4.4.1 Stakeholder rating: satisfaction with SFMTA management of transportation in San Francisco: scale of 1 (low) to 5 (high)					2.9																

<sup>1</sup> Results are based on a non-probability sample from opt-in SFMTA online panel surveys and have been weighted to reflect the geographic distribution of the San Francisco population.

<sup>2</sup> Beginning with FY2015, includes all taxi, TNC, and black car service-related incidents reported to SFPD. Reporting for prior months includes "defrauding taxi driver", "operating taxi without a permit", and "overcharging taxi fare" incidents only.

<sup>3</sup> Due to a previous calculation error that resulted in the over-reporting of 311 cases, some monthly values between May 2012 and Dec 2014 were re-calculated and revised in this document.

<sup>4</sup> Includes assaults and threats on operators.

<sup>5</sup> Injury collisions.

6 <1 min for headway of 5 min or less.

<sup>7</sup> Effective April 2015, the Muni Rapid Network is defined as routes/lines J, K, L, M, N, 5R, 7R, 9R, 14R, 28R, and 38R. This report reflects the updated Rapid Network. Note: due to a NextBus data syncing issue, data for J and N lines are not included in reporting for Saturday service from 7/11/15 through 7/25/15 and data for all LRV lines are not included in reporting for 7/31/15.

September 2015 OTP figures have been revised to correct for a data processing error.

<sup>8</sup> Due to a previous calculation error, monthly FY14 results were incorrectly reported in previous Metrics reports and have been corrected in this document.

<sup>9</sup> Due to a reporting error, previous Metrics reports stated average Saturday ridership for December 2014 instead of weekday. This document reports the correct weekday figure.

<sup>10</sup> Increase in percent of metered hours with no rate change indicates achievement of price point and parking availability goals. Note: sensor based rate adjustments were limited to SFpark pilot blocks with 50% or more parking sensor coverage through February 2014. Sensor Independent Rate Adjustments (SIRA) based on meter payment data started in June 2014 and include all SFpark pilot area blocks including those that fell below the 50% parking sensor threshold. These blocks have not approached their price point yet, which lowers the baseline for this metric. Moving forward, June 2014 will be considered the new baseline for SIRA.

<sup>11</sup> Shift in utilization from peak to off-peak indicates successful mitigation of congestion on city streets.

<sup>12</sup> Shift in utilization to hourly from early bird and monthly indicates garages are used more for short trips that benefit nearby businesses and less for commute trips by auto.

<sup>13</sup> Running total of SFMTA-installed facilities.

<sup>14</sup> Figures reflect monthly average consumption and do not include resource consumption at facilities leased by the SFMTA.

<sup>15</sup> Data collection began in October 2014. No data were collected in December 2014. June 2015 figure has been revised to correct for a previous calculation error.

<sup>16</sup> Figures are adjusted for inflation to reflect FY15 dollars.

<sup>17</sup> FY Total rather than FY Average.

<sup>18</sup> Due to a new automated reporting process that accurately reflects the current Transit Operator MOU-based performance standard for timeliness of complaint resolution, the reported percentage of Muni related 311 complaints resolved within 28 business days slightly differs from previously published figures.
