

# Bayview Quick-Build Safety Projects

## WILLIAMS AVENUE

Spring 2021

The Bayview Quick-Build Safety Project on Williams Avenue is the implementation of traffic safety improvements directly recommended by the **Bayview Community-Based Transportation Plan**. This project is in support of San Francisco's **Vision Zero** commitment of eliminating all traffic deaths and serious injuries.

Over the past five years, there have been **20 reported traffic collisions that resulted in injury**. Failure to yield at crosswalks accounted for the **majority of injury collisions** along the project area.

This **quick-build** project aims to **reduce the risk** of traffic-related injuries or deaths by using reversible, adjustable traffic safety treatments that can be installed relatively quickly.

### Project goals include:

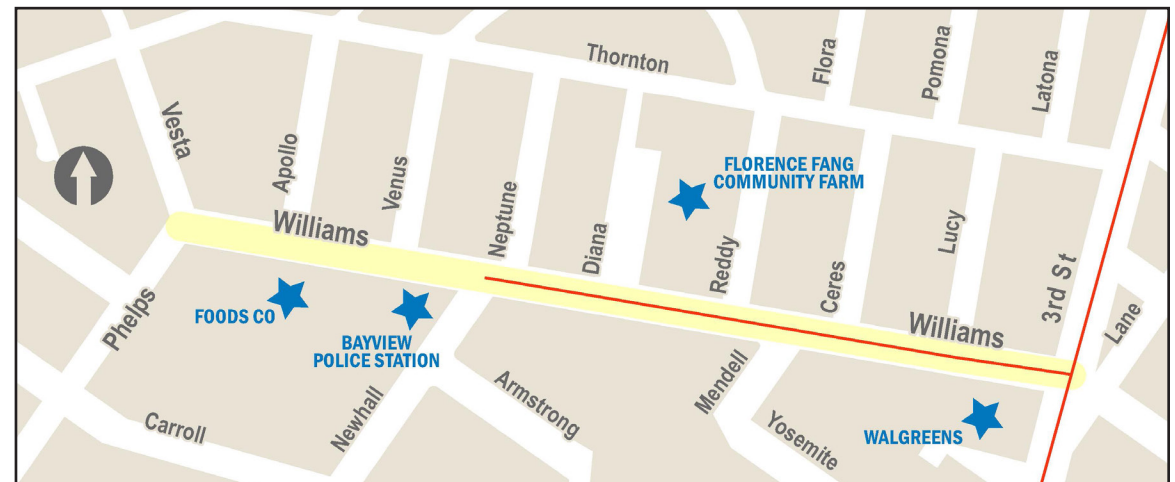

Increasing visibility, safety, and comfort for pedestrians

Preventing reckless driving and slowing down vehicle speeds

## Project Location

Williams Avenue is on the City's High-Injury Network, which are the 13 percent of city streets that account for 75 percent of San Francisco's traffic crashes.

## WILLIAMS AVENUE

Spring 2021

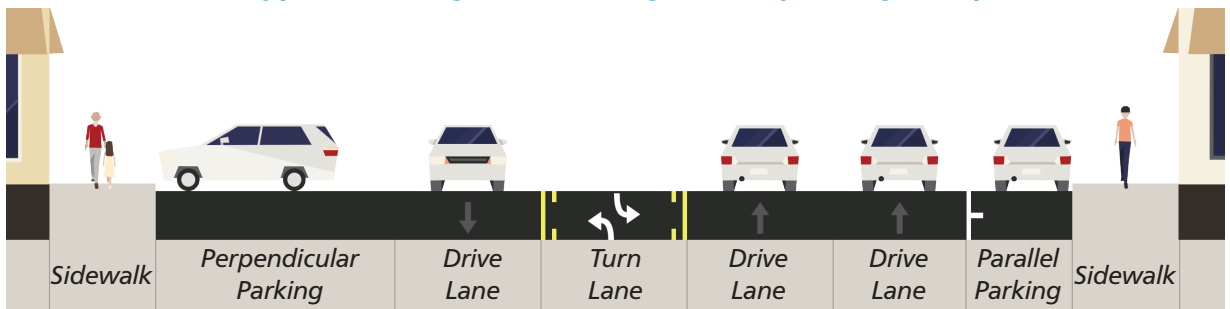

### Proposed Improvements

Quick-build projects are reversible, adjustable traffic safety improvements that can be installed relatively quickly. Unlike major capital projects that may take years to plan, design, bid and construct, quick-build projects are buildable within weeks or months and are intended to be evaluated and reviewed soon after construction.

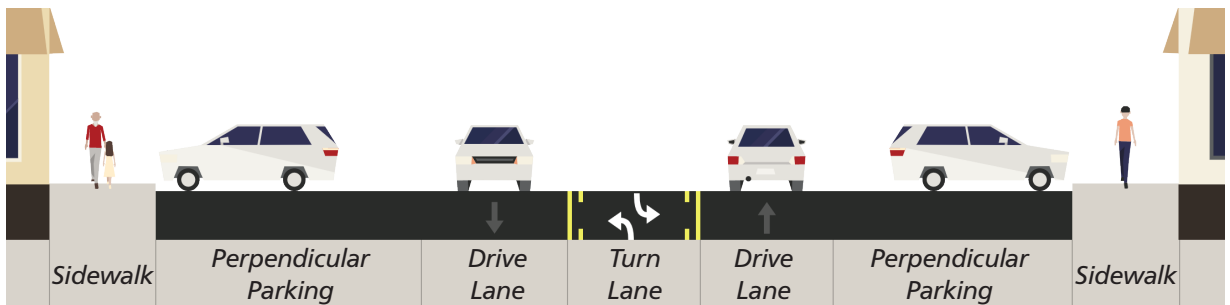

The SFMTA is proposing the quick-build improvements shown here in order to address traffic safety challenges along Williams Avenue. Let us know what you think! Contact us at [BayviewQB@sfmta.com](mailto:BayviewQB@sfmta.com).

### We want to hear from you!

From April 22 through May 13, the SFMTA is hosting a virtual open house and public hearing as one way to provide more information about the project proposals and collect feedback.

Additionally, SFMTA project team staff will be hosting in-person and online office hours to discuss project proposals with you in detail to provide opportunities for you to ask questions.

Access the virtual open house and public hearing from the project website: [www.sfmta.com/BayviewQB](http://www.sfmta.com/BayviewQB)
