Sutter Street, north side, from 90 feet to 260 feet west of Buchanan #  
(Supervisor District 5) Edgar Orozco, Edgar.Orozco@sfmta.com

An extended white zone at this location would help address double parking, which largely occurs due to the high volume of drop-offs and pick-ups at the adjacent cultural and daycare centers.

Decision: Approved by the City Traffic Engineer for implementation.

5(a). RESCIND – RAISED CROSSWALKS (PREVIOUSLY LEGISLATED BUT NOT BUILT)

8. ESTABLISH – ROAD DIET
Sutter Street between Fillmore Street and Webster Street
Sutter Street between Buchanan Street and Gough Street
(Supervisor District 5) Edgar Orozco, Edgar.Orozco@sfmta.com

There are currently three lanes on Sutter St., two westbound and one eastbound, all of which are narrower than desired for the Muni buses that travel on the corridor. Removing a lane in the westbound direction and reallocating the remaining space would minimize the potential for collisions.

Public Comments: Comments in support and opposition.
Decision: Approved by the City Traffic Engineer only after an evaluation of the implementation of item #4 shows a continuing need to change the roadway lane configuration.
Whether or not the City Traffic Engineer’s decision is considered a Final SFMTA Decision is determined by Division II, Section 203 of the Transportation Code. If the City Traffic Engineer approves a parking or traffic modification, it is considered a Final SFMTA Decision. If a City Traffic Engineer disapproves or declines a parking or traffic modification, a member of the public must request additional review by the SFMTA of that decision which shall be conducted pursuant to Division II, Section 203 of the Transportation Code before the decision becomes a Final SFMTA Decision. Final SFMTA Decisions, whether made by the City Traffic Engineer or the SFMTA Board, can be reviewed by the Board of Supervisors pursuant to Ordinance 127-18. Decisions reviewable by the Board of Supervisors are denoted with a pound (#).
