# Executive Summary

---

Pursuant to Section 8.A.102(b)(13) of the Charter and Chapter 43 of the Administrative Code of the City and County of San Francisco, the SFMTA may issue revenue bonds and other debt instruments with the concurrence of the Board of Supervisors and the City and without voter approval, and such bonds are to be issued in accordance with State law or any procedure provided for by ordinance. As of December 31, 2025, the SFMTA had issued eight series of bonds: 2012A, 2012B, 2013, 2014, 2017, 2021A, 2021B, and 2021C. Of these series, three were refunding bonds (2012A, 2021A, and 2021B) and the remaining five series, summarized below, were new money bonds issued to fund projects of the SFMTA.

- 2012B generated \$25,700,000 in project funds issued to fund parking garages and parking meters. Following issuance of 2012B funds, additional programs were added including the Systemwide Transit Access and Reliability Program, the Muni Metro Sunset Tunnel Rail Rehabilitation Program, the Muni Metro Turnback Rehabilitation Program, the Muni Green Light Rail Facility Rehabilitation Program, the Muni System Radio Replacement Project, the Muni Metro System Public Announcement and Public Display System Replacement Project, and the Parking Garage Project.
- 2013 generated \$75,000,000 in project funds to fund Muni Transit Safety and Spot Improvements, Complete Streets Capital Improvements, Facility Improvements, Transit Fixed Guideway Improvements, Pedestrian Safety and Traffic Signal Improvements, and Muni Light Rail and Vehicle Procurement.
- 2014, which was issued as 2014-1 and 2014-2, generated \$75,000,000 in project funds to fund Muni Transit Safety and Spot Improvements, Street Capital Improvements, Facility Improvements, Transit Fixed Guideway, Pedestrian Safety and Traffic Signal Improvements, and Muni Light Rail and Vehicle Procurement.
- 2017 generated \$190,000,000 in project funds issued to fund \$35,000,000 in improvements in Mission Bay, \$107,000,000 for Muni Light Rail Vehicle Procurement, and \$48,000,000 for the Van Ness Bus Rapid Transit project.
- 2021C generated \$118,000,000 in project funds and was issued to fund \$96,000,000 for Green Projects and \$22,000,000 for the Parking Meter Replacement project.

As shown in Table 1 of the Bond Expenditures section, as of December 31, 2025, \$439,173,214, or 90.8% of the authorized amount was expended, and \$44,526,786 or 9.2% remained to be expended or encumbered. The principal balance in series 2012B, 2013, 2014, and 2017 have been spent. SFMTA Capital Budget is in the process of reprogramming the \$8,546,835 cost savings from the Van Ness BRT project in 2021C series and the \$6,478,522 unallocated interest from all series. The analysis is ongoing to select the most suitable projects that have funding needs and consistent cashflows to spend down the remaining balances. This

will include reallocating the remaining funds in the Van Ness Bus Rapid Transit project to the 1200 15th Street Facility Renovation project, to be used for Parking Enforcement operations. Staff will take action as necessary to make these programming changes and will return to the Bond Oversight Committee with regular updates.

This report to the San Francisco Municipal Transportation Agency (SFMTA) Bond Oversight Committee (BOC) covers the first and second quarters of Fiscal Year 2025-2026 through December 31, 2025.

San Franciscans and other interested parties can track progress on the projects and programs supported by these funds at <https://www.sfmta.com/committees/sfmta-bond-oversight-committee-boc>. Previous reports are also available there.

# Project Status Reports

---

This section presents bond-funded implementation and financials statuses. “Total Programmed Bonds” captures all revenue bonds allocated to projects, even if projects received funding from more than one bond series. No project report is provided for scope components that have fully expended revenue bonds or are pending closeout or have been closed in the city’s financial system for this fund source.

There are four key dates to track project completion: Project Initiation Date, Substantial Completion Date, Current Start Date, and Current End Date. Project Initiation and Substantial Completion Dates have been approved by the Transportation Capital Committee (TCC). The Project Initiation Date is the TCC-approved project launch date. The Substantial Completion Date is the date that most of the work is finished, and, in some cases, the facility is open for use. However, the project is active, and the contractor is completing punch list items before the Final Invoice is paid and the project is closed. Current Start and End Dates (shown in the bar chart timelines at the bottom of each Project Status Report) are under review and not yet approved by the TCC. If the TCC has not yet approved schedule changes, there may be discrepancies between the Project Initiation Date and Substantial Completion Date and the Current Start and End Dates.

**1200 -15th Street Renovation (Green)**

The future SFMTA Parking Enforcement Headquarters is located at 1200 15th Street between Harrison on the west and Treat Avenue on the east. Scott Garage, which is also owned by SFMTA, borders the property on the north. The proposed project scope is to create a new headquarters for SFMTA’s Parking and Traffic Enforcement Division at 1200 15th Street in the existing building after its rehabilitation, so Enforcement can finally relocate out of leased space at 505 7th Street and at 571 10th Street, which are too small. The existing two-story concrete building will be seismically retrofitted, renovated, and converted into offices and other Enforcement functions. The ground floor will be used for lockers, roll call and training, with parking and Electrical Vehicles (EV) charging stations. The second floor will be used for offices, conference rooms, lockers, and a kitchen.

The areas outlined for renovation are in the existing building footprint of the building, and in the associated vacated street parcel - Lot 007, a former portion of and adjacent to Treat Avenue. The sewer lines preclude any construction that requires deep foundations along APN 3925 – Lot 007, vacated Treat Avenue and on the Treat Avenue right-of-way. The project is to meet LEED Gold. Solar power on the roof will be provided by the SFPUC.

**ACCOMPLISHMENTS THIS PERIOD**

The Bureau of Architecture (BOA) design team completed 95% Construction Developments in August 2025 and ceased work pending resolution of the funding & budget issues.

**UPCOMING PROJECT MILESTONES (6-MONTH LOOK-AHEAD)**

100% Construction Documents is scheduled for Feb-March 2026. The goal is to issue a construction NTP by the summer of 2026.

**PROJECT CHALLENGES/AREAS OF CONCERN**

Project funding is a continued concern. The CM/GC's (Clark Construction) preconstruction services contract duration ended July 10, 2025 and was put on hold as was the A/E team following completion of the 95% CD milestone in August 2025. The SFPUC Box Sewer Replacement project continues to be a challenge, with their project schedule also being pushed back to undetermined dates.

**5 Fulton: Arguello to 25th Ave Rapid Project**

Outreach, design and implement engineering changes to reduce travel time and improve reliability on the 5 Fulton corridor along Fulton Street between Arguello and 25th Avenue. The 5 Fulton is a Rapid Network route and an important connector between the Richmond District and Downtown. This project would improve reliability and travel times by implementing various enhancements throughout the corridor, including new bus bulbs, transit stop optimization, and other improvements. As a part of Muni Forward, these improvements seek to improve service reliability, reduce travel time on transit, and improve customer experiences and service efficiency. Transit riders will not only benefit from faster and more reliable trips, but will also experience enhanced transit safety and overall effectiveness.

**Parking Meter Replacement**

Replacement of 26,000 metered spaces in the City with updated equipment, due to end-of-life issues and need to update to current wireless technology. SFMTA procured 12,100 single-space meters and 2,765 multi-space pay stations. 2,644 pay stations and 11,082 single-space meters were installed, with each hardware type covering approximately 50% of metered spaces in the City. Remaining hardware is allocated to spare inventory and will support on-going repairs and maintenance.

**Train Control System Upgrade**

Plan, design, procure and install the next-generation Communications-Based Train Control (CBTC) System for the rail network, including surface and subway alignments. Investing in a new CBTC System will bring the train control system into a state of good repair and will result in a more efficient, reliable, and safe way to manage LRV traffic. The CBTC System will improve transit service by reducing congestion-related delays, providing more consistent travel times, reducing headways and improve overall system safety for all Muni Metro LRV lines.

The project team completed Concept Design Review (CDR), minus one document which will be approved in January 2026. Project is currently at 10% design overall.

**UPCOMING PROJECT MILESTONES (6-MONTH LOOK-AHEAD)**

CDR project milestone and Contract Modification #1 are expected in January 2026. SFMTA and Hitachi are now working on Preliminary Design Review (PDR) starting with an Automatic Train Supervision (ATS) workshop the week of January 12th, and a pre-construction and schedule workshop the week of January 20th. Work continues to draft a contract modification to the Siemens contract in time for their participation in PDR. PDR is anticipated in April-May 2026.

**PROJECT CHALLENGES/AREAS OF CONCERN**

Although agreement on a high level schedule was reached earlier in 2025, Hitachi still lacks a detailed project schedule which will be used to manage the day-to-day schedule. This remains a significant risk and will be addressed with Hitachi leadership. SFMTA continues to wait for a response from the Federal Communication Commission (FCC) on the outcome of the license application for 4.9GHz band, which remains a risk to the project that the team is working to address through an alternative strategy. As Hitachi's design comes into focus, there is a risk that the Hitachi onboard vehicle design will not be acceptable to Siemens. SFMTA is working to establish a channel of communication between these contractors to address this risk.
