The following requirements and guidance are intended to ensure that SFMTA Permittees, Authorized Operators, and contractors (collectively Qualified Operators) meet their obligations under the law, and as applicable, their agreement, permit, Proof of Concept Authorization (POCA), or other authorization, and to ensure that parked Mobility Devices do not reduce the safety and accessibility of San Francisco sidewalks. For purposes of these guidelines, “Mobility Devices” include Powered Scooters that are part of a Powered Scooter Share Program, Stationless Shared Bicycles, and devices permitted under a Proof of Concept Authorization. Unless otherwise defined in these guidelines, all capitalized terms have the same definitions as in Article 900 and Article 1200 of Division II of the Transportation Code, as applicable.

State and local law impose limitations on the parking and placement of Mobility Devices in the public right-of-way in San Francisco. Section 7.2.110(b) makes it a violation for a Mobility Device, as defined in Section 1202 under Division II, that is part of a Shared Mobility Device Service to “park, leave standing, or leave unattended…on any sidewalk, Street, or public right-of-way under the jurisdiction of the Municipal Transportation Agency or other City department or agency without a permit, agreement, or other authorization issued by the appropriate City department or agency authorizing the Mobility Device to be parked, left standing, or left unattended at that location except as otherwise provided in Division II of this Code. Mobility Devices parked, left standing, or left unattended in violation of this Section 7.2.110 constitute a public nuisance subject to abatement and removal pursuant to Article 26 of the Public Works Code, Sections 1600 et seq.”

San Francisco Public Works Code Section 723 prohibits obstructing the public right-of-way and provides that “(i)t shall be unlawful for any person, firm or corporation, without permission from the Department of Works, to pile, cap or otherwise obstruct or place obstructions upon, above, or below, any public right-of-way....” “Public right-of-way” in Section 723 includes sidewalks. Section 723 provides that any violation also constitutes a public nuisance subject to citation and abatement including impoundment as set forth in Chapter 80 of the San Francisco Administrative Code.

In addition, parking Mobility Devices in a manner that impedes pedestrian traffic presents significant challenges for other sidewalk and street users, particularly for older adults or persons with disabilities, such as someone who is low vision or blind or someone who uses a mobility aid such as a wheelchair or cane.
Qualified Operators must use this guidance to instruct customers and staff on how to park a Mobility Device properly. In doing so, Qualified Operators may use the following summary “do/don’t” language. However, the Qualified Operator’s Mobility Devices will be subject to all parking requirements and guidelines described in this document. Additionally, please note that sidewalk riding, even while parking a Mobility Device, is dangerous and prohibited. Any and all violations to these parking requirements may constitute violations of the terms and conditions of the applicable permit, agreement, or POCA and may subject the Qualified Operator to imposition of citations, administrative penalties, or other applicable remedies. Repeated and pervasive violations by a Qualified Operator’s users may subject the Qualified Operator to revocation of its permit or POCA, or other applicable remedies depending on the agreement or authorization.

Below are 11 general requirements for Mobility Device parking that Qualified Operators must communicate to users and staff and for which the Qualified Operators will be responsible for violations by their respective users subject to the enforcement rules described below. Detailed parking requirements are included on page 4 alongside each of these simplified guidelines and a do/don’t summary.

When parking your Mobility Device on the sidewalk:

1. **Only park on the area of the sidewalk closest to the curb or in specially designated areas, such as bike racks.** Mobility Devices parked along the curb should be in line with and between fixed objects (trees, trash cans, bike racks, newspaper racks, etc.). Make sure to leave enough space for other sidewalk users to continue using those objects or amenities.
2. **Do** make sure that your Mobility Device is always parked upright.
3. **Do not** obstruct pedestrian space; ensure that your Mobility Device when parked does not protrude into the area where pedestrians will walk or roll.
4. **Do not** park at corners, on or in front of curb ramps, crosswalks, or anywhere two pedestrian paths of travel intersect. Mobility Devices left in these areas impede the area where pedestrians walk or roll.
5. **Do not** park on narrow sidewalks that are less than 9 feet wide. Parking Mobility Devices on narrow sidewalks impedes the area where pedestrians walk or roll.
6. **Do not** park against building facades. Mobility Devices left against buildings impede the path of travel, especially for blind or low-vision pedestrians who use building facades to guide them.
7. **Do not** obstruct access to bus stops or areas where riders wait or get on/off the bus; loading zones marked by a yellow or white curb; or blue accessible parking spaces. Mobility Devices left in these areas block wheelchair ramps from being deployed, impede passenger access, and are a serious tripping hazard to everyone.
8. **Do not** obstruct access to fire hydrants or other fire hose access points, emergency exits, or utility boxes. Mobility Devices left in these areas impede emergency access.
9. Do not park in front of doors, driveways, ramps, stairs, handrails, blocking access to vehicle or bike lanes, near door entry systems, or other access points. Mobility Devices left in these areas impede the area where pedestrians walk or roll.

10. Do not park Mobility Devices in front of, on top of, or attached to sidewalk amenities and landscaping, such as seating areas, kiosks, ATMs, mailboxes, news racks, trash receptacles, benches, parklets, and planted areas or features, such as tree wells or planting strips. Mobility Devices left in these areas impede pedestrian access and may damage sidewalk amenities.

11. Do not park Mobility Devices in front of a permitted Shared Space, even if there is a bike rack present. Locking devices in these zones impedes the accessible path of travel to sidewalk and parking lane dining.

When parking at a bike rack:

1. Do lock the Mobility Device securely. Mobility Devices should be upright, parallel to the rack and within the footprint of the bicycle racks. Mobility Devices should not block the path of travel, access to other street furniture or amenities, or hang over the curb into the street.

2. Do leave space for other riders to use the bike racks. Park a maximum of two scooters or one bicycle on one side of each inverted U-rack. At larger corrals or in areas where there are multiple racks, only use 50% of the rack space total.

3. Do not lock your Mobility Device to another vehicle on the rack.

When riding your Mobility Device on the Embarcadero Promenade, (Between Third Street at Oracle Ballpark and the entry of Pier 45 in Fisherman’s Wharf):

1. Do ride in the bike lanes along the Embarcadero.

2. Do not ride on the Promenade path of the Embarcadero. Riding a powered Mobility Device on the Embarcadero Promenade is a violation of Port Code.

<tr>
<th>5-6 Word Do/Don’t Summary</th>
<th>Simplified summary of detailed requirements in the next column</th>
<th>Detailed Parking Requirements for Permittees/Authorized Operators/Riders</th>
</tr>
</thead>
<tbody>
<tr>
<td>Park Near the Curb</td>
<td>Do place your Mobility Device on the area of the sidewalk closest to the curb or in specially designated areas, such as bike racks. The Mobility Device should be on a paved part of this area in line with and between fixed objects (such as trees, trash cans, bike racks, newspaper racks, etc.). Make sure to leave enough space for other sidewalk users to continue using those objects or amenities.</td>
<td>• Mobility Devices shall only be parked in the street furniture zone or within the footprint of a rack. • Mobility Devices may only be parked on hard surfaces within the furniture/furnishings zone (e.g. concrete, asphalt) between fixed objects. • The furnishings zone is defined as the area of the sidewalk where street furniture—such as light poles, signposts, street trees, USPS mailboxes, trash cans, et cetera—is placed. This zone is located between the pedestrian throughway and the curb. (Refer to Figure 1 for illustration.) • Mobility Devices shall not be parked on blocks where there is no furniture zone, except in cases where there are sidewalk racks or in-street bike racks available.</td>
</tr>
<tr>
<td>Park Device Upright</td>
<td>Do make sure that your Mobility Device is securely parked upright when you leave it.</td>
<td>• Mobility Devices should be parked upright.</td>
</tr>
<tr>
<td>Don’t Obstruct Pedestrian Space</td>
<td>Do not obstruct pedestrian space; ensure that your Mobility Device when parked does not protrude into the area where pedestrians will walk or roll.</td>
<td>• Regardless of the width of the sidewalk, a parked Mobility Device should in no way obstruct the pedestrian space (Refer to Figure 2 and Figure 3 for illustration).</td>
</tr>
<tr>
<td>Don’t Park at Corners or Blocking Curb Ramps</td>
<td>Do not park at corners, on or in front of curb ramps, crosswalks, or anywhere two pedestrian paths of travel intersect.</td>
<td>• Mobility Devices must be parked at least 15 feet from any incline portion of curb ramps. • Mobility Devices must be parked at least 15 feet from any street corner (defined as any curved portion of the curb where two or more streets intersect). • Mobility Devices must not be parked where two paths of travel intersect (e.g. a T-intersection). This includes the intersection of any walkways or paths.</td>
</tr>
<tr>
<td>Don’t Park on Narrow Sidewalks</td>
<td>Do not park on narrow sidewalks that are less than 9 feet wide (approximately three times the length of one Mobility Device).</td>
<td>• Mobility Devices must not be parked on sidewalks that are less than 9 feet wide.</td>
</tr>
<tr>
<td>Topic</td>
<td>Instruction</td>
<td>Notes</td>
</tr>
<tr>
<td>----------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Don’t Park Along Buildings</td>
<td><strong>Do not</strong> park against building facades.</td>
<td>• Mobility Devices shall not be parked along building facades. (Refer to Figure 4 for illustration).</td>
</tr>
<tr>
<td>Don’t Block Bus Stops and Loading Zones</td>
<td><strong>Do not</strong> obstruct access to bus stops or areas where riders wait or get on/off the bus or enter stations; loading zones marked by a yellow or white curb; or blue accessible parking spaces.</td>
<td>• Mobility Devices must be parked more than 15 feet from curb-side bus zones, transit shelters, transit access points (e.g. stairs, elevators, escalators), yellow commercial loading, white pedestrian loading and blue accessible parking spaces/zones, except where bike parking is provided.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Mobility Devices must not be parked in or adjacent to MUNI transit stops, platforms, islands, stairs, escalators, or elevators.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Mobility Devices must not be parked adjacent to any blue accessible parking space, except where bike parking is provided. (Refer to Figure 5 for illustration).</td>
</tr>
<tr>
<td>Don’t Block Fire Hydrants</td>
<td><strong>Do not</strong> obstruct access to fire hydrants or other fire hose access points, emergency exits, or utility boxes.</td>
<td>• Mobility Devices must be parked at least 15 feet from fire hydrants or other fire hose access points, emergency exits, and cannot block access to utility boxes.</td>
</tr>
<tr>
<td>Don’t Block Access Points</td>
<td><strong>Do not</strong> park in front of doors, door entry systems, driveways, ramps, stairs, or handrails, or blocking access to vehicle or bike lanes, or other access points.</td>
<td>• Mobility Devices must not be parked in a manner that blocks access to driveways, stairs, doors, door entry systems, handrails, or other access points.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Mobility Devices must not block or be parked within six feet of building entrance controls, which include power door operator buttons, intercom speakers, handsets, keypads, card scanners, and turnstiles. (Refer to Figure 4 for illustration).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Mobility Devices must not be parked in bike lanes or vehicle lanes.</td>
</tr>
<tr>
<td>Don’t Interfere with Sidewalk Amenities and Landscaping</td>
<td><strong>Do not</strong> park Mobility Devices in front of, on top of, or attached to sidewalk amenities and landscaping, such as seating areas, kiosks, ATMs, mailboxes, news racks, trash receptacles, benches, parklets, and planted areas or features, such as tree wells or planting strips.</td>
<td>• Mobility Devices must not be parked in a manner that blocks access to sidewalk amenities such as seating areas, kiosks, ATMs, mailboxes, and news racks.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Mobility Devices must not block street furniture that requires pedestrian access (for example – trash receptacles, benches, mailboxes, or parking pay stations).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Mobility Devices must not be parked in or against landscaped portions of the public right-of-way, including parkways, planting/buffer strips, planters, tree wells/basins/grates, medians, and bioswales.</td>
</tr>
<tr>
<td>Lock Mobility Device securely to a bike rack.</td>
<td>Lock the Mobility Device securely. It should be upright, parallel to the bicycle rack, and within the footprint of the rack.</td>
<td>• Mobility Devices should not block the path of travel, access to other street furniture or amenities, or hang over the curb into the street.</td>
</tr>
<tr>
<td><strong>Leave space for other riders on the bike rack.</strong></td>
<td>Ensure that shared mobility devices do not use all available bike parking.</td>
<td>• Mobility Devices should be within the footprint of the rack. (Refer to Figure 6 for illustration).</td>
</tr>
</tbody>
</table>
| **Don’t lock to other vehicles.** | When using the lock-to, be sure not to lock your Mobility Device to other vehicles or bikes. | • Limit Mobility Devices to only one side of a rack. Park a maximum of two scooters or one bicycle on one side of each inverted U-rack to allow others to park on the opposite side.  
• When there are multiple racks in an area or in a single corral, shared Mobility Devices of all types may use a maximum of 50% of the racks. |
| **Don’t park in or adjacent to a Shared Space.** | Do not park in or adjacent to a Shared Space, even if there is a bike rack in the zone. | • Locking devices in these zones impedes access to dining and retail areas. (Refer to Figure 7 for illustration).  
• Parking in the zone is not allowed at any hour of the day. This is to prevent locked vehicles from obstructing the path when a business eventually opens. |
Enforcement of Parking Requirements:

1. Any Mobility Device belonging to a Qualified Operator that is parked improperly in violation of these parking requirements is subject to citation. Upon issuance of citation, the SFMTA will issue a removal notice to Qualified Operators that its Mobility Device is improperly parked on a sidewalk, Street, or public right-of-way under the jurisdiction of the SFMTA or Public Works, and that the Qualified Operator must remove the Mobility Device within two hours. (See, e.g., Transportation Code § 916(d)(4)). Any Mobility Device that is not removed by the Qualified Operator may be removed by City staff and taken to a City facility for storage at Qualified Operator’s expense and may be subject to additional citations as applicable.

2. Notwithstanding 1. above, in certain circumstances, SFMTA will issue a warning notification without citation, provided that a device is not obstructing an accessible path of travel or the intended use of public space or amenity in regards to the following categories:
   a. Left standing or unattended devices, including but not limited to, "free-locked" devices (i.e., locked only to itself and not to a rack or other infrastructure) not obstructing the accessible path of travel, nor any other location as defined by parking requirements (e.g., amenity, corner, curb ramp, passenger loading zone or bus stop);
   b. Devices that have tipped over, provided that the device is not obstructing the accessible path of travel, nor any other location as defined by parking requirements (e.g., amenity, corner, curb ramp, passenger loading zone or bus stop); and
   c. Devices parked at the same rack as another device, provided that there is no other violation (as defined in this document).

   Upon warning notification issued by the SFMTA to remove any Mobility Device belonging to a Qualified Operator, the Qualified Operator shall remove the Mobility Device within two hours. Failure to remove or repark the device in accordance with the notice may result in the issuance of a citation. (See, e.g., Transportation Code § 916(d)(4)).

3. The SFMTA reserves the right to determine certain block faces where Mobility Device parking is prohibited and will notify an SFMTA Permittee or Authorized Operator in advance of the applicable parking restriction(s) in writing.

4. In areas adjacent to any of the following locations, Mobility Devices shall be parked to provide a minimum clearance of 6 feet (with a maximum required clearance of 15 feet, as specified in the table above):
   a. Parklets
   b. Entrances and exits
   c. Crosswalks (marked and unmarked)
   d. Sidewalk areas at crosswalks
   e. Street corners
   f. Pedestrian Throughway Zone
   g. Transit stops, platforms and islands
   h. Loading Zones (white and yellow curbs)
   i. Accessible parking spaces (blue curb)
   j. Driveways

5. Mobility Device parking may also be restricted in areas other than those under the jurisdiction of the SFMTA or Public Works subject to the determination and rules of the applicable jurisdiction.
Figure 1 – Location of Furnishing Zone Relative to Other Sections of the Sidewalk and Roadway. Typical Edge Zone width is 2 feet from the curb.
Figure 2 – Furnishing Zone Illustration - The area shaded in green illustrates the furniture zone where Mobility Devices are permitted to park. Note how the parked Mobility Device extends beyond the “shadow” of the trash can, and therefore extends outside of the furniture zone and would be considered incorrectly parked and subject to penalty.
Figure 3 – Additional Furnishing Zone illustration – This device also extends outside of the furnishing zone, impeding the throughway.
Figure 4 – Building Façade Illustration - Note how the parked Mobility Device is parked against the building façade, which impedes the path of travel, especially for blind or low-vision pedestrians. This Mobility Device also blocks the entrance to the building by requiring people entering or exiting the building to walk or roll around the device, causing an obstruction and potential tripping hazard.
Figure 5 – Accessible Parking illustration - Mobility Devices must be parked more than 15 feet from curb-side bus zones, transit shelters, transit access points (e.g. stairs, elevators, escalators), yellow commercial loading, white pedestrian loading and blue accessible parking spaces/zones, except where bike parking is provided. Mobility Devices must not be parked adjacent to any blue accessible parking space. Note that the pictured device is parked adjacent to a blue zone, which can impede loading and unloading.
Figure 6 – Footprint of the Rack Illustration – The devices shaded in green depict devices parked within the footprint of the rack. The device shaded in red depicts a device parked outside of the footprint, which is considered improper. By parking outside of the rack footprint, devices impede the path of travel.
Figure 7 – Shared Spaces Illustration – The zones shaded in red are part of the Shared Spaces Program. Mobility Devices should not be parked in or adjacent to a Shared Space at any hour of the day. Shared Spaces is a multi-agency program of San Francisco’s Economic Recovery Task Force that allows merchants and community groups to use sidewalks, full or partial streets, and other nearby public spaces like parks, parking lots and plazas, for restaurant pick-up and other neighborhood retail activities allowed under San Francisco’s Public Health Orders. A map of zones may be found on SFMTA.com.
