**Location:** Fulton Street at Clayton Street

**Subject:** Rectangular Rapid Flashing Beacon

**PROPOSAL / REQUEST:**
- ESTABLISH – RECTANGULAR RAPID FLASHING BEACON (RRFB)
- Fulton Street at Clayton Street

(Supervisor Districts 1 and 5)

Alison Mathews, alison.mathews@sfmta.com

**BACKGROUND INFORMATION / COMMENTS**

This project will add Rectangular Rapid Flashing Beacons (RRFBS) to the crosswalks at Fulton Street and Clayton Street. This location was selected as part of the FY21 Walkfirst RRFB project based on collision history, engineering judgment and community request.

Fulton Street and Clayton Street is currently an uncontrolled crossing with existing marked crosswalks and signage and striping to yield to pedestrians. The 5 Fulton and 5R Fulton Rapid Muni lines run eastbound and westbound at the intersection.

Not on the bike network. Speed limit: 25 MPH.

There has been 1 reported vehicle-pedestrian collision in the past 5 years at the intersection.

(e.g. 600-block of Market St. or in front of Main Library entrance)

REQUEST DETAILS:

Nature of Request:* Request for Service

ADDITIONAL REQUEST DETAILS:

Additional Request Details: * Very unsafe pedestrian crossing: no stop sign or stop light, traffic going fast
up/down hill, lots of USF students walking. Especially in the evenings, I have a
really hard time crossing safely 9 times out of 10. Same with Fulton and Clayton.

Provided recap of SR to caller?:* N/A
Soroush – Who can respond on the status of the RRFB for Clayton? Not sure what we say about Cole other than it had a good safety record compared to Clayton.

Copying Manito and Bryant for any PUC contacts on the street lighting complaint.

Eddie – I had suggested to Bryant in a prior file that we go ahead and install FYG signs, see attached. Can we just go ahead and install farside FYG to complement the nearside YIELD HERE TO PEDS, at Ashbury, Clayton and Cole?

Ricardo

Replace with FYG then, like I said Clayton is FYG. May want to make Cole the same. I think FYG is more catchy.

MUTCD requires the sign if you mark the triangles, but not vice-versa. There used to be triangles before the diet. Generally we don’t do them for single lane approaches unless it’s midblock.

On Jul 13, 2020, at 4:44 PM, Woo, Bryant <Bryant.Woo@sfmta.com> wrote:

I was actually thinking of moving the YHTP signs since we have bulbs. The current sign placement was there before the bulbs were constructed. Opinions?

Per previous email I think putting far side FYG at Ashbury makes sense given we out FYG at Clayton.

We can also repaint the PED XING (asphalted)

Nina – Thanks, you can respond to the 311 and let her know the striping is just temporary (I’m not sure if that is how the temporary crosswalks should be painted in any case, but for another discussion). I believe we are installing an RRFB here as well, since she’s also concerned about the safety, Soroush has that project, copying him.

Thanks Ricardo,

Paint Shop has been cat-tracking this week so the permanent striping should be installed soon. Would you like me to respond to the 311?

Thanks for pointing out that SLOW message to me – I’ll take care of it.

-Nina

Nina – I think this is your project, someone wants the permanent crosswalks. By the way, can you make sure we don’t paint this SLOW message on Fulton inbound at Ashbury? It was always a mistake (“SLOW” is only used at yellow crosswalks) but it appears to be in the STR still.

Hello,

I’m following up on your concern about pedestrian safety at the Fulton Street & Clayton Street crosswalk.

We appreciate your comments and suggestions for safety improvements. Fortunately, the SFMTA is already developing plans to install a Rapid Flashing Beacon on Fulton Street at Clayton Street.

We appreciate your concerns about the safety of this pedestrian crossing and thank you for contacting the City.

Sincerely,

Alison Mathews (she/her)

- **Addition/Alteration**: ☑️
- **Demolition (requires HRE for Category B Building)**: ☐
- **New Construction**: ☐

**Project description for Planning Department approval.**

The San Francisco Municipal Transportation Agency (SFMTA) proposes to install new Rectangular Rapid Flashing Beacons (RRFBs) at nine intersections across San Francisco to improve pedestrian safety. RRFBs would be installed at the intersections of San Bruno Avenue at Woolsey Street, Brotherhood Way at Sagamore Street and Alemany Boulevard, Gough Street at Clay Street, Fulton Street at Clayton Street, Turk Boulevard at Willard North, Castro Street at Henry Street, Diamond Heights Boulevard at Duncan Street, Cortland Avenue at Moultrie Street, and Diamond Heights Boulevard at Berkeley Way. The proposed project (project) would involve the installation of new RRFB signal poles and foundations, pull boxes, and conduits. The project would also upgrade curb ramps in select locations, in addition to grade adjustment for select existing stormwater catch basins.

Full project description attached below.

## STEP 1: EXEMPTION TYPE

**The project has been determined to be exempt under the California Environmental Quality Act (CEQA).**

<table>
<thead>
<tr>
<th>Class 1 - Existing Facilities. Interior and exterior alterations; additions under 10,000 sq. ft.</th>
</tr>
</thead>
<tbody>
<tr>
<td>☑️</td>
</tr>
</tbody>
</table>

- **Class 3 - New Construction.** Up to three new single-family residences or six dwelling units in one building; commercial/office structures; utility extensions; change of use under 10,000 sq. ft. if principally permitted or with a CU.

<table>
<thead>
<tr>
<th>Class 32 - In-Fill Development. New Construction of seven or more units or additions greater than 10,000 sq. ft. and meets the conditions described below:</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.</td>
</tr>
<tr>
<td>(b) The proposed development occurs within city limits on a project site of no more than 5 acres substantially surrounded by urban uses.</td>
</tr>
<tr>
<td>(c) The project site has no value as habitat for endangered rare or threatened species.</td>
</tr>
<tr>
<td>(d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.</td>
</tr>
<tr>
<td>(e) The site can be adequately served by all required utilities and public services.</td>
</tr>
</tbody>
</table>

**FOR ENVIRONMENTAL PLANNING USE ONLY**

- **Other ____**

- **Common Sense Exemption (CEQA Guidelines section 15061(b)(3)).** It can be seen with certainty that there is no possibility of a significant effect on the environment. **FOR ENVIRONMENTAL PLANNING USE ONLY**
### STEP 2: ENVIRONMENTAL SCREENING ASSESSMENT
**TO BE COMPLETED BY PROJECT PLANNER**

<table>
<thead>
<tr>
<th><strong>Air Quality:</strong> Would the project add new sensitive receptors (specifically, schools, day care facilities, hospitals, residential dwellings, and senior-care facilities within an Air Pollution Exposure Zone? Does the project have the potential to emit substantial pollutant concentrations (e.g., use of diesel construction equipment, backup diesel generators, heavy industry, diesel trucks, etc.)? (refer to The Environmental Information tab on the <a href="https://sfplanninggis.org/pim/">https://sfplanninggis.org/pim/</a>)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td><strong>Hazardous Materials:</strong> If the project site is located on the Maher map or is suspected of containing hazardous materials (based on a previous use such as gas station, auto repair, dry cleaners, or heavy manufacturing, or a site with underground storage tanks): Would the project involve 50 cubic yards or more of soil disturbance - or a change of use from industrial to residential? <strong>Note that a categorical exemption shall not be issued for a project located on the Cortese List if box is checked, note below whether the applicant has enrolled in or received a waiver from the San Francisco Department of Public Health (DPH) Maher program, or if Environmental Planning staff has determined that hazardous material effects would be less than significant. (refer to The Environmental Information tab on the <a href="https://sfplanninggis.org/pim/">https://sfplanninggis.org/pim/</a>)</strong></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>Transportation:</strong> Does the project involve a child care facility or school with 30 or more students, or a location 1,500 sq. ft. or greater? Does the project have the potential to adversely affect transit, pedestrian and/or bicycle safety (hazards) or the adequacy of nearby transit, pedestrian and/or bicycle facilities?</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>Archeological Resources:</strong> Would the project result in soil disturbance/ modification greater than two (2) feet below grade in an archeological sensitive area or eight (8) feet in a non-archeological sensitive area? If yes, archeology review is required.</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>Subdivision/Lot Line Adjustment:</strong> Does the project site involve a subdivision or lot line adjustment on a lot with a slope average of 20% or more? (refer to The Environmental Information tab on the <a href="https://sfplanninggis.org/pim/">https://sfplanninggis.org/pim/</a>) If box is checked, Environmental Planning must issue the exemption.</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>Average Slope of Parcel = or &gt; 25%, or site is in Edgehill Slope Protection Area or Northwest Mt. Sutro Slope Protection Area:</strong> Does the project involve any of the following: (1) New building construction, except one-story storage or utility occupancy, (2) horizontal additions, if the footprint area increases more than 50%, or (3) horizontal and vertical additions increase more than 500 square feet of new projected roof area? (refer to The Environmental Planning tab on the <a href="https://sfplanninggis.org/pim/">https://sfplanninggis.org/pim/</a>) If box is checked, a geotechnical report is likely required and Environmental Planning must issue the exemption.</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>Seismic Hazard:</strong> <strong>Landslide or Liquefaction Hazard Zone:</strong> Does the project involve any of the following: (1) New building construction, except one-story storage or utility occupancy, (2) horizontal additions, if the footprint area increases more than 50%, (3) horizontal and vertical additions increase more than 500 square feet of new projected roof area, or (4) grading performed at a site in the landslide hazard zone? (refer to The Environmental tab on the <a href="https://sfplanninggis.org/pim/">https://sfplanninggis.org/pim/</a>) If box is checked, a geotechnical report is required and Environmental Planning must issue the exemption.</td>
</tr>
<tr>

### STEP 3: PROPERTY STATUS - HISTORIC RESOURCE
**TO BE COMPLETED BY PROJECT PLANNER**

PROPERTY IS ONE OF THE FOLLOWING: *(refer to Property Information Map)*

- **Category A**: Known Historical Resource. **GO TO STEP 5.**
- **Category B**: Potential Historical Resource (over 45 years of age). **GO TO STEP 4.**
- **Category C**: Not a Historical Resource or Not Age Eligible (under 45 years of age). **GO TO STEP 6.**

### STEP 4: PROPOSED WORK CHECKLIST
**TO BE COMPLETED BY PROJECT PLANNER**

Check all that apply to the project.

1. **Change of use and new construction.** Tenant improvements not included.
2. **Regular maintenance or repair** to correct or repair deterioration, decay, or damage to building.
3. **Window replacement** that meets the Department’s *Window Replacement Standards.* Does not include storefront window alterations.
4. **Garage work.** A new opening that meets the *Guidelines for Adding Garages and Curb Cuts,* and/or replacement of a garage door in an existing opening that meets the Residential Design Guidelines.
5. **Deck, terrace construction, or fences** not visible from any immediately adjacent public right-of-way.
6. **Mechanical equipment installation** that is not visible from any immediately adjacent public right-of-way.
7. **Dormer installation** that meets the requirements for exemption from public notification under *Zoning Administrator Bulletin No. 3: Dormer Windows.*
8. **Addition(s)** that are not visible from any immediately adjacent public right-of-way for 150 feet in each direction; does not extend vertically beyond the floor level of the top story of the structure or is only a single story in height; does not have a footprint that is more than 50% larger than that of the original building; and does not cause the removal of architectural significant roofing features.

**Note:** Project Planner must check box below before proceeding.

- Project is not listed. **GO TO STEP 5.**
- Project does not conform to the scopes of work. **GO TO STEP 5.**
- Project involves **four or more** work descriptions. **GO TO STEP 5.**
- Project involves **less than four** work descriptions. **GO TO STEP 6.**

### STEP 5: ADVANCED HISTORICAL REVIEW
**TO BE COMPLETED BY PRESERVATION PLANNER**

Check all that apply to the project.

1. **Reclassification of property status.** *(Attach HRER Part I)*
   - Reclassify to Category A
     - Per HRER
     - Other (specify):  
   - Reclassify to Category C *(No further historic review)*
2. Project involves a **known historical resource** (CEQA Category A) as determined by Step 3 and conforms entirely to proposed work checklist in Step 4.
3. Interior alterations to publicly accessible spaces that do not remove, alter, or obscure character defining features.
4. **Window replacement** of original/historic windows that are not “in-kind” but are consistent with existing historic character.
5. **Façade/storefront alterations** that do not remove, alter, or obscure character-defining features.
<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>6. <strong>Raising the building</strong> in a manner that does not remove, alter, or obscure character-defining features.</td>
<td></td>
</tr>
<tr>
<td>7. <strong>Restoration</strong> based upon documented evidence of a building’s historic condition, such as historic photographs, plans, physical evidence, or similar buildings.</td>
<td></td>
</tr>
<tr>
<td>8. <strong>Work consistent</strong> with the <em>Secretary of the Interior Standards for the Treatment of Historic Properties</em> (Analysis required):</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>9. <strong>Work compatible</strong> with a historic district (Analysis required):</td>
<td></td>

**Project Approval Action:**

City Traffic Engineer’s Directive

**Signature:**

Jennifer M Barbour Mckellar

08/18/2023

Supporting documents are available for review on the San Francisco Property Information Map, which can be accessed at https://sfplanninggis.org/pim/. Individual files can be viewed by clicking on the Planning Applications link, clicking the “More Details” link under the project’s environmental record number (ENV) and then clicking on the “Related Documents” link.

Once signed and dated, this document constitutes an exemption pursuant to CEQA Guidelines and Chapter 31 of the SF Admin Code. Per Chapter 31, an appeal of an exemption determination to the Board of Supervisors shall be filed within 30 days after the Approval Action occurs at a noticed public hearing, or within 30 days after posting on the Planning Department’s website a written decision or written notice of the Approval Action, if the approval is not made at a noticed public hearing.
Step 2: Environmental Screening Comments
The proposed project meets the definition of a class 1 (CEQA Guidelines section 15301) categorical exemption, as a minor alteration of an existing public structure, because it would install new Rectangular Rapid Flashing Beacons (RRFBs) to improve pedestrian visibility and safety at nine intersections across San Francisco.

San Francisco Public Works Standard Construction Measures would be implemented, as applicable, as part of the project: (1) Seismic and Geotechnical Studies; (2) Air Quality; (3) Water Quality; (4) Traffic; (5) Noise; (6) Hazardous Materials; (7) Biological Resources; (8) Visual and Aesthetic Considerations (Project Site); and (9) Cultural Resources: Archeological Resources (Public Works Standard Archeological Measure I: Discovery during Construction) and Historic (Built Environment) Resources. Project-related physical environmental impacts would be less than significant.

None of the CEQA Guidelines section 15300.2 exceptions apply to the proposed project.
STEP 7: MODIFICATION OF A CEQA EXEMPT PROJECT
TO BE COMPLETED BY PROJECT PLANNER

In accordance with Chapter 31 of the San Francisco Administrative Code, when a California Environmental Quality Act (CEQA) exempt project changes after the Approval Action and requires a subsequent approval, the Environmental Review Officer (or his or her designee) must determine whether the proposed change constitutes a substantial modification of that project. This checklist shall be used to determine whether the proposed changes to the approved project would constitute a “substantial modification” and, therefore, be subject to additional environmental review pursuant to CEQA.

MODIFIED PROJECT DESCRIPTION

Modified Project Description:

DETERMINATION IF PROJECT CONSTITUTES SUBSTANTIAL MODIFICATION

Compared to the approved project, would the modified project:

☐ Result in expansion of the building envelope, as defined in the Planning Code;

☐ Result in the change of use that would require public notice under Planning Code Sections 311 or 312;

☐ Result in demolition as defined under Planning Code Section 317 or 19005(f)?

☐ Is any information being presented that was not known and could not have been known at the time of the original determination, that shows the originally approved project may no longer qualify for the exemption?

If at least one of the above boxes is checked, further environmental review is required

DETERMINATION OF NO SUBSTANTIAL MODIFICATION

☐ The proposed modification would not result in any of the above changes.

If this box is checked, the proposed modifications are exempt under CEQA, in accordance with prior project approval and no additional environmental review is required. This determination shall be posted on the Planning Department website and office and mailed to the applicant, City approving entities, and anyone requesting written notice. In accordance with Chapter 31, Sec 31.08j of the San Francisco Administrative Code, an appeal of this determination can be filed to the Environmental Review Officer within 10 days of posting of this determination.

Planner Name:  
Date:
Project Description

The San Francisco Municipal Transportation Agency (SFMTA) proposes to install new Rectangular Rapid Flashing Beacons (RRFBs) at nine intersections across San Francisco to improve pedestrian safety by alerting divers that pedestrians are crossing the street. RRFBs would be installed at the intersections of San Bruno Avenue at Woolsey Street, Brotherhood Way at Sagamore Street and Alemany Boulevard, Gough Street at Clay Street, Fulton Street at Clayton Street, Turk Boulevard at Willard North, Castro Street at Henry Street, Diamond Heights Boulevard at Duncan Street, Cortland Avenue at Moultrie Street, and Diamond Heights Boulevard at Berkeley Way. The proposed project (project) would involve the installation of new RRFB signal poles and foundations, pull boxes, and conduits. The project would also upgrade curb ramps in select locations, in addition to grade adjustment for select existing stormwater catch basins.

At the intersection of San Bruno Avenue and Woolsey Street, one new RRFB signal pole would be installed on each corner (four new poles in total). One existing curb ramp on the northeast corner of the intersection would be upgraded.

At the intersection of Brotherhood Way at Sagamore Street and Alemany Boulevard, one new RRFB pole would be installed along the eastern side and one new RRFB signal pole would be installed on the western side on the median island (two new poles in total). One new pedestrian push button pole would be installed on the eastern side of the intersection. Partial curb ramp wing reconstruction would occur for two curb ramps.

At the intersection of Gough Street and Clay Street, one new RRFB signal pole would be installed at three of the four corners (three new poles in total). No new RRFB signal pole would be installed at the northwest corner of the intersection.

At the intersection of Fulton Street and Clayton Street, one new RRFB signal pole would be installed at
the northeast corner and one new RRFB signal pole would be installed at the southeast corner (two new poles in total). One streetlight pole would be installed on the southeast corner of the intersection, and one pedestrian push button pole would be installed on the northwest corner of the intersection.

At the intersection of Turk Boulevard and Willard North, one new RRFB signal pole would be installed at the northeast corner.

At the intersection of Castro Street and Henry Street, one new RRFB signal pole would be installed at the northeast corner.

At the intersection of Diamond Heights Boulevard and Duncan Street, one new RRFB signal pole would be installed at the northeast corner and one new RRFB signal pole would be installed at the southeast corner (two new poles in total). One dual streetlight pole would be installed within the median of the intersection.

At the intersection of Cortland Avenue and Moultrie Street, one new RRFB signal pole would be installed at the southwest corner. Curb ramps would be reconstructed on the northeast corner of the intersection. Two existing on-street metered parking spaces (approximately 20 feet each in length) would be removed to improve visibility of the new RRFBs.

At the intersection of Diamond Heights Boulevard and Berkeley Way, one new RRFB signal pole would be installed at the southwest corner and one new RRFB signal pole would be installed at the southeast corner (two new poles in total). Partial curb ramp reconstruction would occur for one curb ramp on the southwest corner of the intersection.

<p>| Table 1 – Detailed Excavation Information Per Component |
|-----------------------------------------------|-----------------|-----------------|-----------------|
| Component/Location                           | Excavation Depth (Feet) | Excavation Diameter (Feet-Inches) | Excavation (Cubic Yards) |
| San Bruno Avenue and Woolsey Street Intersection |
| One 1-A (15’) signal pole adjacent to the crosswalk on the northwest corner | 6’ | 2’6” | 1.09 |
| One 1-A (15’) signal pole adjacent to the crosswalk on the northeast corner | 6’ | 2’6” | 1.09 |
| One 1-A (15’) signal pole adjacent to the crosswalk on the southwest corner | 6’ | 2’6” | 1.09 |
| One 1-A (15’) signal pole adjacent to the crosswalk on the southeast corner | 6’ | 2’6” | 1.09 |
| Brotherhood Way at Sagamore Street and Alemany Boulevard Intersection |
| One 1-A (15’) signal pole on a median island adjacent to the west side of the crosswalk | 6’ | 2’6” | 1.09 |</p>

</table>

The following proposed project locations are adjacent to historic resources:

- Gough/Clay streets intersection (historic buildings on adjacent block/lots 0617/008-010)
- Castro/Henry streets intersection (historic building on adjacent block/lot 3540/092)
- Diamond Heights Boulevard/Duncan Street intersection (historic buildings on adjacent block/lots 7515A/001-012 and 7504A/005-018; these buildings comprise part of the Diamond Heights Historic District)

The proposed work would be carried out by SFMTA and San Francisco Public Works crews, in addition to a licensed contractor managed by San Francisco Public Works with funding/oversight from SFMTA. Construction is anticipated to last approximately three months at each intersection. San Francisco Public Works Standard Construction Measures would be implemented, as applicable, as part of the project: (1) Seismic and Geotechnical Studies; (2) Air Quality; (3) Water Quality; (4) Traffic; (5) Noise; (6) Hazardous Materials; (7) Biological Resources; (8) Visual and Aesthetic Considerations (Project Site); and (9) Cultural Resources: Archeological Resources (Public Works Standard Archeological Measure I: Discovery during Construction) and Historic (Built Environment) Resources. Contractors would use concrete saws and jackhammers but no pile-drivers. The project would not result in the removal of any existing trees or on-street loading spaces.

There are no past, present or reasonably foreseeable projects within the vicinity of each of the proposed project sites that would combine with the project to result in a cumulative impact.

Attachment B: Site Plans

**Approval Action**

The project would be approved by the City Traffic Engineer’s Directive, which does not occur at a noticed public hearing. Therefore, as defined by San Francisco Administrative Code Chapter 31, Sections 31.04(h)(2) and 31.08(g), the Approval Action for the purpose of CEQA would be the posting of the date of the Engineer’s Directive on the Planning Department website. The Approval Action starts the 30-day exemption appeal period.
