

Green Transaction Evaluation

San Francisco Municipal Transportation Agency Proposed Series C 2021 Green Bond

Transaction Overview

The San Francisco Municipal Transportation Agency (SFMTA) is responsible for the management of all ground transportation in the city of San Francisco, including the Municipal Railway (Muni) and bus public transit, as well as bicycling, paratransit, parking, traffic, walking, and taxis. SFMTA plans to issue \$123 million in early 2021, with final maturity in 2051. Net proceeds of the bonds will be used to finance the (i) procurement of a communications-based train control system to improve network speed and efficiency; (ii) reconstruction of mixed-flow traffic lanes to improve transit speed; (iii) renovation of the 1200 15th Street facility, including engineering, design, and construction per green building standards; and (iv) costs of issuance of the bonds. Approximately 81% of the proceeds fall within the scope of the S&P Green Transaction Evaluation.

Entity:	San Francisco Municipal Transportation Agency
Subsector:	N.A.
Location (HQ):	United States
Financing value:	\$123 million
Amount evaluated:	81%

Project Description

The agency will use the proceeds of the bond to finance several projects intended to improve the efficiency and environmental footprint of the municipal transportation network. These projects are a part of a multi-year San Francisco transit capacity expansion program.

The first project (\$41 mil.) is the design and procurement of a new communications-based train control system for the above- and below-ground light rail network. This will reduce congestion and slowdowns in the system and allow for future network expansion. The second allocation (\$35 mil.) is for constructing transit and streetscape improvements along a major city thoroughfare to speed vehicle transit times and reduce congestion. The third project (\$20 mil.) is a renovation of SFMTA's facility at 1200 15th Street in San Francisco and will consist of reconstruction of the aging building to expand its capacity to house transportation workers. Construction will follow the LEED Gold green building guidelines, per city building requirements.

Also included in the 2021C issuance are funds (\$22 mil.) to replace outdated parking meters with 5G-connected units. While the issuer considers this project to be part of its green bond issuance as it helps the city implement demand-response pricing for parking, we deem this project to be outside the scope of our Green Transaction Evaluation framework.

Scoring summary

This transaction achieves an overall Green Transaction Evaluation score of E2/74, which is the second-strongest score on our scale of E1 (highest) to E4 (lowest). The score reflects the weighted average of the transaction's strong Mitigation score (79) and solid Governance (74) and Transparency (60) assessments. In our view, the expected investments in mass transit systems and infrastructure will serve to accelerate San Francisco's shift to more energy-efficient and lower-emissions forms of transportation. The governance of the transaction benefits from the SFMTA being a pure-play entity with the purpose of increasing transportation efficiency and reducing associated environmental impacts. However, limited evidence of the use of green bond best practices--including detailed reporting of environmental impacts at the project level and independent verification of expenditures and impacts--constrain the Governance and Transparency scores.

Rationale

- The strong Mitigation score (79) reflects our view that the projects will directly improve the efficiency of transportation in San Francisco and reduce associated greenhouse gas (GHG) emissions. The projects will fund all-electric transportation upgrades and investments, reducing reliance on transportation modes that rely on fossil fuels in a city with very high population density. The green facility renovation project benefits from improved carbon and water performance during the building's lifetime, but provides relatively lower GHG reductions than other comparable projects in different regions given the already fairly low carbon intensity of buildings in California generally. The Mitigation score (79) also reflects our view that these projects enable significant decarbonization in sectors that are already aligned with a green economy and are thereby placed in the second-highest tier of our carbon hierarchy, and provides uplift to the net benefit score.
- The above-average Governance score (74) reflects our view that SFMTA is a pure-play entity with the purpose of increasing transportation efficiency and reducing associated environmental impacts. Plan Bay Area has quantitative carbon emissions reductions, sustainable mode shift, and resilience targets for 2035 and 2050, which the SFMTA will help implement through its capital plan and operations. The San Francisco Transit-First policy, outlined in the City Charter, requires all city departments to promote sustainable means of transportation including public transit. The agency utilizes environmental criteria and impact estimates in capital planning, although the agency has not made public detailed, project-specific environmental criteria for the projects financed by the 2021C issuance.
- Additionally, SFMTA has strong internal financial controls and requirements to meet environmental regulations as it receives local, state, and federal funding. Green bond proceeds will be held in a separate account and expenditures are publicly reported to the Bond Oversight Committee on a quarterly basis. We note that the agency does not utilize third-party verification for the allocation of proceeds.

- Our Transparency score (60) reflects that the agency's Bond Oversight Committee discloses use of proceeds at the individual project level in detailed quarterly reports, and in annual progress reports on the status of financed projects. Regarding transparency of environmental impacts, SFMTA tracks project performance metrics including environmental impacts internally and discloses them at the aggregate agency and regional transportation-system level. SFMTA has not published project-specific environmental criteria for some financed projects, and it does not obtain third-party audit or assurance of expenditures or environmental impacts.

Key Strengths And Weaknesses

We believe SFMTA's investments in light rail systems, road, and building infrastructure as outlined would contribute positively to reducing San Francisco's environmental impacts and associated carbon emissions. Prior to the COVID-19 pandemic, the SFMTA had an average weekday ridership of 715,000, including approximately 158,000 passengers on the Muni Metro light rail network, among the busiest networks in the country. San Francisco's high population density enhances the project's overall positive impact as it enables transport modal shifts to San Francisco's large population. The agency's prioritization of electrified mass transit and green buildings aligns with the city's and state's broader climate-related goals. These include San Francisco's Ordinance 81-08 to reduce greenhouse gas emissions 80% below 1990 levels by 2050, its Transit First Policy to reduce the use of individual automobiles, and the SB862 program to invest in the city's light rail fleet. The agency powers the electric portion of its fleet with 100% hydropower-derived electricity and has committed to fully electrify the fleet by 2024.

The agency's focus on green projects underscores its approach to bond proceed allocations. Financed projects are meant to increase transit capacity and reduce transit travel times, driving substantial modal shift away from personal vehicles; the agency has a performance target of shifting 80% of all transportation to sustainable modes by 2030. The agency considers new parking meters as part of the 2021C issuance a green investment because the meters are designed to improve auto traffic flow and reduce vehicle idling times as drivers search for parking spots. This project type is not currently in scope for our Green Transaction Evaluation and is therefore excluded from our analysis.

SFMTA benefits from strong internal financial controls for capital expenditures including bond-financed projects and compliance with relevant environmental regulations for its financed projects. The net proceeds of the financing will be credited to a separate bank account and expenditures are reported at a project-level on a quarterly basis.

SFMTA's internal planning and decision-making has positive characteristics, including use of data and agency-wide environmental goals and projections to select and prioritize projects.

We note that this is SFMTA's first green bond issuance and agency efforts to establish impact disclosure standards were delayed due to COVID-19; management is considering including such disclosures for green bond proceeds in quarterly reports at a future date. Some disclosures of environmental impacts are publicly available in aggregate. For example, SFMTA has agency-level reporting of environmental key performance indicators on its website, including carbon emissions, energy consumption, and modal usage. Additionally, projections of the environmental impact of some SFMTA-wide initiatives are available in various public locations, although they are not aggregated for bondholders. The agency does not disclose the methodology used to calculate expected environmental impacts or have data third-party verified.

Sector-Level Scores

Sector	Location	Technology	Use of proceeds (mil. xxx)	Use of proceeds treatment	Net benefit ranking

Green Transaction Evaluation Process

Our Green Transaction Evaluation Approach

Weighted aggregate of three:

Common approach used amongst opinion providers

Unique to S&P Global Ratings

Final Green Evaluation (E1 - E4 or R1 - R4)

eKPI--Environmental Key Performance Indicator.

Standard & Poor's Financial Services LLC or its affiliates (collectively, S&P) receives compensation for the provision of the Sustainable Finance External Reviews and Opinions product (Product). S&P may also receive compensation for rating the transactions covered by the Product or for rating the issuer of the transactions covered by the Product. The purchaser of the Product may be the issuer.

The Product is not a credit rating, and do not consider credit quality or factor into our credit ratings. The Product does not consider, state or imply the likelihood of completion of any projects covered by a given financing, or the completion of a proposed financing. The Product encompasses Framework Alignment Opinions and Transaction Evaluations. Types of Framework Alignment Opinions include: (i) Green Framework Alignment Opinion: a Green Framework Alignment Opinion provides a second opinion on alignment of a green financing framework with the published "Green Bond Principles" and/or "Green Loan Principles"; (ii) Social Framework Alignment Opinions: a Social Framework Alignment Opinion provides a second opinion on alignment of a social financing framework with the published "Social Bond Principles"; and (iii) Social Framework Alignment Opinions: a Social Framework Alignment Opinion provides a second opinion on alignment of a social financing framework with the published "Social Bond Principles." Types of Transaction Evaluations include: (i) Green Transaction Evaluations: a Green Transaction Evaluation provides a relative green impact score on instruments targeted at financing environmentally beneficial projects and may also include a second opinion on alignment of the instrument with the published "Green Bond Principles" and/or "Green Loan Principles"; (ii) Social Transaction Evaluations: a Social Transaction Evaluation provides a relative social impact score on instruments targeted at financing socially beneficial projects and may also include a second opinion on alignment of the instrument with the published "Social Bond Principles"; (iii) Sustainable Transaction Evaluations: a Sustainable Transaction Evaluation provides a relative sustainability impact score on instruments targeted at financing both environmentally and socially beneficial projects and may also include a second opinion on alignment of the instrument with the published "Sustainability Bond Guidelines". The Product is a statement of opinion and is neither a verification nor a certification. The Product is a point in time evaluation reflecting the information provided to us at the time that the Product was created and published, and is not surveilled. The Product is not a research report and is not intended as such.

S&P's credit ratings, opinions, analyses, rating acknowledgment decisions, any views reflected in the Product and the output of the Product are not investment advice, recommendations regarding credit decisions, recommendations to purchase, hold, or sell any securities or to make any investment decisions, an offer to buy or sell or the solicitation of an offer to buy or sell any security, endorsements of the suitability of any security, endorsements of the accuracy of any data or conclusions provided in the Product, or independent verification of any information relied upon in the credit rating process. The Product and any associated presentations do not take into account any user's financial objectives, financial situation, needs or means, and should not be relied upon by users for making any investment decisions. The output of the Product is not a substitute for a user's independent judgment and expertise. The output of the Product is not professional financial, tax or legal advice, and users should obtain independent, professional advice as it is determined necessary by users.

While S&P has obtained information from sources it believes to be reliable, S&P does not perform an audit and undertakes no duty of due diligence or independent verification of any information it receives.

S&P and any third-party providers, as well as their directors, officers, shareholders, employees or agents (collectively S&P Parties) do not guarantee the accuracy, completeness, timeliness or availability of the Product. S&P Parties are not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, for reliance of use of information in the Product, or for the security or maintenance of any information transmitted via the Internet, or for the accuracy of the information in the Product. The Product is provided on an "AS IS" basis. S&P PARTIES MAKE NO REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, INCLUDED BUT NOT LIMITED TO, THE ACCURACY, RESULTS, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE WITH RESPECT TO THE PRODUCT, OR FOR THE SECURITY OF THE WEBSITE FROM WHICH THE PRODUCT IS ACCESSED. S&P Parties have no responsibility to maintain or update the Product or to supply any corrections, updates or releases in connection therewith. S&P Parties have no liability for the accuracy, timeliness, reliability, performance, continued availability, completeness or delays, omissions, or interruptions in the delivery of the Product.

To the extent permitted by law, in no event shall the S&P Parties be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs or losses caused by negligence, loss of data, cost of substitute materials, cost of capital, or claims of any third party) in connection with any use of the Product even if advised of the possibility of such damages.

S&P maintains a separation between commercial and analytic activities. S&P keeps certain activities of its business units separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain business units of S&P may have information that is not available to other S&P business units. S&P has established policies and procedures to maintain the confidentiality of certain nonpublic information received in connection with each analytical process.

For PRC only: Any "Sustainable Finance External Reviews and Opinions" or "assessment" assigned by S&P Global Ratings: (a) does not constitute a credit rating, rating, social financing framework evaluation or evaluation as required under any relevant PRC laws or regulations, and (b) cannot be used within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purpose of this section, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.
