The California Street Transit and Safety Project aims to make Muni faster and more reliable, improve comfort for people waiting for and getting on and off the bus, and improve safety for all who travel along California Street between 33rd Avenue and Steiner Street.

We are starting with a listening tour in 2026 to identify what's working and what could be better. This feedback will help shape an initial set of concepts for improving the corridor that we'll share in 2027 for refinements in partnership with community members before any proposals are brought to the SFMTA Board for review and approval.
