

### Information and Presentation Requests Matrix – 2025

Reference Number	Ву	Request	Staff Responsible	Status	Response
250105.01 (Email)	Connor Skelly	Now that we are a few months in, what is the estimated cost per ride of the Bayview Shuttle? If that data isn't available, can you share the monthly ridership data for the shuttle so far, and the total budget for the project?	Javaun Garcia	Complete	This may be more information than requested but I thought it might be helpful in case there is specific data/metrics that the delegate wanted to look into. You'll find our preliminary data below for the period 11/12 - 1/15, November 12 <sup>th</sup> was our launch date. Also, I can communicate this at the CAC presentation, but we'll have additional data reported every month from this point forward. We're working on finalizing our data collection plan with our vendor, Via, and will share more information about data collection at our Community Congress this upcoming Wednesday from 5:30-7:00 at the SECC. I encourage you or anyone within your network to attend if they're available!  Concerning the budget, our grant agreement award was for \$10.5 million. Of that, \$8.5 million was dedicated to operations of the Bayview Shuttle. Our total contract with our vendor is \$4.3 million but is broken down through yearly renewal options. To keep in mind - this is a pilot project with an end date of March 2026. We plan to for an extension to continue operations past that date from CARB, but authorization of that extension is dependent on legislative approval of future CARB budgets.  Rides
					operations of the Bayview Shuttle. Our total controur vendor is \$4.3 million but is broken down thro renewal options. To keep in mind - this is a pilot pran end date of March 2026. We plan to for an ext continue operations past that date from CARB, bu authorization of that extension is dependent on le approval of future CARB budgets.

		housing complex went up with no parking, so residents often park all day there, making it very difficult and dangerous for families to do dropoff/pickup.			Crosswalks. Sixty seven of those citations for No Parking zones.  We will continue to monitor and check the area regularly.
250206.01	Sue Vaughan	What is the ridership on the connector routes after 7pm?	Simon Hochberg	Complete	On average, there are approximately 1100 daily weekday passenger trips on the Connector Routes from 7pm to 12am. This is approximately 9% of daily ridership on the Connector Routes.
250206.02	Sue Vaughan	How many infractions have there been with commuter shuttle buses between July 1, 2023- June 30, 2024, broken down by company.	Philip Cranna	Complete	This information was emailed to the CAC on 2/28/25
250212.01 (Email)	Sue Vaughan	What rules or guidelines guide the decision about where to install automatic countdown signals and where to install ones that require pedestrian activation?	Sean Kennedy	Complete	We have our ped signal guidelines which basically says we default to fixed time (meaning pedestrians do not have to push the button). But can go with actuation (i.e. somebody DOES have to push the button) if transit priority corridor, if a state highway, or to open new crosswalks, engineering judgment, etc.
250306.01	Aaron Leifer	Requested an update on cell service in the tunnels.	Sohail Warsi	Complete	This topic is scheduled for the May 1st CAC agenda.
250306.02	Sue Vaughan	How many school tripper buses does Muni have and what are the routes	Jessica Garcia	Complete	We have a total of 21 school trippers. Please see the website linked below that provides more detail on what schools have trippers and alternative service for students.

250317.01 (Email)	Jonathan Bünemann	Several neighbors are reporting drivers blowing through the stop sign On Bay Street at Webster. A likely contributor for this is that the stop sign is regularly obscured by campers parking in the angled spots in front of the stop sign. What actions can SFMTA take to address this issue?	Sean Kennedy	Complete	We appreciate the flag and will send out some staff to investigate.
250411.01 (Email)	Sue Vaughan	I would like a list of the school trippers and their scheduled arrival times at SFUSD middle schools.	Jessica Garcia	Complete	This information was emailed to the CAC on 5/30/25.
250411.02 (Email)	Sue Vaughan	If the SFMTA keeps a record of late arriving morning school trippers at middle schools, I would like to see the list of morning late arrivals at Hoover Middle School for the month of March.  Many students are arriving 10 to 30 minutes late and claiming the bus was late. This is daily.	Jessica Garcia	Pending	
250421.01 (Email)	Sue Vaughan	Can the SFMTA direct contractors to put up correct signage and can correct information about where to stop be	Leslie Bienenfeld	Pending

		shared with operators?			
250519.01 (Email)	Sue Vaughan	What additional Muni service was available, if any, on Sunday, May 18 for Bay to Breakers?	Kimberly Ng Sean Kennedy	Pending	
		Was Muni Metro operational at all stations?			
250530.01 (Email)	Sue Vaughan	I would like to know the number of citations issued on Market Street between Van Ness and Main Street from January 2020 until the present for:  a) traffic code violations of any type; and, b) violations specifically of Traffic Code Section 601 (24) and (25).	Shawn McCormick	Complete	This information was emailed to the Council on August 4 <sup>th</sup> .
250602.01 (Email)	John Lisovsky	My question is about the sign on the front of the bus that displays the next stop, please hold on, stop requested, and the time and date. I'm curious roughly how much of the time it's programmed to display each of those functions. Are there rough percentages?  I find that often, I have no idea what the next stop is because that information is	Kimberly Ng Mark Hansen Lupita Ibarra	Complete	Rather than percentages of time, the internal sign messages work based on triggers, like when a bus approaches a stop or a rider requests a stop. Staff can choose whether the triggered messages will play for a pre-determined amount of time or for a certain number of flashes before disappearing. Right now, STOP REQUEST and the upcoming stop names are set to display for 20 seconds, while PLEASE HOLD ON is set to flash 9 times when an operator closes the doors. Unfortunately, this is one global setting in the system, so staff can't change the length for different messages.
