveys shall include written documentation of pre-existing conditions and final conditions supplemented with video or still photographic documentation.
- B. After completing construction of the Project, or portions thereof, Principal Project Company shall perform a post-construction survey for each facility documented in the corresponding preconstruction survey. The post-construction surveys shall highlight any changes in the condition of the facilities surveyed prior to construction, including any new property damage.
- C. Principal Project Company's Project Schedule shall include planned dates and actual dates for these preconstruction and post-construction surveys to ensure that facilities are surveyed prior to starting and after completing any construction activity that could affect a surveyed facility. Principal Project Company shall complete preconstruction surveys no later than 20 Days before commencing fieldwork, and post-construction surveys no later than 120 Days after completing any work located within 200 feet of the existing building, roadway, Utility, or facility.
- D. Principal Project Company shall employ an independent professional services firm specializing in land surveying and mapping practices, with no less than 10 years of qualifying experience in similar work to perform physical damage assessments of buildings and structures. A preliminary assessment of damage potential and possible displacements induced by construction of the Project, including calculations, is applicable to all structures and utilities located within 200 feet from the Project Site. Empirical methods may be used to determine magnitude and directions of ground displacements and construction-induced vibrations. The specialist/firm shall develop risk categories based upon maximum induced settlement, maximum induced slope, and descriptions of probable damage. Each building, roadway, utility, and facility within 200 feet from the D&C Limits shall be so categorized.
- E. Principal Project Company's architects/engineers shall conduct in-depth analyses, by numerical methods, to consider the potential construction effects on all buildings, structures and utilities of which the specialist/firm has categorized "greater than negligible". Principal Project Company shall submit to the City the proposed method of analysis to address damage potential by ground movement, groundwater drawdown, and vibration effects.

## 1.6. INFORMATION MANAGEMENT

- A. Principal Project Company shall establish and submit to the City procedures to produce and control all documentation and relevant information, the Information Management Plan (IMP), including data stored in electronic media.
- B. The IMP shall specify a process for delivery of documents and information to the City, such as use of a sharepoint or central repository that is setup and managed by Principal Project Company.
- C. Principal Project Company shall establish and maintain documented procedures to control the formal process for reviewing and commenting on Submittals, resolving and closing outstanding reviewer comments, and assigning approval authority.
- D. At a minimum, such relevant documents shall include Release for Construction Documents (RFCDs), Current Status Documents (as defined in Section 1.6.3, Item C), and other Record Documents, including:
  - 1. Contracts.
  - 2. Change Orders.
  - 3. Budgets.
  - 4. Work Plans.
  - 5. Procedures.
  - 6. Reports.
  - 7. Registers and Logs.
  - 8. Meeting Agendas and Minutes.
  - 9. Design Deliverables.
  - 10. Drawing plans and specifications; design, current and As-Built Documents.
  - 11. Regulatory Approvals.
  - 12. Submittals.
  - 13. Certifications.
  - 14. Third Party and Utility agreements.
  - 15. Master drawing lists or equivalent documents.
  - 16. Critical procedures and explicit work instructions.
  - 17. Quality, Training, Equipment manuals and records.
  - 18. Design data (e.g. computer databases, computer files, BIM/CAD files, energy model, etc.).
  - 19. As Built Schedule.

### **1.6.1. Document Version Control**

- A. Principal Project Company shall include document version control procedures in the Information Management Plan. Document version control procedures shall be implemented to ensure that current versions of relevant documents are on file and readily available to authorized persons, upon request, and that current versions of Design Documents are available to the City without restriction at all times. Electronic document and hard copy distribution shall be controlled and follow the same protocols.
- B. Principal Project Company shall review and approve for accuracy and adequacy all physical documents and electronic data prior to issue.
- C. Effective document version controls shall ensure that:
  - 1. Pertinent issues (and correct versions) of appropriate documents are available to Principal Project Company, the City, and Third Parties;
  - 2. Invalid and/or obsolete documents are promptly removed from all points of issue or use, or otherwise quarantined against unintended use; and
  - 3. A record of the then-current issue of the RFCD is available to be used.

### **1.6.2. Drawing and Engineering Data Changes**

- A. Principal Project Company shall delineate and establish its formalized workflow process for the initiation, review, and approval of changes to Design Documents prior to issuance of such design changes.
- B. Any change to the Current Status Documents and associated data shall be reviewed and accepted by the same expert or authority (person, entity or AHJ) that performed the prior review and acceptance, unless specifically authorized by the Design Manager and QPM to be reviewed and accepted by another designated expert or authority (person, entity or AHJ). If review by the original authority is not possible, then the alternate reviewer shall have adequate background and experience upon which to base the determination regarding incorporation of the change. The alternate reviewer shall have access to pertinent background information upon which to base his/her pending review and acceptance action.

### **1.6.3. As-Built Documents**

- A. Principal Project Company shall prepare and submit to the City As-Built Documents that accurately and completely reflect the actual conditions and location of elements of the Work as constructed and installed, including drawings, specifications, and related documentation (such as engineering data and reports) that affirm the actual conditions and placement locations.
- B. As-Built Drawings are an integral part of As-Built Documents and Principal Project Company shall produce As-Built Drawings in the same manner, scale and size as the original RFCD set.
- C. Principal Project Company shall, at all times, maintain an up-to-date, marked-up set of RFCD plans, specifications, and pertinent shop drawings for the Work, including all details that vary from original depiction of the Work (“Current Status Documents”). The marked-up set of Current Status Documents shall include all formally issued revisions made after successive releases for construction.

- D. Principal Project Company shall electronically modify the finally updated Current Status Documents to record actual construction where different from the original RFCDs and approved Shop Drawings.
- E. Finally updated Current Status Documents shall not to be construed as official As-Built Documents until the responsible AOR or EOR has generated an updated edition of these final construction documents, each sheet labeled “As-Built Documents” and by incorporating all such markups recorded on all previous editions of RFCDs. Such As-Built Documents shall be prepared consistent with the City’s published CADD standards. The responsible AOR or EOR shall sign and seal the As-Built Documents.

## 1.7. TRAINING

- A. Principal Project Company shall establish and maintain a plan and management procedure for identifying training needs and for providing training to all personnel performing activities affecting safety or quality in the Work. Personnel performing specific assigned tasks shall be qualified based on appropriate education, training and/or experience. Principal Project Company shall maintain appropriate records of training and current certifications.
- B. Principal Project Company shall establish and submit to the City their plan for training procedures, materials, and records to ensure that the skills and professional judgment of their personnel are developed appropriately for their intended roles, through training and/or the recorded accumulation of experience with systematic reviews of their competence at determined levels, and before any deployment of new roles.
- C. Training shall focus on improving individual competency and skill for those performing activities that materially affect safety and quality.
- D. Principal Project Company shall document qualification and training records in the QMS, as part of the Quality Records.
- E. Principal Project Company shall train Project personnel in all the special Project procedures applicable to their work.
- F. Craft journeymen with special skills shall have their competency verified and a record maintained of such verification.
- G. Principal Project Company shall provide Project-specific training for the City personnel as required for the City personnel to perform their designated Work functions. All equipment and systems required for the SFMTA O&M Services require training. Principal Project Company shall notify the City of the Project specific training date(s) and time(s) at least 21 Days prior to the scheduled training session. City will designate all the City personnel who need to receive training no less than 14 Days prior to the scheduled training session, including training required for access to the Project Site or related work sites of the Project.
- H. For any the City personnel training required to support the IFM Period work activities pursuant to Division 7 (Asset Management Program Requirements) of the Technical Requirements, the City will designate such personnel no less than 28 Days prior to the scheduled start of such training.

## **1.8. DESIGN MANAGEMENT**

### **1.8.1. Design Requirements**

- A. Principal Project Company shall produce Design Documents required by the Contract Documents, and as otherwise required, to complete the Project D&C Work, including the Joint Development Alternatives required by these Technical Requirements, and to operate and maintain the Project in accordance with the requirements of the Contract Documents.
- B. Principal Project Company shall:
  - 1. Manage and perform Design Work pursuant to the requirements of the Contract Documents, including provisions for the Joint Development Alternatives required in these Technical Requirements;
  - 2. Manage and perform Quality Assurance and Quality Control for Design Work;
  - 3. Manage, coordinate, and obtain necessary approvals and permits from Utility Owners, Third Parties, governmental authorities and regulatory agencies, and the City in their proprietary, not regulatory, capacity;
  - 4. Ensure and certify that Design Documents are prepared by duly licensed design professionals working under the direct supervision of the Lead Designer;
  - 5. Verify pertinent dimensions and other relevant existing field conditions prior to submission of any design document; and
  - 6. Incorporate information regarding Allowances into the Design Documents and give the City time to review and comment and approve the final design pertaining to Allowance-related scope.
- C. Design Documents are subject to review by the City, in their proprietary capacity, as well as Utility Owners, Third Parties, and AHJs in accordance with regulations, Governmental Approvals, and the applicable controlling documents, namely requirements set forth in Third Party Agreements, Utility Owner Agreements, Project Execution Plans, and the Contract Documents.
- D. The Design Documents shall:
  - 1. provide information customarily necessary in documents for projects of similar size, complexity, and quality; and
  - 2. include all information required by the building trades to complete the construction of the Project, other than such details customarily developed by others during construction.

### **1.8.2. Integrated Design Process**

- A. Principal Project Company shall utilize an integrated process to design all elements of the Project in a synchronized, well-coordinated manner so that the Project is designed as an integrated whole and will function effectively and efficiently for its intended purposes, as well as supporting the Joint Development Alternatives required by these Technical Requirements.
- B. Principal Project Company shall identify all requirements, including design, construction, operations and maintenance that apply to every element and component of the Project.

- C. Principal Project Company shall address the highest-level performance requirements as matters of priority to determine their impact upon specified requirements for individual Project elements (or components).
- D. Principal Project Company shall provide coordinated design management services inclusive of reviews and permitting by the City, Utility Owners, Third Parties, and AHJs. Principal Project Company shall demonstrate to the City that, through an integrated design process and each design submission, individual elements have been designed to integrate with the Project as a whole and support the Project's overall intended purposes.
- E. Principal Project Company shall conduct independent design checks, workshops and over-the-shoulder meetings, consistent with the requirements of Section 1.8.1 (Design Quality Assurance Manager Review), to review individual design packages. Principal Project Company shall include in these reviews those individuals responsible for due consideration of Project interfaces, configuration control, safety and security, construction, operations, maintenance, and quality issues and concerns. City reserves its right to attend such design review meetings and may participate in discussions.

### **1.8.3. Design Document Organization**

- A. Principal Project Company shall organize the Design Documents, arranging them into a systematic order and identifying them with alpha/numeric designations based on discipline designations, locations, and sequential numbering of sheets and pages. Principal Project Company shall provide appropriate design certifications by the responsible AOR(s) or EOR(s).

### **1.8.4. Design Exceptions and Waivers**

- A. Through a formal evaluation process defined in Article 12.4 (Deviations) of the Agreement, the City will consider any reasonable request for design exception or design waiver meeting the criteria of being a minor change to the Technical Requirements, and shall, in accordance with the stated process, either grant or reject the Deviation.
- B. Principal Project Company shall be solely responsible for obtaining approvals from the City, Utility Owners, Third Parties, and AHJs for Deviations, as may be required.
- C. Principal Project Company shall obtain any necessary Deviation approval before submission of any final Design Documents for a particular design package that incorporates such related design exception or waiver, and shall include such Deviation approval in its submission to the City.

### **1.8.5. Proprietary Design Reviews**

- A. Principal Project Company shall prepare and submit Design Documents to the City, in its proprietary capacity as owner, for review and comment according to the process described below in this Section 1.8.5 ("Design Deliverables") and required by Exhibit 11 (Submittal Review Process). These Design Deliverables are independent of any submittals required by any AHJ, Third Party and Utility Owner.

- B. The Design Deliverables shall be developed to ensure that the Project is designed and presented at each stage of design as an architecturally- and functionally-integrated development, including Design Documents that indicate how Principal Project Company can achieve the Joint Development Alternatives, Division 3 (Design Criteria Document) and Appendix G of Division 3 (Design Criteria Paratransit), Division 4 (Supplemental Design Criteria), and Division 5 (Battery-Electric Bus Supplemental Criteria).
- C. Principal Project Company shall include adequate time for City review of the Design Deliverables at each stage of design, which shall be no less than [14] days, in its submittal schedule and Project Schedule.

#### **1.8.5.1. Proprietary Design Review Process**

- A. Principal Project Company shall propose a process to produce and present Design Deliverables and facilitate the documentation and resolution of City review comments, provided such process is consistent with this Agreement and Exhibit 11 (Submittals Review Process). Principal Project Company shall submit the proposed process to the City for review and approval before NTP 1. Principal Project Company is solely responsible for implementation of the approved process. Principal Project Company can proceed with advancing Design Documents when a resubmittal is not required under Exhibit 11 (Submittals Review Process) however, Principal Project Company does so at their own risk.
- B. Principal Project Company's process shall include the following as a minimum:
  - 1. Develop and provide deliverables to the City at stages specified below in Section 1.8.5.2 or as mutually agreed.
  - 2. Schedule, conduct and document design review meetings at each stage to present design progress and status of Design Deliverables. Minutes from these meetings shall be distributed within a week of occurrence.
- C. Develop and implement a process to capture, track status and confirm resolution or other action regarding City comments. Principal Project Company shall, unless otherwise mutually agreed by Principal Project Company and City, provide progressively developed and detailed Design Deliverables to the City at each of the following stages of design:
  - 1. 50% Design Development (50% DD)
  - 2. 100% Design Development (100% DD)
  - 3. 50% Construction Documents (50% CD)
  - 4. 90% Construction Documents (90% CD)

#### **1.8.5.2. Design Deliverables Content**

- A. Design Deliverables submitted at each stage of design shall, at a minimum, must meet the requirements set forth below.

##### **1.8.5.2.1. 50% and 100% Design Development (50% DD / 100% DD)**

- A. In this phase Design Deliverables will include, at a minimum, a site plan, elevations and sections, together with a written project brief detailing area calculations, building systems, and specifications, to fully describe the size and character of the entire Infrastructure Facility, including the architectural, building enclosure, roofing, waterproofing, site work,

landscaping, civil, structural, mechanical, process mechanical, electrical, and electrical trolley systems, IT/AV requirements materials and other elements. The 50% DD Design Deliverables will be an *'in progress'* set of Design Documents and the 100% DD Design Deliverables shall include Design Documents that generally adhere to the AIA Design Development Quality Management Checklist.

B. At a minimum the following items will be addressed for the Infrastructure Facility:

1. 1:100 scale drawings incorporating comments from the Schematic Design Phase and illustrating the design development of each of the following areas:
  - a. architectural;
  - b. site plan including site layout, grading, and utilities;
  - c. structural;
  - d. mechanical and plumbing;
  - e. electrical;
  - f. municipal infrastructure and storm water retention; and
  - g. landscaping;
2. 1:50 plans showing all dimensions: interior elevations and reflected ceiling plans, including main component drawings that relate to the bus maintenance equipment, and IT.
3. developed exterior elevations of the buildings and major cross-sections;
4. integration of exterior spaces, vehicle access/egress (including drop-off and pick-up access to parking, etc.);
5. a full lighting layout for each floor;
6. efficient integration of major equipment for optimal operations;
7. review of door controls and hardware concepts/strategies;
8. review of security strategies;
9. interior finish concepts (flooring, walls and ceiling finishes) for all spaces and key elevations including a review of standard millwork types and details;
10. development of the circulation routes and way-finding strategy including:
  - a. verification of the impact of the layout of the premises on the flow of personnel and material both internal and external to the Infrastructure Facility;
  - b. review of way-finding strategies from the Proposal stage and demonstration of how they are incorporated with details in the current design;
  - c. room numbering plan for City use (public and staff way-finding); and
  - d. signage, orientation, etc.; and
  - e. provide preliminary electrical load redundancy and spare capacity calculations for all branches of power identifying loads of different types, such as individual mechanical equipment, lighting, general receptacles, equipment, communications and security equipment and elevators.

#### **1.8.5.2.2. Construction Documents (50% CD & 90% CD)**

- A. During these stages the Design Documents shall describe in detail the requirements for the construction of all components, systems and equipment of the Infrastructure Facility. The Design Deliverables for 50% CD and 90% CD stages of design shall include all the requirements in this Section 1.8.5.2.2:
1. at 50% completion;
  2. at 90% completion,
  3. and, despite any later dates set out in the Project Schedule, in a timely way in advance of construction with sufficient detail to allow the City to understand and assess the design of the Infrastructure Facility.
- B. If Principal Project Company intends to proceed with construction of an element of the Infrastructure Facility in advance of the completion of the design of the entire Infrastructure Facility then Principal Project Company will deliver the Design Deliverables for 50% CD and 90% CD for that element, coordinated with all disciplines with sufficient accompanying detail to allow the City to understand and assess the design of that element, in advance of the Design Deliverables for other elements of the Facility.
- C. Regardless of how Principal Project Company packages or otherwise chooses to advance construction documents for certain elements of the Infrastructure Facility, Principal Project Company shall provide to the City, at a level of detail and documentation that the City would customarily receive or expect to receive for a facility similar to the Infrastructure Facility at 50% CD and 90% CD stages in accordance with Good Industry Practice, Design Deliverables addressing all requirements in Section 1.8.5.2.1 developed to the associated CD stage, as well as:
1. dimensioned floor plans and elevations showing all millwork, furniture and equipment as well as a roof plan showing layout, materials, and details;
  2. interior elevations for all rooms and spaces, including all interior finishes, millwork, mechanical and electrical;
  3. exterior elevations including openings, closure details, materials and finishes, and color boards;
  4. completed site and landscaping plans;
  5. room finish schedules including material finishes and color boards;
  6. door hardware schedules;
  7. reflected ceiling plans coordinating architectural, lighting, electrical, low-voltage, and mechanical features;
  8. interior finishes;
  9. Room Data Sheets;
  10. a written report detailing and describing the manner in which the following have been taken into account in the Design:
    - a. validation and confirmation of meeting the program requirements
    - b. program operations and delivery;

- c. LEED Gold certification, including energy efficiency/sustainability and the relevant LEED project checklist and points;
  - d. material selection;
  - e. constructability;
  - f. life cycle and renewal requirements;
  - g. any risk assessments;
  - h. building operating services; and
  - i. clearly identifying sections for:
    - 1) architectural design;
    - 2) site development and landscaping;
    - 3) structural design;
    - 4) mechanical design;
    - 5) electrical design; and
    - 6) sustainable design.
- D. Principal Project Company will only issue drawings and specifications for construction purposes based on Design Deliverables previously reviewed by the City in accordance with this Section 1.8.5.
- E. This Section does not limit Principal Project Company's obligation to comply with any requirements set out in the Agreement in relation to the stages and requirements for Design Work.

#### **1.8.5.2.3. Basis of Design Report**

- A. Principal Project Company shall prepare, submit to the City, and maintain a comprehensive Basis of Design Report (BODR) for the Project that is submitted with the Design Deliverables at each stage of design. The BODR shall demonstrate how the design conforms to the Agreement, including how Principal Project Company can achieve the Joint Development Alternatives required in these Technical Requirements. The BODR shall provide an update on development and status of Allowances in the design of the Infrastructure Facility defined over the course of design development and construction.
- B. The BODR shall contain descriptions or otherwise reference the design criteria in these Technical Requirements, see Divisions 2 through 5, outlining Principal Project Company's interpretation of, and compliance with, the Project requirements with respect to configuration, performance, functionality, sustainability, operational, and maintainability requirements for the Project.
- C. The BODR shall be logically organized, including at a minimum:
  - 1. Table of Contents.
  - 2. Executive Summary.
  - 3. Design Work.
  - 4. Allowances.
  - 5. Provisions (including provisions for Joint Development).

- D. The BODR shall address the following at a minimum:
1. Project-wide design methodology and approach.
  2. Applicable design criteria, considerations, influences, and factors. This shall include the LEED scorecard, GS6 form, and energy model for the Project.
  3. System selections and element designs.
  4. Third Party integration, where applicable.
  5. Development and status of Allowances for the Infrastructure Facility including:
    - a. Furniture, fixtures and equipment for the Project's office/admin and training spaces
    - b. Information technology/communications equipment for the Project
  6. Demonstration by all disciplines that adequate provisions are included in the Infrastructure Facility design in order to support the delivery of either Joint Development Alternative. At a minimum, the BODR this shall include the following elements for each Joint Development Alternative:
    - a. Architectural layouts for the Joint Development Alternatives requiring minimal if any alterations, such as the addition of vehicular ramps and modifications to roofing materials, including waterproofing systems.
    - b. Strength and stiffness of the structure support any additional or modified loads and layouts for the Joint Development Alternatives, such as temporary construction loads, permanent additional loads and masses, the addition of vehicular ramps, and vibrations from vehicles on the roof.
    - c. Demonstration of compliance with the design criteria for airborne noise, vibration and structure borne noise.
    - d. Utilities and utility rooms, shafts, and other infrastructure are sized to support the Joint Development Alternatives and located to minimize disruption from the Joint Development Alternatives.
    - e. HVAC, electrical, low voltage and plumbing equipment, and routes through the Project, are located to minimize disruption from the Joint Development Alternatives, including consideration of maintenance requirements.
    - f. Rainwater and storm drain system is designed and located to minimize disruption from the Joint Development Alternatives.
    - g. Exiting and circulation layouts, including vertical transportation, require minimal if any alterations from the Joint Development Alternatives.
    - h. Building use re-classification is not required.
    - i. Logistics and traffic changes to support the Joint Development Alternatives are acceptable, such as additional bus movements.
    - j. Demonstration of minimal disruptions to operations, if any, from the Joint Development Alternatives. See Division 4, Section 2.8 (Consideration of Joint Development Alternative Scenarios) for additional specific requirements.

#### **1.8.5.2.4. Provision Documents for Joint Development Alternatives**

- A. With each proprietary Design Deliverable, Principal Project Company shall advance Design Documents and coordinate all disciplines for the entire Project to demonstrate that adequate provisions are included in the Infrastructure Facility design in order to support the Joint Development Alternatives required in these Technical Requirements ("Provision Documents"). At a minimum, every proprietary Design Deliverable must be designed and

coordinated with the BODR drawings and materials for each Joint Development Alternative to ensure that each Joint Development Alternative can be implemented in the future, by providing the following materials at a minimum as part of the Provision Documents:

1. Architectural layout plans, sections and elevations for areas and levels affected, including access and exiting.
  2. Structural, mechanical, electrical and plumbing plans, sections and elevations to accommodate architectural layout plans for areas and levels affected.
- B. Provision Documents shall communicate, with images and narrative, potential modifications and modification process required of the Infrastructure Facility to accommodate the Joint Development Alternatives.
- C. For an avoidance of doubt, drawings at each stage of the Proprietary Design Review process indicated in Section 1.8.5.2 shall be verified and updated throughout design to explicitly demonstrate that each Joint Development Alternative can be delivered.
- D. Changes to the Release for Construction Documents, see Section 1.8.5.3, during construction are subject to the requirements in Section 1.8.5.2.4. A and B.

#### **1.8.5.3. Design Changes**

- A. Revisions to the Design Deliverables are expected during and as a result of the Proprietary Design Review process and shall not be considered City Changes.
- B. Principal Project Company is responsible for implementing and managing a comment and resolution log to track City comments. This log shall be used in design meetings and Monthly Progress Meetings to ensure Principal Project Company and City are clear on design progress.
- C. City review and comment on Design Deliverables will primarily focus on compliance with the Technical Requirements but may also include minor refinements or clarifications that do not constitute a material change to the Technical Requirements. City review and comment on Design Deliverables will not constitute regulatory review.
- D. In the case where, as a result of a City comment, a revision is required that Principal Project Company believes qualifies as a City Change per Article 12 of the Agreement, Principal Project Company shall raise the concern with the City and the parties shall, acting reasonably, determine if a City Change is required. Principal Project Company shall be responsible for any Change Proposal per Exhibit 9 (Change Procedures) unless the City determines, in its sole discretion, that a City Change Order is appropriate.

#### **1.8.5.4. City Approval of Allowance-related Scope**

- A. City shall approve the final design of Allowance-related scope prior to any applicable order or purchase made by Principal Project Company or City.

**1.8.6. Release for Construction Documents**

- A. Principal Project Company shall use Release for Construction Documents (RFCDs) to construct the Project. RFCDs shall include, as applicable, plan sheets, specifications, shop drawings, working drawings, and other pertinent information. Principal Project Company shall only use a particular RFCD for construction after all previous comments related to the design elements, whether or not contained or depicted in the subject Submittal, have been correctly resolved and closed, and having obtained appropriate AHJ approvals and permits.
- B. Prior to delivering any RFCD, either to the City or to any of Principal Project Company's Contractors, the contents of the RFCD shall be individually signed and sealed by the responsible licensed design professional under the laws of the State of California for the specific content included in the documents. The certifying AOR(s) or EOR(s) shall affix their signature and seal upon the title sheet, that is, on the first cover sheet, and every sheet in a set of several plan sheets per design discipline, on the title sheet and first page of calculations or written reports, and the first page of every separate specification section.
- C. Principal Project Company shall not commence Construction Work prior to approval from the appropriate AHJ's.
- D. Principal Project Company shall diligently track subsequent design changes and, consequently, drawing revisions by keeping a detailed log and maintaining record copies of Current Status Documents defined in Section 1.6 (Record Documents), which reproduced copies and log shall be available to the City at all times. Changes to the RFCDs are subject to the conditions described in Section 1.8.5.2.4. A and B.

## **1.9. SUSTAINABILITY**

### **1.9.1. Sustainability Management Plan**

- A. Principal Project Company shall prepare and submit to the City a Sustainability Management Plan that details approaches it will implement throughout the Term to ensure achievement of the sustainability requirements of the Contract Documents. Annual plan updates during the IFM Period shall document sustainability achievements.
- B. The Project, and all facilities therein, shall comply with the current San Francisco Environmental Code, including but not limited to Chapter 7, Green Building Requirements for City Buildings, and including LEED Gold certification.

### **1.9.2. Sustainability through Integrated Design Process**

- A. Principal Project Company shall follow an integrated design process, incorporating industry leading conservation practices for energy, water and materials, to optimize design decisions relative to sustainability.
- B. Principal Project Company shall engage the major design disciplines, including planning, architecture, structural engineering, landscape design, mechanical, electrical, plumbing, and fire protection as well as other applicable specializations to collaborate on accomplishing sustainability measures.

## **1.10. BUILDING INFORMATION MODELING**

- A. Principal Project Company shall utilize building information modeling (BIM) techniques and successor integrated facilities management systems/software throughout the D&C and IFM Periods of the Project. Principal Project Company shall maximize object intelligence and ensure easy integration with other components of the facilities with which the Project will interface or those facilities adjacent to the Project.

### **1.10.1. BIM Roles and Responsibilities**

#### **1.10.1.1. The City Coordination**

- A. Principal Project Company's BIM Models shall be in accordance with the BIM Project Execution Plan (PxP), as defined in Section 1.10.2 (BIM Project Execution Plan). All models must be compatible with the version of Revit-based applications in use by the City at the Setting Date.
- B. Principal Project Company shall collaborate with the City in developing and incorporating into future iterations of the BIM PxP more highly detailed model requirements and drafting standards as part of modeling efforts.
- C. Principal Project Company shall provide, for quality assurance purposes, access by the City to the Project's model database storage.

#### **1.10.1.2. Principal Project Company BIM Responsibilities**

- A. Principal Project Company shall assume the following BIM roles and responsibilities:
  - 1. Develop Project's BIM PxP describing the BIM implementation approach to be followed by Principal Project Company's BIM team during all Project phases;
  - 2. Produce 3-dimensional (3D) design models of the major Project elements to an appropriate Level of Development (LOD) and as defined in the approved BIM PxP;
  - 3. Combine 3D design model elements into an integrated model for construction planning and facilities management purposes;
  - 4. Perform BIM activities as defined in the approved BIM PxP;
  - 5. Generate properly formatted 2-dimensional plan sheets (drawings) from the finalized 3D design model;
  - 6. Use 3D model to generate a construction sequence planning model (3D/4D model) for further evaluation and optimization of design;
  - 7. Deliver an integrated design model to the City with each Design Deliverable, with successive Design Deliverable submittal exhibiting further refinement of key details; and
  - 8. Update 3D model as construction progresses and provide LOD 500 As-Built Model at Final Acceptance.

### **1.10.1.3. BIM Manager**

- A. Principal Project Company shall appoint a full-time, project-dedicated BIM Manager to manage and oversee the implementation of the program- and/or Project-level BIM program. The BIM Manager serves as the Project Teams' point-of-contact on matters including, but not limited to, compliance with BIM PxB, data exchange, shared coordinates, and multidisciplinary design coordination. The BIM Manager's role and responsibilities include:
1. Ensuring that models are geospatially located and are consistent with the City's geospatial coordinate system;
  2. Ensuring that all Design team members are delivering and updating their respective information models according to the currently accepted Project Schedule version;
  3. Ensuring that submitted building information models comply with all requirements as defined in the applicable controlling documents;
  4. Reviewing integrated design model for trade coordination purposes and perform clash detection;
  5. Providing design coordination and constructability feedback to all disciplines regarding their uploaded information;
  6. Facilitating design and trade coordination meetings; and
  7. Serving as point-of-contact for BIM coordination with the City .

### **1.10.2. BIM Project Execution Plan**

- A. The BIM Execution Plan shall describe the Principal Project Company's BIM-enabled workflows and systems to successfully deliver, operate, and maintain the Project, principally as a Level-2 BIM and in accordance with the BIM objectives and other parameters to be established in the Owner's Information Requirements (OIR).
- B. Principal Project Company shall prepare and submit to the City a BIM Project Execution Plan (BIM PxB) pursuant to the template included in the Reference Documents and shall include master information and data management, and assignment of individual roles and responsibilities for well-coordinated model generation and data integration. The BIM Execution Plan shall set forth the processes and requirements for progressive development of an integrated BIM 3D-4D (schedule)-5D (cost)-6D (asset management) model for the Project.
- C. At a minimum, the BIM Execution Plan shall describe:
1. BIM objectives and uses;
  2. Roles and responsibilities of the Parties;
  3. BIM requirements and processes;
  4. Methods and protocols / standards;
  5. Schedule for progressive development of the BIM model according to the Project's anticipated development;
  6. Supporting software requirements; and
  7. Development of (a) as-built drawings from the BIM model and (b) the as-built BIM model.

- D. The BIM Execution Plan shall be consistent with and reference, as applicable, the relevant design review, project management, and or quality management processes and requirements set forth in this Division 1.
- E. The BIM Execution Plan shall include a section that describes how the Principal Project Company will work with the City to develop the OIR, including workshops and a BIM strategy for the Project. At a minimum, the OIR shall include:
1. **BIM objectives:** the BIM objectives for the Project, which shall align with this Section 1.10 and the DMP;
  2. **BIM uses:** the application of BIM methodologies and tools the Principal Project Company and City will use to achieve the BIM objectives;
  3. **Level of detail:** the types of information and level of detail used to specify the datasets that the model entities shall contain, and the depth of such information. The level of detail refers to the depth of geometric and non-geometric information for each dataset (“**level of detail**”);
  4. **BIM deliverables:** any document or information developed by the Principal Project Company that is necessary for the creation of the BIM models and the products resulting from the implementation of BIM tools and processes—at a minimum, these BIM deliverables shall include the BIM Execution Plan (BIM PxP), the BIM models, and other supporting documents;
  5. **Collaboration strategy:** the strategy for the City and Principal Project Company to collaborate within the BIM environment, which shall incorporate known methods for management and information exchanges throughout the lifecycle Project. At a minimum, the collaboration strategy shall describe how the City and the Principal Project Company will access, review, and approve information throughout the lifecycle of the Project; the collaboration strategy shall address the common data environment(s) (“**CDE(s)**”) that the Principal Project Company will deploy to achieve the BIM objectives and the collaboration strategy;
  6. **Model structure / organization to share structured, unambiguous information as part of the BIM environment:** the strategy for the City and the Principal Project Company to agree on the minimum standardization requirements to guarantee the availability and quality of information throughout the lifecycle of the Project—examples of requirements for which Principal Project Company must obtain City’s mutual agreement upfront (before developing the BIM) include the BIM units, naming, and model sizes; and
  7. **Integration with Asset Management:** the City and Principal Project Company shall agree on the asset data management for the Project’s Asset Management Plan, which shall be developed in accordance and coordination with the SFMTA’s current asset structure and hierarchy in accordance with SFMTA’s Infor CloudSuite EAM platform

### 1.10.3. BIM Data Specifications

- A. Principal Project Company shall utilize the ASTM UNIFORMAT II Classification System and the OmniClass Construction Classification System (OCCS), or equivalent.

**1.10.4. Model Ownership**

- A. Principal Project Company shall turn over to the City the finalized BIM model for each SFMTA O&M Facility within 30 Days after the City's Final Acceptance of the SFMTA O&M Facility.

## **1.11. CONSTRUCTION MANAGEMENT**

### **1.11.1. Construction Safety**

- A. Principal Project Company shall be solely and fully responsible for the health and safety of persons during the performance of the Work as specified in Division 10 of the Technical Requirements.

### **1.11.2. Construction Security**

#### **1.11.2.1. Overview**

- A. Principal Project Company shall secure the Project Site and maintain it in a secure manner at all times. Security of the Project Site, equipment, construction materials and all other items contained on the Project Site shall be Principal Project Company's sole responsibility at all times. Principal Project Company shall be solely responsible for all damage and the restoration of damaged property resulting from illegal trespass or unauthorized entry.

#### **1.11.2.2. Project Site Security Plan**

- A. Principal Project Company shall develop, submit to the City, and maintain a Project-specific Site Security Plan (SSP). The document shall define the oversight management program, team organization, and operating strategy to provide and maintain work site security. The SSP shall define the personnel responsible for developing and implementing enhanced security work practices. The SSP requirements shall be strictly enforced by Principal Project Company's field-based security personnel.

##### **1.11.2.2.1. SSP Content**

- A. The SSP shall be organized into indexed sections containing, at minimum, the following information:
1. Table of contents.
  2. Intent and purpose policy statement with approving official's name and signature.
  3. Sensitive security information.
  4. Project security organization chart.
  5. References.
  6. Emergency action plan and personnel contact information.
  7. Security risk analysis of Project Site, including crime data for proximity areas of Project Site.
  8. Work zone/site diagram of construction site boundaries.
  9. Project Site working hours.
  10. Project Site access control.
  11. Procedures for controlling delivery vehicles.
  12. Physical security, where provided, including at a minimum:
    - a. Perimeter, including fencing and lighting.
    - b. Project site signage, including language to deter trespassers. and

- c. On-site and boundary lighting.
  - 13. Equipment security (inventory, controls).
  - 14. Incident reporting.
  - 15. Evacuation plan, route, and rally points.
  - 16. Police department protocols.
  - 17. Explosives handling, storage and transport policy.
  - 18. Trash / recycling removal.
  - 19. Trailers and temporary buildings.
  - 20. Storage containers.
  - 21. Motorized equipment security, including fuel tanks, fuel storage, and batteries.
  - 22. Surveillance, where provided, to include video surveillance and security guard service.
  - 23. Security awareness training.
  - 24. Security progress reporting.
  - 25. Project site audits, reporting and follow-up. and
  - 26. Graffiti and vandalism control.
- B. The SSP shall be applicable to all personnel, visitors, guests, delivery personnel, and Contractors engaged by Principal Project Company on the Project.
- C. The SSP shall comply with applicable Federal, State and local laws, regulations, codes and requirements.

#### **1.11.2.3. Security Requirements**

- A. Principal Project Company shall manage and maintain the secure perimeter of the construction site inclusive of temporary office facilities pursuant to the approved SSP.
- B. Principal Project Company shall prepare and update a Personnel Site Access Roster annotated with time/location and/or particular personnel restrictions. The Personnel Site Access Roster shall be updated when changes in personnel having restricted site access occur. Principal Project Company shall submit the Personnel Site Access Roster within 24 hours after receiving a written request from the City.
- C. The City personnel generally shall, at all times but subject to Project-specific safety and security requirements, have unrestricted access to the Project construction site, to be exercised at the City's discretion.

#### **1.11.2.4. Coordination Requirements**

- A. Principal Project Company shall coordinate Emergency services protocols and procedures, and provide accurate and current personnel contact information sheets. Principal Project Company shall provide and maintain similar information with respect to all appropriate agencies and Utility Owners to ensure:
  - 1. Provisions for documented procedures in response to emergencies, incident reports, and assistance calls.

2. Appropriate patrol of environment external to the Project Site, including storage and laydown yards. and
  3. Provision of criminal investigative support.
- B. In the event of a security incident, Principal Project Company shall contact Emergency services for immediate response and then promptly inform the City, followed by appropriately describing and documenting the incident in a written report.

#### **1.11.2.5. Security Identification**

- A. Principal Project Company's security personnel shall at all times when on duty, carry and clearly display a visible photo ID badge identifying them as such.
- B. Principal Project Company's field-based personnel shall be obligated to report immediately any suspicious activity and unknown or unidentified individual(s) to the designated Site Security Supervisor when observed within or around the context of secured construction worksite perimeter.

#### **1.11.3. Maintenance of Traffic and Work Restrictions**

- A. Principal Project Company shall organize its construction activities to ensure that the surrounding community function with minimal disruption or inconvenience to the public, whether pedestrians or motorists. Close coordination with the City and other Stakeholders shall be provided at all times.
- B. Principal Project Company shall implement controls to ensure transportation principles and standards governing the design, application, and maintenance of the various types of traffic control measures and associated devices required for street construction and maintenance of traffic work are utilized. These principles and standards shall promote safe and expeditious movement of the public through construction and maintenance zones, to ensure the safety of workers performing these activities. Minimum standards of application shall include controlling traffic moving through Work areas, including traffic devices, markings, barricades, channelizing, and hand-signaling devices.
- C. Construction within any public right-of-way shall conform to the safety standards and operating guidelines promulgated by the "Regulations for Working in San Francisco Streets (Blue Book)" by SFMTA, latest edition.
- D. No area within the public right-of-way (from property line to property line and including streets, parking strips, bicycle lanes, gutters, curbs, paths and sidewalks) shall have restricted public access for more than five (5) Days, with the exceptions of areas of new curb ramp and bus pad construction. Principal Project Company shall restore and reopen to the public any and all areas of the public right-of-way within these specified time limits.
- E. Principal Project Company shall coordinate the Work such that it does not prevent pedestrians from entering operating businesses.
- F. Principal Project Company shall coordinate the Work such that any time that the Work occupies the sidewalk along any block, the Principal Project Company shall coordinate with the businesses that are located on or require access through occupied area to maintain daily delivery access and access to garbage/recycling removal services. If the Principal Project Company's activities prevent a business from placing its garbage or recycling on the

curb for pickup, Principal Project Company shall at its expense assist the business with handling and transport of garbage and recycling refuse to nearby designated garbage/recycling collection locations.

- G. See Division 10, Section 01 35 50 (Additional Environmental Procedures), Sections 2.5 and 2.6, for additional instructions and requirements related to minimizing disruptions of pedestrians, bicyclists, transit vehicles, and emergency vehicles.

#### **1.11.3.1. Transportation Management Plan**

- A. Prior to construction, Principal Project Company shall prepare and submit to the City a Transportation Management Plan (TMP) describing how safe traffic operations will be managed and maintained during each phase of construction and in every work zone of the Project.
- B. All traffic control measures shall be sufficient to maintain traffic and pedestrian circulation on streets affected by construction of the Project. The measures will also, at a minimum, be consistent with the requirements of the San Francisco Municipal Transportation Agency (SFMTA)'s Blue Book. Traffic control measures may include but not be limited to, flaggers and/or construction warning signage of work ahead; scheduling truck trips during non-peak hours to the extent feasible; maintaining access to driveways, private roads, and off-street commercial loading facilities by using steel trench plates or other such method; and coordination with local emergency responders to maintain emergency access. Any temporary rerouting of transit vehicles or relocation of transit facilities shall be coordinated with SFTMA Muni Operations.
- C. At a minimum, the TMP shall address traffic management requirements in Division 10 of these Technical Requirements and include the following items:
1. Processes to produce Maintenance of Traffic (MOT) plans, including development, dissemination, implementation, monitoring, refinement, and maintenance of MOT plans.
  2. Names, roles and responsibilities, and qualifying experience and credentials of key personnel, with traffic control expertise, who plan, design, direct, implement, and maintain the TMP.
  3. Procedures to design, plan, schedule, and coordinate construction activities to reduce disruptions to vehicular and pedestrian movements in the vicinity of the Project. The TMP shall especially consider existing vehicular and pedestrian movements prior to construction and take appropriate steps to minimize the disruption of these movements during construction.
  4. Procedures to coordinate with Emergency services, including local enforcement agencies and first responders for the City of San Francisco Police and Fire Departments as appropriate, including preparation of an Emergency Services Plan outlining how Emergency services access will be maintained at all times and conditions regularly communicated to the proper authorities.
  5. Procedures to identify and incorporate the needs of various Utility Owners, governmental entities, local officials, business owners, and other Third Parties in the Project areas.

6. Procedures for obtaining acceptance of detours, road and lane closures and other traffic pattern modifications from SFMTA, and implementing and maintaining those modifications.
7. Procedures for maintenance and replacement of traffic control devices, including pavement markings and traffic barriers.
8. Procedures to regularly evaluate and modify, if necessary, traffic signal timings, and the procedures for the development, approval, implementation, testing, and maintenance of all affected signals.
9. Procedures to coordinate with SFMTA routes to provide temporary system compatibility, establish responsibilities for temporary signal installation, maintenance, operation and removal, and coordinate traffic signal timing with local signal networks.
10. Procedures and process for the establishment of haul routes and the safe ingress and egress of construction vehicles in the designated work zones, including a full description of the haul route to and from any staging area to construction and/or disposal sites.
11. Procedures to modify plans as needed to adapt to current Project circumstances including a contingency plan to alleviate unreasonable construction-related back-ups that can be implemented immediately upon notification from the City.
12. Procedures to communicate TMP information to Project public information personnel and notify the public of reportable MOT issues.
13. Descriptions of contact methods, personnel available, and response times for any deficiencies or critical conditions requiring special attention during off-work hours.
14. Procedures for coordinating with affected neighboring property owners and all businesses directly adjacent to the construction work-zones to address mitigating impacts to access. and
15. Traffic analysis of current traffic conditions and projected traffic conditions for each construction phase or Work activity that affects traffic around the Project site. The traffic analysis shall evaluate level of service, calculate trip delays, and analyze sight distances.

### **1.11.3.2. MOT Design Requirements**

#### **1.11.3.2.1. Traffic Control Plan**

- A. Principal Project Company shall follow procedures set out in the TMP and the SFMTA Blue Book, latest edition, to develop and submit to the City detailed Traffic Control Plans (TCPs) , which provide for all construction phases, as well as all required traffic switching procedures. Principal Project Company is solely responsible for the installation, maintenance, and removal of all elements of the TCPs.
- B. Principal Project Company shall produce a TCP for each phase of Work that affects traffic and involves traffic control details, and shall coordinate with the City on developing the TCP. Principal Project Company is responsible for obtaining all necessary permits from AHJs to implement the plans.

- C. The TCP shall include details for all detours, traffic control devices, striping, and signage applicable to each phase of construction. Information included in the TCPs shall be of sufficient detail to allow verification of design criteria and safety requirements including typical sections, alignment, striping layout, and pavement drop off conditions. TCPs shall clearly designate all temporary reductions in speed limits. Changes to posted speed limits will not be allowed unless specific prior approval is granted by SFMTA in its regulatory capacity.
  - 1. Principal Project Company shall maintain signing continuity on all active roadways within or intersecting the Project at all times.
- D. Throughout the D&C Period, Principal Project Company shall keep all streets and intersections open to traffic by constructing work in systematic stages or segments. Principal Project Company shall maintain access to all streets adjacent to construction activity and shall provide for ingress and egress to public and private properties at all times. Principal Project Company shall assist in preparing and broadcasting public information notices, in accordance with Section 1.15, (Communications and Public Information), well in advance of the implementation of lane closures or traffic detours.

#### **1.11.3.3. Control of Pedestrian Activities**

- A. Principal Project Company is required to provide safe passage of pedestrians in a manner that provides for safety and convenience to the public. Pedestrian and circulation plans describing any restrictions, closures and alternative routings to those properties adjacent to the Work area shall be included in the TCP's for all construction activities that affect pedestrian movements.
- B. Pedestrian and circulation plans shall comply with the following standards:
  - 1. All access to and egress from public facilities must be serviced with pedestrian accommodations.
  - 2. Provisions of appropriate walkways, crosswalks, signage and signalization, pushbutton "Walk/Don't Walk" signals, and other devices are required during all stages of construction. (Principal Project Company may be required to relocate said facilities or to cover facilities and provide temporary facilities of a similar type and magnitude.)
  - 3. Where pedestrian activities are located parallel to and in the vicinity of any vehicular roadway or travel path without a curb section, continuous concrete barrier protection and its related crash attenuators must be provided. Concrete barrier or construction fencing shall be continuously used to segregate pedestrians from construction areas.
  - 4. Pedestrian detour routes must comply with accessibility law.

#### **1.11.3.4. Construction Requirements**

- A. Principal Project Company shall maintain safe traffic operations and control at all times. Principal Project Company shall keep a copy of the approved permit, digital or hard copy, readily available on-site. If at any time the City or other jurisdictional agency's public safety officer determines that the traffic control is not safe to the public or does not meet the intent of the TMP or any specific traffic control plan, Principal Project Company shall take immediate steps to correct the situation as directed. Principal Project Company's

construction operations shall maintain access for the City personnel, and Emergency Services vehicles to areas requiring access at all times.

- B. At the end of each work-shift during which lane(s) have been closed, components of the traffic control system (except portable delineators placed along open trenches or excavations adjacent to the traveled way) shall be removed from the traveled way. Traffic signs and signal equipment must be removed or covered when not in use.
  - 1. All traffic control devices shall be kept in their proper position at all times and shall be repaired, replaced or cleaned as necessary to preserve their appearance and continuity as manufactured.
- C. Principal Project Company shall provide portable changeable message signs, flashing arrow boards, and cones/barricades as field conditions warrant and as deemed necessary by SFMTA, in its regulatory capacity, even if they are not shown on the traffic control plans.
- D. All temporary traffic control devices shall be removed following completion of each construction stage and the normal operation of permanent traffic control devices shall be restored and/or provided by Principal Project Company.
- E. Any damage to traffic signal detector loops, conduits, interconnect, or fiber optic cable shall be immediately reported to the City or its authorized representative, and repaired immediately by Principal Project Company at Principal Project Company's sole expense. Principal Project Company shall take immediate, necessary steps to rectify the situation, including providing a flag person, temporary stop signs, or other devices as the City may direct.
- F. Haul Routes shall be submitted to and are subject to approval by SFMTA and other AHJs as required. Submittals shall comply with the requirements of Division 10 (SFPW General Requirements for Construction). Construction deliveries requiring lane closures shall receive prior approval from SFMTA. Notifications of deliveries shall be made with sufficient time to allow for sufficient review and incorporation of SFMTA comments.

#### **1.11.3.4.1. Detours**

- A. Principal Project Company shall provide motorists with guidance on diverting around the construction, detouring around specific construction sites, and traveling through the construction areas. This shall include the installation and maintenance of temporary regional signs to divert traffic to alternate routes, as appropriate. Motorist guidance to and along detour routes shall be provided, together with regional guidance.

#### **1.11.3.4.2. Temporary Maintenance of Pavement**

- A. Temporary pavement shall be engineered to handle traffic loads while the detour is in place without cracking, rutting, raveling, spalling, bleeding, reduction in the coefficient of friction, or faulting that may affect the safety and comfort of the travelling public. Any pavement defects that may compromise the safety of the traveling public shall be corrected immediately.
- B. Temporary pavement placed for detour purposes shall be removed prior to Final Acceptance. Existing pavements used as detour or haul roads shall be restored to their original condition.

#### **1.11.3.4.3. Pavement Markings**

- A. Principal Project Company shall completely remove existing pavement markings that conflict with temporary or permanent pavement markings. These pavement markings shall be removed by any method that does not materially damage the surface or texture of the pavement. Pavement marking removal by over-painting is prohibited.

#### **1.11.3.4.4. Reinstatement of Utility Cuts**

- A. After installation of drainage structures, storm sewers, or any other public or private utility facility by open cut beneath existing pavements carrying traffic during construction, the pavement shall be restored by Principal Project Company to the satisfaction of SFMTA to provide a normal satisfactory riding surface.

#### **1.11.3.4.5. Hauling Equipment**

- A. Principal Project Company shall keep traveled surfaces used in its hauling operations clear and free of dirt or other debris that would hinder the safe operation of roadway traffic. Rubber-tired equipment shall be used for moving dirt or other materials along or across paved surfaces.
- B. Where Principal Project Company moves any equipment not licensed for operation on public highways on or across any pavement Principal Project Company shall protect the pavement from all damage caused by such movement. Any damage caused by Principal Project Company's operations shall be repaired at Principal Project Company's sole expense.

#### **1.11.3.4.6. Final Clean-Up**

- A. Principal Project Company shall clear and remove from the Project Site all surplus and discarded materials and debris of every kind and leave the entire work zone in a smooth and neat condition after completing any construction process.

#### **1.11.3.4.7. Traffic Control Plan Field Redlines**

- A. In the event that approved traffic control plans require modification during their implementation, due to unexpected field conditions, Principal Project Company shall implement such modifications on a temporary basis.
- B. Principal Project Company shall review such modifications with the EOR and generate a design solution for the remainder of the construction stage in the form of a redline Traffic Control Plan, stamped by the EOR and submitted to SFMTA within 72 hours of implementing the temporary field modification.
- C. Any related plans, including temporary traffic signal plans and temporary street lighting plans shall be similarly updated and submitted to SFMTA for information.

### **1.11.4. Temporary Facilities and Utilities**

#### **1.11.4.1. Temporary Utilities**

- A. Principal Project Company shall provide all temporary utility systems, services, connections and disconnections necessary to perform the Work, including maintenance of utility service to adjacent properties and utility service necessary for the City staff to perform Project-related functions.

- B. Principal Project Company shall obtain and pay for any required temporary services and associated permits.
- C. Principal Project Company shall provide to the City temporary utility designs and engineered drawings as necessary per the specific requirements of the AHJ and respective Utility Owner. Principal Project Company shall coordinate with all parties as necessary to provide temporary utilities, subject to the restrictions of Third Party and Owner Utility agreements.
- D. Principal Project Company shall disconnect and remove these temporary utilities connections that become unnecessary as the Work progresses, including restoration of existing improvements disturbed by the temporary utility connection, as applies, to the AHJ's satisfaction.
- E. Upon disconnection of temporary systems, Principal Project Company shall restore to original condition all disturbed areas and facilities (street improvements) not otherwise being improved as part of the Project.

#### **1.11.4.2. Project Management Office Requirements**

- A. Principal Project Company shall establish a local area Project Management Office from which to manage, direct and administer the design and construction of the Project. In addition, Principal Project Company shall establish no less than one other temporary, field office (the Project Construction Management Office) for purposes of housing onsite construction administration and inspection services.
- B. The City's personnel will co-locate with Principal Project Company and its Contractors at the on-site construction management office for the duration of the D&C Period. Principal Project Company shall provide temporary facilities for the City's needs in accordance with the Contract Documents.
- C. Principal Project Company shall obtain and pay for any required Regulatory Approvals, including temporary facility permits.

#### **1.11.4.3. Construction Management Offices Requirements**

- A. Principal Project Company shall provide and manage fully outfitted, furnished and sufficiently networked office spaces for accommodating both Principal Project Company's and the City's personnel including, at a minimum, the provision of required insurance, lease agreements, utility connections, utility service, internet service, maintenance, janitorial, security and other services necessary to provide lighting, heating, power, water and sanitation in these required temporary facilities. All office furnishings shall be new when the office is first equipped, and shall be maintained in good working order.
- B. Principal Project Company shall provide temporary, offsite parking facilities, sufficient for the number of individuals assigned to this temporary facility plus accommodation for visitor parking.
- C. Fixtures, equipment, systems, and appurtenances furnished by Principal Project Company for use by the City shall remain intact and be returned to Principal Project Company as Principal Project Company's property no more than 45 Days after Final Acceptance.

- D. Heating and air conditioning of sufficient capacity and zoning shall be provided to adequately control room temperatures at all times. In the event that temperature is not within an acceptable range, regardless of cause, for more than two hours, Principal Project Company shall take necessary measures (including temporary heating or cooling) to restore temperature within two hours to an acceptable range of room temperatures as the City may determine.
- E. Principal Project Company shall provide integral sanitary facilities within these temporary offices exclusively for the use of office personnel. Such sanitary facilities shall include a flushing water closet and lavatory with hot and cold potable water. Principal Project Company shall obtain sanitary sewer permit and provide connection to public sanitary sewer if the permitting agency so requires. Each restroom shall be suitably equipped with liquid soap dispensers, toilet paper dispensers, toilet seat cover dispenser, paper towel dispensers, paper waste receptacles, industrial-grade first aid kits with eyewash stations, all furnished with continuous, ongoing supply of associated consumable restroom and janitorial products. Separate restrooms shall be provided for each gender. Principal Project Company shall provide cleaning of the restrooms and employee break room wet counters daily.
- F. Principal Project Company shall provide kitchen facilities in these temporary offices, including microwave oven, refrigerators that produce ice cubes, a source of purified cold and hot drinking water, coffee / tea machines, and paper towels, cups and plates.
- G. The space for the City shall be furnished and equipped in good and serviceable condition, at least of the same quality as Principal Project Company's counterpart staff space.
- H. Principal Project Company shall be responsible for disposal or removal of all the City office facilities and any Project Site restoration following closure of the offices.
- I. Principal Project Company shall provide a temporary facility at the Project Site for housing Construction Management Offices, as follows:
  - 1. Principal Project Company's space may be as determined by Principal Project Company. Jointly shared space and space for the City's exclusive use shall include elements defined in **Table 2** (CM Office Space Requirements for the City). The quantity and size of spaces shall be coordinated and determined with the City.
  - 2. Principal Project Company shall ensure City has continuous access to site and office facility via keys or card keys/fobs.
  - 3. Separate, secured, storage suitable for the City-provided portable equipment.
  - 4. Hard-surfaced (paved) parking, sufficient for City Project vehicles and visitor spaces dedicated to the City, quantity to be discussed and established with the City.
  - 5. At least one conference room large enough to facilitate all-hands meetings with Principal Project Company and the City.
- J. Principal Project Company shall provide to the City Construction Management Office site and floor plans prior to planned occupancy.

**Table 2: CM OFFICE SPACE REQUIREMENTS FOR THE CITY**

<b>Space</b>	<b>Quantity</b>	<b>Minimum Size (SF)</b>
Office (City)	1	200
Workstation Cubicle (City)	2	100 per workstation
Conference Room (Shared)	1	500

K. Principal Project Company shall commence its occupancy and the City shall have ability to commence occupancy of the temporary facilities no later than 14 calendar days from NTP 2, which the City occupancy shall continue without interruption until Substantial Completion

**1.11.4.4. Office Systems and Equipment**

A. Principal Project Company shall provide the City with continuous access to and shall maintain, at a minimum, trouble-free operation of the following systems and equipment at this temporary office:

1. Electrical infrastructure adequate for office use.
2. High-speed internet connection, hard wired and wireless network. DSL Internet Service, 50 Mbps minimum and wireless router, exclusive to the City’s office.
3. Computer network wiring for workstation to support all networked devices.
4. 4-drawer steel file case with lock and key.
5. Plan rack and hangers.
6. 4’x4’x1’ deep metal bookcase.
7. Waste paper basket
8. Clothes hangers and rack on wheels.
9. Network connected laser printer, dry copying type using bond paper - scanner and fax capable; able to copy 8½ x 11 and 11 x 17 size paper at 45 page per minute (ppm); features to include color, b&w, auto doc feeder, duplex copying/printing, collate, staple, hole punch and sort options.
10. Computers, monitors and cables.
11. HDTV with wall mounting bracket and white board in each conference room.
12. Consumables such as paper, pads, sticky notes, writing utensils, erasers, rulers, staplers, paper and binder clips etc. as needed and requested by the City.

**1.11.5. Construction of Laydown, Staging, and Casting Yard**

A. Principal Project Company shall utilize the Project Site and provide any additional support areas required.

### **1.11.6. Project Site Cleaning**

#### **1.11.6.1.1. Waste Material**

- A. Principal Project Company shall, at all times, maintain the Project Site in a clean and neat condition, clear and free of waste, trash, rubbish and debris. Waste management shall comply with requirements herein as well as those in Division 10 of the Technical Requirements.
- B. No construction waste material shall accumulate or remain on the Project Site or adjoining streets and public right-of-way, and any remnants or traces must be removed immediately, without additional cost to the City. Principal Project Company shall clean and continue to keep clean all roadways, sidewalks, and other public areas in which the Work is to be done. Such adjoining areas shall be protected against unauthorized dumping of waste material by others, which is Principal Project Company's sole responsibility to remove, and shall be left in a clean and neat condition.
- C. Concrete mixing trucks shall not be washed on local City streets, nor shall the waste material from the washing out of concrete mixing trucks and grouting operations be discharged to any sewer manhole, catch basin, sewer or storm drain. Principal Project Company is solely responsible to prevent waste or debris from entering into storm or sanitary systems.
- D. All trash, litter, vegetation material, recycling, and similar waste generated in the course of construction shall be placed into rodent-proof, tightly covered, plastic-lined rubbish containers or trash/recycling receptacles located in each construction work-zone.
- E. All construction work-zones shall be protected against unauthorized dumping of waste materials by others, which is Principal Project Company's sole responsibility to remove, and shall be left in a clean and neat condition.
- F. Any refuse or debris that spills or blows from a rubbish container or trash receptacle shall be cleaned up immediately.

#### **1.11.6.1.2. Public Roadway Cleaning**

- A. Principal Project Company shall prevent dirt and debris transfer from the leaving the Project Site and from spilling onto public roadways, sidewalks, paths, and trails adjoining the Project Site. Maintenance of the work area and debris/spill control shall comply with the requirements in Division 10 of the Technical Requirements. Dirt and debris transferred to paved surfaces shall be cleaned up immediately.
- B. All public roadways and walkways with adjacency and near adjacency to the Project, including public ways and roadway approaches within the Project Site limits, shall be cleaned daily. All haul routes shall be cleaned daily. Dry sweeping of streets is prohibited.

### **1.11.7. City Access Period Make-Ready Requirements**

- A. Principal Project Company shall prepare the IT/Comms Site prior to the City Access Period so that the IT/Comms Site is:
  - 1. Thoroughly cleaned and dust free;
  - 2. All molding and finish work is completed;
  - 3. Final coat of paint is applied and dry; and

4. All power and data cabling is installed and functioning.
- B. For the MDF and all IDFs, Principal Project Company shall ensure the following additional conditions are met prior to the City Access Period:
1. Spaces are conditioned with required temperature controls; and
  2. Door installed is lockable.

## **1.12. COORDINATION WITH THIRD PARTIES**

### **1.12.1. Third Party Coordination**

- A. Except as otherwise prescribed in the Contract Documents, Principal Project Company shall coordinate directly with each Third Party entity to identify, collaborate and resolve all items and issues that impact the Project. Principal Project Company shall invite the City's designated representative to participate in Third Party coordination efforts, which includes responsibility to arrange meetings, obtain permits and approvals from AHJs, and to design, purchase / acquire equipment and materials, construction and inspection. City and/or the Third Party (agency or utility) will be inspecting and/or providing oversight of Principal Project Company's construction and resulting compliance with quality assurance/quality control requirements, accepted implementation plans and testing.
- B. Principal Project Company shall coordinate and resolve all Third-Party items and issues throughout the D&C Period of this Agreement, whether or not:
  - 1. The City has had previous discussion with a Third Party;
  - 2. The City has executed a separate agreement and/or signed a memorandum of understanding with a Third Party; or
  - 3. The City has or has not identified a Third Party.
- C. Principal Project Company shall engage a Third Party and Utility Coordination Manager (TPUCM) assigned exclusively to the Project to serve as the main point of contact for Third Parties until the end of the D&C Period. Such TPUCM shall have previous relevant experience on at least two design-build projects, with at least one in the San Francisco area within the last five years.

### **1.12.2. Third Party and Agency Coordination Contacts**

- A. For relations with Third Parties and Utility Owners not covered by separate agreements, Principal Project Company shall be responsible for all coordination activities, including identifying and maintaining updated contacts lists.

### **1.13. COORDINATION WITH UTILITY OWNERS**

- A. Principal Project Company shall coordinate directly with respective Utility Owners to identify and confirm utility locations, potential conflicts and relocations necessary for the Project.
- B. Principal Project Company shall take all actions necessary and reasonably practicable to identify and confirm the existence and exact location, size and type of all Utilities within the Project Site or otherwise potentially affected by the Project construction, including all potentially impacted service lines.
- C. Principal Project Company is responsible for Utility investigations, conflict resolution, design, design approvals, construction permits, construction, inspection, commissioning and coordination of all new and existing utility line adjustments and protection.
- D. Principal Project Company's obligation to coordinate is applicable to all Utilities in any way impacted by the Project, whether or not:
  - 1. The City has had previous discussions with a Utility Owner.
  - 2. The City has entered into a utility agreement with the affected Utility Owner.
  - 3. The City has reliably represented the existing utility on mapping and
  - 4. The utility was installed before, during or after construction and during the Term of this Agreement.
- E. Principal Project Company may enter into separate agreements with one or more Utility Owners. Principal Project Company shall submit to the City all such utility agreements before executing.
- F. Regarding Utility Coordination and Utility Work, the TPUCM shall be the main point of contact for Utility Owners and the City until the end of the D&C Work, overseeing all Utility Work performed for the mutual benefit of the Principal Project Company and the City.

#### **1.13.1. Utility Coordination Work Plan**

- A. For each Utility, Principal Project Company shall prepare, submit to the City, and implement a Utility Coordination Work Plan (UCWP), which shall include:
  - 1. Preliminary identification of Utility Work necessary for the Project.
  - 2. Identification of the party responsible for the design, construction, inspection, acceptance, and cost of the specific Utility Work in accordance with the Contract Documents.
  - 3. Verification that all post-construction utility facilities are capable of providing service at least equal to that offered by the pre-construction utility facilities, unless Utility Owner has specified otherwise.
  - 4. Submittal, Review, and Approval processes for the City and Utility Owner, as required, in accordance with the Contract Documents and respective Utility Agreements and Utility Owner standards.

5. Regularly-scheduled utility coordination meetings, beginning 30 Days after concluding the Project Work initiation meeting and continuing until the end of the D&C Period. Meetings shall be attended by designated representatives of Principal Project Company, Utility Owners, affected Stakeholder(s) and the City. Principal Project Company shall record and distribute meeting agendas, minutes, and attendance records.
6. Creation, maintenance and update on a monthly basis the Project Utility Plans showing existing, proposed, and As-Built utility alignments, including temporary relocations and abandonments.
7. Establishing design and construction procedures, processes and schedule for adjusting utilities.
8. Establishing a process and protocols for emergency work that includes timely status updates and coordination with the affected Utility Owner and the City, for issue resolution.
9. Ensuring that Utility Work is completed in accordance with the particular utility coordination work plan. and
10. Creation, maintenance, submittal to the City, and monthly update of a Utility Coordination Work Plan Status Updates, as further defined in Section (Utility Matrix and Utility Work Status Plan).

#### **1.13.2. Utility Project Execution Plan**

- A. Principal Project Company shall prepare and submit to the City a Utility Project Execution Plan for each Utility Owner and Third Party. City and Principal Project Company, along with relevant Utility Owner or Third Party shall mutually agree upon a Final Project Execution Plan with respect to the particular UCWP. For purposes of this Section 1.13.2, “Utility Coordination Work” includes Principal Project Company’s performance of any Betterment for benefit of a Utility Owner and “Principal Project Company’s Third Party Work” includes Principal Project Company’s performance of any additional improvement for the benefit of a Third Party.
- B. Principal Project Company shall submit a sample Project Execution Plan in accordance with a schedule that comports with Principal Project Company’s construction schedule. Principal Project Company shall elicit and incorporate Utility Owner’s engagement/consultation efforts in the planning, design and construction processes as early as possible. An initial Draft Project Execution Plan shall be submitted no later than 60 Days following NTP 1. The Project Execution Plan shall include division of responsibilities between Utility Owner and Principal Project Company as it pertains to design, procurement / provider of material and equipment, construction, testing and acceptance.
- C. Each initial Draft Project Execution Plan will be reviewed only by the City and not necessarily by the Third Party or Utility Owner. Principal Project Company shall promptly address review comments to the Draft Project Execution Plan.
- D. Upon resolution of outstanding comments, Principal Project Company shall submit each finalized Project Execution Plan, concurrently, for review and acceptance by the City and Utility Owner.

- E. The Project Execution Plan shall provide detail of and understanding of the work to be performed and shall contain, at a minimum:
1. Detailed procedures not otherwise enumerated in the Utility Agreement or Third Party agreement for the Utility Work, Principal Project Company's Third Party Work, inspection, and acceptance of facilities or other work to be owned by the Utility Owner or Third Party upon completion.
  2. Detailed procedures for Submittals in accordance with the Third Party Agreement, Utility agreement, and other submittal requirements of the Contract Documents.
  3. The Submittal List as relates to the Third Party or Utility Owner, which shall be coordinated and updated.
  4. Principal Project Company's approved Project Schedule relevant to scope of Utility Work or Principal Project Company's Third Party Work.
  5. Standards, responsibilities and procedures for design and review of the Utility Work or Third Party Work.
  6. Standards, responsibilities and procedures for performance of the Utility Work or Third Party Work.
  7. Standards, responsibilities and procedures for any inspection, testing and acceptance of facilities or other work required prior to acceptance (including, with respect to Utility Owners, placing facilities into service).
  8. Standards, responsibilities and procedures for quality assurance and quality control of the Utility Work or Third Party Work.
  9. The scope and timeline for development of operations and maintenance procedures necessary for Utility Work or Principal Project Company's Third Party Work, if any. and
  10. Any information, plan or procedure specifically called for in the Utility agreement or Third Party agreement, as applicable.
- F. The Project Execution Plan may neither expand nor diminish Principal Project Company's rights and privileges under this Agreement and remainder of the Contract Documents, or under the Utility Agreement or Third Party Agreement, as applies.
- G. The Project Execution Plan may neither expand nor diminish Principal Project Company's rights and privileges under this Agreement and remainder of the Contract Documents, or under the Utility Agreement or Third Party Agreement, as applies. Refer to Article 7.6.11 (Utility Betterments) of the Agreement for provisions with respect to Betterments.

### **1.13.3. Utility Tracking Report**

- A. Principal Project Company shall, at least monthly and otherwise upon the City's reasonable request, deliver to the City and the applicable Utility Owners, a report, the Utility Tracking Report, which shall include the following information (unless otherwise agreed between the Parties):
1. Design interface dates for each Owner Adjusted Utility.
  2. The relevant number and execution date of each executed Utility Work Order.
  3. Each design agreement execution date.

4. Each construction agreement execution date.
5. The date on which any completed as-built plans were delivered to or by the Principal Project Company, as applicable. and
6. Identification of all changes made since the immediately prior Utility Tracking Report.

**1.14. ENABLING AND RELATED PROJECTS**

**1.14.1. Enabling Projects**

A. Table 3 Enabling Projects/Tasks identifies enabling projects associated with the Project. Principal Project Company shall address the timing of these projects in the Project Schedule.

**Table 3: ENABLING PROJECTS/TASKS**

LULEP Task #	Project Name	Scope of Work	Start of Work	End of Work
		TABLE IS INTENTIONALLY LEFT BLANK		

**1.14.2. Related Projects**

A. Principal Project Company shall coordinate and be aware of Related Projects that are occurring on or around the Project Site during the D&C Period that will directly interface with Principal Project Company’s Work, including those listed in Table 4 Related Projects. Construction logistics as well as sharing of haul routes and equipment will need to be coordinated with the City and the other contractors. Principal Project Company shall make itself aware of the status and progress of Related Projects and shall coordinate interface requirements with each Related Project.

**Table 4: RELATED PROJECTS**

Interface Obligation	Project Name	Scope of Work	Responsible Party
Coordination	WD-2801 8- and 12-Inch Ductile Iron Water Main Replacement, 16-Inch Earthquake Resistant Ductile Iron Water Main Installation, Sewer Replacement, and Pavement Renovation, from Mariposa Street to Cesar Chavez on York and Hampshire Streets	Replace and provide redundancy to the aging pipelines of San Francisco’s water distribution system, replace aging sewer facilities, and renovate pavement. The work to be performed under this contract includes the installation of 8-, 12- and 16-inch ductile iron and 16-inch earthquake resistant ductile iron water pipe, installation of 12-inch vitrified clay sewer pipe, construction of curb ramps, and pavement renovation.	SFPUC (June 2023 - Oct 2025*)  * Scope near Project Site is anticipated to be completed prior to Spring 2025

<b>Interface Obligation</b>	<b>Project Name</b>	<b>Scope of Work</b>	<b>Responsible Party</b>
Coordination	WW-726 Various Locations Sewer Replacement No. 15	Sewer rehabilitation from Potrero Avenue to Hampshire Street on Mariposa Street.1	SFPUC (July 2024 - Jan 2026*) * Scope on Mariposa ~2 months
Coordination	WW-741 Various Locations Spot Main Sewer Replacement No. 1	Partial sewer replacement from Hampshire Street to Bryant Street on 17th Street.	SFPUC (Nov 2024 - Aug 2025*) * Confirming with SFPUC that this scope along 17th Street is still included in their construction contract
Coordination	1850 Bryant Street	New construction of 6-story life sciences facility.	Lighthouse Real Estate (TBD*) * Construction timeline TBD; currently pulling building permits

## **1.15. COMMUNICATIONS AND PUBLIC INFORMATION**

- A. The City and Principal Project Company shall jointly maintain an open dialogue with the public, businesses, community groups and organizations, Emergency services, affected Third Parties, and Utility Owners with facilities potentially impacted by Principal Project Company's means and methods in delivering the Project during the D&C Period. Such communication shall support building a long-term relationship between Principal Project Company and Stakeholders based on mutual trust and respect.
- B. All public information and communication materials shall meet ADA requirements. All public information and communication materials shall be provided in both English and Spanish.
- C. Principal Project Company shall obtain permission from trademark owner for all uses of all trademarks.

### **1.15.1. Media and Communications**

#### **1.15.1.1. Media and Communications Team Contacts**

- A. City must designate at least two (2) City staff members authorized to receive notices and communicate with Principal Project Company about all public outreach program matters (each, the "City Project Communications Team Contact") and designate at least two (2) City staff members authorized to receive notices and communicate with Principal Project Company about all media matters (each, the "City Media Contact")
- B. Principal Project Company must designate at least one person (the "Principal Project Company Project Communications Team Contact") who will be authorized to receive notices and communicate with City about the public outreach program matters and designate at least one person (the "LD Media Contact") who will be authorized to receive notices and communicate with City about all media matters. Either Party shall have the right to change the persons designated as their respective Communications Team Contact and Media Contact by delivering written notice of that change to the other Party.

#### **1.15.1.2. Press Contacts**

- A. Principal Project Company must not speak with the press or social media about the Project, its negotiations with City or submittals to City, or Principal Project Company's proposed development concepts, plans, phasing or uses (collectively, "Press Matters") that have not been approved by City in writing for public release.
- B. A "Press Release" means any written press release, advertisement, or other formal communication to any media outlet (including newspapers, local blog, radio and television stations, and web sites). Principal Project Company agrees it will provide the City Media Contact with a draft copy of any Press Release with no less than three (3) Business Days' prior notice before its proposed release and will not issue any Press Release that has not been approved by the City Media Contact. City will have the right to issue its own separate Press Releases.

- C. The Principal Project Company Outreach Plan, see below, will govern Principal Project Company's Press Releases and Principal Project Company's media contacts unless City gives Principal Project Company written notice (a "Noncompliance Notice") that Principal Project Company has not kept City informed of Principal Project Company media's activities with respect to the Project as required in the Principal Project Company Outreach Plan. As of the date of a Noncompliance Notice, Principal Project Company may not issue, nor permit or authorize any other party to issue, any Press Release relating to the Project, its negotiations with City or submittals to City, or Principal Project Company's proposed development concepts, plans, phasing or uses that have not been approved by the City Media Contact in writing for public release.

#### **1.15.1.3. Press Conference or Media Activity**

- A. Principal Project Company agrees not to hold any press conference or media activities regarding any Press Matters without first inviting the City Media Contact to be present, or have another City representative to be present, at the press conference or media activity and obtaining the City Media Contact's consent to the press conference or media activity. Principal Project Company must provide the City Media Contact with no less than five (5) Business Days' prior notice of the date and time of any proposed press conference or media activity and state in detail the purpose of the press conference or media activity and the topics to be discussed ("Conference/Media Summary"). The City Media Contact must review the Conference/Media Summary promptly and advise Principal Project Company of any comments by 5:00p.m. on the day before the press conference/media activity. If the City Media Contact does not respond within two (2) Business Days of receiving the Conference/Media Summary, the Conference/Media Summary will be deemed approved.
- B. Principal Project Company must make reasonable efforts to schedule the press conference or media activity to accommodate the schedules of the City representatives designated to attend by the City Media Contact. If City reasonably believes the proposed press conference/media activity would adversely affect its interests, then City shall have the right to withhold its consent to Principal Project Company holding the press conference or media activity, even if the press conference or media activity may further Principal Project Company's interests.
- C. City is entitled to withhold its consent to a Press Release, proposed press conference or media activity by Principal Project Company, or a Conference/Media Summary if the City believes it would adversely affect the City's relationship with the public or a regulatory agency or adversely affect a regulatory agency's decision regarding any Regulatory Approvals. If the City Media Contact reviews a Press Release or Conference/Media Summary and believes that revisions or changes are advisable and appropriate, Principal Project Company must make the those suggested revisions or changes irrespective of whether it may further Principal Project Company's interests.
- D. Principal Project Company must timely notify the City Media Contact of media inquiries regarding the Project received by Principal Project Company and Principal Project Company's proposed response. The City Media Contact can waive any of the notice periods required under Section 7.6 (Community Outreach and Public Relations) in writing or by telephone.

## **1.15.2. Public Outreach and Engagement**

### **1.15.2.1. City Public Outreach and Engagement Program**

- A. The City will lead the stakeholder outreach to the following parties (the “City Outreach Parties”): City staff, SFMTA staff, the SFMTA Citizens’ Advisory Council, other SFMTA working and advisory groups, the SFMTA Board, the Board of Supervisors (and its committees and members), City departments, and other City regulatory agencies. This outreach (the “City Public Outreach and Engagement Program”) will be to educate the City Outreach Parties and address any of their questions regarding the Bus Yard Component. Principal Project Company must not initiate any outreach for matters within the City Public Outreach and Engagement Program. Principal Project Company must forward any questions or information requests it receives from the City Outreach Parties for matters within the scope of the City Public Outreach Program (other than those raised by a Regulatory Agency in connection with a Regulatory Approval) to a City Project Communications Team Contact and notify the questioner or requester that it is doing so.

### **1.15.2.2. Principal Project Company Support**

- A. Principal Project Company must use commercially reasonable efforts to support the City Public Outreach and Engagement Program by taking the following actions:
1. Attending meetings scheduled by the City with members of the public and any of the City Outreach Parties to describe the Bus Yard Component, the Common infrastructure, or the Infrastructure Facility, provided the City shall provide at least five (5) Business Days’ prior notice of such meetings to Principal Project Company.
  2. Providing supporting materials for those meetings, as requested by the City
  3. Collaborating with the City on any written materials provided by the City to Principal Project Company for the City Public Outreach and Engagement Program
  4. If the City requests Principal Project Company to provide supporting materials for the meetings described above or input on any materials described above, Principal Project Company must make commercially reasonable efforts to provide those materials or that input within three (3) Business Days following its receipt of the City’s request; if such supporting materials cannot be reasonably provided within such three (3) Business Day period, then Principal Project Company must provide them as soon as reasonably possible.

### **1.15.2.3. Public Outreach and Engagement Plan**

- A. Principal Project Company shall develop a Public Outreach and Engagement Plan (the “Public Outreach Plan”) and submit for City’s review. Once approved by City, Principal Project Company must comply with the processes and requirements of the Public Outreach Plan. Principal Project Company will work collaboratively with City to ensure that the goals of the Public Outreach Plan are met, and address any needed changes to Public Outreach Plan during the Term.

- B. Principal Project Company shall develop the Public Outreach Plan using City's Communications Division's Public Outreach and Engagement Requirements (POER) v.1.0, which is included in Division 9 of the Technical Requirements. The Public Outreach Plan also must conform to the process described in the Public Outreach and Engagement Plan Guide included as an attachment to Division 9 of the Technical Requirements.
- C. At a minimum, the Public Outreach Plan shall provide for the requirements herein and referenced herein and shall:
1. Identify community stakeholders and describe planned engagement with stakeholders, including those located within a minimum of 900 feet of the Project Site:
    - a. Local residents (renters and homeowners)
    - b. Neighborhood and merchant groups
    - c. Businesses
    - d. Property owners (business improvement districts, etc.)
    - e. Faith-based institutions
    - f. Cultural organizations
    - g. Community-based organizations
  2. Identify opportunities for community stakeholders to provide input and influence the Project including in developing alternatives and formulating solutions.
  3. Detail outreach and engagement techniques that will be used to inform the public and solicit stakeholder input that could affect the Project, including multi-channel, multilingual communications tactics, community meetings, and other outreach methods.
  4. Develop key messages for both general and specific audiences.
  5. Establish a schedule for public outreach and engagement activities and tasks.
  6. Establish a budget to fund the City Public Outreach and Engagement Program and Public Outreach Plan to safely and effectively engage with Project stakeholders through each Project phase (i.e. i.e. Project led events, community tabling events, sponsoring community events, collateral mailers, newspaper, radio and online ads, brochures, flyers, posters/signage, website/digital content, stakeholder giveaways, hand sanitizers, t-shirts, tote bags, water bottles, and other forums for educating the public).
  7. Ensure that stakeholder contact information and correspondence is sent weekly to the City Project Communications Team Contact in order to update their stakeholder database.
- D. Propose, plan, and schedule regular stakeholder updates by email, physical mailers, or in-person or virtual meetings when appropriate. These various communications channels are intended to keep Project stakeholders informed as the Project progresses. The proposed schedule of in-person and/or virtual meetings may be based on time, such as quarterly, and or may track to key Project milestones or community decision points for the Project.

#### **1.15.2.4. Potrero Yard Neighborhood Working Group**

- A. Commencing on the Effective Date, Principal Project Company will take the lead in facilitating, attending and sufficiently funding regular Potrero Yard Neighborhood Working Group meetings and activities during the Term. Prior to the Effective Date, the Potrero Yard Neighborhood Working Group generally met on a monthly basis.

**1.15.3. Project Tours**

- A. From time to time, representatives of public agencies, community-based organizations, elected officials, and others may wish to tour the Project Site. Principal Project Company shall accommodate reasonable requests for Project tours, provided notice of not less than seven Days is provided, bearing in mind both the need for positive community engagement and the safe and timely prosecution of the Work.

# Appendix A

## IT and Communications Scope Allocation

Information technology and communications (together, IT/Comms) requirements are included in Division 3 of the Technical Requirements. City-Furnished IT/Comms is the subject of an Allowance. For avoidance of doubt, the following defines the scope of the IT/Comms systems for the BYC in two groups and provides clarity on the scope allocation between Principal Project Company and the City:

- **Table 5** defines the IT/Comms Infrastructure that Principal Project Company will be responsible for. This IT/Comms Infrastructure is generally defined as the fixed infrastructure in the BYC including IT/Comms rooms and their corresponding HVAC, cabling distribution support hardware (e.g., such as raceways and conduits), power feeds, etc.
- **Table 6** defines the IT/Comms Equipment that the Principal Project Company or the City will be responsible for. This IT/Comms Equipment is generally defined as equipment in the BYC including servers, network switches, LAN/Wifi networking equipment and cabling, displays, etc. This table allocates responsibilities for specific items of the IT/Comms Equipment to the Principal Project Company or the City – items allocated to the City will be furnished, installed, operated, and maintained by the City and subject to the City-Furnished IT/Comms Allowance, unless noted otherwise in Table 5.

The IT/Comms Systems associated with the Common Infrastructure will be designed, procured, and installed, unless noted otherwise, by the Principal Project Company and maintained as part of the IFM Services.

**Table 5: Scope of Work for the Infrastructure Facility’s IT/Comms Infrastructure**

Component of the IT/Comms Infrastructure	Principal Project Company	City	Notes
Facility infrastructure, rooms, pathways, Telecom vaults, and the MEP and Fire Protection systems required to support them	X		Provision and maintenance responsibility of the Principal Project Company.
In-building pathways and distribution	X		Provision and maintenance responsibility of the Principal Project Company. Horizontal cable trays and EMT conduit are acceptable.

EMT = Electrical Metal Tubing

MEP = Mechanical, Electrical, and Plumbing

**Table 6: Scope of Work for the Infrastructure Facility’s IT/Comms Equipment**

Component of the IT/Comms Equipment	Principal Project Company	City-Furnished IT/Comms FF&E	Subject to Allowance	Notes
Incoming Service – Telephone		X		City orders or coordinates installation of telephone service via the Principal Project Company.
Incoming Service – Private Circuits		X		City orders or coordinates installation of private circuits via the Principal Project Company.
Incoming Service – Internet		X		The City provides internet service for Wireless LAN.
Fit-out of IT/Comms Infrastructure spaces	X			Includes racks, pathways, and grounding system.
Active network and switches		X	X	The City will furnish and install the permanent network switches. The Principal Project Company needs to outfit the BYC for the City’s network to be functional, including running cabling for the appropriate data drops to workspaces and offices per the Principal Project Company’s design, and installing appropriate cable trays and conduit to properly route and support the cabling.
Fit-out of Security Office	X			Includes furniture and connectivity – see <u>Division 3 (Design Criteria Document)</u> of the Technical Requirements. The City provides the needed technology. Principal Project Company will provide the FF&E similar to a Class A office.
PC’s, displays, RTLS, and other equipment		X	X	City procures, installs, maintains, and manages any equipment that the City needs in the BYC.
Backbone cabling (fiber, multipair copper, and coax)	X			Provision and installation responsibility of the Principal Project Company.
Horizontal/distribution cabling (in-building and on-site)	X			Provision and installation responsibility of the Principal Project Company.
Tel/data terminations, patch panels, and outlets	X			Provision and installation responsibility of the Principal Project Company.

Component of the IT/Comms Equipment	Principal Project Company	City-Furnished IT/Comms FF&E	Subject to Allowance	Notes
Digital signage	X			Provision and installation is the responsibility of the Principal Project Company. Digital signage is not specifically required by <u>Division 3 (Design Criteria Document)</u> of the Technical Requirements. If Principal Project Company recommends digital signage, the Principal Project Company will be responsible for its provision and installation and this will not constitute a Change.
Component of the IT/Comms Equipment	Principal Project Company	City-Furnished IT/Comms FF&E		Notes
Master clock system and display clocks	X			Provision and installation is the responsibility of the Principal Project Company. City will provide content for master clock. A master clock system is not specifically required by <u>Division 3 (Design Criteria Document)</u> of the Technical Requirements. If during design the LD or Principal Project Company recommends a master clock system, the Principal Project Company will be responsible for its provision and maintenance. The City will review content and performance
Distributed antenna system for cellular/private mobile radios	X			Provision and maintenance responsibility of the Principal Project Company. The City prefers a neutral host.
Wireless LAN (-65 dB on 95% of site 99.9% availability)	X	X	X (for WAP devices only)	The Principal Project Company shall install conduit and Ethernet cabling to each of the wireless access points (WAPs). The City will provide the WAP devices, and Principal Project Company shall install WAP devices. The Principal Project Company shall propose the locations of the WAP devices, subject to City approval, prior to Principal Project Company's installation of WAP devices. The Principal Project Company will be responsible for proposing locations and installing the hardware. The Principal Project Company is expected to design based on predictive analysis and will run appropriate network cabling. The City will be responsible for

Component of the IT/Comms Equipment	Principal Project Company	City-Furnished IT/Comms FF&E	Subject to Allowance	Notes
				configuring the hardware, perform surveys, and create heat maps after the WAP installation.
Office automation systems (email, file servers, etc.)		X		City provides, operates, and maintains.
Geographical Information Systems		X		City provides, operates, and maintains.
CCTV cameras	X			Provision, installation, and maintenance responsibility of the Principal Project Company.
Other IT/Comms Equipment		X	X	City provides, installs, operates, and maintains.

dB = decibels

LAN = local area network

FF&E = furniture, fixtures, and equipment

WAP = wireless access points

Potrero Yard - Technical Requirements

Exhibit 18, Division 03 - Initial List of Submittals

Date of update:		15-Nov-24			
ID Number	Section Reference	Contract Data Item Title / Description	Required Submission Timing	City Submittal Action	Notes/Comments
001	4.1.1 Slab on Grade	Design and locate joints to control and direct shrinkage cracking of concrete elements per ACI recommendations. Submit a Joint Plan.	60 days prior to placing exposed slabs and walls.	Review/Comment	
002	4.3 Exterior Enclosures	Project aesthetics package	include in 50% Design Development (50% DD) Proprietary Design Review Deliverable	Approval	
003	4.3.4 Exterior Masonry	Material sample(s), mock-ups, shop drawings, anchorage, and reinforcing materials.	include in 50% Design Development (50% DD) Proprietary Design Review Deliverable	Approval	
004	4.3.6 Precast Architectural Concrete	Product data and samples, mock up, and shop drawings.	include in 50% Design Development (50% DD) Proprietary Design Review Deliverable	Approval	
005	4.3.12 Glazing	12-inch by 12-inch samples for each glass type with fabricator product information.	include in 50% Design Development (50% DD) Proprietary Design Review Deliverable	Approval	
006	4.3.31 Expansion Control	Submit movement control diagrams addressing full structure. Submit calculations and rationale for joint locations, types and sizes. Expansion control elements shall match or be of a compatible color with the adjacent materials.	include in each Proprietary Design Review Deliverable, see Div 01, Section 1.8.5	Approval	
007	4.4 Interior Construction	Submit for approval by the SFTMA product data, certificates and test reports verifying materials selected conform to performance standards listed in this document.	include in each Proprietary Design Review Deliverable, see Div 01, Section 1.8.5	Approval	
008	4.5.5 Expansion Control	Submit movement control diagrams addressing full structure. Submit calculations and rationale for joint locations, types and sizes. Expansion control elements shall match or be of a compatible color with the adjacent materials.	include in each Proprietary Design Review Deliverable, see Div 01, Section 1.8.5	Approval	
009	4.8 Conveying - Elevators	The PPC shall submit 3-inch by 12-inch samples of actual finished material for review of color, pattern, and texture of exposed finishes.	include in 50% Design Development (50% DD) Proprietary Design Review Deliverable	Approval	
010	4.10 HVAC	Submit ventilation plan demonstrating compliance with this article before submitting it to the San Francisco Department of Public Health for review and approval prior to submitting mechanical drawings for approval.	include in each Proprietary Design Review Deliverable, see Div 01, Section 1.8.5	Approval	
011	4.13 Electrical	Submit the following calculations and analyses, sealed by a Registered Professional Engineer: Demand load as calculated per requirements of NFPA 70 Article 220. Lighting Photometrics: Submit point-by-point calculations for 100 percent of the site and each unique room type in the buPPCings. Submit separate calculations proving compliance with NFPA 101 for emergency/egress lighting. Emergency generator – provide calculations proving the capability of the proposed generator to serve the required emergency loads plus 25 percent spare capacity. The analysis shall assume the spare capacity load to be constant kVA load. Analysis shall include starting of motor loads as sequenced by the BAS. Calculations shall assume generator operation with diesel fuel source. A diesel-fueled engine generator set shall provide power for the emergency/standby system loads. Short circuit – provide calculated momentary (0.5 cycle) fault current values for all 15 kV and 480V busses, and 208/240V panels served from 75 kVA or larger transformers. Arc flash (hazard analysis, arc flash boundary, incident energy) – provide calculation results for all busses 150V (AC and DC) and greater. Voltage drop – provide calculations for the main buPPCing services, feeders longer than 50-feet, all site lighting branch circuits, and all branch circuits longer than 75-feet or loaded greater than 50 percent of the circuit rating. Protective device coordination – provide time-current curve (TCC) plots showing proper coordination of all panel main breakers with upline devices, coordination of switchboard feeder breakers with main breakers and coordination of switchboard main breakers with 15 kV feeder relaying. Fire Alarm – provide battery capacity calculations proving compliance with NFPA 72. UPS – provide battery capacity calculations.	include in each Proprietary Design Review Deliverable, see Div 01, Section 1.8.5	Approval	
012	4.13.1 Building Power Distribution	The PPC shall submit calculations which support the required size of the UPS and batteries. The UPS input shall be fed from the generator or the secondary utility feed for continued operation following the rated load period of 90 minutes. A diesel-fueled engine generator set shall provide power for the emergency/standby system loads.	include in each Proprietary Design Review Deliverable, see Div 01, Section 1.8.5	Approval	
013	4.13.9 Closed Circuit Television System (CCTV)	Camera views will be selected based on their function, location, and resolution. The PPC shall submit the CCTV design site plan that shows camera locations, coverage, camera function and the camera model for each location. Submittal shall also include required views generated from the project 3D model from each camera location.	include in each Proprietary Design Review Deliverable, see Div 01, Section 1.8.5	Approval	
014	4.13.9 IT Equipment Procurement	The PPC shall submit the CCTV design site plan that shows camera locations, coverage, camera function and the camera model for each location. Submittal shall also include required views generated from the project 3D model from each camera location.	include in each Proprietary Design Review Deliverable, see Div 01, Section 1.8.5	Approval

**Potrero Yard - Technical Requirements**  
**Exhibit 18, Division 06 - Initial List of Submittals**

Date of update:		15-Nov-24			
ID Number	Section Reference	Contract Data Item Title / Description	Required Submission	Submittal Action (Proprietary)	Comments/Notes
001	6.6.2.1	Pre-Construction Requirements - Commissioning Plan	Principal Project Company shall prepare and submit to the City for its review and approval no later than NTP2 a Commissioning Plan to evaluate and document that the design, construction, and operation of the Commissioned Systems comply with the Contract Documents.	Approval	
002	6.6.2.2	Pre-Construction Requirements - Review of Design Documentation	In addition to the Commissioning Issues and Resolution Log, for each round of design review, the CxP shall prepare and submit to Principal Project Company a design review memorandum addressing: <ul style="list-style-type: none"> <li>•List of the documents reviewed;</li> <li>•Laws, standards, and guidelines used to perform the review; and</li> <li>•A summary of the review flagging and describing major issues discovered.</li> </ul> The CxP shall submit the design review memorandum and Commissioning Issues and Resolution Log to Principal Project Company, no more than two weeks after the Design Deliverables are submitted for City review. Principal Project Company shall review the comments and respond to each item with acceptance or a response to the comment. All the comments shall be settled by Principal Project Company, D&C Contractor, and CxP. A workshop(s) between the D&C Contractor, Principal Project Company and/or CxP may be held to discuss any comments requiring clarification or discussions or decision by Principal Project Company. The CxP can chair these workshop(s). Any CxP reviews of design documentation prior to NTP 2 may take place before or during the preparation of the Commissioning Plan.	Information	
003	6.6.3.2	Submittals Review	During construction the CxP shall review the Submittals stated in the Commissioning Plan as well as any construction Submittals generated by the D&C Contractor related to Commissioned Systems to verify compliance with the Contract Documents. The CxP shall enter all Commissioning Submittal reviews in the Commissioning Issues and Resolution Log. At a frequency determined by the Commissioning Plan, the CxP shall prepare and submit to Principal Project Company a Submittal review memorandum addressing: <ul style="list-style-type: none"> <li>•List of the documents reviewed;</li> <li>•Codes, standards and guidelines used to perform the review; and</li> <li>•A summary of the review flagging and describing major issues discovered.</li> </ul> The CxP shall notify Principal Project Company of any reviewed submittals that the CxP deems not to meet the requirements of the Contract Documents.	Information	
004	6.6.3.7	Commissioning Report	Principal Project Company shall submit the Commissioning Report to the City for review and approval before Substantial Completion can be achieved.	Approval	
005	6.6.4.1	System Manual	By its nature, the Systems Manual will be a collection of materials already produced by Principal Project Company, the D&C Contractor, or the CxP. Principal Project Company shall submit the Systems Manual to the City for review and acceptance no later than 180 days after Substantial Completion.	Review/Accept	
006	6.6.4.3	Near Warranty End Post Occupancy Review	The PPC shall, one (1) year after the Substantial Completion date, provide written documentation to the City describing what was learned through interviews and investigations into performance of SFMTA O&M Facilities and certain Equipment List items, how issues will be resolved through warranties or other means, and develop a final deficiency and action list. This documentation shall include requests for services to remedy outstanding problems. Principal Project Company shall provide the written documentation to the City for information.	Information	
007	6.6.4.4	On-going Commissioning Plan	For purposes of complying with LEED Enhanced Commissioning and building envelope Commissioning requirements, the CxP shall produce and submit to Principal Project Company an Ongoing Commissioning Plan no later than one year after the Substantial Completion Date. The plan shall provide the Infrastructure Facility operating staff with procedures, blank test scripts, and a schedule for ongoing Commissioning activities.	Information	
008	6.7	Monitoring-Based Commissioning (MBCx)	After MBCx activities are complete, the CxP shall update the Systems Manual with any modifications or new settings and give the reason for any modifications from the original design. Principal Project Company shall submit any revised Systems Manual to the City and the IFM Provider.	Information	
009	6.8	Operational Readiness (OR)	Principal Project Company shall prepare the Operational Readiness Plan and submit it to the City for review and approval no later than 180 days prior to the scheduled Substantial Completion Date. Principal Project Company shall amend and reissue the plan if changes are required. All activities in the Operational Readiness Plan shall be either: (1) completed no later than the Substantial Completion Date; or (2) completed after the Substantial Completion Date as part of the Bedding-In Period activities.	Approval

037	Div. 10 - Sec. 013543	1.4.B.9.a	ENVIRONMENTAL PROCEDURES - Submittals	A sign with the telephone number and a City person to contact regarding dust complaints and the BAAQMD's phone number (see Article 3.03 of this section)	Review/Comment	
038	Div. 10 - Sec. 013543	1.4.B.9.b	ENVIRONMENTAL PROCEDURES - Submittals	Legible and visible posted signs, in English, Spanish, and Chinese, in designated queuing areas and at the construction site to remind operators of the engine-idling limit (see Article 3.06 of this section)	Review/Comment	
039	Div. 10 - Sec. 013543	1.4.B.9.c	ENVIRONMENTAL PROCEDURES - Submittals	Signs on-site pertaining to permitted construction days and hours and noise complaint procedures and who to notify in the event of a problem, with telephone numbers listed (see Article 3.07 of this section)	Review/Comment	
040	Div. 10 - Sec. 013543	1.4.B.9.d	ENVIRONMENTAL PROCEDURES - Submittals	A legible and visible sign summarizing the Construction Emissions Minimization Plan (see Article 3.06 of this section)	Review/Comment	
041	Div. 10 - Sec. 013543	1.4.B.10	ENVIRONMENTAL PROCEDURES - Submittals	Photographic documentation of temporary fence Type ESA at the entire perimeter of ESA – Biology as shown on the Design Documents (see Article 3.11 and 3.14 of this section).	Review/Comment	
042	Div. 10 - Sec. 013543	1.4.C.1	ENVIRONMENTAL PROCEDURES - Submittals	A final construction emissions minimization plan (CEMP) report summarizing construction activities including the start and end dates and duration of each construction phase, and the specific information required in the CEMP (see Article 3.06 of this section)	Review/Comment	after completion of construction activities
043		3.3.C.2	ENVIRONMENTAL PROCEDURES - Dust Control BMPs	Principal Project Company shall submit a completed application and pay the associated fees to the SFDPH. Principal Project Company may not commence Construction Work, demolition, excavation, grading, foundation work, or other permitted activities until Principal Project Company has submitted to the City's Authorize Representative City and City Planning Department a copy of SFDPH director's written approval of the DCP, the plan provisions have been implemented, and the City has subsequently given Principal Project Company permission to proceed.		see DCP in Appendix A of the SMP approved by SFDPH Oct 10, 2024
044	Div. 10 - Sec. 013543	3.7.B.3	ENVIRONMENTAL PROCEDURES - Construction Noise Control Best Management Practices	Post a sign onsite describing noise complaint procedures and a complaint hotline number that shall always be answered during construction, and provide to City and City Planning Department photographic documentation that the signage has been posted.	Information	submittal is photographic evidence of signage being posted
045	Div. 10 - Sec. 013543	3.7.D.3	ENVIRONMENTAL PROCEDURES - Construction Noise Control Best Management Practices	If directed by the City Planning Department, Principal Project Company must revise the Project-specific construction noise control plan and resubmit for City Planning Department review and approval. Principal Project Company's proposed revisions to the construction noise control plan must be prepared by a qualified acoustical engineer and demonstrate to the City Planning Department what alternative measures to reduce the impacts of construction noise to the extent feasible. The revised construction noise control plan must be approved by the City Planning Department and Principal Project Company shall enact all of its provisions before Project Principal Company commences Construction Work that may exceed the standards or omit the controls required above.	Review/Comment	pertains to resubmittal if, before construction mobilization, PPC determines that these standards and/or one or more of these controls cannot be applied
046	Div. 10 - Sec. 013543	3.7.H.1	ENVIRONMENTAL PROCEDURES - Construction Noise Control Best Management Practices	When directed by the City Planning Department, Principal Project Company shall submit revisions to the approved construction noise-control plan for review and written approval if, in the sole determination of the City Planning Department, modified noise control minimization measures are not effective. In the event that revisions to the construction noise-control plan are required, Principal Project Company shall cease the use of equipment that is responsible for exceedances. Principal Project Company may resume the use of such equipment after the revised construction noise-control plan is approved and all its provisions are enacted.	Review/Comment	pertains to resubmittal if City determines in sole discretion, revisions to the noise control plan are necessary due to recorded excessive noise levels or repeated complaints.
047	Div. 10 - Sec. 013543	3.8.D	ENVIRONMENTAL PROCEDURES - Naturally Occurring Asbestos (NOA)	Before work in areas of NOA shown in the Design Documents which intersect with areas of roadway construction and maintenance which require the disturbance of soils by construction and grading, Principal Project Company shall submit the Bay Area Air Quality Management District's (BAAQMD) "Notification Form for Road Construction and Maintenance Operations" to BAAQMD fourteen business days in advance of land disturbance of soils containing NOA.	Information	Informational for City as submittal is to BAAQMD
048	Div. 10 - Sec. 013543	3.8.E.1.a	ENVIRONMENTAL PROCEDURES - Naturally Occurring Asbestos (NOA)	If NOA is unexpectedly encountered after the Project has started, Principal Project Company shall submit a notification to the BAAQMD no later than the next business day using the Asbestos Dust Mitigation Plan (ADMP) Discovery Notification Form found at the link below: <a href="https://www.baaqmd.gov/-/media/Files/Compliance%20and%20Enforcement/Asbestos/admp_discovery_application.ashx?la=en">https://www.baaqmd.gov/-/media/Files/Compliance%20and%20Enforcement/Asbestos/admp_discovery_application.ashx?la=en</a> , and followed by email to the BAAQMD, and at the same time notify City with the project details.	Information	Informational for City as notification is to BAAQMD
049	Div. 10 - Sec. 013543	3.9.A.1	ENVIRONMENTAL PROCEDURES - Asbestos Dust Mitigation	Sixty days (60) days before commencement of grading, and excavation activities, Principal Project Company shall submit to the City an Asbestos Dust Mitigation Plan (ADMP) for review.	Review/Comment	

**Potrero Yard - Technical Requirements  
Exhibit 18, Division 10 - Initial List of Submittals**

Date of update:		15-Nov-24				
ID Number	Division and Section Reference	Subsection Reference	Contract Data Item Title / Description	Required Submission	Submittal Action (Proprietary)	Notes/Comments
050	Div. 10 - Sec. 013543	3.9.A.2	ENVIRONMENTAL PROCEDURES - Asbestos Dust Mitigation	Upon City's written approval, Principal Project Company shall submit the ADMP, the ADMP application, and the BAAQMD Regulation 3 Fees to the (Air Pollution Control Officer (APCO) for its review and approval. Principal Project Company shall furnish all information required by the BAAQMD to amend and finalize the ADMP. Principal Project Company shall not be reimbursed for the BAAQMD Regulation 3 Fees.	Review/Comment	APCO not spelled out in TRs
051	Div. 10 - Sec. 013543	3.9.A.5	ENVIRONMENTAL PROCEDURES - Asbestos Dust Mitigation	Principal Project Company, at no cost to the City, will perform perimeter air monitoring for asbestos at the project site during its soil disturbance activities for the duration of the project. This will be in accordance with the approved ADMP. All record keeping and reporting will be submitted to the BAAQMD on a weekly basis or as per a reporting schedule requested by BAAQMD.	Information	Informational for City as notification is to BAAQMD
052	Div. 10 - Sec. 013543	3.15.F.1	ENVIRONMENTAL PROCEDURES - Site Restoration	With regards to seeding for purposes of restoring the site, mixing shall be performed in the presence of Principal Project Company's QC Manager and City. Principal Project Company shall submit bags of materials used in the mix to City.	Review/Comment	
053	Div. 10 - Sec. 013543	3.18.A	ENVIRONMENTAL PROCEDURES - ARCHAEOLOGICAL RESOURCE PROTECTION	Prior to issuance of construction permits, Principal Project Company shall have an Archeological Monitoring Plan reviewed and approved by City Planning Department. Principal Project Company shall ensure compliance with the approved Archeological Monitoring Plan which shall govern for the associated construction activities as stated in the approved plan.	Information	Informational for City as approval is City Planning Department
054		3.18.A.1	ENVIRONMENTAL PROCEDURES - ARCHAEOLOGICAL RESOURCE PROTECTION	Following the distribution of the "ALERT" sheet, Principal Project Company shall provide City with a signed affidavit confirming that all field personnel have received copies of the "ALERT" sheet.	Review/Comment	
055	Div. 10 - Sec. 013543	3.20.C	ENVIRONMENTAL PROCEDURES - San Francisco Environment Code Clean Construction Requirements for Work in an Air PollutantExposure Zone (APEZ)	Principal Project Company shall submit a Construction Emissions Minimization Plan (CEMP) to the City Planning Department for review and written approval for compliance with Chapter 25 of the San Francisco Environment Code.	Information	redundant with 1.4.A.1.g above
056	Div. 10 - Sec. 013543	3.20.D	ENVIRONMENTAL PROCEDURES - San Francisco Environment Code Clean Construction Requirements for Work in an Air PollutantExposure Zone (APEZ)	Principal Project Company must submit a signed Clean Construction Emissions Plan Certification Statement to the City Planning Department. Refer to the following link for the Emissions Plan Certification Statement Template: <a href="https://www.sfdph.org/dph/EH/Air/CleanConstruction.asp">https://www.sfdph.org/dph/EH/Air/CleanConstruction.asp</a> .	Information	submittal part of CEMP process
057	Div. 10 - Sec. 013543	3.20.H	ENVIRONMENTAL PROCEDURES - San Francisco Environment Code Clean Construction Requirements for Work in an Air PollutantExposure Zone (APEZ)	Principal Project Company shall submit quarterly and biannual reports to the City Planning Department documenting compliance with the CEMP, and submit each report within seven business days of the end of each quarter.	Information	
058	Div. 10 - Sec. 013543	3.20.I	ENVIRONMENTAL PROCEDURES - San Francisco Environment Code Clean Construction Requirements for Work in an Air PollutantExposure Zone (APEZ)	Principal Project Company shall submit a final CEMP report within four weeks of achieving Substantial Completion summarizing compliance of construction activities with the CEMP, including the start and end dates and duration of each Construction Phase	Information	
059	Div. 10 - Sec. 013543	3.21.B	ENVIRONMENTAL PROCEDURES - CONSTRUCTION SITE RUNOFF CONTROL PERMIT	Principal Project Company shall submit the Construction Site Runoff Control Permit Application within (30) thirty calendar days after NTP 2 for review and approval by the City.	Review/Comment	
060	Div. 10 - Sec. 013543	3.21.D	ENVIRONMENTAL PROCEDURES - CONSTRUCTION SITE RUNOFF CONTROL PERMIT	Principal Project Company shall provide the SFPUC with a transmittal, with a copy to the City Planning Department, at least two working days before each these milestones to inform the SFPUC inspector that the following are about to occur: 1. Commencement of Construction Work. 2. Erosion and sediment control measures are completely installed and stabilized. 3. Final grading has been completed. 4. Substantial Completion.	Information	Informational for City as notification is to SFPUC
061	Div. 10 - Sec. 013543	3.24.A.3	EMERGENCY OR BACKUP DIESEL GENERATOR HEALTH RISK REDUCTION PLAN	The Principal Project Company shall submit the plan to City Planning Department for review and approval prior to issuance of a permit for emergency diesel generators from the San Francisco Department of Building Inspection or the Bay Area Air Quality Management District.	Information	Informational for City as notification is to SF Building Inspection or BAAQMD
062	Div. 10 - Sec. 013543	3.25.A	FIXED MECHANICAL EQUIPMENT NOISE CONTROL FOR BUILDING OPERATIONS	Prior to approval of a building permit, the Principal Project Company shall submit documentation to City Planning Department, demonstrating with reasonable certainty that the building's fixed mechanical equipment (such as heating, ventilation and air conditioning [HVAC] equipment).	Information	Informational for City as notification is to City Planning Dept. There are 9 measures follow this statement in the TRs
063	Div. 10 - Sec. 013543	Appendix B	COMPLETE ENVIRONMENTAL MITIGATION AND MONITORING PLAN	See all submittals contained therein.	Information	Principal Project Company is responsible for all submittal requirements in Division 10 Section 01 35 43 Appendix B: COMPLETE ENVIRONMENTAL MITIGATION AND MONITORING PLAN.

**Potrero Yard - Technical Requirements

Date of update:		15-Nov-24				
ID Number	Division and Section Reference	Subsection Reference	Contract Data Item Title / Description	Required Submission	Submittal Action (Proprietary)	Notes/Comments
064	Div. 10 - Sec. 013544	1.1.E	HAZARDOUS BUILDING MATERIALS - Summary - Environmental	Principal Project Company shall submit to City as Regulator certifications or proof of the trainings, listed below, as a Submittal as per Section 02 80 13 Hazardous Building Materials Remediation. 1. Health and Safety training 2. HAZWOPER training 3. Cal/OSHA Competent Person training for the field supervisor overseeing activities that disturb asbestos, or naturally occurring asbestos (NOA) as per Title 8 CCR 1529. 4. Cal/OSHA asbestos training (for all trades who will come in contact and disturb asbestos or NOA. 5. Lead training (for all trades that will come in contact and disturb lead containing paints as per Cal/OSHA 1532.1 Lead in Construction standard) 6. Medical examination and blood tests (as warranted) 7. Respiratory protection (including current respirator fit test records) 8. Storm water pollution prevention awareness training to enable the Principal Project Company's personnel to comply with the Erosion and Sediment Control Plan. 9. Other training pertaining to the Work being conducted.	Information	
065	Div. 10 - Sec. 013544	1.4.A.1	HAZARDOUS BUILDING MATERIALS - Abatement Contractor's Qualifications	Principal Project Company shall ensure that any entity that performs the abatement Work submits to the City as Regulator current licenses and certifications for the specific type of abatement Work to be performed. Submits to the City as Regulator a letter confirming compliance with current Laws, as outlined in the specifications listed in the paragraph below.	Information	
066	Div. 10 - Sec. 013544	1.4.A.2	HAZARDOUS BUILDING MATERIALS - Abatement Contractor's Qualifications	Principal Project Company shall ensure that any entity that performs the abatement Work submits to City as Regulator copies of any notices regarding safety and environmental violations received from regulatory agencies in the last 20 years.	Information	
067	Div. 10 - Sec. 013544	1.4.B.1	HAZARDOUS BUILDING MATERIALS - Hazardous Material Management Plan (HMMP)	Before commencing any abatement Work, Principal Project Company shall submit to the City's Authorized Representative and City as Regulator a Hazardous Materials Management Plan (HMMP) in accordance to the requirements of this Section, and Section 02 80 13 Building Related Hazardous Materials Remediation.	Review/Comment	See 02 80 13 for additional Hazardous Materials and Hazardous Waste requirements.
068	Div. 10 - Sec. 013544	1.8.A	HAZARDOUS BUILDING MATERIALS - Waste Handling and Characterization	The Contractor shall submit to the City as Regulator a Waste Management Plan (WMP) as specified under Section 02 80 13 Building Related Hazardous Materials Remediation.	Information	
069	Div. 10 - Sec. 013544	1.8.D	HAZARDOUS BUILDING MATERIALS - Waste Handling and Characterization	Principal Project Company shall obtain and pay for all sampling and profiling analyses required for waste disposal. Principal Project Company shall ensure that California CDPH-accredited laboratories perform analyses. Principal Project Company shall submit results of such analyses to the City as Regulator prior to scheduling the waste off haul.	Information	
070	Div. 10 - Sec. 013544	1.8.P	HAZARDOUS BUILDING MATERIALS - Asbestos Waste Disposal	1.d. Principal Project Company shall provide, prepare and submit to the City's Authorized Representative and SAR group within City Public Works Department a Uniform Hazardous Waste Manifest Form for asbestos Hazardous Waste shipments.	Information	
071	Div. 10 - Sec. 013544	1.9.B	HAZARDOUS BUILDING MATERIALS - Non-hazardous manifest form	Principal Project Company shall submit each non-hazardous waste manifest form to the SAR group within City Public Works Department for the generator's signature at least 72 hours in advance of the day of the off-haul with an estimate of the number of loads scheduled for off-haul.	Information	
072	Div. 10 - Sec. 013544	1.9.D	HAZARDOUS BUILDING MATERIALS - Non-hazardous manifest form	Within 30 days of the off haul, Principal Project Company shall submit to the City's Authorized Representative and SAR group within City Public Works Department with copies of each completed non-hazardous waste manifest Form (with the landfills signature).	Information	
073	Div. 10 - Sec. 013545	1.3.A	HEALTH AND SAFETY CRITERIA - Submittals	Principal Project Company shall submit to the City the following Submittals no later than ten Days before start of Work at the Project Site or NTP2, whichever is earlier. 1. Site-specific Health and Safety Plan (HASP) prepared, signed and stamped by a Certified Industrial Hygienist (CIH) prepared in accordance with the requirements contained in this Section 01 35 45, CFR Title 29, CCR Title 8 and other applicable regulations, which shall cover all aspects and scope of Work. 2. Principal Project Company's Injury and Illness Prevention Programs (IIPP) and Code of Safe Practices (CSP), in accordance with the requirements contained in this Section 01 35 45 and the California Code of Regulations (CCR), Title 8. 3. Templates for all safety forms and reports 4. Completed Activity Hazard Analysis (AHA) or Job Hazard Analysis (JHA) submitted with the HASP using the AHA/JHA template for all significant activities and tasks with a highrisk potential, describing the job steps, hazards associated with each job step, and the controls used to remove or minimize the associated hazards 5. SDS (Safety Data Sheet) for all chemicals and other hazardous materials used in the Work. 6. If Serpentine is present Principal Project Company shall have Cal/OSHA 40-hour asbestos training for the competent person overseeing Serpentine/ Naturally Occurring Asbestos (NOA) disturbance activities and managing personal air monitoring for asbestos.	Information	
074	Div. 10 - Sec. 013545	1.3.B	HEALTH AND SAFETY CRITERIA - Experience Statement	Principal Project Company shall submit to the City no later than 10 days prior to the start of construction Work the qualifications and experience of the it's Project Safety Representative (PSR) as specified in this Section 01 35 45 - Health and Safety Criteria.	Review/Comment	
075	Div. 10 - Sec. 013545	1.5.H	HEALTH AND SAFETY CRITERIA - Health and Safety Plan	Furnish copies of all records of all health and safety audits, inspections, and reviews [48 hours after the audit, inspection or review.]	Information	
076	Div. 10 - Sec. 013545	1.13.E	HEALTH AND SAFETY CRITERIA - Personal Protective Equipment (PPE)	Where "Hot Work" is involved, a Hot Work permit must be submitted to the City as Regulator prior to commencing that Work.	Information	
077	Div. 10 - Sec. 013545	1.19.B	HEALTH AND SAFETY CRITERIA - Logs, Reports, and Recordkeeping	Principal Project Company shall submit Monthly project safety statistics, which shall include Project safety inspections, hours worked by Principal Project Company, OSHA Recordable Incidents, Incident Rates, Lost Work Day Cases, Total Project Lost Work Days, Days Away from Work Rate, First Aid Cases, and Property Damage Incidents, to City as part of the Monthly Progress Status Report.	Information	

**Potrero Yard - Technical Requirements  
Exhibit 18, Division 10 - Initial List of Submittals**

Date of update:		15-Nov-24				
ID Number	Division and Section Reference	Subsection Reference	Contract Data Item Title / Description	Required Submission	Submittal Action (Proprietary)	Notes/Comments
078	Div. 10 - Sec. 013545	1.21.F	HEALTH AND SAFETY CRITERIA - Incident Reporting	Principal Project Company shall submit to the City a Preliminary Incident/Near Miss Investigation Report (PIR) within 24 hours of the incident or near miss. Principal Project Company shall submit a Final Incident/Near Miss Investigation Report (FIR) as soon as possible (generally within 48 hours) after incident or near miss. Principal Project Company shall not perform Work in the area or of a type that poses risks similar to those of the incident or near miss until a Corrective Action Report (CAR) is complete and submitted to the City.	Information	Applies if/when an incident and near miss incident ("near miss") occurs
079	Div. 10 - Sec. 013545	1.23.B	HEALTH AND SAFETY CRITERIA - Project Safety Representative	If the City observes an unsafe Project Site condition or unsafe means or methods of performing Work, the City will inform Principal Project Company's Construction Manager or PSR, who shall take whatever actions Principal Project Company deems necessary to immediately remedy the unsafe Project Site condition or unsafe work practice, or unsafe means or methods in which the Work is performed. Principal Project Company shall within 24 hours of taking such remedial action submit a report to the [City's Authorized Representative] describing the unsafe Project Site condition or work practice, and how Principal Project Company remedied that unsafe condition, unsafe work practice, or unsafe means and methods of performing the Work.	Information	NTD: [City's Authorized Representative] says Engineer in drafting currently. Needs correction.
080	Div. 10 - Sec. 013550	2.1.A	ADDITIONAL ENVIRONMENTAL PROCEDURES - Documentation of Historical Resource	Principal Project Company shall submit to the City Planning Department for approval the scope of the documentation which shall include the following elements: 1. Measured Drawings 2. HABS/HALS-Level Photographs: 3. HABS/HALS Historical Report 4. Video Recordation 5. Softcover Book	Information	Informational cit City as review role is City Planning Dept. Each measure 1-5 has detailed requirements in TRs
081	Div. 10 - Sec. 013550	2.2.A	ADDITIONAL ENVIRONMENTAL PROCEDURES - Salvage Plan	Prior to any demolition that would remove character-defining features, Principal Project Company shall consult with the Planning Department as to whether any character-defining features that are proposed to be demolished may be salvaged, in whole or in part, during demolition.	Information	If required by City Planning Department. See 02 41 16 for Demolition Plan requirements.
082	Div. 10 - Sec. 013550	2.3.A	ADDITIONAL ENVIRONMENTAL PROCEDURES - Interpretation of the Historical Resource	Principal Project Company shall submit to the City Planning Department for approval an interpretive program plan prepared by a qualified consultant.	Information	
083	Div. 10 - Sec. 013550	2.4.A	ADDITIONAL ENVIRONMENTAL PROCEDURES - Oral Histories	Principal Project Company shall undertake an oral history project on the resource, undertaken by a professional historian in conformance with the Oral History Association's Principles and Best Practices ( <a href="https://www.oralhistory.org/principles-and-bestpractices-revised-2018/">https://www.oralhistory.org/principles-and-bestpractices-revised-2018/</a> ), and shall submit the completed oral history project to the San Francisco Public Library, Planning Department, and other interested historical institutions. The oral history project shall also be incorporated into the interpretive program (see Article 1.6).	Information	NTD: Article 1.6 reference is not correct.
084	Div. 10 - Sec. 013550	2.6.A	ADDITIONAL ENVIRONMENTAL PROCEDURES - Construction Management Plan	Principal Project Company shall submit to the City Planning Department the Construction Management Plan that shall include additional measures to further minimize disruptions to people walking and bicycling, transit, and emergency vehicles during construction. Additional measures include: 1. encourage carpooling, bicycle, walk, and transit access to the Project Site by construction workers 2. provide nearby residences and adjacent businesses with regularly updated information regarding project construction, including email notices distributed by PPC	Information	This CMP should be the same CMP as required by Division 1, but meeting the requirements in this Section for purposes of City Planning Department review
085	Div. 10 - Sec. 013550	2.7.A	ADDITIONAL ENVIRONMENTAL PROCEDURES - Driveway and Loading Operations Plan (DLOP)	Principal Project Company to submit a Driveway and Loading Operations Plan (DLOP) to the City Planning Department for approval. The intent of the DLOP is to reduce potential conflicts between passenger and freight loading and transit operations, and between passenger and freight loading activities and people walking and bicycling, and other vehicles in the project vicinity, as well as to maximize reliance on onsite facilities to accommodate freight loading demand.	Information	
086	Div. 10 - Sec. 013550	2.8.A	ADDITIONAL ENVIRONMENTAL PROCEDURES - Preconstruction Paleontological Evaluation and Monitoring Plan During Construction	Principal Project Company shall submit the Preconstruction Paleontological Monitoring Plan to the City Planning Department for approval.	Information	See 01 35 50, Section 3.2.A requirements
087	Div. 10 - Sec. 013550	3.2.A	ADDITIONAL ENVIRONMENTAL PROCEDURES - Paleontological Monitoring During Construction	Principal Project Company shall submit a final monitoring report and any data recovery report to the City Planning Department for approval prior to the certificate of occupancy.	Information	
088	Div. 10 - Sec. 013550	3.3.C&F-I	ADDITIONAL ENVIRONMENTAL PROCEDURES - Inadvertent Discovery of Paleontological Resources	C. Principal Project Company shall submit a Paleontological Resources worker awareness training form/affidavit to the City Planning Department within five (5) business days of conducting the training. F. If the qualified paleontologist determines that the discovery is not scientifically important, the qualified paleontologist shall document this conclusion in a Paleontological Evaluation Letter to demonstrate compliance with applicable statutory requirements (e.g., Federal Antiquities Act of 1906, CEQA Guidelines Section 15064.5, California Public Resources Code Chapter 17, Section 5097.5, Paleontological Resources Preservation Act 2009). Principal Project Company shall submit the Paleontological Evaluation Letter to the City Planning Department for review within 30 calendar days of the discovery. G. If the qualified paleontologist determines that the discovery is of scientific importance, and there are no feasible measures to avoid disturbing this paleontological resource, the qualified paleontologist shall prepare and submit to the City Planning Department for approval a Paleontological Mitigation Program. H. If a Paleontological Mitigation Program is required, Principal Project Company shall prepare and submit a Paleontological Resources Report to the City Planning Department for review within 30 calendar days from consultation of the ground disturbing activities, or as negotiated with the City Planning Department. I. The paleontology report shall be submitted to City Planning Department for review within 30 business days from conclusion of ground disturbing activities, or as negotiated following consultation with City Planning Department.	Information	Applies only in the event of the discovery of an unanticipated paleontological resource during construction.
089	Div. 10 - Sec. 015000	1.13.D	TEMPORARY FACILITIES AND CONTROLS - Sign	Principal Project Company shall submit a mock-up of the Project sign in color, on bond paper, 11x17 size, to the City for approval prior to fabrication.	Information

090	Div. 10 - Sec. 017450	1.4.G	MATERIAL REDUCTION AND RECOVERY PLAN - Demolition Debris Recovery Plan (DDRP)	Principal Project Company conducting full demolition of an existing structure must submit a Demolition Debris Recovery Plan (DDRP) to the San Francisco Environment Department (SFED). The DDRP must be submitted to and approved by SFE before the Department of Building Inspection will issue a Full Demolition Permit.	Information	
091	Div. 10 - Sec. 017450	1.5	MATERIAL REDUCTION AND RECOVERY PLAN - Material Reduction and Recovery Plan (MRRP)	Develop and submit a project specific MRRP for the Project through the Green Halo waste tracking program. The City will create a Green Halo project account for use by Principal Project Company.	Information	
092	Div. 10 - Sec. 024116	1.6	STRUCTURE DEMOLITION - Informational Submittals	Principal Project Company shall submit a number of informational submittals in addition to the Demolition Plan.	Information	
093	Div. 10 - Sec. 024116	1.7	STRUCTURE DEMOLITION - Demolition Plan	The Principal Project Company shall submit a complete Demolition Plan detailing procedures and sequence for removing the existing structures including all features necessary to remove the structure in a safe and controlled manner to insure stability of the structure at any given time.	Information	
094	Div. 10 - Sec. 028013	1.5.A	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	Principal Project Company shall submit copies of any notice of safety and environmental violations received from the regulatory agencies that they may have received in the last 20 years in the USA.	Information	
095	Div. 10 - Sec. 028013	1.5.B	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	Principal Project Company shall submit copies all the Minimum Qualification licensing requirements asked for in Section 01 35 44 Hazardous Building Materials Scope of Work.	Information	
096	Div. 10 - Sec. 028013	1.5.C	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	Principal Project Company shall submit proof of its five (5) years of hazardous materials abatement and/or removal experience asked for in Section 01 35 44 Hazardous Building Materials Scope of Work.	Information	NTD: need to correct "...or its Hazardous Materials abatement Principal Project Company..."
097	Div. 10 - Sec. 028013	1.5.D	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	Principal Project Company shall submit proof of its environmental training requirements asked for in Section 01 35 44 Hazardous Building Materials Scope of Work.	Information	
098	Div. 10 - Sec. 028013	1.5.E	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	For all demolition of buildings and structures, regardless of whether asbestos is present or not, Principal Project Company shall submit a copy of the BAAQMD-issued Approval Letter for Asbestos for Demolition, "[Job Number]" to the City's Authorized Representative prior to the start of Demolition. To obtain this letter, Principal Project Company shall submit an Asbestos Demolition Notification to the BAAQMD through their web-based Online Asbestos Notification System ( <a href="http://learn.baaqmd.gov/course/view.php?id=4#section-5">http://learn.baaqmd.gov/course/view.php?id=4#section-5</a> ) at least ten (10) business days prior to the start of any demolition.	Information	
099	Div. 10 - Sec. 028013	1.5.F	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	As per Section 01 35 44 Hazardous Building Materials - Scope of Work, Principal Project Company shall submit a Hazardous Materials Management Plan (HMMP) with the following documentation listed below. The HMMP shall be submitted no later than ten Days before start of Work at the Project Site or NTP2, whichever is earlier and before commencement of demolition activities. No hazardous materials work may start without the HMMP reviewed and approved by the City.	Review/Comment	See Section 1.5, items J, K and L for specialty HMMP submittal requirements pertaining to lead-related Work, Copper Chromate Arsenate (CCA) treated wood related Work, and fluorescent light tube related Work, if applicable.
100	Div. 10 - Sec. 028013	1.5.H	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	As part of Principal Project Company's HMMP, Principal Project Company shall submit a Waste Management Plan (WMP). The WMP is Principal Project Company's comprehensive plan for waste management of hazardous and non-hazardous waste generated during the remediation work of this project.	Information	
101	Div. 10 - Sec. 028013	1.5.I	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	For Asbestos Containing Construction Materials (ACCM), or Asbestos Containing Material (ACM), as applicable by regulation, and as part of the Hazardous Materials Management Plan (HMMP) Principal Project Company shall submit a number of items (see drafting) for: 1. Pre-job Submittals 2. Periodic Submittals 3. Close-out Submittals	Information	
102	Div. 10 - Sec. 028013	1.5.J	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	For Lead - Related Work, and as part of the Hazardous Materials Management Plan (HMMP) Principal Project Company shall submit a number of items (see drafting).	Information	
103	Div. 10 - Sec. 028013	1.5.K	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	For Copper Chromate Arsenate (CCA) treated wood related Work, as part of the Hazardous Materials Management Plan (HMMP), Principal Project Company shall submit the a number of items (see drafting).	Information	
104	Div. 10 - Sec. 028013	1.5.L	HAZARDOUS BUILDING MATERIALS - REMEDIATION - Submittals	For fluorescent light tube related Work, as part of the Hazardous Materials Management Plan (HMMP), Principal Project Company shall submit the a number of items (see drafting).	Information	
105	Div. 10 - Sec. 028013	3.3.F	Hazardous Building Materials Remediation - ASBESTOS ABATEMENT PREPARATION	1.c. (1) Establish a pressure differential of -0.025 inches w.g. with manometer reading records. Submit manometer readings daily or upon request.	Information	NTD: In drafting not clear who submittal needs to go to.
106	Div. 10 - Sec. 028013	3.5.C (1-2)	Hazardous Building Materials Remediation - HAZARDOUS MATERIALS REMOVAL PROCEDURES	1. Mastic removal solvents, procedures, and equipment information submittals must be approved prior to floor coverings removal. 2. In flooring areas where a solvent-based mastic remover is to be applied, Principal Project Company shall use a low odor mastic remover. Principal Project Company shall submit the Safety Data Sheets (SDS) of the mastic remover it intends to use, for the review and approval of the oversight Consultant.	Information	
107	Div. 10 - Sec. 028013	3.5.T	Hazardous Building Materials Remediation - HAZARDOUS MATERIALS REMOVAL PROCEDURES	1. Where mechanical removal of surface coatings constitutes a Level II activity, provide power tools, to the extent feasible, with local HEPA exhaust or dust collector systems to capture the aerosolized lead. Principal Project Company shall submit, as part of the HMMP, a detailed work plan for any of the following activities: a. Removal with power blasting tools b. Removal with power washing c. Removal with Sodium Bicarbonate Blasting.	Information	

**Potrero Yard - Technical Requirements  
Exhibit 18, Division 10 - Initial List of Submittals**

Date of update:		15-Nov-24				
ID Number	Division and Section Reference	Subsection Reference	Contract Data Item Title / Description	Required Submission	Submittal Action (Proprietary)	Notes/Comments
108	Div. 10 - Sec. 028110	1.3	ENVIRONMENTAL MANAGEMENT OF EXCAVATED MATERIALS - Submittals	A. The Contractor shall submit the required documents no later than ten Days before start of Work at the Project Site or NTP2, whichever is earlier, before any soil disturbing activity may begin. B. See drafting for detailed list of required submittals.	Information	
109	Div. 10 - Sec. 028110	1.4.B	ENVIRONMENTAL MANAGEMENT OF EXCAVATED MATERIALS - Pre-excavation Environmental Soil Profiling (Phase II Environmental Site Assessment)	If Principal Project Company seeks an exemption from the list of as needed environmental consultants, submit the name and qualifications of an environmental consultant that has done work in compliance with Article 21 of the City's Health Code (Maher Ordinance) for the City's approval.	Information	Applicable only for Phase II ESA work.
110	Div. 10 - Sec. 028110	1.4.E,N,O	ENVIRONMENTAL MANAGEMENT OF EXCAVATED MATERIALS - Pre-excavation Environmental Soil Profiling (Phase II Environmental Site Assessment)	E. Principal Project Company shall submit a Pre-Excavation Soil Profiling Sampling Plan for review and approval by both the City and San Francisco Department of Public Health prior to any drilling. N.2. Tabulate the testing results from the laboratory and submit it to the City. N.4. Prepare a draft and final report of this Environmental Site Assessment (Phase II) that is signed and stamped by both the principal and a registered professional engineer or geologist. O. Forward a digital copy of the draft environmental report for the City's review. After which, forward the final environmental report at least 5 days prior to excavation work. This report shall be prepared, stamped, and signed by a California licensed professional geologist or professional civil engineer.	Information	
111	Div. 10 - Sec. 028110	1.10.A	ENVIRONMENTAL MANAGEMENT OF EXCAVATED MATERIALS - Use of Non-Hazardous Waste Manifest for Class II Material or Lesser	For transportation and disposal of the non-Hazardous Waste, Principal Project Company shall initiate and fill out a non-Hazardous Waste profile form with the Class II/III landfill of its choosing. Then, submit this waste profile form to the City for its approval & signature. Next, Principal Project Company shall prepare a non-hazardous waste manifest form from the landfill. The non-hazardous waste manifest form shall be completed for each vehicle carrying excavated material classified as California Class II and Class III designated waste, or of a lesser waste classification. Principal Project Company shall submit the non-hazardous waste manifest form to the City for the Generator's signature at least 72 hours in advance of the day of the off-haul with an estimate of the number of loads scheduled for off-haul. <u>See drafting for manifest form requirements.</u>	Review/Comment	
112	Div. 10 - Sec. 028110	1.11.D,E,I	ENVIRONMENTAL MANAGEMENT OF EXCAVATED MATERIALS - Use of Non-Hazardous Waste Manifest for Class II Material or Lesser	D.1. For transportation and disposal of the Hazardous Waste, Principal Project Company shall initiate and fill out a Hazardous Waste profile form with the Class I landfill of its choosing. Then, it shall submit this Hazardous Waste profile form to the City for its approval and signature. Next, Principal Project Company shall provide and prepare the Hazardous Waste manifest for each shipment of Hazardous Wastes from the Project Site. E. Principal Project Company shall notify the City 72 hours prior to off-haul of all excavated material. If the manifest and other forms above are to be signed by the City during periods other than the hours stipulated above, Principal Project Company shall give an additional 72-hour advance notice to the City. I. Within 2 days of its return, Principal Project Company shall provide the City with the completed waste manifest. The completed waste manifest shall be certified by the receiver of the waste shipment, confirming that the shipment was received at the waste treatment or disposal facility designated in Principal Project Company's bid, and certifying the weight of the shipment.	Review/Comment	
113	Div. 10 - Sec. 028110	1.12.E,F	ENVIRONMENTAL MANAGEMENT OF EXCAVATED MATERIALS - Underground Storage Tank (UST) Closure Plan	E. Principal Project Company shall prepare an Underground Storage Tank (UST) Closure Plan in compliance with Article 21 of the San Francisco Health Code, if UST's will be removed. Principal Project Company shall only remove the underground tanks, pipes, and related appurtenances only in the presence of an inspector from the City's Department of Public Health, the City's Fire Department, and the City's Representative. F. Principal Project Company shall furnish documentation of the removal of an underground tank.	Information	
114	Div. 10 - Sec. 028110	3.2.B	ENVIRONMENTAL MANAGEMENT OF EXCAVATED MATERIALS - Reuse of Excavated Soils as Backfill	2. Native soils must meet sieve and chloride requirements. Principal Project Company shall submit sample results to the City prior to placement.	Information	
115	Div. 10 - Sec. 028110	3.3.A,B	ENVIRONMENTAL MANAGEMENT OF EXCAVATED MATERIALS - Reuse and Recycling of Excavated Soils at Other Facilities	A.3. Submit a letter of acceptance from the receiving facility or project. The letter shall indicate the volumes of soils accepted. Submit a value engineering calculation demonstrating cost savings to the City. Any savings that result from such reuse or recycle work will be a split 50/50 between [the City and Principal Project Company]. B.2. Submit a copy of the letter of acceptance and all records, including the financial statements for the value engineering saving prior to the approval of the reuse or recycling of these soils.	Information	
116	Div. 10 - Sec. 028110	3.4.C,D,R	ENVIRONMENTAL MANAGEMENT OF EXCAVATED MATERIALS - Import Fill	C. In advance of hauling in and use of import soil (fill) Principal Project Company for each source of import soil (fill), shall provide the City the original source of where the import soil (fill) is coming from, the name of the laboratory used to analyze the soils, and the date of chemical analysis. Laboratory results shall not be over 6 months old. D. Principal Project Company shall provide chemical analytical results for each source and of the same soil classification type (based on the unified soil classification system) of import soil (fill) in accordance with the Recommended Fill Material Sampling Schedule stated in the Department of Toxic Substances Control (DTSC) Advisory Note for Clean Imported Material. R. Import soil (fill) shall not be brought on-site, prior to the City's approval of the analytical results. Analytical results submitted shall be referenced on the import fill spreadsheet submittal.	Information	

Potrero Yard - Technical Requirements

# The New Potrero Yard Design Guidelines

## 1 Introduction

### 1.1 Background

The Potrero Yard Modernization Project's primary objective is to replace the obsolete Potrero Yard—which was originally built in 1915 as a streetcar facility—with a single integrated Facility that includes a Bus Yard Component, a Housing and Commercial Component, and Common Infrastructure and has an exceptional building and streetscape design.<sup>1</sup>

The San Francisco Municipal Transportation Agency (SFMTA) has been coordinating with the San Francisco Planning Department (SF Planning) and other City agencies since 2016 on preliminary work for the Project and has undertaken a robust stakeholder engagement program to receive and incorporate feedback.

These Design Guidelines provide the architectural and urban design principles and standards to guide the development of the Facility. The Project's Technical Requirements including these Design Guidelines are based on the work completed to date and should be used to develop the Project design.

These Design Guidelines convey general policies and urban design principles to which the Project should adhere. The guidelines help establish a common understanding of design principles and standards, but are not intended to dictate solutions to these principles and standards. Instead, they define a range of appropriate responses to a variety of specific design issues. Where the Design Guidelines state "shall", the PPC must interpret this language as a prescriptive design requirement. Where the Design Guidelines state "should," the City is promoting specific urban design principles and an encouraged urban design approach.

The following pages include examples and illustrations. These are included to illustrate concepts described; they are not intended to suggest a specific design solution or aesthetic.

---

<sup>1</sup> See Division 01 of the Technical Requirements

# The New Potrero Yard Design Guidelines

## 1.2 Project Site and Context

The Project Site, located at 2500 Mariposa Street in San Francisco, is owned by the City and County of San Francisco under the jurisdiction of the SFMTA. The approximately 4.4-acre property is bound by Bryant, 17th, Hampshire, and Mariposa Streets.

The site is located in the northeastern quadrant of the Mission District, an area that includes mixed-use zones and has a variety of light industrial uses as well as residential, retail, office, and other uses. York Street terminates at Mariposa Street on the south side of the site. Franklin Square, a city neighborhood park, is located across 17th Street on the north side of the site.

The existing bus yard and Mariposa Street are relatively flat, while the surrounding terrain slopes up to the northeast. The sidewalk at the northeast corner of the Site at 17th and Hampshire Streets is approximately 22 feet higher than the sidewalk at southwest corner of the site at Mariposa and Bryant Streets.<sup>2</sup>

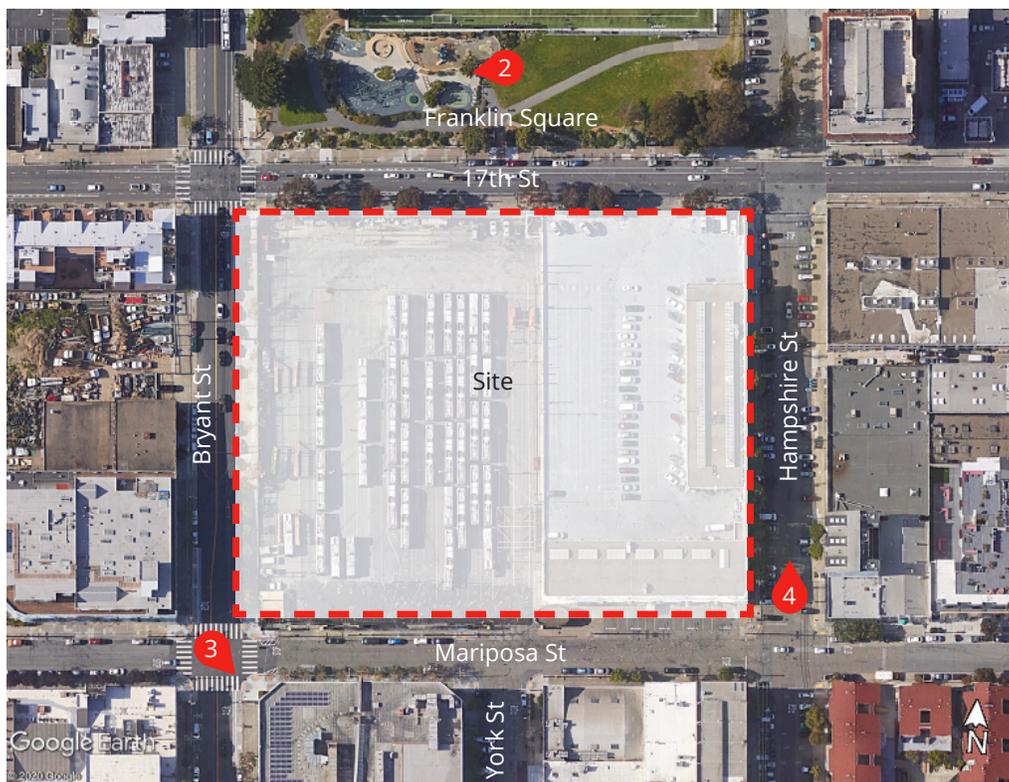

Figure 1. Site Aerial Photograph. Numbered keys refer to Figures on the following page.

<sup>2</sup> See Division 01 of the Technical Requirements

# The New Potrero Yard Design Guidelines

## 1.3 Zoning and CEQA

In 2024 the San Francisco Board of Supervisors adopted an ordinance designating the Project Site as the Potrero Yard Special Use District (SUD) and approving the Project's Final Environmental Impact Report (FEIR).

The Project shall comply with the SUD, the FEIR and the associated Project's Conditional Use Authorization and other City and County of San Francisco ordinances and regulations.

Figure 2. Franklin Square looking west.

Figure 3. Intersection of Bryant and Mariposa Streets looking southeast at KQED facility. Rendering by EHDD Architects.

Figure 4. Hampshire Street looking north.

# The New Potrero Yard Design Guidelines

## 2 Overall Design Guidelines

*“Good urban design is characterized by the thoughtful orchestration of buildings, landscape, open space, and streets ... San Francisco’s architecture spans various eras and architectural styles, but its urban fabric maintains a high degree of continuity and consistency ... [N]ew buildings have the responsibility to sensitively respond to their context and existing patterns of development while being of their moment.”<sup>3</sup>*

### 2.1 Vision

The SFMTA is committed to its mission to “connect San Francisco through a safe, equitable, and sustainable transportation system.”<sup>4</sup> The Project demonstrates the SFMTA’s commitment to providing zero-emission public transit, a safe and modern work environment for the SFMTA employees, and a new development with an exceptional building and streetscape design that enhances the Mission and Potrero neighborhoods.

The proposed Project vision should describe a single integrated Facility that incorporates the bus facility, residential and commercial uses, and infrastructure in a manner that makes it a great place for the building’s occupants and bus yard operations, and a great asset for the community.

The vision should:

- Celebrate the bus yard as the Site’s core use.
- Support a design that reflects the unique combination of bus, residential, and commercial uses and integrates them into a building that is contextual to its highly mixed-use neighborhood.
- Foster the placemaking and community-oriented activities in the building and streetscape design.

---

# The New Potrero Yard Design Guidelines

## 2.2 Design

The concept should be clear, and the design compelling and implemented with care and consistency.

The design should:

- Achieve the Project Objectives and fulfill the Project vision.<sup>5</sup>
- Enhance the skyline and surrounding context with a building massing, that although larger and taller than surrounding buildings provides visual interest, an architectural character that relates to surrounding neighborhood, and active building facades that have a pedestrian orientation that engages the community.
- Comply with the Project's Conditional Use Authorization including its special restrictions as well as the Project's Technical Requirements including these Design Guidelines.

---

5. See Division 01 of the Technical Requirements

# The New Potrero Yard Design Guidelines

## 3 Building Design Guidelines

### 3.1 Uses and Building Organization

The new Potrero Yard is planned to include the bus yard, residential, and possibly commercial uses such as retail and community serving storefront uses. The bus yard will occupy most of the building below 75 feet in height while the commercial uses may occupy select areas of the ground floor and the residential uses will occupy select areas of the building below 75 feet in height and above the bus yard.

The Facility shall be designed to optimize modern and efficient bus operations in accordance with the Division 3 - Design Criteria Document and to incorporate residential and commercial uses and infrastructure into a cohesive building design. Each component shall be designed to meet its programmatic and other requirements and to function independently while being part of a harmonious building design.

For efficiency, identity, and wayfinding the bus, residential, and commercial uses should be organized in a simple and clear manner and should be easily distinguished from one another. For pedestrian safety, the residential entrances and commercial storefronts should be separated to the extent feasible from the bus entrances and exits.

To contribute to the urban context and complement surrounding uses, active ground-floor uses such as retail and community serving storefront uses are desired on Bryant and 17th Streets.

To optimize bus operations, incorporate residential and commercial uses, and enhance the urban context provide at a minimum:

- Bus and loading entrances and exits on Mariposa Street.
- At least one primary residential entrance and active ground-floor uses on Bryant Street.
- Active ground-floor uses on 17th Street.
- At least one primary residential entrance on Hampshire Street.

# The New Potrero Yard Design Guidelines

## 3.2 Height, Bulk, and Open Space<sup>6</sup>

Consider how the building's massing is perceived from distant views such as from Dolores Park, Corona Heights, and Potrero Hill as well as from the close-in, street-level perspective of the surrounding neighborhood. Develop a clear design concept with a massing that provides visual interest, breaks down the building's height and bulk, and minimizes shadows on Franklin Square.

Figure 5. Different volumes breakdown building scale. Example: Five88, San Francisco, CA.

Figure 6. Different volumes breakdown building scale. Example: Avalon Hayes, San Francisco, CA.

Figure 7. Expressed stair and perforated metal facade provides visual interest. Example: Center Street Parking Garage, Berkeley, CA.

<sup>6</sup> Building heights (the vertical distance by which a building rises above a point) shall be measured from the midpoint of the Mariposa Street as described in the SUD.

# The New Potrero Yard Design Guidelines

The building shall not exceed 150 feet in height.

The—up to 75 feet tall—bus yard may be built to the property line but it should not appear monolithic. Reduce the scale of this mass by breaking it down into several volumes with plane changes and recesses while avoiding inactive or hidden spaces. Consider using an entrance alcove or plaza centered on the York Street axis to modulate the Mariposa Street facade and respond to the end of York Street.

The building above 75 feet in height shall step back from the property line and the overall massing shall step down from the south (Mariposa Street) side to north (17th Street) side. The building above 75 feet in height shall step back 10 to 20 feet on the south, west, and east frontages and 60 to 70 feet on the north frontage as described in the SUD to provide visual relief and mitigate shadows cast on Franklin Square.

The building above 75 feet in height shall vary in height and layout to provide visual interest and reduce the apparent building mass. The building above 115 feet in height shall have separate masses as described in the SUD. Consider locating these masses asymmetrically on the southern portion of the Site clear of the York Street right-of-way axis.

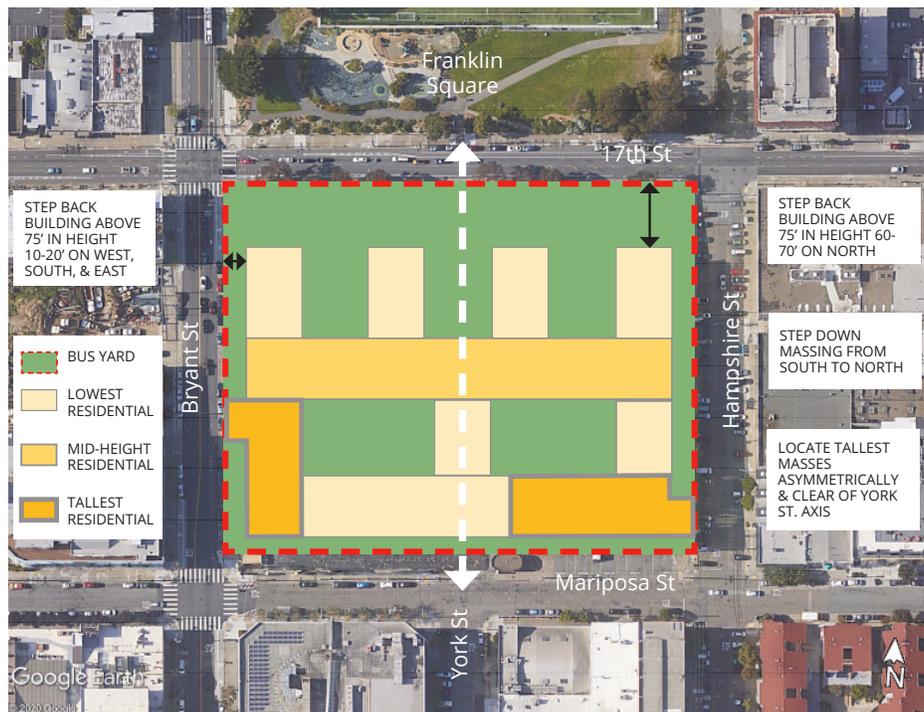

Figure 8. Diagram, which is based on the Reference Concept, illustrates the bulk requirements.

# The New Potrero Yard Design Guidelines

Use open spaces to modulate the building massing and use the building massing to shape open spaces that optimize solar exposure and protection from prevailing winds.

Open spaces, including those on the roof of the bus yard, should be attractive spaces for enjoying the outdoors, gathering, and recreation.

Provide separate open space areas that are easily accessible by the SFMTA employees and housing residents.

Open spaces should be visible and well illuminated with no hidden corners and should have seating and other elements, including a children's play area to enliven them. Locate seating in sunlit and shaded areas that are protected from wind.

Integrate landscape and stormwater management into the open space design. Support water and local biodiversity conservation by using San Francisco Bay Area native plant species and consider creating a pollinator habitat.

Figure 9. Housing podium open space with mix of seating areas. Example: Dr George W. Senior Residence & Senior Center, San Francisco, CA.

Figure 10. Open space with mix of private and shared spaces. Example: Avalon Dogpatch, San Francisco, CA.

Figure 11. Open space with mix of seating areas and landscaping. Example: Family House, San Francisco, CA.

# The New Potrero Yard Design Guidelines

## 3.3 Wall and Roof Treatment

The overall design should be a unified and cohesive composition that has a hierarchy and rhythm of architectural elements that have a pedestrian scale, provide visual interest, and are compatible with the surrounding context.

The design shall not have long expanses of flat, undifferentiated, or blank walls. Articulate the overall building massing into separate volumes and modulate these volumes with different materials and features such as recesses, bay windows, balconies, cornices, etc. The building articulation shall not rely on the use of surface applied elements, but use volumetric massing to create a hierarchy and rhythm that has a richness suitable to the surrounding neighborhood.

Differentiate bus, residential, and commercial components within the overall composition by the use of different materials, opening patterns, and/or features. Materials should be durable with an integral color such as concrete, masonry, glass, or factory finished metals.

Integrate wind mitigation measures into to the overall design.

The color scheme should be unified and enduring, but not bland. For example the bus yard accents could use the SFMTA and Muni color palette and the residential accents could reflect the Mission neighborhood's rich and varied color palette.

Design all facades and roofs with care and consistency. Consider approaches, such as views into the bus yard and public art installations, to supplement active ground-floor uses and provide visual interest on all four facades, including the Hampshire Street facade.

Figure 12. Unified composition with hierarchy and rhythm of architectural elements. Example: 1100 Ocean Avenue, San Francisco, CA.

Figure 13. Variations of materials and planes provides visual interest. Example: Drs. Julian + Raye Richardson Apartments, San Francisco, CA.

Figure 14. Bay window tile color derived from local color accents. Example: La Fenix at 1950 Mission, San Francisco, CA.

# The New Potrero Yard Design Guidelines

Also consider ways to treat the building corners, especially the corners on Bryant Street. For example a commercial use at the development's northwest corner at Bryant and 17th Streets could activate this location and link active uses on Bryant and Mariposa Streets.

Provide intentional facade terminations at the bus and the residential roof lines and use these to reinforce the building massing and design intent. Use bus yard facade terminations to help define the predominant streetwalls.

The Project roofs will be visible from near and far vantage points and should be considered the “fifth facade”. Both occupied open spaces and unoccupied roofs should be designed with care. Consolidate rooftop equipment in fully screened areas and integrate these into the overall design.

Figure 15. Stacking elements creates a rhythm and glazed ground floor engaging entry. Example: 1601 Mariposa St., San Francisco, CA.

Figure 16. Mix of rich materials and elements creates visual interest and configuration a strong indoor-outdoor connection. Example: Five88 Mission Bay Blvd., San Francisco, CA.

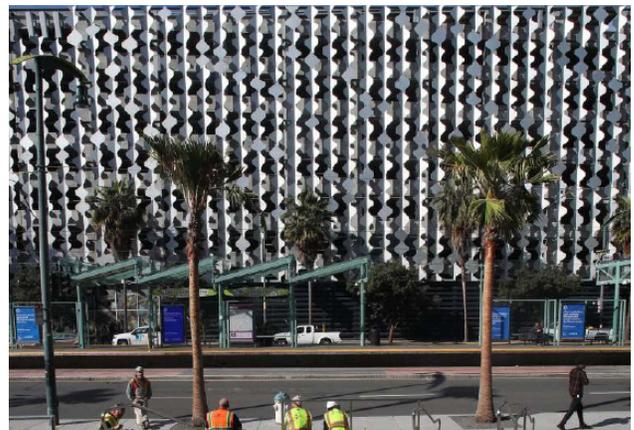

Figure 17. Porous facade. Example: 1630 Third St Parking Structure, San Francisco, CA.

# The New Potrero Yard Design Guidelines

## 3.4 Lighting, Signage, and Public Art

Carefully integrate lighting, signage, public art, and other elements into the building design.

Lighting should be provided to support pedestrian comfort and safety along sidewalks and throughout open spaces. Lighting should provide general illumination and highlight pedestrian entrances, storefronts, and bus entrances and exits. Lighting should be shielded to mitigate light pollution.

Signage should be provided to aid in way-finding, but it should not be the primary means to identify entrances. Signage should be integrated into entrances and storefronts, and be made of high quality and durable materials. Rectangular internally illuminated signs surface mounted to the building walls are not allowed. Consider ways to creatively incorporate the SFMTA and Muni logos and color palettes into the bus yard signage.

The Project has a public art requirement. While developing the design concept, consider opportunities to incorporate public art that celebrates—without being kitschy—the SFMTA’s bus operations and the neighborhood’s rich history and arts community as well as other ideas that the San Francisco Arts Commission (SFAC) may identify. Work with the SFAC and the artist(s) to thoughtfully integrate public art into the Facility and/or streetscape design.

Figure 18. Lighting and signage integrated into entrance design. Example: Family House, San Francisco, CA.

Figure 19. Art mural. Example: Vida Building, San Francisco, CA.

Figure 20. Art installation. Example: Kinetic Umbrellas, Project Artaud, San Francisco, CA.

# The New Potrero Yard Design Guidelines

## 3.5 Ground Floor Uses

The bus yard, residential, and commercial entrances should be located as described in Section 3.1 and should be easily seen and distinguished from one another.

- As described in the Better Streets Plan and Guidelines ([www.sfbetterstreets.org](http://www.sfbetterstreets.org)) the design of the ground floor uses and right-of-way, including allowance of curb cuts and placement of utilities, has significant impact on the street environment. Decisions regarding street design must consider and prioritize pedestrian safety, enjoyment, and comfort. Reducing driveways reduces the number of conflict points between pedestrians and vehicles and can dramatically improve safety. Maximum widths of industrial curb cuts serving two-way traffic should be 32 feet, though exceptions are permissible if bus or delivery vehicle turning templates require additional width due to the adjacent public street dimension. Where possible, curb cuts should be separated by a minimum dimension of 5' to provide safe waiting space for pedestrians. Vehicular entrances and exits should be kept to the minimum required for efficient and safe operations and should have a warning system. No more than four curb cuts with a total width of 230' shall be allowed on Mariposa Street, and less is desired. In addition one 32 foot wide curb cut for a second floor emergency bus exit shall be allowed.
- Bus and loading vehicular entrances and exits should have a warning system.
- The bus yard pedestrian entrance for the SFMTA employees and visitors should be easily identified to foster identity and way-finding.
- Residential entrance lobbies should be inviting and expressed prominently at the building exterior to foster identity and way-finding.
- Commercial spaces should have inviting storefronts with clear or lightly tinted glazing, high ceilings, and layouts that are flexible to support retail shops, cafes, small scale PDR, and/or community services such arts or educational spaces. The storefront entrances should be at grade and engage the sidewalk so that activity can spill out onto the sidewalk to support typical operations, special events and circumstances such as Covid-19.
- Pedestrian entrances should have weather protection and be well illuminated.
- Emergency exit alcoves should be integrated with entrance and storefront alcoves where possible. Any equipment rooms that must front the sidewalk should be integrated into the overall design.
- Where the bus yard fronts the sidewalk, provide views into the bus yard for visual interest.

Figure 21. Bryant Street frontage illustration prepared for community engagement planning workshop to show possible Project attributes.

# The New Potrero Yard Design Guidelines

## 4 Streetscape Design Guidelines

The SFMTA led the passage of the The San Francisco Better Streets Plan which aims to improve the quality and character of sidewalks and streets and make them more usable, greener, and safer for all modes of travel.<sup>7</sup>

The plan identifies Bryant, 17th, Hampshire, and Mariposa Streets as mixed-use streets that should have 15 foot wide sidewalks with (building) frontage, through-way, furnishing and (curb) edge zones. In addition 17th Street, which has a bike lane, is a green connection street that links parks, the waterfront, and open space and Hampshire Street is used by bicyclists as an alternative to the busier Bryant Street.<sup>8</sup>

As the City's policy leader and implementer of award-winning streetscapes, the SFMTA is committed to excellent streetscape design. The streetscape should be an exemplar of design that:

- Enhances the Project vision and building design and supports and augments active ground-floor uses.
- Supports SFMTA fleet usage and fosters bicycle and pedestrian activity and safety.
- Integrates sidewalk elements to create a safe, convenient, and inviting public realm

# The New Potrero Yard Design Guidelines

and needed outdoor space due to Covid-19.

Provide at least one bike parking area and one seating area on each frontage. Locate these in relation to the bus yard and residential entrances and the commercial storefronts and to maximize physical comfort considering solar orientation, wind, and noise.

Provide, in accordance with the San Francisco Street Design Advisory Team (SDAT) recommendations, bulb outs, pedestrian ramps, residential loading zones for pick-up/drop-off and package delivery, pedestrian lighting to enhance pedestrian access and safety.

Preserve healthy mature street trees where possible and provide new street trees that will have minimal impact on the trolley bus overhead contact system (OCS) where appropriate.

Integrate stormwater management into the streetscape and support water and local biodiversity conservation by using San Francisco Bay Area native plant species.

Consider opportunities to integrate public art into the streetscape.

Carefully design sidewalks to reduce clutter and integrate signage, lighting, bike racks, seating, landscaping, stormwater management, and possible public art. Consolidate OCS, lighting, and signage poles or replace OCS poles with catenary attached to the building.

Figure 26. Parklet with planter that provides a buffer from street traffic. Example: San Francisco, CA.

Figure 27. Public art bench. Example: Chinatown, San Francisco, CA.

Figure 25. Special Tree Grates. Example: Valencia Street, San Francisco, CA.

# The New Potrero Yard Design Guidelines

The SFMTA is committed to encouraging sustainable modes of travel. The Project will include a robust Transit Demand Management (TDM) program. Transit Demand Management (TDM) elements that support active (walking and biking) and high occupancy vehicle transportation (bus, shuttle, van pool) use should be located for easy access and use and integrated into the design, rather than added as an afterthought.

Figure 29. Bike Storage, Example: Ashby BART Station

## SECTION 1 - INTRODUCTION

## 1.0 INTRODUCTION

The San Francisco Municipal Transportation Agency (SFMTA) has engaged a consultant team led by Hatch Associates Consultants (the Hatch Team) to analyze the feasibility of developing non-transit uses above or adjacent to the SFMTA's bus maintenance and storage yards. The Potrero Yard Bus Facility Design Criteria Document has initially focused on joint development opportunities at the Potrero Yard, which will be the first of the SFMTA's older bus yards to be rebuilt.

SFMTA has directed that any joint development at Potrero Yard must not impede the core transit function of the facility if rebuilt. The integration of joint development with the reconstruction of the Potrero Yard has been an integral part of these activities and also for the Project's procurement.

Potrero Yard (located at 2500 Mariposa Street in the Mission District and opened in 1915) currently serves as one of two SFMTA Electric Trolley Bus (Trolley Bus) Operations and Maintenance facilities. The existing two-level facility includes bus parking, service (fare recovery and wash lane), and a ten-lane maintenance facility at grade, accessed via Mariposa Street. The second level includes bus operations space, non-revenue vehicle parking, trolley bus parking, a tire bay/shop, and a body bay/shop accessed via 17th Street. The Potrero Yard Modernization Project will demolish the existing facility and construct a new, expanded bus maintenance and operations facility on the site. The new facility will serve the existing Trolley Bus Fleet and will be the SFMTA's first purpose-built battery-electric bus facility. The facility will also house the SFMTA's transit operator training classrooms, as well as Street

Operations, the SFMTA's street incident response team.

The Design Criteria Document prescribes technical, functional, and performance requirements for the Potrero Yard Bus Component's building systems including architectural, civil, structural, equipment, mechanical, electrical, and plumbing. This document is attached to the Potrero Yard Division 3 (*Design Criteria Document*) of the Technical Requirements. The Design Criteria Document was prepared by transit design specialist HDR | Maintenance Design Group (HDR | MDG) in close coordination with urban design specialist SITELAB Urban Studio, transit operations specialist CHS, and real estate advisory firm Hatch (the Hatch team). Technical building and building system requirements for the Housing and Commercial Component are not addressed here, but can be found in Divisions 4 (*Design Criteria for the Housing and Commercial Component*) and Division 6 (*Program for the Housing and Commercial Component*) of the Technical Requirements.

## 1.1 Sources Consulted

The Bus Facility Design Criteria Document is informed by discussions with the SFMTA subject matter experts during the Potrero Yard Design Charrette held on January 31 through February 2, 2018 as well as the Hatch Team's review of the following studies, reports, and analyses prepared by or on behalf of the SFMTA.

- SFMTA Facilities Framework Addendum (10/6/17)
- SFMTA Master Plan Report (7/28/17)
- SFMTA Transit Fleet Management Plan (2014, amended 2017)
- SFMTA Zero Emission Bus Rollout Plan (2021 draft)

Follow up in-person interviews with the SFMTA also took place in September 2018 and December 2018, with a conference call also held in November 2018. Between 2018 and publication in 2021, SFMTA staff were consistently consulted to finalize details and review drafts of this document.

## 1.2 Design

Following in-depth discussions with SFMTA staff on required bus program, overlain with HDR's industry best practices recommendations, the SFMTA and the Hatch team produced a Reference Design Concept (RDC) that is generally consistent with the Technical Requirements which is Document 1 (*Reference Design Concept*) of the Reference Documents. The RDC is one expression of general conformance to this Design Criteria Document.

Tables 1.A and 1.B identify the quantitative capacity of bus fleet vehicles and square footage summaries in the RDC. All required bus storage programming numbers are based on a design capacity representing the bus storage number the facility can accommodate using parking spaces and several (approximately half) of maintenance bays. The SFMTA refers to this design capacity methodology as "planning capacity." Table 1.A lists the 2030 programming bus capacity numbers. Table 1.B contains the 2030 overall programming square footage numbers.

The following is a list of Design Principles established during planning:

- Minimize impact of bus circulation on the neighborhood.
- Provide improved efficiency and seismic performance.

SECTION 1 - INTRODUCTION

TABLE 1.A - POTRERO YARD PROGRAM SUMMERY AT SUBSTANTIAL COMPLETION OF THE INFRASTRUCTURE FACILITY\*

	TROLLEY BUS		TOTAL	MAINT.	BUS : BAY
	40'	60'	BUSES	BAYS	RATIO***
Potrero Bus Yard	153	93	246	13	19

\*All figures are planning capacities and represent the fleet mix at Potrero Yard when the Yard is completed in 2026. The fleet mix will ultimately transition to 100 percent battery electric.

\*\*\*Ratio is total for all Repair Bays and Preventive Maintenance Bays based on a ratio of 17:1. Does not include speciality bays like tire bay, body bay, and chassis wash bay.

TABLE 1.B - REFERENCE DESIGN CONCEPT PROGRAM SUMMARY AREA (SF)

	PARKING	MAINT. BAY/SHOPS	SERVICE & CLEAN	PARTS	MAINT. ADMIN	OPS.	TRANSIT SVCS.	SHARED	TRAINING	BODY/ PAINT	TOTAL
Potrero Bus Yard	299,215	48,252	10,921	8,806	9,423	14,017	8,519	15,390	17,819	---	432,362

- Promote mixing and socializing across divisions.
- Provide well laid out Dispatch and check-in spaces.
- Facilitate good relationship between operators, supervisor, and dispatch spaces.
- Enhance ability for on-time pull-out.
- Provide flexibility in bus parking and crush capacity.
- Enhance good communication between functional areas.
- Efficient and safe movements of vehicle and pedestrians.
- Incorporate daylight as much as possible given the site and building constraints.
- Create good line of sight from Dispatch to pull-in and pull-out of buses, including design options such as:
  - ✓ Windows with direct or indirect views of interior bus operations.
  - ✓ Use of technology such as cameras for improved security and more efficient operations.

- Utilize durable, easy to clean casework.
- Provide adequate lockers and space – well lighted and ample clearance between lockers.
- Provide a facility that is welcoming, uncluttered, appreciated, presents a discrete public face, and instills employee pride and ownership

1.3 Report Overview

This Bus Facility Design Criteria Document consists of five sections, which are described briefly here.

*Section One - Introduction.* This section describes the background of the project and provides an overview of the Bus Facility Design Criteria Document.

*Section Two - Space Needs Program.* This section presents a detailed listing of space requirements for Parking, Bays and Shops, Service and Clean, Parts, Maintenance, Operations, Shared Areas, and Training.

Programmed spaces are further defined by their quantity, area, and any remarks significant

to design. Information began and then was updated using information from the 2017 SFMTA Facilities Framework Addendum, published in October 2017.

*Section Three - Design Criteria Narrative.* This is the first of two design criteria sections. The Design Criteria Narrative presents a narrative version of the functional.

*Section Four - Performance Requirements.* This section describes the requirements per design discipline.

*Section Five - Requirements for Bus Yard Component Space Modules.* This is the second of two design criteria sections. This section presents a graphic version of the functional and performance requirements and is organized by functional space as presented in the Space Needs Program.

Appendices:

- Appendix A: Maintenance Equipment Manual
- Appendix B: SFMTA OCS Design Criteria
- Appendix C: SFPUC Application for Electrical Service (For Reference)

**SECTION 2 - SPACE NEEDS PROGRAM**

Appendix D: Traction Power Feeder Map  
Appendix E: Sample Route Schedules  
Appendix F: Security Sensitive Information  
Process Regarding Traction Power Standard  
Specifications  
Appendix G: Design Criteria Paratransit (For  
Reference)  
Appendix H: PG&E System Impact Study  
Report for Mixed Use Service Application (For  
Reference)  
Appendix I: SDAT Review Letter 1.19.2023 (For  
Reference)  
Appendix J: Geotechnical Baseline Report

The Design Team prepared the Design Criteria Document, Maintenance Equipment Manual, Building Drawings, and Equipment Drawings to Reference Design Concept prepared by the SFMTA prior to the Project's procurement, CEQA Project Description, and the basis for the programmatic and functional requirements for the Project's procurement. The Maintenance Equipment Manual is included as Appendix A in this Design Criteria Document.

**1.4 Acknowledgments**

The Hatch Team would like to acknowledge the efforts and contribution of the SFMTA staff members during the development of the design charrette process and input to matters related to the development of the Bus Facility Design Criteria Document. This continued enthusiastic participation and dedication will ensure the realization of the Potrero Yard program.

**SECTION 2 - SPACE NEEDS PROGRAM**

**2.0 INTRODUCTION**

This section presents the Space Needs Program for the Potrero Yard. The Space Needs Program defines the minimum space requirements for efficient operations. The program is summarized at the end of this section, and includes projected square footage needs for building and exterior areas.

All required programming numbers are planning, not crush, capacity. The Space Needs Program was used as the basis to develop the Reference Design Concept that, which is Document 1 (*Reference Design Concept*) of the Reference Documents.

All spaces in the proposed bus yard concept should be within 10% +/- of the programmed square footages listed in Table 2.E.

**2.1 Staff Summary**

Minimum facility staffing levels that are either required or planned by the SFMTA are crucial to planning efforts when determining the size of support facilities and developing occupancy levels. Table 2.A shows the summary of facility staffing levels.

**2.2 Vehicle Parking Summary**

The following Table 2.B is the summary of vehicles.

**TABLE 2.A - POTRERO YARD PROGRAM STAFFING SUMMARY AT SUBSTANTIAL COMPLETION OF THE INFRASTRUCTURE FACILITY\***

Function	Potrero Staff
Bays & Shops	10
Service & Clean	37
Parts	21
Maintenance - Administration	10
Mechanics & Technicians	90
Operations - Administration	22
Operators	684
Transit Services	192
Shared	1
Training	63
<b>TOTAL</b>	<b>1,130</b>

**TABLE 2.B - POTRERO YARD PROGRAM VEHICLE SUMMARY AT SUBSTANTIAL COMPLETION OF THE INFRASTRUCTURE FACILITY\***

Function	Scenario 1 Potrero Vehicles
40' Bus	153
60' Bus	93
Large Non-Rev Vehicle	5
Standard Non-Rev Vehicle	84
Transit Services	68
<b>TOTAL</b>	<b>403</b>

\*All figures are planning capacities

\*\*An estimated 10-20 NRV spaces may be considered for BYC Transportation Demand Management programming

<sup>1</sup>The square footages in the Drawing Package may not match exactly those of the Program, but the Program has guided the formulation of the Drawing Package.

**SECTION 2 - SPACE NEEDS PROGRAM**

**2.3 Planning Ratio**

Table 2.C lists only the key/major planning ratios. For a complete list of the square footages for each type of use, refer to the Space Needs Program in Table 2.E.

TABLE 2.C - PLANNING RATIO	
SPACE	RATIO OR SPACE STANDARDS*
Bus Repair Bay (20' x 75')	1 bay for every 20 buses to be maintained
Preventive Maintenance (PM) Bay (20' x 75')	1 bay for every 50 buses to be maintained
Tire Bay (20' x 75')	1 bay for every 125 buses to be maintained
Minor Body Repair Bay (20' x 75')	1 per facility
Chassis Wash Bay (25' x 75')	1 bay for every 200 buses to be maintained
Service Position (20' x 70')	1 bay for every 75 buses
Bus Washer (20' x 100')	1 bay for every 150 buses
Water Reclamation (15' x 60')	1 per facility, handles multiple bus washers
Tool Box Storage	24 square feet (sf) per Maintenance Technician
Tire Storage	5 sf per bus for 1 tire per bus
Parts Storage	20 sf per bus with High Density Storage System

\*For Potrero Yard, all bays are designed to be used by both 40' and 60' buses.

**SECTION 2 - SPACE NEEDS PROGRAM**

**2.4 Space Standards**

Space standards were applied to the Space Needs Program and generally apply to the Offices, Shops, Bays, and Vehicle Parking Areas. Area requirements in Shops and Storage Areas were derived from functional requirements and equipment space needs. The space standards listed are the minimum required space square footages. The space standards listed in Table 2.D were utilized to develop the facility program and overall area requirements. The space standards are based on functional needs and requirements.

TABLE 2.D - SPACE STANDARDS	
AREA	SIZE
<b>SHOPS &amp; STORAGE:</b>	
Common Work Area	500 sf
Trolley Bus Electronics Shop	1,000 sf
Portable Equipment Storage	600 sf
Tool Storage	150 sf
Tire Shop	600 sf
Lube Room	400-600 sf
Compressor Room	200 sf
Bench Shop	300 sf
Cleaning Equipment Storage	200 sf
Battery Storage	200-300 sf
Parts Window	200 sf
Shipping and Receiving	600 sf
Loading Dock	900 sf (15 x 60)
<b>PARKING:</b>	
40' Transit Bus	540 sf (12 x 45)
60' Bus	780 sf (12 x 65)
Large Non- Revenue Vehicles	420 sf (12 x 35)
Standard Non-Revenue Vehicles	200 sf (10 x 20)
<b>CIRCULATION:</b>	
Aisles for 90 degrees turns	65' turning into parking lanes or service
Aisles for 90 degrees turns	70' turning into maintenance bays
Bypass Lane	20' wide
One Way Ramp	15' wide
Forklift Circulation	10' wide

**SECTION 2 - SPACE NEEDS PROGRAM**

**2.5 Circulation Factors**

Circulation factors have been applied to interior building spaces; exterior circulation is unnecessary as the Potrero Yard will occupy the entire site. The space requirements shown for each function are net usable area.

**2.6 Interior or Building Circulation**

Circulation factors are applied to the program as a percentage of the total building square footage. These factors account for miscellaneous building spaces such as hallways, stairwells, wall thickness, structure (Circ/Mech/Elec/Struc - Net:Gross), and access requirements. The following is a list of the minimum required factors that have been applied to the program:

- Parking 75%
- Bays and Shops 20%
- Service and Clean 10%
- Parts 10%
- Maintenance - Admin. 35%
- Operations - Admin. 35%
- Transit Services (MRO) 35%
- Shared 35%
- Training 35%

**2.7 Minimum Design Requirements**

- Total Bus Parking Planning Capacity is 246 trolley buses.
- The full space needs program shall be accommodated on four levels and a basement, to the extend a basement is needed.
- Unique 100 percent drive-through, bus maintenance facility that include:
  - ✓ 70-foot internal drive aisle
  - ✓ Ten Bus Repair Bays
  - ✓ Five PM/Inspection Bays
  - ✓ Tire Bay(s), Shop and Storage

**SECTION 2 - SPACE NEEDS PROGRAM**

- ✓ One Miscellaneous Body Repair Bay
- ✓ Support Shops and Storage Areas,
- ✓ Parts Storage Warehouse with dedicated delivery dock
- ✓ One Bus Washer per bus parking level
- ✓ Dedicated Mechanical Systems Yard with a water reclamation equipment area.
- The top and bottom 40 feet of the ramp shall be a maximum 5 percent slope with the remainder of the ramp at a maximum slope of 10 percent.
- There is vertical space available over shops, offices, and other spaces within the maintenance areas not requiring 20-foot clearances.
- Access to the upper level joint development uses shall be provided via appropriate vertical circulation access points that preserve the SFMTA facility's security and that are safe and functional for the joint development opportunities.
- Bus turning radius has been evaluated within the building. The site and street bus turning radius shall be reviewed for conformance to performance base throughout design and construction.
- The Principle Project Company (PPC) must apply and show turning templates on drawings, and it has to be agreed upon that they are sufficient and work for circulation. SFMTA reserves the right to request a turning simulation to demonstrate that vehicles can maneuver safely if turning template is tight.
- The following uses had been envisioned on the basement and must be included on the site:

- ✓ SFMTA loading
- ✓ Full building waste management and pickup
- ✓ Access to lower-level work areas
- ✓ Car-share spaces
- ✓ No public access
- Staff work areas shall be located in an above-grade, naturally lit location while accommodating the required spaces and adjacencies. To the extent feasible, include access to private outdoor spaces from staff break areas and rest spaces.

**2.8 Space Needs Program & Summary**

A summary of the Space Needs Program is provided below. The summary tables include projected square footage needs for building areas, parking, and staff totals.

These projected space needs are subtotaled into net square footage requirements. The detailed Space Needs Program begins with the identification of each space by name and a space standard (if applicable). The space column represents spaces required to accommodate the fleet and operation for the final build out.

Table 1.B gives an overall square footage for each large area indicated. Table 2.E is a detailed program for each space required. Table 2.E totals are not identical to the actual square footages within the RDC but the design of the RDC was informed by Table 2.E.

The above minimum requirements notwithstanding, the design shall meet all other program, functional, and space requirements within a maximum square footage deviation of ±10% applied to each function as shown in Table 2.E- Space Needs Program.

## SECTION 2 - SPACE NEEDS PROGRAM

**2.9 Battery Electric Bus Fleet Infrastructure**

In accordance with the CA Air Resources Board Innovative Clean Transit legislative mandate, the SFMTA is transitioning its fleet to battery-electric buses. Potrero Yard currently operates a fleet of trolley buses, and the new facility will need to account for the existing fleet, the future battery-electric fleet, and the future transition between the two propulsion technologies.

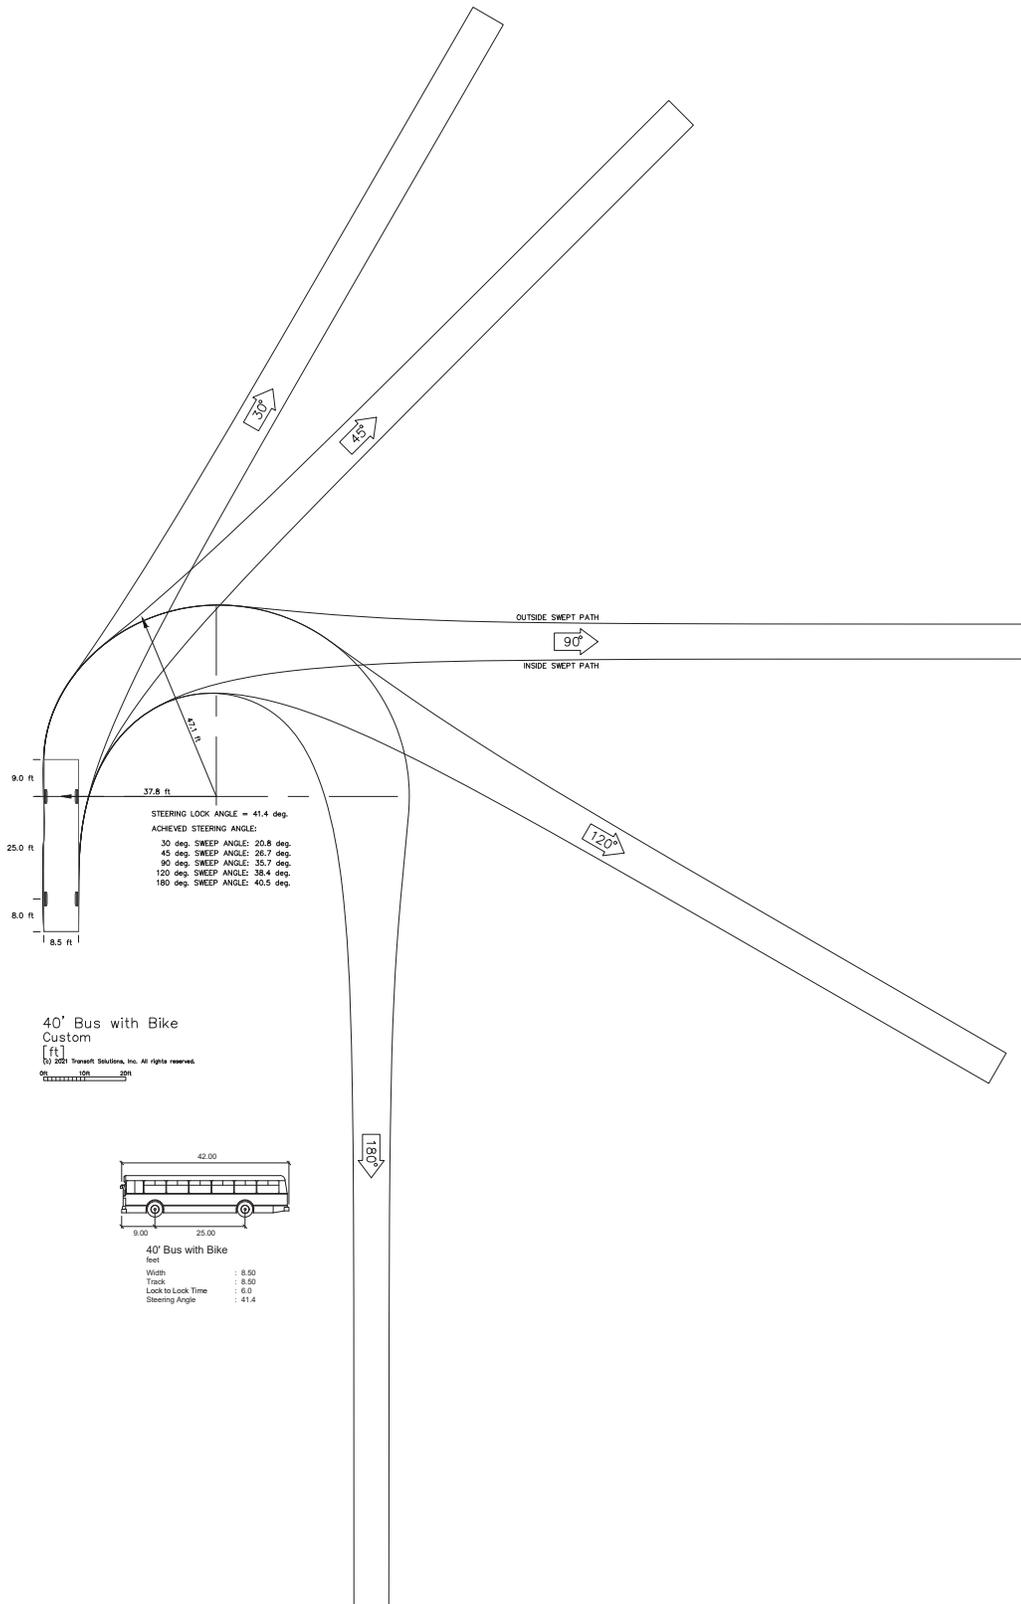

While compliance with this DCD is required and mandated, design and implementation of BEB infrastructure is envisioned as more of a progressive design process. Refer to Division 5 (*Battery-Electric Bus Supplemental Criteria*) of the Technical Requirements for BEB requirements and considerations.

**2.10 Minimum Clearance and Design Requirements**

The following are minimum clearance and design requirements for the different levels of the Bus Yard Component:

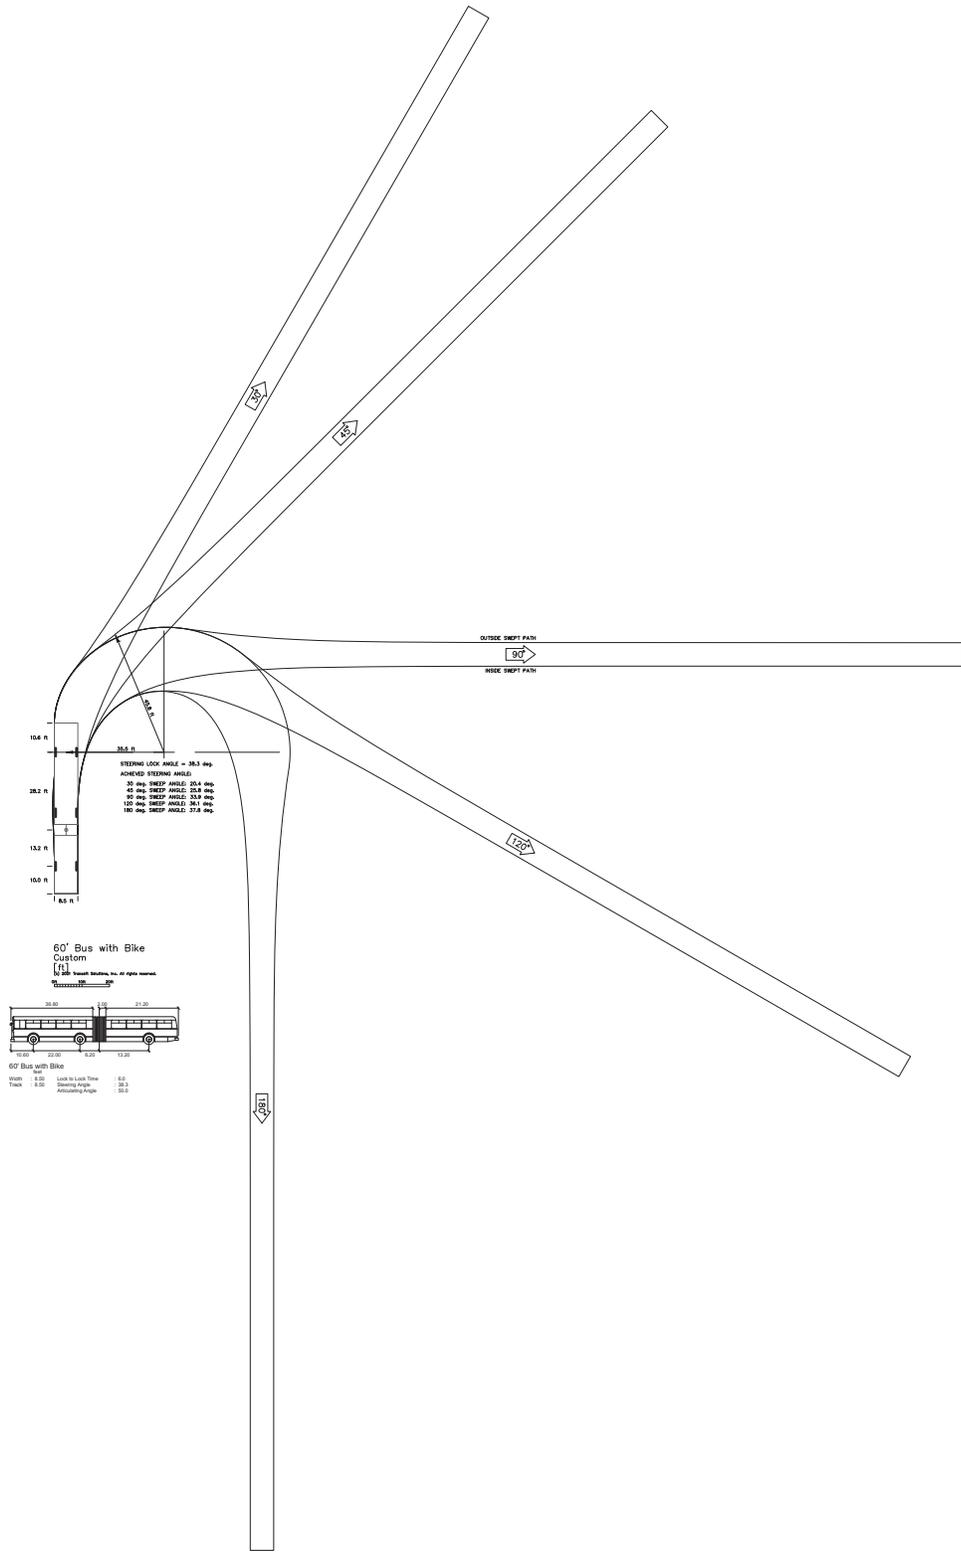

- For the minimum drive aisle for bus turning, see Table 2.D.
- The minimum turning radii for buses is 36'-43', depending on degree of turn. See 40' and 60' turning template models in Exhibits 1 and 2.
- Vertical circulation for under the catwalks is 20 feet.
- The bus floor levels of the Bus Yard Component should be designed for the full bus live load, regardless of whether the floor plans indicate other non-bus uses.
- Vertical clearance listed in the DCD is the minimum clearance height to any structure, system, building components or equipment, or fixtures.

**SECTION 3 - DESIGN CRITERIA NARRATIVE**

**3.0 PURPOSE & INTENT**

The purpose of this chapter is to define the goals developed throughout the SFMTA Potrero Yard Planning Study, which includes the reconstruction of the Potrero Yard and the joint development opportunity of non-transit uses above the Bus Yard Component. Guided by planning, compliance, and general site criteria, simple narratives are included to provide an overview of specific systems and assemblies that the Facility requires. The intent of these narratives is to present an easy to understand, non-technical explanation of how this Facility is required to function and includes considerations from the SFMTA employee and stakeholder input.

**3.1 Planning Criteria**

Table 3.A provides a description of the primary planning, building quality, and transit objectives for the Bus Yard Component.

**3.2 Compliance**

The Project shall comply with all applicable governing codes and ordinances that regulate building construction, site design, life safety, fire protection, accessibility, energy, and environmental requirements as well as the Project Specific Design Criteria as follows (or those which are applicable at the time the design is initiated). Applicable codes to which the project must adhere are included in Table 3.B.

**TABLE 3.A - PLANNING CRITERIA**

Design Life	99 years
Quality	The planning, design, and construction of the facility shall be high quality and long-lasting, have the necessary spaces and systems to function well, provide a safe and healthy work environment, and be economical and resource efficient to operate and to maintain.
Planning	The facility layout shall have a logical and efficient organization and flow to allow easy and safe access and circulation for staff, vehicles, and service providers. The layout shall be open and modular with the structure located to support building and equipment loads.
Flexibility	The facility shall be designed to be flexible. Vehicle parking, service, and maintenance spaces shall have an open and modular layout to accommodate 40- and 60-foot motor coaches, trolley buses, and future electric buses. Staff areas shall be designed with an open plan with modular partitions and furnishings that can accommodate staffing and programming needs over time. Training spaces shall be modular co-located spaces with movable partitions to accommodate a wide range of group meeting needs (i.e. one large group, several small groups, etc.)
Space Utilization	The facility shall include all required spaces and assignable square footages (area inside room or boundary) in Section Two of the Facility Program as well as minimum dimensions and clearances as defined in the Space Standards. Bus areas shall be planned to maximize fleet capacity, where possible sharing circulation between functions such as parking and maintenance bays.
Workspace	Workspaces shall be designed based on needs to be highly functional spaces with quality environments that support staff health, safety, and productivity with good day lighting, good ventilation, and durable finishes. If feasible, provide direct access to green space on the roof for employee use and enjoyment.
Safety	The facility shall have the best practice safety features including fire life safety systems; adequate means of egress and way-finding components to exit discharge; fall protection; eye and ear protection; unobstructed circulation and equipment clear space; easy to use fluids collection; and good ventilation with positive pressure in staff areas.
Security	The facility shall have passive and active security. The site shall have limited vehicular and pedestrian entries that are easy to find and visible. The facility shall have card readers at all exterior entries, suite entries, and support spaces. Security camera system shall be installed to monitor all exterior access and interior areas.
Emergency Response	The SFMTA Emergency Response Plan includes emergency transportation after a disaster and then owl service (late night service) plus several additional routes in the first stage of recovery. The number of buses needed during the initial response depends on the disaster. The first stage of recovery requires approximately 250 buses and 680 operators. Please see Section 4.8.1 for more information on the expected resilience and recovery time of Potrero Yard following a major disaster.
Future Electric Buses	The facility shall build in infrastructure for battery-electric buses, using overhead fast-charge in accordance with Refer to Division 5 (Battery-Electric Bus Supplemental Criteria). The trolley bus parking spaces will be transitioned to battery-electric charging spaces over time in accordance with the transition plan approved in the Project Agreement.
Window Cleaning	The facility shall have a window cleaning regime which includes regular use of non-aggressive cleaning products. The use of aggressive or corrosive cleaning products shall be avoided. Regular window cleaning shall happen every 12 months, but not exceeding 18 months, unless undue soiling is apparent in which case the cleaning intervals should be reduced. For the Potrero Facility, the use and contract with a company that specializes in this type of cleaning is required.

**SECTION 3 - DESIGN CRITERIA NARRATIVE**

The Building Code and Zoning Requirements include, but are not limited to the following. The PPC is solely responsible for compliance with all applicable codes.

TABLE 3.B - BUILDING CODE & ZONING REQUIREMENTS	
Authority Having Jurisdiction:	City and County of San Francisco
Zoning Code:	San Francisco Administrative Code (Planning Code)
Applicable Codes (Adopted):	ASHRAE- 62.1, 90.1, 189.1 California Building Standards Code (with local amendments) California Electrical Code (with local amendments) California Energy Code (with local amendments) California Existing Building Code (with local amendments) California Fire Code (with local amendments) California Green Building Standards Code (with local amendments) California Historical Building Code (with local amendments) California Mechanical Code (with local amendments) California Plumbing Code (with local amendments) California Reference Standards Code (with local amendments) Department of Justice ADA Standards for Accessible Design NFPA Codes- 13, 30, 30A, 33, 88A, 110, 111, 704, 720 San Francisco Code Amendments, State Amendments, Ordinances, and Law
Occupancy Group:	S-2, B, R-2, M
CONSTRUCTION TYPE/ HEIGHT & AREA (SEE ICC TABLE 503; ICC TABLE 504.3)	
Type I-B Max.	150'-0" / _Floors @ _sf ea. Per ICC 2016; 85' per San Francisco Municipal Code
Fire Protection:	Sprinkler System

<sup>4</sup>The joint development square footages presented in this table are based on preliminary models prepared by the consultant team (The Hatch Team). The ultimate size and form of the joint development component of the project are subject to change.

**SECTION 3 - DESIGN CRITERIA NARRATIVE**

**TABLE 3.B - BUILDING CODE & ZONING REQUIREMENTS (CONT.)**

**FIRE RESISTANCE RATING REQUIREMENTS FOR BUILDING ELEMENTS, FOR TYPE 1-B CONSTRUCTION (ICC TABLE 601)**

Structural Frame Including Columns, Joists, & Girders	Supporting Floors - 2 hours Supporting Roof ONLY - 1 hour
Bearing Walls Exterior	(per ICC Table 602) - 2 hours
Bearing Walls Interior	Supporting Floors - 2 hours Supporting Roof ONLY - 1 hour
Non-Bearing Walls & Partitions Exterior	(per ICC Table 602) - 1 hour
Floor Construction Including Supporting Beams & Joists	2 hours
Roof Construction Including Supporting Beams & Joists	2 hours

**OCCUPANCY SEPARATION, FIRE BARRIERS, FIRE PARTITIONS, & REQUIRED OPENING PROTECTIVES, FOR TYPE I-B CONSTRUCTION (ICC TABLE 504.3, TABLE 504.4, TABLE 716.5)**

	PARTITIONS	OPENINGS
Occupancy Separation between (S-2, Bus Repair Garage) & (B, Training Area, Operations)	2 hours	
Occupancy Separation between (S-2, Bus Repair Garage) & (R-2, Residential T.O.D.)	2 hours	
Exit Passageways	1 hour	1 hour
Exit Enclosures	1 hour	1 hour
Vertical Shafts (for 14 stories, 144 feet, 0 inch total height)	1 hour	1 hour

**INTERIOR WALL AND CEILING FINISH REQUIREMENTS BY OCCUPANCY (SPRINKLERED BUILDING), FOR TYPE I-B CONSTRUCTION (ICC TABLE 803.11)**

OCCUPANCY GROUP	EXIT ENCLOSURES & EXIT PASSAGEWAYS	CORRIDORS	ROOMS & ENCLOSED SPACES
S-2	Class C	Class C	Class C
B	Class B	Class C	Class C
R-2	Class C	Class C	Class C

SECTION 3 - DESIGN CRITERIA NARRATIVE

3.3 General Site Requirements

There are specific site requirements necessary to ensure safe, efficient, and functional facilities that are outlined (and not limited to) the following:

TABLE 3.C - GENERAL SITE REQUIREMENTS

Facility Accessibility	Provide a minimum of two vehicular entries/exits configured such that either could work as the entry/exit if the other is unavailable.
Facility Lighting	Use appropriate and adequate lighting for day to day operations and to ensure high level of surrounding visibility. Transit facility will have movement around and through the facility at all times of day.
Pedestrian Safety & Accessibility	Observe all code and regulation requirements to insure safe and defined pedestrian circulation paths (necessary striping, bollards, curb cuts, etc.); and that paths minimally intersect fleet ingress and egress. The SFMTA staff have made a number of suggestions to ensure that bus/pedestrian conflicts are minimized. While beyond the scope of this document, specific design treatments within the right of way to advance this goal include traffic signal pre-emption for buses; separating entrances to the bus facility and joint development to the greatest degree possible; provide transit lanes for buses to connect to OCS; and striping for on-street parking, bicycle facilities, and loading to minimize conflicts with bus movements.
Site Stormwater Drainage	Positive drainage and appropriate stormwater discharge from site and upper exterior/open decks; a stormwater management and pollution prevention plan shall be established. Required per the San Francisco Green Building Code Amendments and GS6 Form for municipal projects and the SFPUC Stormwater Management Ordinance.
Sustainability	Provide as required including the San Francisco Municipal Green Building Code (Environment Code Chapter 7), CALGreen, and the San Francisco Green Building Code. Potrero must be built to a LEED Gold rating.
Parking	(Employee Parking will not be provided)
Security	Provide site video surveillance and building security.
Better Streets	<a href="https://sfplanning.org/resource/better-streets-plan">https://sfplanning.org/resource/better-streets-plan</a>
Mission Area Plan	<a href="https://generalplan.sfplanning.org/Mission.htm">https://generalplan.sfplanning.org/Mission.htm</a>
Mission District Streetscape Plan	<a href="https://archives.sfplanning.org/CDG/docs/missionstreets/MDSP_FINAL_DRAFT_OCT2010.pdf">https://archives.sfplanning.org/CDG/docs/missionstreets/MDSP_FINAL_DRAFT_OCT2010.pdf</a> <a href="https://sfplanning.org/resource/sdat-standard-comments">https://sfplanning.org/resource/sdat-standard-comments</a>
San Francisco's Biking and Rolling Plan: Active Communities	<a href="https://www.sfmta.com/projects/biking-and-rolling-plan">https://www.sfmta.com/projects/biking-and-rolling-plan</a>

**SECTION 3 - DESIGN CRITERIA NARRATIVE**

**3.4 Sustainability Narrative**

Per Table 3.C, the Project must be designed, built, and commissioned in compliance with the San Francisco Municipal Green Building Code (Environment Code Chapter 7) and must achieve a LEED Gold certification (minimum). The following are sustainability strategies that the SFMTA looks favorably on, in addition to all applicable code requirements:

- Innovative and creative storm water management that does not result in square footage loss
- On-site rainwater harvesting and reuse
- Solar panel or other on-site generation
- Commissioning and enhanced energy performance
- Wastewater recycling

In addition, District Utility Systems shall be evaluated as part of the Project’s sustainability strategy, so long as a District Utility model could maintain the SFMTA’s security and emergency backup power requirements. See Division 4 (*Supplementary Design Criteria*) of the Technical Requirements.

**San Francisco Green Code Mandates:**

- Indoor water use reduction
- Construction waste management
- Commissioning
- Storm water management
- Energy performance
- Temporary ventilation and IAQ management during construction
- Low-emitting materials (low VOCs)

**Cal Green Mandates:**

- Light pollution reduction
- No halons in HVAC, refrigeration and/or fire suppression equipment electric vehicle charging.

**3.4.1 Materials**

**Mass walls:**

- Structural concrete walls are beneficial for tempering the temperature fluctuations throughout the day. Reduce mechanical cooling during daytime hours and containing/ emitting heat during cold nights.

**Construction Materials:**

- Select materials and products that minimize resources used, are locally available and produced.
- Use recycled content in all carpet, tile, millwork, and ceiling finishes.
- Use recycled content in all CMU, concrete, and steel structure components.
- During construction phase, divert construction waste from landfill, collect paper, glass, plastic, cardboard, metal, and batteries on site to be recycled.
- Use low VOC emitting paint, coatings, adhesives, flooring, composite wood, and ceiling/wall/thermal/acoustic insulation.
- Use of high fly ash content in concrete
- Use modular furniture systems
- Use certified wood and comply with Chapter 8 of the San Francisco Environment Code.

**Proximity:**

- Use locally harvested and manufacturer materials.
- Plan for Future Use:
  - ✓ Conduct life cycle cost analysis.
  - ✓ Ensure programmatic functionality.

**3.4.2 Water**

**Indoor Water Use Reduction and Grey Water Treatment:**

- In addition to low flow fixtures and rainwater storage, explore the use of gray water treatment and reuse.
- Grey water from lavatories and showers can be treated and used as flush water and/or irrigation water to further reduce the potable water required on site.

**Wash Water Recycling System:**

- Conserves water and reduces wastewater effluent.

**Water Metering:**

- Install sub-meters on systems that have the potential for large consumption (vehicle wash system, irrigation, heating and cooling systems, etc.)

**3.4.3 Energy Efficiency**

**Demand Control Ventilation – CO2 Monitoring:**

- Provide CO2 sensors to be used in densely populated spaces to eliminate over-ventilation and energy waste.

**Air Side Economizers:**

- Economizers shall be incorporated with HVAC units to provide free cooling to the spaces when outdoor conditions permit.

**Reduce Fan Operating Pressure:**

- Select coils and filters with the intent to reduce overall pressure and fan energy. Coils and filters shall be sized for face velocities no greater than 600 fpm. Ductwork pressure drops shall be sized no greater than 0.08 inches wg.

## SECTION 3 - DESIGN CRITERIA NARRATIVE

**High Efficiency Equipment:**

- Selected HVAC equipment shall provide the most efficient heating and cooling for the interior space.

**Improved Building Envelope:**

- Exterior walls and roof insulation value shall have an (R-value) above CALGreen minimum requirements.

**Commissioning:**

- Prior to occupancy, HVAC, plumbing, power, and lighting systems shall be commissioned to confirm operation is in accordance with the design intent.

## 3.4.4 Site/Building

**Water:**

- Stormwater Management
  - ✓ Pre-treat stormwater water to draw out pollutants, reduce peak flow and recharge groundwater.
- Water Conservation
  - ✓ Apply San Francisco standards and best practices where applicable on the site.
- Rainwater Harvesting
  - ✓ Determine if rainwater harvesting, collection, and reuse is feasible on this site and what size cistern is appropriate.

**Vegetation:**

- Sustainable Planting Design
  - ✓ Plant trees for shade over paved surfaces to reduce heat island effect. Preserve trees where possible and plant native trees per LEED and San Francisco Bureau of Urban Forestry requirements.

**Site Lighting:**

- Avoid light pollution by selecting full cutoff fixtures, utilizing LED source for all site

lighting, lighting levels in full compliance with IES recommended lighting levels, by taking advantage of the LED drivers' ability for dimming, and occupancy sensors to reduce lighting levels whenever the site is not fully utilized.

**Health and Well-being:**

- Design for physical activity
  - ✓ Design for physical activity and health of employees workout in the Facility by providing a room and access to planned greenspace.
- Design for optimal social interaction and community engagement.
  - ✓ Provide outdoor and indoor space for employee meals and other activities.
- Wayfinding
  - ✓ Provide clear wayfinding that utilizes multiple best practices to direct employees and the public around the site as appropriate.

**Alternative Transportation:**

- Ensure unhindered access to public transportation.
- Provide bicycle storage/changing rooms.

**Pollution Prevention:**

- Create and implement an erosion and sedimentation control (ESC) plan.
- Filter storm water run-off with an oil/water separator.
- Plan for 100 percent on-site storm water detention, if possible.

**Noise and Vibration:**

- This Facility will be operated year-round, 24 hours a day, 7 days a week. Proper public nuisance notification and sound abatement needs shall be addressed in the design.

Details of the noise and vibration performance criteria are presented in a supplemental document in Division 4 (*Supplementary Design Criteria*) of the Technical Requirements.

**Public Right-of-Way Improvements:**

- The criteria below require consultation with certain City departments in their regulatory capacity. Reference Appendix I: SDAT Review Letter 1.19.2023 (For Reference).

**Curb Extensions (Bulb-Outs):**

- Design bulb-outs at each street corner adjacent to the Project Site, if feasible, to slow turning vehicles and shorten crossing distances while allowing buses and emergency vehicles to safely turn without entering into the opposite travel lane.
- Design bulb-out to ensure bulb-outs curb returns are sweepable with standard City street sweeper equipment and don't compromise the street's capacity for conveying stormwater during storm events.

**Accessible Curb Ramps and Accessibility Requirements:**

- Design accessible pedestrian ramps at all street corners with existing curb ramps at receiving ramps at the opposite end of the crosswalk, including the midblock along Mariposa Street at York Street.

**Loading Zones:**

- Design appropriate accessible passenger and commercial loading zones based on a loading needs analysis and a loading operations plan regarding both off-street and on-street loading operations.

## SECTION 3 - DESIGN CRITERIA NARRATIVE

**Street Trees:**

- Provide street trees along all frontages but avoid placement of trees within 25 feet of the corner property line on approach to enhance pedestrian visibility and safety.

**Street and Pedestrian Lighting:**

- Ensure appropriate illumination levels by upgrading existing or installing new street and pedestrian lighting based on photometric studies.
- Orient streetlights to protect night skies and use energy efficient luminaries.

**Electrical Transformers:**

- Ensure location of transformer room is accessible to the electrical power utility (PG&E and SFPUC) from the public right-of way.
- Ensure location of new underground electrical vaults within the sidewalk does not cause the loss of mature street trees, if feasible.

**Waste Collection:**

- Locate waste collection areas within the Facility based on a trash loading and removal strategy that has been coordinate and reviewed by the waste collection service provider.

**Citywide Bicycle Network / Vision Zero / 17th Street Frontage:**

- Provide a safer active transportation route for employees to get to and from the Facility by providing protected bike lanes on each side of 17th Street which is part of the Mission to Peaks Route of the City's Green Connection Network.
- Provide safe access between the Facility and Franklin Square by providing a Rectangular Rapid Flash Beacon in each direction at the crosswalk on 17th Street at Hampshire.

## 3.4.5 Efficiency and Quality of Operations

**Minimum Performance:**

- Prohibit smoking in the building and locate designated areas 25 feet from entries to comply with code and enhance employee and visitor health.

**Construction Management:**

- Protect stored on-site or installed absorptive materials from moisture damage
- Replace all filtration media prior to occupancy
- Perform building flush-out (14,000 or 3,500 cubic feet) prior to occupancy

**Low emitting materials:**

- Low VOC Adhesives/ sealants, paints, carpet, and composite wood
- Comply with Green seal standard for commercial adhesives
- Anti-corrosive and anti-rust low VOC paints
- No use of urea-formaldehyde resins in laminating adhesives

**Plan for Flexibility:**

- Include flex shop space.
- Create appealing public and private spaces.
- Circulation shall be function and equipment driven.

**Parts Storage System:**

- Optimally utilize the volume of space, minimizing the building area footprint.

## 3.4.6 Electrical

**Power Monitoring for Possible Load Shed:**

- Service feeder main and all sub-distribution switchboard feeder breakers shall include power digital meters for centralized digital remote monitoring of the building's energy usage for trending analysis and management.

**Natural Lighting:**

- Daylight harvesting shall be utilized where possible to provide a better working environment by introducing natural light within the work place.

**On-Site Generation and Storage:**

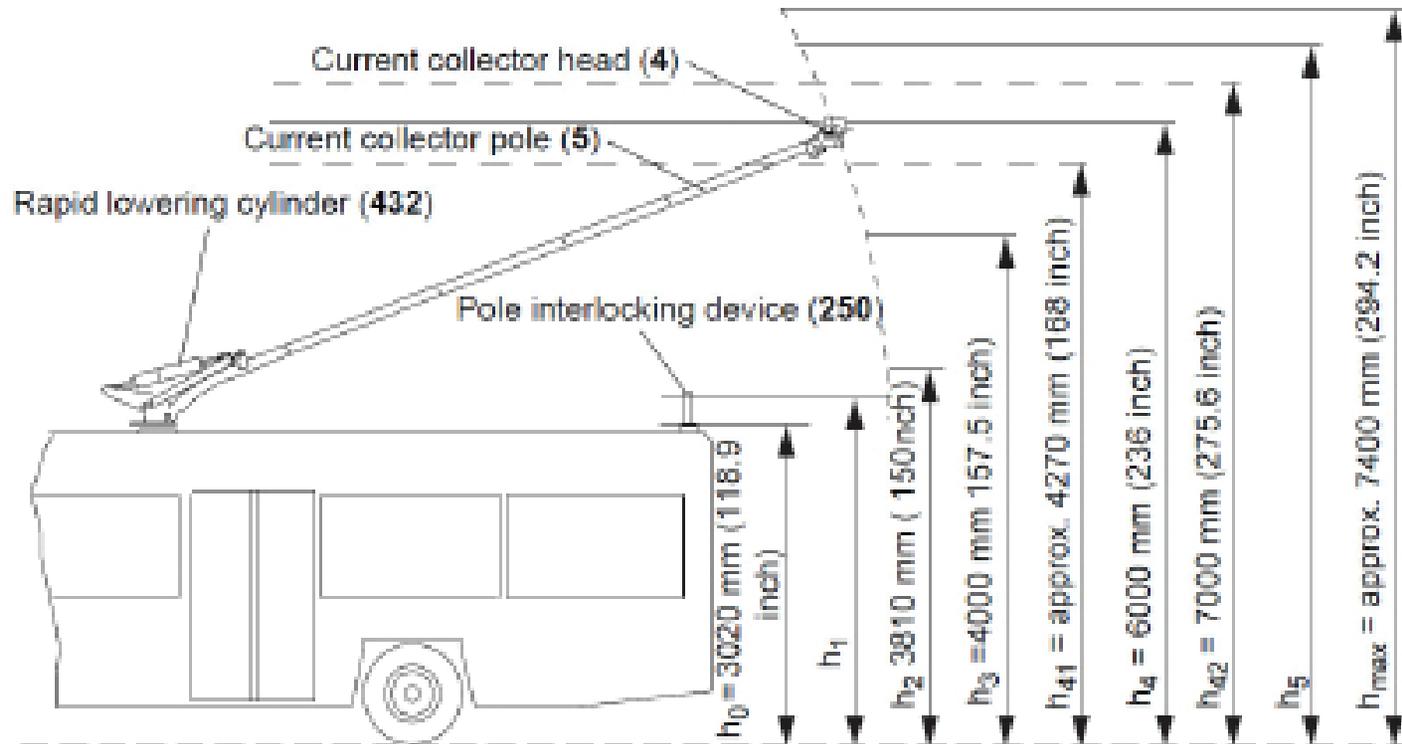

- Include on-site energy generation and storage where possible, including solar panels and battery systems, to assist in overall building electrical demand and/or backup power.

## 3.5 Architectural Narrative

The Project will be a mixed-use, joint development consisting of a bus garage and maintenance facility (the Bus Yard Component) and multiple levels of joint development (the Housing and Commercial Component). In addition, the Common Infrastructure is the collection of elements of the Facility that are shared by the Bus Yard and Housing and Commercial Components. The Bus Yard Component is intended to service, maintain, and store a fleet of 40- and 60-foot buses. It consists of a main building that will house separate operations and training facilities, service and inspection bays, bus washes, bus parking, and the associated ancillary and office facilities.

The Potrero Yard bus garage will have three-levels accessible by a scissor express ramp structure for vehicular circulation. Each of the floor plans have areas designated for vehicle parking, service, and maintenance spaces to accommodate 40- and 60-foot trolley buses and future battery electric buses. A bypass ramp at grade will allow buses to enter the facility from Mariposa Street. Provide bypass access to travel directly to the bus parking spaces.

OCS TROLLEY HEIGHT DIAGRAM

## SECTION 3 - DESIGN CRITERIA NARRATIVE

## 3.6 OCS - Trolley

The Bus facility shall be designed and future-proofed to enable Paratransit development on the podium roof. The bus ramps shall be extend one additional level to access the transit facility roof. Paratransit vehicles (cutaway buses and vans) will use the same entry, ramps, and exits as the 40- and 60-foot-long buses and non-revenue vehicles should MTA decide to provide Paratransit vehicles. PPC shall design building a structural systems to allow extension of the ramp in the future. Reference Appendix G (Design Criteria Paratransit) for Paratransit program and design requirements.

Pigeon abatement is a major concern. Numerous abatement measures, including bird repellent and spikes, bird wire, bird netting, shock flex tracks, lodge design, bird coils, moving owl, and ultrasonic electric devices can be used.

The new Potrero Yard shall comply with the San Francisco Green Building Code requirements. The building shall meet US Green Council (USGBC) and Leadership in Energy and Environmental Design (LEED) requirements, and obtain GOLD certification. In addition, new construction will have electrical infrastructure capable of supplying electricity for electric vehicle charging at 100 percent of new non-revenue vehicle parking spaces. Refer to Division 5 (*Battery-Electric Bus Supplemental Criteria*) of the Technical Requirements for detailed discussion of BEB power needs.

The materials used in the construction of the Potrero Yard Facility shall be attractive and, durable inside and outside the building, complement the context/environment around the site and neighborhood, and meet the design standards of SF Planning and the San Francisco Arts Commission<sup>5</sup>. Reference the Project Design Guidelines for facade, glazing, etc.

Poling and de-poling will happen within the Facility per PNC conceptual design in the recent final 100% SD documents. As the trolley buses enter the Facility, they will transition off-wire to navigate through. Once the trolley bus is parked in a bus parking stall, OCS must be provided above for on-wire connection while stored. When leaving the parking stall, the trolley bus will go off-wire again to navigate through the Facility. Once through the exit of the Facility, the trolley bus will connect back to the wire. OCS wire shall also be provided in all repair bays except the preventive maintenance bays for needed power during maintenance. The mechanism for disconnecting from the right-of-way OCS to the facility (pull-in), as well as back onto the right-of-way OCS from the facility (pull-out), shall be carefully considered by the Project Team and proposed through the Bus Facility Technical Proposal.

Shoe replacement will take place just after the trolley bus enters the Facility at the Meet and Greet area. There shall be access to the roof of the vehicles; via a three-axis lift, elevated platform, or any equal means of access for an employee to be able to safely access the shoes on top of the trolley buses.

Appendix B to this document is the SFMTA's OCS Design Criteria document. For this project, the Project Team shall focus on the first section of the document for relevant OCS requirements. Much of the information in the later sections of Appendix B should be interpreted as reference information. See room data sheets for illustration of OCS in applicable spaces. See also the Traction Power section of this document for information on the electrical connection for the trolley OCS network.

Deviation from OCS criteria, such as use of overhead charging pans in the maintenance bays, or non-tension wire in the parking stalls, is acceptable if full functionality is met. This deviation must be considered through the Alternative Technical Concept process. During construction, the Project Team must work closely with the SFMTA's Transit Division to accept all design drawings, and Muni Construction Support for all right of way work and relevant Clearance Permits.

Trolley pole system inspection and maintenance to be conducted in the Preventative Maintenance (PM) Bays. See diagram below and PM Bay room data sheet for requirements.

## 3.7 Site

The current Potrero Yard, located on a city block bound by Mariposa Street to the south, 17th Street to the north, Hampshire Street to the east, and Bryant Street to the west, sits at the edge of the Mission District and Potrero Hill.

The current site is rectangular in plan and measures approximately 480 feet east to west by 400 feet north to south. On the east side of the site, an approximately 215-foot wide building extends length-ways from the northern site boundary to within 30-feet of the southern boundary. The remaining western portion of the site is occupied by an asphalt and Portland cement concrete (PCC) paved electrified-bus parking area at ground-level.

<sup>5</sup> Please see the adopted Urban Design Guidelines for the City and County of San Francisco at <[http://default.sfplanning.org/plans-and-programs/planning-for-the-city/Urban-Design-Guidelines/Urban\\_Design\\_Guidelines.pdf](http://default.sfplanning.org/plans-and-programs/planning-for-the-city/Urban-Design-Guidelines/Urban_Design_Guidelines.pdf)>.

## SECTION 3 - DESIGN CRITERIA NARRATIVE

The ground-level parking area features numerous ancillary facilities and overhead catenary system (OCS) support poles, guy wires, and live electrical lines. A bus wash station occupies the north central area of the lot and a trash compactor facility occupies the northwest corner of the lot. Access to the ground-level parking area is by an entrance on Mariposa Street.

The ground-level parking area slopes gradually from approximately elevation +54 foot SF-VD13 in the northeast corner to elevation +48 foot SF-VD13 in the southwest corner. The relatively level site has been created by cutting a bench into the natural slope. As a result, along the northern boundary of the site, the elevation of 17th Street is between 10 feet and 23 feet higher than site grade. This difference reduces along the eastern and western boundaries of the site, along Hampshire Street and Bryant Street, respectively, such that Mariposa Street at the southern boundary is at the same grade as the parking area.

The differences in elevation between the site and surrounding streets are accommodated by reinforced concrete retaining walls along the western portion of 17th Street and along Bryant Street, and by integral retaining walls within the building along the eastern portion of 17th Street and along Hampshire Street.

The existing building on the site is predominantly a single-story structure housing a maintenance garage at grade (at Mariposa Street level). The garage area features vehicle service pits for maintenance access to the underside of the buses.

## 3.8 Structural Narrative

The Potrero Yard project will require several considerations in the appropriate selection of a structural system given, among other things, the long spans of the Bus Yard Component and the load requirements for the Housing and Commercial Component above.

Additional geotechnical investigations by PPC are required to inform PPC's structural design for the Project. For the Reference Concept Design, the SFMTA commissioned ARUP/RYCG to perform a preliminary geotechnical analysis for the Project.

## 3.8.1 Structural Summary

This section summarizes the project's structural design standards and outlines the approach for the new structure at the site, with an eye toward earthquake resilience. This approach is developed to provide consistency in design between the existing and new structures throughout the Facility. Items included within this section are Structural design criteria, code analysis, materials, earthquake resilience, and PPC's Geotechnical Baseline Report (see Appendix J).

The concept plan for the rebuild of Potrero Yard involves the demolition of the existing building and all existing utilities serving the existing facilities (including the building, bus wash, and any others) must be demolished, removed, and capped in place unless otherwise noted on the site<sup>6</sup> and the construction of a three-level bus storage and maintenance facility. The maintenance facility will feature vehicle service pits formed by shallow excavations below current site grades and a basement to serve the Facility.

PPC shall accept existing site perimeter retaining walls in their current condition and is responsible for any required due diligence or site investigation required to inform their design and construction. As-built drawings are provided by the City for information only and shall not be relied upon. Shall any existing retaining walls remain in place or be incorporated in the PPC's design, the PPC shall demonstrate suitability and viability of the existing retaining walls and ensure the future design life is commensurate with the new construction.

Design and construction associated with temporary or permanent retaining structures, including the removal, partial re-use or re-use of the existing perimeter walls, shall adequately consider impacts on adjacent property. These include, but are not limited to impacts on:

- Temporary stability
- Temporary street closures and permitting required for proposed works, including impact on MUNI operations
- Buried and overhead utilities
- MUNI lines
- Pavements
- Groundwater levels
- Any other structure, building or utility that may be affected

<sup>6</sup>See Section 4.7.1 for a discussion of the preservation of the façade of the existing Potrero Yard Car House.

**SECTION 3 - DESIGN CRITERIA NARRATIVE**

Ground movements associated with any basement or retaining structure design, including removal, partial re-use or re-use of the existing walls, shall be evaluated. Impact assessments shall be carried out for all structures, buildings, and utilities within movement zone of influence.

The PPC shall be responsible for obtaining any permits and/or easements necessary to perform work outside of the property line, should this be required to complete the reinforcement and/or reconstruction of perimeter retaining walls.

For the Reference Design Concept, a post-tensioned, cast-in-place concrete beam and slab system with concrete shear walls for resisting lateral loads was considered an appropriate design solution; however, this does not preclude alternative solutions such as structural steel framing. In areas that may be accessible to buses, all columns shall be painted yellow and protected by bollards or other means to minimize the risk of damage from vehicle collisions.

**3.8.2 Seismic Resilience**

The desired resilience performance criteria for the Facility in the event of a major earthquake is required for the design of its structural system and other building systems. Details of the resilience performance criteria are presented in a supplemental document in Division 4 (*Supplementary Design Criteria*) of the Technical Requirements.

**3.8.3 General Structural Approach**

The structural design shall be closely coordinated with all other disciplines to ensure that structures perform to their intended purpose over 99 years. The structural design shall incorporate the following principles,

in addition to meeting all applicable code requirements:

- **Strength:** Structures will have adequate strength to support their own weight and the weight of all equipment and vehicles and resist all anticipated gravity and lateral forces.
- **Serviceability:** Structures will be designed to meet day-to-day user needs and be highly functional over their intended service life. Serviceability considerations include:
  - ✓ Floor stiffness to minimize adverse vibration effects to equipment and floors
  - ✓ Durability of structures to resist effects of temperature variation, weather exposure, shrinkage, in-service use, chemical exposure, and corrosion
  - ✓ Resistance to groundwater infiltration and structure buoyancy in high groundwater conditions
- **Load Path:** A clear and identifiable load path will be provided for all gravity and lateral forces to be resolved into the foundations.
- **Constructability:** Structures shall also be designed with consideration given to current construction practices, including items such as:
  - ✓ Placement of formwork
  - ✓ Placement of reinforcing and concrete
  - ✓ Placement of deep foundations, such as driven piles, drilled concrete piers, etc.
  - ✓ Construction joints
  - ✓ Efficient use of materials
  - ✓ Limiting use of field fabrication & welding
  - ✓ Site constraints and existing building structures
  - ✓ Cold and hot weather construction

- **Code Compliance:** Structures will comply with all applicable codes, as described further into this document.

**3.8.4 Foundations**

Shallow foundations bearing on the weathered rock in Zone 1<sup>7</sup> may be possible; however, shallow foundations bearing on the near surface Clayey Sand unit in Zones 2, 3, and 4 are ruled out to avoid excessive differential settlement. Deep foundation solutions are therefore required to transfer building loads to the dense sand layer and the underlying weathered rock in these zones. Deep foundation options identified as suitable for this site include:

- Driven steel H-piles
  - Continuous flight auger (CFA) piles (also referred to as auger-cast-in-place or auger-pressure grouted piles)
  - Concrete-filled steel pipe (CFSP) piles installed with proprietary tips
- The length of the deep foundations/piles/piers will vary with the depth rock profile. Additional information about foundation can be found in PPC's Geotechnical Baseline Report.

<sup>7</sup>Please see PPC's Geotechnical Baseline Report for a full explanation of the composition and location of Zones 1-4.

## SECTION 3 - DESIGN CRITERIA NARRATIVE

**3.8.5 Structural Design Loads**

Loads used in the structural design are noted in Table 4.D, except as further defined in the following sub-sections.

**3.8.5.1 Load Criteria for Suspended Structure Supporting Buses**

To allow for future programming flexibility, the criteria specified in this section shall apply to all suspended floor structures accessible to and having sufficient ceiling heights for buses.

This loading shall apply as a minimum. During the PDA phase, the PPC shall work with SFMTA to confirm the live load criteria that may be specific to the types of buses envisaged in the future for this Facility.

**Floor Live Loads for the Bus Yard Component:**

- For strength considerations, the vehicle live load cases given in AASHTO shall be used. These load cases shall be applied utilizing ASCE7 load combinations and without AASHTO dynamic impact factors. The live load cases shall include concentrated loads considering the AASHTO design truck. Partition loading need not be combined with these loads.

Deflection shall also be checked under live loading. These checks shall utilize the AASHTO live load configurations for deflections, and shall meet deflection criteria as set out by the California Building Code.

These loads shall not be reduced based on supported tributary area. This applies to floor structure and columns supporting a single floor as well as multiple floors containing buses. Live load reductions may be taken as permitted by the code for other types of live load where a structural component supports those types of load in addition to bus loading.

**Seismic Mass:**

- Seismic mass for floors supporting buses shall be derived from the weights of structure and permanent non-structural components in addition to a uniform load associated with the weight of empty parked buses. That load shall be taken as 100 psf. Accidental eccentricity of the mass as required by ASCE7 shall also apply to this load.

**3.8.5.2 Structural Design Criteria for Podium Lid**

The structure supporting the Housing and Commercial Component over the top of the Bus Yard Component is subject to considerations which are unique to this Project. These considerations are described in this section. In this section the structure of the Bus Yard Component is termed the “podium,” and the horizontal structure supporting the Housing and Commercial Component over the Bus Yard Component is termed the “podium lid.” The podium lid is considered to be part of the Common Infrastructure.

**Transfer Structures:**

- It is likely that the column grids for the Housing and Commercial Component and Bus Yard Component will not fully align, and that transfer structures will be required at the podium lid. The following criteria shall be met for such structures.

Vertical seismic accelerations shall be included in all load combinations involving seismic loading for transfer structures. Vertical seismic accelerations shall be derived from a site-specific vertical response spectrum or from ASCE 7 Section 11.9. The transfer structure shall remain elastic under this loading. Reinforcing steel in concrete transfer structures shall also remain below the yield stress.

Transfer structures that support columns which are part of the lateral force resisting

system for the structure above the podium are discouraged. If such transfers are unavoidable, they shall be designed to resist overturning forces based on the capacity of the supported seismic system using expected material properties as defined by ASCE 41, in addition to gravity loading and vertical seismic accelerations. In addition, the flexibility of transfer structures shall be considered in evaluating the seismic behavior of the structure above.

Live load deflection in the residential structure shall include the cumulative deflection due to all live loads supported by the transfer structure, including permitted live load reductions. This deflection shall not exceed  $\frac{3}{4}$ ” for the building interior and  $\frac{1}{2}$ ” at the building perimeter. Levelness and flatness requirements for floors supported by transfer structures shall consider deflections locked into the structure due to the construction sequence.

Transfer structures shall not support areas which are accessible to buses.

**Water-Tightness Considerations:**

- For portions of the podium lid that are subject to exterior exposure, special consideration shall be given to water-tightness in order to protect the operations of the Bus Yard Component and the Common Infrastructure. Three levels of protection shall be incorporated: (1) a watertight barrier shall be provided on top of the structure, (2) the structural concrete mix shall be specified for low permeability, and (3) the structural design shall minimize cracking. The latter two requirements are described below in more detail.

## SECTION 3 - DESIGN CRITERIA NARRATIVE

The concrete mix design shall incorporate the following requirements:

- ✓ The mix shall be proportioned to meet or exceed requirements for exposure category "W1" as defined by ACI 318.
- ✓ The mix shall have a shrinkage limit of 0.045%. Shrinkage testing shall be conducted on the trial mix and also on field cured specimens extracted from each truck at the point of delivery.

The podium lid structural design shall additionally include the following:

- ✓ Minimum temperature reinforcement area shall be 0.60% of the slab cross section.
- ✓ Spacing of control joints shall not exceed 20 feet. The maximum dimension of a concrete pour shall not exceed 120 feet.
- ✓ Waterstops shall be provided at contraction joints.
- ✓ Crack widths under service loading shall be calculated for the top surface of the slab and shall not exceed 0.012 inches.

**SECTION 3 - DESIGN CRITERIA NARRATIVE**

**3.8.6 Applicable Code & Referenced Standards**

The design of structural engineering systems for the Project shall be in accordance with the laws and regulations of the State of California, City and County of San Francisco ordinances, and industry standards, except where more stringent standards are given in this document. In cases where conflicts between the cited documents exist, requirements of the more conservative document will be used.

**TABLE 3.E - STRUCTURAL APPLICABLE CODES**

Governing Agency	City and County of San Francisco, CA
Agency Contact	<a href="https://sfdbi.org/">https://sfdbi.org/</a>
Adopted Building Code	International Building Code 2015 (IBC 2015)
Loads	ASCE 7-16
Concrete and other structures	ACI 318-14
Specifications for Structural Concrete for Buildings	ACI 301-99
Structural Steel	AISC Manual of Steel Construction, 14th Edition
Specification for Structural Joints Using	ASTM A325 or A490 Bolts
Masonry	ACI 530-08/ ACI 530.1-08
Aluminum	Aluminum Design Manual ADM 1-05
Wood	ANSI/AWC NDS-2015
Light Gauge Steel Framing	AISI D100-08, AISI S1000-07
California Building Standards Commission	California Building Code (CBC), Latest Edition
Code of Standard Practice for Steel Buildings and Bridges Design, Manufacture, and Installation of Concrete Piles	ACI 543R-00

## SECTION 3 - DESIGN CRITERIA NARRATIVE

## 3.9 Mechanical Narrative

**General HVAC:**

All HVAC design shall be in compliance with applicable codes and standards (including but limited to): California Building, Mechanical and Fire Codes, with local amendments; NFPA 30A, 75, 88A, 90A, 90B and 91; ASHRAE 1, 21, 52.2, 55, 62.1, 90.1, 111, 135 and 189.1.

The use of combustion-fired equipment (including natural gas, liquid propane gas and fuel oil) is strictly prohibited.

Supply, exhaust, and return ducts shall be designed with a maximum of 0.08-inch water gauge static pressure drop per 100 feet of duct. Supply ductwork serving mechanical air conditioning shall be insulated. Exposed ductwork shall be round or oval, uninsulated and suitable for painting.

Transmission mechanisms of SARS-CoV-2 (COVID-19) are not fully understood and there is evidence for an airborne route to be considered, as the virus remains viable in aerosols for at least 3 hours and that mask usage was the best intervention to prevent infection. Heating, Ventilation and Air Conditioning Systems (HVAC) are used as a primary infection disease control measure. However, if not correctly used, they may contribute to the transmission/spreading of airborne diseases as proposed in the past for SARS. Ventilation and filtration provided by heating, ventilating, and air-conditioning systems can reduce the airborne concentration of COVID-19 and thus the risk of transmission through the air. All ducted supply air systems shall be equipped with MERV-8 pre-filter and 4-inch MERV-13 final filter.

Seismic-restraint systems shall comply with CBC requirements. See Section 4.8.1 for seismic resilience requirements.

## 3.9.1 Mechanical Sustainable Design Systems

Sustainable design requirements and best practices shall be complied with, adopted, and implemented where such requirements are promoted by the United States Green Building Council (USGBC), as defined under the published LEED Standards. The Project must conform to LEED Gold Standards. Code required restrictions placed on the use and quantities of toxic and/or environmentally deleterious substances such as Volatile Organic Compounds, (VOCs), that are components in certain sealants and construction materials, and on the use of HCFC refrigerants in HVAC systems, are specific examples of applicability of such sustainable-based Code design requirements. An energy model will be required based on performance approach to confirm compliance with CALGreen/Title 24 and LEED requirements. LEED credit EAc2 Optimize Energy Performance shall achieve a minimum of 12 points. LEED credit EAc5 Renewable Energy v4.1 shall achieve a minimum of 3 points.

Heating and cooling load calculations for the industrial areas shall be performed in accordance with LEED, CALGreen, and Climate Zone 3. The design of the mechanical ventilation systems, heating systems and cooling systems must comply with the respective requirements of the California Mechanical Code (CMC), ASHRAE Standards of Indoor Air Quality and Thermal Comfort, and CALGreen/Title 24 where applicable.

## 3.9.2 Operations Areas

The operations portion, as described in the Space Needs Program, any space needed for operators of the Facility shall be climate controlled by heating and air conditioning capabilities. No more than three offices per thermostat. Ventilation shall be in accordance with ASHRAE 62.1. Exhaust fans must be provided for locker rooms, restrooms, kitchen/break rooms and janitorial areas. A minimum of 1/2 to 1.0 CFM per sf exhaust is recommended for these types of spaces.

## 3.9.3 Maintenance Parking Areas

Filtered and heated ventilation supply air distribution system, plus exhaust, is required to serve the maintenance and vehicle parking areas. Vehicle maintenance and enclosed parking areas must comply with California Fire Code (CFC), California Mechanical Code (CMC) Table 403.7 and NFPA.

## 3.9.4 Building Temperature Controls

Direct digital controls (DDC) and Energy Management Control System (EMCS) are required to comply with CalGreen/Title 24, §102.2, Article 4.5.1. All new DDC/EMCS systems must be able to interface with existing Trane BACNet system or Daikin's VRV/VRS controls.

EMCS shall incorporate integrated hardware and software designed to: perform data acquisition, monitor alarms, provide exception reporting, automate controls, and produce historical records of the buildings or the site.

EMCS shall maintain zone comfort, access the system locally (for each building) and centrally (for the entire site, campus, or portfolio) at the same time, to monitor local and remote alarm systems, and provide graphical

## SECTION 3 - DESIGN CRITERIA NARRATIVE

system displays, graphical analyses, and energy-use summary reports customized to the facility's operations. In addition, the EMCS shall ensure the operation of each buildings' HVAC, domestic hot water, fire alarm, security and lighting systems. The EMCS shall evaluate the energy characteristics of the HVAC, domestic hot water and lighting system and validate that cost reductions are, in fact, being achieved.

**3.10 Plumbing Systems**

Domestic and fire protection water shall be provided to the building from a water line extended from the site service connection. A strainer, lead-free reduced pressure backflow and utility grade remote reading water meter must be provided on domestic water lines serving the building. The backflow relief shall discharge outside of the building. Pipe sizing inside of the Facility shall comply with the requirements in the California Plumbing Code (CPC) and a maximum system piping loss to provide a 10 percent pressure safety factor at full system flow. Velocities within any main or branch of the piping shall not exceed 7-feet per second (FPS). Interior domestic water piping above grade will be Type L copper with copper solder- or pressure-sealed joints. All buried domestic water pipe below slab shall be protected with 20 mil polyethylene tape and pipe sleeve at slab penetration.

The supply line to each item of equipment or fixture must be able to be isolated for repair and maintenance without interfering with the operations of other equipment or fixtures. Water hammer arrestors will be in an accessible location on the domestic water piping system where shock pressures could occur. Water hammer arrestors will be PDI-WH 201 certified.

A high efficiency domestic water heating system will be provided with hot water

recirculation. Per CALGreen/Title 24 standards, a recirculation pump with timer are required to provide sufficient hot water throughout the facility. A thermostatic mixing valve will be installed on hot water systems. Domestic hot water system to be provided with thermal expansion tank, and re-circulating pump, for hot water return system. All hot water piping shall be insulated. The use of combustion-fired equipment is prohibited. High-efficiency, low-flow plumbing fixtures will be employed throughout the building to meet current CALGreen/Title 24 standards. ADA-compliant electric water coolers and toilet room fixtures will be incorporated.

Water closets will be low flow, vitreous china, siphon jet, 1.28 gallon per flush (GPF) maximum; commercial seat with self-sustaining check hinge. Utilize ultra-low flow vitreous urinals (0.125 GPF).

Lavatories will be under-counter or wall-hung mounting, with deck mounted, hydraulic powered, 0.35 GPM infrared faucets, with sensor under spout.

The floor mounted mop basin will be molded stone with wall-mounted chrome-plated service sink faucet with vacuum breaker; ADA compliant handles with maximum flow rate of 2.0 GPM. Break (coffee) and kitchen area sinks will be stainless steel.

A gravity sanitary lateral will handle all levels, except the basement. The basement will have a sewage ejection system consisting of a sump tank, duplex ejector pumps and pits sized to unit pump to a maximum of six starts per hour. Ejector pumps will be connected to standby power. Sanitary waste will discharge to the street main.

All industrial waste, covered parking, deck drains, and site runoff will drain to an appropriately sized oil/water interceptor prior to connecting to the municipal sanitary system. The storm water system will consist of area drains, roof drains and over-flow drains. Reclaimed water will be used for landscaping at new City facilities, as required per the San Francisco Green Building Code Amendments and GS6 Form for municipal projects.

**3.11 Fire Protection Systems**

The PPC shall comply with all requirements and criteria (for safety, security, and reliability) to design, furnish, and install a complete and integrated fire protection system. The hazard and coverage requirements for fire protection systems shall be established in conjunction with the City and Authority Having Jurisdiction (AHJ). Provide fire suppression systems in compliance with San Francisco Building Code, San Francisco Fire Code, NFPA 13, 14, 30A, and 88A. Emergency Responder radio signal shall cover the entire Facility, in compliance with the San Francisco fire code. The need for a fire pump will be determined by the fire suppression designed and available fire water pressure in the existing system.

Electric bus technology is rapidly evolving. The battery chemistries that will be deployed in a future battery electric fleet are unknown. The fire risk and corresponding fire suppression strategies for various lithium ion battery chemistries vary greatly. To ensure that robust fire suppression strategies are in place, the design team responsible for the detailed design of the Facility must include a fire protection engineer, licensed in the state of California, with applicable experience. Furthermore, the design team must coordinate with the SFMTA's fleet engineering division to determine the likely

## SECTION 3 - DESIGN CRITERIA NARRATIVE

composition of the future battery electric fleet, including battery chemistry, capacity, suppliers, size, and charging stations.

For the Bus Yard Component and the Common Infrastructure, a risk analysis shall be conducted to demonstrate to the satisfaction of the City that the required active and passive fire protection systems can be expected to provide a level of performance equivalent to that envisioned by regulatory requirements. For areas where buses are garaged, the number of buses assumed to be involved in a fire scenario shall be rationally justified. The risk analysis shall include the basis for assumptions about fire growth, fire spread amongst buses, and fire department response time. It shall also consider performance of active and passive fire protection systems with respect to a fire scenario which may exceed traditional material performance testing criteria.

The fire protection experts on the detailed design team will be responsible for devising a robust fire protection system for the Facility that minimizes risk to the Housing and Commercial Component. Their review and recommendations will include, but not be limited to, the location, ventilation, and fire suppression systems for the Bus Yard Component and the Common Infrastructure, as well as for the Housing and Commercial Component. Consistent with California Fire Code, Section 1206.2.11.3, minimum continuous ventilation in battery storage rooms shall be the greater of 1 CFM/SF or 150 CFM, and shall follow any additional guidelines within the California Building Code and California Mechanical Code. Current and potential future EV Charging Areas shall include provision for ventilation compliant with California Building Code Section 1202.2 and California Electrical Code Section 625.29. This requires ventilation by parking

space based on the type of charger serving the location. Ventilation requires proper supply and exhaust, which can be achieved through active supply ventilation or direct outdoor exhaust with passive intake.

The final design of the fire protection system shall be completed by a C-16 licensed fire protection contractor based on design criteria developed by the Principal Project Company's Fire Protection Engineer. The design criteria shall be informed by the risk analysis referred to above and by regulatory requirements. The system shall be hydraulically calculated. Sprinkler system occupancy hazard classification, minimum density and maximum sprinkler spacing and standpipe requirements shall be determined in concert with the AHJ. Street hydrant flow test data will need to be determined during the PDA phase.

### 3.12 Electrical

#### 3.12.1 Systems Overview

Basic electrical systems requirements for the Project include powering the mechanical systems, maintenance equipment, convenience receptacle power, interior and exterior lighting systems with controls, an addressable fire alarm system and to provide power to other utilization pieces of equipment through the Facility.

The electrical distribution system shall be set up to allow for charging of the future electric bus fleet and all electric non-revenue vehicles as shown in Table 2.E of Section 2 in the Space Needs Program.

#### 3.12.2 General Facility Requirements

As a municipal City department, the SFMTA partners with the San Francisco Public Utilities Commission (SFPUC) as electrical provider. The SFPUC operates Hetch Hetchy Power, a

Publicly Owned Utility. The SFPUC relies upon PG&E's transmission and distribution grid to serve its customers, for which PG&E receives a fee. This situation, with the lack of designated service territory boundaries between the two utilities, is unlike any other in the country, and greatly limits the SFPUC's visibility into PG&E's grid infrastructure and capacities. PG&E does not provide feeder capacities unless the SFPUC applies for service through the Wholesale Distribution Tariff (WDT), a costly process that requires up to three years for PG&E to perform a System Impact Study to determine the available new load capacity.

Under the WDT, each SFPUC customer intertie point is viewed by PG&E as a utility-to-utility connection. As such, PG&E applies the rules of the WDT to each SFPUC customer connection. Upon completion of the review, any grid or infrastructure upgrades required by PG&E are borne solely by the SFPUC customer.

In March 2021, SFMTA submitted two Wholesale Distribution Tariff (WDT) electrical service applications to the SFPUC. The first application ("Feeder 1") focused on the industrial uses intended for battery electric bus (BEB) charging loads, and the second application ("Feeder 2") focused on the mixed-use housing and retail loads and remaining BEB loads. Both applications and supporting materials were based on a total projected load predicated on the RDC. These two original electrical service applications are attached to this DCD in Appendix C, for reference.

In March 2023, PG&E issued to the project a System Impact Study (SIS) report in response to each of the two WDT service applications. In the time since the original applications were submitted in March 2021 and the SIS reports were issued, SFMTA has determined that the

## SECTION 3 - DESIGN CRITERIA NARRATIVE

transition to BEBs at the Potrero Yard Facility will be deferred to a later date no sooner than 2040 (reference Division 5 Battery-Electric Bus Supplemental Criteria). As a result, the project will proceed DocuSign Envelope ID: 580479DF-30FF-46C3-8388-378A8FFFE7A with one electrical service application for mixed-use that will serve all Project load demands required for the Bus Yard Component, Joint Development Alternative 1 Housing and Commercial Component, Joint Development Alternative 2 Paratransit Component, and Common Infrastructure (reference Division 1 General Provisions, Project Description).

The SIS report for the mixed-use service application is attached to this DCD in Appendix, for reference. While this SIS report reflects an assumed maximum net electrical load demand to be 7.8MW, PPC shall work with PG&E to ensure that the new electrical service enabled through the mixed-use service application provides for the total load demand for the Project and all of its components. To this end, PPC shall ensure that the total load demand for the Project falls within a capacity of 11MW as delivered through this new electrical service.

In the context of all Project load demands being served by one single 11MW electrical service, PPC shall implement the electrical system for the Bus Yard Component in anticipation of Joint Development Alternative 1 Housing and Commercial Component or Joint Development Alternative 2 Paratransit Component developed in future phases and not concurrent with the design and construction of the Bus Yard Component. Implementation of the electrical service infrastructure serving the Bus Yard Component shall be performed in a way that reasonably facilitates and is compatible with future construction phases to

design and build Joint Development Alternative 1 Housing and Commercial Component of Joint Development Alternative 2 Paratransit Component.

PPC shall make provisions for the portion of the total 11MW electrical service that provides DC traction power to the electric trolley buses to be able to be completely isolated from the rest of the Infrastructure Facility electrical distribution, so that SFMTA maintains operations, maintenance, metering, and functionality, with the ability to monitor, isolate, or de-energize at their sole discretion. Reference section 3.12.3 through 3.12.6 in the DCD for further explanation of salvaging and reconnecting the existing traction power feeder B-3 to power the electric trolley fleet in the new Facility.

The SIS report in Appendix H describes the anticipated off-site utility improvements required to be performed. PPC shall perform all work (design, traffic control, demolition, excavation, shoring, trenching, coordination with PG&E construction crews and inspectors, install new / modify existing utility vaults, install conduit, install new duct banks, soil and debris off haul, backfill, paving, sidewalk restoration) and obtain the necessary permits to enable PG&E's design provided in the final Service Agreement. PPC's scope of work will be finalized once PG&E produces and transmits the final service agreement to the project.

Power for the Facility will be 480V/277V, 3 phase, 4 wire, with solid neutral. All equipment with a large electrical load will be served at the highest voltage possible, 480V, 3 phase<sup>8</sup>. A transformer will step down the voltage to 480V.

Power requirements for battery-electric bus charging infrastructure are included in

Division 5 (*Battery-Electric Bus Supplemental Criteria*) of the Technical Requirements. The main electrical room shall be designed to accommodate switchgear and associated electrical equipment to handle the future BEB fleet charging.

The electrical distribution system will be segregated by the type of load; life safety, critical emergency, and optional emergency power loads. Loads shall also be separated by lighting, industrial, receptacle, and mechanical equipment. Provisions to monitor these load through meters shall not be initially installed; however, the design shall allow their installation in the future. An ATS shall be provided for each of the emergency systems provided for the facility. ATS's shall be provided with programmable testing, generator start-up, and connected to a building information system to monitor the status of the emergency system.

CALGreen receptacle control will be achieved by tying receptacle control devices into the lighting system control panel. The Lighting System occupancy sensors will be utilized to turn off 50 percent of the receptacles within a room when the room is not occupied.

Electrical charging for non-revenue vehicles shall be installed in compliance with Department of Building Inspection Form GS6: San Francisco Green Building Submittal Form for Municipal Projects. Initial panel boards in the vicinity of non-revenue vehicle parking, shall be provided with 20 % 40 Amp, 208V single phase spaces for future EV charging stations. Panelboard serving EV charging

<sup>8</sup> See Appendix C and Division 5 Battery-Electric Bus Supplemental Criteria for power needs for BEB fleet infrastructure.

**SECTION 3 - DESIGN CRITERIA NARRATIVE**

shall be a minimum 225 amp bus with a calculated demand load that will allow the future EV loading to be added to the panelboard. EV charging stations shall be installed per SF Environment Code requirements.

**3.12.3 SFMTA Traction Power Network**

The SFMTA's traction power network is comprised of 28 substations and 45 independent feeds, which together deliver Direct Current (DC) traction power to about 500 route miles of overhead catenary system and serve 3 different modes (electric trolley buses, historic streetcars, and light rail trains). The network delivers DC traction power at a nominal voltage of 650 VDC, and the SFMTA electric trolley bus vehicles are suited to run on that system. The total capacity of the traction power network is approximately 180 MW. The SFMTA's utility provider to this network is PG&E.

SFMTA electric power distribution network connects the DC output from various substations through power cables routed in underground duct banks to the overhead contact system.

**3.12.4 Potrero Yard Traction Power System**

The electric trolley buses at Potrero Yard are fed from the Bryant Street substation. One feeder circuit (Feeder B-3) is reserved specifically for electric trolley buses in the yard, and another feeder circuit (Feeder B-7) powers the OCS right-of-way ROW around the yard for service adjustments and transitions. The overall power system feeder diagram and individual diagrams for the on-site feeder and the feeder that circles the right-of-way of the yard are attached and can be found in Appendix D of this Design Criteria Document.

The SFMTA requires that the traction power

system be safely disconnected when the yard is demolished and that the new facility be reconnected to the traction power system to serve the overhead catenary powering and charging the vehicles in the yard and supporting the transition to revenue service in the right-of-way. This section provides relevant information to support that process.

Potrero yard will be expanding the number of electric trolley buses (ETB) stored there as a result of the delayed transition to a full replacement of ETB with battery charging electric buses. To accommodate this change and to ensure reliable power availability in the yard, electrical capacity to power the expanded ETB fleet will be provided by a combination of the reconnected and reconfigured existing traction power Feeder B-3 and utilizing a portion of the new 11 MW electrical service to be delivered through the WDT electrical service application process. The traction power distribution to be provided by the combination of this new traction power feeder distributed from the new 11 MW electric service and the existing Feeder B-3 shall be designed and installed so that the electric trolley bus load is divided approximately equally among these two power source feeders. Each feeder section shall be spatially continuous to minimize interface between the two feeder sections and to minimize areas that would require both feeders to have power switched off and be grounded in order to be made safe. A load rated disconnect switch shall be provided to allow for connection or isolation of the B-3 feeder and the new traction power feeder.

Similar to the new traction power feeder, PPC shall make provisions for the reconnected and reconfigured Feeder B-3 to be able to be completely isolated from the rest of the

Infrastructure Facility electrical distribution, so that SFMTA maintains operations, maintenance, metering, and functionality, with the ability to monitor, isolate, or de-energize at their sole discretion.

Appendix F contains security sensitive information that must follow the required processes and procedures set forth in Appendix F, for access to traction power related specifications.

**3.12.5 Isolating and Disconnecting the Traction Power System for Demolition**

Within the yard boundary, specifically for the feed serving the yard, the process for disconnecting the traction power feed is straightforward because the feeder circuit is dedicated to the yard. Standard process to rack out and lock the feeder, verify de-energization, and place protective ground is required. The PPC shall coordinate closely with the SFMTA on this process.

For work in the right-of-way around the yard, the circuit is a lot more widespread and will require a local isolation. Right-of-way work requires close coordination with the SFMTA. PPC shall submit each phase of design drawings for SFMTA review.

PPC is responsible for designing and performing all traction power disconnection and reconnection procedures, in close coordination with the SFMTA.

**3.12.6 Reconnecting the Traction Power System to Serve the Trolley Bus Fleet**

Upon completion of the Facility, the trolley bus charging function and all transitions to revenue service (navigating from Mariposa Street into the Project Site) must return to the SFMTA traction power system practice. This

## SECTION 3 - DESIGN CRITERIA NARRATIVE

will require close coordination with the SFMTA to ensure a seamless reconnection. The electrical design and built connection must be accepted by the SFMTA to confirm that it meets SFMTA specifications before plugging into new system. To design the reconnection, the PPC shall use the feeder map shown in Appendix D to understand how electricity is currently distributed through the yard. PPC shall follow all California General Orders and references pertaining to electrical utilities, including, but not limited to the list contained in Appendix B: SFMTA OCS Design Criteria.

### 3.12.7 Existing Traction Power Circuit Condition and New Traction Power Circuit Cable Path

The existing traction power distribution circuit servicing Potrero Yard from the Bryant Street Substation is approximately 40 years old. Once SFMTA completes the initial study as described in section 3.12.4, the City will inform the PPC regarding any further site due diligence expected to be performed jointly between the PPC and the SFMTA.

### 3.12.8 Battery Electric Fleet Requirements

The California Air Resources Board Innovative Clean Transit legislation requires all bus public transit fleets in California to convert to clean energy propulsion by 2040. The SFMTA has made an organizational decision to replace our Hybrid Electric and Trolley Electric Buses with BEBs. BEB charging infrastructure is required at Potrero Yard. BEB design requirements and standards are described in Division 5 (*Battery-Electric Bus Supplemental Criteria*) of the Technical Requirements.

Charging infrastructure for the battery-electric buses at the Potrero Facility will be required once the SFMTA transitions from trolley buses. The Potrero Facility shall be designed to enable a fluid, efficient transition. Trolley buses require

an overhead line affixed in some way above the parking lanes. The SFMTA will leave the design solution to the PPC, and requires that the overhead infrastructure for the trolley bus parking spaces shall be designed to ensure seamless transition from the trolley buses to battery electric buses.

Performance standards and acceptance criteria for charging modules/equipment are described in the E-Bus Performance Requirements Documents. The bus charging solution shall be fed at 480V, 3-phase. The intent is to power multiple units using a single charging cabinet. To facilitate the transition to a battery electric fleet, all bus charging feeders will be run above grade in the ceiling structure or overhead/mezzanine space. Bollards and other physical barriers shall be placed to protect any ground-mounted charging infrastructure.

The facility's overall power requirement shall accommodate a full yard of Battery Electric Buses (213 bus capacity). The final orientation and fleet organization shall be confirmed with the SFMTA at the PDA phase. All battery-electric bus switchgear/equipment shall be provided within the main electrical room. Any power or equipment that cannot be provided due to utility provider requirements must be accounted for in transition planning documents and have adequate space reserved and identified in the main electrical room.

### 3.12.9 Battery Electric Bus Transition

When Potrero Yard fully transitions to battery-electric bus, the battery-electric bus parking lanes and associated infrastructure shall be designed to transition to the new electrical service connection for the building. When this occurs, the traction power feeder to the yard shall again be deenergized. The Principal Project Company (PPC) may consider reuse of

the traction power feeder to provide enhanced emergency backup power, or another building purpose following replacement of the trolley bus fleet with battery-electric buses. The SFMTA will also begin a process in earnest in the coming years to consider the full decommissioning of the trolley bus OCS system, including how the traction power system could be safely repurposed.

### 3.12.10 Fire Alarm System

A fully addressable fire alarm system shall be provided for the Facility. The fire alarm system shall contain sufficient activation devices (i.e., pull stations, smoke detectors, heat detectors, UV/IR detectors, etc.) as required by Code and additional detection necessary to achieve the overall fire safety goals. It shall monitor the building's sprinkler system and provide occupant notification in the case of a fire event. Premise monitoring shall be provided by an off-site entity in accordance with NFPA 72.

### 3.12.11 Lighting

#### *Interior Lighting:*

Lighting systems for the Facility shall utilize LED light sources with dimmable drivers. Daylight harvesting shall be utilized wherever practical. Daylight sensors shall be installed to allow the dimming of the LED lights when there is enough natural daylight within the space. Occupancy and vacancy sensors will be incorporated into a low voltage lighting control system for all interior and exterior lighting systems. All offices and small rooms shall be provided with occupancy sensor(s) as required for full room coverage. The Facility's lighting control shall operate on the following properties:

- An addressable lighting control system shall be provided. The system shall be programmed with normal building operational hours and

**SECTION 3 - DESIGN CRITERIA NARRATIVE**

shall turn the lights on and off in compliance with the hours of operation.

- All regularly occupied spaces such as offices shall be provided with vacancy sensors. All other spaces such as bathrooms, janitor closets, back of house shall be provided with occupancy sensors. All sensors shall turn off the lights after 5 minutes of no occupancy.
- All areas with natural daylight shall be provided with daylight harvesting. Once the sensor picks up enough daylight within a space the lighting control system shall dim the LED luminaries. The luminaries shall be dimmed to a minimum level of 10 percent while maintaining design fc levels.

**Exterior Lighting:**

Site lighting fixtures will be an LED light source with a dimmable driver. The fixtures will be controlled by a programmable low voltage lighting control panel. Luminaries shall be provided with occupancy sensors. The required control of the exterior lighting shall be:

- An addressable lighting control system shall be provided. The lighting control system shall contain an astronomical time clock and input from a photo sensor. The lighting control system will turn on the lights at dusk so that the lights are on at the start of the normal parking lot hours. The lighting control system shall turn the lights off at either the scheduled time, or dawn (whichever is first).
- After 11:00 PM the luminaries shall reduce to 25 percent light output. If a luminaire senses motion, that luminaries shall increase brightness to full bright. After 10 minutes of no motion the luminaries shall drop back down to 25 percent.

- All staff entrances and exits should have pedestrian level lighting for staff circulation safety.

**3.12.12 Emergency Power**

The Bus Yard Component and the Common Infrastructure shall be provided with an emergency generator which will allow the Facility to operate for 24 hours, at limited capacity in the event of a power outage or emergency. The emergency generator must be designed to provide power to Life Safety Loads, Critical Electrical Loads, and Additional Emergency Loads. In addition to this Section, refer to Section 3.8.1 for the resilience and recovery requirements for the Facility, and to Division 5 (*Battery-Electric Bus Supplemental Criteria*) of the Technical Requirements for emergency power requirements related to BEB fleet resiliency.

Generators shall be designed and installed to meet all applicable codes.

The following list of items must be on emergency power (NFPA 110 requirement included):

Life Safety Loads:

- Pathway egress lighting
- Exit lighting
- Fire alarm systems
- Other loads to ensure human life safety

Critical Electrical Loads:

- IT/Data rooms and systems
- Security systems
- Communications systems
- HVAC equipment serving these spaces
- HVAC control system
- Elevator(s)
- Fume ventilation systems

**Additional Emergency Loads:**

- Automatic garage door openers at entrance and exits of the facility.
- Four maintenance bays- SFMTA with the assistance of the PPC to specify which during the PDA phase.

Diesel generators are assumed to be the base case for design and pricing purposes and are a reliable mode of backup power generation but are inconsistent with long-term decarbonization goals for the City of San Francisco and State of California, and create space, maintenance, and hazard impacts for the site.

There are lift safety loads on the generator; the Life Safety Code and NEC requires an uninterruptible fuel source for the generator. Permission is required by local AHJ to verify the generator is uninterruptible.

**3.12.13 Electrical Communications**

**Electronic Communications System Overview:**

Communications systems shall include a Structured Cable System, Public Address (PA) System, and a Telecommunications Grounding Connection. The general systems and basic operations of the communications system are covered in this section.

**Governing Codes:**

California Electrical Code (CEC) provides minimum safety requirements for these systems. Design and installation shall be based on the CEC, BICSI, and IT best practice and manufacturer's recommendations. Structured Cable System pathways shall be based on current telecommunications performance standards.

**SECTION 3 - DESIGN CRITERIA NARRATIVE**

**Public Address (PA) System:**

Amplifiers and speakers shall be provided throughout the Facility and will be accessed through the telephone system or dedicated microphone. PA speakers must be strategically placed within the Facility allowing the PA system to provide uniform sound coverage for all PA announcements.

**Structured Cable System:**

Structured Cable System pathways will be provided for City-provided equipment including, but not limited to: wireless access points (full building coverage), administrative workstations, shop workstations, and fuel stations.

IT space requirements depend on total number and sizes of the workspaces. See Table 3.G for workspace details.

General industry standards shall be followed for wiring and wiring runs. Category 6 cables generally cannot be longer than 100 meters.

TABLE 3.G - NETWORK CABLES

NETWORK CABLE (QTY.)	19" RACKS	SPACE NEEDED
0 - 100	Half rack	3' x 3'
0 - 300	1	10' x 6'
301 - 600	2	10' x 8'
601 - 900	3	10' x 10'
901 - 1200	4	10' x 12'
1200 - 1500	5	10' x 15'

**Telecommunications Rooms:**

The Bus Yard Component and the Common Infrastructure shall have a Main Telecommunications Room (MTC) for the Main Distribution Frame (MDF), security equipment, routers, core switches, and servers. Provide two four inch conduits to the MTC from the

Main Point of Entry (MPOE) to facilitate current program and future growth. The MTC shall include two to four empty network racks for potential equipment. Telecommunications Rooms shall be provided as required to provide connectivity and house the Intermediate Distribution Frame (IDF) for all work stations. TC rooms shall have two-inch conduit paths back to the MTC. All rooms shall be designed for future expansion and be equipped with equipment racks and cable management systems for organized and efficient cable routing. A 48-strand fiber optic cable (single mode) running from MTC to TCs is required.

**Grounding System:**

A telecommunications grounding will be implemented to protect telecommunications equipment. The telecommunications grounding system shall be connected to the Electrical Safety Grounding System.

**3.12.14 Electrical - Security**

**Electronic Security Systems Overview:**

Security Systems include a Video Surveillance System (VSS), and an Access Control System. Security system devices shall be strategically placed throughout the Facility based on the SFMTA input during the PDA phase, best practice, and industry standards.

**Governing Codes:**

The CEC provides minimum safety rules for these systems. Design and installation shall be based on the minimum CEC requirements, best practices, and manufacturer's recommendations. Physical separation between the Bus Yard Component and the Housing and Commercial Component shall be provided to limit access and decrease the security threat to either.

**Systems Monitoring:**

Security Systems will be monitored from the operations or general manager office with exact locations to be determined during the PDA phase. Bus Yard Component will provide cameras and monitoring for the bus yard major entrance and exits. The Housing Components will provide cameras and monitoring for the housing major entrance and exits. Off-site monitoring is a minimum requirement.

**Video Surveillance System (VSS):**

The PPC shall use a SFMTA approved VSS system that interface with our network software, etc. and to provide real time recording of critical areas and the parking areas. Strategically located cameras will be required in designated areas for video monitoring and recording for forensic use. At a minimum, all entrances and exits shall be covered. The cameras shall be IP based (minimum 1080P) and compatible with the SFMTA standards. Camera selection and placement will be determined during the PDA phase in consultation with the SFMTA. Required camera placement and field of view shall be shown on the floorplans. The SFMTA expects that available camera models may improve by the time construction is completed and therefore will do a final review of the camera selection and supporting infrastructure prior to their ordering and installation. The SFMTA maintains a list of approved camera models that have been tested and are approved. The SFMTA will review the VSS halfway through the design.

**Access Control System:**

A card access system shall be provided that is compatible with the existing SFMTA system to allow access to the site gates, building staff entry, and critical areas.

**SECTION 3 - DESIGN CRITERIA NARRATIVE**

The existing SFMTA access control system works as follows. Each SFMTA employee has an access card that is encrypted with a facility code and card number. This information is programmed into a Honeywell ProWatch Data Base by an SFMTA Administrator. The card is then waived in front of a card reader at a door, elevator, or any other location that requires a card reader for access. The card reader reads the information from the access card, and if the employee has access, the door or elevator will open or operate as normal. The door and card reader have wires running to it from the Access Panel usually installed in the IDF closet. The Panel then is tied into the SFMTA network. The power supply is tied into the access panel, and the panel has a relay that pulses the power supply when it receives a positive card read.

**Building Access Doors:**

Entrance into the Bus Yard Component through building doors and at all emergency egress routes that may be shared with the

Housing and Commercial Component shall be controlled by a card reader system. When a valid RFID card is presented to the local card reader at the door, the lock will be opened, allowing ingress. Entrance gates shall also be capable of functioning on a schedule. For example, gates for bus and delivery entry may be left open during business hours for free ingress/egress, but after-hours ingress may be controlled by the card reader system.

**Intercom System:**

The Facility shall be equipped with an intercom system consisting of two-way intercom stations located at locations to be determined during the PDA phase in consultation with the SFMTA. The intercom system shall be IP based and must be compatible with existing SFMTA standards. The intercom system shall be interoperable with the access control system as ingress or egress requests can be made from an intercom station.

**Uninterruptible Power Supply (UPS) System:**

A UPS system shall be provided for security electronics to allow security electronics, network equipment, and phone system to maintain function in the event of a power interruption. This system is on emergency generator power system and a rack mounted UPS with 15 to 30 minute battery back-up for system ride through during power outage events shall be provided. Determine during PDA phase with consultation with SFMTA. Other customized IT systems such as Radio, Computer Aired Dispatching, Fleet Watch, and others shall be addressed in detailed design in coordination with the SFMTA.

**3.13 Solid Waste Disposal**

A single consolidated location for the Bus Yard Component is required in the basement for recycling, composting, and landfill waste. Waste shall be delivered to receptacles through trash chutes running from the Bus Yard Component to the basement. The trash facilities shall include a 30-yard recycling compactor. The basement shall be fully accessible to garbage collection vehicles. The trash area shall be well lit and ventilated to avoid noxious smells. The drawing package shows approximate location for waste area, final sizing, design, and equipment will be determined during detail final design. The waste area must be compliant with Chapter 19 of the Environment Code and the City and County of San Francisco.

This section of the code deals with waste disposal, the three waste streams (recycling, landfill, composting), and compliance monitoring.

TABLE 3.H - RECIPROCATING VS. ROTARY SCREW AIR COMPRESSORS	
RECIPROCATING	ROTARY SCREW
Cost advantage as single-acting, air cooled unit below 30 HP	Used more in 150 PSIG, lubricated air systems above 30 HP
Double-acting units used in 175 PSIG and in non-lubricated applications	Used for constant volume, variable pressure applications
Normally used for heavy duty, continuous service	Oil or water is used for sealing and cooling
High overall efficiency	Must vent reservoir to lower power consumption when unloaded
Operates efficiently at partial loads	Delivers high air volume in a compact space
Saves horsepower under no-load conditions	Smooth pulse-free output
High maintenance costs	Easy to install and maintain
Requires heavy (concrete) housekeeping pad	Low vibration

## SECTION 3 - DESIGN CRITERIA NARRATIVE

**3.14 Compressed Air and Lubrication Distribution Equipment**

The compressed air and lubrication distribution systems are two important aspects of a facility that provide ease of use for the mechanics working in a multi-bay facility. The compressed air and lubrication piping will need to be sized properly to support the shop equipment throughout the facility. The lubrication equipment needs to support the vehicles being serviced for the facility to be most efficient. Table 3.H provides comparison details for reciprocating and rotary screw compressors.

There are several factors to be considered in the appropriate compressed air and lubrication system selection including (but not limited to):

- Number of bays
- Lubrication fluids needed at each location
- Length of longest piping run
- Monitoring technology

**Rotary Screw Compressors:**

These types of compressors use two rotors or helical screws to compress air to produce compressed air. Rotary screw compressors are quieter than piston units, allowing a quieter work environment while operating relatively energy-efficiently. Operating temperatures are at least 100 degrees F cooler than piston units, resulting in longer life. Rotary screw compressors are most efficient when in constant operation because they require approximately six minutes to ramp down from compression duty. During this time, the compressor is not fully loaded but still requires some amount of power input that does not produce any compressed air.

However, the amount of time required to ramp down from compression duty will be reduced to

about 20 seconds when the unit is operated by a variable frequency drive (VFD).

The maintenance (long-term) cost of a rotary screw compressor is one major drawback because the more complex equipment with electronic components requires more regular maintenance compared to piston-type compressors. However, because screw-type compressors do not operate with as much friction as piston-type compressors, the frequency of maintenance is significantly less than piston-type compressors.

**Reciprocating Piston Compressors:**

Piston compressors are typically used for general-purpose applications such as workshop/air, where the air is used for hand-tools, cleaning dust, small paint jobs, etc. It is one of the most commonly used compressor types. Piston compressor are available from 1 HP to about 50 HP. The motors can be duplicated (duplex) in effort to double the power output (horsepower) and can then be configured in a lead-lag operation to ensure equal wear on the motors.

Piston compressors are more economical below 30 HP and work well in maintenance shops as they are more suitable for high pressure (175 PSIG or more) applications.

Piston-type compressors have a simple design and can be more easily fixed by facility maintenance staff compared to a screw-type compressor.

There are a few drawbacks to piston compressors such as excessive noise, high outlet temperature, and high oil content in air piping. These can all be mitigated through engineering a system appropriately.

**Refrigerated Air Dryers:**

An air dryer is an integral piece in compressed air treatment system. Air quality can have a significant impact on compressed air tools and equipment. Properly treated compressed air, and the right air dryer, will improve productivity, system efficiency, and product or process quality. Refrigerated air dryers are specifically designed to handle the high discharge temperatures of piston compressors. The purpose of using a refrigerated air dryer is to remove entrained moisture in the air to prevent corrosion in air tools with moving steel parts. Refrigerated dryers typically provide dew points of 40 degrees F at rated conditions.

A few filters are required to be used in compressed air systems. The particulate air filter is downstream of the compressor and upstream of the dryer. This type of filter removes any dust or particulates in the air. The second filter located downstream from the dryer is the coalescing air filter, which removes the excess oil and water left in the air by the compressor and the dryer.

**Desiccant Air Dryers:**

These types of air dryers do not require power to dry the air, as is the case with refrigerated air dryers. These types of dryers utilize a filter that captures the entrained moisture in the compressed air. Desiccant dryers trap so much of the moisture from the air that they typically reduce the dew point temperature to -40 degrees F.

**Compressed Air Receivers/Tanks:**

Air receivers are pressure vessels that store treated or untreated compressed air. The air stored in these vessels alleviates the frequency of starts required by the compressor whenever compressed air is used. Some reciprocating

## SECTION 3 - DESIGN CRITERIA NARRATIVE

and rotary screw compressors can be mounted on an air receiver, but some are base/floor-mounted.

**Bulk Fluid Storage Tanks:**

Bulk Storage Tanks allow facilities to store large quantities of fluids while meeting required codes with double wall containment. Tanks can be monitored to promote more efficient product inventory control and throughput data. Tanks are available in sizes from 100 gallons to 50,000 gallons based on the frequency that the facility wishes to receive fluid deliveries. These tanks can also be utilized for waste/used fluids such as used oil and used coolant. Tanks are typically stored in a central location along an exterior wall for reduced piping lengths and ease of delivery and extraction of bulk fluids.

The amount of waste from empty bottles and jugs, the amount of time it takes to handle each bottle, and the amount of spilled fluid is greatly reduced when using bulk fluid storage tanks. Bulk fluid storage tanks typically hold amounts of liquid greater than 100 gallons for the use of all mechanics within the building.

A tank level monitor is an integral component of the storage tank and will signal the low-level condition at which point the lubrication distributor would refill the storage tanks. Storage tanks are also equipped with a sensor that signals an alarm to sound in the event of a leak.

Bulk fluid storage tanks are typically double-walled to conform to the code requirement for spill containment. Another method of containing leaks is to provide a recessed concrete pit in the bulk fluid storage room directly underneath the bulk fluid tanks. Whichever method is chosen, 110 percent of the storage capacity of

the tank needs to be contained in the event of a leak, as required by code.

**Delivery Pumps:**

Fluids need to be pumped from the bulk fluid storage tanks to the point of application in the maintenance bays area.

**Piston Pumps:**

Pneumatically-powered piston pumps are powerful enough to transfer the fluid from the storage tank to the point of application, hundreds of feet away. Piston pumps can be mounted directly on top of the tank to dampen vibrations. Piston pumps are loud pieces of equipment (73 - 80 dB(A)). Noise dampening is one reason to enclose the lubrication storage area with heavy walls.

**Diaphragm Pumps:**

Diaphragm pumps can also be used to pump fluid from the bulk fluid storage room to the maintenance bays. These pumps do not offer any mechanical advantage – the pressure of the compressed air supply is equal to the pressure of the fluid at the discharge end of the pump at a low flow condition.

Diaphragm pumps are typically used for diesel exhaust fluid and engine coolant but are also capable of transferring engine oil, hydraulic oil, automatic transmission fluid, windshield washer fluid, diesel fuel, and gasoline.

Another special case involves the pumping of engine coolant when the coolant is provided as a concentrate. A 30-gallon drum of water with a float valve is typically specified when mixing the concentrated engine coolant with the water. The diaphragm pump handles the mixing duty to supply a mixture of coolant to water at the desired ratio.

**Piping:**

The size of each pipe varies according to the distance that the fluid travels from the storage tank to the point of application. To determine the size of the pipe required to ensure that fluid will transfer from the lubrication storage room to the point of application, the lubrication system designer will need to know how many dispensers stemming from the same pipeline header are requested to be in use at any given time. Generally, the pipe size increases as the demand of fluid flow increases. Wall thicknesses also need to be considered when selecting the pipe to provide the rigidity necessary to keep the pipe from bursting. The fluid pressure within the pipe is typically 1,000 PSI and even more for chassis grease.

The cross section of a header can be designed to decrease over the length of the run from the storage tank to the maintenance bays. This will help to decrease the cost of materials and will also ensure an acceptable fluid pressure at the point of application. The lubrication system designer calculates the size of pipe based on fluid mechanics equations.

The pumps are also sized in this way to ensure that the pipe length and the pumps are paired to dispense fluid at the furthest point of application.

The type of the pipe selection varies according to the type of fluid being transferred. Bulk fluid liquids may flow through carbon steel. Compressed air will be routed through copper to prevent corrosion. Compressed air does not require pipe of a high tensile strength because it operates at a comparatively low pressure than other fluids.

## SECTION 4 - PERFORMANCE REQUIREMENTS

**Lubrication/Commodity Hose Reels and Nozzles:**

Lubrication hose reels are stationary units in the bays and piped from bulk storage tanks. These reels are in areas where maintenance and re-filling of fluids occurs, typically overhead on columns or mounted to nearby walls. Technicians can quickly dispense and measure fluids being dispensed into vehicles.

Hoses comprise the final length of fluid transfer material before exiting through the point of application (the nozzle). Hose reels offer the convenience of retracting the hose with no significant effort by the user to move the hoses out of the work space. This eliminates tripping hazards and it decreases the amount of time required to move the hose from the work area.

Multiple hose reels can be grouped in parallel and mounted onto the same bracket. In this case, the reels become a reel bank. Hose reels are typically installed overhead on columns, mounted to nearby walls, or are suspended from the ceiling structure.

**Fluid Management System:**

The volume of several types of fluids that the mechanics dispense can be tracked by use of the fluid management system.

The amount of each type of liquid can be monitored by the Fleet Manager to determine the appropriate time to order more bulk fluid from the distributor. The fluid management system tracks the amount of each dispensed liquid by each individual nozzle.

With the fluid management system, the user can enter the amount of fluid that they would like to dispense from the nozzle. The pump air controls will allow the transmission of compressed air to the pumps by the storage tank to allow pumping to commence.

**Waste Recovery System:**

When mechanics drain fluids such as oil and coolant from vehicles, a mobile receptacle is utilized to collect the used fluid. When the mechanics need to empty these containers, units can be rolled to nearby diaphragm pumps located in the maintenance area and used fluid can be pumped into respective storage tanks in the lubrication storage room. Tank level monitors are typically installed in the tanks to signal an alarm to sound when the tank gets above a certain level. When the tank is full, a used fluid evacuation company can be contacted to remove the used fluid from the storage tanks.

**3.14.1 Equipment Manual**

To provide further specificity and direction, HDR | MDG was asked in the Fall of 2018 to formulate specific equipment recommendations in consultation with SFMTA maintenance staff. Those recommendations are included in Appendix C and are also reflected in the equipment drawings within the Reference Design Concept document.

**4.0 Introduction**

The SFMTA envisions the rebuild Potrero Yard as an asset to the SFMTA's transit facility as well as a well-designed, contextual building that celebrates its core public transit use and sensitively designs interactions between untraditional shared uses. The architectural team designing the Potrero Yard Modernization Project shall have proven aesthetic design experience and talent to develop functionally economical as well as aesthetically attractive buildings. Design of the rebuilt Potrero Yard shall be informed by the Division 2 (*Design Guidelines*) of the Technical Requirements.

Coordinate exterior building design, locations for building functional areas and actual room dimensions by functional relationships, local zoning, codes, regulations, ADA requirements, and equipment.

**4.1 Special Foundations**

Special foundations to support combined building/crane columns, jib cranes, and laterally loaded piers/piles shall have appropriate geotechnical parameters based on soil testing and analysis. The effects of repetitive loads shall be taken into consideration for allowable bearing pressures, both vertically and horizontally. Rotations and deflections shall be limited to differential settlement and total settlement that meets the serviceability requirements of IBC for the given material.

**4.1.1 Slab on Grade**

The slabs on grade shall be placed atop engineered soils as required by PPC's Geotechnical Baseline Report. Provide continuous 15 mil vapor barrier meeting ASTM E 1745 Class A with a perm rating below 0.01 perms, immediately under slab over stone capillary break, under entire slab.

Design and locate joints to control and direct shrinkage cracking of concrete elements per ACI recommendations. Submit joint plan to the SFMTA for review and approval prior to placing exposed slabs and walls.

Concrete Floor Finishing: For all exposed concrete floors provide Euclid Surfex Light-Reflective Dry Shake Hardener sealed with Euclid Euco Diamond Hard or approved equal. The manufacturer's recommendations shall be followed including the use/non-use of fly ash and various troweling methods.

**SECTION 4 - PERFORMANCE REQUIREMENTS**

If Integrally Colored Ground and Polished Concrete is selected as a floor finish, special requirements include:

- In areas where polished concrete floors are to be installed, PPC shall fine grade the sub grade uniformly flat using a laser device as described in “CPAA Recommendations for the Design, Specification, and Placement of Concrete Floor Slabs” from the Concrete Polishing Association of America.
- A below slab vapor barrier shall be installed in accordance with CPAA recommendations and shall meet all properties described therein.
- The mix design, placing and finishing of concrete shall comply with ACI standards and CPAA recommendations.
- Curing compounds and densifiers other than those that are included in the selected manufacturer’s system shall not be used in areas of polished floor.
- Provide the following: Floor Flatness – specified overall value: 50, minimum local value: 35; Floor Levelness: - specified overall value: 30, minimum local value: 20. Flatness and levelness shall be tested within 8 hours after completion of the final troweling operation according to ASTM E1155 – 96 any out of tolerance work shall be remedied.
- Saw cut contraction joints shall be laid out by the Design Team and shall comply with CPAA recommendations.

**4.1.2 Service/Inspection Lower Level Work Area**

Service/Inspection LLWA’s shall be provided a continuous membrane waterproofing system for the pit walls and floors. Provide a gravity perimeter underdrain system.

**4.1.3 Waterproofing and Damp Proofing**

All site retaining walls, below grade walls, elevator and LLWA pits, and or below grade conditioned or occupied spaces, shall be provided a full waterproofing system. Provide drainage board, protection board, waterproofing and footing drains. Insulation, when required, is preferred to be exterior to the structure. Acceptable products include:

- Under slabs on grade: Heavy-duty membrane comprised of an HDPE film, pressure sensitive adhesive and weather resistant protective coating. Preprufe 300R or approved equal.
- On vertical surfaces: Self-adhesive rubber/bitumen polyethylene waterproof membrane meeting ASTM E154 and ASTM D570. Bituthane 3000 or approved equal.
- For sandwich slabs, plaza decks above enclosed spaces and green roofs: Hot-applied rubberized asphalt meeting ASTM E-96, Procedure E and ASTM D-5329. Hydrotech MM6125 EV system or approved equal.
- Water based hydrophobic admixture shall be used in the concrete for construction of the below grade walls and floors forming the elevator, service pits, TPSS basement foundation. Product: Hycrete W1000 (W1002 for air entrained elements) or approved equal.
- Footing drains shall be provided at all waterproof assemblies and below grade foundations. Drains shall gravity drain to the extent feasible. Include below grade floors such as elevator and LLWAs. Rigid slotted PVC footing drains shall be set in a bed of crushed stone (minimum 12 inches of stone outboard and above pipe) wrapped with filter fabric. Drainage board material shall extend into the gravel bedding.

- Provide physical (dumbbell) water stops cast into the work at all concrete joints in assemblies to be waterproofed. Use of expansion/bentonite strip type water stops are permissible with prior SFMTA approval.
- Damp proofing shall be odorless and meet ASTM D-1187 Type II and ASTM D-1227 Type III. It is required at below grade concrete stem walls that do not have a face exposed to view. Karnak Corporation, Karnak 100 Non Fibrated Emulsion Coating, or approved equal.
- Where exposed to view, provide above grade concrete and masonry with a breathable, clear-drying, water-based silicone emulsion. Weather Seal Blok- Guard and Graffiti Control II by Prosoco or approved equal.

**4.2 Shell - Super Structure**

The structural framing shall be designed to include wind and seismic drift.

**4.2.1 Floor Construction**

Floor framing shall be designed for the dead and live loads to be used in the facility. In addition to the standard live loads presented in IBC, floors shall support equipment loading.

Concrete slabs to comply with ACI composite flatness and levelness ratings. The following slabs shall have the ratings listed below:

- Shop and storage areas: Flatness 35, Levelness 25.
- Thin-set tile and resilient floor: Flatness 35, Levelness 25.
- Carpeted areas: Flatness 25, Levelness 20.
- Areas where polished concrete flooring has been selected: Flatness 50, Levelness 30.

**4.2.2 Roof Construction**

Roof framing shall have adequate strength and stiffness to prevent ponding. Equipment

## SECTION 4 - PERFORMANCE REQUIREMENTS

suspended from or set on the roof shall be included in the design of the roof members. Roofs shall have a minimum slope of ½-inch per linear foot or greater as required by the roofing system selected.

Roof access shall be provided for all roofs.

Provide OSHA compliant roof fall protection/restraint system for access to all roof areas. The design shall include the ability for maintenance to provide for safe and accessible cleaning of windows per ANSI/IWCA I-14 Window Cleaning Safety Standards.

## 4.3 Exterior Enclosure

The Potrero Yard, including the roofs, may be visible from both the street level and adjacent development around and above the site. The buildings, facades and roofs shall be visually pleasing. The SFMTA shall accept the project aesthetics prior to submittal for design review to the SF Planning Department. Exterior finishes selected must meet SF Planning requirements.

Sustainability requirements may also drive material choices. Energy Code requirements establish the minimum building envelope performance. In the event of a conflict, the most stringent code will apply. The building enclosure shall be designed to preclude birds or other wildlife from nesting or otherwise taking up residence.

## 4.3.1 Exterior Walls

Exterior materials shall be considered on the basis of durability and appearance with the understanding that a minimum 50 year low maintenance life expectancy and 100 year minimum building lifespan is mandated. The SFMTA prefers the use of materials that require little refinishing or maintenance such as stainless steel, aluminum, glass, materials

with anodized or factory finishes, materials with integral color, brick, terracotta, architectural pre-cast, or architectural exposed concrete.

Synthetic stucco, simulated materials such as river rock or other faux cladding, architectural foam detailing and aluminum, plastic, wood or vinyl siding will not be acceptable. Compliance with the City and County of San Francisco Development Standards is mandatory.

At a minimum, the bottom four feet above grade at vehicle entrances and exits of the building shall consist of a hard material such as masonry or concrete.

Coordinate all elements of the wall assembly, including flashing, trim and transitions between materials to provide a weatherproof installation requiring little maintenance, detailed to limit accumulation of dirt or staining.

## 4.3.2 Water and Air Barrier

Provide City and County of San Francisco Energy Code compliant, fluid-applied, vapor-permeable, water and air barrier membrane system.

**Performance Requirements:**

- Air barrier shall be capable of performing as a continuous vapor-permeable air barrier and as a liquid-water drainage plane flashed to discharge to the exterior incidental condensation or water penetration. Air barrier assemblies shall be capable of accommodating substrate movement and of sealing substrate expansion and control joints, construction material changes, penetrations, and transitions at perimeter conditions without deterioration and air leakage exceeding specified limits. Air leakage testing of the

building envelope air barrier installation, as described in the Energy Code, is required prior to covering the air barrier.

- Membrane Air Permeance: (comply with current City and County of San Francisco Energy Code) Not to exceed 0.004 CFM by sf of surface area 4 at 1.57 pounds per sf pressure difference; ASTM E2178 5.
- Membrane Vapor Permeance: Not less than 10 perms; ASTM E96/E96M; Air Barrier systems other than that listed above will be considered on a case by case basis and require the SFMTA approval.
- Acceptable Product: Air Block 17 MR by Henry Company with associated auxiliary materials to provide a complete system including but not limited to transition membranes, sheathing joint membranes, adhesives and primers, sealants and self-adhesive thru-wall flashing, or approved equal. Obtain complete air barrier system from a single source.

## 4.3.3 Weather Barriers

Non-occupied / non-conditioned locations only: Provide a complete weather resistive barrier for all enclosed spaces and all wall assemblies requiring weather protection.

Provide flexible flashing as required to form a weather tight envelope. All openings to be fully wrapped with waterproof flexible flashing with joints shingle lapped. Seal all penetrations through the weather resistive barrier to create one continuous weather barrier enclosure.

Provide Weather Resistive Barrier as made by Vaproshield, or approved equal.

Provide Waterproof Flexible Flashing Blueskin by Henry, Vycor by Grace or approved equal.

## SECTION 4 - PERFORMANCE REQUIREMENTS

## 4.3.4 Exterior Masonry

The following technical requirements shall be met by the Design Team if masonry is selected as a part of the building enclosure:

**Unit Masonry, General:**

- Unit masonry shall be utilized in a cavity wall that functions as a rain screen. Painted masonry will not be allowed.
- CMU is not permitted for the exterior.
- Masonry Standard: Comply with TMS 602/ACI 530.1/ASCE 6.
- Where unit masonry is selected as a building material, design the building utilizing masonry module, both in plan and elevation, ensure coursing is designed for either full or half block for overall dimensions, control joints, and at all openings.
- Substrate supports for veneer masonry to have a maximum horizontal deflection of 1/720 of the wall height.
- Where exposed to view, provide above grade concrete and masonry with a breathable, clear-drying, water-based silicone emulsion. Weather Seal Blok- Guard and Graffiti Control II by Prosoco or approved equal.

**Performance Requirements:**

- Provide structural or non-structural unit masonry that develops indicated net-area compressive strengths at 28 days.
- Determine net-area compressive strength of masonry from average net-area compressive strengths of masonry units and mortar types (unit-strength method) according to TMS 602/ACI 530.1/ASCE 6.

**Concrete Masonry Units:**

- Integral Water Repellent: Provide units made with integral water repellent such as Dri-Block.

- CMUs- Standard, Decorative and Pre-faced: ASTM C 90

- ✓ Ground face may be used for unpainted exposed locations on the interior the maintenance facility.
- ✓ Textured block faces (split face, ribbed etc.) are not acceptable.
- ✓ Painted CMU on the exterior of the building is not acceptable.
- ✓ Concrete Building Brick: ASTM C 55.

**Brick - Clay Face Brick:**

- Facing brick complying with ASTM C 216 SW or hollow brick complying with ASTM C 652, Class H40V (void areas between 25 and 40 percent of gross cross-sectional area). No oversized brick allowed. Norman modules preferred.
- Embedded Flashing Materials- Provide continuous flashings at base of wall, heads of openings and under wall caps.
  - ✓ Metal Flashing: Provide metal flashing complying with SMACNA's Architectural Sheet Metal Manual. Use one of the following:
    - Stainless Steel: All through wall flashings shall be 26 gauge, three way keyed stainless steel ASTM A 240/A 240M or ASTM A 666, Type 304. Where flashing is exposed at the touch zone (less than 9-feet 0-inches) the gauge shall be 24 gauge stainless.
    - Flexible Flashing: Use only with the SFMTA approval.

**Miscellaneous Masonry Design Requirements:**

- Ties and Anchors:
  - ✓ General: Ties and anchors shall extend at least 1-1/2-inches into veneer but with at least a 5/8-inch cover on outside face.
  - ✓ Utilize adjustable type 316 stainless steel ties installed in horizontal joints at not less than one metal tie for 4.5 sf of wall area spaced not to exceed 36-inches o.c. horizontally and 16-inches o.c. vertically. Stagger ties in alternate courses.
  - ✓ Provide additional ties within 12-inches of openings and space not more than 36-inches apart around perimeter of openings.
  - ✓ At intersecting and abutting walls, provide ties at no more than 24-inches o.c. vertically. Acceptable product: Hohmann and Barnard DW-10 or approved equal.
- Weep/Cavity Vent and Drainage Products:
  - ✓ Provide both, weeps at the base of the cavity and a minimum equal number of vents at the top of the cavity. Maintain clear airflow space of 1-1/2-inches minimum to face of insulation. Open head joints with mesh required in lieu of rope, tubes or formed inserts. Vertical compartmentalization is required such that no horizontal brick cavity space is longer than 25-feet. All building corners to be compartmentalized within 4-feet of the corner. Provide flashing (if at a control joint) or additional building insulation to back brick face such as to prevent horizontal air flow within the cavity.

## SECTION 4 - PERFORMANCE REQUIREMENTS

- ✓ Provide mortar mesh at all through wall flashings and lintel locations.
- Control Joints:
  - ✓ Control Joints in brick masonry walls shall be placed at openings, near corners, at wall intersections, changes in wall height and as described in the Brick Industry Association document Technical Notes 18A "Accommodating Expansion of Brickwork".
  - ✓ Control joints in CMU walls shall be placed at/near openings, near corners, at wall intersections, changes in wall height or thickness and as described in the National Concrete Masonry Association documents TEK 10-2C or TEK 10-3.
- Minimum 1-1/2-inch airflow space between masonry and insulation
- Steel Lintels shall be hot dipped galvanized, primed and painted per Prescriptive Specification 90 96 00 High Performance Coatings.
- Precast Concrete Coping, Trim and Cladding.
  - ✓ Precast coping units to be utilized for wall caps on masonry walls and veneer. Coping units to include slope for surface drainage and one inch minimum overhang with cast in drip.
  - ✓ Provide mechanical anchorage utilizing stainless steel materials. Provide sealant joints between all cap units and between adjacent materials.
- Submittals - Material sample(s), mock-ups, shop drawings, anchorage and reinforcing materials.

## 4.3.5 Metal Panels

The following technical requirements shall be met by the Design Team if a metal panel

system is selected as a part of the building enclosure:

**Warranties:**

- Special Warranty: manufacturer agreement to repair or replace components of metal panel systems that fail in materials or workmanship within the specified warranty period. Failures include but are not limited to - structural failures (rupturing, cracking, puncturing); deterioration of metals and other materials beyond normal weathering. Warranty Period: Two years from date of Substantial Completion.
- Special Warranty on Panel Finishes: manufacturer agreement to repair or replace metal panels that show evidence of deterioration of factory applied finishes within specified warranty period – including but not limited to color fading more than 5 Hunter units when tested according to ASTM D 2244; chalking in excess of a No. 8 rating when tested according to ASTM D 4214; cracking, checking, peeling, or failure of paint to adhere to bare metal. Warranty Period: 20 years from date of Substantial Completion.

**Minimum Performance Requirements Common to all panel types:**

- Air Infiltration: Air leakage of not more than 0.06 CFM/sf when tested according to ASTM E 283 at a test-pressure difference of 6.24 lb/sf.
- Water Penetration under Static Pressure: No water penetration when tested according to ASTM E 331 at the test-pressure difference of 6.24 lb/sf.
- Thermal Movements: Allow for thermal movements from ambient and surface

temperature changes by preventing buckling, opening of joints, overstressing of components, failure of joint sealants, failure of connections, and other detrimental effects. Base calculations on surface temperatures of materials due to both solar heat gain and nighttime-sky heat loss for a temperature change range of 120 degrees F, ambient; 180 degrees F, material surfaces.

- Provide a concealed fastener wall system with minimum 22 gauge panels.

**Minimum Finish requirements:**

- Two coat fluoropolymer (AAMA 2605. Fluoropolymer finish containing not less than 70 percent PVDF resin by weight in color coat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions), - Kynar 500/ Hylar 5000.
- Metal Wall Panels- Plate (Rain screen type):
  - ✓ Additional Minimum Performance Requirements:
    - Fire-Resistance Ratings: Comply with ASTM E 119; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency and indicate design designations from UL's "Fire Resistance Directory".
    - ✓ Acceptable Products: AEP Span; Prestige Series; Centria: FormaBond or FormaBond II; or approved equal.
- Metal Wall Panels – Insulated:
  - ✓ Additional Minimum Performance Requirements:
    - Structural Performance: Provide metal panel systems capable of withstanding

## SECTION 4 - PERFORMANCE REQUIREMENTS

the effects of the following loads, based on testing according to ASTM E 72:

- Wind and seismic loads per IBC; deflection limits for wind loads no greater than 1/240 of the span.
- ✓ Fire-Test-Response Characteristics: Provide metal wall panels and system components with the following fire-test-response characteristics, as determined by testing identical panels and system components per test method indicated below by UL or another testing and inspecting agency acceptable to authorities having jurisdiction. Identify products with appropriate markings of applicable testing agency.
- ✓ Fire-Resistance Characteristics: Provide materials and construction tested for fire resistance per ASTM E 119
- ✓ Intermediate-Scale Multistory Fire Test: Tested mock-up, representative of completed multistory wall assembly of which wall panel is a part, complies with NFPA 285 for test method and required fire-test-response characteristics of exterior non-load-bearing wall panel assemblies.
- ✓ Radiant Heat Exposure: No ignition when tested according to NFPA 268.
- ✓ Potential Heat: Acceptable level when tested according to NFPA 259.
- ✓ Surface-Burning Characteristics: Provide wall panels with a flame-spread index of 25 or less and a smoke-developed index of 450 or less, per ASTM E 84.
- Acceptable Products: MBCI eco-FICIENT panels; Centria Versawall or approved equal.

## 4.3.6 Precast Architectural Concrete

The following technical requirements shall be met by the Design Team if precast architectural concrete is selected as a part of the building enclosure:

**Performance Requirements:**

- A qualified professional engineer shall design architectural precast concrete units.
- Design Standards: Comply with ACI 318 and design recommendations of PCI MNL 120, "PCI Design Handbook - Precast and Pre-stressed Concrete," applicable to types of architectural precast concrete units included in design.
- (As applicable) Calculated Fire-Test-Response Characteristics: Provide architectural precast concrete units with fire-resistance rating indicated as calculated according to ACI 216.1 (for precast concrete) or PCI MNL 124, "Design for Fire Resistance of Precast Pre-stressed Concrete," (for precast pre-stressed concrete) and acceptable to authorities having jurisdiction.
- Precast concrete units and connections to maintain clearances at openings, to allow for fabrication and construction tolerances, to accommodate live-load deflection, shrinkage and creep of primary building structure, and other building movements as follows:
  - ✓ Upward and downward movement of 1/2-inch.
  - ✓ Anchorage: Provide mechanical anchorage utilizing stainless steel materials. Provide sealant joints between all cap units and between adjacent materials.

- ✓ Fabrication Tolerances: Fabricate architectural precast concrete units to shapes, lines, and dimensions indicated so each finished unit complies with PCI MNL 117 product tolerances as well as position tolerances for cast-in items.
- ✓ Finishes: Exposed faces shall be free of joint marks, grain, and other obvious defects. Corners, including false joints shall be uniform, straight, and sharp.
- ✓ Submittals- Product data and samples, mock up and shop drawings.

## 4.3.7 Sheathing

The following technical requirements shall be met by the Design Team when sheathing is utilized as a part of the building enclosure:

**Performance Requirements:**

- Fire-Resistance Ratings: As tested according to ASTM E 119; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.
- Do not use Plywood Sheathing, Paper-Surfaced Gypsum Sheathing, Cellulose Fiber-Reinforced Gypsum Sheathing, Cementitious Backer Units, Fiberboard Sheathing Extruded-Polystyrene Foam Sheathing or Foil-Faced Polyisocyanurate Foam Sheathing for roof or wall applications unless approved by the SFMTA.
- Glass-Mat Gypsum Sheathing: ASTM C 1177/1177M.
- Type and Thickness: Type X, 5/8-inch Glass-Mat Gypsum Sheathing: ASTM C 1177/1177M
- Acceptable Products: DensGlass by Georgia-Pacific or approved equal (walls); DensDeck by Georgia-Pacific or approved equal (roof)

## SECTION 4 - PERFORMANCE REQUIREMENTS

## 4.3.8 Cold Formed Framing

The following technical requirements shall be met by the Design Team when cold formed framing is utilized as a part of the building enclosure:

**Performance Requirements:**

- A qualified professional engineer shall design all cold formed steel framing.
- Cold Formed Steel Framing Design Standards:
  - ✓ Floor and Roof Systems: AISI S210.
  - ✓ Wall Studs: AISI S211.
  - ✓ Headers: AISI S212.
  - ✓ Lateral Design: AISI S213.
- AISI Specifications and Standards: Unless more stringent requirements are indicated, comply with AISI S100 and AISI S200.
- Design framing system to maintain clearances at openings, to allow for construction tolerances, and to accommodate live load deflection of primary building structure as follows:
  - ✓ Upward and downward movement of 1/2-inch.
  - ✓ Design exterior non-load-bearing wall framing to accommodate horizontal deflection without regard for contribution of sheathing materials.
- Fire-Resistance Ratings (where applies): Comply with ASTM E 119; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.
- All cold formed framing to be galvanized, minimum G60.

## 4.3.9 Insulation

Provide insulation in walls, roof and under slab to meet or exceed the Energy Code requirements. Provide all insulation in thicknesses, widths, and lengths sized to fit applications and to meet code requirements. Exposed, faced, bagged or scrimmed insulation is not acceptable. All insulation materials integrated into the work shall NOT contain: added urea formaldehyde, nor halogenated flame retardants. All products and their manufacturing processes shall be CFC and HCFC free. Rockwool insulation materials in the form and density appropriate for the application and performance required unless noted otherwise.

- Accessories: Provide fasteners and adhesives required to attach insulation to substrates per manufacturer's recommendations.
- Insulation for Miscellaneous Voids: Spray Polyurethane Foam Insulation (Limited use only for penetration sealing): ASTM C 1029, Type II, closed cell, with maximum flame-spread and smoke-developed indexes of 75 and 450, respectively, per ASTM E 84.
- Below Grade Insulation: EPS – Expanded Polystyrene. Recycled preferred.(Benchmark Foam, Inc. for reference).

## 4.3.10 Sheet Metal Flashing

Acceptable materials: Stainless Steel ASTM A 240/A 240M Type 316 Finish 2B (bright, cold rolled).

Sheet metal (steel or aluminum) finished with same system as adjacent metal panels or storefront/curtainwall system or as approved by the SFMTA. Finish Warranty Period: 20 years from date of Substantial Completion.

## 4.3.11 Exterior Windows

Daylight glazing shall be incorporated to allow for a reduction in artificial lighting and shall meet or exceed the percentage required by the Sustainability Checklist. Daylighting strategies shall be incorporated in the design of all spaces including shop areas.

All exterior glazing shall meet fenestration performance requirements of the most stringent energy code. Glazing shall be located and designed so as to be accessible for cleaning and window washing attachment systems shall be provided as needed. Window frames shall be prefinished aluminum. Frames are required to be thermally broken.

Provide solid surface window sills, 3/4-inch thickness minimum, at all locations.

## 4.3.12 Glazing

Glazing shall perform successfully within an assembly that complies with the Energy Code, meeting or exceeding in performance the maximum U Value and SHGC for the assembly selected by the Design Team. All glazing shall be captured in a frame assembly. Butt-Glazed lites are not acceptable.

Acceptable manufacturers: Pilkington North America Inc, PPG Industries, Inc, AGC Glass Company North America, Guardian Industries, Saint-Gobain Corporation or approved equal.

The following technical requirements shall be met by the Design Team where glazing is utilized as a part of the building enclosure:

**Warranties:**

- Manufacturer's Standard and Special warranties for each product used.
  - ✓ Warranty Period: 10 years from Substantial Completion.

## SECTION 4 - PERFORMANCE REQUIREMENTS

- ✓ For each glass type and all glazing accessories – Obtain from single source from single manufacturer.

**Performance:**

- General: Installed glazing systems shall withstand normal thermal movement and wind and impact loads (where applicable) without failure, including loss or glass breakage attributable to the following: defective manufacture, fabrication, or installation; failure of sealants or gaskets to remain watertight and airtight; deterioration of glazing materials; or other defects in construction.
- Design: Engage a qualified professional engineer, to design glazing.
- Structural Performance: Glazing shall withstand the following design loads within limits and under conditions indicated determined according to the IBC and ASTM E 1300 and Design Team Design Team per the applicable codes.
- Provide Float Glass per ASTM C1036.
- Safety Glass: ASTM C1172, and ANSI Z97.1, laminated and tempered as indicated or required by code.
- Heat Strengthened Laminated Float Glass (at overhead conditions including clerestories): Two sheets of heat strengthened 1/4-inch thick (minimum) clear float glass fully-bonded, high-impact, UV-resistant, clear polyvinyl butyl interlayer 0.030-inch minimum thickness;
- Laminated Glass (at skylights): Per DCM “Canopy glazing” Clear float glass with 65 percent VLT white interlayer to reduce glare and minimize visibility of dirt, unless approved otherwise by the SFMTA. Plastic, polycarbonate, fiberglass or similar skylights are not acceptable.
- All tempered glass to be heat soak tested.
- Insulated glazing units: Provide sealed insulating glass: per ASTM E 2190, double pane; total unit thickness of 1-inch minimum. Inner and outer pane types subject to requirements at all glazing in conditioned spaces; Basis of Design: Solarban 70 XL manufactured by PPG or approved equal.
  - ✓ Interpane Space: Dry hermetic air, kept dry with a dehydrating agent; Edge
  - ✓ Seal Construction: Dual seal, silicone foam warm-edge spacer system with high-performance acrylic adhesive structural seal, backed with moisture vapor seal.
  - ✓ Edge seal color to be black.
  - ✓ Super Spacer by Edgetech IG.
- Vision Glass Units Performance: Subject to conformance to requirements, provide sealed insulating glass units with minimum performance values based on units comprising an outer lite of 1/4-inch float glass, 1/2-inch air space and, inner lite of 1/4-inch clear float glass with Low E coating on third surface.
  - ✓ Visible Light Transmittance: 69 percent; Winter Nighttime U-Factor: 0.29.
  - ✓ Shading Coefficient: 0.44; Low Emissivity (Low E).
  - ✓ Glass Low-e Coating: Soft, sputtered applied to third surface; hard, pyrolytic coating on second surface for over-size glass units.
- Provide glazing sealants that are compatible with one another and with other materials they will contact, under conditions of service and application, as demonstrated by sealant manufacturer based on testing and field experience. Comply with sealant and glass manufacturers’ written instructions for selecting glazing sealants suitable for applications indicated and for conditions existing at time of installation.
- Structural Silicone Sealant for Glass Joints: Not allowed.
- Provide glazing accessories, including:
  - ✓ Lock Strip Gaskets: ASTM C542, ozone-resistant precision extruded neoprene or EPDM compound. Use gaskets with separate locking strips that are 10-points higher Shore A durometer hardness value than gasket body.
  - ✓ Fabricate gaskets in accordance with recommendations of ASTM C716.
  - ✓ Setting Blocks: Neoprene, EPDM or silicone, 80 to 90 Shore A durometer hardness tested to ASTM D2240. Maximum compression set to ASTM D395 and ASTM C864.
  - ✓ Spacers: Neoprene EPDM or silicone, 40 to 60 Shore A durometer hardness tested to ASTM D2240; quantity and location in accordance with IGMAC standards and as recommended by the frame and glass manufacturer.
  - ✓ Glazing Tape: AAMA 806.3, preformed butyl compound, UV resistant, self-adhering, coiled on release paper, color as selected by Owner’s Representative; Pre-Shimmed Glazing Tape: AAMA 806.3, pre-formed butyl tape, UV resistant, self-adhering, integral continuous serrated synthetic rubber shim and release paper, color: black.

## SECTION 4 - PERFORMANCE REQUIREMENTS

- ✓ Glazing Wedges and Splines: Precision extruded neoprene or EPDM compound, UV resistant, 55 to 65 Shore A durometer hardness.
- Labeling:
  - ✓ Safety Glazing Labeling: Where safety glazing is indicated, permanently mark glazing with certification label of the SGCC. Label shall indicate manufacturer's name, type of glass, thickness, and safety glazing standard with which glass complies.
  - ✓ Insulating-Glass Certification Program: Permanently marked either on spacers or on at least one component lite of units with appropriate certification label of IGCC.
- Submit: 12-inch by 12-inch samples for each glass type with fabricator product information.

**4.3.13 Storefront**

The following technical requirements shall be met by the Design Team where storefront is utilized as a part of the building enclosure:

- For glazed Aluminum Storefront and Entrances provide self-supporting, factory prefinished, thermally broken, glazed aluminum tube framing system. Obtain all components of aluminum-framed entrance and storefront system, including framing and accessories, from single manufacturer.
- Basis of design: Model 433 manufactured by EFCO for aluminum storefront, or approved equal. Entrance Doors: EFCO D518 HD style or approved equal.

**Performance:**

- General Performance: Aluminum-framed entrances and storefronts shall withstand

movements of supporting structure including, but not limited to, story drift, twist, column shortening, long-term creep, and deflection from uniformly distributed and concentrated live loads.

- Test according to ASTM E 330 as follows:
  - ✓ When tested at positive and negative wind-load design pressures, assemblies do not evidence deflection exceeding specified limits.
  - ✓ When tested at 150 percent of positive and negative wind-load design pressures, assemblies, including anchorage, do not evidence material failures, structural distress, or permanent deformation of main framing members exceeding 0.2 percent of span.
  - ✓ Test Durations: As required by design wind velocity, but not less than 10 seconds.
- Air Infiltration: Test according to ASTM E 283 for infiltration as follows:
  - ✓ Fixed Framing and Glass Area: Maximum air leakage of 0.06 CFM/sf at a static-air-pressure differential of 6.24 lb/sf.
  - ✓ Entrance doors:
    - Pair of Doors: Maximum air leakage of 1.0 CFM/sf at a static-air-pressure differential of 1.57 lb/sf.
    - Single Doors: Maximum air leakage of 0.5 CFM/sf at a static-air-pressure differential of 1.57 lb/sf.
- Water Penetration under Static Pressure: Test according to ASTM E 331 as follows:
  - ✓ No evidence of water penetration through fixed glazing and framing areas when tested according to a minimum static-

air-pressure differential of 20 percent of positive wind-load design pressure, but not less than 6.24 lb/sf.

- ✓ Maximum Water Leakage: According to AAMA 501.1 no uncontrolled water penetrating assemblies or water appearing on assemblies' normally exposed interior surfaces from sources other than condensation. Water leakage does not include water controlled by flashing and gutters, or water that is drained to exterior.
- Seismic Performance: Aluminum-framed entrances and storefronts shall withstand the effects of earthquake motions determined according to ASCE/SEI 7.

**Minimum acceptable aluminum finishes:**

- Clear Anodic Finish: AAMA 611, AA-M12C22A41, Class I, 0.018 mm or thicker.
- High-Performance Organic Finish: Two-coat fluoropolymer finish complying with AAMA 2605 and containing not less than 70 percent PVDF or FEVE resin by weight in color coat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions.

**4.3.14 Operable Windows**

The following technical requirements shall be met by the Design Team where operable windows are utilized as a part of the building enclosure:

- Provide operable (casement or awning as approved by the SFMTA) prefabricated aluminum windows with thermally broken frames and insulated glazing to meet Energy Code and sustainability requirements.

## SECTION 4 - PERFORMANCE REQUIREMENTS

All windows shall have stainless steel screens and locking hardware. Finish to be manufacturer's standard Class I, coating that meets AAMA 2604. Clear anodic or two coat fluoropolymer (Kynar 500/ Hylar 5000) acceptable.

- Window performance: Windows shall conform to all AAMA/WDMA/CSA 101/I.S.2/A440-08 requirements for AW grade windows and shall meet all performance criteria of the basis of design product.
- Basis of Design: Series 2700 by EFCO or approved equal.

**4.3.15 Glazed Aluminum Curtain Walls**

The following technical requirements shall be met by the Design Team when a curtain wall system is utilized as a part of the building enclosure:

**Warranties:**

- Special Assembly Warranty: Manufacturer's standard 10 years from date of Substantial Completion.
- Special Finish Warranty: Manufacturer's standard 20 years from date of Substantial Completion.

**Performance Requirements:**

- Analysis and design data signed and sealed by the qualified registered professional engineer responsible for their preparation.
- General Performance: Comply with performance requirements specified, as determined by testing of glazed aluminum curtain walls representing those selected for this Project without failure due to defective manufacture, fabrication, installation, or other defects in construction.

- ✓ Glazed aluminum curtain walls shall withstand movements of supporting structure including, but not limited to, story drift, twist, column shortening, long-term creep, and deflection from uniformly distributed and concentrated live loads.
- ✓ Failure also includes the following:
  - Thermal stresses transferring to building structure.
  - Glass breakage.
  - Noise or vibration created by wind and thermal and structural movements.
  - Loosening or weakening of fasteners, attachments, and other components.
  - Failure of operating units.

**Structural:**

- Test according to ASTM E 330 as follows:
  - ✓ When tested at positive and negative wind-load design pressures, assemblies do not evidence deflection exceeding specified limits.
  - ✓ When tested at 150 percent of positive and negative wind-load design pressures, assemblies, including anchorage, do not evidence material failures, structural distress, or permanent deformation of main framing members exceeding 0.2 percent of span.
- Air Infiltration: Test according to ASTM E 283 for infiltration as follows:
  - ✓ Fixed Framing and Glass Area: Maximum air leakage of 6.24 lb/sf.
- Water Penetration under Static Pressure: Test according to ASTM E 331 as follows:
  - ✓ No evidence of water penetration through fixed glazing and framing areas when

tested according to a minimum static-air-pressure differential of 20 percent of positive wind-load design pressure, but not less than 15 lb/sf.

- Water Penetration under Dynamic Pressure: Test according to AAMA 501.1 as follows:
  - ✓ No evidence of water penetration through fixed glazing and framing areas when tested at dynamic pressure equal to 20 percent of positive wind-load design pressure, but not less than 15 lb/sf.
  - ✓ Maximum Water Leakage: No uncontrolled water penetrating assemblies or water appearing on assemblies' normally exposed interior surfaces from sources other than condensation. Water leakage does not include water controlled by flashing and gutters, or water that is drained to exterior.
- Seismic Performance: Glazed aluminum curtain walls shall withstand the effects of earthquake motions determined according to applicable codes by Design Team
  - ✓ Seismic Drift Causing Glass Fallout: Complying with criteria for passing based on building occupancy type when tested according to AAMA 501.6 at design displacement and 1.5 times the design displacement.
  - ✓ Vertical Interstory Movement: Complying with criteria for passing based on building occupancy type when tested according to AAMA 501.7 at design displacement and 1.5 times the design displacement.
  - ✓ Energy Performance: Certify and label energy performance according to NFRC. Fixed glazing and framing areas shall have U-factor of not more than that

## SECTION 4 - PERFORMANCE REQUIREMENTS

required by the most stringent Energy Code as determined according to NFRC.

- ✓ Solar Heat Gain Coefficient: Fixed glazing and framing areas shall have a solar heat gain coefficient of no greater than that required by the most stringent Energy Code as determined according to NFRC 200.
- ✓ Condensation Resistance: Fixed glazing and framing areas shall have an NFRC-certified condensation resistance rating of no less than 45 as determined according to NFRC 500.
- Thermal Movements: Allow for thermal movements resulting from ambient and surface temperature changes.

**Minimum acceptable finishes:**

- Clear Anodic Finish: AAMA 611, AA-M12C22A41, Class I, 0.018 mm or thicker
- High-Performance Organic Finish: Two-coat fluoropolymer finish complying with AAMA 2605 and containing not less than 70 percent PVDF resin by weight in color coat.
  - ✓ Acceptable manufacturers: Kawneer, EFCO or approved equal.

**4.3.16 Exterior Doors**

Exterior doors must comply with the most stringent energy code requirements for thermal performance and air infiltration. Any stainless steel utilized in doors or door hardware shall be Type 316. Type 304 stainless steel will be unacceptable. Storefront doors shall be utilized at vestibule entrances to administrative and office areas.

All exterior doors, including roof access doors, shall be coordinated with the security/intrusion detection/access control system design for the facility.

**4.3.17 Exterior Hollow Metal Doors and Frames**

The following technical requirements shall be met by the Design Team where hollow metal doors are utilized as a part of the building enclosure:

- General: Maximum-Duty Doors and Frames: SDI A250.8, Level 4.
- Physical Performance: Level A according to SDI A250.4.
- Frames: Metallic-coated steel sheet, minimum 14 gauge. All frames to be fully welded, and of commercial quality cold rolled sheet metal in conformance with ASTM A1008. Exterior frames (frames from conditioned to unconditioned spaces) shall be thermally broken, constructed of hot-dip galvanized steel in conformance with ASTM A-653, G90 coating designation.
- Lites: Exterior hollow metal doors to have insulated glass narrow lites or half lites as directed by the SFMTA.
- Anchors: Masonry Type: Locate anchors not more than 16-inches from top and bottom of frame. Space anchors not more than 32-inches o.c., to match coursing, and as follows: Three anchors per jamb from 60- to 90-inches high.
- Stud Wall Type: Locate anchors not more than 18-inches from top and bottom of frame. Space anchors not more than 32-inches o.c. and as follows: Three anchors per jamb up to 60-inches high.
- Door Hardware: Locking and keying systems shall be fully compatible with the SFMTA standard system.
  - ✓ All exterior doors shall be coordinated with the security/intrusion detection/access

control system design for the facility and shall comply with security standards.

- ✓ Door and Frame Finishes: Doors and frames to be factory primed with galvalume primer compatible with top coats by the same manufacturer and then field painted. Exterior service doors and frames shall be finished with a high performance industrial coating.

**4.3.18 Sectional Doors**

The following technical requirements shall be met by the Design Team if sectional doors are utilized as a part of the building enclosure:

**Special Warranty:**

- Manufacturer agrees to repair or replace components of sectional doors that fail in materials or workmanship within specified warranty period.
  - ✓ Warranty Period: Minimum Two (2) years from date of Substantial Completion.

**Performance Requirements:**

- Structural Performance:
  - ✓ Design Wind Load: as determined by Design Team per applicable codes.
  - ✓ Deflection Limits: Design sectional doors to withstand design wind loads without evidencing permanent deformation or disengagement of door components.
    - Deflection of door sections in horizontal position (open) shall not exceed 1/120 of the door width.
    - Deflection of horizontal track assembly shall not exceed 1/240 of the door height.
    - Seismic Performance: Sectional doors shall withstand the effects of earthquake

**SECTION 4 - PERFORMANCE REQUIREMENTS**

motions determined according to ASCE/SEI 7 and as determined by Design Team per applicable codes.

- Doors:
  - ✓ Sectional door formed with hinged sections and fabricated according to DASMA 102 consisting of minimum 16 gauge galvanized steel exterior face and minimum 26 gauge steel interior face with polystyrene insulation with fire retardant additive to meet requirements of UL R-1894A. R-Value for door shall meet or exceed Energy Code requirements.
  - ✓ Operation Cycles: door components and operators capable of operating for not less than 25,000 cycles.
  - ✓ Air infiltration: Maximum 0.08 CFM/sf.
  - ✓ Track Configuration: Vertical Lift.
  - ✓ Provide replaceable weather seals at jambs, head and sill.
  - ✓ Provide Keyed lock (compatible with the SFMTA system) with interlock switch for automatic operator.
  - ✓ Provide kick plate
- Operator:
  - ✓ Electric Motor Operation: Provide UL listed electric operator, size and type as recommended by manufacturer to move door in either direction at not less than 2/3 foot nor more than 1 foot per second. Operator shall meet UL 325/2010 requirements for continuous monitoring of safety devices.
  - ✓ Usage Classification: Heavy-duty, 25 or more cycles per hour and more than 90 cycles per day.
  - ✓ Motor Exposure: Exterior, dust, wet, or humid.

- ✓ Emergency Manual Operation: Chain type.
- ✓ Acceptable Safety/Obstruction Detection Devices (provide a minimum of one of the following): photoelectric sensor, electric sensing edge, pneumatic sensing edge.
- ✓ Control Station: Interior and exterior, exterior location to be security access controlled.
- Finish: Door to be finished per system HPC-3.
- Acceptable Products: Model 418 by Overhead Door or approved equal

**4.3.19 Exterior Door Hardware**

All door hardware sets are to be reviewed and approved by the SFMTA. Default hardware material to be stainless steel. Alternate materials may be utilized with the SFMTA approval.

At a minimum, provide the following standard sets of hardware for exterior doors (single doors listed – adjust for pairs of doors accordingly):

Storefront doors: Offset Pivots (three minimum), surface mounted closer, push/pull set, exit device (as required by code), weatherstripping/sweep, threshold, entry/exit device (as applies) – the SFMTA standard card reader access control system and/or intrusion detection alarm. For doors without access control provide deadlock and cylinder.

Hollow Metal Personnel door: Hinges (3 minimum), mortise lockset, surface mounted closer, stop, exit device (as required by code), weatherstripping/sweep, rain drip, kick plate, threshold, entry/exit device (as applies), the SFMTA standard card reader access control system (as applies), door contact.

Hollow Metal Service Door (exit only): Hinges (three minimum), mortise lockset, surface mounted closer, stop, exit device (as required by code), weatherstripping/sweep, rain drip, kick plate, threshold, entry/exit device (as applies), the SFMTA standard intrusion detection (as applies),

Provide internal flush bolt for pairs of non-egress doors with an inactive leaf. Provide an automatic flush bolt and coordinator for doors with two active leaves.

**4.3.20 Exterior Stairs**

Exterior stairs shall be constructed of cast in place concrete with non-slip surface finish treads (Light broom finish with grooves cast directly in the treads).

**4.3.21 Exterior Handrails and Guardrails**

All handrails and top guardrails shall be stainless steel 316 with random orbital finish. Intermediate infill of railings may be stainless steel (preferred) or painted steel with highest durability paint system. Where welded wire mesh is used, use stainless steel or steel mesh with each joint welded prior to painting otherwise the joints will not be coated with paint and they will rust.

**4.3.22 Roof Coverings**

Roofing systems selected shall meet the most stringent Energy Code requirements for thermal and air barrier performance and shall meet LEED Gold certification requirements. Roofing must also meet all applicable City and County of San Francisco Building Code criteria as well as general recommendations and guidelines of the National Roofing Contractors Association (NRCA) Roofing and Waterproofing Manuals. Selection of roofing systems shall be driven

## SECTION 4 - PERFORMANCE REQUIREMENTS

by a requirement for long term durability and appearance as well as sustainable criteria to reduce the Heat Island Effect. Roof deck coverings shall be UL listed Class A or Class B in accordance with the IFC and NFPA. Roofing design shall facilitate adequate shedding and diversion of water from the storm water system to use in landscape irrigation and water re-use systems. Flashing shall be either stainless steel, or steel with a baked on finish or factory finished to match metal panel systems.

If selected, metal panel steep slope roofing shall be of the architectural standing seam type and shall be replaceable without disturbing the building occupants. Metal roofing must comply with the NRCA Waterproofing Manual and the Metal Building Manufacturers Association (MBMA) Metal Roofing Systems Design Manual and provide adequate water-shedding with a focus on diversion of water from the storm water system to use in landscape irrigation or other water reuse systems.

If selected, low slope roofing shall be a single ply system such as TPO or PVC. EPDM, built up or modified bitumen roofing will not be acceptable. Type 316 stainless steel conductor boxes, gutters and downspouts with stainless steel flashing shall be required.

Asphalt or wood shingles and clay tile will not be acceptable roof materials.

The roofing system selected must comply with the insurer's FM ratings for wind, fire and storm warranty. Coordinate roofing system selected with mounting for future photovoltaic requirements.

**4.3.23 Thermoplastic Polyolefin (TPO) Roofing**

Provide a fully adhered roofing system with Flexible Walkways to all roof mounted elements requiring maintenance. Roofing system shall

include substrate board, ASTM C 1177/C, glass mat and slip sheet.

- Basis of design product: Firestone UltraPly™ TPO SA with Secure Bond™ Technology or approved equal.
- Warranty Period: Twenty five (25) years from substantial completion.
- Provide metal termination bars, metal battens, pourable sealers, preformed cone and vent sheet flashings, preformed inside and outside corner sheet flashings, T-joint covers, lap sealants, termination reglets, and other accessories as required.

**4.3.24 Polyvinyl-Chloride (PVC) Roofing**

Provide a fully adhered roofing system with Flexible Walkways to all roof mounted elements requiring maintenance. Roofing system shall include substrate board, ASTM C 1177/C, glass mat and slip sheet. PVC Sheet: ASTM D 4434/D 4434M, Type II, Grade I, glass-fiber reinforced, felt backed, 60 mils thickness.

- Basis of design product: Sikaplan Adhered Energy Smart Roof membrane or approved equal.
- Warranty Period: Fifteen (15) years from substantial completion.

**4.3.25 Standing Seam Metal Roof Panels**

Provide factory-formed metal roof panels designed to be installed by lapping and interconnecting raised side edges of adjacent panels and mechanically attaching panels to supports using concealed clips in side laps. Include clips, cleats, pressure plates, and accessories required for weather tight installation. Roof Panels shall be minimum 22 gauge.

- Minimum Finish requirements: Two coat fluoropolymer (AAMA 2605. Fluoropolymer

finish containing not less than 70 percent PVDF resin by weight in color coat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions), - Kynar 500/ Hylar 5000.

- Basis of Design Product: AEP Span Klip Rib or Design Span HP.

**4.3.26 Canopies and Protective Covers**

Provide canopies or protective covers at all entrances to the building. All overhangs and coverings shall be designed to prevent bird nesting and shall have a minimum 1.5 percent slope. Structural performance of canopies shall be determined by a licensed professional engineer and shall withstand the effects of gravity loads and the additional live, roof, snow, seismic and wind loads and stresses as determined by the Design Team per applicable codes.

**4.3.27 Skylights**

Skylights must comply with Energy Code performance requirements and fenestration limitations as well as applicable building code provisions. Openings associated with mechanical equipment or roof access shall comply with all energy that apply to roof coverings. All roof openings shall be coordinated with the security/intrusion detection/access control system design for the facility.

Laminated insulated glass skylights with white translucent interlayer are to be the basis of design. Thermally broken frames and insulated curbs, Preference is for use of clerestory daylighting strategies in lieu of horizontal glazing.

With the SFMTA approval and contingent upon the proposed design, use of factory pre-

## SECTION 4 - PERFORMANCE REQUIREMENTS

engineered, 4-inch thick aluminum skylight with translucent panel, thermal break core, 60 percent light transmission. Kalwall Standard Skylites or approved equal. Kalwall Corrosion-resistant finish with a 10 year finish warranty.

**4.3.28 Roof Accessories**

Pitch pockets and similar configured penetrations are prohibited. Use of sheet metal enclosures similar to NCRA TS-15 detail required.

Horizontal clear space of 24-inches shall be provided between all penetrations, curbs, parapets, similar transitions to allow for sufficient space to properly install, maintain and replace roofing systems.

**General Performance:**

Roof accessories shall withstand exposure to weather and resist thermally induced movement without failure, rattling, leaking, or fastener disengagement due to defective manufacture, fabrication, installation, or other defects in construction.

- Roof Curbs and Equipment supports: Prefabricated aluminum, clear anodic finish, internally reinforced and factory insulated units with integrally formed roof deck-mounting flange at perimeter bottom. Provide curbs to minimum height of 12-inches above roofing surface.
- Roof Hatch: Prefabricated aluminum, clear anodic finish, thermally broken roof hatch with integrally formed roof deck-mounting flange at perimeter bottom. Note: a hatchway would be in addition to the required full stair roof access. Hardware: Spring operators, hold-open arm, stainless-steel spring latch with turn handles, stainless-steel butt- or pintle-type

hinge system, and padlock hasps inside and outside. Intrusion detection shall be provided.

- ✓ Safety Railing System: Roof-hatch manufacturer's standard system including rails, clamps, fasteners, safety barrier at railing opening, and accessories required for a complete installation; attached to roof hatch and complying with 29 CFR 1910.23 requirements and authorities having jurisdiction.
- ✓ Provide roof-hatch manufacturer's standard ladder-assist post and attachments.
- ✓ Basis of Design product: Bilco thermally broken roof hatch.

**4.3.29 Roof Access & Safety**

Roof access shall be provided for all roof areas. Fixed metal ladders shall be provided where stair access is not available. Walk pads shall be installed on low slope roofs to allow access to all roof mounted equipment requiring servicing. Mounting equipment on steep slope roofs is discouraged due to the lack of easy access.

- Provide OSHA compliant fall protection systems for all roof areas. If any mechanical equipment is mounted on the roof it must meet the screening and maximum building height requirements allowed by the Bel-Red Ordinance.
- Provide roof to roof access (gangways) from roof areas that are not accessible by fire lane at ground level – coordinate any access requirements with the fire department.
- Changes in level on the roof exceeding 30-inches shall utilize a ladder or over the parapet ladder and platform complying with 29 CFR 1910.27. Ladders shall be constructed

of stainless steel or aluminum. Rungs shall be provided an integral abraded finish. Galvanized or HPC painted ladders are not acceptable.

**4.3.30 Exterior Joint Sealants**

Provide joint sealants, backings, and other related materials that are compatible with one another and with joint substrates under conditions of service and application, as demonstrated by joint-sealant manufacturer, based on testing and field experience. Joints shall be designed to meet the movement requirements for the installed conditions and shall present an aesthetic appearance that does not detract from the appearance of the building. The durability of the sealant shall also impact selection including aging characteristics and ultra-violet radiation, moisture, temperature, cyclic joint movement, movement during curing, and bio-degradation. Provide sealant backing or bond breaker as needed for specific applications.

Only sealants that have a current Validation Certificate from the SWRI (Sealant, Waterproofing & Restoration Institute) shall be utilized in the project. The Design Team shall confirm that all sealants selected meet the anticipated joint movement, are compatible with the materials they come in contact with and will adhere to the substrate(s) properly. Indicate joint locations, materials and spacing in construction document plans, elevations and details. Utilize sealants as follows:

- Latex (water based) sealants - not allowed on the exterior of the building.
- Acrylic (solvent-based) sealants – allowable for limited movement joints only as approved by the SFMTA.

## SECTION 4 - PERFORMANCE REQUIREMENTS

- Butyl (solvent-based) – acceptable sealant for gutters, foundations and other non-exposed exterior joints.
- Silicone sealants – acceptable sealant for glass to metal framing systems and other porous and non-porous materials such as ceramic or stone panels.
- Polyurethane sealants – acceptable sealant for higher movement joints in concrete, masonry, metals, around window and door openings, expansion joints and other joints as approved by the sealant manufacturer.

Comply with joint sealant manufacturer's written instructions for products and applications indicated, unless more stringent requirements apply. Comply with recommendations in ASTM C 1193 for use of joint sealants as applicable to materials, applications, and conditions indicated.

**4.3.31 Expansion Control**

Provide expansion control systems to accommodate building movement resulting from causes such as thermal change, seismic force or wind sway. Submit movement control diagrams addressing full structure. Submit calculations and rationale for joint locations, types and sizes. Expansion control elements shall match or be of a compatible color with the adjacent materials. Any exposed metal plates or covers shall be Type 316 stainless steel.

**4.3.32 Exterior Signage**

Exterior signage shall be designed and constructed per the SFMTA's corporate identify and brand standards. Refer to the Design Guidelines for notes on incorporating the SFMTA and Muni brands within the larger building architecture. The SFMTA shall sign off on all final signage designs. The SFMTA facility signage shall include:

- Customer Signage:
  - ✓ Main Facility Signage: provide at each vehicle entrance to the site.
- Exterior Door Signs: at all personnel and service doors.
- Operational Signage: Provide Operational signage as required per project. Coordinate with the SFMTA Operations.
- A custom designed facility sign shall be provided on the exterior façade of the facility. Sign shall be visible and legible, and be derived from the architectural design of the facility. Facility façade sign shall be illuminated.

Signage shall be designed to be architecturally compatible with the building and shall contribute to the overall character of the facility. Site signage within the facility shall follow the SFMTA standards and shall clearly identify circulation and safety elements as well as hazardous areas.

**4.4 Interior Construction**

Interior partitions in any maintenance and storage or shop areas shall be reinforced concrete masonry or concrete extending to underside of deck. Concrete or concrete masonry units at a minimum height of 8-foot 0-inches above finished floor with metal stud and impact and moisture resistant fiberglass faced gypsum wall board or AC plywood partitions above may be proposed for appropriate areas and will be considered on a case by case basis. Provide masonry control joints at a maximum of 25-foot 0-inches on center in continuous partitions, at maximum one half control joint spacing from both sides of corners, at changes in wall height or thickness, at building movement joints and at all openings.

Partitions in administrative, office, support type areas shall be constructed of metal studs with gypsum board. All interior partitions assemblies enclosing conference rooms, restrooms, offices and all rooms provided with access control shall extend to underside of deck.

Partitions enclosing custodial rooms, sprinkler valve rooms and restrooms shall have a minimum 6-inch high concrete curb. Wall finish shall cover curb in restrooms. Curb may be exposed in other rooms.

Refer to the Room Data Sheets for finishes and furnishings by room type. Joints and gaps at the base and top of the wall shall be sealed as well as joints at ceilings, corners or changes in material. Wall penetrations, including but not limited to ductwork, outlets or j-boxes, shall also be acoustically sealed in these rooms.

Submit for approval by the SFMTA product data, certificates and test reports verifying materials selected conform to performance standards listed in this document.

**4.4.1 Interior Masonry**

Concrete masonry units - Exterior Masonry, for concrete masonry unit descriptions and requirements. All interior CMU must be precision faced with a high performance coating. Outside corners and returns shall be bullnose block profile typical.

**4.4.2 Gypsum Board****Performance Requirements:**

- Fire-Resistance-Rated Assemblies: For fire-resistance-rated assemblies, provide materials and construction identical to those tested in assembly according to ASTM E 119 by an independent testing agency.
- STC-Rated Assemblies: For STC-rated assemblies, provide materials and

## SECTION 4 - PERFORMANCE REQUIREMENTS

- construction identical to those tested in assembly according to ASTM E 90 and classified according to ASTM E 413 by an independent testing agency.
- Horizontal Deflection: For wall assemblies, limited to 1/240 of the wall height based on horizontal loading of 5 lb/sf.
- Attach all gypsum board to steel stud partitions in accordance with the Northwest Wall and Ceiling Bureau (NWCB) Specification Standards Manual and ASTM C840.
- Paper faced gypsum board will not be allowed.
- Acceptable Interior Gypsum Board: Gypsum Board (office and support areas), Type X: ASTM C 1396/C 1396M, 5/8-inch.
  - ✓ Basis of Design: DensArmor Plus Fireguard High Performance Interior Panel.
- Abuse-Resistant Gypsum Board (corridor/high traffic/circulation areas, locker rooms (when not protected by lockers)): ASTM C 1629/C 1629M, Type X, 5/8-inch.
  - ✓ Surface Abrasion: Meets or exceeds Level 1 requirements.
  - ✓ Surface Indentation: Meets or exceeds Level 1 requirements.
  - ✓ Single-Drop Soft-Body Impact: Meets or exceeds Level 1 requirements.
  - ✓ Basis of Design: DensArmor Plus Fireguard Abuse Resistant Interior Panel.
- Impact-Resistant Gypsum Board (shop , tool box storage rooms, materials handling, shipping areas to 12-feet by 0-inches above finish floor.): ASTM C 1629/C 1629M, Type X, 5/8-inch.

- ✓ Basis of Design: DensArmor Plus Fireguard Impact Resistant Panel.
- Glass-Mat Interior Gypsum Board: ASTM C 1658/C 1658M. With fiberglass mat laminated to both sides. Specifically designed for interior use; Type X, 5/8-inch.
- Acceptable Tile Backing Panels:
  - ✓ Cementitious Backer Units: ANSI A118.9 and ASTM C 1288 or ASTM C 1325, with manufacturer's standard edges, 5/8-inch thick. Tile backer board not acceptable.
- Auxiliary Materials:
  - ✓ Sound-Attenuation Blankets (required at all interior metal stud and gypsum board partitions and as required by mandated STC ratings in Room Data Sheets, Section Four of the Facility Program): ASTM C 665, Type I (blankets without membrane facing) produced by combining thermosetting resins with mineral fibers manufactured from glass, slag wool, or rock wool.
    - Fire-Resistance-Rated Assemblies: Comply with mineral-fiber requirements of assembly.
  - ✓ Acoustical Sealant: Manufacturer's standard non-sag, paintable, non-staining latex sealant complying with ASTM C 834. Product effectively reduces airborne sound transmission through perimeter joints and openings in building construction as demonstrated by testing representative assemblies according to ASTM E 90.
- Gypsum Board Finish Levels: Finish panels to levels according to ASTM C 840. Finish all exposed gypsum board to a level 5 equivalent finish (use of a high solids primer or skim

coat), ready to receive paint regardless of final finish. All exposed gypsum board is to be primed and painted UNO. Finish shall be established by use of mock-up. Concealed areas may be a level 3 finish and remain unpainted unless vapor control is needed.

## 4.4.3 Non Structural Metal Framing

**Performance Requirements:**

- Fire-Test-Response Characteristics: For fire-resistance-rated assemblies that incorporate non-load-bearing steel framing, provide materials and construction identical to those tested in assembly indicated, according to ASTM E 119 by an independent testing agency.
- STC-Rated Assemblies: For STC-rated assemblies, provide materials and construction identical to those tested in assembly indicated, according to ASTM E 90 and classified according to ASTM E 413 by an independent testing agency.
- Comply with requirements in ASTM C 840 that apply to framing installation for gypsum board assemblies.
- Framing System:
  - ✓ Framing Members, General: Comply with ASTM C 754.
  - ✓ Steel Sheet Components: Comply with ASTM C 645 requirements for metal.
  - ✓ Protective Coating: ASTM A 653/A 653M, G60 hot-dip galvanized.
  - ✓ Studs and Runners: ASTM C 645.
  - ✓ Minimum Base-Metal Thickness: 0.0329-inch (22 gauge).
  - ✓ Slip-Type Head Joints: Where required by design conditions, provide one of the following:

## SECTION 4 - PERFORMANCE REQUIREMENTS

- Double-Runner System: ASTM C 645 top runners, inside runner with 2-inch deep flanges in thickness not less than indicated for studs and fastened to studs, and outer runner sized to friction fit inside runner.
- Deflection Track: Steel sheet top runner manufactured to prevent cracking of finishes applied to interior partition framing resulting from deflection of structure above; in thickness not less than indicated for studs and in width to accommodate depth of studs.
- Firestop Tracks: (where required in fire rated assemblies) Top runner manufactured to allow partition heads to expand and contract with movement of structure while maintaining continuity of fire-resistance-rated assembly indicated; in thickness not less than indicated for studs and in width to accommodate depth of studs.
- ✓ Provide blocking and Bracing behind all wall mounted items:
  - Flat Strap and Backing Plate: Steel sheet, minimum base-metal thickness: 0.0747 (14 gauge).
  - Cold-Rolled Channel Bridging: Steel, 0.0538-inch minimum base-metal thickness, with minimum 1/2-inch wide flanges.
- ✓ Acceptable Furring:
  - Hat-Shaped, Rigid Furring Channels: ASTM C 645, minimum .0179 (25 gauge).
  - Z-Shaped Furring: With slotted or non-slotted web, face flange of 1-1/4-inch, wall attachment flange of 7/8-inch, minimum uncoated-metal thickness of 0.0179-inch, and depth required to fit insulation thickness indicated.
- ✓ Suspension Systems:
  - Tie Wire: ASTM A 641/A 641M, Class 1 zinc coating, soft temper, 0.062-inch diameter wire, or double strand of 0.048-inch diameter wire.
  - Wire Hangers: ASTM A 641/A 641M, Class 1 zinc coating, soft temper, 0.16-inch in diameter.
  - Carrying Channels: Cold-rolled, commercial-steel sheet with a base-metal thickness of 0.0538-inch and minimum 1/2-inch wide flanges.
- ✓ Furring Channels (Furring Members):
  - Cold-Rolled Channels: 0.0538-inch uncoated-steel thickness, with minimum 1/2-inch wide flanges, 3/4-inch deep.
  - Steel Studs and Runners: ASTM C 645, minimum 0.0179-inch.
  - Hat-Shaped, Rigid Furring Channels: ASTM C 645, 7/8-inch deep.
- ✓ Grid Suspension System for Gypsum Board Ceilings: ASTM C 645, direct-hung system composed of main beams and cross-furring members that interlock.
- ✓ Provide ceiling and wall access doors as required, complete with cylinder locks compatible with bi-lock cylinders. Manufacturer's standard factory applied baked enamel primer and shall be field finished to match adjacent materials.
- Basis of Design: Milco, Cierra or approved equal.
- Ceiling access shall be provided for each room and at each equipment location.

## 4.4.4 Operable Partitions

**Performance Requirements:**

- Seismic Performance: Operable panel partitions shall withstand the effects of earthquake motions determined according to ASCE/SEI 7 and as determined by the Design Team per applicable codes.
- Acoustical Performance: Provide operable panel partitions tested by a qualified testing agency for the following acoustical properties according to test methods indicated:
  - ✓ Sound-Transmission Requirements: Operable panel partition assembly tested for laboratory sound-transmission loss performance according to ASTM E 90, determined by ASTM E 413.
  - ✓ Provide minimum STC 52.
- Fire-Test-Response Characteristics: Provide panels with finishes complying with one of the following as determined by testing identical products by UL or another testing and inspecting agency acceptable to authorities having jurisdiction:
  - ✓ Surface-Burning Characteristics: Comply with ASTM E 84 or UL 723; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.
    - Flame-Spread Index: 25 or less.
    - Smoke-Developed Index: 450 or less.

## SECTION 4 - PERFORMANCE REQUIREMENTS

- ✓ Fire Growth Contribution: Complying with acceptance criteria of local code and authorities having jurisdiction when tested according to NFPA 265 Method B Protocol or NFPA 286.
- Operation: Manual, paired panels. Design shall provide for door recess and cover such the door pocket does not intrude into the combined room configuration.
- Panel Construction: Continuous 20 Gauge steel panel faces invisibly welded to minimum 16 gauge one-piece steel frames.
- Finishes: Color and texture chosen by the SFMTA from full range of Manufacturer fabrics.
- Acceptable Products: Moduflex Model 510PP fixed all of the used from 5.5 and on.

## 4.5 - Interior Glazing

Interior glazing shall be installed in prefinished aluminum or painted hollow metal frames. Glazing shall be minimum 1/4-inch thick laminated, heat strengthened glass. Glazing between conditioned and unheated spaces shall be insulated.

## 4.5.1 - Interior Doors

Interior doors in administrative, office type areas shall be solid core wood except where hollow metal (steel) doors are required to meet the fire rating of the partition or where doors are anticipated to receive heavy use such as corridors or restrooms. Office doors shall have minimum 12-inch wide sidelights. Frames for wood doors and sidelights shall be hollow metal. Interior aluminum frame glazed storefront doors shall be used at vestibules in administrative/office type areas. Refer to PR Section 5.3.13 Storefront, for additional information concerning storefront.

Doors in maintenance, shop, support and storage areas shall be hollow metal (steel) as described below. Doors and frames opening into areas of excessive moisture or into a corrosive environment shall be fiberglass reinforced structural shapes designed and finished for these conditions. Refer to PR Section 5.4 for descriptions and requirements on FRP Doors. Doors to mechanical rooms shall be hollow metal (steel) with hollow metal frames identical to those in the shop areas.

Cross corridor doors which are anticipated to remain closed shall have half lites unless restricted to a smaller area by fire ratings. Doors opening into areas in which a person may be expected to be in the area of the door swing shall have half lites.

All personnel doors on accessible routes shall comply with the Americans with Disabilities Act (ADA) Standards.

Where required, interior doors shall be coordinated with the security/intrusion detection/access control system design for the facility.

Locking and keying systems shall be fully compatible with the SFMTA standard system. Interior door hardware finish shall be stainless steel. Stainless steel kick plates shall be provided at all maintenance and shop doors as well as restroom and stairwell doors.

## 4.5.2 - Interior Door Requirements and Warranties

**Regulatory Requirements:**

- Fire-Rated Assemblies: Complying with NFPA 80 and listed and labeled by a qualified testing agency acceptable to authorities having jurisdiction for fire-protection ratings and temperature-rise limits indicated, based on testing at positive pressure according to NFPA 252 or UL 10C.

- Smoke and Draft Control Assemblies: Provide an assembly with gaskets listed and labeled for smoke and draft control by a qualified testing agency acceptable to authorities having jurisdiction, based on testing according to UL 1784 and installed in compliance with NFPA 105.
- Fire-Rated, Borrowed-Lite Assemblies: Complying with NFPA 80 and listed and labeled by a testing and inspecting agency acceptable to authorities having jurisdiction for fire-protection ratings indicated, based on testing according to NFPA 257 or UL 9.
- Wood Doors:
  - ✓ Solid core wood doors clad with wood veneer faces, WDMA premium grade. Veneer to be selected by the SFMTA; book matched. Veneer face assembly-Running match.
  - ✓ Basis of Design: Heritage Collection VT Industries or approved equal.
- Hollow Metal Doors:
  - ✓ Office and Administration areas:
    - Extra-Heavy-Duty Doors and Frames: SDI A250.8, Level 3.
    - Physical Performance: Level A according to SDI A250.4.
    - Minimum 16 gauge.
  - ✓ Shop, Support and Storage areas:
    - Maximum-Duty Doors and Frames: SDI A250.8, Level 4.
    - Physical Performance: Level A according to SDI A250.4.
    - Minimum 16 gauge.
    - Grouted frames will not be allowed.
  - ✓ Louvers: comply with SDI 111C.

## SECTION 4 - PERFORMANCE REQUIREMENTS

- Finish: Doors and frames to be factory primed with galvalume primer compatible with top coats by the same manufacturer and then field painted with a high performance industrial coating as defined in Prescriptive Specification section 09 96 00, High-Performance Coatings.
- Glazing for Wood or Hollow Metal Doors: Provide ¼-inch thick minimum heat strengthened, laminated glass with a lifetime warranty.
- Hollow Metal Frames:
  - ✓ Minimum 14 gauge, fully welded.
  - ✓ Jamb Anchors:
    - Masonry Type: Adjustable strap-and-stirrup or T-shaped anchors to suit frame size, not less than 0.042-inch thick, with corrugated or perforated straps not less than 2-inches wide by 10-inches long; or wire anchors not less than 0.177-inch thick.
    - Stud-Wall Type: Designed to engage stud, welded to back of frames; not less than 0.042-inch thick.
  - ✓ Floor Anchors: Formed from same material as frames, minimum thickness of 0.042-inch, and as follows:
    - Monolithic Concrete Slabs: Clip-type anchors, with two holes to receive fasteners.
    - Separate Topping Concrete Slabs: Adjustable-type anchors with extension clips, allowing not less than 2-inch height adjustment. Terminate bottom of frames at finish floor surface.
- Storefront doors:
  - ✓ Provide compatible non-insulated door from same manufacturer of storefront or curtainwall system selected. Refer to Section 5.3.13 Storefront for additional requirements.
- Overhead Coiling Doors
  - ✓ Insulated, motorized overhead coiling doors may be used at delivery and storage areas where applicable. Slats shall be stainless steel (minimum 22 gauge) or aluminum (minimum 18 gauge) and shall have a factory applied industrial quality finish. Doors must be provided with a lock with a master keyable cylinder that is compatible with the SFMTA standard system.
  - ✓ Warranty: minimum two (2) years from substantial completion.
  - ✓ Design Criteria:
    - Design Wind Load (where applicable): As determined by the Design Team per the applicable codes.
    - Deflection Limits (where applicable): Design overhead coiling doors to withstand design wind load without evidencing permanent deformation or disengagement of door components.
    - Seismic Performance: Overhead coiling doors shall withstand the effects of earthquake motions determined according to ASCE/SEI 7 and the appropriate component importance factor as determined by the Design Team per the applicable codes.
    - Operation Cycles: Door components and operators capable of operating for not less than 10,000 operation cycles (one cycle - door is opened from the closed position to the fully open position and returned to the closed position).
- Air infiltration (applicable between conditioned and heated only spaces): maximum rate of 0.08 CFM/sf when tested according to ASTM E 283 or DAMSA 105.
- Curtain R-value (applicable between conditioned and heated only spaces): as required by Energy Code, minimum R-7.
- ✓ Operator:
  - Electric, Standard duty usage classification; rated for a maximum of 20 cycles per hour.
  - Safety Features: sensor edge and photoelectric eye, emergency manual chain hoist assembly, provide an integral motor mounted interlock system to prevent damage to door and operator.
  - Controls: surface mounted manufacturer standard button control interior, key access exterior.
- ✓ Finish: factory applied powder coat.
- ✓ Acceptable Product: (Insulated) Stormtite 625 by Overhead Door or approved equal; (Non-Insulated) Model 610 by Overhead Door or approved equal.
- Access Doors: Provide ceiling and wall access doors where required for service or maintenance, complete with cylinder locks compatible with the SFMTA standard lock system. Provide fire rated access doors and frames complying with NFPA 80 that are listed and labeled by a qualified testing agency for fire protection ratings required, according to NFPA 252 or UL 10B. All doors to have

## SECTION 4 - PERFORMANCE REQUIREMENTS

manufacturer's standard factory applied powder coated primer and field painted to match adjacent materials.

- Special Door Requirements:
  - ✓ Doors providing access to the Telecommunication Rooms shall have replaceable gaskets, seals and sweeps at the jambs, head and sill to prevent the entry of dirt and debris.

## 4.5.3 - Interior Door Hardware

All door hardware sets and to be reviewed and approved by the SFMTA. Default hardware material shall be stainless steel. Alternate materials may be utilized with the SFMTA approval. Doors in fire-rated openings shall have hardware that is certified by Underwriters Laboratories (UL) or Warnock Hersey (WH).

At a minimum, provide the following standard sets of hardware for interior doors (single doors listed – adjust for pairs of doors accordingly):

- Storefront doors (vestibule): Offset Pivots (3 minimum), closer, push/pull set, stop.
- Personnel door (office area): Hinges (3 minimum), mortise lockset (secure) or mortise latchset (non-secure), stop, silencers.
- Hollow metal door (shop and office area perimeter): Hinges (3 minimum), mortise lockset (secure) or Mortise latchset (non-secure), closer, stop, kick plate or armor plate (materials handling), silencers, exit device (as required by code), entry/exit device (as applies), the SFMTA standard card reader access control system and/or intrusion detection alarm (as applies).
- Hollow metal Stair/Exit Door: Hinges (3 minimum), exit device, closer, stop, kick plate, silencers.

- Restrooms, Locker rooms: Hinges (3 minimum), push/pull, closer, stop, kick plate, mop plate, silencers.
- Custodial Rooms (Janitor Closet): Hinges (3 minimum), mortise lockset, stop, kick plate, mop plate, silencers

## 4.5.4 - Interior Joint Sealants and Firestopping

Provide joint sealants, backings, and other related materials that are compatible with one another and with joint substrates under conditions of service and application, as demonstrated by joint-sealant manufacturer, based on testing and field experience. Joints shall be designed to meet the movement requirements for the installed conditions and shall present an aesthetic appearance that does not detract from the appearance of the building. The durability of the sealant shall also impact selection including aging characteristics, moisture, temperature, cyclic joint movement, movement during curing, and bio-degradation. Provide sealant backing or bond breaker as needed for specific applications. Provide mildew resistant sealants in wet areas.

Only sealants that have a current Validation Certificate from the SWRI (Sealant, Waterproofing & Restoration Institute) shall be utilized in the project. The Design Team shall confirm that all sealants selected meet the anticipated joint movement, are compatible with the materials they come in contact with and will adhere to the substrate(s) properly. Indicate joint locations, materials and spacing in construction document plans, elevations and details. Utilize sealants as follows:

- Latex (water based) sealants – acceptable for acoustic joints and firestopping systems as tested by UL Classified.

- Acrylic (solvent-based) sealants – acceptable for acoustic joints and firestopping systems as tested by UL Classified.
- Silicone sealants – acceptable sealant for plumbing fixtures, tile and stone applications and other porous and non-porous materials such as ceramic or stone panels.
- Polyurethane sealants – acceptable sealant for higher movement joints in concrete, masonry, metals, around window and door openings, expansion joints and other joints as approved by the sealant manufacturer.

Comply with joint sealant manufacturer's written instructions for products and applications indicated, unless more stringent requirements apply. Comply with recommendations in ASTM C 1193 for use of joint sealants as applicable to materials, applications, and conditions indicated.

Joint firestopping systems shall accommodate building movements without impairing their ability to resist the passage of fire and hot gases.

- Provide UL Classified firestopping systems at all penetrations and joints in or between Fire-Resistive Rated Construction complying with ASTM E 1966 or UL 2079.
- Provide fire-resistive joint systems in smoke barriers with ratings determined per UL 2079 based on testing at a positive pressure differential of 0.30-inch wg.
- Provide flame-spread and smoke-developed indexes for exposed joint firestopping systems of less than 25 and 450, respectively, as determined per ASTM E 84.
- Provide components of fire-resistive joint systems, including primers and forming materials, that are needed to install

## SECTION 4 - PERFORMANCE REQUIREMENTS

elastomeric fill materials and to maintain ratings required. Use only components specified by joint firestopping system manufacturer and approved by the qualified testing agency for conditions indicated.

**4.5.5- Expansion Control**

Provide expansion control systems to accommodate building movement resulting from causes such as thermal change, seismic force or wind sway. Submit movement control diagrams addressing full structure. Submit calculations and rationale for joint locations, types and sizes. Expansion control elements shall match or be of a compatible color with the adjacent materials. Any exposed metal plates or covers shall be Type 316 stainless steel.

**4.6 Interior Stairs**

Communicating stairs in office and administration areas that are expected to be used on a daily basis shall be constructed of painted steel stringers with precast tread/riser units and landings or be fully pre-cast stair runs. The appearance of stairs in these areas shall be of a superior grade as approved by the SFMTA. Steel stairs used solely for egress and in shop and maintenance bay areas shall have precast tread/riser units or concrete filled metal pan treads with closed steel risers. All stair treads shall have a non-slip surface with a replaceable nosing consisting of an inset aluminum extrusion with abrasive anti-slip safety material. Open grating stairs will not be allowed. Epoxy connections for precast concrete treads will not be allowed.

Provide a minimum of one stair with direct access from the shop areas on the ground floor to the roof. This stair should have a fully enclosed interior landing and be protected by an enclosed penthouse with a hollow metal

door. Daylight should be provided within this stairwell to the extent allowable by the design. Exterior shall be provided a landing level with the door threshold. Landing shall be minimum of 5-feet, 0-inches deep and full width of stairwell with a minimum overhead canopy of the same size. Provide lighting, recessed weatherproof receptacle and hose bib at this location. All exterior doors shall be coordinated with the security/intrusion detection/access control system design for the facility.

Provide factory assembled stair units, fabricated by a firm or shop experienced and skilled in custom fabrication and construction of metal stairs and railings (as applies).

- Treads and risers for steel pan stairs: minimum 14 gauge steel.
- Landings for steel pan stairs: minimum 12 gauge.
- Stringers: steel channels or tubes, size and gauge to suite span and stair width.

**4.6.1 Handrail Construction**

All handrails (including supports) and top rails of guardrails shall be stainless steel 316 with random orbital finish.

**4.7 Interior Wall Finishes**

Wall finishes shall be selected on the basis of durability and low maintenance and shall comply with sustainability requirements for low-emitting materials. Finishes shall be aesthetically pleasing and appropriate to the building's function.

**4.7.1 Wall Finish Requirements**

- Paint:
  - ✓ Paint systems shall be designed for application on the partition or wall substrate and shall be designated by MPI (Master Painters Institute) numbers.

All systems shall meet or exceed MPI Premium Grade.

- Tile (excluding shower stalls):
  - ✓ Full wall height. Minimum of two colors to provide field and accent.
  - ✓ Install in compliance with the latest edition of the Tile Council of North America (TCNA) recommendations. For metal stud walls with cement board substrate utilize method W241. For masonry or concrete walls utilize method W211. Provide a waterproof membrane (A118.10) typical.
  - ✓ Glazed porcelain (ANSI 137.1), large format (Minimum 12-inches by 12-inches), 1/4-inch thick minimum.
  - ✓ Provide curved wall/floor cove and inside corners, bullnose, quarter round and any other special shapes required for smooth transitions and ease of cleaning. Color and type shall be chosen from Price Group 2 or greater and approved by the SFMTA.
  - ✓ Grout: low VOC, to inhibit the growth of mold and mildew, and meet ANSI A118.3. Provide Laticrete "Spectra-Loc" or approved equal.
- Tile (Shower stalls):
  - ✓ Full wall height. Minimum of two colors to provide field and accent.
  - ✓ Install in compliance with the latest edition of the Tile Council of North America (TCNA) recommendations. For metal stud walls with cement board substrate and mortar bed floor tile utilize method B415. For masonry or concrete walls utilize method B422. Provide a waterproof membrane (A108.13) typical. Complete

## SECTION 4 - PERFORMANCE REQUIREMENTS

- waterproofing is required including treatment at termination points.
- ✓ Glazed porcelain (ANSI 137.1), large format (Minimum 12-inches by 12-inches), 1/4-inch thick, price Group 2 or greater.
- ✓ Trim units: bullnose at external corners.
- ✓ Grout: low VOC, to inhibit the growth of mold and mildew, and meet ANSI A118.3.
- ✓ Provide Laticrete “Spectra-Loc” or approved equal.
- Wall Protection:
  - ✓ Provide minimum 16 gauge type 316 stainless steel corner guards with minimum 3-inch wings, 4-feet 0-inches high (minimum) at all outside corners. Mounted from top of rubber base, radius corners, beveled pre-drilled holes. Attach with SS screws.
- Stainless Steel Wall Panels: Provide minimum 18 gauge Type 316 with No. 4 satin finish. Maximize panel size for installation location. Screw mount panels unless otherwise directed.

## 4.7.2 Steel Finishes

Exposed structural steel, steel handrails, exposed piping and conduit and associated supports shall be painted construction and finishing.

## 4.7.3 Floor Finishes

Floor finishes shall be selected on the basis of durability, low maintenance and shall be easily replaceable. They shall comply with sustainability requirements for low-emitting materials. Floor finishes are listed by room on the Room Data Sheets found in Section Five. Finishes selected shall require. Provide

stainless steel transitions at all changes in flooring material. Provide maintenance materials for each floor type selected: five (5) full unopened boxes.

## 4.7.4 Floor Finish Requirements

**Natural Concrete:**

- Provide Euclid Surflex Light-Reflective Dry Shake Hardener sealed with Euclid Euco Diamond Hard or approved equal.
- Integrally Colored Ground and Polished Concrete:
  - ✓ Concrete to be mixed, placed and finished in compliance with “CPAA Recommendations for the Design, Specification, and Placement of Concrete Floor Slabs” from the Concrete Polishing Association of America.
- Color, aggregate size and polish level as selected and approved by the SFMTA.
- Mockup: at a location selected by the SFMTA place and finish a 10-foot by 10-foot area in compliance with “CPAA Recommendations for the Design, Specification, and Placement of Concrete Floor Slabs”.
- Installer shall have 5 years minimum experience with work of similar scope and quality and shall be a CPAA certified applicator.
- Acceptable Manufacturer: L.M. Scofield Company. Provide a complete system from one manufacturer including but not limited to colored admixture, curing and sealing compound, chemical hardener/densifier and curing compound for polished concrete.

**Walk Off Mats:**

- Provide walk off mats at all entrances and at transitions between the shop or storage

areas and office/administration areas.

Textured patterned loop, 100 percent type 6.6 nylon. Provide ‘Recourse II’ by Mannington Commercial or approved equal.

- Carpet Tile: Must comply with the specification developed by the San Francisco Department of the Environment, dated June 8, 2018.
- Resilient Flooring:
  - ✓ Rubber Tile: Performance Requirements:
    - Fire-Test-Response Characteristics: For resilient tile flooring, as determined by testing identical products according to ASTM E 648 or NFPA 253 by a qualified testing agency.
    - Critical Radiant Flux Classification: Class I, not less than 0.45 W/sq. cm.
    - Minimum 0.100-inch (2.54 mm) thick. Seams shall be chemically welded. Rubber tile selected shall be certified compliant with the “FloorScore” standard. Flooring adhesives shall be low VOC and shall meet the Carpet and Rug Institute Standard and “Green Label” program.
    - Provide: Endura Simply Smooth Flexibles by Burke or approved equal.
    - Rubber tile at Fitness area: Resilient Ecofitness Multifunctional Athletic Robber Flooring by Burke or approved equal.
- Linoleum Tile:
  - ✓ Minimum 2.5 mm (0.10-inch) thick, manufacturer standard size (minimum 10-inches by 10-inches).
  - ✓ Type II with polyester backing.
  - ✓ Heat welded seams.

**SECTION 4 - PERFORMANCE REQUIREMENTS**

- ✓ Warranty period: minimum five (5) years from date of Substantial Completion.
- ✓ Basis of Design: Modular Tile Linoleum Tile by Marmoleum or approved equal.
- Resilient Base:
  - ✓ ASTM F 1861 Type TS Rubber, Thermoset, Group I, minimum 4-inches high, 0.125-inch thick Floor Score Certified.
- Porcelain Tile :
  - ✓ Interior floor tile to be unglazed through body porcelain, minimum 1/4-inch thick, price Group 2 or greater. Provide all trim units: cove base, bullnose at external and internal corners, etc.
  - ✓ Install in compliance with the latest edition of the TCNA recommendations. Utilize method F114 with a cleavage membrane.
  - ✓ Tiles shall comply with ANSI A137.1 and have color extending uniformly through the body of the tile and provide a 0.5 percent maximum water absorption in accordance with ASTM C737.
  - ✓ Class Three (3) Commercial Medium to Heavy Traffic classification as rated by the manufacturer when tested in accordance with ASTM C1027-99 for visible abrasion resistance as related to foot traffic.
  - ✓ MOH Scale Rating of 7 or greater.
  - ✓ Slope tile floors to drain.
  - ✓ Provide expansion, control and isolation joints as needed to accommodate movement and maintain tile assembly integrity. Follow TCNA EJ171 Movement Joint Guidelines.
  - ✓ Provide waterproof membrane in shower areas in accordance with ANSI A118.10.
- ✓ Wet Dynamic Coefficient of Friction (DCOF): For tile installed on horizontal surfaces, provide products with the following values as determined by testing identical products per ANSI A137.1 Section 9.6 DCOF: minimum 0.60.
- ✓ Grout: low VOC, to inhibit the growth of mold and mildew, and meet ANSI A118.3.
- ✓ Provide Laticrete “Spectra-Loc” or approved equal.
- Tile and installation requirements for Shower stalls:
  - ✓ Install in compliance with the latest edition of the TCNA recommendations. For tile shower receptor utilize method B415 with a waterproof membrane. Terrazzo tile receptors may be utilized with the SFMTA approval. Complete waterproofing is required including treatment at termination points.
  - ✓ Tiles shall comply with ANSI A137.1 and have color extending uniformly through the body of the tile and provide a 0.5 percent maximum water absorption in accordance with ASTM C737.
  - ✓ Class Three (3) Commercial Medium to Heavy Traffic classification as rated by the manufacturer when tested in accordance with ASTM C1027-99 for visible abrasion resistance as related to foot traffic.
  - ✓ MOH Scale Rating of 7 or greater.
  - ✓ Slope tile floors to drain.
  - ✓ ADA compliant shower stalls shall slope to a trench drain at the back of the stall.
  - ✓ Provide integral soap dish.
  - ✓ Provide expansion, control and isolation joints as needed to accommodate movement and maintain tile assembly integrity. Follow TCNA EJ171 Movement Joint Guidelines.
  - ✓ Provide waterproof membrane in accordance with ANSI A118.10.
- movement and maintain tile assembly integrity. Follow TCNA EJ171 Movement Joint Guidelines.
- ✓ Provide waterproof membrane in accordance with ANSI A118.10.
- ✓ DCOF: For tile installed on horizontal surfaces, provide products with the following values as determined by testing identical products per ANSI A137.1 Section 9.6 DCOF: Minimum 0.60.

**4.7.5 Ceiling Finishes**

Durability and ease of maintenance and access shall drive the selection of ceiling finishes. Sustainability requirements for low-emitting materials and environmental product disclosure shall be followed. Ceilings with recycled content are preferred, but must meet performance criteria listed below. Acoustic properties of materials shall be considered and finishes shall be selected that reduce reverberation and noise to the greatest extent possible.

Coordination shall be required with security and communications systems and ceilings shall be designed to allow or prevent access to critical elements as needed by those systems. Access to mechanical, plumbing and electrical equipment requiring service or maintenance shall be designed into the selected ceiling systems. Ceiling access shall be provided for each room and at each equipment location.

Ceilings in maintenance bays, shops and associated storage, and the truck wash area shall be open to the deck. Exposed structural steel structure and deck, exposed piping, conduit, raceways and shall be painted.

Exposed insulation will not be allowed.

## SECTION 4 - PERFORMANCE REQUIREMENTS

**4.7.6 Acoustical Ceiling**

- Tile size: 24-inches by 24-inches by (min) 3/4-inch
  - ✓ Armstrong Ultima Square or Beveled Tegular or approved equal.
- Suspension system:
  - ✓ Direct-Hung, Double-Web Suspension System: Main and cross runners roll formed from and capped with cold-rolled steel sheet, prepainted, electrolytically zinc coated, or hot-dip galvanized, G30 (Z90) coating designation.
  - ✓ Prelude XL, Exposed Tee or approved equal.

**4.7.7 Gypsum Board Ceilings****Performance Requirements:**

- Fire-Resistance-Rated Assemblies: For fire-resistance-rated assemblies, provide materials and construction identical to those tested in assembly according to ASTM E 119 by an independent testing agency.
- Attach all gypsum board to supports in accordance with the Northwest Wall and Ceiling Bureau (NWCB) Specification Standards Manual and ASTM C840.
- Paper faced gypsum board will not be allowed.
- Gypsum Board Type X: ASTM C 1396/C 1396M, 5/8-inch.
  - ✓ Basis of Design: DensArmor Plus Fireguard High Performance Interior Panel.

**4.7.8 Interior Signage**

Provide room identification signage for all rooms and spaces within the facility per the SFMTA Guidelines. Signage shall comply with applicable provisions of the ADA guidelines and include room numbers and names. Office

spaces and other spaces as directed by the SFMTA shall have interchangeable inserts. Signage in shop areas to be made of highly durable material and shall be mechanically attached to the wall with non-corrosive fasteners compatible with the material joined (adhesive attachment will be unacceptable). Room identification signage shall be consistent in appearance throughout the building. Wayfinding signage shall be provided to facilitate access to all areas of the building.

Furnish and install all signage, required mounting and associated structural supports or backing for signage. Signage designs and locations shall be coordinated, reviewed and approved by the SFMTA prior to fabrication and installation. An approved sign location plan is required prior to the 100 percent review. The SFMTA interior signage shall include:

- Code mandated signage (including hazardous areas, safety, egress and accessibility).
- Room signage: for all rooms and spaces within the facility.
- Wayfinding Signage: clearly identify circulation routes to all areas of the facility.
- Operational signage: as directed by the SFMTA Operations.

Signage shall be designed to be architecturally compatible with the building and shall contribute to the overall character of the facility.

**4.7.9 Specialties**

- Visual Display Units: Provide visual display units in conference rooms, training rooms, and lunch/break rooms. Provide marker boards and tack boards or combination units containing both marker boards and tack boards. Provide marker boards with chalk trays with lifetime surface warranty.

- Storage Shelving: Provide storage shelving as required in equipment schedule and specified here in.
- Toilet and Bath Accessories: Provide toilet and bath accessories fabricated from stainless steel. Provide paper towel dispensers, waste receptacles, toilet tissue dispensers, soap dispensers, grab bars, sanitary napkin dispensers and disposal units, shower curtains, hair dryers, mirrors, and clothes hooks, as required for convenient and efficient use of toilet and bath facilities. Provide mop sink and mop plus broom holder with shelf in custodial closets.
- Projection Screens: Provide ceiling recess mounted electrically operated projection screen in the Training Room. Screen material suitable for video projector, minimum screen size 5-feet by 7-feet.

**4.7.10 Millwork**

Refer to Room Data Sheets for millwork locations and general requirements. Provide AWI (Architectural Woodwork Institute) custom grade millwork, concealed hinges, and adjustable shelf standards. All hardware shall be stainless steel.

Exposed millwork surfaces shall be ANSI/NEMA LD3 high pressure plastic laminate with plastic laminate covered edges. Melamine interior finish will not be acceptable.

Horizontal surfaces other than countertops, the vertical surfaces, and the edges shall be Grade HGS.

Semi-Exposed Surfaces excluding drawer bodies shall be Grade VGS. The drawer sides and backs shall be solid hardwood lumber. The drawer bottom shall be constructed with hardwood plywood.

## SECTION 4 - PERFORMANCE REQUIREMENTS

Countertop (all locations except Dispatch) shall be constructed with solid surface with integral backsplash. Dispatch countertop shall be minimum 16 gauge in thickness, Type 304 stainless steel, non-directional matte finish and with the eased edge.

Miscellaneous millwork included but not limited to shelving in the maintenance library, media and storage rooms shall be directed by SFMTA. Shelving shall be plastic laminate clad and supported by standards and brackets for the expected loading.

For bonding laminate to core, PVA adhesive for cold press applications shall be machine applied as a consistent, rigid glue line. Use adhesives that comply with VOC content limits according to EPA Method 24, 40- CFR-59, Subpart D, wood glues with VOC content less than 30 g/L. VOC contents of the adhesive shall be 70 g/L or less. Added urea-formaldehyde in materials or fabrication is not allowed in assemblies.

## 4.8 Conveying - Elevators

- Personnel elevators: Provide elevator by Fujitec, KONE, Schindler, Thyssen, Cantonor approved equal. Passenger elevator features:
  - ✓ Capacity: 3,000 pounds.
  - ✓ Speed: per PPC and the SFMTA
  - ✓ Car Interior and Hall Doors and Frames: Stainless steel, minimum 14 gauge. Sound deaden doors and frames.
  - ✓ Emergency Return Unit: A battery powered lowering unit shall be provided to automatically return the elevator to its lowest landing at normal speed in a power failure and allow all passengers to exit safely.
  - ✓ Floor Finish: Per PPC and the SFMTA

- ✓ System Startup: PPC to obtain and pay for permit, license, and inspection fee necessary to complete the installation.
- ✓ Power Characteristics: 480 V, 3 phase, 60 hertz.
- ✓ Minimum Clear Inside Car: minimum 6-feet 8-inches wide by 4-feet 9-inches deep by 8-feet high clear.
- ✓ PPC shall submit 3-inch by 12-inch samples of actual finished material for review of color, pattern, and texture of exposed finishes.
- Freight elevators: Provide elevator by ThyssenKrupp, Otis, Schindler or Kone. Freight elevators shall meet all codes referenced therein. Selection of the elevator type (electric or hydraulic) shall be made based on the required performance and shall be subject to review and approval by the SFMTA.
  - ✓ Access to the freight elevator shall be provided on all bus yard component levels including the basement.
  - ✓ Loading and Capacity: Class C-1, minimum loading capacity of 10,000 pounds, designed to transport a loaded industrial truck with the maximum combined weight of industrial truck and load not to exceed 10,000 lbs.
  - ✓ Speed: 100 feet per minute (minimum).
  - ✓ Clear Inside Dimensions: minimum 8-feet wide by 13-feet 6-inches deep with minimum height to accommodate an electric forklift.
  - ✓ Operation: Simplex.
  - ✓ Emergency Return Unit: A battery powered lowering unit shall be provided to automatically return the elevator to its lowest landing at normal speed in a power failure and allow all passengers to exit safely.
- ✓ Car Interior, Hall Doors, and Frames: stainless steel panels, minimum 14 gauge with No. 4 finish, flooring to be minimum 3/16 inch steel checker plate.
- ✓ Additional features: wire mesh car gate, stainless steel bumpers, buttons for cab protection pads.
- ✓ Provide an associated machine room as required by elevator manufacturer.
- ✓ System Startup: PPC to obtain and pay for permit, license, and inspection fee necessary to complete the installation.
- ✓ Power Characteristics: 480 V, 3 phase, 60 hertz.
- Major elevator components, including driving machines or pump and tank units and plunger-cylinder assemblies (as applicable), controllers, signal fixtures, door operators, car frames, cars, and entrances, shall be manufactured by a single manufacturer. Elevators shall be installed by the elevator manufacturer or an authorized representative who is trained and approved by the manufacturer.
- Elevators shall be fully accessible to individuals with disabilities, meeting all requirements of the ADA Guidelines.
- A minimum 2 year warranty from the date of Acceptance shall be provided in which Manufacturer agrees to repair, restore or replace elevator work that fails in materials or workmanship within the specified period. Failures include but are not limited to, operation or control system failure, including

## SECTION 4 - PERFORMANCE REQUIREMENTS

## 4.9 Plumbing

excessive malfunctions; performances below specified ratings; excessive wear; unusual deterioration or aging of materials or finishes; unsafe conditions; need for excessive maintenance; abnormal noise or vibration; and similar unusual, unexpected, and unsatisfactory conditions.

- Traveler Cable - Systems to elevator shall be provided via a traveler cable meeting the following requirements:
  - ✓ Terminate in a communications compartment/access panel on the rear wall accessible inside the car to hold communications equipment.
  - ✓ Carry compartment power for router and devices.
  - ✓ Wire-way from compartment to devices.
  - ✓ Router inside the communications compartment.
  - ✓ Router consolidates CCTV, ACS, phone if IP Phone.
  - ✓ Traveler cable to include Plastic Optic Fiber (POF) cable for IP communications to the Router. Use a POF fiber bundle in a sheath rated for Continuous-Bending. POF shall be rated for at least 5,000,000 (five million) Continuous-Bending cycles. POF fiber may be multi-mode or single mode. Terminate 1 pair of POF at elevator distribution cabinet and elevator cab systems. Leave remaining pairs unterminated in elevator and in elevator machine room.
  - ✓ Provide four pairs of spare communication wires in addition to those required to connect specified items. Tag the spares in the machine room.

**General:**

The PPC shall design, permit, and construct all plumbing systems. All work shall be in accordance with the California Building and Plumbing Codes with City and County of San Francisco amendments, local codes, and any criteria listed in this document.

The PPC shall be responsible for verifying achievement of goals at each progress design deliverable and at permit.

All water and gas piping penetrations through concrete or masonry shall have a metallic pipe sleeve. Sleeves at floor penetrations shall extend at least 12 inches above slab. Seal all wall and floor penetrations.

Provide pipe labels for all piping every 50 feet and change of direction indicating size, content, and flow of direction.

Seismic-restraint systems shall comply with California Building Code with local amendment requirements. Refer to structural for wind- and seismic-restraint loading requirements.

## 4.9.1 Plumbing Piping

**Potable Domestic Water:**

Potable domestic water mains and new supply lines shall be installed at least 4-foot horizontally from, and one-foot vertically above a parallel pipeline conveying recycled water. The water main shall not be in the bus driveways.

Domestic water piping 3-inches and larger below the slab shall be ductile iron and piping 2-1/2-inches and less shall be ASTM B88 Type K soft copper with no joints or silver brazed joints. Above floor piping shall be ASTM B88 Type L hard copper with lead-free soldered or pressure-sealed joints. Push-on and drilled

joints are prohibited. All buried domestic water pipe below slab shall be protected with 20 mil polyethylene wrap and tape and pipe sleeve at slab penetration. Hydrostatically test water piping to 100 PSI or 150 percent of operating pressure. Maintain pressure for not less than four hours.

Potable domestic water service must comply with the CCSF Plumbing Code and Health Code. Provide with a strainer and lead-free reduced pressure backflow preventer with secondary, utility grade remote reading water meter. The pulse meter shall be connected to the building automation system (BAS). The supply line to each item of equipment or fixture shall be equipped with a shutoff valve to enable isolation of the item for repair and maintenance without interfering with the operation of other equipment or fixtures. Supply piping to reels, wall hydrants and equipment shall be anchored to prevent movement.

Domestic hot water piping shall be insulated.

Domestic water shall be sized to provide a minimum of 25 PSI at flush valves and 15 PSI at other fixtures. Sizing shall comply with the requirements of the California Plumbing code. Velocities with the main and branch piping shall not exceed 6 fps.

Domestic water valves 4-inches and larger shall be OS&Y gate valves type with cast iron body and bronze mounted trim type MSS SP-70 rated for a minimum of 175 PSI. Valves 3-inches and less shall be bronze ball type MSS SP-110 rated for a minimum of 400 PSI. All potable domestic water valves shall be lead free.

Water sub metering shall be installed to monitor consumption of water uses including, but not limited to, individual monitoring of each

**SECTION 4 - PERFORMANCE REQUIREMENTS**

vehicle or equipment wash area, shop area, irrigation system and all exterior hose bibs. Each sub meter shall be connected to the BAS.

**4.9.2 Recycled Water**

Recycled water piping shall be purple PVC or equivalent with SFPUC's City Distribution Division sign off, prior to installation.

The potable water line may be used to feed the recycled water lines(s) until such time that recycled water becomes available. When recycled water becomes available, the cross-connection will be broken by the SFPUC, and the potable and recycled water lines will be totally separated. Before recycled water is delivered to the property, cross-connection and backflow testing will take place to assure separation.

Connect water closet and urinal flushing and wash water system to metered recycled water system. Provide additional pulse meters for the boiler make-up water and wash water systems make-up water. Any irrigation systems shall have a dedicated recycled water tap with a separate meter. All meters shall connect to BAS.

**4.9.3 Sanitary and Oily Waste and Vent**

Sanitary/oily waste and vent piping shall be no-hub cast iron pipe and fittings.

**4.9.4 Storm Drain**

Storm drain piping that is not visible from the exterior of the building shall be no-hub cast iron pipe and fittings. Exterior storm piping shall be stainless steel, unless otherwise authorized by the SFMTA.

**4.9.5 Waste Water Force Main**

Waste water force main piping shall be ASTM B88 Type K hard copper with silver brazed

joints. Above floor piping shall be ASTM B88 Type L hard copper with lead-free soldered joints.

**4.9.6 Plumbing Fixtures**

- Water closets shall be wall mounted with flush valve and elongated bowl and chair carrier. Water closet and flush valve shall be HET at 1.1 GPF with a MaP rating of 1000 as tested by Veritec Consulting, Inc. Flush valve shall be exposed, hydraulically powered, electronic sensor operated type with additional manual flush. Water closets and flush valves shall be suitable for use with recycled water.
- Urinals will be wall mounted flush valve type with carrier. Urinal and flush valve will be HEU at 0.125 GPF. Flush valve will be exposed, hydraulically powered, electronic sensor operated type with additional manual flush. Urinals and flush valves shall be suitable for use with recycled water.
- Lavatory will be white vitreous china, under counter mounted or wall mounted with chair carrier. Faucets will be hydraulically powered, electronic sensor operated, heavy-duty cast brass institutional grade with maximum flow rate of 0.5 GPM. Lavatory faucets shall comply with ASSE 1070.
- Sink in Break Rooms will be double compartment, under counter mounted, 18-gauge stainless steel. Faucets will be manual operated, heavy-duty cast brass institutional grade with maximum flow rate of 1.0 GPM. Sinks shall be provided with garbage disposer.
- Sink in Coffee Bars will be single compartment, under counter mounted, 18-gauge stainless steel. Faucets will be

manual operated, heavy-duty cast brass institutional grade with maximum flow rate of 1.0 GPM.

- Showers will be provided with heavy-duty pressure balancing type mixing valve. Shower heads will be 1.5 GPM flow. Hand held shower heads for the handicapped will be 1.5 GPM flow.
- Electric water coolers will be dual height and constructed of stainless steel lead-free and with an integral filter and bottle filler.
- Wash fountains will be multi-station and constructed of stainless steel or precast terrazzo. Each station will be 0.5 GPM flow.
- Janitor's mop sink will be floor type constructed of precast terrazzo. Faucet will be manual operated heavy-duty cast brass institutional grade, wall mounted with support bracket, vacuum breaker with hose end spout with maximum flow rate of 2.2 GPM.
- Combination emergency/shower eyewashes shall be exposed type with floor flange, galvanized steel piping plastic shower head actuated by a stay open ball valve with rigid pull rod and handle, eyewash with large stainless steel bowl and two soft stream heads actuated by stay open ball valve with push flag. Unit will be provided with manufacturer's recommended thermostatic mixing valve to provide tepid (60 degrees to 90 degrees F) water in accordance with ANSI Z358.1 and local audio/visual alarm tied into the BAS. Minimum size for thermostatic mixing valve will be 44 GPM with a maximum pressure drop of 20 PSI. Pipe sizes will be 1-1/4-inch water inlet and 1-1/4-inch drain. Combination emergency shower/eyewashes

## SECTION 4 - PERFORMANCE REQUIREMENTS

shall be located throughout the maintenance areas in accordance with OSHA eyewash requirements. All emergency showers/eyewashes shall be floor drain.

- Emergency eyewashes shall be exposed type with floor flange, galvanized steel piping with large stainless steel bowl and two soft stream heads actuated by stay open ball valve with push flag. Unit will be provided with manufacturer's recommended thermostatic mixing valve to provide tepid (60 degrees to 90 degrees F) water in accordance with ANSI Z358.1 and local audio/visual alarm tied into the BAS. Minimum size for thermostatic mixing valve will be 5 GPM with a maximum pressure drop of 20 PSI. Pipe sizes will be 3/4-inch water inlet and 1-1/4-inch drain. Emergency eyewashes shall be located on the mezzanines. All emergency eye washes shall be hard plumbed and with floor drain.
- Exposed plumbing fixture trim shall be chrome plated.
- Trap primers shall be ASSE 1018 supply-type, trap-seal primer. Trap seals shall be ASSE 1072 certified waterless in-line drain trap seals at each drain outlet.
- Water hammer arrestors shall be properly applied to the domestic hot and cold water systems for all plumbing fixtures in accordance with ASSE 1010.
- Handicapped plumbing fixtures shall be provided in accordance with ADA.

## 4.9.7 Plumbing Specialties

- Roof drains with overflow roof drains and roof clamps shall be provided. Roof drain system shall be sized for 1.5-inches of rainfall per hour. Storm water piping shall be no-hub cast

iron above grade and HDPE below grade.

- Floor drains shall be provided in Restrooms, Showers, Changing areas, Custodial Rooms (Janitors Closets). Floor sinks shall be provided at each emergency showers/eyewashes, emergency eyewashes and Mechanical Rooms adjacent to water heaters, boilers, air compressors, HVAC units, and pumps. Reduced pressure backflow preventers shall be provided with a floor sink drain. Floor sinks for condensing domestic water heaters and boilers shall have a cast iron body and 13-inch square slotted heavy duty grate with acid resisting epoxy coated interior and top, with anti-splash interior dome strainer.
- Floor drain grates and frames in Restrooms, Showers and Custodial Rooms (Janitors Closets) shall be light duty with nickel bronze or stainless steel 6-inches grates. Floor sinks at mechanical rooms, water heaters, boilers and emergency showers/eyewashes and emergency eyewashes shall have a cast iron body and 13-inch square slotted heavy duty grate with acid resisting epoxy coated interior and top, with anti-splash interior dome strainer. Full grate configuration and emergency showers/eyewashes and emergency eyewashes. Grate configuration for mechanical rooms shall be suitable for installation requirements.
- Floor drains in shop areas subject to wheel traffic shall be heavy-duty with 8-inch nickel bronze or stainless steel tractor grate.
- Trench drains shall be provided in lower level work areas, wash areas and overhead door openings. Grates shall be Load Class D / H-20 rated for extra heavy duty.

- Floor drains and floor sinks shall be provided with trap protection device. Trench drains shall have sediment baskets installed upstream of traps.
- Elevator pits shall be provided with sumps and sump pumps. Hydraulic elevator pumps shall discharge through an oil-water separator before discharge into the sanitary system. Provide a high level alarms for sump pump fail.
- Exterior freeze proof wall hydrants shall be box type and provided around the perimeter of each building at each man door. Non-freeze interior hose bibs shall be provided around the perimeter of the interior shop areas at 150-foot or less intervals, in lower level work areas, Restrooms and Mechanical Rooms.
- Compressed air drops shall be provided as indicated in the design criteria. Compressed air piping shall be Type L copper. Provide full-port, metal ball valves suitable for use with compressed air at all equipment to provide positive shut off, low leakage valves rated at 150 PSI suitable for piping without dielectric fittings. Provide pressure regulators, filters, quick connect couplings and accessories as required. Label piping and pressure test at 200 PSI for four hours.
